THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 522. TUESDAY, JANUARY 4, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given that

1896. PETER SPENCE, of Pendleton, in the county of Lancaster, Manufacturing Chemist, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in the manufacture of alum."

1897. And JAMES LEWIS FIGGETT, of Missionary Place, Walworth, in the county of Surrey, Surgical Turner, has given the like notice in respect of the invention of "An improved construction of syringe or hand pump."

As set forth in their respective petitions, both recorded in the said office on the 20th day of August, 1858.

1905. And WILLIAM HENSON, of St. Just, in the empire of France, Engineer, has given the like notice in respect of the invention of "Improvements in circular looms or knitting frames."

As set forth in his petition, recorded in the said office on the 21st day of August, 1858.

1909. And FRANCIS PULS, of Roxburgh Terrace, Haverstock Hill, in the county of Middlesex, Chemist, has given the like notice in respect of the invention of "Improvements in the distillation of coal."

1910. And FRANCIS PULS, of Roxburgh Terrace, Haverstock Hill, in the county of Middlesex, Chemist, has given the like notice in respect of the invention of "Improvements in the distillation of bituminous matters and gas tar."

1913. And LEWIS HIGGINS, of Jersey city, and ALEXANDER BROWN, of New York, in the United States of America, Mariners, have given the like notice in respect of the invention of "Improvements in reefing the sails of navigable vessels."

1917. And JOHN HUNTER ROBINSON, Manager to Grant Brothers, of Clements Court, in the city of London, Manufacturers, has given the like notice in respect of the invention of "An improved shirt."

1918. And WILLIAM HORATIO HARFIELD, of Fenchurch Street, in the city of London, has given the like notice in respect of the invention of "Improvements in windlasses."

As set forth in their respective petitions, all recorded in the said office on the 23rd day of August, 1858.

1932. And HENRY WILSON, Engineer, in the employment of Powis and James, of Watling Street, in the city of London, Engineers, has given the like notice in respect of the invention of "Improvements in the mounting of band-saws."

As set forth in his petition, recorded in the said office on the 24th day of August, 1858.

1927. And THOMAS HILL, of Heywood, in the county of Lancaster, Boiler Manufacturer, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for punching and shearing metals."

As set forth in his petition, recorded in the said office on the 25th day of August, 1858.

1931. And JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in bellows."—A communication.

1933. And JAMES BLACK, of Edinburgh, Machine Maker, has given the like notice in respect of the invention of "An improved mode or means of obtaining, applying, and transmitting motive power."

1935. And SAMUEL NEWMAN RODIER, of No. 21, Oak Village, Saint Pancras, in the county of Middlesex, has given the like notice in respect

855529

of the invention of "Improvements in apparatus for regulating gas."

As set forth in their respective petitions, all recorded in the said office on the 26th day of August, 1858.

1938. And THOMAS TROTMAN, of No. 253, Albany Road, Camberwell, in the county of Surrey, Pin Maker, has given the like notice in respect of the invention of "Improvements in hair-pins."

1939. And JOSEPH ELLISDON, of Liverpool, in the county of Lancaster, Designer, and Cabinet Maker, has given the like notice in respect of the invention of "Improvements applicable to reading chairs and other articles used to sit or recline upon."

1943. And HERBERT WILLIAM HART, of No. 69, Fleet Street, Gas Engineer, has given the like notice in respect of the invention of "Improvements in the application of gas to chandeliers."

1947. And WILLIAM KEMPE, of Holbeck Mills, Leeds, has given the like notice in respect of the invention of "Improvements in apparatus used for winding woollen and other fabrics on rollers, in order to such fabrics being boiled or faced when on the rollers."

1948. And JOHN FOWLER, junior, of Cornhill, in the city of London, and ROBERT BURTON, of Kingsland Road, in the county of Middlesex, have given the like notice in respect of the invention of "Improvements in the construction and arrangement of locomotive and other carriages, to facilitate their movement on common roads and other surfaces."

1949. And RICHARD KNIGHT, of Foster Lane, in the city of London, has given the like notice in respect of the invention of "Improvements in apparatus for ærating liquids."

As set forth in their respective petitions, all recorded in the said office on the 27th day of August, 1858.

1953. And GEORGE COODE, of the city of Westminster, Barrister-at-Law, has given the like notice in respect of the invention of "Improvements in the adjustment of hose in machines for distributing liquid manure and other liquids over land, also for an improved method of and apparatus for manufacturing the hose to be used with such machines or otherwise, and for gathering and puckering canvas, linen, leather, and other textile and membraneous substances."

1954. And JAMES DUPRÉ BRABAZON, of Lane's Hotel, St. Alban's Place, Haymarket, Esquire, has given the like notice in respect of the invention of "Improvements in giving motion by sails to screw and other propellers of ships and vessels."

As set forth in their respective petitions, both recorded in the said office on the 28th day of August, 1858.

1960. And GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in billiard tables and cues."—A communication.

1965. And JOSIAH LATIMER CLARK, of Adelaide Road, in the county of Middlesex, Civil Engineer, FREDERICK BRAITHWAITE, of Bridge Street, in the city of Westminster, Civil Engineer, and GEORGE EDWARD PREECE, of Bernard Street, in the county of Middlesex, Electrician, have given the like notice in respect of the invention of "Improvements in telegraph cables."

1966. And EDWARD LINDNER, of New York, in the United States of America, Engineer, has given the like notice in respect of the invention of "Improvements in breech-loading fire-arms, and ordnance, and in cartridges."

1969. And JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in the construction of governors or regulators for steam engines."—A communication from William W. W. Wood and John Rice, both of the city of Philadelphia, state of Pennsylvania, United States of America.

As set forth in their respective petitions, all recorded in the said office on the 30th day of August, 1858.

1988. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improvements in the manufacture of alumina."—A communication from M. Le Chatelier, Mining Engineer, residing at Paris, in the empire of France.

As set forth in his petition, recorded in the said office on the 1st day of September, 1858.

1992. And JOSEPH WALKER and JAMES BARNES, of Oakenshaw, in the county of Lancaster, Waterproof Cloth Manufacturers, have given the like notice in respect of the invention of "Improvements in blankets and lappings, for machine and block printing, and other similar purposes."

As set forth in their petition, recorded in the said office on the 2nd day of September, 1858.

2001. And GEORGE TOMLINSON BOUSFIELD, of Loughborough Park, Brixton, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in knitting machinery."—A communication.

As set forth in his petition, recorded in the said office on the 3rd day of September, 1858.

2006. And WILLIAM HENRY CHILD, of Providence Row, in the county of Middlesex, Brush Manufacturer, has given the like notice in respect of the invention of "Improvements in hair and skin brushes."

As set forth in his petition, recorded in the said office on the 4th day of September, 1858.

2014. And JOHN FIELDEN, of Woodshade, near Todmorden, in the county of Lancaster, Medicine Manufacturer, has given the like notice in respect of the invention of "An improvement or improvements in the construction or building of cops, whether of cotton, flax, silk, wool, or other fibrous materials, and also for certain utensils thereunto conducting or belonging."

As set forth in his petition, recorded in the said office on the 6th day of September, 1858.

2049. And WILLIAM CLARK, of No. 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in materials for dyeing and printing."—A communication from Professor Frédéric Kuhlmann, of Lille, in the empire of France.

As set forth in his petition, recorded in the said office on the 9th day of September, 1858.

2057. And WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "An improvement in water wheels."—A communication.

As set forth in his petition, recorded in the said office on the 10th day of September, 1858.

2090. And FRANCIS FOWKE, of Park House, South Kensington, in the county of Middlesex, Captain in the Royal Engineers, has given the like notice in respect of the invention of "Improvements in fire-engines."

As set forth in his petition, recorded in the said office on the 15th day of September, 1858.

2187. And MATTHAEUS HIPP, Technical Inspector of the Swiss Telegraphs of Berne, in Switzerland, has given the like notice in respect of the invention of "Improvements in electric telegraphs."

As set forth in his petition, recorded in the said office on the 1st day of October, 1858.

2240. And ALFRED NICHOLLS, of Manchester, in the county of Lancaster, Merchant, and THOMAS WALKER, of Birmingham, in the county of Warwick, Clerk, have given the like notice in respect of the invention of "An improved spring-hook, catch, or fastening."

As set forth in their petition, recorded in the said office on the 8th day of October, 1858.

2494. And ARTHUR HYDE DENDY, of 27, Fortess Terrace, Kentish Town, in the county of Middlesex, Esquire, Master of Arts, has given the like notice in respect of the invention of "Improvements in the construction of breakwaters or wave screens, applicable also in constructing bridges, roadways, piers, jetties, landing stages, and other structures."

As set forth in his petition, recorded in the said office on the 8th day of November, 1858.

2633. And CHARLES FRÉDERIC VASSEROT, of 45, Essex Street, Strand, London, Patent Agent, has given the like notice in respect of the invention of "Improvements in fire-arms and ordnance, and in the projectiles to be used therewith."—A communication from Peter Rector Smith, of 2, Rue Ste. Appoline, Paris, in the empire of France, now residing in the United States of America.

As set forth in his petition, recorded in the said office on the 20th day of November, 1858.

2657. And JAMES FAIRWEATHER, of Dundee, in the county of Forfar, North Britain, has given the like notice in respect of the invention of "Improvements in weaving bags, sacks, and other tubular fabrics."

As set forth in his petition, recorded in the said office on the 23rd day of November, 1858.

2701. And CHARLES BURRELL, of Thetford, in the county of Norfolk, Engineer, has given the like notice in respect of the invention of "Improvements in traction engines and carriages."

As set forth in his petition, recorded in the said office on the 27th day of November, 1858.

2720. And CALEB BEDELLS, of Leicester, has given the like notice in respect of the invention of "Improvements in the manufacture of elastic fabrics, and in the machinery employed in this manufacture."

As set forth in his petition, recorded in the said office on the 29th day of November, 1858.

2757. And WILLIAM ROBERTSON, of Dundee, in the county of Forfar, North Britain, Engineer, and JAMES GUTHRIE ORCHAR, of the same place, Engineer, have given the like notice in respect of the invention of "Improvements in machinery or apparatus for winding yarns or thread."

As set forth in their petition, recorded in the said office on the 2nd day of December, 1858.

2776. And EDOUARD ARISTIDE SERVIER, of Paris, in the empire of France, Enginer, has given the like notice in respect of the invention of "Improvements in pressure and fluid level indicators."

As set forth in his petition, recorded in the said office on the 4th day of December, 1858.

2799. And CHARLES WILLIAMS and WILLIAM ELLISON, of 17, Acton Place, Kingsland Road, in the county of Middlesex, have given the like notice in respect of the invention of "A new mode or method of securing and liberating the corks and stoppers of bottles."

As set forth in their petition, recorded in the said office on the 7th day of December, 1858.

2835. And ANDREW BARCLAY, of Kilmarnock, in the county of Ayr, North Britain, Engineer, has given the like notice in respect of the invention of "Improvements in electric, magnetic, and electro-magnetic telegraph ropes or conductors."

2839. And GEORGE FERGUSSON WILSON, of Belmont, Vauxhall, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in the manufacture of lubricating oils."

As set forth in their respective petitions, both recorded in the said office on the 10th day of December, 1858.

2867. And JOHN PENDLEBURY, of Crumpsall, in the county of Lancaster, Bleacher, has given the like notice in respect of the invention of "Certain improvements in machinery or apparatus for bleaching or cleansing textile fabrics or materials."

2868. And DAVID ROWAN, of Greenock, in the county of Renfrew, North Britain, Engineer, has given the like notice in respect of the invention of "Improvements in steam engines."

2877. And GEORGE BELL, of Wandsworth, in the county of Surrey, Gentleman, has given the like notice in respect of the invention of "An improvement in matches and fusees."

As set forth in their respective petitions, all recorded in the said office on the 15th day of December, 1858.

2905. And JAMES SOUTTER, of Edinburgh, in the county of Mid Lothian, Turner, has given the like notice in respect of the invention of "Improvements in apparatus for drying or airing linen or other articles of wearing apparel."

As set forth in his petition, recorded in the said office on the 18th day of December, 1858.

2953. And MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, has given the like notice in respect of the invention of "An improved composition for the protection of certain metallic surfaces."—A communication.

2957. And JOHN SHAW, of Manchester, in the county of Lancaster, Mechanic, has given the like notice in respect of the invention of "A new mechanical combination, called an indefinite feed movement."

As set forth in their respective petitions, both recorded in the said office on the 27th day of December, 1858.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 1st January*, 1859, *inclusive.*)

30th December, 1858.

5. WILLIAM BECKETT JOHNSON, Manager for Messrs. R. Ormerod and Son, Engineers, Manchester, in the county of Lancaster, for an invention of "Improvements in steam boilers and engines."—Dated 1st January, 1856.

25. COLIN MATHER, of Salford Iron Works, Manchester, in the county of Lancaster, Machinist, and CHARLES MILLWARD, of Salford, in the county of Lancaster, Engine Manager, for an invention of "An improvement in steam and vacuum gauges."—Dated 3rd January, 1856.

27. JOHN FOWLER, junior, of Bristol, for an invention of "Improvements in machinery for giving motion to ploughs and other implements used for cultivating land."—Dated 3rd January, 1856.

31st December.

2952. Sir JOHN SCOTT LILLIE, Companion of The Most Honorable Order of the Bath, of Pall Mall, in the county of Middlesex, for an invention of "Improvements in guns, fire-arms, and implements of war connected therewith."—Dated 31st December, 1855.

1st January, 1859.

136. JOSEPH SCHLOSS, of Wellington Chambers, Cannon Street West, London, county of Middlesex, Merchant, for an invention of "A piston bolt or certain improvements in fastening travelling bags, porte-monnaies, cigar-cases, writing-desks, drawers, doors, and similar objects where locks, bolts, or clasps are employed."—Dated 18th January, 1856.

Errata in Journal of 28th December.

2783. For "77, Fleet Street," read "84, Fleet Street."

2813. For "77, Fleet Street," read "84, Fleet Street."

Free Patent Museum and Library, South Kensington.

NUMBERS of VISITORS for the Week ending 1st January, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Dec. 27	Monday -	1426	619	2045—Fine.
„ 28	Tuesday -	660	354	1014—Fine.Wet
„ 29	Wednesday	323	301	624—Fine.

Jan. 1	Saturday -	115	57	172—Wet.Fine
	Total -	2920	1698	4618

Total number of visitors since the period of free daily admission (12th May, 1858) to 1st January, 1859, —54,604.

This Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

FOREIGN PATENTS.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 14th December, 1858, and each bearing that date.

No. 22,272. Robert A. Adams, of St. Louis, Mo., for an "Improvement in stencils."

"What I claim therefore, and desire to secure by Letters Patent, is, the preparation of the 'stencil' blank, in the manner described, to wit, in oil, shellac, and glue, applied as set forth; and I also claim the application of the sand or emery to the back of the 'stencil,' in the manner described, for the purpose specified."

No. 22,273. J. E. Atwood, of Mansfield Centre, Conn., for an "Improvement in sewing machines."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the vibrating arm H, which carries the dog *g*, its attached arm K, the swinging frame I, the independent levers *i*, *j*, the springs *h*, *l*, and the cam J, the whole applied, arranged, and operating substantially as herein set forth."

No. 22,274. Daniel S. Baker, of Providence, R. I., for a "Wrist-band fastener."

"What I claim as my invention, and wish to secure by Letters Patent, is, the spring E, firmly attached to the front of the fastener in its application to the heel H by means of a shoulder G, and the end J, in such manner as to form a perfect fastener, and easily operated upon, substantially as set forth."

No. 22,275. Amos H. Boyd, of Saco, Me., for an "Improvement in sewing machines."

"I am aware that the looper has been revolved partially around and then back, and also that a reciprocating movement has been given to it without the employment of springs, hence I do not claim to be the first who has effected this; but, having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is, the combination of the looper E, the bars B and C, and cam wheel D, when constructed, arranged, and operated in the manner substantially as described, and for the purpose specified."

No. 22,276. John S. Clark, of Philadelphia, Pa., for an "Improvement in stoves."

"Having thus fully set out the construction and operation of my invention, what I claim as new, and desire to secure by Letters Patent, is, the movable plate *d*, as it is arranged with and has relation to the grate, the usual back plate *f*, the air passages *i*, *i*, and the passage for the products of combustion, as set forth."

No. 22,277. John S. Clark and Washington Harris, of Philadelphia, Pa., for an "Improvement in stoves."

"Having thus fully set out the construction and operation of our invention, what we claim as new, and desire to secure by Letters Patent, is, combining with the adjustable air passages at the top of the interior cylinder, or lining the section of the hollow annulus with perforations, its lower edge resting upon the inner edge of the lining and its upper edge against the shell plate, and thus forming an air chamber, as herein set forth."

No. 22,278. Stephen Culver, of Newark, N. Y., for an "Improvement in tea and coffee pots."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, the leach B, composed of the receptacle *a*, the canister *b*, and the tube or siphon *c*, constructed and arranged substantially as described. 2nd, the combination of the reservoir D with the leach B, substantially in the manner and for the purposes set forth. 3rd, the diaphragm *d* with the steam orifice *i*, as specified, and the combination thereof, with the receptacle of the leach, in the manner and for the purpose described."

No. 22,279. S. S. Curtis, of Croton Corners, N. Y., for an "Improvement in excavators."

"I do not claim the employment of chains and pulleys for suspending the scoop, or for raising it for the purpose of transporting or tilting and discharging the same; but what I claim as my invention, and desire to secure by Letters Patent, is, the combination of the eccentric scoop F, with the adjustable gauge-stops and braces K, K, or their equivalents, arranged and operating substantially in the manner and for the purpose set forth."

No. 22,280. William Edge, of Dorringtown, Pa., for an "Improvement in R. R. brake."

"What I claim as my invention, and desire to secure by Letters Patent, is, the application to railroad cars of a vertical self-acting safety car brake, consisting of a flanged safety block F, cam wheel M, axle U, lever N, chains H and I, connecting rods K, bumper Q, wheel block S, pedestal E, and shafts P, the whole combined and operated substantially as described in said specification."

No. 22,281. John Ericsson, of New York, N. Y., for an "Improvement in air engines."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, the within-described system of levers, rock-shafts, and connecting rods, or its equivalent, for combining the supply and working pistons with the crank shaft of the engine to produce the operation herein specified. 2nd, the ring c^4, the notches c^{11}, check pins c^5, and the elongation c^{11} of the supply piston, or their equivalents, for effecting the required transfer of the air to and from the heater, and the cooling of the cylinder and preservation of the packing of the working piston. 3rd, the telescopic tube *g*, applied within the working cylinder and its prolongation, by means of which tube the air is brought in proper contact with the heating surfaces, substantially as herein set forth."

No. 22,282. John H. Fairchild, of Jericho, Vt., for an "Improvement in water-wheels."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the single wheel D, in combination with the draught tube F, said wheel being placed within the penstock A, and arranged either horizontally or vertically with said tube, substantially as and for the purpose set forth. I also claim the annular gate H, placed within the sliding frame G, in connection with the adjustable plate J, arranged substantially as shown, to operate as described.

No. 22,283. G. W. Fairfield, of Holyoke, Mass., for an "Improvement in car seats and couches."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the combination of the flexible backs, with the curved grooves F and *d*, and the sliding beam G, so that the backs may be brought into a horizontal position, substantially as specified."

No. 22,284. Jacob Frick, of Philadelphia, Pa., for an "Improvement in feed-water and blow-off apparatus for steam boilers."

"I claim, and desire to secure by Letters Patent, combining an air vessel, having cocks and branches, arranged substantially as herein described, with the feed and blow-off apparatus, for which Letters Patent of the United States were granted to me on the eighteenth day of March, A.D. 1856, in the manner and for the purpose specified."

No. 22,285. William W. Gaige, of Rochester, N. Y., for an "Improvement in compositions for tanning leather."

"I do not claim to have discovered any new material for tanning, except what is known more or less to the trade, but I do claim to have invented the use of salt and salsoda, in the proportion specified, for a preparatory liquor. I also claim

the combination of starch and catechu in the proportion specified for the 2nd or first tanning liquor; and I also claim the combination of starch, catechu, and saltpeter, in the proportion specified, for the 3rd liquor; and I also claim the combination of starch, catechu, and alum, in the proportion specified, in the 4th liquor."

No. 22,286. Richard Gornall, of Baltimore, Md., for an "Improvement in machine for making hollow bullets."

"I do not confine myself to the use of a single core, as a series of cores may be arranged on a revolving or reciprocating plate operated to carry them alternately, first, into positions to combine with the dies, and afterward into proper positions relatively to a cutter or cutters to turn the bullets; nor do I confine myself to the use of a core of any particular form, nor to the manufacture of any particular form of bullet, nor to the use of any particular contrivances for giving motion to the several parts of the machine; but what I claim as my invention, and desire to secure by Letters Patent, is, 1st, the employment, in combination with a punch and a set of dies, or their equivalent, for pressing blanks or pieces of lead into a form, approximating more or less to the desired form for hollow bullets, of a revolving core serving, firstly, to produce the cavities in the bullets, and secondly, as a mandrel to revolve them, for the purpose of finishing their exteriors by turning them, substantially as herein specified. 2nd, the employment, in combination with the revolving core, of a turning cutter operating automatically, substantially as herein specified. 3rd, the employment, in combination with the revolving core, and turning cutter of a female center, operating substantially as described, for the purpose of securing the bullets on the core during the turning operation, and liberating them after such operation."

No. 22,287. George W. Grader and Benjamin F. Cowan, of Memphis, Tenn., for an "Improved steam and water alarm gauge for steam boilers."

"We do not claim broadly the invention of a combined steam and water alarm gauge; nor do we claim broadly the dispensing of a stuffing box or packing in a water gauge; but what we claim as our invention, and desire to secure by Letters Patent, is, the combined arrangement of the two valves F, I, and their seats, the several chambers and passages, the valve levers and their connections within the case A, substantially as described, whereby the construction of the instrument is rendered simple, its form compact, and its size limited without the use of stuffing boxes or any packing."

No. 22,288. Michael Hardy, of New York, N.Y., for an "Improvement in machinery for forming hat bodies."

"What I claim as my invention, and desire to secure by Letters Patent, is, combining with a pervious cone, connected with an exhausting apparatus, a picker or brush of a conical form, substantially as and for the purpose specified. I also claim, in combination with the pervious cone and conical picker or brush, the apron formed and mounted, substantially as described, for supplying fur to the several parts of the length of the picker, in proportion to the diameter, as set forth. I also claim, in combination with the pervious cone and conical picker or brush, substantially as described, the employment of a series of rollers forming a concave, substantially as described, to direct the fur toward the cone, as described. And I also claim, in combination with the two cones, the one on which the bat is formed, and the other fitting over the bat, the tube connected with the exhausting fan and adapted to receive and hold the outer cone, substantially as described, to effect the transfer of the bat of fur fibers from the inner to the outer cone, as set forth."

No. 22,289. John Henry Holt and Josiah H. Gerould, of Chicago, Ills., for an "Improvement in steam radiators."

"Claim.—What we claim as our invention, and desire to secure by Letters Patent, is, the combination of the wire gauze burner B (and its vapor hood D), applied to the self-acting boiler C, above described, connected as above described with the steam condensing cylinder I, and its reservoir J, air cocks, and safety and vacuum valves, and its tubes and radiators M, with their ends open in the apartment to be heated, and all of which are above particularly described, and governed by the gas regulator H, as above described, which combination produces a new and improved self-acting and self-regulating apparatus for raising the temperature of any given apartment in which it may be set up by radiation from surfaces heated by condensation of steam generated by the flame of combustible gas."

No. 22,290. B. B. Hotchkiss, of Sharon, Conn., for an "Improvement in harness snaps."

"Having now fully described my improved method of securing springs to snaps, what I claim as my invention, and desire to secure by Letters Patent, is, securing the spring B to the snap hook A by means of a collar C, c^{11}, so constructed and applied as to press against the broad end, as well as the faces of the spring, substantially in the manner and for the purpose s within set forth."

No. 22,291. Joseph Hough, of Buckingham, and Jacob Moore, of Bart, Pa., for an "Improvement in car brakes."

"Having thus described our invention, what we claim as new, and desire to secure by Letters Patent, is, the arrangement and combination of the slides F, and levers D, J, as and for the purposes herein shown and described."

No. 22,292. Charles R. Hurlburt, of Seymour, Conn., for an "Improvement in car springs."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the two kinds of disks, Figs. 3 and 4, plane, and raised with the rings Fig. 5, when the whole is constructed, combined, and arranged substantially as herein described."

No. 22,293. N. Jensen, of Washington, D. C., for an "Improvement in bandages."

"What I claim as my invention, and desire to secure by Letters Patent of the United States, is, forming instruments of two wire springs *a* and *g*; the springs *g*, which supports the bag, being hinged and hooked to the other spring *a*, for the purposes as set forth."

No. 22,294. Charles Lammrich, of New York, N. Y., for an "Improved folding table."

"What I claim as my invention, and desire to secure by Letters Patent, is, the folding legs *a*, *a*, combined with and hinged on to the bed or top of the table, in substantially the manner and for the purposes specified."

No. 22,295. Albertus Larrowe, of Cohocton, N. Y., for an "Improvement in sled brake."

"What I claim as new, and desire to secure by Letters Patent, is, the arrangement of lever *c*, scrapers *e*, and rods *f*, operating as described, for the purpose of a self-acting brake, and self-relieving in backing the sled, as set forth."

No. 22,296. Charles Lenzmann, of Brooklyn, N. Y., for an "Improvement in engine hose."

"Having described my invention, and the method of manufacture, I will now state what I claim as new, and desire to secure by Letters Patent of the United States;— claim as a new article of manufacture the hempen hose woven, saturated, and covered, as herein-before described."

No. 22,297. R. Mc. G. Lytle, W. I. Alston, and Lorenzo W. True, of Williamson County, Tenn., for an "Improved folding chair."

"Having thus described our improvements in portable chairs, what we claim, and desire to secure by Letters Patent, is, first, the arrangement of the arms and also of the back, substantially as described, so that the back retains the arms in place when folded. Second, the arrangement of the legs, substantially as described, so that one set of legs folds over and retains the other set in place. Third, the combination of the slotted bolt with the socket plate and spring stop, arranged substantially as described, for connecting the arms with the seat. Fourth, in combination with the side bars we claim the screw strap, or its equivalent, for connecting the bars with the legs, so that when folded between the legs, one is raised and the other depressed, for the purpose set forth. Fifth, connecting the legs with the seat, by means of a hinged socket joint, arranged substantially as described, so that each pair of legs can be withdrawn from their sockets and folded down without being disconnected fron each other or from the seat, for the purpose set forth."

No. 22,298. Joseph Mansfield, of Jefferson, Wis., for an "Improvement in shower baths."

"Having thus described my invention, I claim, and desire to secure by Letters Patent, as an improved article of manufacture, a shower bath having chambers B, C, tubes F, G, H, I, and stopcocks *b*, *c*, substantially as herein shown and described."

No. 22,299. EDWARD MARSHALL, of New York, N. Y., for an "Improvement in breech-loading cannon."

"Having thus fully described my invention, what I claim is, 1st, the employment of the adjustable chucks C, C, constructed, arranged, and operated substantially in the manner and for the purpose herein set forth. 2nd, I claim the recesses E, E, made from the outside of the gun into the bore, for the purpose of containing and concealing the chucks C, C, as is herein set forth. 3rd, I claim the combination of the chucks C, C, with the pin F, constructed substantially in the manner herein described. 4th, I claim the arrangement of the pin F, the collar G, and the screw H, substantially in the manner and for the purpose specified. 5th, I claim the employment of projections I, for the purpose of securing and concealing the handles of the cam, as is herein fully set forth."

No. 22,300. GILBERT MAYNARD, of Greenfield, Mass., for an "Improvement in children's carriages."

"I do not claim broadly the employment of coil springs in connection with carriages; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, connecting the axle C with the tongue A, by means of the peculiarly formed rods B, which also serve as springs for the vehicle, as herein shown and described."

No. 22,301. F. H. MOORE, of Boston, Mass., for an "Improved stair sweeper."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the box B, and brush E, with the dust pan C, arranged and operating in the manner substantially as described, whereby the dust is prevented from escaping, as set forth. 2nd, and in combination with the above, I claim the curtain F, operating substantially in the manner specified."

No. 22,302. Z. F. NANCE, of Richmond, Va., for an "Improved machine for turning irregular forms."

"I claim passing the piece to be turned through the pattern, and the combination of the same with the swinging frame C, and parts connected therewith, as and for the purposes set forth."

No. 22,303. CHARLES J. C. PETERSEN, of Davenport, Iowa, for an "Improvement in steam boilers."

"Having thus described my improvements, what I claim as new, and want to secure by Letters Patent, is, arranging the feed pipe q, in such a manner under the fire box, that the same in combination with plates r, placed between the bends of the feed pipe constitutes the bottom of the ash box, so that the feed water running through the pipe q is heated by the ashes, said plates r being so arranged that they can be raised and actuated by cranks t and levers s^1, so as to leave room for the ashes to escape, the whole being arranged and constructed substantially as described."

No. 22,304. HENRY H. POTTER, of Carthage, N.Y., for an "Improvement in adjustable carriage seats."

"I do not confine myself to the precise arrangement herein shown, for various similar or equivalent plans might be devised for effecting the same result or adjustment of the seat, although, perhaps, the plan herein shown and described would be as simple and efficient as any. Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, attaching the seat B, to the body A, of the vehicle, substantially as shown, or in any equivalent way, so as to admit of the seat being turned obliquely with the body, either to the right or left, for the purpose set forth."

No. 22,305. GEORGE P. REED, of Roxbury, Mass., for an "Improved escapement for time pieces."

"I claim the improved escapement, as constructed with its two impulse cams, or a double impule pallet J, applied to the balance wheel axle, and to operate with the escape wheel A, substantially as specified, in combination with the double detent lever lifting reverse cams or pallet F, applied to the detent lever of the escape wheel A, and operated by a cam screw S, or its equivalent, supported by the axle of the balance, essentially as herein-before explained."

No. 22,306. ROBERT E. ROGERS, of Philadelphia, Pa., for an "Improvement in steam generators."

"Having thus fully set out the constructien and operation of my invention, what I claim as new, and desire to secure by Letters Patent, is, 1st, the arrangement of the coils, constructed as herein described, the one being concentrically within the other, the annular spaces between the successive coils constituting direct and separate, and the only passages and outlets for the products of combustion, the entire lower portion of every coil having fire underneath it, and the whole operating as herein set forth. 2nd, I claim the arrangement of the feed-water pipe, and the air-feeding pipe in relation to each other, and to the generating coils, whereby I am enabled to introduce the water in graduated quantities into the upper part of the coil, and use atmospheric air to force the water over or upon the heated surfaces, as described; and 3rd, I claim imbedding the lower portion of each of the concentric coils in cast iron, cast around it to a greater or less height, for the purpose of protecting the coils from high degrees of heat, as herein set forth."

No. 22,307. F. ROY, of Parish, of St. Bernard, La., for an "Improvement in furnaces for evaporating sugar juices."

"I do not claim broadly and of itself, the open setting of kettles, but what I do claim is the setting of sugar kettles with the system of radial braces i, i, so situated as to divide the space around the kettle into two apartments, communicating by the openings o, when these upper chambers communicate with each other, and by flues X, with a common flue g, the whole operating substantially as and for the purpose set forth."

No. 22,308. GEORGE D. RUSSELL, SAMUEL A. RUSSELL, and CHARLES L. RUSSELL, of Birmingham, Conn., for an "Improved forceps for fastening clasps on hoop skirts."

"What we claim as our invention, and desire to secure by Letters Patent, is, the pliers, having their jaws provided with recesses b, b, and lips c, c, and with a lever, or wedge-like attachment B, to operate in combination with the said lips, substantially as described."

No. 22,309. JOSEPH D. SANDERSON, of Stetson, Me., for an "Improvement in beehives."

"I do not claim the employment or use of spare honey boxes placed around a hive, and communicating with it, for these have been previously used; neither do I claim broadly, ventilating the hive, by having a current of air passing vertically through it by means of apertures, or openings at the top and bottom, for this has been previously done; nor do I claim the perforated horizontal tubes I, I, nor the box J; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the holes h in the back of the hive communicating with the grooves (i) in the doors E, E, and the grooves (j), in the under side of the top F, of the box A, in connection with the boxes G, provided with perforated plates (K), whereby the hive is perfectly ventilated, and the rain excluded."

No. 22,310. JULIUS B. SAVAGE, of Southington, Conn., for an "Improvement in nut machines."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the employment or use of the cutter E, dies L, M, F, and punch G, in connection with the conveyers and adjusters j, k, l, m, n, and the jaws P, Q, or their equivalents, the whole being arranged and combined to operate as and for the purpose set forth."

No. 22,311. WILLIAM F. SHAW, of Boston, Mass., for an "Improvement in lamp-shade supporters."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, as a new article of manufacture, is the lamp-shade supporter C, with its upper and lower springs constructed of a single piece of metal, in the manner substantially as specified."

No. 22,312. OREN STODDARD, of Busti, N. Y., for an "Improvement in harvesters."

"I am aware that friction rollers have been applied to the finger bars of harvesters, in order to diminish the friction attending the operation of the sickle, but so far as I am aware, for this purpose only. I am also aware, that levers arranged similarly to those herein shown and described, for regulating the hight of the sickle, have been previously used, I therefore do not claim broadly the application of friction rollers to a finger bar and sickle, when viewed merely as such, irrespective of the other function herein-before described; neither do I claim the levers N, O, for raising and lowering the finger bar and sickle; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the conical rollers G, G, two or more, attached to the finger bar C, in connection with the sickle bar b, provided with an inclined back, and the cap-plate H, or its equivalent, the whole being arranged to operate substantially as and for the purpose set forth."

No. 22,313. Thomas Stubblefield, of Columbus, Geo., for an "Improvement in water gauges for steam boilers."

"What I claim as my improvement in the alarm gauge, is, the combination of a float, a secondary valve, and a main valve, substantially as herein set forth. I also claim the method of preventing a too sudden opening of the main valve by insulating (in a chamber or its outer side exposed to the air) a quantity of steam, substantially as herein set forth."

No. 22,314. John W. Sibbet, of Cincinnati, Ohio, for an "Improvement in attaching carriage thills to axles."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the plate C and socket or tube D attached to the clip B, in connection with the pin G attached to the thill F, and the hook H, provided with a shank I, nut J, and ratchet K, the shank of the hook being fitted in the tube D, and the ratchet having a pall L catching into or engaged with it, the whole being arranged substantially as and for the purpose set forth."

No. 22,315. Charles William Siemens, of London, Eng., for an "Improvement in fluid meters."—Patented in England, 4th March, 1853.

"Having now described the nature of the said invention, and in what manner the same is to be performed, I wish it to be understood that what I claim, is,—First, the construction of rotary fluid meters with a revolving wheel or drum, having tangential or oblique apertures, and connected with a counter, and inclosed in a fluid-tight case, and so arranged that the fluid to be measured flows from the center towards the circumference of the wheel or drum, substantially in manner herein-before described. Second, the application to rotary fluid meters of retarding vanes, substantially in manner and for the purpose herein-before described. Third, constructing the revolving part or wheel of a fluid meter and the fixed part or pipe which introduces the fluid into it with two or more collars or flanges on one or both of the said parts, so as to check the passage of the fluid by the production of eddies, substantially in manner herein-before described. Fourth, supporting the wheels or revolving parts of fluid meters by means of a flat or hollow plate or cap of steel or other suitable material attached to the wheel, and resting upon a fixed pivot and combined with an oil chamber, substantially as herein-before described. Fifth, constructing fluid meters with a revolving wheel or drum, having tangential or oblique apertures and retarding vanes, and provided with an oil chamber and pivot, and connected to a counter, and inclosed in a fluid-tight case, substantially as herein-before described. Sixth, constructing fluid meters with a dirt box or strainer, arranged so that it may be opened and the dirt removed without disturbing the meter or the pipes, substantially as herein-before described in reference to figures. Seventh, constructing fluid meters with the wheelwork or a portion of the wheelwork of the counter inclosed in an oil chamber whico is exposed to the pressure of the fluid in the meter, substantially as herein-before described."

No. 22,316. Thomas Turner, of Marysville, Ohio, for an "Improvement in cultivators."

"I do not claim a double plow, nor do I claim two mold boards attached to beams rendered capable of a lateral adjustment, for expanding plows and cultivators have been previously used; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the combination of the pulverizing mold board F and hilling mold board G, constructed as shown, and attached respectively to the longitudinally and laterally adjustable beams A, B, the whole being arranged substantially as and for the purpose set forth."

No. 22,317. Washington Van Dusen, of Philadelphia, Pa., for an "Improvement in adjustable cradle for dry docks and marine railways."

"What I claim as new, and desire to secure by Letters Patent, is, the combination and arrangement of the cradle bars I, R, jointed, connecting and sliding bars M, N, R^1, chains H, H^1, and sliding lifting screw blocks F, respectively connected together and to the cradle frames B or ribs E, in such manner, and in such relation to each other, as to enable the cradle bars I, R, to be adjusted to the bilge of the vessel desired to be hauled up, and to sustain the same by operating the lifting screws F on one side of the cradle frames B, substantially as before described."

No. 22,318. Elijah Ware, of South Boston, Mass., for an "Improvement in slide valve gear of steam engines."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the single eccentric, having a short eccentric rod D, the fulcrum plates E, G, carrying a fulcrum pin *b*, having a connection with the short eccentric rod, the slotted frame H receiving the fulcrum pin and a pin on the eccentric rod, and the slotted plate J receiving a pin *e*, or its equivalent, attached to a rod connected with the valve, the whole being applied to operate substantially as herein set forth."

No. 22,319. Charles S. Westcott, of New York, N.Y., for an "Improved lock."

"I am aware that revolving slotted wheels have been heretofore used, and therefore distinctly disclaim the invention of the same. I also disclaim the invention of the direct entering of a shoulder or attachment to the bolt into the slotted wheels; but what I claim as my invention, and desire to secure by Letters Patent, is, the ungearing of two sets of wheels when a lock is unlocked, in such a manner as to allow the slotted wheels, which receive the tongue of the bolt, to remain stationary, while the remaining wheels can be turned to any desired position, so that the combination can be changed through the keyhole from the front of the lock; said ungearing being effected by means of a bar (K), or its equivalent, acting upon a movable piece of metal which supports the shaft upon which one set of the wheels revolves, said bar being moved by the action of throwing the bolt so as to throw one set of wheels out of gear with the slotted wheels when the lock is unlocked, and bring them into gear again when it is locked."

No. 22,320. Norman W. Wheeler, of Brooklyn, N.Y., for an "Improved apparatus for operating valves of steam-engines."

"I claim actuating the cut-off valves of steam engines by means of an eccentric, or its equivalent, when the motion of the main valve is derived from the same eccentric, or its equivalent, but modified by a movement derived directly from a reciprocating part, substantially as described."

No. 22,321. John L. Whetstone, of Cincinnati, Ohio, for an "Improvement in valve gear of steam-engines."

"Having thus described my invention, as shown in the drawings, I do not wish to be understood as limiting myself to the precise arrangement or combination of parts as herein described, but will vary them as circumstances may require, while at the same time I accomplish the same ends by means substantially the same, as, for instance, a sliding plate valve, or a piston valve, may be used instead of the rotating valve herewith shown; and in that case, if preferred, a forked arm may be attached to the rod which operates the cut-off valve, and the adjustable radius bar may be operated in the forked opening, so as to give the cut-off valve a similar varying intermittent motion as that herein described. Or the arrangement of the parts may be reversed, as, for instance, placing the forked lever or arm on the rod or rock shaft, which operates the main valve of the engine, and communicating motion to the cut-off valve therefrom, through an adjustable radius bar similar to that herein described, and, if desired, the governor may be made to operate the cut-off and throttle adjustments by a direct attachment of rods and levers to the rotating disk, or an equivalent device without the worm wheel arrangement. What I claim as new, and desire to secure by Letters Patent, is, 1st, operating the cut-off valve by means of a forked arm or lever O, which is actuated by means of an adjustable radius bar K, which derives its motion from the rock shaft, or from the eccentric, which operates the main valves of the engine, the whole being arranged substantially as described. 2nd, adjusting the radius bar K, by the variations of the speed of the governor by means of a rotating disk operated by a worm wheel R, said worm wheel being in such relation to the governor, that when the governor is running at its right speed no motion is communicated to the same; but when the governor runs either too fast or too slow, the worm wheel is turned in one direction or the other, and the radius bar K is raised or lowered so that the cut-off is effected sooner or later, the whole being arranged and constructed substantially as described. 3rd, operating the throttle and cut-off valve adjustments in combination, in such manner that the throttle valve is moved slowly, and is not closed to any considerable extent, while at the same time the cut-off adjustment is moved rapidly, and on the other hand, when the cut-off adjustment is in position for the shortest period of admission of steam, the movements of the throttle valve are the most rapid, the whole being accomplished in the manner substantially as described."

No. 22,322. H. D. Wickes, of Flint, Mich., for an "Improvement in valves of steam engines."

"I am aware that it is not new to have a valve constructed so as to serve as a steam chest, but I am not aware that the steam has been admitted to such valves in any other manner than from above the ports, which mode of admitting the steam subjects the valve, while operating, to a downward

pressure that causes it to bind on its seat, whereas by admitting the steam from below the ports, the valve is subjected to an upward pressure, and thus is relieved from bind and wear while operating. I do not claim broadly so making a valve that it shall perform the office of a steam chest; but what I do claim as my invention, and desire to secure by Letters Patent, is, the valve B, having the ports and cavities *f*, *f*', *h*, *c*, and suspended between screws *j*, *j*, in combination with valve seat *a*, *a*, having the cavity or port *b* substantially as and for the purposes set forth."

No. 22,323. Robert Wilson, of Milton, Penn., for an "Improved machine for drilling metals."

"I do not claim the self-feeding of a hand or power drilling machine with a ratchet wheel, having a feed hand worked by an involute or scroll on the driving shaft, nor do I claim a self-feeding and self-reacting drilling machine, for these principles were in use before my application; nor do I claim anything in a table on which to lay the metal to be operated upon, therefore I do not describe or show a table at all, using any of the known forms which may best suit the work to be laid thereon; but what I do claim, and desire to secure by Letters Patent, is,—First, the adjustable inclined plane for the purpose of increasing and decreasing the feed of a hand or power drilling machine for all kinds of metal. 2nd, I claim the peculiar construction of the self-acting feed escapement, combined with the adjustable inclined plane, for the purpose of throwing off and on the feed, to suit any depth of hole within its entire descent, and then return again only to the hight required within its ascent. 3rd, I claim the adjustable bearing against which the lower end of the feed hand rests, in combination with the involute or scroll, and the feed hand which works upon it, for the purpose of producing a safety adjustable self-acting pressure escapement, all substantially in the manner and for the purpose set forth."

No. 22,324. John Withers, of Collinsville, Ill., for a "Fire-escape ladder."

"Having thus described the construction and operation of my invention, what I claim as new therein, and desire to secure by Letters Patent is, 1st, the combination of the canvas bag or shoot K, with the ladder A, in the manner described for the purpose specified. 2nd, the combination of the bed J, and its frame, as shown and described, arranged to open and close, as set forth. 3d, the arrangement of the two ladders A and B with each other, in the manner set forth, and also the means of adjusting the ladder B, substantially in the manner described."

No. 22,325. Edward S. Wright and Theodore P. Gould, of Buffalo, N. Y., for an "Improvement in breech-loading cannon."

"1st, we claim a mortise made through the breech of a cannon, in combination with the sliding abutment D, for the purposes and substantially as herein set forth. [2nd, we claim the expansive chamber H, or its equivalent, in combination with the cannon A, and sliding abutment D, for the purposes and substantially as herein described. 3rd, we claim the application of a wrought-iron band, shrunk around the breech of a cannon, when the same is combined with a mortise and sliding abutment, as herein set forth."

No. 22,326. Joseph Young, of Marshallton, Pa., for an "Improvement in raking attachments to harvesters."

"I am aware that rakes vibrating or moving in the arc of a circle have been previously used, and I therefore do not claim broadly such device; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement of the rake bar H, shaft G, rod *j*, provided with friction roller *l*, jointed connecting rods F, N, attached to crank pulley *e*, inclined adjustable plate K, spring *p*, and nut M, substantially as and for the purpose set forth."

No. 22,327. Nathaniel Cradit, of Ripley, Ohio, assignor to Chester G. Robinson, of South Reading, Mass., for an "Improvement in lamps."

"I claim as new, and of my invention herein, 1st, the described or equivalent arrangement of draught passages *b* 1, 3, communicating with the oil reservoir and central tube Q, conducting the air and gases from thence to the interior of the wick as explained. 2d, the box M, P, Q, and shell H, in the described combination with two rectilinear sets of wick elevating pinions, or their equivalents, by which two flat wicks are converted into one circular wick, as set forth."

No. 22,328. Samuel Flint and Robert S. Rogers, of Lynn, Mass., assignors to William F. Johnson, of said Lynn, for an "Improvement in heels for boots and shoes."

"We are aware that heels have been made hollow or chambered, and with what is usually termed 'hard india rubber,' and that such heels have had elastic balls or meniscus shaped pieces or plates of india rubber let into the same, and to work toward and away from the perforated plate of metal fixed in the heel; we are also aware that such elastic meniscus balls and perforated metallic plates have been applied to the soles of shoes, the whole being described in Charles Goodyear's application for a Patent rejected September 27th, 1856; therefore, we do not claim such, our improved manufacture of heel differing essentially therefrom, as, in the first place, the india rubber part is a solid block or cylinder, filling the whole space provided within the wooden body for its reception. Secondly, the heel contains no unfilled space or chamber between it and the ball, and in which the rubber may vibrate as it does in the heel described by the said Goodyear. Furthermore, the body part of our heel is made of wood. Taking it as a whole, it is a new or improved article of manufacture, wherein the rubber acts as a guard to the wooden body or as a preventive of wear of the same. We do not claim a heel made wholly of india rubber, nor one composed of metal and india rubber; but what we do claim is, an improved manufacture of heel made of wood and india rubber, combined and arranged together, substantially as set forth."

No. 22,329. George W. Fogg, of South Dedham, Mass., assignor to himself and D. S. Fogg, of said South Dedham, for an "Improved file-cutting machine."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, controlling the opening of the regulating valve of an atmospheric trip hammer employed in a file-cutting machine, for the purpose of regulating the blow thereof, and producing a uniform depth of cut from end to end of the file, by means of a pattern whose forms corresponds with or has a proper relation to the longitudinal profile of the file blank, applied and operating upon the said valve, substantially as herein described. 2nd, in combination with the arrangement of the cutter guide block K, at a greater inclination from a vertical plane than the hammer stem, and with the fitting of the cutter or cutter stock loosely in said guide block. I claim the employment of a clamping piece Z, or its equivalent, applied to the said guide relatively to a proper bearing on the opposite side of the cutter, and operated substantially as described, to produce the peculiar action of the cutter herein specified."

No. 22,330. William H. Manning, of Owego, N. Y., assignor to himself and Lucius H. Olmsted, of said Owego, for an "Improvement in machines for cutting soap."

"Having thus fully set out the construction and operation of my invention, what I claim as new, and desire to secure by Letters Patent, is, the machine herein described for converting block and slab soap into bars and cakes, consisting substantially of the frame or series of cutters, the guiding and supporting bars, and the presser or follower."

No. 22,331. Calvin Pepper, of Albany, N. Y., assignor to himself and John G. Treadwell, of said Albany, for an "Improvement in the method of applying gas for heating and illuminating purposes."

"I do not claim to be the first inventor of a porous gas burner, as I am aware they have been constructed of wire gauze, and by making beds of such material covered with broken pumice stone, and by a composition of matter, patented by Frederick C. Kraunse, and by some other substances other than silicious sand; and I do not claim the burning of gas in such way, except through silicious sand in a state of division; and I do not claim to be the inventor of passing gas through sand for the purpose of purifying the gas; and I make no claim for burning gas for illuminating purposes only, after having passed through the sand and separate from the same; and I make no claim in this application for the use of gas or sand in a separate state; and I make no claim for the ventilating arrangement described, or for the admixture of gas and atmospheric air before burning. What I claim as my invention, and desire to secure by Letters Patent, is, passing coal or other inflammable gas alone or in admixture with atmospheric air through a stratum or mass of silicious sand, without aggregation of particles to be inflamed at the surface, substantially as described, for heating purposes, and also for illuminating as incident thereto, as described."

No. 22,332. Thomas Wiard, of Louisville, Ky., assignor to George W. Pitken, H. W. Pitken, and W. L. P. Wiard, of said Louisville, for an "Improvement in ploughs."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, the standard A, with its permanent wing B, and recesses or shoulders for the reception of the removable wing I, constructed and arranged substantially in the manner and for the purpose set forth. I also claim, in combination with the standard A, constructed as herein set forth, the adjustable cutting and guiding wheel L, so that said wheel may be thrown into or out of action, as the circumstances of the case may require, and as described. I also claim the uniting of the handles beam and standard together, by means of the pockets *d*, dowels *e*, recesses *f*, and bolt *h*, substantially in the manner herein described."

No. 22,333. William Stephens, of Old Forge, Pa., assignor to Richard Stephens, of said Old Forge, for an "Improvement in slide valve gear for oscillating engines."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, the combination of the two independently operating sliding bars I and P, and the levers M, M^1, the former sliding bar being connected with the valve rock shaft, and furnished with fixed or adjustable stop pieces N, N^1, and the latter being connected by an arm with the cylinder trunnion, and the whole operating substantially as described to produce the motion of the valve or valves. 2nd, combining the stop-pieces N, N^1, with the sliding bar I, by fitting them to slide in slots 6, in the said bar, and attaching them to a double slotted wedge S, S^1, applied to the said bar, substantially as described, for the purpose of adjusting or varying the lead of the valve or valves."

No. 22,334. Isaac C. Stern, of Philadelphia, Pa., assignor to himself and George W. Stone, of said Philadelphia, for an "Improvement in steam boilers."

"I do not desire to claim broadly the heating of the feed-water, by allowing it to pass through tubes in the fire-place, as such a plan has been heretofore devised; but I claim, and desire to secure by Letters Patent, the application to locomotive boilers of the arrangement of tubes herein described, that is to say, the arrangement of the coil *b*, or its equivalent, on the inside and on one side of the fire box and the coil b^1, or its equivalent, on the opposite side, when one coil communicates with one pump, and the opposite coil with the other pump of the engine, and when the opposite coils are connected together by the pipe *d*, so that the cold water direct from the pumps may pass into the coils, and thence in a heated state into the boiler, and so that the water may at all times, circulate through both coils, as herein set forth."

No. 22,335. Thomas Shaw, of Philadelphia, Pa., assignor to himself and C. S. Patterson, of said Philadelphia, for an "Improvement in gas-burning stoves."

"I claim, and desire to secure by Letters Patent,—First, the inverted cone *c*, when arranged within and in respect to the hollow cylinder A, and connected to the gas pipe B, substantially as and for the purpose herein set forth. Second, extending the gauze disk *e*, beyond the opening for the passage of the gas, and so arranging the overhanging portion of the said disk that it shall be exposed to the air, as herein set forth and for the purpose specified. Third, the construction of the oven, consisting of the inverted box D, its opening *q*, and lining E, and the inner cylinder *k*, the whole being arranged to form the intervening passages *m*, *n*, and *p*, for the purpose set forth."

No. 22,336. Olive Ann Brooks, of Somersworth, N. H., administratrix of the estate of Lebbeus Brooks, deceased, late of Great Falls, N. H., for an "Improvement in straw cutters."

"It is not intended herein to claim a rotary cutter cylinder and a roller for the cutter to work against to feed and cut straw, nor is it intended herein to claim the feeding and cutting straw in the manner described in the Specification of the United States Patent numbered 13,807, wherein the knife has a compound motion, composed of two circular motions, and operates in conjunction with a roller; nor is it intended herein to claim a rotary cutter cylinder or set of cutters and a swinging bed operating together, as shown in the United States Patent numbered 12,699; nor is it intended herein to claim a straw cutting machine, as constructed in such manner that its bed and knife shall each operate with a compound motion, as described in the United States Patent numbered 18,084; but what is claimed herein as the invention of the said Lebbius Brooks, is, an improved straw cutting machine, as constructed of two cutting knives or shears I, M, or their equivalents, and so that while one of them, when the machine is in operation, shall have a compound motion, whereby its cutting edge shall be made to move in an elliptical path toward and away from the trough B, the other shall have only a reciprocating motion in a circular arc toward and away from the said trough, the lever frame, carrying the lower knife or bed, being made to turn on a fulcrum rod, or its equivalent, and to be connected with the upper knife by means or mechanism, essentially as described; also, the application to the upper knife, having a compound motion as described, of a toothed rake N, to operate therewith, and facilitate the feeding of the straw forward, in manner as specified."

Re-issues.

Ethan Allen, of Worcester, Mass., formerly of Norwich, Conn., for an "Improvement in pistols and other fire-arms."—Patented 16th April, 1845.—Re-issued 14th December, 1858.

"Claims.—Extending the rear end of the dog or catch (*c*) rearward, and beyond where it is jointed to the tumble of the percussion hammer, and connecting the upper end of the mainspring directly to the part so extended, or otherwise connecting the mainspring to the dog, so as to cause it to operate upon the hammer, dog, and trigger; also the arrangement of a mechanism in connection with a self-cocking arrangement, whereby I am enabled to make the fire-arm so as to be cocked at pleasure by the hammer, or to be operated entirely by the trigger as a self-cocker, and mechanism consisting of the stud *d*, and the dog or catch (*c*) in connection with the tumbler as described, or their equivalents, whereby the same results are obtained; also the piece of metal (*g*) as combined with, or applied to, the seer of the trigger and in front of the notch thereof, and hook of the catch (*c*), and operating and in relation thereto in the manner and for the purpose as herein-before explained. Also, my new and peculiar arrangement of the pitman upon the seer of the trigger (so as to operate as above described, in combination with the construction and arrangement of the teeth upon the breech or rear end of the cylinder, or series of barrels, by which improvement in constructing and arranging the aforesaid parts I am enabled to very much simplify them in comparison with the manner in which they have been made and disposed."

Nathaniel Drake, of Newton, N. J., for an "Improvement in corn planters."—Patented 2nd February, 1858.—Re-issued 14th December, 1858.

"Claims.—1st, operating the seed valves *a*, *b*, from the traction wheels A, A, by means of the rods or weights G, H, and cams M, N, arranged substantially as and for the purpose set forth. 2nd, the agitator *g*, arranged with relation to the seed boxes and valves, substantially as set forth. 3rd, the rib *b*, attached to the upper valve constructed and operating as shown and described for the purpose stated. 4th, combining with one of the weights which operate the valves, or its equivalent, a cam-shaped gear wheel, corresponding in form with the cams which operate said weights. 5th, extending the chains which operate the valves down under the pulleys *d*, back of the axle so as to obviate the slackening and taking up of the chains by the vibrations of the plows D, and their attachment as set forth."

William Sumner, of Worcester, Mass., for an "Improvement in organs."—Patented 28th February, 1854.—Re-issued 14th December, 1858.

"Claims.—The combination or arrangement and connection with the keys of a mechanism which shall enable the extreme key touched on either side or hath when operating itself shall prevent all the others from operating in the stop or stops connected therewith, in the manner and for the purposes as above set forth and described. And I also claim, in combination with a wind chest, operating substantially as above described, the employment of auxiliary bellows, connected and combined with the main bellows and pedals, substantially as and for the purposes described. And I also claim controlling and operating the escape valve by means of friction on the arm or its equivalent, in the manner and for the purposes above set forth and described."

Horace H. Day, of New York, N. Y., assignee of Richard Solis, of said New York, for an "Improvement in the manufacture of elastic cloth."—Patented 7th November, 1848.—Re-issued 14th December, 1858.

"Claim.—The new elastic cloth herein described, consisting of a woven textile material (or cloth), having the threads of the warp oblique to the weft, combined with gum elastic or india rubber, so that the two constitute an elastic compound fabric."

Designs.

GARRETTSON SMITH and HENRY BROWN, of Philadelphia, Pa., assignors to Liebrandt McDowell and Co., of said Philadelphia, for a "Design for parlor stoves."

"Claim.—The combination of ornamental figures and forms, represented in and by the accompanying drawing, forming together an ornamental design for the plates of parlor stoves."

GARRETTSON SMITH and HENRY BROWN, of Philadelphia, Pa., assignors to G. Abbott and A. Lawrence, of said Philadelphia, for a "Design for cooks' ranges."

"Claim.—We claim the ornaments in bas-relief, and arrangement of mouldings, configurated as shown and described, and constituting an ornamented stove design, designated as the 'National Range.'"

WILLIAM B. FRENCH, of Charlestown, Mass., for a "Design for book-marks."

"Claim.—The new design for a book-mark, consisting of the hand placed within the heart, as described and represented in the drawings."

Additional Improvements.

LEVI BURNELL, of Milwaukie, Wis., for an "Improvement in rotary pumps." — Patented 31st August, 1858.—Additional Improvement, dated 14th December, 1858.

"Claim.—Operating three or more pairs of sliding valves in said pump by means of the joint action of the rotary valve-box *b*, and the three-sided stationary cam *f*, substantially as herein set forth."

DALRYMPLE CRAWFORD, of Toronto, Canada, for an "Improvement in the manufacture of soap."—Patented 13th March, 1858.—Additional Improvement, dated 14th December, 1858.

"Claims.—Using the refuse of Indian corn, and mixing it with a fat or oil and an alkali, and with or without resin amalgamating the same to make soap. I claim subjecting the refuse of Indian corn to an alkali with or without heat, and modifying the strength of the alkali, when too strong and not required, by an acid, and for the purpose of mixing it more easily with the soap."

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities :—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).

York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States :—

Official.

Admiralty, Steam Department.
——— Surveyor of Navy.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Sheerness ditto.
——— Devonport ditto.
——— Portsmouth ditto.
——— Chatham ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec; Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(Registered for transmission abroad.)

No. 523. FRIDAY, JANUARY 7, 1858. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2154. To MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for the invention of "The separation of iron and steel from their combination with certain foreign bodies."—A communication from a Foreigner, residing at Charleroi, in Belgium.

On his petition, recorded in the Office of the Commissioners on the 25th day of September, 1858.

2506. To MICHAEL HENRY, of 84, Fleet Street, in the city of London, Patent Agent, for the invention of "Improvements in, and in the manufacture of locks and fastenings, and keys for the same."—A communication from Mr. Rebour.

On his petition, recorded in the Office of the Commissioners on the 9th day of November, 1858.

2804. To JOHN VICKERS SCARBOROUGH, of Belfast, in the county of Antrim, Ireland, Gutta Percha Boot Manufacturer, for the invention of "Improvements in apparatus for the manufacture of boots and shoes."

On his petition, recorded in the Office of the Commissioners on the 7th day of December, 1858.

2830. To ETIENNE LÉON PENSUETE, of Dunkirk' in the empire of France, for the invention of "Improvements in apparatus for driving or for drawing up piles by steam."

On his petition, recorded in the Office of the Commissioners on the 9th day of December, 1858.

913. To ROBERT MCLEAN LIVINGSTON, of the state of Alabama, in the United States of America, at present residing in Manchester, in the county of Lancaster, Vice-Consul, for the invention of "An improved self-detaching 'safety hook' or coupling."

2915. To JOSEPH HOLROYD BOLTON, of Dukinfield, in the county of Chester, Warp Dresser, and CHARLES GARFORTH, of the same place, Engineer, for the invention of "Certain improvements in drying yarns or fabrics, and in the apparatus connected therewith."

2917. To WILLIAM SPEAKMAN YATES, of Leeds, in the county of York, Brush Maker, for the invention of "Machinery or apparatus for dragging bristles and drawing air and vegetable fibre."

2919. And to WILLIAM MAINWARING, of Brunfield, in the county of Hereford, Surveyor, for the invention of "Improvements in brakes for common road vehicles."

On their several petitions, recorded in the Office of the Commissioners on the 21st day of December, 1858.

2921. To ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, for the invention of "An improvement or improvements in the manufacture of cast steel."

2923. To JOSEPH NICHOLSON, of Halifax, in the county of York, Jacquard Machine Maker, and DAVID CROSSLEY, of Brighouse, in the same county, Joiner and Pattern Maker, for the invention of "Improvements in Jacquard machinery or apparatus employed in weaving."

2925. To WILLIAM SPENCE, of 50, Chancery Lane, in the county of Middlesex, Patent Agent, for the invention of "Improvements in granaries or apparatus for preserving grain."—A communication from Charles Joseph Emile Pavy, of Girardet, Indre et Loire, in the empire of France, Farmer and Landowner.

2927. To EDWARD GREEN, of Wakefield, in the county of York, Engineer, for the invention of "Improvements in tables."

2929. To Frederick Ransome, of Ipswich, for the invention of "Improvements in the manufacture of grinding and rubbing surfaces."

2931. And to Joseph James Welch, of 17, Cheapside, in the city of London, for the invention of "Improvements in the manufacture of neckties, scarfs, or cravats."

On their several petitions, recorded in the Office of the Commissioners on the 22nd day of December, 1858.

2933. To James Ronald, of Liverpool, in the county of Lancaster, Merchant, for the invention of "Improvements in, and machinery for, the manufacture of 'hard-tapped' and 'soft laid' twine, 'mill banding' strands for ropes and other purposes, and cordage generally from hemp, flax, cotton, and other like fibrous material."

2935. To James Broom, of Glasgow, in the county of Lanark, North Britain, Iron Manufacturer, for the invention of "Improvements in the manufacture of steel."

2937. And to Andrew Barclay, of Kilmarnock, in the county of Ayr, North Britain, Engineer, for the invention of "Improvements in obtaining and distributing or applying electricity and magnetism, and in obtaining motive power therefrom."

On their several petitions, recorded in the Office of the Commissioners on the 23rd day of December, 1858.

2939. To James Thomas Peter Newbon and Thomas Smith, of Fenchurch Street, Naval Architects, and James Brown, of Follit Street, Engineer, for the invention of "Improvements in machinery or apparatus for raising and lowering or otherwise moving heavy weights."

2491. To John Wright Child, of Halifax, in the county of York, Engineer, for the invention of "Improvements in the manufacture of fabrics adapted to be used for curtains, coverings of furniture, table covers, and such like uses."

2943. To Lemuel Dow Owen, of No. 192, Tottenham Court Road, in the county of Middlesex, Engineer, for the invention of "Improvements in manufacturing horse shoe nails."—A communication.

2945. To Dickinson Edleston, of Halifax, in the county of York, Dyer and Finisher, for the invention of "Improvements in preparing and finishing textile fabrics, and in the means or apparatus employed therein."

2947. To Edward Humphrys, of Deptford, for the invention of "Improvements in brazing metal tubes in tube plates and other metal surfaces to each other."

2949. To John Little, of Glasgow, in the county of Lanark, North Britain, Ironmonger, for the invention of "Improvements in lamps."

2951. And to Rafaello Louis Giandonati, of the firm of Dodge and Giandonati, of St. Paul's Churchyard, in the city of London, Merchants, for the invention of "Improvements in ornamenting leather cloth."

On their several petitions, recorded in the Office of the Commissioners on the 24th day of December, 1858.

Invention protected for Six Months by the Deposit of a Complete Specification.

Notice is hereby given that the petition of

26. Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, praying for Letters Patent for the invention of "Certain improvements in steam generators,"—a communication,—was deposited and recorded in the Office of the Commissioners on the 3rd day of January, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

5th January, 1859.

1508. George John Newbery, of Straitsmouth, Greenwich, in the county of Kent, Artist, for an invention of "Improvements in the manufacture or production of coverings for floors applicable also to the manufacture of table mats and other articles or coverings."—Dated 5th July, 1858.

1510. Thomas Woolner, of Blue Pits, in the county of Lancaster, Manufacturer, for an invention of "Improvements in apparatus for feeding steam boilers with water."—Dated 5th July, 1858.

1515. Hesketh Hughes, of Homerton, in the county of Middlesex, Engineer, for an invention of "Improvements in gauffering and crimping machines, parts of which are applicable to the manufacture of continuous belts and shutters."—Dated 6th July, 1858.

1517. James Davis, Iron Master, and Thomas Evans, Engine Fitter, both of Ulverston, in the county of Lancaster, for an invention of "Improvements in engines to be actuated by steam, air, or gases."—Dated 6th July, 1858.

1518. John Buchanan, of Port Glasgow, in the county of Renfrew, North Britain, Gentleman, for an invention of "Improvements in propelling ships, vessels, and boats."—Dated 6th July, 1858.

7th January.

1519. William Allen Smith, Engineer, of Belper, in the county of Derby, for an invention of "Improvements in machines for making bricks, tiles, or pipes of clay."—Dated 7th July, 1858.

1520. Henry Carl Schiller, of London, in the county of Middlesex, for an invention of "Certain improved apparatus for laying down and recovering submarine telegraphic cables."—Dated 7th July 1858.

1524. William Clissold, of Dudbridge, in the county of Gloucester, Engineer, for an invention of "Improved machinery for cutting or rasping dyewoods."—Dated 7th July, 1858.

1531. John Marland, of Glodwick, near Oldham, in the county of Lancaster, and James Widdall, of Abbey Hill, in the said county, for an invention of "An improved self-acting hook or holder to prevent accidents in lifting, hoisting, or winding at coal pits or other similar purposes."—Dated 8th July, 1858.

1532. Henry Gidlow, of Atherton, in the county of Lancaster, Carpenter, for an invention of "Improvements in breaks for steam engines."—Dated 8th July, 1858.

1534. Pierre François Demoulin, Chemist, and Joseph Cotelle, Manufacturer, of Paris (France), for an invention of "Improvements in treating the heavy oils obtained from the distillation of coals, schists, and other hydro-carbons."—Dated 8th July, 1858.

1535. Thomas Tertius Chellingworth, of West Bromwich, in the county of Stafford, Civil and Mechanical Engineer, for an invention of "A high-pressure steam engine."—Dated 8th July, 1858.

1537. Richard Smith, of the firm of Earl, Smith, and Company, Manufacturers, of Hallamshire Works, Pond Street, Sheffield, in the county of York, for an invention of "An improved adjustable pipe tongs."—A communication from a Foreigner residing abroad.—Dated 8th July, 1858.

1541. Robert George Cecil Fane, of Upper Brook Street, in the county of Middlesex, Esquire, for an invention of "Improvements in treating sewage, and in apparatuses to be employed therein."—Dated 8th July, 1858.

1543. George Collier, of Halifax, in the county of York, for an invention of "Improvements in means or apparatus for the drying of wool and other fibres."—Dated 8th July, 1858.

1546. George Parsons, Mechanical Engineer, and Machine Manufacturer, conducting business at No. 50, High Street, Lambeth, in the county of Surrey, for an invention of "Improvements in apparatus for the prevention of injury to, and the sudden bursting of, steam boilers."—Dated 9th July, 1858.

1548. Frederick Sang, of 42, Charing Cross, Artist, and Thomas Webster Rammell, of 16, Spring Gardens, both in the county of Middlesex, Civil Engineer, for an invention of "Improvements in the means of conveying letters and parcels from one place to another."—Dated 9th July, 1858.

1549. Constantine Nicolaus Kottula, of Liverpool, in the county of Lancaster, Soap Manufacturer, for an invention of "Improvements in the manufacture of manure."—Dated 9th July, 1858.

1551. John Martin Rowan, of Glasgow, in the county of Lanark, Engineer, for an invention of "Improvements in manufacturing wrought-iron wheels and bosses or centres, and in the mode of, and furnaces for, heating the same during such manufacture."—Dated 9th July, 1858.

1554. George Henry Wain, of Liverpool, in the county of Lancaster, Block Maker, for an invention of "Improvements in reefing and furling sails."—Dated 10th July, 1858.

1588. Thomas Wheeler, of the Albion Iron Works, in the city of Oxford, Engineer, for an invention of "Improvements in washing, wringing, and mangling machines."—Dated 14th July, 1858.

1608. Astley Paston Price, of Margate, in the county of Kent, Chemist, for an invention of "Improvements in the treatment and smelting of certain ores or compounds of tin, and of tin and of certain alloys thereof."—Dated 16th July, 1858.

1622. Henry Smith, of Brierley Hill Iron Works, near Dudley, in the county of Worcester, Manufacturer, for an invention of "An improvement or improvements in the manufacture of harrows."—Dated 19th July, 1858.

1635. John Cartwright Hill, of Kentish Town, in the county of Middlesex, for an invention of "Improvements in making joints for connecting pipes and other articles by means of lead or other soft metal."—Dated 20th July, 1858.

1674. Daniel Adamson, of Newton Moor Iron Works, Hyde, in the county of Chester, Engineer, for an invention of "Improvements in hydraulic apparatus for raising and lowering heavy articles, and in an application of hydraulic power for riveting metallic structures, as iron ships, boilers, tanks, and similar articles."—Dated 26th July, 1858.

1690. John Scott, of Tain, in the county of Ross, North Britain, Gentleman, for an invention of "Improvements in pumps, which improvements are also applicable for the propulsion of ships, vessels, and boats."—Dated 27th July, 1858.

1756. Thomas Greenhalgh, of Bury, in the county of Lancaster, Manufacturer, for an invention of "Improvements in apparatus applicable to steam boilers."—Dated 3rd August, 1858.

1782. John Henderson, of Lasswade, in the county of Mid-Lothian, North Britain, Gentleman, for an invention of "Improvements in machinery for weaving plain or figured fabrics."—Dated 5th August, 1858.

1809. Thomas Ingram, of Bradford, in the county of York, Foreman, or an invention of "Improvements in means or apparatus for operating railway breaks."—Dated 9th August, 1858.

1825. Samuel Fletcher Cottam, of the city of Manchester, Machinist, for an invention of "Improvements in machinery for doubling cotton and other yarns or threads."—Dated 11th August, 1858.

2000. Elias Cocker, of Newton Heath, near Manchester, in the county of Lancaster, Mill Manager, for an invention of "An improvement or improvements in machinery for spinning, twisting, or doubling cotton, flax, silk, wool, or other fibrous materials."—Dated 3rd September, 1858.

2050. Joseph Lemuel Chester, of the city of Philadelphia, state of Pennsylvania, one of the United States of America, for an invention of "Improvements in self-priming apparatus for fire-arms, and in the preparation of percussion primers to be used therewith."—Partly a communication from a Foreigner residing in the United States of America.—Dated 10th September, 1858.

2080. William Riley, of Bradford, in the county of Yorkshire, Overlooker, for an invention of "Certain improvements in looms."—Dated 14th September, 1858.

2350. Charles Wye Williams, of Liverpool, Gentleman, and George Eyton, of the same town, in the county of Lancaster, Chemist, for an invention of "Improvements in the construction of locomotive and other steam boilers."—Dated 21st October, 1858.

2430. Charles Vero, of Atherstone, in the county of Warwick, Hat Manufacturer, and James Everitt, of Atherstone aforesaid, Hat Manufacturer, for an invention of "Improvements in the manufacture of hats and other coverings for the head, a part of which improvements is also applicable to the manufacture of felt."—Dated 1st November, 1858.

2449. Nathaniel Shattswell Dodge, of 44, St. Pauls Church Yard, in the city of London, Merchant and Manufacturer, for an invention of "Improvements in treating waste vulcanized india rubber."—A communication from a Foreigner resident abroad.—Dated 2nd November, 1858.

2549. David Auld, of Glasgow, in the county of Lanark, North Britain, Engineer, for an invention of "Improvements in furnaces and boilers, and in the generation and treatment of steam."—Dated 13th November, 1858.

2579. Frederick Albert Gatty, of Accrington, in the county of Lancaster, Manufacturing Chemist, for an invention of "Improvements in producing certain colors on cotton, linen, and silk fabrics."—Dated 17th November, 1858.

2581. Matthew Andrew Muir, of Glasgow, in the county of Lanark, North Britain, Machinist, and James McIlwham, of the same place, Machinist, for an invention of "Improvements in looms for weaving."—Dated 17th November, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 5th January, 1859, inclusive.*)

3rd January.

44. Henry Bessemer, of Queen Street Place, New Cannon Street, in the city of London, for an invention of "Improvements in the manufacture of iron and steel."—Dated 4th January, 1856.

71. John Ashworth, junior, of Turton, in the county of Lancaster, Cotton Spinner, for an invention of "Certain improvements in lap machines or apparatus used in the preparation of cotton and other fibrous substances for spinning."—Dated 9th January, 1856.

4th January.

86. William Pole, of Storey's Gate, in the city of Westminster, Engineer, and Frederick William Kitson, of Leeds, in the county of York, Engineer, for an invention of "Improvements in railway wheels."—Dated 11th January, 1856.

108. Joseph Hostage, Thomas Ives Brayne Hostage, and John Tatlock, of the city of Chester, in the county of Chester, for an invention of "Improvements in railway chairs."—Dated 15th January, 1856.

5th January.

55. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent, for an invention of "Improvements in machinery for boring and excavating."—A communication.—Dated 7th January, 1856.

Erratum in Journal of 31st December, 1858.

2870. For "metalic" read "metallic."

List of Specifications, &c. published during the week ending 31st December, 1858.

No.	Price.	Subject-Matter.
1155	1s. 1d.	Looms for weaving.
1156	3d.	Manufacture of buttons and other fastenings.
1157	6d.	Machinery for pulping straw, &c.
1159	10d.	Revolver fire-arms.
1160	3d.	Locks and keys.
1161	5d.	Buffing apparatus for boats or ships.
1162	3d.	Production of metals from their ores.
1163	7d.	Machinery for the propulsion of vessels.
1164	7d.	Fire-arms and cartridges.
1166	2s. 11d	Manufacture of rivets, screws, pins, and nails, &c.
1167	3d.	Rails for fences and gates.
1168	6d.	Manufacture of bushes for fixing drums, wheels, &c.
1169	10d.	Steam boilers, &c.
1170	5d.	Indicating apparatus for pumps.
1171	3d.	Furnaces for smelting and calcining.
1172	8d.	Breech-loading fire-arms, and cartridges for the same.
1173	3d.	Protecting ships of war, land batteries, and fortifications from shot and other projectiles.
1174	3d.	Treating cotton or cotton yarns or fabrics.
1175	3d.	Taps or cocks.
1180	3d.	Cooking ranges, &c.
1182	10d.	Iron tubular fencing, &c.
1183	3d.	Apparatus for disengaging horses from carriages.
1184	6d.	Apparatus for rolling or preparing land.
1185	10d.	Manufacture of textile fabrics.
1186	3d.	Spinning.
1188	6d.	Manufacture of chains.
1189	3d.	Preparation of tin foil.
1190	1s. 6d.	Weaving.
1191	6d.	Railway brakes.
1192	3d.	Preservation of butter.
1193	1s. 5d.	Machinery for combing and preparing wool, &c.
1194	4d.	Manufacture of fuel.
1195	5d.	Lamp chimneys and glasses.
1196	6d.	Machinery for dibbling seeds and manure.
1197	3d.	Manufacture of glass.
1198	3d.	Manufacture of fish into guano and food.
1200	1s. 3d.	Machinery for altering the position of locomotive engines and carriages on railways.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5s. must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. I.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9s. 6d., or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions, &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1s. 4d.
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson. (*Letters Patent, granted A.D.* 1612.) Price 4d.
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos. 33 and 85, respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2d.
4. Dud Dudley's Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8d.
5. Description of the nature and working of the patent Water-scoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2s.
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset, Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II c.* 12. *A.D.* 1663.) Price 4d.
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent, No.* 347, *dated 10th January*, 1696.) Price 1s.
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated 25th July*, 1698, *and Stat.* 10 *&* 11 *Will, III. c.* 31, *A.D.* 1699.) Price 1s.
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8d.
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated 21st December*, 1736.) Price 8d.
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent, No.* 602, *dated 16th March* 1744.) Price 1s.

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. Curtis for a Patent. Price 1s.

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2s. 6d.

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities :—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).
Macclesfield (*Useful Knowledge Society*).
Manchester (*Chetham Hospital*).
——— (*Camp Field*).
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*).
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners' Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Society of Arts (*John Street, Adelphi*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States :—

Official.

Admiralty, Steam Department.
——— Surveyor of Navy.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Sheerness ditto.
——— Devonport ditto.
——— Portsmouth ditto.
——— Chatham ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—

Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin.
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. Woodcroft.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

Sommaire de toutes les Inventions brevetées en Angleterre depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux Inventions et Découvertes décrites dans les ouvrages scientifiques de différentes nations, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

Verzeichniss aller in England von 1617—1854 incl. patentirten Erfindungen, unter vielfältige Titel gebracht, mit Hinweisungen auf Erfindungen und Entdeckungen die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken verschiedener Nationen beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

Repertorio di tutte le Invenzioni munite di Lettere Patenti in Inghilterra dal 1617—1854 inclusivo, poste in ordine sotto il più gran numero di capi, con riferenze alle Invenzioni e Scoperti descritti nelle opere scientifiche di diverse nazioni, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. Woodcroft,
Superintendent of Specifications, &c.

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

DRAIN TILES AND PIPES. Price 6*d.*
MANUFACTURE OF IRON AND STEEL, Parts I. and II, price 6*d.* each; Part III. (completing the series), price 4*s.*
MANURE. Price 6*d.*
SEWING AND EMBROIDERING. Price 6*d.*
MARINE PROPULSION, Parts I. and II., price 1*s.* each; Part III. (completing the series), 2*s.*
PRESERVATION OF FOOD. Price 6*d.*
AIDS TO LOCOMOTION. Price 1*s.*
STEAM CULTURE. Price 2*s.*
WATCHES, CLOCKS, AND OTHER TIME-KEEPERS. Price 1*s.* 6*d.*

The following are in the press:—

PRINTING CALICOES AND OTHER WOVEN FABRICS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
COMBUSTION OF FUEL.
FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ.
INDIA RUBBER AND GUTTA PERCHA: FIRE, AIR, AND WATER PROOFING.

B. WOODCROFT.

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE, Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 524. TUESDAY, JANUARY 11, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given that

1955. GEORGE WEEDON, of No. 41, Poland Street, in the county of Middlesex, and DAVID WILLIAM RICE, of No. 1, New Road, Woolwich, in the county of Kent, have given notice at the Office of the Commissioners of their intention to proceed with their application for Letters Patent for the invention of "An improved knife and fork cleaning machine, part of which is applicable to other purposes."

As set forth in their petition, recorded in the said office on the 28th day of August, 1858.

1963. And JOHN OXLEY, of Camden Town, has given the like notice in respect of the invention of "Improvements in baths."

As set forth in his petition, recorded in the said office on the 30th day of August, 1858.

1975. And JAMES STONEHAM, of Audenshaw, near Manchester, in the county of Lancaster, has given the like notice in respect of the invention of "Improvements in cleaning and treating cotton and woollen waste, or other fibrous materials, and in extracting oil or grease therefrom."

As set forth in his petition, recorded in the said office on the 31st day of August, 1858.

1984. And WILLIAM HOBBS, of No. 196, Piccadilly, in the county of Middlesex, Shop Fitter, has given the like notice in respect of the invention of "Improvements in ordnance and warlike projectiles to be used therewith."

1991. And SAMUEL LAING, of Millwall, Engineer, has given the like notice in respect of the invention of "Improvements in the apparatus employed in the manufacture of gas."

As set forth in their respective petitions, both recorded in the said office on the 1st day of September, 1858.

1994. And JAMES BLEAKLEY, of Accrington, in the county of Lancaster, Machinist, has given the like notice in respect of the invention of "Improvements in apparatus for communicating between the guard and engine-driver of railway trains."

As set forth in his petition, recorded in the said office on the 2nd day of September, 1858.

1999. And WILLIAM HARKES, of Lostock Gralam, in the county of Chester, Agricultural Implement Maker, has given the like notice in respect of the invention of "An improved plough and pulverizer."

As set forth in his petition, recorded in the said office on the 3rd day of September, 1858.

2010. And HIRAM HYDE, of Truro, Nova Scotia, Gentleman, has given the like notice in respect of the invention of "Improvements in the construction of carriage springs."—A communication.

As set forth in his petition, recorded in the said office on the 4th day of September, 1858.

2016. And RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Editor of the Mechanics' Magazine and Patent Agent, has given the like notice in respect of the invention of "Improvements in printing or marking words or figures on papers, parcels, books, pages, tickets, and other articles requiring to be marked, printed, stamped, or addressed."—A communication.

As set forth in his petition, recorded in the said office on the 6th day of September, 1858.

2020. And JAMES FYFE, of Greenock, in the county of Renfrew, North Britain, Brass Founder, has given the like notice in respect of the invention of "Improvements in stop cocks or valves."

2024. And FREDERICK WILLIAM BRIND, of No. 14, Devonshire Street, Bishopsgate, in the city of London, Wine Merchant, has given the like notice in respect of the invention of "Improvements in sewing machines."—A communication.

2026. And Louis Pellissier, Mechanician, and Jean Puytorac, Bailiff, both of Bordeaux (France), have given the like notice in respect of the invention of "Improvements in railway breaks."
As set forth in their respective petitions, all recorded in the said office on the 7th day of September, 1858.

2027. And Bartholomew Hockin, of Gateshead Iron Works, Gateshead-on-Tyne, has given the like notice in respect of the invention of "Apparatus for repairing and fitting dock gates and their machinery."

2031. And Andrew Lamb, of Southampton, and John White, of Cowes, have given the like notice in respect of the invention of "Improvements in life boats."

2035. And Jean Ulrich Faessler-Petzi, of Lyons, in the empire of France, Merchant, has given the like notice in respect of the invention of "An improved process for the boiling off of tussah silks or wild silks."
As set forth in their several petitions, all recorded in the said office on the 8th day of September, 1858.

2052. And John Knowles, of Bolton-le-Moors, in the county of Lancaster, Cotton Spinner, has given the like notice in respect of the invention of "Certain improvements in machinery for preparing cotton and other fibrous materials."
As set forth in his petition, recorded in the said office on the 10th day of September, 1858.

2064. And John Minton Courtauld, of the firm of Samuel Courtauld and Company, of Braintree, in the county of Essex, Crape Manufacturers, has given the like notice in respect of the invention of "An improvement in clearing and preparing silk crapes, aerophanes, and other like fabrics, lisses, and other gauzes and lace, and in machinery employed therein."
As set forth in his petition, recorded in the said office on the 11th day of September, 1858.

2089. And the Honourable William Erskine Cochrane, of Osnaburgh Terrace, Regent's Park, in the county of Middlesex, has given the like notice in respect of the invention of "An improvement in the fastenings of railways."
As set forth in his petition, recorded in the said office on the 14th day of September, 1858.

2109. And Archibald Turner, of Leicester, Manufacturer, has given the like notice in respect of the invention of "Improvements in looms for weaving."
As set forth in his petition, recorded in the said office on the 18th day of September, 1858.

2222. And James Ridsdale, of Stoke Newington, in the county of Middlesex, Accountant, has given the like notice in respect of the invention of "An improved reservoir or fountain pen."
As set forth in his petition, recorded in the said office on the 6th day of October, 1858.

2256. And James Holroyd, of Leeds, in the county of York, Cloth Dresser, has given the like notice in respect of the invention of "An improvement in the knives used for shearing woollen cloths and cloths made of wool and other materials."
As set forth in his petition, recorded in the said office on the 11th day of October, 1858.

2312. And Joseph Pierre Gillard, of Paris, France, Civil Engineer, has given the like notice in respect of the invention of "Improvements in generating hydrogen, and in the means of, and apparatus for, applying the same to lighting and heating purposes."
As set forth in his petition, recorded in the said office on the 16th day of October, 1858.

2362. And Alexander Shaw, of the Earle's Field Works, Grantham, in the county of Lincoln, Leather Dresser and Fellmonger, and Glue and Parchment Manufacturer, has given the like notice in respect of the invention of "A new method or mode of raising nap on the linings of sheep skins."
As set forth in his petition, recorded in the said office on the 22nd day of October, 1858.

2381. And George Kent, of High Holborn, in the county of Middlesex, Machinist, has given the like notice in respect of the invention of "An improved churn.'—A communication.
As set forth in his petition, recorded in the said office on the 25th day of October, 1858.

2589. And Edmund Mellor, of Rochdale, in the county of Lancaster, Engineer, has given the like notice in respect of the invention of "Improvements in mules and other machinery for spinning cotton and other fibrous substances, whereby the cop will be built much firmer, and prevent snarles in the yarn."
As set forth in his petition, recorded in the said office on the 17th day of November, 1858.

2612. And William Stephens Hayward, of Wittenham House, Abingdon, in the county of Berkshire, Gentleman, has given the like notice in respect of the invention of "Improvements in the manufacture of a glutinous and viscous substance or dextrine, to be used in the manufacture of paper, and in dressing textile fabrics, by which greater tenaciousness, smoothness of surface, and body is obtained."
As set forth in his petition, recorded in the said office on the 19th day of November, 1858.

2791. And George Snell, of Leeds, in the county of York, Cloth Finisher, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for cutting woollen fabrics."
As set forth in his petition, recorded in the said office on the 6th day of December, 1858.

2815. And Andrew Lamb and William Alltoft Summers, both of Southampton, in the county of Hants, Engineers, have given the like notice in respect of the invention of "Improved arrangements of apparatus for superheating steam."
As set forth in their petition, recorded in the said office on the 8th day of December, 1858.

2848. And William Edward Wiley, Pen and Pencil Manufacturer, of 34, Great Hampton Street, Birmingham, has given the like notice in respect of the invention of "Improvements in everpointed pencils."

As set forth in his petition, recorded in the said office on the 11th day of December, 1858.

2862. And Joseph Wade, of Bradford, in the county of York, Manufacturer, has given the like notice in respect of the invention of "Improvements in means or apparatus employed in weaving."

As set forth in his petition, recorded in the said office on the 14th day of December, 1858.

2883. And Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, has given the like notice in respect of the invention of "A new or improved manufacture of cast steel."

As set forth in his petition, recorded in the said office on the 16th day of December, 1858.

2892. And James Jones Aston, of 41, Doughty Street, in the county of Middlesex, and of the Middle Temple, Barrister-at-Law, has given the like notice in respect of the invention of "Improvements in machinery or propellers applicable for the propulsion of ships, boats, and other vessels, on and through the water, and in the propelling of all such vessels on and through the water by means of such propellers."

2897. And James Clegg, of Keighley, in the county of York, Engineer, has given the like notice in respect of the invention of "Improvements in lubricating the valves and pistons of steam engines."

As set forth in their respective petitions, both recorded in the said office on the 17th day of December, 1858.

2921. And Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, has given the like notice in respect of the invention of "An improvement or improvements in the manufacture of cast steel."

As set forth in his petition, recorded in the said office on the 22nd day of December, 1858.

2935. And James Broom, of Glasgow, in the county of Lanark, North Britain, Iron Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture of steel."

As set forth in his petition, recorded in the said office on the 23rd day of December, 1858.

2941. And John Wright Child, of Halifax, in the county of York, Engineer, has given the like notice in respect of the invention of "Improvements in the manufacture of fabrics adapted to be used for curtains, coverings of furniture, table covers, and such like uses."

As set forth in his petition, recorded in the said office on the 24th day of December, 1858.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

11th January, 1859.

1563. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E. C., Patent Agent, for an invention of "Certain new or improved machinery for the manufacture of wire heddles."—A communication from a Foreigner residing abroad.—Dated 12th July, 1858.

1567. Thomas Earnshaw, of Cambridge Terrace, Thornton Heath, Croydon, in the county of Surrey, for an invention of "Improvements in the manufacture of night lights."—Dated 12th July, 1858.

1572. John Edwards, of 77, Aldermanbury, London, and Thomas Newey, of 70, Navigation Street, Birmingham, for an invention of "Improvements in the manufacture of blind furniture."—Dated 13th July, 1858.

1573. James John Field, of Paddington, in the county of Middlesex, Chemist, for an invention of "A new method of supporting and carrying telegraph wires, ropes, and cables."—Dated 13th July, 1858.

1585. Edward Owen, of Blackheath, in the county of Kent, Chemist, for an invention of "Improvements in distilling."—Dated 14th July, 1858.

1591. John Fowler, junior, of 28, Cornhill, in the city of London, Engineer, for an invention of "Improvements in apparatus used when ploughing, tilling, or cultivating land by steam power."—Dated 14th July, 1858.

1595. Christopher Penrhyn Aston, of Cross Street, in the county of Middlesex, Gun Maker, for an invention of "Improvements in breech-loading arms."—Dated 15th July, 1858.

1607. Peter Arkell, of North Woolwich, in the county of Kent, Engineer, and Alfred Melhado, of Queen's Gardens, Bayswater, in the county of Middlesex, Gentleman, for an invention of "Improvements in the submerging of telegraph cables."—Dated 16th July, 1858.

1611. William Anthony Burlton Bennett, of 13, Rue Tant Perd Tant Prie, Boulogne, in the empire of France, for an invention of "Improvements in military capes or cloaks."—Dated 16th July, 1858.

1637. Charles Doley, of Birmingham, in the county of Warwick, Manufacturer, and Edwin Bigland, of Smethwick, in the county of Stafford, Designer and Glass Painter, and Thomas

HENRY WORRALL, of Smethwick aforesaid, Lithographer, for an invention of "Improvements in ornamenting metallic and non-metallic surfaces."—Dated 20th July, 1858.

1649. JOHN WHEATLEY GILES, of St. Martin's-le-Grand, in the county of Middlesex, for an invention of "Improvements in locomotive or traction engines."—Dated 21st July, 1858.

1655. WILLIAM LYNALL THOMAS, of Union Street, Berkeley Square, in the county of Middlesex, Esquire, for an invention of "Improvements in ordnance fire-arms and apparatus generally in which gunpowder is employed."—Dated 22nd July, 1858.

1739. EDWARD JOHN MICHAEL CETTI, of Brook Street, in the county of Middlesex, Mathematical Instrument Maker, for an invention of "An improvement in barometers, gauges, and other analogous instruments."—Dated 31st July, 1858.

1775. LAWRENCE HALL, of Black Lane Mill, near Bury, in the county of Lancaster, Manufacturer, for an invention of "Certain improvements in looms for weaving."—Dated 5th August, 1858.

1805. JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in apparatus for working railway breaks."—A communication from Thomas Hopper, of the city of Newark, county of Essex and state of New Jersey, United States of America.—Dated 7th August, 1858.

1869. ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Certain improvements in machinery for forging horse-shoes."—Dated 16th August, 1858.

2141. JOHN WILSON, of 55, John Street, Sunderland, for an invention of "Improvements in floating docks."—Dated 23rd September, 1858.

2605. JOHN OAKES, of Exeter Row, Birmingham, in the county of Warwick, Spur Manufacturer, for an invention of "Improvements in the manufacture of spurs."—Dated 18th November, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 8th January*, 1859, *inclusive.*)

6th January.

53. SAMUEL CUNLIFFE LISTER and WILLIAM TONGUE, both of Bradford, in the county of York, for an invention of "Improvements in machinery for combing wool, cotton, and other fibrous materials."—Dated 7th January, 1856.

8th January.

77. MARTIN BILLING, of Birmingham, in the county of Warwick, Stationer, and FREDERICK AUGUSTUS HARWOOD, of Birmingham aforesaid, Machinist, for an invention of "New or improved machinery for the manufacture of paper bags."—Dated 10th January, 1856.

116. JOHN ABRAHAM, of Birmingham, in the county of Warwick, Machinist, for an invention of "New or improved machinery for the manufacture of percussion caps, and for cutting out and raising articles in metal generally."—Dated 16th January, 1856.

117. JOHN HAMILTON, junior, of Liverpool, for an invention of "Improvements in the posts or uprights employed in constructing electric telegraphs."—Dated 16th January, 1856.

Errata.

In Journal of 31st December, 1858.

2873. For "Bullouga" read "Bullough."

In Journal of 7th January, 1859.

2919. For "Brunfield" read "Brimfield."

After 2939, for "2491" read "2941."

Free Patent Museum and Library, South Kensington.

NUMBERS of VISITORS for the Week ending 8th January, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Jan. 3	Monday -	184	398	582
„ 4	Tuesday -	165	358	523
„ 5	Wednesday	81	87	168
„ 6	Thursday -	109	—	109
„ 7	Friday -	132	—	132
„ 8	Saturday -	171	—	171
	Total	842	843	1685

Total number of visitors since the period of free daily admission (12th May, 1853) to 8th January, 1859, —56,289.

This Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

FOREIGN PATENTS.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 21st December, 1858, and each bearing that date.

No. 22,337. Wilson Ager, of Rohrsburgh, Pa., for an "Improvement in the mode of cleaning rice."

"I am aware that air has been injected into masses of grain by perforation tubes and otherwise for the purpose of cooling the grain and preventing fermentation: to such I make no claim; but what I do claim as new and of my own invention, and desire to secure by Letters Patent as an improvement in the mode of cleaning rice, is, the forcing of a current of air into or through the grain during the cleaning operation, for the purpose above set forth."

No. 22,338. Horace L. Arnold, of Eek Horn, Wis., for an "Improvement in cars seats and couches."

"What I claim as new, and desire to secure by Letters Patent is, 1st, jointing the ends of the seats next the sides of the car to a stud or bolt B, so as to enable them to be arranged at right angles to the sides of the car, or to be swung round or turned to a diagonal position, and to thus occupy the spaces between them longitudinally, and increase the width of the passage way, and thus admit of their elongation to convert them into distinct sleeping berths or couches, as set forth. 2nd, I claim the combination of the slotted bar F, eccentric lever clamp H, and plates I, K, with lips or raised edges, for firmly fastening the seats in the required position to answer their designs, as before described. 3rd, I also claim the combination of the slides O, or their equivalents, and the T-shaped bars M, M^1, for sustaining the backs N of the seats in an inverted position, and bolts or slides S for securing the backs in their said inverted position, as described."

No. 22,339. John Badger, of Baileyville, Ill., for an "Improvement in seeding machines."

"I do not claim, separately, any of the parts herein described, for they have all been used under different forms of arrangements, and in combination with other parts; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the circular plates I, and stirrers *h*, attached to the rotating shaft F^1 within the seed box C, arranged and combined with the slotted bottom D and slide E, substantially as and for the purpose set forth."

No. 22,340. Thomas D. Bailey, of Lowell, Mass., for an "Improvement in pegging jacks."

"Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is, 1st, I claim the method of jacking the last by turning the plate to which the last is fastened. 2nd, I claim the combination of the lever H, screw F, and turntable T, for jacking the last, substantially as described. 3rd, I claim fastening the screw F^1, or its equivalent, stationary, by means of the coupling pin L^1, and plate I, so that when the turntable T is revolved it shall operate the lever and jack the last, substantially as described. 4th, I claim fastening the screw E, or its equivalent, to the turntable T after the last has been jacked, by means of the coupling wheel L and pin R, operated by the thumb latch O and spring P, for the purpose of preventing the screw F from turning round and loosening the lever H, substantially as described. 5th, I claim the combination of the two hinges S, S^1, cam levers U, U^1, hinge seat B, the link C, and hand-set screw W, for the purpose and substantially as described."

No. 22,341. J. A. Barrington, of Fredericktown, Ohio, for an "Improvement in harvesters."

"What I claim, and desire to secure by Letters Patent, is, the combination of the bell crank C^1, and guide piece G, with the crane C, rod *r*, connecting the crank arm *h* with the rakes, and the crank shaft *f* giving motion to the system, the operation being substantially as described. I also claim connecting the entire raking mechanism with the vibrating frame F, substantially as and for the purposes set forth."

No. 22,342. R. W. Belson, of Philadelphia, Pa., for an "Improvement in stoves."

"Claim:—I am aware that an annular chamber with air jets above a fire for consuming gases is an old and well-known device, and I therefore limit my claim to the improvement above described, to wit, the combination of the air chamber *a*, surrounding the base of the fire pot, with the annular chamber *f* at the upper part of the fire pot, as described. I also claim the jet pipe *h* in combination with the annular chamber *a* and escape pipe *i*, as described. I also claim the adjustable heater *r*, constructed, arranged, and operating over the fire, substantially as herein described."

No. 22,343. C. A. Bremner, of Goshen, N. Y., for an "Improvement in composition for roofing."

"What I claim as new in the above composition, and desire to secure by Letters Patent, is, the composition consisting of marl and the other substances herein specified, combined and compounded in about the proportions and in the manner substantially as herein set forth."

No. 22,344. John Broughton, of New York, N. Y., for an "Improved cut-off gear for steam-engines."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the combination of the two rock shafts H, H, their arms N, N, the vibrating links O, O, the rods L, L, and the lifters M, M, the whole applied substantially as described, to operate upon a tappet or tappets on the valve stem E, or its equivalent, for the purpose of lifting the valve, and subsequently tripping it by the continued and inherent motion of the lifters. 2nd, in combination with the above-specified lifting and tripping mechanism, I claim the combination of the pendulous rods R, R, the toggle links S, S, and the slide T, or their equivalents, connecting with a governor or other means of adjusting the same to vary the positions of the centers of motion *c*, *c*, substantially as described, for the purpose of varying the point of cutting off the steam."

No. 22,345. Chester Bullock, of Jamestown, N. Y., for an "Improvement in harvesters."

"What I claim as my invention, and for which I desire Letters Patent, is, attaching the vibrating cutter to the vibrating bar and fingers, as described."

No. 22,346. Mortimer M. Camp, of New Haven, Conn., for an "Improved propeller for life-boats."

"I am aware that submarine boats and diving bells have been so arranged as to be propelled by a single occupant, and I do not therefore claim my invention for the propulsion of either of those articles, as it is only practically applicable to life-saving boats, as herein described; nor do I claim its application to the life-boat shown, for my invention is applicable to any description of inclosed life-boat, however constructed; but what I do claim as my invention, and desire to secure by Letters Patent, is, the method of propelling inclosed life-boats by the application of the power of the occupants of the boat, as herein set forth."

No. 22,347. E. G. Chormann, of Philadelphia, Pa., for an "Improved ellipsograph."

"Having fully described the construction and operation of my improved instrument, and disclaiming the broad feature of changing the relative position of the shoes or pins which run in the slots of the plate, or the changing of the distance of the pencil or graver carrier from the foci, what I do claim, and desire to secure by Letters Patent, is,—1st, constructing the shoes *i* and i^1 in two parts swiveled together, as specified, in combination with the adjusting screw shaft d^1, the whole arranged and operating as described. 2nd, in combination with the screw adjustment of the movable shoe, the arrangement of the pencil or dry point carrier *f* on a screw shaft *c*, in order that the relative lengths of the axes may be readily varied to the smallest extent, or a series of concentric ellipses be drawn varying very slightly in size. 3rd, arranging the drawing apparatus with a vibrating adjustable arm D on a vertically adjustable arm B^1, as herein described, for the purpose set forth."

No. 22,348. E. Claude, of New York, N. Y., for an "Improvement in breech-loading revolving fire-arm."

"I do not claim of itself extending the chambers through the cylinder, nor the attachment of the barrel to an exterior pin A, separately considered; but what I do claim as new, and of my own invention, and desire to secure by Letters Patent, is, making the arm U between the barrel and exterior shaft, the bearing for the cylinder by a shaft on the forward end of the cylinder passing through and secured to the arm substantially, as described, when the said parts are combined with breech-piece and stock, so that the cylinder is rotated and stopped and the discharge effected, substantially as herein-before set forth."

No. 22,349. Henry T. Clawson, of New Berne, N. C., for an "Improved pepper cruet."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, placing within the perforated top or cap B of a pepper cruet or box A, a rotating or reciprocating partially rotating brush C, arranged substantially as and for the purpose set forth."

No. 22,350. Henry T. Clay, of Gardiner, Me., for an "Improvement in shingles."

"Claim:—What I claim as my invention, and for which I ask an exclusive right, is, 1st, a shingle of uniform thickness at the butt, so far as it is to be laid to the weather. 2nd, a shingle that commences to taper at the point on the upper side, where the next layer above covers it, and tapers all on that side."

No. 22,351. P. H. Cotton, of Demopolis, Ala., for an "Improvement in preserve cans."

"What I claim as my invention, and desire to secure by Letters Patent, is, in combination with the channel *c*, outside of the neck of the can, the employment of a recess *e* in the neck, and the extension of the rim of the cap over such recess, substantially as and for the purpose specified."

No. 22,352. John Cumberland, of Mobile, Ala., and James R. McClintock, of New York, N.Y., for an "Improvement in buckles."

"We claim as our invention the buckle or clasp composed of the parts A and B, or their equivalents, substantially as described, and for the purposes described."

No. 22,353. Felix Daunoy, of Carrollton, La., for an "Improvement in bagasse furnaces."

"What I claim as new, and desire to secure by Letters Patent, is, the construction of bagasse furnaces, having the exit flue F located in the interior of the furnace, with the openings K to admit the gass from combustion, when in combination with the wood or coal chamber, having a skeleton crown and the grates B, on which the bagasse is consumed, when made and arranged substantially as and for the purpose set forth."

No. 22,354. Richard De Charms, of Philadelphia, Pa., for an "Improved carpet fastener."

"What I claim as my invention, and desire to secure by Letters Patent, is, the within-described new article of manufacture, to wit, an eyeletted carpet or floor-cover binding, for the purposes set forth."

No. 22,355. Alexander Douglas and Samuel S. Sherwood, of New York, N. Y., for an "Improved slide and fastening for skirt hoops."

"We are aware that a slide and fastening for skirt hoops has been made of a single piece of metal, so as to embrace and fasten to the end of the hoop, while a part of the hoop near the other end was permitted to slide through it, or, in other words, through a loop which formed a part of it, the attachment to the hoop being formed of loops folding in one direction from a central piece upon the end of the hoop, and the slide or loop for the hoop to slide in being formed of loops folding form said central piece in the opposite direction, as seen in the Patent granted to R. J. Mann, June 22nd, 1858, and not in either case forming a continuous connection and junction of metal around the hoop. We are also aware that the tapes of skeleton skirts have been attached to the hoops by a clamp made by folding lips over from the ends, and punching up a longitudinal strip of the metal to hold the tapes, as shown in the Patent granted to A. Smart, August 31st, 1858. We make no claim to either of these devices. The particular improvement which constitutes our said invention, and which we claim as having been originally and first invented by us, is, the combined clamp and slide made entire of one piece, by forming the clamp of the divisions *b* and *c*, and the slide of the lips *d*, as described, the divisions *b* and *c* being entire, and connected at both ends to the plate, as shown, thus forming a continuous connection around the end of the hoop, for the purpose stated."

No. 22,356. John Fairclough, of Louisville, Ky., for an "Improvement in balancing mill-stones."

"I am aware that adjustable weights have been previously used on mill-stones, and I therefore do not claim broadly such feature; but, having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement of the cylinders I within the boxes H, the former being provided with tubes *e*, having screw threads on their outer and inner surfaces, and provided with screws *g*, and the cylinders provided with projections *l*, which fit in the grooves *m*, of the boxes, as and for the purpose set forth. I also claim the plates *h*, and bottoms *j*, of the cylinders I, when screwed on the tubes *e*, and used in connection with the nuts K, substantially as and for the purpose specified."

No. 22,357. Samuel P. Francisco and William P. Dickinson, of Reading, Pa., for an "Improvement in hydrants."

"We do not claim the application and use of a piston and cylinder in connection with a hydrant or fire-plug, nor do we confine ourselves to the precise details herein-before set forth, so long as the peculiar character of our invention is retained, as the same may be varied; but what we claim, and desire to secure by Letters Patent, is, the providing said cylinder and piston with suitable openings for the admission of the air, and for the purposes set forth."

No. 22,358. Samuel Friend and George Seiler, of New York, N. Y., for an "Extension finger-ring."

"Having thus described our said invention, we would remark that the advantages of the same will be apparent, for by this simple arrangement a ring is adapted to the fingers of different sizes, so as to include three or four sizes, and by springing in passing the knuckle will hold firmly on to the finger; what we claim as our invention, and desire to secure by Letters Patent, is, the combination of the spring ring and folding bars, substantially as and for the purposes specified."

No. 22,359. Philip C. Fritz, of Barrytown, N. Y., for an "Improvement in machines for separating garlic from grain."

"I do not confine myself to the precise arrangement of parts herein shown and described for the purpose specified, for they may be modified in various ways; but, having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, separating garlic from grain by passing the same between crushing rollers in the manner substantially as shown and described, that the garlic seed and kernels of grain will be crushed separately between the rollers, and the crushed grain allowed to descend into a proper receptacle, while the garlic seed, on account of the moisture or juice they contain, adhere to the rollers and are scraped therefrom."

No. 22,360. Edward M. Fuller, of Salisbury, N.Y., for an "Improvement in horse-power for driving reciprocating saws."

"The particular improvement which constitutes my said invention, and which I claim as having been originally and first invented by me, is, the connection of the saw to the main body of a horse-power which is operated by the circular movement of the animal, by extending the reciprocating rod *o*, or its equivalent, from the main body of the machine across the track of the horse to the saw in such a position as to allow the horse to pass over it, the parts being constructed, arranged, and operating substantially as and for the purposes set forth."

No. 22,361. P. W. Gates, D. R. Fraser, and Thomas Chalmers, of Chicago, Ill., for an "Improvement in cut-off gear for steam-engines."

"What we claim as our invention, and desire to secure by Letters Patent, is, the two sliding toe-pieces L, L^1, constructed as described, and applied within the rocking frame J, to operate substantially as herein described, in combination with the double lifters G, *e*, *e*, attached to the valve stem, and with a stud and roller *j*, *i*, or their equivalent, connected with a governor, or otherwise made movable."

No. 22,362. Henry Glynn, of Baltimore, Md., for an "Improvement in medicated fabrics."

"Having thus fully described the nature and object of my invention or discovery, what I claim as a new article of manu-

facture, and not heretofore introduced into the market, is, cloth or paper chemically prepared for sanatory purposes with a solution of which copper or copper and calomine are the bases, such manufactured article being designed for the prevention, or as a protection against infectious or contagious diseases, and made as herein stated."

No. 22,363. Edward K. Godfrey, of New York, N. Y., for an "Improvement in paper files."

"Having now described my invention, and its mode of operation, I will proceed to set forth what I claim, and desire to secure by Letters Patent of the United States. I am aware that the method of locking the points of the receiving and transferring hooks or wires have been used as applied to another purpose, and therefore make no claim to this feature of my improved paper and letter file; but what I do claim, and desire to secure, is, the method of securing the receiving and transferring hooks *c* and *d* to the back or steadying weight *a*, by folding and uniting their ends down the entire length of the channel or groove in the lower surface of the back, so as to prevent them from twisting and dropping the file of papers, as would be the case if the ends of the wires were simply riveted into the back."

No. 22,364. Plymon B. Green, of Chicago, Ill., for an "Improvement in seats and sleeping couches for railroad cars."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the arrangement, under the seat, of a sliding draw E, which has one portion of its top cushioned and the other portion open, in combination with the hinged back or cushion A and stationary cushions D, N, substantially as and for the purposes set forth. 2nd, in combination with the above, the arrangement of the upper couches on hinges in the peculiar manner specified, so that they can be adjusted with facility, substantially as described, and illustrated in the drawings."

No. 22,365. Theodore F. Hall, of Marietta, Ohio, for an "Improvement in hanging window sash."

"What I claim as my invention, and desire to secure by Letters Patent, is, the employment and arrangement of pulleys or friction rollers at the lower corners of sash, and the balancing of the sash on cords, in combination with pulleys and weights or a weight, substantially as above set forth."

No. 22,366. John C. Hall, of Fayette, Miss., for an "Improved manufacture of portable fans."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the fan as a new article of manufacture when constructed in the manner described."

No. 22,367. Henry Havell, of Newark, N. J., for an "Improvement in the manufacture of scissors."

"I do not claim generally the soldering of a steel plate on to malleable iron, by means of brass or any other metal, but what I do claim as new, and of my own invention, and desire to secure by Letters Patent, is, the forming of the blades of scissors or shears by means of the use of the intermediate plate *b*, or by soldering or brazing the malleable cast-iron and steel together, substantially in the manner and for the purpose herein described. I also claim in the manufacturing of scissors or shears the use of the die, as before mentioned, and the striking together and into the required line and shape the component parts of the blades, substantially in the manner and for the purpose herein described."

No. 22,368. Obed Hussey, of Baltimore, Md., for an "Improved method of gathering grain upon and discharging it from the platform of harvesters."

"What I claim as my invention, and desire to secure by Letters Patent, is, the method herein described of gathering grain upon and raking it from the platform of a reaping machine, and depositing it upon the ground by a raker riding on the machine directly behind the horses, and the gearing facing obliquely towards the grain which the machine is advancing to cut, and who, at a single operation with his rake, first presses the grain in front of the machine backward against the cutter, and over upon the platform; secondly, by a pivotal motion turns the prostrate grain upon the platform, with its stalks parellel to the cutter; thirdly, slides the grain endwise off the platform at the side of the machine; and fourthly, deposits the grain in a gavel on the ground behind his seat and across the track of the driving wheel of the machine, as herein set forth."

No. 22,369. Edwin A. Jeffery, of Corning, N.Y., for an "Improvement in hoop lock."

"Having thus described my invention, I claim as an improved article of manufacture, a hoop lock composed of a shell or socket A, and a taper pin B, made as herein shown and described."

No. 22,370. Thomas Lewis, of Malden, Mass., for an "Improvement in bottle stoppers."

"I do not claim a tubular self-closing bottle stopper having a ball valve, nor do I claim the improved stopper as patented by the said Williams; but what I do claim, is my improved ball valve stopper, as made with the separate cap C, provided with a discharging tubular mouth *i*, and cross bars *g*, *h*, or equivalents, for detaining the ball, as described, and connected with the main tube or body by a screw, or its equivalent."

No. 22,371. Tristram S. Lewis, of Kendall's Mills, Me., for an "Improved folding bench."

"I claim the combination and arrangement of the hinge blocks *a*, *b*, the leg slides E, F, and the confining slide G, as applied to the parts A, B, and their legs C, D, connected or hinged together, so as to fold up in manner substantially as specified."

No. 22,372. James C. McGrew, of Smithfield, Ohio, for an "Improvement in machines for elevating hay."

"What I claim in the above-described machine for elevating hay, grain, fodder, &c., is the arrangement of the bar a^{111}, and inclined platform a^{1}, a^{11}, with the sheers and hoisting fork, all substantially as described for the purposes set forth."

No. 22,373. James Montgomery, of New York, N. Y., for an "Improved buoyant propeller."

"Having thus fully described my invention, the following is what I claim as new therein, and desire to secure by Letters Patent, 1st, the described or substantially equivalent means of securing the flotation of a screw-propeller, by ejecting water therefrom by centrifugal action. 2nd, the detachable hollow blades B, in the described combination with the shaft A, for the purposes set forth. 3rd, the application of the valve *i*, arranged as described in the forward end of the hollow shaft A, for the purpose explained."

No. 22,374. Albert W. Morse, of Eaton, N. Y., for an "Improvement in seeding machines.

"I do not claim a clod-crusher, nor a roller, nor a seed-sower separately; what I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the hopper *f*, with the rollers *g*, *g*, belt or strap *e*, rollers *m*, and rings *a*, as described for the purposes set forth."

No. 22,375. John Peckham, of New Haven, Conn., for an "Improvement in draughting shirts."

"I am aware that measures for draughting garments have been made by folding tapes or paper strips in such manner as to form a graduated scale, and I therefore do not claim the measures in themselves considered; but, having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, draughting shirts by means of the neck and breast measures A, B, formed and applied to the cloth as herein shown and described, so that the neck circle will be chiefly cut or formed in the back portion of the shirt, and the upper part of the back portion folded over and united to the top of the front portion, on a line with the base of the neck, as set forth."

No. 22,376. Augustus Plinta, of Albany, N. Y., for an "Improvement in R. R. rails."

"I claim the construction of a railway rail by forming the same hollow of an elliptical or oviform shape in cross section, the lower portion of the arch being extended into a foot or flange, and a segment of the upper arch being extended into a lip or face for the tread of car wheels, slots being made through the bottom, and across the lower part of the body of the rail, substantially in manner and form, and for the purposes set forth in the within specification."

No. 22,377. David D. Porter, of U. S. Navy, for an "Improvement in quoins for gun carriages."

"I claim the combination and arrangement of the degree rack or racks, the axle thereof, the T bolt and its groove, with the bed and wedge, substantially as and for the purpose as described. I do not claim the mere use of raised projections for indicating numbers by the touch of the finger, as I am aware that such is not new; but what I do claim is the combination and arrangement of the tangible scale and axle with the degree rack and the wedge, so that by the application of the finger to both scale and axle at one and the same time, and during the night or otherwise, the proper position of the wedge may be determined for any desirable elevation of the gun."

No. 22,378. Joseph Redhead, of Woodville, Miss., for an "Improved self-adjustable leveling instrument."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, combining with the dish or case A, an inclined rod and ball or weight *n*, so that when said case is set upon an inclined staff, by its steel point, the ball will swing the case into a level position, for the purpose of making a leveling instrument for ascertaining the ascent or descent of ground, as set forth."

No. 22,379. George F. Rice, of Worcester, Mass., for an "Improved machine for boring wood."

"I do not claim the joints and semicircles, as that has been known before; but what I do claim, and desire to secure by Letters Patent, is, the hollow cross bar, together with the double head bolt, which enables the operator to fasten the uprights at any angle, by simply turning one nut, the whole being constructed substantially in the manner as above described, and for the purposes herein specified."

No. 22,380. H. C. Sergeant, of Columbus, Ohio, for an "Improved governor for steam-engines."

"What I claim as new, and desire to secure by Letters Patent, is,—1st, a steam-engine governor, composed in part of a steam-engine which is subject to a uniform resistance, and which works independently of and by its own velocity, controls the velocity of the engine to be governed, substantially as herein set forth. 2nd, the employment of two disks I and N, having spiral projections *f*, *f*, and *j*, *j*, on their faces, and provided with stop pins *q*, *q*, applied substantially as described, to combine an engine which is to be regulated with an isochronous revolving regulator. 3rd, the combination of what is herein termed the 'regulator engine,' its regulator S, T, *k*, *l*, *m*, and regulating valve U, or their equivalents, and the shafts H and M, and their spiral faced disks I, P, one driven by said engine, and the other by the engine to be governed, the whole applied and operating in combination with a regulating valve B, B¹, or its equivalent, substantially as herein described."

No. 22,381. Reuben Shaler, of Madison, Conn., for an "Improved brush."

"Having thus fully described my said invention, I deem it proper to say, that I am aware that brushes have been made in which the bristles have been attached to a cylinder in tufts spirally arranged in rows around it. I make no claim to such a form of arranging the bristles. I am also aware that bristles have been secured in position, after they have been attached to the handle, by pouring melted resin upon their ends or by filling the end of the brush with glue. I do not claim these modes of cementing in the bristles. The particular device which constitutes my said invention, and which I claim as having been originally and first invented by me as a new article of manufacture, is, a brush the bristles of which are secured by winding them into a spiral groove, and fastening them in the manner described, or by winding them into cement as set forth."

No. 22,382. Evan Skelly, of Plaquemine, La., for an "Improvement in boiler furnaces."

"I am aware that stoves have been made in which the fire chamber is fashioned in the form of a cone, the escape opening being contracted. I do not claim broadly the making of furnaces of conical shape; I do not claim broadly the idea of contracting the escape opening; I do not claim the arrangement of bridge walls alternately on opposite sides of the main flue; but what I claim as my invention, and desire to secure by Letters Patent, is, the combination and arrangement of the gradually contracted fire chamber C, with the bridges F, F, G, G, as herein shown and described for the purposes set forth."

No. 22,383. Orin B. Smith, of Monticello, N. Y., for an "Improvement in harness buckles."

"What I claim as new, and desire to secure by Letters Patent, is, the combination of the lever *c*, operating as described, with the bow B¹, for the purpose of making a harness or other buckle, and to which may be attached straps A and B, as set forth."

No. 22,384. Ira Speight, of Woodville, Miss., for an "Improvement in hominy mills."

"What I claim as my invention, and desire to secure by Letters Patent, is, hanging mill-stones by means of right and left screws, substantially as and for the purposes set forth."

No. 22,385. John Stevens and James Hanley, of New York, N. Y., for an "Improvement in buckles for skirt hoops."

"Claim:—We claim the buckle when constructed substantially in the manner described, in combination with the slides, having holes to receive the hook of the buckle, for the purpose set forth."

No. 22,386. Asa F. Tarr, of Rockport, Mass., for an "Improved mitre box."

"Having thus described my invention, I claim as an improved article of manufacture a mitre box, having a sliding frame F attached to pivoted standards (*g*), and otherwise made as herein shown and described."

No. 22,387. Enoch Thomas, of Beverley, Va., for an "Improvement in cam press."

"Having thus fully specified and described my invention what I claim as new, and desire to secure by Letters Patent, is, the mode of making and arranging the journal boxes so as easily to vary the space under the follower, and retain the uniform position of the pressure, in combination with the cam and windlass cast solid, when constructed and operated substantially as specified and for the purposes set forth."

No. 22,388. William Tucker, of Blackstone, Mass., for an "Improved dynamometer."

"I claim the combination of the grooved slider D and its screw connection G, with the index pointer E, or its equivalent, and the spring C and pulley A, or its equivalent, applied to a shaft B, substantially as described, the slider having a feather connection *a* with the said shaft, as explained."

No. 22,389. Reed Vincent, of Rockton, Ill., for an "Improvement in ploughs."

"What I claim as my invention, and desire to secure by Letters Patent, is, as follows,—the combination of the convex standard A, the braces B, D, and the mold board, when arranged in connection with the beam and bent handles C, as described and represented, and for the purpose set forth."

No. 22,390. Francis T. Cordis and William W. Wade, of Long Meadow, Mass., for "Labels for trees, &c."

"What we claim as our invention, and desire to secure by Letters Patent, is, the combination of a metallic rim, or back, with paper or other suitable substance on which is written or printed the name of a tree, shrub, plant, or seed, and a plate or plates of mica and a metallic ring in either of the modes in the foregoing specification described, as a tag or label for designating and distinguishing the varieties of trees, shrubs, plants, and seeds, in orchards, nurseries, and gardens, as above described."

No. 22,391. Andrew Walker, of Claremont, N.H., for an "Improvement in apparatus for purifying gas."

"I do not claim the purification of illuminating gas by means of water when applied in a shower of drops, or of finely divided streams; but I claim the combination and arrangement of separate chambers opening into each other in such manner that a current of water or fluid may be made to flow through the series in thin falls or sheets, or from one chamber to the next in a thin fall or sheet, substantially as described, and a current of gas be made to pass upward and through the several chambers, and successively through, and against the several falls or sheets of fluid, essentially as explained, the chambers being disposed one over the other in column, and the whole being to effect the purification of gas for illumination, as described."

No. 22,392. David Wells, of Lowell, Mass., for an "Improvement in stoves."

"I am aware that various plans have been devised for admitting heated air into stoves and furnaces so that the products of combustion may be mixed therewith, in order to insure the burning of the same. I therefore do not claim broadly such idea; but, having thus described my invention, what I claim as new, and desire to secure by Letters Patent is, the arrangement of the flues D¹, D¹, smoke chamber E, air-heating chamber G, and fire chamber B, the latter communicating with the smoke chamber by means of perforations *b*, and the smoke chamber communicating with the air-heating chamber by perforations *a*, substantially as and for the purpose set forth."

No. 22,393. Ezra Wells, of Covington, Pa., for an "Improvement in manufacture of glass furnaces and pots."

"Having thus fully described my invention, what I claim, and desire to secure by Letters Patent of the United States, is, the new article of manufacture, namely, pots and furnaces made of the black American clay for use in manufacturing glass and glass ware, substantially as set forth, for the purposes described."

No. 22,394. Norman S. White and Aaron Denio, of Shaftesbury, Vt., for an "Improved method of attaching cutting lips to auger shanks."

"What we claim as our invention, and desire to secure by Letters Patent, is, we do not claim broadly attaching the cutting parts to the screw shaft of augers, but we do claim the specific manner set forth and shown in the specification and drawings."

No. 22,395. J. A. Woodward, of Burlington, Iowa, for an "Improvement in smut machines."

"I do not claim the curved blast spout A, nor do I claim broadly a scouring device connected therewith, for such may be seen in the patented case of mine formerly alluded to; but, having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement of the wire cloth cylinder G, scourer E, deflecting or separating bar I, spout f^4, and shoe J, as and for the purpose set forth."

No. 22,396. George C. Ayling, of Boston, Mass., assignor to himself and Henry A. Ayling, of said Boston, for an "Improved instrument for measuring altitudes, etc."

"I do not claim the combination of the detector glass with the index and horizon glasses; but what I do claim is, the arrangement of the index glass with respect to the detector glass so as to enable the latter to be moved either into parallelism with, or at right angles to, the former, and combining with the detector glass and the main divided arc and index a secondary index and divided arc, applied to register the movements of the detector glass, substantially as described."

No. 22,397. Samuel Baldwin, of Newark, N. J., assignor to Baldwin and Co., of said Newark, for an "Improvement in watch faces."

"Having thus described my improvement in watches, what I claim therein as new, and desire to secure by Letters Patent, is, arranging the figures of the dial without turning the works of the watch in a plane parallel to its face, substantially as described, so that they may be in the proper positions in relation to the pendant whether the dial faces be the open or the closed bizzle of the case."

No. 22,398. William Hathaway, of Worcester, Mass., assignor to William G. Maynard, of said Worcester, for an "Improved clothes frame."

"Having thus described my improvements in clothes frames, what I claim therein as new, and desire to secure by Letters Patent, is, arranging the center of motion of the cross bars, substantially as described, so that the center of motion of the outer end of the cross bar when the frame is closed will be over or within the center of motion of the inner end of the cross bar, for the purpose set forth."

No. 22,399. Robert Heneage, of Buffalo, N. Y., assignor to himself and Edward O. Ball, of said Buffalo, for an "Improvement in hemp brakes."

"1st, I claim the combination of the reversing mechanism with the brake B, B^2, beater C, C^2, and shell K, substantially as herein described, and for the purpose of dressing hemp, as set forth. 2nd, I claim the combination and arrangement of the brake B, B^2, with the revolving beater C, C^2, shell K, and revolving apron J, for the purpose of dressing flax, substantially as herein set forth. 3rd, I claim the arrangement of the chamber X within the machine, for the purpose of affording room for the movements of the hemp while being dressed, substantially as herein described."

No. 22,400. Reuben K. Huntorn, of Concord, N. H., assignor to himself and Jacob B. Rand, of said Concord, for an "Improved machine for turning tapering twists on wood."

"I do not claim the invention of pattern guides E, E, applied to a moving carriage J, and irrespectively of a rotary twist block and the mechanism connecting the same with the stock mandrels or arbors; nor do I claim stationary rests for the carriage guides E, E, to move on; but what I do claim is, the arrangement of the several separate devices described, when operated as set forth, for turning irregular tapering forms of wood."

No. 22,401. Charles Marzoni, of New York, N. Y., assignor to J. Gandolfo, of said New York, for an "Improvement in the manufacture of paper pulp from wood."

"Having thus described my machinery, apparatus, and process for converting wood into pulp, for making paper, what I claim as my invention therein is as follows:—First, I claim the use and application of the peculiar stone called adamantine, within described, when used as a means of tearing the woody fiber into a state suitable for pulp for paper, as described, by rotation, or any other substantially similar manner. Second, I do not claim steaming the wood, nor the use merely of hot water; but I claim the combining the use of the hot water at the boiling point or 210 Fahrenheit, with the stone in rotation while acting upon the wood simultaneously and continuously, so as that the hot water and flakes or particles of woody fiber immediately become united into, pulp. Third, I claim the apparatus, consisting of the cover or box E, the boxed openings therein 1, 2, 3, 4, and arms, rods and weights 7, 8, 9, by which the blocks of wood are fed and held to the surface of the stone."

No. 22,402. Martin Robbins and James Powell, of Cincinnati, Ohio, assignors to James Powell aforesaid, for an "Improvement in fauceto."

"We claim as new, and of our invention herein, the application to the key stem of the collar I, cushion Q, and loose collar R, or their equivalents, arranged and operating in combination in the manner described, to compensate for the lateral wear or displacement of the said stem."

No. 22,403. John L. Rowe, of New York, N. Y., assignor to Frederick Stevens, of said New York, for an "Improved ice pick."

"I do not claim the handle, rod, or point, as these are well known; but what I do claim, and desire to secure by Letters Patent, is, I claim the spiral spring D in combination with the handle A, rod F, and point B, as arranged substantially as and for the purpose specified."

Re-issue.

Cyrus H. McCormick, of Chicago, Ill., for an "Improvement in reaping machines."—Patented 23rd October, 1847.—Re-issued 24th May, 1853.—Re-issued 21st December, 1858.

"Claims.—The combination of the support or stand for the raker, placed behind the axis of the reel, balanced or sustained with the raker thereon by the driving wheel, with the reel and with the short platform. Also I claim combining with the side draft reel reaping machine, having a reel for gathering the grain to the platform, a stand or seat for the raker fixed firmly upon the platform of the machine, so as to enable the raker securely to get at the grain as deposited on the platform by the reel, and deliver and lay it properly on the ground from a single or short platform, out of the return track of the horses, in suitable gavels, for being bound into sheaves. And I also claim the combination of the reel for gathering the grain to the cutting apparatus and depositing it on the platform, with the stand or support for the raker, or the equivalent thereof, to enable him with ease and celerity regularly to remove the grain from the machine and lay it on the ground, out of the return track of the horses. And I also claim the construction of the stand or support for the raker, on the frame or platform of the machine, so that it gives to the raker such lateral and forward support to his body when standing at work, that he may have free use of his arms and the upper part of his body to remove the cut grain from the platform, while at the same time he is so held fast that he cannot be thrown upon the reel, nor prevented from performing his functions by the jolting of the machine as it moves over the uneven ground."

Additional Improvements.

Wm. Bradley, of Manchester, Va., for an "Improvement in machinery of dressing and sizing warps."—Patented 11th May, 1858.—Additional improvement dated 21st December, 1858.

"Claim.—The covering of the drying rollers with some non-conductor of heat, or material having less conductive

properties than the material, to prevent the caking, or uneven drying, of the size in the warps."

ALEXANDER M. HOLMES, of Morrisville, N. Y., assignor to himself and Albert G. Purdy, of said Morrisville, for an "Improvement in car seats and couches."—Patented 6th December, 1858.—Additional improvement dated 21st December, 1858.

"Claim.—The use of the adjustable back-pad or equivalent, and combining therewith the adjustable head-rests."

List of Specifications, &c. published during the week ending 7th January, 1859.

No.	Price.	Subject-Matter.
1201	5*d.*	Key-joint for connecting detached pieces of wood or metal.
1203	11*d.*	Machinery for sweeping and cleansing roads and streets.
1204	10*d.*	Machinery for cutting or splitting wood.
1205	3*d.*	Raising weights.
1206	3*d.*	Nose bags for horses.
1207	3*d.*	Aerated water.
1208	5*d.*	Steam engine boilers.
1209	1*s.* 3*d.*	Spinning and roving machines.
1210	9*d.*	Machinery for preparing and spinning motley yarns.
1211	3*d.*	Apparatus for winding clocks.
1212	5*d.*	Manufacture of umbrellas.
1213	3*d.*	Apparatus for the cure of smoky chimneys.
1214	3*d.*	Steam generators.
1215	6*d.*	Fumigating apparatus.
1216	3*d.*	Ships' gear.
1217	4*d.*	Dyeing, &c.
1218	6*d.*	Book clasp.
1219	3*d.*	Manufacture of starch, &c.
1220	9*d.*	Perambulators.
1221	3*d.*	Ornamental staining, dyeing, &c.
1222	6*d.*	Machinery for affixing postage stamps.
1223	3*d.*	Steam engines for propelling vessels, &c.
1224	3*d*	Iaeger.
1225	3*d.*	Printing and dyeing textile and other fabrics.
1226	3*d.*	Manufacture of coke.
1227	3*d.*	Manufacture of soap.
1228	3*d.*	Heel for boots and shoes.
1229	3*d.*	Tramways for bedsteads.
1230	3*d.*	Paper.
1231	3*d.*	Stand or rest for cameras, &c.
1232	1*s.* 10*d.*	Agricultural apparatus for ploughing, &c
1233	3*d.*	Railway signals.
1234	3*d.*	Machinery for the manufacture of fishing and other nets.
1235	10*d.*	Machinery for the manufacture of peat fuel, &c.
1236	6*d.*	Farming implement or gleaner.
1237	5*d.*	Ploughs.
1238	10*d.*	Apparatus for producing.
1239	2*s.* 10*d.*	Electric telegraphs.
1240	3*s.* 4*d.*	Machinery for weaving.
1241	4*s.* 6*d.*	Electro-magnectic telegraphs.
1242	10*d.*	Looms for weaving.
1243	3*d.*	Motive-power engines.
1244	7*d.*	Boilers and valves.
1245	11*d.*	Water closets, night commodes, &c.
1246	8*d.*	Pistons for pumps.
1247	3*d.*	Manufacture of alum.
1249	5*d.*	Manufacture of woven fabrics.
1250	3*d.*	Furnaces for smelting iron ore, &c.
1251	3*d.*	Purification of paraffine.
1252	1*s.* 7*d.*	Manufacture of railway wheel tyres, &c.
1253	6*d.*	Pipe stem or tube.
1254	6*d.*	Mangles.
1255	4*d.*	Protecting the silvered surfaces of glass.
1256	3*d.*	Machinery for preparing and combing wool, &c.
1257	3*d.*	Looms for weaving.
1258	11*d.*	Railways.
1259	3*d.*	Prevention of dust on railways.
1260	3*d.*	Extinguishing fires on railway trains.
1261	9*d.*	Manufacture of boots, shoes, and slippers.
1262	3*d.*	Ordnance and fire-arms.
1263	3*d.*	Preparation of vegetable fibres for stuffing.
1264	6*d.*	Railway wheels, &c.
1265	3*d.*	Reaping machine.
1266	5*d.*	Kneading apparatus.
1267	3*d.*	Gas burners.
1268	3*d.*	Manufacture of electric telegraph cables
1269	9*d.*	Manufacture of metallic bedsteads.
1270	7*d.*	Apparatus for the manufacture of yarn or thread.
1271	4*d.*	Preparation of malt and other grain for brewing, &c.
1272	3*d.*	Varnish for paper hangings.
1273	3*d.*	Ordnance.
1274	3*d.*	Manufacture of projectiles.
1275	9*d.*	Protection of carboys or other vessels and packages.
1315	9*d.*	Thrashing machine.
1352	6*d.*	Compass.
1452	10*d.*	Apparatus for examining and repairing the machinery of screw vessels.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, as translated or transcribed from Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(Registered for transmission abroad.)

No. 525. FRIDAY, JANUARY 14, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2258. To JOHN SAXBY, Engineer, of Brighton, Sussex, for the invention of "Improvements in apparatus for working signals on railways."
On his petition, recorded in the Office of the Commissioners on the 11th day of October, 1858.

2724. To JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for the invention of "A watch, simplified with anchor escapements and rack, forming a double lever, catching in the pinion of its balance wheel." — A communication from Antoine Lepage.
On his petition, recorded in the Office of the Commissioners on the 30th day of November, 1858.

2884. To JASPER HENRY SELWYN, of Woodland Crag, Grasmere, in the county of Westmoreland, Captain in the Royal Navy, for the invention of "A novel apparatus for paying out for laying down submarine telegraph cables or wires, and for raising the same after they have been laid down."
On his petition, recorded in the Office of the Commissioners on the 16th day of December, 1858.

2900. To JAMES MAC KENZIE, Manager to William Strode, of Saint Martin's-le-Grand, in the city of London, Gas Engineer, for the invention of "Improvements in those gas burners known as ventilating sun burners."

2902. To JAMES TAYLOR, of Birkenhead, Engineer, for the invention of "Improvements in the construction of pumps or engines for lifting and discharging water."

2904. To EMILE WEBER, of Mulhouse, in the empire of France, Chemist, for the invention of "Improvements in dyeing or coloring textile fabrics and materials, and in the machinery or apparatus connected therewith."

2906. And JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in apparatus for re-working the waste steam of steam engines."—A communication.
On their several petitions, recorded in the Office of the Commissioners on the 18th day of December, 1858.

2908. To SAMUEL HUNTER, of Newcastle-upon-Tyne, Gentleman, for the invention of "Improvements in the construction of anchors."

2910. And to JAMES RONALD, of Liverpool, in the county of Lancaster, Merchant, for the invention of "An improved machine for the direct spinning of hemp, flax, and other like fibrous materials."
On their petitions, both recorded in the Office of the Commissioners on the 20th day of December, 1858.

2912. To FREDERICK WINTER, of Hoxton, in the county of Middlesex, Manufacturer, for the invention of "Improvements in the preparation and application of varnishes for waterproofing paper, linen, and textile fabrics, and coating the same with metallic foils."

2914. To WILLIAM ELBERT DANDO, of the state of Pennsylvania, in the United States of America, at present residing in Manchester, in the county of Lancaster, Clerk, for the invention of "Improvements in apparatus for lowering boats from ships or vessels, and also for raising the same as required."

2918. And to NICHOLAS DAWSON, of 76, High Street, Poplar, in the county of Middlesex, Sta-

tioner, for the invention of "Improvements in order books."

On their several petitions, recorded in the Office of the Commissioners on the 21st day of December, 1858.

2922. To GEORGE SHARP, of Jarrow, in the county of Durham, Millwright, and WILLIAM ELDER, of the same place, Engine Smith, for the invention of "Improvements in furnaces and steam boilers."

2926. To EDWARD THOMAS DUNN, of Hammersmith, in the county of Middlesex, Gentleman, for the invention of "Improved fabrics suitable for the covering of floors, walls, and other like purposes."

2928. To MOLYNEUX SHULDHAM, of Dursley, in the county of Gloucester, Commander Royal Navy, for the invention of "Improvements in ships and vessels, and in working parts of their gear and rigging."

2930. And to ALEXANDER PRINCE, of the Office for Patents, 4, Trafalgar Square, Charing Cross, in the county of Middlesex, for the invention of "Improvements in ornamenting and illuminating surfaces of glass."

On their several petitions, recorded in the Office of the Commissioners on the 22nd day of December, 1858.

2932. To DAVID LICHTENSTADT, of Henry Cottages, Park Road, Peckham, in the county of Surrey, Chemist, for the invention of "Converting a certain vegetable substance into fibrous material for the manufacture of textile and other fabrics."

2934. To THOMAS BIRD, of the city of Manchester, in the county of Lancaster, Engineer, for the invention of "Improvements in spinning, and in the manufacture of cop bottoms or cop tubes."

2936. To JOHN WHITELAW, of Dunfermline, in the county of Fife, North Britain, Ironfounder, for the invention of "Improvements in sewerage and drainage apparatus."

2938. And to JOSEPH MAUDSLAY, of Lambeth, in the county of Surrey, Engineer, for the invention of "Improvements in the construction of ordnance and projectiles to be used therewith."

On their several petitions, recorded in the Office of the Commissioners on the 23rd day of December, 1858.

2942. To JOHN WRIGHT CHILD, of Halifax, in the county of York, Engineer, for the invention of "Improvements in dyeing wool and other fibres."

2944. To EDWARD FELLOWS, of Canterbury, in the county of Kent, Clerk, for the invention of "An improved vent peg."

2946. JOHN RAILTON, of Blackburn, in the county of Lancaster, Machine Maker, and SETH LANG, of the same place, Mechanic, for the invention of "Improvements in looms."

2948. To ALFRED SMITH, of Humbleton Hall, in the county of York, Agriculturist, for the invention of "Improvements in gigs, dog carts, and other vehicles."

2950. To JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in the permanent way of railways."—A communication from Christian E. Detmold, resident at the city of New York, United States of America.

2952. And to WILLIAM BECKETT JOHNSON, Manager for Messrs. Ormerod and Son, of Manchester, in the county of Lancaster, Engineers, for the invention of "Improvements in the employment of gas for generating steam, and in engines connected therewith."

On their several petitions, recorded in the Office of the Commissioners on the 24th day of December, 1858.

2955. To THOMAS STEVEN, Ironfounder, and THOMAS SCOTT, Engineer, both of Glasgow, in the county of Lanark, North Britain, for the invention of "Improvements in heating apparatus for culinary and warming purposes, and in part applicable to steam-boiler and other furnaces."

2956. To JOSEPH SMETHURST, of the firm of Messrs. Martin and Smethurst, of Guide Bridge, in the county of Lancaster, Engineers, for the invention of "Certain improvements in metallic pistons."

2958. To WILLIAM ARMAND GILBEE, of 4, South Street, Finsbury, London, Patent Agent, for the invention of "Improvements in treating fatty bodies, and in the apparatus employed therein."—A communication.

2959. To JAMES MACPHERSON, of Aberdeen, in the county of Aberdeen, North Britain, Comb Manufacturer, for the invention of "Improvements in solidifying the raspings and other waste of horns and hoofs, and in applying the process to the cementing of prepared horns, hoofs, and tortoiseshell."

2961. To CLAUDE MAMÈS AUGUSTIN MARION, of Paris, in the empire of France, Manufacturer, for the invention of "An improved box or case for containing and preserving sensitive photographic paper, called 'Marion's box.'"

2963. To HENRY LOWE, of Birmingham, in the county of Warwick, Manufacturer, and WILLIAM TRUEMAN, of Birmingham aforesaid, Axle Maker, and JOHN LINWOOD PITTS of Birmingham, aforesaid, Accountant Clerk, for the invention of "A new or improved axle for carriages."

2964. And to RICHARD HORNSBY, junior, of Spittlegate Iron Works, Grantham, in the county of Lincoln, for the invention of "Improvements in ploughing and tilling land by steam power, and in apparatus employed therein."

On their several petitions, recorded in the Office of the Commissioners on the 27th day of December, 1858.

2965. To BENJAMIN BROWNE, of No. 52, King William Street, London Bridge, E. C., Civil Engineer, and Patent Agent, for the invention of "Certain improvements in the manufacture of boots and shoes, or other coverings for the feet, and in the mode or method of uniting the same, or parts thereof."—A communication.

2966. To JOHN SINCLAIR, of the city of Dublin, Ireland, Turner and Fitter, for the invention of "Improvements in pistons."

2967. To THOMAS WARREN, of Glasgow, in the county of Lanark, North Britain, Glass Bottle Manufacturer, for the invention of "Improvements in the manufacture of glass bottles."

2969. To JAMES LECK, of Glasgow, in the county of Lanark, North Britain, Bleacher, for the invention of "Improvements in drying textile fabrics and materials."

2970. To CHARLES FAY, of Manchester, in the county of Lancaster, Railway Carriage Builder, for the invention of "Improvements in railway carriages and brakes."

2971. And to JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in the manufacture of boots and shoes, or other coverings for the feet."—A communication.

On their several petitions, recorded in the Office of the Commissioners on the 28th day of December, 1858.

2972. To WILLIAM HAWORTH, of the firm of Firth and Haworth, Cotton Spinners and Manufacturers, of that part of Todmorden which is in the county of York, and WILLIAM BARKER, of the same place, Overlooker, for the invention of "Improvements in the top clearers of machines for spinning."

2973. To THOMAS WELTON, of 29, New Compton Street, Soho, in the county of Middlesex, Artificial Limb Maker, for the invention of "Improvements in giving or obtaining publicity, and of advertising either by day or by night."

2974. To EDWARD WILSON CARTER, of Rochdale, in the county of Lancaster, Cutler, and JOHN DODSWORTH ABRAMS, of the same place, Machinist, for the invention of "Certain improvements in sewing machines."

2975. To WILLIAM TAYLOR, of Nursling, in the county of Southampton, Gentleman, and WILLIAM DAKIN GRIMSHAW, of the town and county of the town of Southampton, Engineer, for the invention of "Regulating the admission of natural atmospheric air and eduction of rarefied air or gases from hothouses or any other place or premises, and for supporting a required temperature."

2976. To RICHARD DUGDALE KAY, of Accrington, in the county of Lancaster, Manufacturer of Patent Fabrics, for the invention of "An improved chemical means of applying or fixing on woven or felted fabrics certain colouring matters produced from tar."

2977. To THOMAS PICKFORD, of No. 15, Mark Lane, in the city of London, Merchant, for the invention of "Improvements in the preparation and manufacture of manure."

2978. To HIRAM HUTCHINSON, of the city of Paris, France, for the invention of "Improvements in the manufacture of india rubber goods."

2979. To SAMUEL MORAND, of Manchester, for the invention of "Improvements in apparatus for stretching fabrics."

2980. To ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "Improvements in machinery for reaping and mowing."—A communication.

2981. And to THOMAS WILLIAM GOWING, of Camden Town, in the county of Middlesex, Veterinary Surgeon, for the invention of "An improved roughing for the shoes of horses and other like animals."

On their several petitions, recorded in the Office of the Commissioners on the 29th day of December, 1858.

2982. To HENRY NATHAN MAYNARD, of Crumlin, in the county of Monmouth, Engineer, for the invention of "Improvements in anchors, and in the manufacture of anchors."

2983. To FRANCIS PULS, Chemist, of Roxburgh Terrace, Haverstock Hill, in the county of Middlesex, for the invention of "The treatment of hydrocarbons."

2985. To FREDERICK JOHNSON and JOSEPH HENRY GEORGE WELLS, of 12, North Street, Westminster, Civil Engineers, for the invention of "Improvements in constructing breakwaters and other similar structures."

2986. To JOHN FRANCIS COLFS HEYNE, of Antwerp, in the kingdom of Belgium, for the invention of "Improvements in railway chairs and rails, and in the mode of fixing the same."

2987. To THOMAS BELL, of Plaistow, in the county of Essex, for the invention of "Improvements in purifying gas."

2988. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E. C., Patent Agent, for the invention of "Improvements in stoppering or closing bottles, jars, and other like vessels."—A communication from M. Chamblant, residing at Paris.

2989. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in washing and drying machinery and apparatuses."—A communication from S. Charles, residing at Paris.

2990. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in revolving fire-arms."—A communication from L. F. Devisme, residing at Paris.

2991. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in machines for embroidering."—A communication from B. G. Dutel, residing at St. Quentin, France.

2992. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in machinery for splitting or dividing hides, skins, leather, and other like materials."—A communication from F. Martin, residing at Paris.

2993. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "An improvement in pipes for smoking."—A communication from P. F. Varenne, residing at Paris.

2994. To WILLIAM BURGESS, of the firm of Burgess and Key, of Newgate Street, in the city of London, Agricultural Engineers, for the invention

of "Improvements in apparatuses for converting reciprocating into rotary motion."—A communication from G. Bancker, residing in New York.

2995. To SAMUEL STEPHEN BATESON, of 17, Bolton Street, May Fair, in the county of Middlesex, Barrister-at-Law, for the invention of "Improvements in generating steam."

2996. To JOHN KNOWELDEN, of Southwark, in the county of Surrey, Engineer, and RICHARD DOWNES EDWARDS, of Upper Belgrave Place, in the county of Middlesex, for the invention of "Improvements in hydraulic engines and apparatus connected therewith."

2997. And to JOHN WALLACE DUNCAN, of Grove End Road, St. John's Wood, in the county of Middlesex, Gentleman, for the invention of "Improvements in or connected with appliances for transmitting or conducting signals or action by electricity or magnetism, and in the method of testing insulating materials, combinations, or structures, for conducting electricity, and in treating malconstructed or invalid electric telegraph cables, and in utilizing parts of certain cables, or the application otherwise of such structures, and in certain insulating compounds, and in the apparatus and machinery used in connection therewith."

On their several petitions, recorded in the Office of the Commissioners on the 30th day of December, 1858.

2998. To JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in the permanent way of railways."—A communication.

3000. To HENRI ROBIN, of Nantes, in the empire of France, for the invention of "Improvements in reaping machines."

3002. To TIMOLEON ZOÉ LOUIS MAUREL, of No. 44, Rue du Dragon, in the city of Paris, in the empire of France, Civil Engineer, for the invention of "An apparatus protracting indefinitely the working of any mechanism set in motion by springs, more generally applicable to clock-making."

3006. And to LOUIS A. NORMANDY, of 67, Judd Street, London, for the invention of "A new system of shaft tugs."—A communication.

On their several petitions, recorded in the Office of the Commissioners on the 31st day of December, 1858.

Invention protected for Six Months by the Deposit of a Complete Specification.

NOTICE is hereby given that the petition of

78. THOMAS HARRIS TOMS, of Staining Lane, in the city of London, praying for Letters Patent for the invention of "The employment of certain materials for the production of raised ornamental figures or devices upon textile fabrics," was deposited and recorded in the Office of the Commissioners on the 10th day of January, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

14th *January,* 1859.

1580. WILLIAM WOODCOCK, of No. 36, Great George Street, Westminster, in the county of Middlesex, Engineer, for an invention of "Certain improvements in apparatus for warming air."—Dated 14th July, 1858.

1584. JAMES JONES, of the City Water Works, Oxford, Engineer, for an invention of "Improvements in meters for measuring liquids."—Dated 14th July, 1858.

1605. CHARLES DE BERGUE, of No. 9, Dowgate Hill, in the city of London, and of Strangeways Iron Works, Manchester, in the county of Lancashire, Engineer, for an invention of "Improvements in electric telegraph cables for submarine purposes, and in the machinery for manufacturing such cables, and also in the machinery to be used in paying such cables out of ships at sea."—Dated 16th July, 1858.

1612. THOMAS HART, of Glasgow, in the county of Lanark, North Britain, Plumber, for an invention of "Improvements in taps or valves, and in apparatus for regulating the flow of fluids."—Dated 17th July, 1858.

1613. JAMES SPENCE, of Liverpool, in the county of Lancashire, Iron Merchant, for an invention of "An improvement in the manufacture of tin plates and terne or leaded plates."—Dated 17th July, 1858.

1615. WILLIAM WILDES, of Maidstone, in the county of Kent, Paper Maker, for an invention of "An improved arrangement or arrangements of machinery for reducing vegetable matter to pulp."—Dated 17th July, 1858.

1626. WILLIAM TASKER the younger, of the firm of William Tasker and Sons, of Waterloo Iron Works, near Andover, in the county of Hants, Engineers for an invention of "Improvements in combined thrashing machines."—Dated 19th July, 1858.

1629. CHARLES LAMBERT, of Sunk Island, in the East Riding of the county of York, Farmer, for an invention of "Improvements in collars for horses and other draught animals."—Dated 19th July, 1858.

1654. CHARLES GAMMON, of No. 9, Cloak Lane, in the city of London, Solicitor, for an invention of "Improvements in the fastening of envelopes and letters."—Dated 22nd July, 1858.

1656. JEAN BAPTISTE PIERRE ALFRED THIERRY, junior, of Paris, in the empire of France, for an invention of "Improvements in furnaces."—Dated 22nd July, 1858.

1762. JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in inkstands."—A communication from a Foreigner residing abroad—Dated 3rd August, 1858.

1814. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "An improved method of arranging and applying magnets to counteract or compensate for the effects of local attraction on the mariner's compass."—Dated 9th August, 1858.

2162. Edmund Leopold Benzon, of Sheffield, in the county of York, Steel Manufacturer, for an invention of "Improvements in the manufacture of steel."—A communication from the inventor, Franz Anton Lohage, residing at Unna, in the kingdom of Prussia.—Dated 27th September, 1858.

2190. Thomas Preston, of Nottingham, Manufacturer, for an invention of "Improvements in the manufacture of looped fabrics."—Dated 1st October, 1858.

2214. John Milnes, of Sutton Mill, Cross Hills, near Leeds, in the county of York, Overlooker, for an invention of "Improvements in weaving fabrics where cross weaving is employed."—Dated 5th October, 1858

2352. Edwin Bartholomew Horn, of the state of Massachusetts, of the United States of America, for an invention of "An improved compensation apparatus for a hair-spring balance for a watch or time piece."—Dated 21st October, 1858.

2415. Peter Wright, of Dudley, in the county of Worcester, Manufacturer, for an invention of "Improvements in the manufacture of anvils."—Dated 29th October, 1858.

2486. Baron Dickinson Webster, of Penns, in the county of Warwick, and James Horsfall, of Birmingham, in the county of Warwick, Manufacturers and Copartners, for an invention of "An improvement in the manufacture of steel wire."—Dated 6th November, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(11*th January*, 1859.)

84. Thomas Charles Clarkson, of 216, High Street, Wapping, in the county of Middlesex, for an invention of "A combination of certain materials for forming and making improvements in ship and other pumps' tubes, and which is also applicable for ship, carriage, and other building purposes, and parts thereof."—Dated 11th January, 1856.

92. Harry Emanuel, of Hanover Square, in the county of Middlesex, Silversmith, for an invention of "Improvements in the manufacture of spoons, forks, and other similar articles in metal."—A communication.—Dated 12th January, 1856.

93. William Owen, of Rotherham, in the county of York, Iron Master, for an invention of "Improvements in the manufacture of railway wheels and tires."—Dated 12th January, 1856.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions, &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson. (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated* 8*th April*, 1626, *and* 23*rd July*, 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated* 22*nd February*, 1620, *and* 2*nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated* 24*th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset, Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent, No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will, III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated* 7*th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent, No.* 602, *dated* 16*th March* 1744.) Price 1*s.*

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).
Macclesfield (*Useful Knowledge Society*).
Manchester (*Chetham Hospital*).
———— (*Camp Field*).
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*).
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners' Room, Smith Street*).

Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Official.

Admiralty, Steam Department.
———— Surveyor of Navy.
———— Deptford Dockyard.
———— Woolwich ditto.
———— Sheerness ditto.
———— Devonport ditto.
———— Portsmouth ditto.
———— Chatham ditto.
———— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec; Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin.
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of *2l.* *3s.* *11½d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of *9l.* *18s.* *6½d.*

The Indexes, separately, price *3s.*

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, as translated or transcribed from Official Communications, may be found in the following Numbers of this Journal, published at *2d.* each, or *3d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240 and 348.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 527 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price *21s.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

DRAIN TILES AND PIPES. Price *6d.*
MANUFACTURE OF IRON AND STEEL, Parts I. and II, price *6d.* each; Part III. (completing the series), price *4s.*
MANURE. Price *6d.*
SEWING AND EMBROIDERING. Price *6d.*
MARINE PROPULSION, Parts I. and II., price *1s.* each; Part III. (completing the series), *2s.*
PRESERVATION OF FOOD. Price *6d.*
AIDS TO LOCOMOTION. Price *1s.*
STEAM CULTURE. Price *2s.*
WATCHES, CLOCKS, AND OTHER TIMEKEEPERS. Price *1s. 6d.*

The following are in the press:—

PRINTING CALICOES AND OTHER WOVEN FABRICS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
COMBUSTION OF FUEL.
FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ.
INDIA RUBBER AND GUTTA PERCHA: FIRE AIR, AND WATER PROOFING.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE, Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 526. TUESDAY, JANUARY 18, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given that

2032. WILLIAM PARSONS, of Pratt Street, Lambeth, Manufacturing Engineer, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in apparatus to be applied to steam boilers, in order to keep the surfaces of the tubular flues free from incrustation."

2034. And WILLIAM PARSONS, of Pratt Street, Lambeth, Manufacturing Engineer, has given the like notice in respect of the invention of "Improvements in safety valves of steam boilers."

As set forth in his respective petitions, both recorded in the said office on the 8th day of September, 1858.

2040. And WILLIAM PRISLEY, residing at No. 7, Townley Place, Brandon Street, Walworth, in the parish of Newington, in the county of Surrey, has given the like notice in respect of the invention of "Advertizing by day or night."

2041. And JOHN ROWLEY, of Grosvenor Terrace, Camberwell, in the county of Surrey, has given the like notice in respect of the invention of "A new compound material applicable as a substitute for leather and leather-cloth, in the manufacture of various useful and ornamental articles."

2043. And CONSTANTINE NICOLAUS KOTTULA, of Liverpool, in the county of Lancaster, Soap Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture of grease for lubricating purposes."

2045. And THOMAS TIMMS, of 1, Skelton Street, Greenwich, in the county of Kent, Coachman, has given the like notice in respect of the invention of "Improvements in bits."

As set forth in their respective petitions, all recorded in the said office on the 9th day of September, 1858.

2058. And DAVID CHEETHAM, of Rochdale, in the county of Lancaster, Machinist, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for preparing for spinning and spinning cotton, wool, and other fibrous materials."

2059. And WILLIAM TOSHACH, of the Railway Works, Bristol Road, Gloucester, in the county of Gloucester, Engineer, has given the like notice in respect of the invention of "Improvements in pile driving machines."

As set forth in their respective petitions, both recorded in the said office on the 10th day of September, 1858.

2065. And HENRY PAGE, of Whitechapel, in the county of Middlesex, Glass Merchant, has given the like notice in respect of the invention of "An improved crown or round glass, and apparatus for manufacturing the same."

2066. And JOSEPH LESTER HINKS, of Birmingham, in the county of Warwick, Manufacturer, has given the like notice in respect of the invention of "A new or improved tap or cock for drawing off and filtering liquids."

2069. And LEONARD KABERRY, of Rochdale, in the county of Lancaster, Manager, and THOMAS MITCHELL, of the same place, Manager, have given the like notice in respect of the invention of "Improvements in machinery or apparatus for preparing for spinning and spinning cotton, wool, and other fibrous materials."

As set forth in their respective petitions, all recorded in the said office on the 11th day of September, 1858.

2074. And CHARLES WILLIAM SIEMENS, of John Street, Adelphi, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in refrigerators, and in the treatment of the freezing or cooling material or materials used therewith."

2075. And SAMPSON HANBURY, of the Birmingham Patent Iron and Brass Tube Company, of Smethwick, in the county of Stafford, Manufac-

turer, has given the like notice in respect of the invention of "An improvement in the manufacture of tubes of copper, brass, and other metals."
As set forth in their respective petitions, both recorded in the said office on the 13th day of September, 1858.

2082. And Jozé Luis, Patent Agent, of No. 1 B, Welbeck Street, Cavendish Square, in the county of Middlesex, has given the like notice in respect of the invention of "Coke and gas kilns."—A communication.

2086. And Robert Lakin, of Ardwick, in the county of Lancaster, Machinist, and John Wain, of the city of Manchester, in the said county, Mechanic, have given the like notice in respect of the invention of "Improvements in spinning mules and other machines of that class used for spinning cotton and other fibrous substances."
As set forth in their respective petitions, both recorded in the said office on the 14th day of September, 1858.

2093. And William Garnett Taylor, of Ashby-de-la-Zouch, in the county of Leicester, Gentleman, has given the like notice in respect of the invention of "Improvements in the manufacture of gloves."
As set forth in his petition, recorded in the said office on the 15th day of September, 1858.

2099. And Charles Fréderic Vasserot, of 45, Essex Street, Strand, London, Patent Agent, has given the like notice in respect of the invention of "Machinery or apparatus for dressing and finishing fabrics."—A communication from Pierre Labérie, residing at Mazamet (Tarn), in the empire of France.
As set forth in his petition, recorded in the said office on the 17th day of September, 1858.

2107. And John Gay Newton Alleyne, of Butterley Iron Works, Alfreton, in the county of Derby, has given the like notice in respect of the invention of "Improvements in the manufacture of wrought-iron beams and girders."
As set forth in his petition, recorded in the said office on the 18th day of September, 1858.

2122. And Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "An improved machine for sweeping carpets and floors."—A communication.

2123. And John Dewrance, of Bargeyard, in the city of London, Engineer, has given the like notice in respect of the invention of "An improvement in the construction of piano forte frames."
As set forth in their respective petitions, both recorded in the said office on the 21st day of September, 1858.

2151. And George Leonard Turney, of Aldermanbury, in the city of London, Needle Manufacturer, has given the like notice in respect of the invention of "An improved mode of packing pins for sale."
As set forth in his petition, recorded in the said office on the 24th day of September, 1858.

2154. And Marc Antoine Francois Mennons, of the British and Foreign Patent Offices, No. 39, Rue de l'Echiquier, Paris, in the empire of France, has given the like notice in respect of the invention of "The separation of iron and steel from their combination with certain foreign bodies."—A communication from a Foreigner residing at Charleroi, in Belgium.

2157. And William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in purifying natural phosphates of lime."—A communication from Emile Constant Martin, residing at Paris, in the empire of France, formerly Banker.
As set forth in their respective petitions, both recorded in the said office on the 25th day of September, 1858.

2258. And John Saxby, Engineer, of Brighton, Sussex, has given the like notice in respect of the invention of "Improvements in apparatus for working signals on railways."
As set forth in his petition, recorded in the said office on the 11th day of October, 1858.

2519. And John Buchanan, of Greenock, in the county of Renfrew, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in propelling vessels, ships, and boats."
As set forth in his petition, recorded in the said office on the 10th day of November, 1858.

2537. And John Buchanan, of Greenock, in the county of Renfrew, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in propelling vessels, ships, and boats."
As set forth in his petition, recorded in the said office on the 11th day of November, 1858.

2819. And Robert Lloyd Burrowes, of St. Helen's, in the county of Lancaster, Professor of Music, and John Knowles, junior, of the same place, Mine Surveyor, have given the like notice in respect of the invention of "Certain improvements in the construction of pianofortes and organs."
As set forth in their petition, recorded in the said office on the 9th day of December, 1858.

2885. And John William Edge, of Manchester, in the county of Lancaster, Gun Maker, has given the like notice in respect of the invention of "A certain improvement in balls, bullets, or other projectiles to be employed in fire-arms or ordnance."
As set forth in his petition, recorded in the said office on the 16th day of December, 1858.

2896. And James Kerr, of 17, Bedford Terrace, Trinity Square, Southwark, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "Improvements in the construction of revolving fire arms."
As set forth in his petition, recorded in the said office on the 17th day of December, 1858.

2930. And Alexander Prince, of the Office for Patents, 4, Trafalgar Square, Charing Cross, in the county of Middlesex, has given the like notice

in respect of the invention of "Improvements in ornamenting and illuminating surfaces of glass."
As set forth in his petition, recorded in the said office on the 22nd day of December, 1858.

2936. And JOHN WHITLAW, of Dunfermline, in the county of Fyfe, North Britain, Ironfounder, has given the like notice in respect of the invention of "Improvements in sewerage and drainage apparatus."
As set forth in his petition, recorded in the said office on the 23rd day of December, 1858.

2942. And JOHN WRIGHT CHILD, of Halifax, in the county of York, Engineer, has given the like notice in respect of the invention of "Improvements in dyeing wool and other fibres."

2944. And EDWARD FELLOWS, of Canterbury, in the county of Kent, Clerk, has given the like notice in respect of the invention of "An improved vent peg."

2948. And ALFRED SMITH, of Humbleton Hall, in the county of York, Agriculturist, has given the like notice in respect of the invention of "Improvements in gigs, dog carts, and other vehicles."

2850. And JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in the permanent way of railways."—A communication from Christian E. Detmold, resident at the city of New York, United States of America.
As set forth in their respective petitions, all recorded in the said office on the 24th day of December, 1858.

2955. And THOMAS STEVEN, Ironfounder, and THOMAS SCOTT, Engineer, both of Glasgow, in the county of Lanark, North Britain, have given the like notice in respect of the invention of "Improvements in heating apparatus for culinary and warming purposes, and in part applicable to steam-boiler and other furnaces."
As set forth in their petition, recorded in the said office on the 27th day of December, 1858.

2969. And JAMES LECK, of Glasgow, in the county of Lanark, North Britain, Bleacher, has given the like notice in respect of the invention of "Improvements in drying textile fabrics and materials."
As set forth in his petition, recorded in the said office on the 28th day of December, 1858.

2997. And JOHN WALLACE DUNCAN, of Grove End Road, St. John's Wood, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in or connected with appliances for transmitting or conducting signals or actions by electricity or magnetism, and in the method of testing insulating materials, combinations, or structures for conducting electricity, and in treating malconstructed or invalid electric telegraph cables, and in utilizing parts of certain cables, or the application otherwise of such structures, and in certain insulating compounds, and in the apparatus and machinery used in connection therewith."
As set forth in his petition, recorded in the said office on the 30th day of December, 1858.

2998. And JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in the permanent way of railways."—A communication.
As set forth in his petition, recorded in the said office on the 31st day of December, 1858.

26. And MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, has given the like notice in respect of the invention of "Certain improvements in steam generators."—A communication.
As set forth in his petition, recorded in the said office on the 3rd day of January, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

18th January, 1859.

1628. WILLIAM HERAPATH, of the city of Bristol, Analytical Chemist, for an invention of "An improvement in the manufacture and treatment of paper with the view to the prevention of forgery."—Dated 19th July, 1858.

1630. SOLOMON MAW, of Aldersgate Street, in the city of London, Surgical Instrument Maker, for an invention of "An improved feeder for administering food."—Dated 19th July, 1858.

1636. REUBEN CLARKE, of Cwmbrân near Newport, (Mechanic), in the county of Monmouth, for an invention of "Improvements in windows, window blinds and shutters."—Dated 20th July, 1858.

1640. WILLIAM NEWZAM NICHOLSON, of Newark-on-Trent, Agricultural Implement Maker, for an invention of "Improvements in crushing mills."—Dated 20th July, 1858.

1644. JOHN WILLIAM WILSON, of Barnsley, in the county of York, Timber Merchant and Bobbin Manufacturer, for an invention of "Certain improvements in machinery or apparatus for turning and cutting wood and other substances."—Dated 21st July, 1858.

1646. Thomas Piatti, of Paris, France, Gentleman, for an invention of "An improved propeller." —Dated 21st July, 1858.

1652. Benjamin Blake, of Eccleston, near Prescot, in the county of Lancaster, Earthenware Manufacturer, for an invention of "An improved kiln for burning earthenware and other similar articles."—Dated 22nd July, 1858.

1653. Henry Green, of Liverpool, in the county of Lancaster, Ironmonger, for an invention of "A new or improved hinge for hanging and closing doors, gates, or windows."—Dated 22nd July, 1858.

1657. Archibald Brown Tripler, of No. 1, Michael's Grove, Brompton, for an invention of "Improvements in obtaining products from a species of asphaltum at present found in the island of Cuba, and called Chapafote."—Dated 22nd July, 1858.

1668. William Merry, of No. 9, Park Place Villas, Paddington, London, for an invention of "Improvements in apparatus for preventing the escape of foul air from area, kitchen, and scullery drains of dwelling houses, also from street, stable, and slaughterhouse drains."—Dated 24th July, 1858.

1679. James Taylor and John Nimmo, both of Glasgow, in the county of Lanark, North Britain, for an invention of "Improvements in healds, and in machinery or apparatus for making healds."—Dated 26th July, 1858.

1685. John Hope, of the state of Rhode Island, of the United States of America, for an invention of "A new and useful mechanism or apparatus for supporting and adjusting a graver of a machine for engraving the surface of a calico printer's roller, preparatory to the same being etched."—Dated 26th July, 1858.

1752. Hugh Greaves, of Westminster, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in constructing streets, roads, and ways, thereby facilitating traffic, and providing for the more convenient conveyance of sewage, drainage, gas and water supplies, and telegraphic wires along the same." — Dated 2nd August, 1858.

1759. James Steel, of Glasgow, in the county of Lanark, North Britain, Brewer, for an invention of "Improvements in brewing and distilling."—Dated 3rd August, 1858.

2025. Gustave Larsonnier, of Paris (France), Manufacturer, and Auguste Blanche, of Paris (France), Civil Engineer, for an invention of "Improvements in block-printing by hand on tissues, paper, or other suitable fabrics."—Dated 7th September, 1858.

2554. Christopher James Thomas, Thomas Thomas, Herbert Thomas, and Charles Thomas, all of the city of Bristol, Soap Manufacturers and Copartners, for an invention of "An improvement in the manufacture of caustic alkaline lees."—Dated 13th November, 1858.

2625. William Marshall, of Leith Walk, in the county of Mid-Lothian, North Britain, Engineer, for an invention of "Improvements in steam engines."—Dated 19th November, 1858.

2628. James Easton the elder and Charles Edwards Amos, both of the Grove, in the Borough of Southwark, Engineers, for an invention of "Improved apparatus applicable to drains, sewers, and watercourses for the purpose of removing extraneous solid matters therefrom."—Dated 19th November, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 15th January, 1859, inclusive.*)

13th January.

106. William Owen, of Rotherham, in the county of York, Iron Master, for an invention of "Improvements in stoves and fire-places."—Dated 14th January, 1856.

115. Vincent Scully, Esquire, and Bennett Johns Heywood, Gentleman, both of the city of Dublin, for an invention of "Improvements in the construction of inkstands; applicable in part to other vessels for the reception of fluids."—Dated 16th January, 1856.

120. John Fowler, junior, of Bristol, for an invention of "Improvements in machinery for ploughing land."—Dated 16th January, 1856.

14th January.

110. Thomas Hill Bakewell, of Welford Road, Leicester, Clerk, for an invention of "Improvements in ventilating, warming, and cooling rooms and other places."—Dated 15th January, 1856.

15th January.

114. William Prangley, of Salisbury, in the county of Wilts, Professor of Music, for an invention of "A novel instrument for exercising the third finger and thereby facilitating the playing upon musical instruments."—Dated 16th January, 1856.

122. Henry R. Worthington, of the city of New York, United States of America, for an invention of "A machine for measuring the flow of liquids, called a fluid metre." — Dated 16th January, 1856.

Erratum in Journal of 7th January.

2917. For "drawing air" read "drawing hair."

FOREIGN PATENTS.

PRUSSIA.*

List of Patents for Invention Delivered between the 1st and 31st December, 1858.

(*Communicated by the Minister of Commerce and Public Works.*)

1. Carl Eduard Bornardel, of Berlin, for "Means of stretching and holing cards for jacquard machines."—5 years.—Dated 1st December, 1858.
2. J. H. F. Prillwitz, of Berlin, for an imported invention of "An apparatus in presses, used in manufacturing leaden pipes, for tinning the latter."—5 years.—Dated 1st December, 1858.
3. Schwartzkopf, of Berlin, for "A machine for boring stones."—5 years.—Dated 16th December, 1858.
4. Weidtmann, of Dortmund, for "A mechanical apparatus for manufacturing oil-cement and other plastic substances."—5 years.—Dated 16th December, 1858.
6. J. H. F. Prillwitz, of Berlin, for an imported invention of "An apparatus for cooling the oil employed in tempering steel."—5 years.—Dated 23rd December, 1858.
7. Schaeffer and Walcker, of Berlin, for "A process for boring holes into cast-iron water pipes without interrupting the hydrostatic pressure."—5 years.—Dated 23rd December, 1858.

SAXONY.†

List of Patents for Inventions granted between the 1st October and 31st December, 1858.‡

(*Communicated by the Saxon Government.*)

(For preceding List, the No. of this Journal.)

1. Gerhard Uhlhorn, of Grevenbroich, near Cologne, for "A machine for grinding triangular or round wire points of cards."—5 years.—Dated 5th October, 1858.
2. Herrmann Böhme, of Dresden, Agent for Ossowski, of Varsovia, for "A portable vapour-bath apparatus."—5 years.—Dated 6th October, 1858.
3. Friedrich Krüger, of Sudenburg, for "Means of removing the lime from refined beetroot juice."—5 years.—Dated 9th October, 1858.
4. Eduard Florens Fleck, of Dresden, Agent for James Broadley, of Bradford, for "Improvements in power looms."—5 years.—Dated 13th October, 1858.
5. C. F. O. Winckler, of Chemnitz, for "Improvements in the arrangement of the lower ribbons or braid of spinning machines."—5 years.—Dated 14th October, 1858.
6. Louis Metzner, of Mülsen St. Niclas, for "Improvements in the manufacture of crinoline petticoats."—5 years.—Dated 14th October, 1858.
7. J. H. F. Prillwitz, of Berlin, for "Applying glass to pianinos and pianos, for the purpose of improving their tone."—5 years.—Dated 15th October, 1858.
8. Herrmann Böhme, of Dresden, Agent of Jean Gustave Larsonnier and Hyacinthe Auguste Blanche, of Paris, for "Improvements in hand printing by means of models."—5 years.—Dated 19th October, 1858.
9. Wilhelm Werner, of Dresden, for "A regulator for the manufacture of paper pulp."—5 years.—Dated 21st October, 1858.
10. Albrecht Heller and Dr. Otho Graf, of Dresden, for "Using the slags of silverworks for the manufacture of emery."—5 years.—Dated 25th October, 1858.
11. August Ferdinand Sicker and August Herrmann Schön, of Grossenheim, for "An apparatus for moving battens in looms."—5 years.—Dated 26th October, 1858.
12. F. C. Zimmermann and Ferdinand Voigt, of Dresden, for "An apparatus for condensing salts and sulphuric and nitric acids."—5 years.—Dated 27th October, 1858.
13. Herrmann Reichenbach, of Limbach, near Chemnitz, for "A machine for sewing stockings."—5 years.—Dated 27th October, 1858.
14. Zimmermann and Co., of Netzschkau, for "Improvements in sizing machines."—5 years.—Dated 27th October, 1858.
15. Friedr. Herrmann Ulbricht, of Chemnitz, and Friedrich Herrmann Voigt, of Lössnitz, for "A warping and sizing machine."—5 years.—Dated 30th October, 1858.
16. Christian Friedrich Leinbrock, of Bärenstein, for "A machine for pointing wooden pegs, and a process for polishing said pegs in a tun."—5 years.—Dated 1st November, 1858.

* For the Prussian Patent Law, see Nos. 313 and 329 of this Journal.
† For the Saxon Patent Law, see No. 236 of this Journal.
‡ All the published Specifications are deposited in the free Library of the Commissioners of Patents, where translations of the same may be had.

17. David Friedrich Unger, of Chemnitz, for "Improvements in his machine for working treadles."—5 years.—Dated 2nd November, 1858.

18. Siemens and Halske, of Berlin, for "A furnace for the manufacture of gas and sulphur, combined with a regenerating apparatus for the preparatory heating of the air and gas."—5 years. —Dated 6th November, 1858.

19. Carl Bruun von Niergarde, of Jarsdorf, Holstein, for "A machine for gathering in potatoes." — 5 years. — Dated 12th November, 1858.

20. Georg Koll, of Laineck, for "A break for boring by means of cables."—5 years.—Dated 23rd November, 1858.

21. Bernhard Herrmann Wilhelm Böcker, of Riese, and Henrich Eberhard Robert Thümmel, of Leipzig, for "An expeditious mode of working railway breaks."—5 years. — Dated 30th November, 1858.

22. C. W. Naumann, of Leipzig, for "A new construction of sewing machines."—5 years.—Dated 1st December, 1858.

23. August Rudolph Vogler, of Zethen, near Freiberg, for "An optical apparatus for hitting the mark in shooting at night."—5 years—Dated 3rd December, 1858.

24. Fried. Georg Wieck, of Leipzig, Agent of John and Ezra Harthan, Chester, for "An atmospheric and steam motive wheel for working machines."—5 years.—Dated 13th December, 1858.

25. Heinrich Lauten, of Hörde, Westphalia, for "A new kind of oil cans and lubricating cans." —5 years.—Dated 13th December, 1858.

26. Dr. Heinrich Meissner, of Leipzig, for Thomas Leigh, Manchester, for "An apparatus in sizing machines."—5 years.—Dated 15th December, 1858.

27. Siry, Lizars, and Co., of Leipzig, for "A new system of gas meters."—5 years.— Dated 18th December, 1858.

28. Clemens Eduard Sonneborn, of Berlin, for "A process for manufacturing cement."—5 years. —Dated 27th December, 1858.

29. Carl Heinrich Zimmermann and Carl Heinrich Werner, of Glauchau, for "The manufacture of figured chenille and apparatus belonging thereto."—5 years. — Dated 30th December, 1858.

30. Franz Louis Schwalbe, of Chemnitz, for "An improved mash machine."—5 years.—Dated 30th December, 1858.

UNITED STATES OF AMERICA.

(*Communicated by the Commissioner of Patents.*)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 28th December, 1858, and each bearing that date.

No. 22,404. Frederick Ahl, of West Meriden, Conn., for an "Improved boot jack."

"I am aware that boot jacks have been made where an inflexible portion pressed on the upper surface of the foot of the boot, I therefore do not claim that, as such, as my invention, but what I claim as my invention, and desire to secure by Letters Patent, is, the within-described arrangement of the platform (A), vibrating arm (F), and cross bar (H), when the whole is constructed, arranged, and made to produce the result, substantially as herein described."

No. 22,405. James G. Arnold, of Worcester, Mass., for a "Letter envelope."

"It is evident that some variations from the above will be necessary in making the different sizes and styles of envelops, but they being governed by the above principles of construction, and producing the same results, will suggest themselves in each case; therefore I do not wish to be understood as limiting myself to the precise forms or proportions of parts shown, as I do not claim these; but what I claim as a new article of manufacture, is, making letter envelops by cutting, folding, and pasting the paper substantially in the manner and for the purposes above set forth and described. I also claim folding narrow folds at the ends or sides, so as to come inside between the face and back, in the manner and for the purposes substantially as above set forth and described."

No. 22,406. Luther Atwood, of Brooklyn, N. Y., for an "Improvement in manufacture of pyrogenic oils."

"What I claim as my invention, and desire to secure by Letters Patent of the United States, is, forming oleaginous vapors from substances yielding pyrogenic oils by the action of the heat of a properly regulated current of products of combustion passing over and above the surface of the mass operated on with or without the aid of external heat, substantially as herein-before described, and for the purposes herein-before set forth."

No. 22,407. Luther Atwood, of Brooklyn, N. Y., for an "Improvement in apparatus for destructive distillation."

"What I claim as my invention, and desire to secure by Letters Patent of the United States, is, viz., the combination and arrangement of a 'distilling tower,' and receiving vessel, substantially as herein-before described, with a steam blast or its equivalent in the combination for the purpose of producing an induced current, substantially in the manner and for the purposes herein described and set forth."

No. 22,408. Luther Atwood, of Brooklyn, N. Y., for an "Improvement in apparatus for destructive distillation of wood, &c."

"What I claim as my invention, and desire to secure by Letters Patent of the United States, is, first, the use of the inner case V, in the manner and for the purposes substantially as herein-before set forth. Second, the within-described arrangement of the flues N, leading from the annular passage E, into the distilling tower A, substantially and for the purposes herein-before set forth. Third, the combination with the distilling tower of the combustion

chamber or fire place A^1, when so arranged as to supply products of combustion by a downward draught through the fire place, substantially as herein-before described."

No. 22,409. William W. Batchelder, of New York, N.Y., for an "Improvement in lamps."

"Having thus fully described my invention, what I claim and desire to secure by Letters Patent of the United States, is, the small tapers or wick tubes D, placed on both sides of the flat burner or wick tube C, in combination with the cap A, when the said tubes and cap are used without a chimney, substantially as set forth for the purposes described."

No. 22,410. William A. Bradley and Jacob Bigelow, of Washington, D. C., for an "Improvement in manufacture of artificial fuel."

"What we claim as our invention, and desire to secure by Letters Patent, is, the manufacture of artificial fuel made from refuse bituminous coal, anthracite, or charcoal, as set forth, combined with the substances herein described, the whole made in the manner and for the purposes set forth."

No. 22,411. Job Brown, of Lawn Ridge, Ill., for an "Improvement in grain measure."

"I am aware that tallying machines have been previously used and arranged in various ways, and I therefore do not claim broadly such device irrespective of the particular arrangement of parts herein shown and described; but I claim as new, and desire to secure by Letters Patent, as an improved article of manufacture, a grain tally having a slide H, operated by a pendant g, and spring I, a lever F, pall E, ratchet wheel D, and indicating bolt C, the whole combined and arranged as herein shown and described."

No. 22,412. John W. Cochran, of New York, N. Y., for an "Improvement in revolving fire-arms."

"Having thus fully set out the construction and operation of my invention, what I claim as new, and desire to secure by Letters Patent, is, 1, the hinged or jointed thumb piece of the hammer or cock, constructed and arranged, and having the functions substantially as herein set forth. 2, I claim the worm wheels upon the cylinder shaft and the tumbler shaft or hammer shaft, combined and operated as and for the purposes described. 3, I claim the means substantially as herein set forth for allowing the cylinder to be rotated within its frame, independent of the shaft of the hammer or tumbler, and also allowing of the detaching of the cylinder and its shaft from the frame and from the means of rotation."

No. 22,413. Wright L. Coffinberry, of Grand Rapids, Mich., for an "Improved compensating pendulum for clocks."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of two metals of different expansibility in the manner and for the purposes set forth in the foregoing specifications."

No. 22,414. S. R. Cotton, of Green Bay, Wis.' for a "Printing press."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, operating the form bed J, from the pressure cylinder B, by means of the cam or eccentric m, provided with the pin o, rack bar D, provided with the projection p, and roller n, the pinions E, G, on the shaft F, with or without the pinion H, slide bar L, and spring S, and the rack bar I, the whole being arranged to operate as and for the purpose set forth. I also claim the toothed sector x^1, which gears into the pinion y of roller a^1, and is connected with the rack bar D, by means of the slotted arm t, on the rack bar and the arm w, of the sector, provided with the pin o, the rod c^1, attached to the arm d^1, the pall i^1, attached to the arm d^1, and the ratchet h^1, attached to the roller g^1, the whole being arranged as herein-after fully shown and described, so that the inking device will be operated automatically from the pressure roller. I further claim having the bearings b, b, of the pressure cylinder attached to rods d, d, which are connected by tension nuts e, e, to straps f, that encompass the eccentrics g, of the shaft h, for the purpose of readily raising when necessary the cylinder B, and regulating its pressure."

No. 22,415. Francis M. Eagle, of North Manchester, Ind., for an "Improvement in stump extractors."

"I do not claim any construction in which the movement of the stump is the same as that of the power; but what I do claim is, overcoming the resistance by the movement of a roller invariably connected with the stump substantially as described upon a track either rectilinear or curved, all parts of which, except the starting part of the roller, are exterior to a circle with the invariable connection for a radius, and the point of attachment of the hook for a center, the operation being substantially as described."

No. 22,416. Nelson Edwards, of Chittenden County, Vt., for an "Improvement in stoves."

"What I claim as new and useful in my invention, is the application to a stove of an improved combined hydro-atmospheric jet, and gas chamber. I also claim the stove-contained coiled smoke-pipe in its combination with the plurality of stove walls substantially as described."

No. 22,417. H. E. Fessel, of Chicago, Ill., for an "Improved steering propeller."

"I do not claim the invention of applying a screw propeller in such a manner that its position can be changed to make it operate as a rudder; but what I claim as my invention, and desire to secure by Letters Patent, is, the arrangement and combination of the slotted frame A, propeller F, driving shaft C, and chain wheel i, substantially as and for the purpose herein shown and described."

No. 22,418. Joseph Fowler and F. M. Bacon, of Ripon, Wis., for an "Improvement in seeding machines."

"We do not claim the board J, nor the roller G, for they have been previously used, and may be seen in our patented machine previously alluded to; but having thus described our invention, what we claim as new, and desire to secure by Letters Patent, is, the reciprocating perforated slide E, stationary perforated slide H, and perforated roller G, in connection with the inclined board J, the whole being arranged to operate as and for the purpose set forth."

No. 22,419. Patrick Gallagher, of Pleasant Unity, Pa., for an "Improved spring bottom for chairs and other seats.

"Having thus fully described the nature and object of my invention, what I claim as new, and desire to secure by Letters Patent, is, making the bottoms of chairs or other seats, of spring-plate metal, so that when laid loosely upon the frame, said plates shall be both a bottom and a spring, substantially as herein set forth."

No. 22,420. A. F. Gibbony, of Union Township, county of Mifflin, Pa., for an "Improvement in shuttle boxes for looms."

"Claim:—What I claim as my invention, and desire to secure by Letters Patent, is, the half swell D, on the inner end of the fly A, to be operated on by the picker F, as set forth."

No. 22,421. Porter A. Gladwin, of Pawtucket, Mass., for an "Improved sash fastener."

"What I claim, therefore, and desire to secure by Letters Patent, is, the employment of the perforated plate D, with the notch spring F, for fastening window sash, in the manner substantially as described."

No. 22,422. James Hamilton, of New York, N.Y., for an "Improved propeller for boats."

"I do not claim a reciprocating propeller frame between the vessel; neither do I claim buckets hinged at their upper edge, nor moveable stops, against which the buckets rest while in action; but what I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of two sets of propeller buckets in a reciprocating frame, so set that they act in opposite directions to give head or stern way respectively, when said buckets are combined with sliding stops fitted and acting as specified, to retain one set of buckets in a folded and inoperative position, while the other set is acting to move the vessel, as set forth."

No. 22,423. Henry Harger, of Delhi, Iowa, for a "Mechanical typographer."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is,—1st, the employment or use of the bed-piece B, frames D and C, and type frame formed of the plates E, E, arranged substantially as and for the purpose set forth. 2nd, the particular means employed, as herein shown and described, for feeding the frame C, and paper or wax to the type, to wit, the bent lever G, connected to the hand lever F, the ratchet H, and cords or chains O, attached to the frame C. 3rd, regulating the feed

movement of the frame C, by having the types *h* made of varying hights or lengths, so as to give corresponding lengths of vibration to the lever F, substantially as described."

No. 22,424. THOMAS R. HARTELL, of Philadelphia, Pa., for an "Improvement in furnaces for burning lime."

"I do not claim broadly a reverberatory furnace, arranged to receive a movable platform or truck, containing the articles or material to be acted upon by the heat of the furnace, as such a device has heretofore been used in the manufacture of glass, but I claim and desire to secure by Letters Patent, as an improvement in reverberatory furnaces for burning lime, providing a recess in the side walls, in which a corresponding projecting edge of the fireproof traveling platform fits, in the manner described, for the purpose of cutting off all communication between the heated upper chamber and the cool lower chamber, at the same time presenting no obstruction to the forward movement of the truck and platform."

No. 22,425. SPENCER HIATT, of Indianapolis, Ind., for an "Improved lock."

"What I claim, and desire to secure by Letters Patent, is, 1st, the combination and arrangement of the tumblers 1, 2, 3, 4, 5, 6, 7, and 8, and key bits 9, 10, 11, 12, 13, 14, 15, and 16, with the lever A, sliding yoke Q, and lever arms V and K, when constructed and arranged substantially as set forth; 2nd, the combination of the comb spring M and slide R with the tumblers 1, 2, 3, 4, 5, 6, 7, and 8, when constructed, arranged, and operated, substantially as and for the puposes set forth."

No. 22,426. JOHN HOLMES, of Boston, Mass., for an "Improvement in ladies' hooped skirts."

"What I claim as my invention, and desire to secure by Letters Patent, is, the net work fabric herein described, having the number or size of its meshes reduced towards the top, in such a manner as to throw the fulness in one direction or on one side, so that when the hoops are inserted it is self-sustaining, to produce the 'bishop' or 'bustle' form, and preserve that form to the bottom of the skirt, as herein set forth, without the use of lacings, springs, extra 'bustles,' or other contrivances."

No. 22,427. JOHN W. HOLLENSBURY, of Alexandria, Vir., for an "Improvement in breech loading cannon."

"Having thus described my invention, what I claim and desire to secure by Letters Patent, is, a breech loading cannon, formed in two parts, and secured together by means of a frame, substantially as described. 2nd, in combination with the two divisions of the cannon, as described, I claim, the frame D, E. F, G, fitting closely up against the breech A and capable of being elevated or depressed, the whole constructed and operated, substantially as and for the purpose set forth. 3rd, in combination with the two divisions of the gun, I also claim the band or circular wedge W, constructed and operated substantially as described."

No. 22,428. EDWIN B. HORN, of Boston, Mass., for an "Improved method of adjusting the tripper to the escapement lever of time keepers."

"I do not claim a compensating scroll or coil D, composed of two metals of variable expansive properties, and applied to a hair spring balance, but I claim the movable plate F, or its equivalent, supported so as to be capable of turning on a pivot, or its equivalent, carried by the stand, the same being for the adjustment of the beat, or the pin or tripper of the escapement lever, as specified."

No. 22,429. THOMAS S. HUDSON, of East Cambridge, Mass., for an "Inkstand."

"I do not claim an inkstand composed of a main ink reservoir, and a cup or ink receiver furnished with a tube, and connected with the main reservoir by a flexible or elastic diaphragm, as such is not new, nor do I claim in combination with the ink reservoir or cup B, and its cover D, mechanism substantially as described, whereby, by the act of elevating the cover off the cup, the latter shall be depressed so as to cause ink to flow from the reservoir upward into it, and by the act of depressing the cover toward the cup the ink will be caused to flow back into the reservoir; but I claim the arrangement of a vent hole *i* within the flexible or elastic diaphragm C, and with respect to the ink receiver B, essentially in manner and to operate as described, and for the purpose herein-before explained."

No. 22,431. SAMUEL HUSE and SAMUEL HUSE, jr., of Chicago, Ill., for an "Improved propelling and steering apparatus."

"Claim.—What we claim as our invention, and desire to secure by Letters Patent as an improvement in propellers when hung within the rudder, and operated by gears E, F, G, as set forth, is, receiving the end thrust of the propeller shaft upon the sleeve I, on the post B, arranged and operating in the manner substantially as described."

No. 22,432. OBED HUSSEY, of Baltimore, Md., for an "Improved spring tackle block."

"I am aware that springs have been interposed between blocks and the fixed or movable eye bolt or body to which they were attached; such an arrangement of a spring without the block is obviously an essentially different thing from any improved block with a spring within it. Of course I do not confine myself to any special form or arrangement of the strap and the block, or of either (as these may be indefinitely varied), so long as the block is constructed with a seat to yield to the force of sudden shocks, and thereby prevent the dangerous jirks which, as before described, it is the object of my invention to prevent. What I claim as new, and desire to secure by Letters Patent, is, a block having a yielding seat, substantially as set forth."

No. 22,433. JOHN K. JENKINS, of Kingston, Pa., for an "Improvement in preserving fruits."

"I am aware that the mode of preserving such articles by encrusting them with a composition impervious to the air, and which will prevent their desiccation and decay, is not new. Robert Warington obtained March 5th, 1846, a Patent in England for the use in this manner of many such compositions; I do not wish, therefore, to claim broadly this mode; but what I do claim as my improvement, and desire to secure by Letters Patent, is, dusting the article to be coated with any dry powder, such as plaster of paris, or its equivalent, to prevent the coating from adhering to the articles coated, and permitting it to come off readily."

No. 22,434. WILLIAM H. LAUBACK, of Philadephia, Pa., for an "Improvement in gas retorts."

"I do not desire to confine myself to the particular form of the retort illustrated, or to the exact shape of the plate D, in as much as both may be considerably modified in shape, without any deterioration of the result; but I claim, and desire to secure by Letters Patent, dividing the retort into an upper and a lower chamber by means of a movable plate D, said plate being so constructed and so arranged in respect to flanches or projections in the retort, and being so weighted that the amount of vapor admitted into the communication between the two chambers shall be proportionate to the rapidity with which it is generated, and that the vapor shall pass from the lower chamber in a stream so attenuated and so exposed to red hot surfaces as to insure its being converted into permanent gas on entering the upper chamber, as herein set forth."

No. 22,435. TRISTRAM S. LEWIS, of Kendall's Mills, Me., for an "Improved clothes horse."

"The arrangement of the four spring catches is such that the spring *k* while operating to press the horse open and to maintain it in an extended state when unfolded, will also operate to maintain all the catches in engagement with their respective slats; therefore, when the posts A, B, are hinged together, and the four folding sets of slats are applied to them and arranged on them, as described, I claim the arrangement of the spring *k* and the two sets of spring catches *f*, *g*, *h*, *i*, in order that the said spring may perform at one and the same time the two functions, as specified."

No. 22,436. W. W. LYMAN, of West Meriden, Conn., for an "Improvement in fruit cans."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, in combination with the groove for receiving and holding the packing and the flange *m* on the cover, fitting into said groove and against the packing, the sleeve C, with its cam slots and the studs on the neck of the can, for drawing the flange of the cover tight down on to the packing without crimping it, substantially in the manner specified."

No. 22,437. HOWARD MANN, of East Attleborough, Mass., for an "Improvement in cultivators."

"1st, I claim the application of each wheel arbor to its wheel, and the frame A, substantially as described, viz., so that the wheel may turn on the arbor and the latter extend into slots, and have fastenings as explained, whereby not only the wheel may be adjustable with reference to the cutters,

but the arbor and its screws and nuts may be employed to strengthen the frame, in manner as set forth. 2nd, I also claim the above described arrangement of each of the slots of the wheel arbor with respect to the scraper of the periphery of the wheel, whereby the wheel at whatever altitude it may be placed, while its arbor is in the slots will be at one uniform or proper scraping distance from the scraper. 3rd, I also claim the application or arrangement of the slide bar of the cutter G, so as to operate not only as a scraper to the wheel, but as a supporter of the cutter post or rod."

No. 22,438. F. M. Marshall, of Sequin, Texas, for an "Improvement in seed planters."

"Claim:—Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement of perforated plates A^1 and B, beam A, guage wheel B, bull tongue plow S, roller F, crank H, arm D, and handles K, K, the whole be constructed for joint operation as set forth and described."

No. 22,439. David Matthew, of Philadelphia, Pa., for an "Improvement in locomotive axle bearings."

"I am well aware that it is common to use a crease in journal bearings, for purposes in connection with lubrication, but they have no such effect nor construction as mine, and I do not wish to be mistaken as using a mere modification of such crease, or as claiming any such arrangement or device; but what I do claim as my invention, and desire to secure by Letters Patent, is, the peculiar construction of journal box or bearing in one piece, having a longitudinal slot or opening, operating as and for the purpose substantially as herein set forth."

No. 22,440. S. W. May, of Galesburg, Ill., for an "Improvement in machines for picking corn."

"I claim the bars L, the elevators E, the fingered belt R, the frame A, the crank with its pitman O, or their mechanical equivalents, the whole being combined, arranged, and operated substantially as and for the purpose set forth."

No. 22,441. Thomas J. Mayall, of Roxbury, Mass., for an "Improved door spring."

"Claim:—What I claim as my invention, and desire to secure by Letters Patent, as a new article of manufacture, is, the within described india-rubber tortion door spring operating as described."

No. 22,442. Charles McIntire, of Newark, New Jersey, for a "Shirt stud."

"What I claim as my improvement, and desire to secure by Letters Patent, is, the latch and catch constructed substantially in the manner and for the purpose herein above set forth."

No. 22,443. Anne S. McLean, of Williamsburgh, N.Y., for an "Improvement in corsets."

"I disclaim looped fabrics of any kind for the purpose of forming the shield or top of the pad next to the outer dress. Neither do I claim the manufacture of eyelet hooks, as they are in common use; but what I claim as novel, and wish to secure by Letters Patent of the United States, is, providing the upper section or pads of the corset with cone-shaped flat steel or their equivalent springs and spring supporting plate next the body, for the purpose of giving elasticity to the pads, which pads are held in their places by the weight of the corset."

No. 22,444. Richard Montgomery, of New York, N. Y., for an "Improvement in iron pavements."

"Having described my improved pavement, what I claim as new in this application, and desire to secure by Letters Patent, is, a metallic pavement, consisting of a series of parallel arched corrugations, reaching or extending from the curbstone on one side of the street to the curbstone on the other side, substantially as shown and described. I also claim casting or making the upper parts of the corrugations thicker than the lower parts, in the manner and for the purpose set forth. I also claim supporting or anchoring the pavement when it is cast in sections by a grooved central support as shown and described. I also claim the dovetailed recesses and projections *k*, in combination with the projection *b*, *c*, for the purpose of holding the pavement in place."

No. 22,445. Henry Morris, of West Philadelphia, Pa., for an "Improvement in device for transmitting rotary motion."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the convolute gear A, and convolute groove *b*, with a sliding pinion or gear C, substantially as and for the purposes herein shown and described."

No. 22,446. John Murphey, of Boston, Mass., for an "Improved blind fastener."

"I do not claim the windowblind or shutter fastener; shown and described in the United States Patent, No. 4,633, but I claim the arrangement of the spring catch on the pintle step shank, and with respect to the notched pintle as described. I also claim combining with the catch and its case a movable projection or cover, applied so as to be capable of being moved on and off the pintle head, and to carry the thumb projection or stud of the catch, substantially in manner and for the purpose as specified."

No. 22,447. Peter H. Niles, of Boston, Mass., for an "Improved lathe for turning masts, &c."

"Claim:—What I claim as my invention, and desire to secure by Letters Patent, as an improvement in machines for turning masts and spars, is, the revolving traversing cutters, in combination with the dogs *s*, or their equivalents, for supporting the stick of timber, operating in the manner described for the purpose set forth. 2nd, I claim raising the dogs automatically as the cutters approach them for the purpose set forth. 3rd, I claim the method of controlling the position of the cutters by means of the combination of the slotted wheels D and L, the gears P, Q and R, and the pattern W, and their connections M, M^1, N, O, T, V, operating in the manner substantially as set forth."

No. 22,448. James Nuttall, of New Orleans, La., for an "Improved construction of iron railing."

"I do not claim broadly dovetail connections, as such is not the scope of my invention; but what I do claim, is, the the combination of bent sheet metal rails, with grooves in the panels receiving the edges of the rail, and giving an internal and external bearing to the rail, substantially as set forth."

No. 22,449. Jacob Pefley, of Bainbridge, Ind., for an "Improved lathe machine."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the combination of the reciprocating knife K, the bolt supports or bars R, and the stationary bar or bed Y, arranged to operate substantially as and for the purpose set forth. I also claim the shaft H, provided with the bent rods *h*, and connected or arranged with the rock shaft V of the bars R, R, through the medium of the levers Q, R, bars S, R^1, and the arm U, substantially as and for the purpose set forth. I further claim, in connection with the knife K, bars R, R, and bed Y, the registering device, operated from the rock shaft V, through the medium of the pall i^1 connected with the lever C^1, rod k^1, and bent lever l^1, so as to be thrown in contact with the ratchet A^1 by the bolt $a\times$, as set forth."

No. 22,450. James Pilgrim, of New Britain, Conn., for an "Improvement in cores for moulding plastic substances."

"It is obvious that my improved core may be made of any desired form and size, and of various materials, without departing from the nature of my invention, though for its formation I have found the india-rubber cloth in practice most desirable. It will also be observed that my improvement is particularly applicable and advantageous in the construction of composition cisterns and other formations where the orifice through which the core has to be extracted is much smaller than the cavity formed, since a core thus constructed may be entirely collapsed and drawn through a very small hole; I do not, therefore, desire to limit myself to any particular form of core or material of the same, or to any exact arrangement of the inflating and exhaust devices; but I claim as my invention, and desire to secure by Letters Patent, constructing cores for molding in plastic clay, cement, or other like substances, of india rubber, or equivalent material, so that they be inflated and collapsed substantially as described."

No. 22,451. Ezra Pollard, of Albany, N. Y., assignor to himself and B. W. Seeley, of New York, N. Y., for "Pestles for cleaning clothes."

"I do not claim a pestle formed of a series of parallel and solid cylindrical projections fitted in a head or stock, for that, or its equivalent, has been previously used; but having thus described my invention, I claim, and desire to secure by Letters Patent, as an improved article of manufacture, a clothes pounder or pestle composed of a stock A, handles C, tubes D, and openings *a*, as herein shown and described."

No. 22,452. James S. Ray, of East Haddam, Conn., for an "Improved burnishing attachment for lathes."

"Having thus described my invention, I claim, and desire to secure by Letters Patent, the arrangement and combination of the plate E, plate F, spring (K), mandrel C, and tool G, as and for the purposes herein shown and described."

No. 22,453. Jesse Reed, of Marshfield, Mass., for an "Improved steering apparatus."

"What I claim as my invention, and desire to secure by Letters Patent, is,—First, the duplex screw shaft E, in combination with the nuts G and guide rods H, the rods being each permanently connected with one of the nuts and passed through the lug d^2 on the other nut, and operating in the manner substantially as specified. Second, I claim, in combination with the above, connecting the nut G to the rudder head by means of the arm I, bulb K, and rod *b*, operating substantially as described."

No. 22,454. Uel J. Reynolds, of Webster, N. Y., for an "Improvement in trace fastenings."

"I do not claim the face plate A or bolt and spiral spring E as new; but what I do claim as my invention, and which I desire to secure by Letters Patent, is,—1st, I claim the formation of the eye *d* which receives the tongue *e*, for the purpose above described and set forth. 2nd, I claim the tongue *e* in combination with the tube *c*, spiral spring and bolt E, which fastens tongue *e* in the eye *d*, as above described."

No. 22,455. John W. Rice, of Springfield, Mass., for an "Improvement in railroad car brakes."

"What I claim as new, and desire to secure by Letters Patent is, 1st, the suspension bar H, crotch bolt I, and nut J, when arranged and operating in the manner and for the purposes substantially as described. 2nd, I claim the continuous rod V and loose pulley K, in combination with the suspension bar H and crotchet bolt I, and nut J, when arranged and operating substantially as and for the purposes set forth. 3rd, I claim the loose collars P, P, on the standard (*q*), when applied in the manner and for the purposes substantially as set forth."

No. 22,456. Oliver Robinson, of Rochester, N. Y., for an "Improved bedstead fastening."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination and arrangement of the hooked locking bolt A, with the circular wrench and eccentric B, constructed as described, for holding the bolt by means of the lip i^1 in the proper position for entering the post and tightening the connection made with the pin *f*, or its equivalent, substantially as and for the purpose herein set forth."

No. 22,457. Henry R. Rowlands, of Boston, Mass., for an "Improved apparatus for walking on the water."

"What I claim as my invention, and desire to secure to my own benefit by Letters Patent, is, the construction and use of the apparatus by the arrangement of the metal floats *o*, *o*, the metal ballast boards *m*, *m*, and the wooden stanchions H, H, in a manner substantially as and for the purpose herein described."

No. 22,458. James Stewart, of New London, Conn., for an "Improved dredging machine."

"I believe I have described and represented my dredging machine so as to enable any person skilled in the art to make and use it; I will now state what I desire to secure by Letters Patent. I claim the arrangement of the three serries of dredging buckets in the same dredging machine, substantially as described and shown, for the purpose of excavating a channel in the earth throughout the entire width of the boat. I claim arranging the windlass barrels which raise the dredging apparatus out of the water on the same shaft that operates the dredging chains, so that they may be locked to the shaft to raise the dredging apparatus without stopping the chains of dredging buckets, substantially as described."

No. 22,459. O. W. Stow, of Southington, Conn., for an "Improved burring machine."

"I do not claim the rollers G, H, nor the manner of adjusting the upper roller H; nor do I claim the gauge I, in itself considered, nor the manner of adjusting the same on the lower roller G by the screw rod J, for these parts are well known, and have all been previously used; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement and combination of the spring K, gauge I, and rollers G, H, substantially as and for the purpose herein shown and described."

No. 22,460. Samuel T. Stratton, of Philadelphia, Pa., for an "Improvement in manufacture of starch."

"Having now described the nature of my invention, and the manner of rendering my process practical, I disclaim the use of cold alkalies or alkaline liquors for steeping the material. What I claim as new in the manufacture, and desire to secure by Letters Patent, is, steeping the material from which the starch is extracted (either whole or crushed) in an alkaline or caustic alkaline liquor of a suitable strength, and artificially beaten to a temperature of from seventy to a hundred and thirty degrees Fahrenheit thermometer, as herein-before specified."

No. 22,461. George W. Swigert, of Monmouth, Ill., for a "Washing machine."

"Having thus described my invention, I claim, and desire to secure by Letters Patent, as an improved article of manufacture, a washing machine provided with a cylinder of brushes C, a concave J, supported on springs (*d*), guard K, attached to rod (*e*), pounders L, tappet drum M, and otherwise constructed as herein shown and described."

No. 22,462. Nathan Thompson, jr., of Brooklyn, N.Y., for an "Improvement in rail road car seats and couches."

"I claim as of my own invention,—First, the combination of longitudinal seats with a raised platform and berths or reclining places beneath the seats and platform, substantially in the manner described. Second, in combination with berths or reclining places beneath a seat, and a raised platform serving as a footstool to such seat. I claim a back to that seat capable of being moved or of change of place, substantially as specified, so that it may serve at will as a back or as a couch above the main seat. Third, I claim making the top of the platform or foot place pertaining to the main tier of seats movable, substantially in the manner and for the purposes specified. Fourth, I claim arranging within a rail road car longitudinal couches along or upon the floor, and other couches or seats above these, with backs which may be converted into couches and passage ways, or a passage way from which free access may be had to all the seats and couches, the arrangement of the whole being substantially such as set forth. Fifth, I claim combining with longitudinal passage ways or a longitudinal passage way longitudinal seats when those seats have backs so constructed, substantially as specified, that they may be converted into couches, or when those seats are free to slide transversely, substantially in the manner described, the combination as a whole being as herein-before set forth. Sixth, I claim adjustable or movable end seats, substantially such as described, and serving, if necessary, as steps, in combination with longitudinal car seats, having backs capable of conversion into couches, substantially in the manner specified."

No. 22,463. Charles N. Tyler, of Washington, D.C., for an "Improvement in apparatus for generating illuminating gas."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is,—First, the peculiar arrangement and combination of the retort for generating the hydrogen gas with the main retort, for the generation of the illuminating gas, substantially as set forth. Secondly, elongating and contracting the rear end of the main retort, in the manner and for the purposes substantially as set forth. Thirdly, connecting the rear end of the hydrogen retort with the contracted end of the main retort, in the manner and for the purposes substantially as set forth."

No. 22,464. William P. Uhlinger, of Philadelphia, Pa., for an "Improved closet for sewing machines."

"Having now described the nature of my invention, I wish it to be understood that I am aware that sewing machine stands have already been made with a view to hide the machine from sight, when standing idle, which end is in those accomplished by means of a separate covering or cap, the platform of the machine being stationary; but this I do not claim. I think, however, it must be evident from the foregoing description that parts of my improved sewing machine closet may be modified, or equivalents substituted without impairing my invention, as, for instance, an arrangement of levers, or of gearing, may be employed in place of the cords or chains and pulleys described, all of these being

well known mechanical devices, and in this instance giving the same result; or the platform G, may, instead of sliding bodily up and down, be made to turn on pivots. I therefore do not desire to confine myself to the described construction or combination of the various parts in every minutia; but what I claim, and desire to secure by Letters Patent, is, combining the sewing machine platform G with the lid B of the closet, that the opening and shutting of said lid shall operate the platform G, substantially in the manner and for the purpose set forth."

No. 22,465. SINOURNEY WALES, of Boston, Mass., for an "Improvement in burners for vapor lamps."

"I claim when the wick is supported on and around an inner wick tube, and within an outer wick tube, and the jet cap is made separate from and so as to screw or fit on the outer wick tube, as described, the application of a rod F to the movable jet cap D and the inner wick tube E, in such manner as to be fastened to the cap D, and extend into and fit the bore of the tube E, so as not only to enable the jet cap to be raised and supported above the wick, in manner to allow such wick to be inflamed, and the flame thereof to heat the said jet cap and rod, but to serve as a means of conducting heat from the jet cap into the inner tube, by which such heat may be conducted into the wick, in order to aid in vaporizing the liquid contents thereof."

No. 22,466. WILLIAM WHITE, of Newark, N.J., for an "Improvement in making edge tools."

"I am aware that ingots of steel and iron are now formed by pouring the melted liquid into molds, I do not claim for the purpose of forming the ignot. I do not claim the manufacture of iron or steel, nor the remelting of the same either new or old; but what I claim as my invention, and desire to secure by Letters Patent of the United States, is, the use of wrought iron and steel, separately or combined, while in a melted or liquid state, for the purpose of forming into shape axes and other articles, without the process of forging, welding, or swaging, by the use of a mold, the cavity of which is the shape or form of the article desired, as set forth in my specification."

No. 22,467. OLIVER EVANS WOODS, of Philadelphia, Pa., for an "Improved life preserving trunk."

"I do not confine myself to the precise form of valise represented in my drawings, but the same construction may be applied with equal advantage to all kinds of trunks; the stays may be placed upon the inside or the exterior of the valise or trunk, as may be found most desirable. Having described my invention, I claim, and desire to secure by Letters Patent, as an improved article of manufacture, a valise or trunk, made substantially as herein shown and described."

No. 22,468. WILLIAM A. WOOD, of Hoosick Falls, N. Y., for an "Improvement in the cutting apparatus of harvesters."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, the manner herein described of constructing the guards and uniting them to the finger bar, as set forth."

No. 22,469. GILBERT YATES, of West Dresden, N.Y., for an "Improved door fastener."

"I am aware that there is quite a number of fasteners already patented, all of which I disclaim; but what I claim as my invention, and desire to secure by Letters Patent, is, a door fastener, constructed of the pieces A, A^1, A^{11}, bolt B, keeper C, and slot D, operating as herein set forth."

No. 22,470. JOSEPH L. CHAPMAN, of Philadelphia, Pa., assignor to himself and George Chapman, of said Philadelphia, for an "Improved turnbuckle for window blinds."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the turnbuckle F, and sliding collar D, provided with the flanch *b*, and the spring E, placed on the spindle or arbor A, the whole being arranged to operate substantially as and for the purpose set forth. I also claim, in combination with the above-named parts, the washer C, placed on the arbor A, for the purpose set forth."

No. 22,471. GEORGE L. DULANEY, of Mount Jackson, Va., assignor to himself and Solomon K. Moore, of said Mount Jackson, for an "Improvement in railroad car seats"

"What I claim as new, and desire to secure by Letters Patent, is, the combination and arrangement of the movable seat bottoms C, hinged folding cushions G, sliding slat blind frames H^1, and hinged cushioned frames I, and cushioned flaps K, L, on the backs E of the seats, and slides or panels M."

No. 22,472. SAMUEL EAKINS, of Philadelphia, Pa., assignor to himself and M. S. Wickersham, of said Philadelphia, for an "Improvement in method of blasting or removing submarine bodies."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination with a piece of ordnance, to be employed under water for the removal of rocks or other bodies by the operation herein described of a series of adjustable legs applied and operating, substantially as and for the purpose herein specified."

No. 22,473. CARLOS W. GLOVER, of Farm Ridge, Ill., assignor to himself, Bronson Murray, and J. Van Doren, of La Salle County, Ill., for an "Improvement in stacking agricultural products."

"Having thus fully described my invention, what I claim therein as new, and desire to secure by Letters Patent, is, making a stack out of two, three, four, or more lengths of straw or other material, that overlap, or break joint with each other, and which are laid with their seed ends pointing to a common center, and commencing at the apex and ending at the base, and drawn together and secured substantially as herein represented, using as a foundation to build upon an apron, or the binding cords or chains, as set forth."

No. 22,474. HARLEY STONE, of Blackstone, Mass., assignor to Paul P. Todd, of said Blackstone, for an "Improved expanding bit."

"I claim the mode and application of the slide cutter B, the slits C and D, the bolt E, and the graduated scale F, *f*, and constructed and operating as above set forth and described."

No. 22,475. JOHN VAN DOREN, of Farm Ridge, Ill., assignor to himself, Bronson Murray, and Carlos W. Glover, of La Salle Co., Ill., for an "Improvement in stacking agricultural products."

"Having thus fully described the nature of my invention, and how it differs from what has heretofore been done; what I claim as new, and desire to secure by Letters Patent, is, the so placing of two, three, or more layers of stalks or straws in a box or former as that they shall break joint with each other, beginning at the apex and so continuing until one half of the stack is formed, and then reversing the operation and laying them from the base to the apex for the other half of the stack, so that when bound up they shall form a stack shingled on its outside to protect the interior, substantially as herein described and represented."

No. 22,476. MOSES WRANGLE, of New York, N.Y., assignor to Hunter, Keller, and Co., of said New York, for an "Improved cast iron mercury bottle."

"Having thus described my mode of forming iron bottles, what I claim, and desire to secure by Letters Patent, is, moulding iron mercury bottles with concave bottoms, by means of the patterns, substantially as herein described."

RE-ISSUES.

JOSEPH A. BRADEN, of La Grange, Geo., for an "Improvement in shears."—Patented 21st September, 1858.—Re-issued 28th December, 1858.

"Claim.—I claim the construction of scissors or shears with their blades in separate pieces from the handles, and fitted to the handles with stems and sockets."

GEO. CROMPTON, of Worcester, Mass., for an "Improvement in looms for weaving figured fabrics."—Patented 11th November, 1854.—Re-issued 28th December, 1858.

"Claims.—I claim, combining with hook jacks which are connected with the harness, and with the mechanism for operating them to open the shed, a pattern chain or cylinder constructed with two or more patterns, and operated so that either of the patterns can be made to act on the hook jacks, to place them in the required position, to be operated upon by the mechanism for opening the shed. I also claim, in combination with a pattern chain, arranged with two or

more patterns in the direction of its length, the mechanism for changing the movements of the chain to effect the changing of the pattern. I also claim placing two or more patterns upon the rods of a pattern chain side by side, and operating them in succession by vibrating the chain laterally. I also claim pivoting the lifting and depressing rods at one end, the other being made adjustable. And I also claim moving the rods or jacks out of contact with the rollers on the pattern chain before the chain is moved by means of what are termed the vibrating fingers, or the equivalents thereof."

J. L. Sutton, of Norristown, Pa., for a "Steam stove."—Patented 20th July, 1858.—Re-issued 28th December, 1858.

"Claim.—I claim combining two or more concentric chambers, connected together and arranged in respect to each other with a boiler attached to an ordinary stove, for the purpose specified."

H. A. Harvey, of New York, N. Y., assignee through mesne assignment of Thos. W. Harvey, late of said New York, for an "Improvement in machinery for cutting screws."—Patented 30th May, 1846.—Re-issued 28th December, 1858.

"Claims.—The combination and arrangement of two inclined rollers, one or both rotating, and placed at a sufficient distance apart, to permit the shanks of the blanks to hang therein freely suspended by their heads, and for the purpose of arranging the blanks (when presented in a promiscuous mass) all in a row with their heads up, and causing the row to travel towards the lower end, and to be delivered one by one. Second.—Combining with the delivery end of the inclined rollers, or equivalent ways, for supplying the blanks in order, a delivery and check slide, and a receiving and conducting tube, or equivalent therefore, to receive the blanks from the row, deliver them one by one, and conduct them to the place where they are required for after operations, and at the periods required. Third.—Combining with the receiving and conducting tube a transferer, or equivalent therefor, to receive the blanks from the conductor, and transfer them to the mandrel or place where they are to be subjected to the cutting action. Fourth.—Combining with the mandrel or spindle, and with suitable means for holding the screw blanks in line, a sliding twin screw and spring, or equivalent therefor. Fifth.—Governing the motions of the chaser toward and from the axis of the blank by combining the chaser head with a carriage and sway bar moved by a cam, and also connecting one end of the sway bar with an adjusting slide, when this is combined with a chaser or chaser head, whereby the amount of taper to be given to the screw can be regulated at pleasure. Sixth.—Changing the directions of the various cam grooves by means of sliding switches, operated by sliding rods within the hollow cam shafts, and shifted by an index cam, by which the various changes of the motions of the machine are effected. And finally.—Making the cam which operates the sway bar adjustable on its shaft, for the purpose of adjusting the motions of the chaser to the length of the blank, to insure the proper formation of the point of the screw."

J. R. Foster, of Boston, Mass., assignee of A. H. Wood, for an "Improvement in gas burners."—Patented 21st September, 1858.—Re-issued 28th December, 1858.

"Claims.—First, the flame spreader, consisting of the ring pieces, extending outwardly from the gas orifice. Second, I claim the heaters, combined with the jet gas burner. Third, I claim, combining with the jet gas burner a draft cone, the top of which terminates at or near the level of the gas orifice."

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

List of Specifications, &c. published during the week ending 14th January, 1859.

No.	Price.	Subject-Matter.
1276	3*d.*	Traction and other engines, &c.
1277	1*s.* 3*d.*	Machinery for cutting, collecting, and spreading grass, &c.
1278	6*d.*	Apparatus for applying lime, soot, and other matters to turnips and other crops, &c.
1279	3*d.*	Apparatus for decomposing fatty substances.
1280	10*d.*	Apparatus for sizing fibrous materials.
1281	7*d.*	Apparatus for destroying the turnip fly, &c.
1282	4*d.*	Manufacture of bricks, &c.
1283	7*d.*	Obtaining saccharine substances from cereal and vegetable matters, &c.
1284	3*d.*	Black lead composition.
1285	3*d.*	Machinery for printing fibrous materials.
1286	3*d.*	Manufacture of artificial whalebone.
1287	3*d.*	Self-acting perforated baster.
1288	6*d.*	Stoppers for bottles or jars.
1289	3*d.*	Manufacture of copper pipes and tubes.
1290	4*d.*	Extract of Peruvian guano.
1291	6*d.*	Stoves or fire grates.
1292	6*d.*	Construction of floors, roofs, and arches.
1293	1*s.* 3*d.*	Mariners' compass.
1294	6*d.*	Thrashing machines.
1295	9*d.*	Apparatus for tipping or upsetting coals, &c.
1296	3*d.*	Fire-arms.
1297	3*d.*	Dyeing cotton and other fibrous materials or fabrics.
1298	6*d.*	Machinery for the manufacture of vulcanized india-rubber thread.
1299	3*d.*	Manufacture of tannin, &c.
1300	10*d.*	Apparatus for sowing grain.
1301	9*d.*	Furnaces and steam boilers.
1302	3*d.*	Railway wheels.
1303	3*d.*	Apparatus for measuring and registering the flow of liquids.
1304	6*d.*	Ratchet braces.
1305	5*d.*	Implements for distributing or applying to destroy vermin, &c.
1306	3*d.*	Revolving fire arms, &c.
1307	3*d.*	Artificial fuel.
1308	5*d.*	Safety lamps, &c.
1309	3*d.*	Reflector or cover for gas burners.
1310	6*d.*	Railway buffers.
1311	6*d.*	Stove.
1312	3*d.*	Ventilating stays.
1313	10*d.*	Looms for weaving figured fabrics.
1314	5*d.*	Alembic wine examiner.
1316	6*d.*	Thrashing machine.
1317	3*d.*	Nose bags.
1318	10*d.*	Screw stocks.
1319	1*s.* 5*d.*	Steam engines.
1320	7*d.*	Awls, &c.
1321	7*d.*	Cartridges.
1322	4*d.*	Separation of glycerine from saline and other substances.
1323	3*d.*	Textile fabrics, &c.
1324	3*d*	Lighthouses.
1325	4*d.*	Manufacture of starch.
1326	7*d.*	Sewing machines.
1327	3*d.*	Machine for sweeping carpeted and other floors.
1328	10*d.*	Gas meters
1329	10*d.*	Apparatus for supplying boilers with water.

No.	Price.	Subject-Matter.
1330	4*d.*	Pigment, cement, or mastic.
1331	7*d.*	Treating hemp or tow for calking ships and vessels, &c.
1332	10*d.*	Manufacture of locks.
1333	7*d.*	Marine steam engines.
1334	3*d.*	Generating steam and economizing fuel.
1335	10*d.*	Steam engines.
1336	2*s.* 7*d.*	Machinery for combing cotton and other fibrous materials.
1337	3*d.*	Steam engine boilers and furnaces.
1338	4*d.*	Treatment and application of vegetable fibres.
1339	1*s.* 7*d.*	Machinery for cutting veneers.
1340	3*d.*	Curtain poles or rods.
1342	10*d.*	Perforating bankers' cheques.
1347	6*d.*	Stoves.
1509	8*d.*	Machinery for kneading dough.

Erratum in List of Specifications published during the week ending 7th January, 1859.

No. 1224. For "Iaeger" read "Dyeing wool."

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

Free Patent Museum and Library, South Kensington.

Numbers of Visitors for the Week ending 15th January, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Jan. 10	Monday -	231	590	821—Fine.
„ 11	Tuesday -	310	459	789— „
„ 12	Wednesday	128	92	220— „
„ 13	Thursday -	95	—	95— „
„ 14	Friday -	141	—	141— „
„ 15	Saturday -	258	—	258— „
	Total -	1163	1141	2304

Total number of visitors since the period of free daily admission (12th May, 1858) to 15th January, 1859, —58,421.

This Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. Woodcroft.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions, &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson. (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset. Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent, No.* 347, *dated 10th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated 25th July*, 1698, *and Stat.* 10 *&* 11 *Will, III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated 21st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent, No.* 602, *dated 16th March* 1744.) Price 1*s.*

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. Curtis for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities :—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).
Macclesfield (*Useful Knowledge Society*).
Manchester (*Chetham Hospital*).
———— (*Camp Field*).
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*).
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Society of Arts (*John Street, Adelphi*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States :—

Official.

Admiralty, Steam Department.
———— Surveyor of Navy.
———— Deptford Dockyard.
———— Woolwich ditto.
———— Sheerness ditto.
———— Devonport ditto.
———— Portsmouth ditto.
———— Chatham ditto.
———— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec; Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
Britis n Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin.
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, as translated or transcribed from Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240 and 348.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

DRAIN TILES AND PIPES. Price 6*d.*
MANUFACTURE OF IRON AND STEEL, Parts I. and II, price 6*d.* each; Part III. (completing the series), price 4*s.*
MANURE. Price 6*d.*
SEWING AND EMBROIDERING. Price 6*d.*
MARINE PROPULSION, Parts I. and II., price 1*s.* each; Part III. (completing the series), 2*s.*
PRESERVATION OF FOOD. Price 6*d.*
AIDS TO LOCOMOTION. Price 1*s.*
STEAM CULTURE. Price 2*s.*
WATCHES, CLOCKS, AND OTHER TIME-KEEPERS. Price 1*s.* 6*d.*

The following are in the press:—

PRINTING CALICOES AND OTHER WOVEN FABRICS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
COMBUSTION OF FUEL.
FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ.
INDIA RUBBER AND GUTTA PERCHA: FIRE AIR, AND WATER PROOFING.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(Registered for transmission abroad.)

No. 527. FRIDAY, JANUARY 21, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2766. To EDWARD STANTON JONES, of 13, Marylebone Street, Golden Square, in the county of Middlesex, Professor of Music, for the invention of "Improvements in cornets, trumpets, horns, and similar musical wind instruments."
On his petition, recorded in the Office of the Commissioners on the 3rd day of December, 1858.

2916. To AUGUSTE STANISLAS BELIARD, of Bordeaux, in the empire of France, Hatter, for the invention of "An improved machine for pumicing felts, tissues, and skins."
On his petition, recorded in the Office of the Commissioners on the 21st day of December, 1858.

2954. To JOHN RADLEY, of 22, Upper Sackville Street, in the city of Dublin, Hotel Keeper, for the invention of "An improved cooking apparatus."
On his petition, recorded in the Office of the Commissioners on the 27th day of December, 1858.

2984. To HIPPOLYTE CHARLES VION, of Paris, in the empire of France, Civil Engineer, for the invention of "A new mode of obtaining atmospheric electricity, and terrestial electricity, and its industrial applications, and in apparatus for the same."
On his petition, recorded in the Office of the Commissioners, on the 30th day of December, 1858.

2999. To JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in the manufacture or production of boots and shoes or other coverings for the feet, and in the machinery and apparatus employed in such manufacture."—A communication.

3001. To MATTHEW DIGBY WYATT, of Guildford Street, Russell Square, in the county of Middlesex, Architect, for the invention of "Improvements in tiles and tessaræ and other wall coverings, and in the means of securing the same to walls and buildings."

3003. To JOHN LEES, of Park Bridge, near Ashton-under-Lyne, in the county of Lancaster, Roller Maker, and WILLIAM HEAP, of Ashton-under-Lyne aforesaid, Tool Maker, for the invention of "Improvements in machinery for punching square holes in the ends of rollers and other articles."

3005. To FREDERIC WILHELM ALEXANDRE CASPER and GUILLAUME HENRY SCHMAHL, both of No. 152, Rue du Faubourg St. Martin, Paris, for the invention of "Using spart or Spanish broom in manufacturing seats of all descriptions."

3007. And to JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in the manufacture or production and casting of steel, and in the apparatus employed therein." — A communication from Monsieur Sudre.
On their several petitions, recorded in the Office of the Commissioners on the 31st day of December, 1858.

1. To JOHN TALBOT PITMAN, of the American and European Patent Offices, No. 67, Gracechurch Street, London, for the invention of "An improved mode of making and fitting bungs to casks and other vessels."—A communication.

2. To HELEN CATLIN TRAPHAGEN, of the city, county, and state of New York, in the United States of America, for the invention of "Improvements in skirts for ladies."

3. To ALBAN ANDERSON, of Lancaster, Fairfield county, Ohio, United States of America, for the

invention of "An improvement in governors for machinery."

4. To Benoît Joseph Gosteau, of 2, Rue Ste. Appoline, Paris, in the empire of France, and of 45, Essex Street, Strand, London, Merchant, for the invention of "An improved gridiron, which may form a complete cooking apparatus."

5. To Joseph Eugène Drouot, Baker, of 2, Rue Ste. Appoline, Paris, empire of France, and of 45, Essex Street, Strand, London, for the invention of "Improvements in bakers' ovens."

6. To William Footman, of No. 15, Water Street, Strand, in the county of Middlesex, for the invention of "Improvements in breaks for retarding and stopping railway trains, carriages or other vehicles."

7. To John Oliver, of White Bank, near Chesterfield, in the county of Derby, for the invention of "Improvements in lubricators for steam engine cylinders."

9. To James Garforth, of Dukinfield, in the county of Chester, Engineer, for the invention of "Certain improvements in steam engines."

10. To Henry Ashworth, of Littleborough, in the county of Lancaster, Manager, for the invention of "A certain improvement in power looms for weaving."

11. To Robert Smith, of Beith, in the county of Ayr, North Britain, Wright, for the invention of "Improvement in casting, applicable to printing surfaces, and for other purposes."

12. To Pierre Emmanuel Guérinot, of 60, Boulevart de Strasbourg, Paris, Mechanician Jeweller, for the invention of "Improvements in the application of an apparatus to railway locomotives, waggons and carriages, for the purpose of lessening the effect of concussion in the event of collision."

13. To William Eccles, of 34, Surrey Street, Strand, Westminster, in the county of Middlesex, and of the University of Cambridge, Master of Arts, for the invention of "Improving the machinery or apparatus for regulating the tension of the twist threads or warp whilst it is weaving in power looms into cloth."

15. To Alexander Prince, of the Office for Patents, 4, Trafalgar Square, Charing Cross, in the county of Middlesex, for the invention of "Improvements in the construction of cylindrical presses."—A communication from Prince Sergius Dolgoruki, of Berlin.

16. To Wilhelm Adolphe Von Kanig, of Leipsic, in the kingdom of Saxony, Gentleman, for the invention of "Improvements in machinery or apparatus for digging and cultivating land."

17. To James Harris, of Hanwell, in the county of Middlesex, Engineer, for the invention of "Improvements in apparatuses for regulating the pressure and flow of steam, water, and other fluids."

19. To George Skinner, of Stockton-on-Tees, county of Durham, Earthenware Manufacturer, and John Whalley, of South Stockton-on-Tees, county of York, Earthenware Manufacturer, for the invention of "Improvements in the manufacture of ornamental and other tiles, and other similar articles."

20. To John Brown the younger, of the Rotherham Iron Works, Rotherham, in the county of York, Ironfounder, for the invention of "Improvements in buffers, draw springs, and bearing springs."

21. To George Tomlinson Bousfield, of Loughborough Park, Brixton, in the county of Surrey, for the invention of "Improvements in machinery for forming dough into cakes or bread crackers."—A communication.

22. To Alexandre Louis Lévèque, of Paris, France, Gentleman, for the invention of "An improved apparatus for subduing or stopping runaway or restive horses."

23. And to Joseph Bond Morgan, of Liverpool, in the county of Lancaster, Cotton Broker, for the invention of "Improvements in propelling navigable vessels."

On their several petitions, recorded in the Office of the Commissioners on the 1st day of January, 1859.

---

24. To Jozé Luis, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for the invention of "New economical candles." — A communication from Adolphe Michaut, residing at Montpellier, in the empire of France.

25. To Robert Tempest and James Tomlinson, both of the Roach Iron Works, Rochdale, in the county of Lancaster, Machine Makers, for the invention of "Improvements in certain machines for preparing cotton and other fibrous materials."

27. To Charles Bell Blyth, of Dundee, Mill Manager, for the invention of "Improvements in machinery for preparing and treating jute, hemp, flax, and other fibrous materials."

29. To William Renton, of Leeds, in the county of York, Cloth Dresser, Thomas Renton, of Leeds aforesaid, Millwright, and William Binns, of Leeds aforesaid, Cloth Finisher, for the invention of "Improvements in raising the nap or pile of textile fabrics."

30. And to Jacob Furnival, of Leamington, in the county of Warwick, Thomas Furnival, of Cobridge, John Derbyshire, of Longton, and Francis Joseph Emery, of Burslem, all in the county of Stafford, for the invention of "Improvements in apparatus for supporting articles of china and earthenware in kilns and ovens."

On their several petitions recorded in the Office of the Commissioners, on the 3rd day of January, 1859.

---

31. To Lindley John Higham, late of New York, in the United States of America, but now residing at Edmund Place, in the city of London, Mechanic, for the invention of "Improved means for obtaining submarine electrical conduction."

32. To John Buchanan, of Greenock, in the county of Renfrew, North Britain, Gentleman, for the invention of "Improvements in oil cans or lubricating apparatus."

33. To John Barnett Joyce, of Bradford, in the county of York, Machine and Tool Maker, for the invention of "Improvements in means, machinery, or apparatus, applicable to wool combing."

34. To WILLIAM HOOD, of No. 68, Upper Thames Street, in the city of London, Iron Merchant, for the invention of "Improvements in racks and water cisterns for stables."

35. To ALFRED BEDBOROUGH, of the town and county of the town of Southampton, Architect and Surveyor, for the invention of "An improved chimney cowl and ventilator."

36. And to CHARLES DE FOREST, of Leicester Square, in the county of Middlesex, Gentleman, for the invention of "An improvement in the manufacture of springs for carriages, and other uses."—A communication from Charles Goodyear, jun., residing at New York, in the United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 4th day of January, 1859.

---

37. To FREDERICK CLARK, of King Street, Bloomsbury, in the county of Middlesex, Turner, for the invention of "Improvements in connecting knobs and handles to the spindles of locks and latches, and other articles of a like nature."

38. To WILLIAM DRAPER, of 2, Gordon Terrace, Holland Road, Brixton, in the county of Surrey, Artist, for the invention of "Improvements in machinery for printing on paper and other fabrics."

39. To JAMES HOWARD, of Bedford, Agricultural Implement Maker, for the invention of "An improved construction of lever-neck plough."

40. To ROBERT RUMNEY, of Manchester, in the county of Lancaster, Manufacturing Chemist, and WILLIAM STEVENSON MACDONALD, of the same place, Mechanic, for the invention of "Improvements in printing and dyeing woven fabrics and yarns or threads."

41. And to ALFRED VINCENT NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "An improvement in the process of and improved apparatus for separating metals from their ores."—A communication from Lewis Solomon, of New York, in the United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 5th day of January, 1859.

---

43. To JAMES KIRKMAN, of Bolton-le-Moors, in the county of Lancaster, Manufacturer, and ISAAC GRUNDY, of the same place, Cotton Spinner, for the invention of "Improvements in certain kinds of bed covers or counterpanes, and other textile fabrics of similar character, and in the mode or method of weaving the same."

44. To GEORGE BURY, of Everton, near Liverpool, in the county of Lancaster, Overlooker, for the invention of "Improvements in part or parts of apparatus commonly used and applied for effecting the pick in power looms for weaving."

45. To HENRY GODFREY COOMBS, of No. 17, Union Street, Borough, in the county of Surrey, Ironfounder and Contractor, for the invention of "An improved method of constructing railings, bars, gates, gratings, columns, and all other builder's work of a like nature or description."

46. To EDWARD THOMAS HUGHES, of the firm of Hughes and Son, Patent Agents, No. 123, Chancery Lane, London, W. C., for the invention of "Improvements in machinery or apparatus for preparing cotton and other fibrous materials to be spun."—A communication from César Vallée, resident at Cernay, in the empire of France (département du Haut Rhin).

47. To WILLIAM RENTON, of Leeds, in the county of York, Cloth Dresser, THOMAS RENTON, of Leeds aforesaid, Millwright, and WILLIAM BINNS, of Leeds aforesaid, Cloth Finisher, for the invention of "Improvements in finishing woollen and other fabrics."

48. To JOHN ASPINALL, of Great Tower Street, in the city of London, Civil Engineer, for the invention of "Improvements in machines for the manufacture of bolts, rivets and spikes."

49. To JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "An improved textile fabric, applicable to the manufacture of varnished cloths, and to other purposes." — A communication from André Paul Roger, resident at Paris, in the empire of France.

50. And to JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in machinery or apparatus for boring, piercing rocks, applicable also to the dressing or working of stone, and as a power hammer generally." — A communication from Monsieur Germain Sommeiller, residing at Turin, in the kingdom of Sardinia, Engineer.

On their several petitions, recorded in the Office of the Commissioners on the 6th day of January, 1859.

---

51. To WILLIAM SPENCE, of 50, Chancery Lane, in the county of Middlesex, Patent Agent, for the invention of "Improvements in the mode of taking photographic pictures on wood."—A communcation from Charles B. Boyle, residing in the United States of America.

53. To EDWIN HEYWOOD, of Halifax, in the county of York, for the invention of "Improvements in weaving."

55. To GEORGE KENNEDY GEYELIN, Civil Engineer, of London, for the invention of "Regulating gas burners, which he calls the Universal Gas Burner Regulator."

57. To JOHN PATERSON, of Wood Street, in the city of London, Warehouseman, for the invention of "An improvement in bands and belts for the waist."

59. And to WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in machinery for winding, twisting, and doubling fibrous materials."—A communication from Louis Barnabé Duboc, jun., of Paris, in the empire of France.

On their several petitions, recorded in the Office of the Commissioners on the 7th day of January, 1859.

---

61. To CHARLES FRÉDERIC VASSEROT, of 45, Essex Street, Strand, London, Patent Agent, for the invention of "An improved chain and bucket pump."—A communication from André Xavier

Dubrulle-Chevalier, residing at Douai (Nord), in the empire of France.

63. To Theodore Byron Hubbell, of Castle Street, in the county of Middlesex, Manufacturer, for the invention of "An improved trap for rabbits, rats, mice, and other like animals and vermin."—A communication from C. B. Hubbell, residing at Bridgeport, U.S.

65. To Alexander William Williamson, of University College, London, for the invention of "Improvements in condensers for steam engines and other purposes."

67. To William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improvements in purifying natural phosphates of lime."—A communication from Emile Constant Martin, residing at Paris, in the empire of France, formerly Banker.

69. To John Thomas Forster, of Holland Road, Kensington, in the county of Middlesex, Gentleman, for the invention of "Improvements in bed berths, applicable for bunks, hammocks, cots, and other fixed and moveable sleeping places."

71. And to William A. Lyttle, Esq., of the Secretary's Department, General Post Office, Ireland, (address) Secretary's Office, General Post Office, London, for the invention of "Taking the place of springs in many, if not all, of the combinations into which they enter, and also for equilibrating a varying force or weight."

On their several petitions, recorded in the Office of the Commissioners on the 8th day of January, 1859.

---

73. To Louis A. Normandy, junr., of 67, Judd Street, London, for the invention of "Improvements in the process of distilling and clarifying resinous substances." — A communication from E. Dromart, D. Dusillol, and A. Dusillol, of Préchac, département de la Gironde, in the empire of France.

75. To Ferdinand Lehr, of Hoboken, in the state of New Jersey, United States of America, for the invention of "Improvements in machinery for manufacturing metallic ribs for umbrellas, parasols, and other articles."

77. And to John White, of Finchley, in the county of Middlesex, Surgeon, for the invention of "Improvements in cleansing or purifying air, and in increasing or reducing the temperature thereof, and in the application of air so treated to sanitary and other uses."

On their several petitions, recorded in the Office of the Commissioners on the 10th day of January, 1859.

---

79. To Eugenio Agneni, of 29, Devonshire Street, Queen Square, Bloomsbury, in the county of Middlesex, an Historical Painter, native of Rome, for the invention of "Increasing particularly the effect of decorative pictures, landscapes, drawings, and prints, through looking glasses."

81. To John Biers the younger, of No. 38, Rochester Road, Kentish Town, in the parish of Saint Pancras, in the county of Middlesex, Coach Maker, for the invention of "A self-acting carriage wheel brake."

83. To William Tillie, of the city of Londonderry, in the county of Londonderry, Ireland, Shirt Manufacturer, for the invention of "An improvement in the manufacture of shirts and shirt fronts."

85. To Bernard Joseph Rubenstein, late of Paris, and now of London, Dentist, for the invention of "Improvements in dentistry."

87. To Charles William Siemens, of John Street, Adelphi, in the county of Middlesex, for the invention of "Improvements in supports for electric telegraphic line wires, and in tools or apparatus to be used in the construction of such supports, part of which improvements are applicable to the joining of pipes and other articles."

89. And to Nicholas Procter Burgh, of Sheerness, Engineer, for the invention of "Improvements in steam engines."

On their several petitions, recorded in the Office of the Commissioners on the 11th day of January, 1859.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

21st January, 1859.

1529. Adderley Willcocks Sleigh, of Mansell Villas, Wimbledon Park, Knight of the Ancient and Most Noble Order of the Tower and Sword, Captain late Royal Navy, and Her Majesty's Land Transport Corps, for an invention of "Improvements in the construction of floating sea barriers, or artificial beaches, breakwaters, and batteries."—Dated 7th July, 1858.

1645. Matthew Matley, of Ashton-under-Lyne, in the county of Lancaster, Engineer, for an invention of "Improvements applicable to steam boilers for consuming smoke and economising fuel in the generation of steam."—Dated 21st July, 1858.

1651. David William Warder, of 4, Caroline Place, Chelsea, in the county of Middlesex, Draughtsman, for an invention of "Improvements in the manufacture of beams, girders, ships' ribs or frames, and other structures of wrought iron."—Dated 22nd July, 1858.

1658. Henry Higgins, of Salford, in the county of Lancaster, Machinist, and Thomas Schofield Whitworth, of the same place, Manager, for an invention of "Improvements in machinery for spinning and doubling or twining cotton and other fibrous materials."—Dated 22nd July, 1858.

1662. Harby Barber, of Leicester, Manufacturer, for an invention of "Improved machinery for producing knitted fabrics."—Dated 23rd July, 1858.

1671. Julien François Belleville, of Paris, in the French empire, Civil Engineer, for an invention of "An improved smoke-consuming apparatus or furnace."—Dated 24th July, 1858.

1675. To Charles Fréderic Vasserot, of 45, Essex Street, Strand, London, Patent Agent, for an invention of "Improvements in glass-roofs, skylights, windows, and other glass structures."—A communication from Pierre François Rolier-Gonsault, of Montargis (Loiret), in the empire of France.—Dated 26th July, 1858.

1697. Arnauld Kellermann, at Courbevoie, département de la Seine, French empire, for an invention of "The employ of new vegetal substances for dying and especially to replace Cocheneal dye."—Dated 28th July, 1858.

1698. Alexandre Pougault, of Decize (Nièvre), a town of France, Practical Engineer, for an invention of "An improved apparatus for purging or clearing steam engines of their condensed water."—Dated 28th July, 1858.

1832. William Knowles, of Bolton-le-Moors, in the county of Lancaster, Cotton Spinner, for an invention of "Improvements in certain parts of machinery used in preparing and spinning cotton and other fibrous materials."—Dated 12th August, 1858.

1915. Thomas Averill, of Birmingham, in the county of Warwick, Wholesale Tea Dealer, for an invention of "An improvement or improvements in mills for grinding."—A communication from a Foreigner residing abroad.—Dated 23rd August, 1858.

2672. Frederick Crace Calvert, of the city of Manchester, Professor of Chemistry, and Charles Lowe, of the same place, Analytical Chemist, for an invention of "Improvements in the manufacture of size."—Dated 25th November, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 19th January*, 1859, *inclusive.*)

17th January.

142. François Jules Manceaux, of Paris, in the empire of France, Gun Manufacturer, for an invention of "Improvements in fire-arms."—Dated 18th January, 1856.

163. Jean Baptiste Pierre Alfred Thierry, junior, Jean Louis Richard, both of Paris Chemists, and Baron Henry de Martiny, of Versailles (France), for an invention of "Improvements in preventing smoke by means of a fumivore hygienic apparatus."—Dated 22nd January, 1856.

171. Joseph Francis, of New York, in the United States of America, Engineer, for an invention of "Improvements in the manufacture of metallic boats."—Dated 22nd January, 1856.

18th January.

197. Felix Chauchard, of Paris, in the empire of France, for an invention of "Improvements in the manufacture of paper and pasteboard from vegetable and wood substances."—Dated 25th January, 1856.

19th January.

181. Joseph Hopkinson, the younger, of Huddersfield, in the county of York, Engineer, for an invention of "Improvements in apparatus connected with steam-boilers."—Dated 23rd January, 1856.

203. John Beads, of Pendleton, near Manchester, in the county of Lancaster, Manager, for an invention of "Improvements in machinery or apparatus for spinning cotton, wool, or other fibrous substances, where self-acting mules are used."—Dated 25th January, 1856.

227. Pierre Emmanuel Guérinot, of Rue au Maire, in Paris, Mechanician Jeweller, for "An invention for stopping instantaneously two railway trains running against each other."—Dated 28th January, 1856.

Erratum in Journal of 14th January.

3006. For "Louis A. Normandy" read "Louis A. Normandy, jun."

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. I.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions, &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson. (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset. Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent, No.* 347, *dated 10th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated 25th July*, 1698, *and Stat.* 10 *&* 11 *Will, III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated 21st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson. (*Letters Patent, No.* 602, *dated 16th March* 1744.) Price 1*s.*

A List of the Patents for Inventions which have become Void by reason of the nonpayment of the additional Stamp Duty of £50 before the expiration of the Third Year from the date of such Patents, pursuant to the Act of the 16th Vict. c. 5, sec. 2,—for the Quarter ending the 31st day of December, 1858.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2179	1st Oct. 1855.	William Illingworth, of Manchester, in the county of Lancaster, Gentleman.	Certain improvements in printing earthenware, China, or other ceramic manufactures.
2181	,,	Auguste Edouard Loradoux Bellford, of 32, Essex Street, Strand, London, Patent Agent.	Improvements in ventilating hats or other coverings for the head.
2186	,,	Joseph François Victor Augier, of No. 29, Rue de Chabrol, Paris, in the empire of France, and of 4, South Street, Finsbury, London, Gentleman.	An improved apparatus for extracting the aroma from plants and flowers.
2187	,,	George Baker, of No. 149, High Street, Southwark, in the county of Surrey, Ironmonger, and Charles Miller, of Flying Horse Yard, Southwark, in the county of Surrey aforesaid, Builder.	Improvements in the construction of register stoves.
2190	,,	George Curling Hope, of Hastings, in the county of Sussex, Designer and Publisher.	An improved method of producing figures, patterns, or designs upon textile fabrics for the purposes of needlework.
2192	2nd Oct. 1855.	Alexander Sands, of the city of Manchester, Ironfounder.	Improvements in securing rails in railway chairs.
2194	,,	Laurent Marie René Péan, of Paris, in the empire of France.	An improved inkstand.
2195	,,	George Rennie, of the firm of George Rennie, John Keith Rennie, and George Banks Rennie, of Holland Street, Blackfriars, Engineers.	Improvements in steam-engine boilers as applied to the propulsion of vessels
2196	,,	Richard Threlfall, of Preston, in the county of Lancaster, Gentleman, and William Knowles, of the same place, Overlooker.	A certain improvement in looms for weaving.
2199	,,	William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer.	An improved mode of constructing elastic bed bottoms, applicable also to sofas, settees, and other seats.
2200	,,	François Fortune Benvenuti, of Paris, France, and 4, South Street, Finsbury, London, Gentleman.	Certain improvements in typography.
2201	,,	George Tomlinson Bousfield, of Sussex Place, Loughborough Road, in the county of Surrey.	Improvements in locks for fire-arms.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2204	3rd Oct. 1855.	William Ramscar, of the city of Manchester, in the county of Lancaster, Engineer.	Improvements in fire-arms, which improvements are also applicable to cannons and all kinds of field pieces.
2207	„	Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent.	A method of ascertaining or indicating and regulating the height of water in steam-boilers.
2208	„	John Dickinson, of Old Bailey, in the city of London, Paper Manufacturer.	An improvement in the manufacture of paper.
2212	4th Oct. 1855.	Henry Oldham, of Leeds, in the county of York, Overlooker.	An improvement in weaving textile fabrics.
2213	„	George Frederick Gruet, of Bordeaux, in the empire of France, Merchant.	An improvement in the construction of lamps.
2214	„	John Lancaster, of Deptford, in the county of Kent, Horticulturist.	An improved waterproof material.
2215	„	Henry Cornforth, of Birmingham, in the county of Warwick, Manufacturer.	A new or improved manufacture of hooks and eyes.
2216	„	Thomas Henry Ryland, of Birmingham, in the county of Warwick, Manufacturer.	A new or improved manufacture of bracelets and other dress ornaments, and ornamental dress fastenings.
2220	„	Edward Meldrum and James Young, both of Glasgow, in the county of Lanark, Merchants.	Improvements in the manufacture of certain salts of sodium and potassium.
2223	„	François Modeste Demait, of 39, Rue de l'Echiquier, Paris, in the empire of France, and 4, South Street, Finsbury, London, Gentleman.	Certain improvements in the preservation of animal and vegetable substances.
2226	5th Oct. 1855.	Jean Daniel Pfeiffer, of 1, Rue Princesse, Paris.	Improvements in the construction of knives or cutters.
2233	6th Oct. 1855.	William John Roffe, of Upper Holloway, in the county of Middlesex, Gentleman.	Improvements in stoves or furnaces.
2234	„	Adolph Coutinho, late of the Free Town of Hamburg, in Germany, now residing at Oldham, in the county of Lancaster.	Improvements in the means of obtaining motive power, or continuous motion.
2236	„	James Washington, of Batley, near Dewsbury, in the county of York, Machinist.	Improvements in apparatus for sweeping chimneys or flues.
2237	„	James Torry Hester, of Oxford, Surgeon.	Improvements in invalid and children's chairs.
2239	„	William Rogers, of New Road, Whitechapel Road, in the county of Middlesex, Member of the Royal College of Veterinary Surgeons.	Improvements in fire arms.
2242	8th Oct. 1855.	John Hubbard, of Albion Road, Hammersmith, in the county of Middlesex.	An improved sole for boots and shoes.
2247	„	William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer.	Improvements in condensers.
2249	9th Oct. 1855.	Perceval Moses Parsons, of Duke Street, Adelphi, in the county of Middlesex, Civil Engineer.	Certain improvements in connecting and securing the joints of pipes and tubes.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2250	Oct. 1855.	Joseph Gilbert Martien, of Newark, New Jersey, in the United States of America, but now residing in London.	Improvements in the manufacture of iron and steel.
2253	,,	James Murdoch, of 7, Staple Inn, in the county of Middlesex, Patent Agent.	Improvements in extracting colouring matter from lichens containing such coloring matter.
2254	,,	James Murdoch, of 7, Staple Inn, in the county of Middlesex, Patent Agent.	Improvements in extracting colouring matter from lichens containing such coloring matter.
2255	,,	Julien François Belleville, Civil Engineer, of Paris, in the French empire.	An improved smoke consuming apparatus.
2258	,,	Stephan Goldner, of Wimpole Street, in the county of Middlesex.	Improvements in apparatns used in cooking and preserving animal and vegetable matters.
2259	,,	Narcisse Leroy, of 15, Rue de l'Eglise Batignolles, Paris, Railway Contactor.	Improvements in the construction of railway carriages.
2264	10th Oct. 1855.	William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer.	Improved machinery for dressing flour.
2266	,,	Thomas Oddie, of Preston, in the county of Lancaster, Manager, William Lancaster, of the same place, Manufacturer, and John Lancaster, of the same place, Manager.	Certain improvements in looms for weaving.
2268	,,	Denis Hébert, of 28, Rue Marbeuf, Paris, Director of the Boulangerie Economique.	Improvements in heating and arranging ovens.
2271	11th Oct. 1855.	Jane Ann Herbert, of No. 5, Waterden Place, Guildford, in the county of Surrey, Widow.	Improvements in propellers for propelling steam ships or other vessels, and which are denominated the Whinfield or conical propeller.
2273	,,	William Andrew Fairbairn, of the city of Manchester, Engineer, and George Haslam, of the said city, Mechanic.	Improvements applicable to locomotive engines and carriages.
2274	,,	William Bayley, of Staleybridge, in the county of Lancaster, Cotton Spinner, and John Quarmby, of the same place, Manager.	Improvements in machines for carding cotton and other fibrous materials.
2275	,,	Peter Spence, of Pendleton, in the county of Lancaster, Manufacturing Chemist.	Improvements in the production of sulphate of alumina to be used in the fluid state, or to be rendered into the solid condition, known commercially as cake alum.
2277	,,	John King Westrop, of Staining Lane, and Edward Alfred Sharman, of 35, Noble Street, both in the city of London.	An improvement in the manufacture of gloves made of looped fabrics of silk, cotton, and linen.
2278	,,	Richard Albert Tilghman, of the city of Philadelphia, United States of America.	Improvements in treating fatty and oily substances.
2281	12th Oct. 1855.	Robert Henry Kay and Alfred Thomas Richardson, Manufacturers, and George Mallinson, Pattern Designer, all of the city of Manchester.	Improvements in the manufacture of plain and ornamental woven fabrics.
2282	,,	Thomas Moore, of Retford, in the county of Nottingham, Engineer.	An improved mill for grinding corn and other grain.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2283	12th Oct. 1855.	William Lyall, of Amiens, in the French empire, Flax Spinner.	Improvements in spinning machinery applicable also to roving machinery.
2285	„	Henry Gardner, of Oldner Farm, Chipping Norton.	Improvements in machinery for dressing or cleaning wheat, grain, and seeds.
2288	13th Oct. 1855.	James Septimus Cockings, Civil Engineer, and Ferdinand Potts, Patent Tube Manufacturer, both of Birmingham, in the county of Warwick.	Certain improvements in sockets for holding whips and candles, parts of which are also applicable to the sockets or irons for holding carriage and other lamps.
2289	„	Hugh Greaves, of New Palace Yard, in the city of Westminster, Civil Engineer.	Improvements in the construction of steam boilers.
2290	„	Germain Adolphe Thibierge, Apothecary of Versailles, a town in the French empire.	Certain improvements in manufacturing chlorine, part of which are applicable for obtaining certain accessory products.
2291	„	John Dewrance, of Barge Yard, Bucklersbury, in the city of London, Engineer.	An improvement in the frames of pianofortes.
295	„	Thomas and William Hemsley, of Melbourne, near Derby.	An improvement in the manufacture of embossed and craped fabrics.
2297	„	Manuel Perez Lozano, of Crutched Friars, in the city of London.	Improvements in treating pyrites and ores containing sulphur, in obtaining sulphuretted hydrogen, and in precipitating copper from solutions.
2299	„	John Stenhouse, of 15, Upper Barnsbury Street, Islington.	Improvements in the preparation of decolourizing materials.
2305	15th Oct. 1855.	James Miller Brown and Thomas Brown, of 165, Piccadilly.	Improvements in the manufacture of folding chairs.
2306	„	Enrico Angelo Ludovico Negretti and Joseph Warren Zambra, both of Hatton Garden, in the city of London, Meteorological Instrument Makers.	Improvements applicable to self-registering gauges, thermometers, barometers, and other mercurial meteorological instruments.
2308	16th Oct. 1855.	George Thomson, of Glasgow, in the county of Lanark, North Britain, Engineer.	Improvements in steam engines.
2310	„	William Church, of Birmingham, in the county of Warwick, Engineer.	An improvement or improvements in the manufacture of ordnance.
2312	„	John Forrest, of Dear's Place, Somers Town, in the county of Middlesex, Mineralogist.	An improved mode of extracting metals from their ores.
2313	„	William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer.	Improvements in the construction of fire arms.
2315	„	James Fraser, of Jermyn Street, in the county of Middlesex, Gentleman.	An improvement in the manufacture of paper or paper pulp.
2318	17th Oct. 1855.	Jules Hyppolite Clément, of Paris (France), Proprietor.	An improved break for railway carriages, parts of which are applicable to breaks for other purposes.
2323	„	Henry Bessemer, of Queen Street Place, New Cannon Street, in the city of London.	Improvements in metal beams, girders, and tension bars used in the construction of roofs, floors, and other parts of buildings, and in the construction of viaducts and suspension and other bridges.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2324	17th Oct. 1855.	William Henry Walton, of the city of Glasgow, in the county of Lanark, Engineer.	An improved machine for carding, combing, or preparing fibrous substances.
2329	,,	John Talbot Pitman, of the American and European Patent Offices, 67, Gracechurch Street, London.	An improvement in fire arms.
2330	,,	Thomas Taylor, of the Patent Saw Mills, Manchester, in the county of Lancaster.	Improvements in apparatus for extinguishing fire by means of water, part of which is also applicable to governing the discharge of fluids for other purposes.
2332	,,	Thomas Richards Harding, of Leeds, in the county of York, Hackle, Comb, and Gill Manufacturer.	Improvements in combs, gills, and hackles used in the preparing and manufacturing of flax, silk, wool, or other fibrous substances, and in combs for combing the human or other hair.
2333	18th Oct. 1855.	Charles Edwin Jones, of Huddersfield, in the county of York, Gentleman.	Certain improvements in machinery for raising water and other liquids by means of a combination of the principle of the accumulation of force by compression of air or other elastic fluids, and that of centrifugal force the more readily to obtain increased mechanical power thereby.
2334	,,	John Wakefield, of Birmingham, in the county of Warwick, Machinist.	Improvements in machinery used in the manufacture of screw-blanks, nails, pins, rivets, and other similar articles.
2335	,,	William Glass, Analytical Chemist, 2, Dublin Cottages, Millwall, Poplar.	Improvements in obtaining a deodorizing and disinfecting material.
2339	,,	John Cheesman Wagstaff, of 20, Grosvenor Street, in the county of Middlesex.	Improvements in the manufacture of seamless garments and other seamless fabrics.
2340	,,	John Davie Morries Stirling, of the Larches, near Birmingham.	Improvements in coating silver, copper, zinc, and iron, and alloys of those metals.
2341	19th Oct. 1855.	John Smith, of No. 32, Brydges Street, Covent Garden, in the county of Middlesex, Gentleman.	Improvements in the construction of bedsteads, such improvements being applicable to carriages, ambulances, and other articles.
2347	,,	Henry Giller, of Southampton Street, in the city of Westminster, Manufacturer.	An improvement in globes and shades for gas and other lights.
2349	,,	William Field and Edward Jeffreys, both of Shrewsbury, in the county of Salop, Gentlemen.	Improved means for securing the rails of railways in their chairs or bearings.
2350	20th Oct. 1855.	Thomas Craven, Manager of a Mill, and Matthew Pickles, Overlooker, both of Birstall, in the county of York.	Improvements in weaving.
2351	,,	Pierre Arnaud Massip of 39, Rue de l'Echiquier, Paris, and 4, South Street, Finsbury, London, Gentleman.	A machine for preparing hat linings.
2352	,,	Pierre Antoine Henry Parant, Ceramic Materials and China Ware Manufacturer, in Limoges, France.	Improvements in manufacturing millstones.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2355	20th Oct. 1853.	Frederic Whitaker, of Murray Street, New North Road.	Improvements in the construction of sewing machines.
2357	,,	Henry Woodrow, of Wood Street, Cheapside, in the city of London, Shirt Manufacturer.	Improvements in shirts.
2358	22nd Oct. 1855.	William Teall, of Wakefield, in the county of York, Engineer.	A mode of treating certain materials containing fatty or oily substances, in order to extract those fatty or oily substances therefrom.
2360	,,	Alexander McGlashan and Edward Field, both of the Coal Yard, Drury Lane, London, Engineers.	Improvements in printing presses.
2361	,,	Charles Lenny, of Croydon, in the county of Surrey.	Improvements in carriages.
2362	,,	Pierre Alexandre Leroux, Chemist, and Louis Réne Martin, Merchant, both of Paris, in the empire of France.	Combining a resinous matter, with oils or fatty bodies, in order to obtain various useful products therefrom.
2363	,,	Vincent Scully, Esquire, and Bennett Johns Heywood, Gentleman, both of the city of Dublin.	Improvements in clips or holders for suspending railway tickets and other small articles.
2366	23rd Oct. 1855.	Alfred Gregory, of 21, Church Street, in the Parish of Christchurch, in the county of Surrey, Plumber, and John Jillings, of 6, Temple Street, Whitefriars, in the city of London.	Improvements in cleansing the basin or pan of waterclosets, and in apparatus for the same.
2369	,,	John Bellamy, of the Lower Road, Islington, in the county of Middlesex.	Improvements in graining, and in producing imitative ornamental surfaces and in certain instruments or apparatus to be employed for such purposes.
2370	,,	Thomas Roberts and John Dale, of Manchester, Manufacturing Chemist, in the county of Lancaster.	Certain improvements in treating and preparing amylecious substances for the purposes of stiffening.
2371	,,	Thomas Richardson, of Portland Place, Newcastle-on-Tyne.	Improvements in the manufacture of glass and clay-wares.
2374	,,	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improvements in machinery for making rope and cordage.
2378	24th Oct. 1855.	John Healey, Engineer, and John Foster, and John Lowe, Spindle Makers, all of Bolton-le-Moors, in the county of Lancaster.	Improvements in machinery to be used for drawing, moulding, forming and forging various articles of metal.
2381	,,	John Edwin Mayall, of 224 and 226, Regent Street, in the county of Middlesex, Photographic Artist.	Improvements in photography.
2383	,,	Charles Crickmay, of Lambeth, in the county of Surrey, and Frederic Joseph Clowes, of Camberwell, in the same county.	Improvements in the manufacture of guns, pistols, and gun stocks, and in cutting and carving wood, metals, minerals, and other materials by machinery.
2386	25th Oct. 1855.	Alfred Ardouin, of 5, Woodland Street East, Greenwich, in the county of Kent, Shipwright and Carpenter.	A corking and capsuling machine.

No. of Register	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2387	25th Oct. 1855.	Henry Tritton, of Great Grimsby, Lincolnshire, Esquire.	An improved safety apparatus for the protection of persons while painting the exterior of buildings and cleaning windows, which may be used as a balcony for holding flowers.
2389	„	James Platt, of Oldham, in the county of Lancaster, Mechanical Engineer, and John Whitehead, of the same place, Foreman.	Improvements in machinery or apparatus for preparing clay for the manufacture of bricks.
2390	„	Joseph Robinson, of Aldersgate Street, Watch Maker, in the employ of William Mott, of 36, Cheapside, London.	Certain improvements in winding clocks.
2391	„	John Andrew Richards, of 10, Tyers Gateway, Bermondsey Street, in the county of Surrey.	Improvements in producing the hard grain on leather.
2393	26th Oct. 1855.	John Pinches, of Oxendon Street, Haymarket, in the county of Middlesex, Die Sinker.	Improvements in the construction of dies or stamps for marking papers, linen, or other substances.
2395	„	Edwin Pugh, of Chartham, in the county of Kent.	Safety alarum and signal apparatus.
2396	27th Oct. 1855.	Joseph Charles Frederick Baron de Kleinsorgen, of No. 3, Sidmouth Street, in the county of Middlesex.	An improved variation and azimuth compass.
2397	„	Edward Stark, of Monkton, in the Isle of Thanet, Plumber and Glazier.	Improvements in pens for writing.
2398	„	Henry Wyatt, of 58, Pall Mall, London, in the county of Middlesex.	A peculiar apparatus for more rapidly and perfectly manœuvring or steering steam ships of war or of commerce, which is entitled The Transpulsor.
2400	„	John Davie Morries Stirling, of Black Grange, Clackmannen, N. B.	Improvements in the manufacture of cast steel tubes and cylinders, applicable especially in the manufacture of cannon, mortars, and other guns, also steam and other cylinders.
2403	„	Peter Cranke Wood, of Guildford Street East, in the county of Middlesex, Mineral Surveyor.	Improved machinery for preparing or scutching flax and other analogous fibrous substances.
2406	„	John James Speed, jr., of the city of Detroit, state of Michigan, United States of America.	Improvements in car and carriage springs.
2413	29th Oct. 1855.	Germain Jean Paul Marie Villeroux, of Paris, in the empire of France.	Certain improvements in the manufacturing of soap.
2417	30th Oct. 1855.	Paul Emile Chappius, of 69, Fleet Street, and 10, St. Mary Axe, city of London.	Improvements in reflectors for the diffusion of artificial light.
2422	„	Jules Jean Baptiste Sylvain Martin de Lignac, Gentleman, of Paris, in the empire of France.	An improved mode of preserving animal substances.
2423	31st Oct. 1855.	William Henry Walenn, of 46, Regent Street, London, county of Middlesex.	Self-acting attachment to be applied to gates.
2424	„	Robert Griffiths, Journeyman Joiner, of Lower Broughton, Manchester, in the county of Lancaster.	A compound and exact measurement tap, applicable to the measurement of every kind of liquor or liquid.
2425	„	James Gray Lawrie, of Glasgow, Engineer.	Improvements in shipbuilding, to facilitate the use of water as ballast.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2426	31st Oct. 1855.	Thomas Webster Rammell, of Trafalgar Square, in the county of Middlesex.	Improvements in preparing black lead, chalk, and other materials used for drawing, writing, and marking.
2431	,,	Richard Pannell Forlong, of the city of Bristol, Manure Manufacturer.	An improved manufacture of manure.
2432	,,	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improvements in the manufacture of gas.
2435	1st Nov. 1855.	Henry Laxton, of the firm of William and Henry Laxton, of 19, Arundel Street, Strand, London, Patent Agent.	Improvements in gearing for increasing or decreasing rotary speed.
2436	,,	Richard Reeves Cox, of Fareham, in the county of Hants, Coal Merchant.	Improvements in the manufacture of artificial fuel.
2440	,,	John Pinches, of Oxendon Street, Haymarket, in the county of Middlesex, Die Sinker.	An improved machine or apparatus for embossing paper, metal, and other substances by hand.
2443	,,	Robert Kerr, of Glasgow, in the county of Lanark, North Britain, Manufacturer.	Improvements in spinning together fibrous materials of different kinds.
2444	,,	Lewis Normandy, of 67, Judd Street, Brunswick Square, in the county of Middlesex, Civil Engineer.	Improvements in securing the rails in railways.
2445	,,	William Henry Walenn, of 46, Regent Street, London, county of Middlesex.	Certain improvements in pianofortes.
2446	,,	Edwin Thomas Truman, of Old Burlington Street, in the county of Middlesex, Dentist.	Improvements in palates or holders for artificial teeth.
2447	2nd Nov. 1855.	Isham Baggs, of Pentonville, London, Engineer, and Henry Forfar Osman, of 33, Essex Street, Strand, London.	Improvements in steam engines and in engines generally which are worked either by gas, air, or vapour, and in apparatus for generating electricity for effecting parts of said improvements, and for other purposes.
2448	,,	John Cottrill, of Great Lever, near Bolton, in the county of Lancaster, Bleacher.	Improvements in machinery or apparatus for washing, scouring, dyeing, sizing, and cleaning woven fabrics and yarns.
2456	3rd Nov. 1855.	James Smith Cottrill, of Great Lever, near Bolton, in the county of Lancaster, Bleacher.	Improvements in machinery or apparatus for washing, scouring, dyeing, sizing, and cleaning woven fabrics and yarns.
2457	,,	James Heginbottom, of Ovenden, in the parish of Halifax, in the West Riding of the county of York, Cotton Spinner.	Improvements in furnaces and apparatus for generating steam, whereby the smoke will be consumed and the fuel economized.
2458	,,	James Eastwood, of Mill House, Midgley, in the West Riding of the county of York, Worsted Spinner and Manufacturer.	Certain machinery or apparatus for taking out the slubs, noils, and knots from worsted sliver, slubbing and roving.
2459	,,	James Pattison, of the city of Glasgow, in the county of Lanark, Merchant.	Improvements in machinery for dressing and finishing woven goods and fabrics.
2460	,,	George Davis, of Southampton, in the county of Southampton, Plumber.	Improvements in apparatus for letting in or shutting off water or other liquids.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2462	3rd Nov. 1855.	William Robertson, of Oakfield Foundry, Iron Founder, and James Henry, Machine Maker, both of Edinburgh, Scotland.	Improvements in machinery for reaping and mowing corn or other agricultural porduce.
2464	,,	James Greenshields, of Glasgow, in the county of Lanark, North Britain, Manufacturer.	Improvements in the manufacture or production of drying oleaginous compounds.
2465	,,	Thomas Ridgway Bridson, of Bolton-le-Moors, in the county of Lancaster.	Improvements in preparing, beetling, or finishing textile fabrics.
2467	,,	William Prior Sharp and William Weild, both of the city of Manchester, in the county of Lancaster, Silk Manufacturers.	Improvements in the reeling or winding of cocoons, and in the manufacture of silk threads, and in machinery and apparatus for these purposes.
2468	,,	Fennell Allman, of Cambridge Terrace, in the county of Middlesex, Consulting Engineer.	Certain improvements in apparatus for the production of steam.
2473	5th Nov. 1855.	Robert Spring Garden, of Piccadilly, in the county of Middlesex, Army Accoutrement Maker.	Improvements in the manufacture of hats.
2474	,,	John Hicks, of Bedford Place, Clapham Rise, in the county of Surrey, Civil Engineer.	An improved gauge valve, applicable to boilers of steam-engines, and to other purposes.
2475	,,	Arthur Dobson, of Belfast, in the county of Antrim, in Ireland, Bleacher.	Improvements in preparing certain unbleached linen fabrics.
2476	,,	Francis Hawkes, the elder, Surveyor, of West Street, in the parish of Saint Lawrence, Reading, in the county of Berks.	Improvements in the construction and arrangement of water-closet apparatus.
2478	,,	Henry Clinton Page, of No. 1, Commercial Road South, Pimlico, in the county of Middlesex, Sculptor.	An improved method of indurating marble and stone, and of permanently fixing colours therein when colouring matters are applied thereto, for producing a variegated pattern or device on the surface thereof.
2479	,,	William Henry Walenn, of No. 46, Regent Street, London, in the county of Middlesex, Civil Engineer.	An improved mode of flattening cylinder glass.
2481	,,	George Burridge, of Great Portland Street, in the county of Middlesex, Architect.	Improvements in the preparation of glass for ornamental purposes.
2482	,,	Peter McGregor, of the town and county of Dumbarton, North Britain, Joiner.	Improvements in water-closets.
2483	,,	George Baring Locke, of Notting Hill, Kensington, in the county of Middlesex, Railway Clerk.	Apparatus, apparatuses, or mechanism for placing detonating or fog signals on the rails of railways to be exploded thereon and for removing the same therefrom whenever required.
2485	,,	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improved apparatus for cooling and drying flour.
2488	6th Nov. 1855.	Joseph Jessop, of Lascelles Hall, near Huddersfield, in the county of York, Manufacturing Chemist.	Improvements in the construction of furnaces and boilers.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2489	6th Nov. 1855.	Frederic Ludewig Hahn Danchell, of No. 4, Arthur Terrace, Caledonian Road, Islington, in the county of Middlesex, Civil Engineer.	Certain improvements in apparatus for ascertaining the pressure of steam, air, water, or any other fluid or liquid.
2490	„	Richard Goose, of Birmingham, in the county of Warwick, Manufacturer.	Improvements in the manufacture of cut nails.
2491	„	Joseph Schloss, of Wellington Chambers, Cannon Street West, London, county of Middlesex.	A new mounting for travelling bags.
2493	„	Samuel Cunliffe Lister, of Manningham, near Bradford, York.	Improvements in weaving pile fabrics.
2495	„	Edward Jeffreys, of Shrewsbury, Engineer.	An improvement in the construction of furnaces.
2496	7th Nov. 1855.	George Cotsell, of Brompton, in the county of Kent.	An improved gutter and kerb for roads and streets.
2497	„	Charles Hanson, of Pimlico, in the county of Middlesex, Gun Smith.	Improvements in fire-arms.
2499	„	Joseph Haley, of the city of Manchester, in the county of Lancaster, Engineer.	Improvements in the buffers and spring draw bars of waggons or other railway vehicles, and in the application of the same.
2500	„	Frederick Scholefield, of the city of Manchester, in the county of Lancaster, Machinist.	Improvements in machinery or apparatus for cutting paper, cardboard, and similar materials.
2502	„	William Kenworthy, of Blackburn, in the county of Lancaster, Manufacturer.	Certain improvements in steam engine valves, and in the mode of working the same.
2505	„	William Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of Glasgow, in the county of Lanark, North Britain, Civil Engineer.	Improvements in the manufacture and application of prussiates and other colouring matters.
2506	„	John Wakefield, of Inchicore Works, in the county of Dublin, Engineer.	Improvements in machinery for working the slides and steam valves of engines driven by steam or other elastic fluid.
2508	„	Charles Marie Pouillet, Civil Engineer, of Paris, in the French empire.	Certain improvements in railways.
2510	„	Thomas Godding, of Ipswich, in the county of Suffolk, Stay Maker.	Improvements in the fastening for stays, corsets, and bands.
2511	„	Charles Allen Browne, of the state of Massachusetts, of the United States of America.	A machine for manufacturing bricks.
2513	„	George Tomlinson Bousfield, of Sussex Place, Loughborough Road, Brixton, in the county of Surrey.	Improvements in wrought iron shafts for steam boats and other purposes where great strength is required.
2520	9th Nov. 1855.	John Olive and William Olive, both of Woolfold, near Bury, in the county of Lancaster, Railway Carriage Builders.	Improvements in the manufacture of wheels for railway and other purposes.
2521	„	John Raywood, Engineer, of Wentworth, in the county of Yorkshire.	An improved rolling, dibbling, sowing, and harrowing machine for wheat and other agricultural produce.
2523	„	Henry Fletcher, of the city of Manchester, in the county of Lancaster, Engineer.	Improvements in the manufacture of nuts, bolts, and other similar articles, and in the machinery or apparatus for making the same.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2525	9th N v. 1855.	William Henry Walenn, of No. 46, Regent Street, London, in the coun t Middlesex, Civil Engineer.	Certain new and useful improvements in looms for weaving seamless bags, and other open double fabrics of a similar character.
2526	„	Charles Joseph Hampton, of Llynrivale, in the parish of Llangynwyd, and county of Glamorgan, Manager of Ironworks.	Improvements in the manufacture of iron.
2529	10th Nov. 1855.	William Henry Bentley, of Bedford, in the county of Bedford, Engineer.	Improved cannon, guns, and other fire arms and appendages thereto, and in the capsules, cartridges, and projectiles for the same and other fire arms.
2530	„	Joseph Scott, of the city of Glasgow, in Scotland, Glass Merchant.	Improvements in corking bottles, jars, and other receptacles.
2536	12th Nov. 1855.	Jules César Alexandre Bouillotte, of Paris, in the empire of France.	An improved letter copying press.
2537	„	Louis Joseph Frederic Margueritte, Chemist, of Paris, in the empire of France.	Certain improvements in the manufacture of vitreous products.
2538	„	William Kemble Hall, of 36, Cannon Street, London, Engineer.	The prevention of steam boiler explosions.
2542	„	John Yuil Borland, of the city of Manchester, in the county of Lancaster.	Improvements in spinning and machinery for preparing and spinning fibrous materials.
2546	„	John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of Glasgow, North Britain, Gentleman.	Improvements in casting metals.
2551	13th Nov. 1855.	Fischer Alexander Wilson, of Adelphi Chambers, London, Gentleman.	Improvements in engines, machinery, and apparatus for exhausting, forcing, and lifting, for propelling on land and water.
2554	„	William Webb, and John Webb, junior, of Birmingham, in the county of Warwick, Builders, and James Catstree, of the same place, Brassfounder.	Improvements in attaching door knobs to spindles.
2557	„	Robert Murdoch, of Cranhill, Glasgow, in the county of Lanark, North Britain, Surveyor.	Improvements in agricultural apparatus for sowing seeds and depositing manure.
2558	„	William Foster, of Black Dike Mills, near Bradford, in the county of York, Spinner and Manufacturer.	Improvements in machinery or apparatus for drying wool and other fibrous materials.
2560	14th Nov. 1855.	Henry Laxton, of the firm of William and Henry Laxton, of the Office for British and Foreign Patents, No. 19, Arundel Street, Strand, London, Architect and Civil Engineer.	Improvements in fire-arms.
2562	„	Thomas Skinner, of Sheffield, in the county of York, Silver Plater.	Improvements in producing figures or ornaments upon the surfaces of metals.
2563	„	William Barnes, of 2, Royal Exchange Buildings, in the city of London.	An improvement in connecting and supporting the ends of the rails of railways.
2565	„	Joseph Robinson, of Denton Mills, Carlisle.	Improvements in machinery for drying wheat and other grain.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2566	14th Nov. 1855.	Cyprien Marie Tessié du Motay, of Paris.	Improvements in the treatment of fatty and oily matters.
2567	,,	Charles Goodyear, of 42, Avenue Gabrielle, Paris.	Improvements in shoes and boots when india rubber is used.
2568	,,	George Tomlinson Bousfield, of Sussex Place, Loughborough Road, Brixton, in the county of Surrey.	An improved safety coal hole cover.
2571	,,	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	An improved manufacture of electrotype printing surfaces.
2572	,,	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improvements in the construction of locks.
2575	15th Nov. 1855.	Franz Duncker, of Berlin, in the kingdom of Prussia, but now of 4, King William Street, Strand.	A new instrument for electric telegraphs, called "despatch distributor," which will permit despatches of various contents being communicated at the same time to one or more stations by means of one or two line wires only.
2578	,,	William Lea, of the firm of William and John Lea, of Wolverhampton, in the county of Stafford, Manufacturer.	An improvement or improvements in taps or cocks.
2580	,,	Duncan Morrison, of Bordesley Works, Birmingham.	An improvement in the manufacture of articles with internal screws when cast iron, malleable cast iron, or cast brass is employed.
2584	16th Nov. 1855.	William Cooke, of 49, Frederick Street, Gray's Inn Road, in the county of Middlesex, Civil Engineer.	An improved apparatus for cleaning knives and other cutlery."
2585	,,	William Eassie, of the city of Gloucester, Railway Contractor.	Improvements in hammers.
2593	17th Nov. 1855.	Joseph Denton, of Pendleton, near Manchester, in the county of Lancaster.	Improvements in looms.
2595	,,	Robert Walter Swinburne, of South Shields, in the county of Durham, Plate Glass Manufacturer.	Improvements in furnaces used in the manufacture of glass.
2596	,,	Joseph Shaw, of 22, New King Street, Hull, Yorkshire.	Improvements in the prevention of accidents arising from collisions on railways.
2598	,,	George Collier, of Halifax, and James William Crossley, of Brighouse, both in the county of York.	Improvements in finishing fabrics and in treating yarns, part of which improvements is also applicable to producing ornamental effects upon other surfaces.
2600	19th Nov. 1855.	John Fleetwood, of Elm Grove House, Southsea, in the county of Southampton, Gentleman.	An improved portable apparatus for making malt, and for drying hops, corn, and other grains and seeds.
2601	,,	Josiah Pratt, of Bath Street, City Road, in the county of Middlesex, and Thomas Radcliffe, of Shaftesbury Street, Hoxton, in the said county of Middlesex.	Improvements in the manufacture of brushes.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2604	19th Nov. 1855.	Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent.	Improvements in apparatus for measuring liquids which may also be employed as a motive-power engine.
2606	„	Jeanne Barbe Ve. Lopez, 57, Rue de Bretagne, Paris, in the empire of France.	An antibilious powder.
2613	20th Nov. 1855.	Francis Puls, of Soho Square, in the county of Middlesex, Chemist.	A new electric light and heat.
2615	„	Peter Armand le Comte de Fontaine Moreau, of No. 4, South Street, Finsbury, London, and 39, Rue de l'Echiquier, Paris, Patent Agent.	Improvements in apparatus for preventing horses from running away.
2616	„	Charles Frederick Clark, of the firm of Thomas and Charles Clark and Co., Iron-founders, of Wolverhampton, in the county of Stafford, and Manoah Bower, Gentleman, of Birmingham, in the county of Warwick.	Improvements in bolts and fastenings, which they propose calling "Clark and Co's. Longitudinal Wedge Bolt."
2620	„	Oliver Maggs, of Bourton Foundry, Dorset.	Improvements in machinery for thrashing and winnowing wheat and other grain.
2621	„	George Senior Tolson, Robert Henry Tolson, and Joseph Senior Tolson, all of Dalton, in the parish of Kirkheaton, in the county of York, Manufacturers, and Thomas Irving, of Mold Green, in Dalton aforesaid, Dyer.	Improvements in producing metallic lustre to yarns and fabrics.
2626	21st Nov. 1855.	Peter Armand le Comte de Fontaine Moreau, of No. 4, South Street, Finsbury, London, and 39, Rue de l'Echiquier, Paris, Patent Agent.	Improvements in treating fatty acids.
2627	„	William Munslow, of Miles Platting, in the county of Lancaster, Moulder, and Henry Wallwork, of the same place, Moulder.	Improvements in railways.
2628	„	Henry William Wimshurst, of St. John's Wood, in the county of Middlesex, Gentleman.	Improved machinery for cutting dovetails and tenons.
2630	22nd Nov. 1855.	Alexandre Tolhausen, of No. 7, Duke Street, Adelphi, London, in the county of Middlesex, Sworn Interpreter at the Imperial Court of Paris.	Certain improvements in bombs and other explosive projectiles whose charges are to be fired by percussion.
2632	„	George Price, of Cleveland Safe Works, Wolverhampton, in the county of Stafford, Fire-proof Safe Manufacturer.	A box, chest, or case for the preservation of parchment deeds and documents from damage by steam when placed inside an iron safe made fire-proof on the vapourizing principle, "Milner's Patent, 1840."
2640	23rd Nov. 1855.	Thomas Tuckey, of the city of Cork, Barrister-at-Law.	Modes of construction by which steam or other vapour or gas may be used as a source of motive-power, for some purposes more conveniently than hitherto and more suitably for locomotion on common roads.
2642	„	John Pursloe Fisher, of Edgbaston, near Birmingham, in the county of Warwick.	Certain improvements in the construction of the hammers of pianofortes.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2643	23rd Nov. 1855.	JOHN HENRY HUTCHINSON, of East Retford, in the county of Nottingham, Gentleman.	Improved machinery for converting rectilinear motion into rotary motion.
2644	„	JOSEPH ELLISDON, of Liverpool, in the county of Lancaster, Designer and Cabinet Maker.	Improvements in "castors" for cabinet furniture.
2646	„	SAMUEL CUNLIFFE LISTER, of Bradford, and JAMES WARBURTON, of Addingham, both in the county of York.	Improvements in spinning.
2647	24th Nov. 1855.	JOHN ELCE, of the city of Manchester, Machine Maker, and GEORGE HAMMOND, of the same place, Watch Maker.	The employment of a new material in the manufacture of wicks for moderator lamps.
2648	„	SAMUEL RATCLIFFE CARRINGTON, of Stockport, in the county of Chester, Hat Manufacturer.	Certain improvements in the manufacture of hats.
2649	„	JEAN LOBSTEIN, of Paris, 36, Rue de l'Echiquier, Mechanical Draughtsman.	Improvements in sewing machines.
2652	„	JULIANA MARTIN, of Soho Square, London.	An improved self-acting incubator.
2654	„	HIRAM HYDE, of Truro, Nova Scotia, Gentleman.	Improvements in the manufacture of mineral oils.
2655	26th Nov. 1855.	LOUIS JOSEPH FRÉDÉRIC MARGUERITTE, Chemist, of Paris, in the empire of France.	Improvements in precipitating certain salts.
2656	„	DENIS JONQUET, of 63, Mina Road, Old Kent Road, Southwark, in the county of Surrey, Cutler.	Improvements in the blades of mechanical cutting machines, and in the blades of single or double handled cutting instruments, and in the blades of ordinary and mechanical shears and scissors, and in the handles and springs for the same.
2658	„	ENOCH HARRISON and HILTON GREAVES, of the city of Manchester, in the county of Lancaster, Manufacturers.	Improvements in the manufacture of woven fabrics.
2661	„	FREDERICK OSBOURN, of Aldersgate Street, in the city of London, Tailor.	Improved machinery for pressing, smoothing, or finishing garments or parts of garments.
2665	„	ROBERT BELL, of 93, Glassford Street, Glasgow.	Improvements in the manufacture of woven fabrics when made of wool and cotton or of wool, cotton, and silk.
2666	27th Nov. 1855.	THOMAS ALLAN, of Adelphi Terrace, in the city of Westminster, Civil Engineer.	Improvements in applying electricity.
2668	„	HIRAM HYDE, of Truro, Nova Scotia, Gentleman.	An improved manufacture of lubricating compound.
2669	„	HIRAM HYDE, of Truro, Nova Scotia, Gentleman.	An improved manufacture of lubricating oil.
2670	„	ENOCH TAYLER, of 62, Baldwin's Gardens, Gray's Inn Lane, London.	Improvements in paddle wheels for propelling vessels in water.
2671	„	CHARLES RICE, of the state of Massachusetts, of the United States of America.	A new or improved method of manufacturing boots or shoes.
2672	„	EEWARD PEYTON and DUNCAN MORRISON, of Bordesley Works, Birmingham.	Improvements in the construction of metallic bedsteads and other articles to sit or recline upon.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2673	27th Nov. 1855.	CHARLES RICE, of the state of Massachusetts, of the United States of America.	A new or improved process of preparing cloth, so as to render it nearly, if not entirely, impervious to water, but not so to air, such cloth being particularly useful in the manufacture of boots and shoes, or various other articles of dress or utility.
2675	,,	GEORGE LOUIS STOTT, of St. George's, in the county of Gloucester.	Improvements in the manufacture of carbonate of soda.
2677	,,	JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of Glasgow, North Britain, Gentleman.	Improvements in windlasses, capstans, and other purchases, parts of which are applicable to the transmission of motive power.
2679	,,	JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of Glasgow, North Britain, Gentleman.	Improvements in the manufacture or preparation of india rubber and gutta percha, and in the applications thereof.
2680	,,	THOMAS WARREN, of Glasgow, in the county of Lanark, North Britain, Glass Manufacturer.	Improvements in the manufacture and moulding or shaping of glass.
2684	28th Nov. 1855.	GEORGE RICHARDSON, of Craig's Court, Charing Cross, in the county of Middlesex, Merchant, and Contractor for Railway plant and stores.	Improvements in buffer draw and bearing springs for railway carriages and waggons.
2685	,,	BENJAMIN ROSENBERG, of New Charles Street, City Road, in the county of Middlesex, Merchant.	Improvements in protecting metallic and other surfaces from corrosion and decay.
2688	,,	WILLIAM ALFRED DISTIN, of 31, Cranbourn Street, Leicester Square, in the county of Middlesex.	Improvements in cornets and other wind musical instruments.
2693	29th Nov. 1855.	THOMAS SYMONS, of Flushing, in the county of Cornwall.	Improvements in the permanent ways of railways, and in the wheels rolling thereon.
2694	,,	WILLIAM IRLAM, of the Gibralter Iron Works, Newton Heath, near the city of Manchester, Engineer.	Improvements in crossings for railways.
2695	,,	JAMES EGLESON, ANDERSON GWYNNE, of Essex Wharf, Essex Street, Strand, in the county of Middlesex, Engineer.	Improvements in instruments for indicating pressure or vacuum.
2697	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	An improved process of manufacturing hats.
2698	,,	GEORGE NORTH, of Lewisham Road, Greenwich, in the county of Kent, Coach Builder, &c.	An improved portable apparatus for supporting and folding heads, tilts, coverings, and awnings of wheel carriages, marine vessels, goods and ways.
2700	30th Nov. 1855.	JOHN RAMSBOTTOM, of Accrington, in the county of Lancaster, Engineer, and JOHN CHARLES DICKINSON, of Blackburn, in the same county, Machine Maker.	Improvements in machinery or apparatus for measuring and registering water and other fluids, and obtaining motive power from the same.
2702	,,	EDWARD DANIEL JOHNSON, of Wilmington Square, in the county of Middlesex, Watch Manufacturer.	An improvement in the construction of attachable seconds watches.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2703	30th Nov. 1855.	Auguste Dusautoy, of Boulevart des Italiens, Paris, in the empire of France, and of 46, Regent Street, Middlesex.	New and useful machinery for cutting cloth and other substances.
2704	,,	Richard Hancock, of Great Polgooth Mine, in the parish of St. Austell, Cornwall.	Cleaning and separating ores of every description when brought into a state of low pulverization.
2711	1st Dec. 1855.	Sir Charles Edward Grey, residing at No. 38, Rue du Mont Thabor, in the city of Paris, and empire of France.	The use of a new vegetable material for raising the nap and dressing woollen cloths and webs and tissues.
2713	,,	William Augustus Woodley, of the Lithographic and General Printing Offices, Taunton, in the county of Somerset.	Improvements in the manufacture of paper bags.
2714	3rd Dec. 1855.	George Harrison, of Burnley, in the county of Lancaster, Overlooker, and William Mitchell the younger, of Hoarstone Lodge, near Burnley aforesaid, Wool Stapler.	Improvements in machinery for roving, spinning, and winding worsted, cotton, and other fibrous materials.
2715	,,	David Anderson, of Strandtown House, in the county of Down, Ireland, Merchant.	Improvements in machinery or apparatus for the preparation or manufacture of felt and other fibrous materials.
2717	,,	Frederick Walton, of Wolverhampton, in the county of Stafford, Manufacturer.	An improvement or improvements in papier mâché trays.
2718	,,	Westley Richards, of Birmingham, in the county of Warwick, Manufacturer, and Joseph Rock Cooper, of Birmingham aforesaid, Manufacturer.	An improvement or improvements in breech-loading fire-arms.
2721	,,	Alexander Watt, of 83, Dean Street, Soho, Electro Metallurgist.	An improvement in coating iron and steel with zinc.
2723	4th Dec. 1855.	Samuel Garn, of Sevenhampton, in the county of Wiltshire, Wheelwright.	An improved tipping apparatus, applicable to carts and other vehicles.
2725	,,	William Hartcliffe, of Salford, in the county of Lancaster, Machine Maker.	Certain improvements in weighting the top rollers of machinery used in preparing and spinning cotton and other fibrous materials.
2726	,,	William Foot, of Wellington, in the county of Somerset.	An instrument for moving and stopping trucks and other carriages on railways.
2728	,,	Jean Davoust, of the Hotel des Invalides, Paris.	Improvements in cartridges.
2730	,,	John Marsh, of Nottingham - -	Improvements in the manufacture of looped and piled fabrics.
2731	5th Dec. 1855.	Adam Bullough, of Blackburn, in the county of Lancaster, Manufacturer.	An improved lubricator for looms.
2733	,,	William George Plunkett, of Belvidere Place, Dublin, Gentleman, and John Bower, of Lower Ormand Quay, Dublin, Civil Engineer.	The manufacture of fibres or threads for textile fabrics and cordage, also of paper mill-board and other similar boards from plants or portions of plants not hitherto used for these purposes.
2734	,,	William Nunn, of No. 7, Church Street, Hackney, Middlesex, Picture Frame and Looking Glass Manufacturer.	An improved table, wash stand, mirror, &c. combined in one piece of furniture.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2736	5th Dec. 1855.	WILLIAM BEATSON, of Rotherham, in the county of York, Manufacturing Chemist.	Improvements in treating borates of lime and magnesia, and a new composition formed therewith suitable for glazing and other purposes for which borax has been or may be employed.
2737	,,	CAESAR HEILMANN, of 22½, Milk Street, Cheapside, London, Engineer.	Improvements in grates or furnaces for steam boilers.
2739	,,	WILLIAM HENRY SMITH, of Wellington Chambers, Cannon Street West, in the city of London, Merchant.	An improved construction of fastening, applicable to gaiters, stays, and other like articles.
2740	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improvements in apparatus for dressing cloth.
741	6th Dec. 1855.	JONAS MARLAND, of Sun Vale Iron Works, Walsden, in the county of Lancaster, and SAMUEL MARLAND, also of Sun Vale Iron Works, Walsden, in the county of Lancaster.	Certain improvements in power looms.
2743	,,	WILLIAM GEORGE WILSON, of Penton Cottage, Penton Place, Newington Butts, Zinc and Tin Plate Worker.	A pneumatic moderator.
2744	,,	WILLIAM MOSLEY, of Salford, in the county of Lancaster, Bleacher.	Improvements in machinery or apparatus for stretching and finishing woven fabrics.
2747	,,	EBENEZER POULSON, of 21, Judd Street, Brunswick Square, in the county of Middlesex, Marine Artist.	A new constructed engine to be worked either by steam or principally by manual labour.
2752	,,	JOHANNES NEUENSCHWANDER, of the Canton of Bern, in Switzerland, and Proprietor of the Whey Establishment of Harostehude, near Hamburg.	Certain improvements in the process of preparing what is called "Swiss whey" from milk.
2754	,,	THOMAS RUSSELL CRAMPTON, of the Adelphi, in the county of Middlesex, Civil Engineer.	An improvement in furnaces, and in apparatus for supplying fuel thereto.
2755	,,	ANGIER MARCH PERKINS, of Francis Street, Gray's Inn Road.	Improvements in apparatus for generating steam.
2757	,,	ANGIER MARCH PERKINS, of Francis Street, Gray's Inn Road.	Improvements in warming buildings and apartments by hot water.
2758	7th Dec. 1855.	JEAN JOSEPH EMILIEN FRANÇOIS KUISTER, of Lyons, in the empire of France.	Improvements in raw silk winding machinery.
2760	,,	HENRY HART, of No. 5, Waterloo Crescent, Dover, in the county of Kent, Gentleman.	A ship leakage indicator.
2762	,,	JAMES GARDNER, of Plaistow, in the county of Essex, Gentleman, HENRY GARDNER, of Leytonstone Road, in the same county, Gentleman, and JOHN CAREY GARDNER, of Leytonstone Road aforesaid, Gentleman.	Improvements in glasses, as applied for the transmission of light.
2764	,,	CHARLES LENNY, of Croydon, in the county of Surrey.	Improvements in carriages.
2766	,,	JOHN ALLEN WILLIAMS, of Baydon, in the county of Wilts, Farmer.	Improvements in machinery or apparatus for cultivating land.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2772	8th Dec. 1855.	Joseph Hacking, of Bury, in the county of Lancaster, Machinist.	Improvements in machinery for supplying fuel and air to furnaces.
2773	,,	Charles Francois Jules Fonrobert, of Berlin, in the kingdom of Prussia.	An artificial leech and a sucker.
2774	,,	John Radcliffe, of Rotherham, in the county of York, Grocer, and Thomas Vickers Favell, of the same place, Gentleman.	Improvements in machinery or apparatus for cutting sugar and other substances.
2775	,,	William Norton, of Kirkburton, in the county of York, Manufacturer.	Improvements in weaving pile fabrics.
2778	,,	Andrew Maclure, of 37, Walbrook, in the city of London.	Improvements in lithographic printing presses.
2780	10th Dec. 1855.	John Hall, the younger, of Mouut Pleasant, Walmersley, near Bury, in the county of Lancaster, Spinner and Manufacturer.	Improvements in Jacquard looms.
2782	,,	Thomas Heppleston, of Manchester, in the county of Lancaster, Machinist, and John Hunter, of the same place, Machinist.	Certain improvements in machinery or apparatus for stretching and finishing yarns or threads.
2784	,,	David Parsons, of Pensnett, near Dudley, in the county of Worcester.	An improved break for arresting or retarding at will the motion of locomotive and other engines and revolving machinery.
2786	,,	Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent.	Improvements in manufacturing gas from peat, and in treating hydrogen gas in order to render it illuminating.
2787	,,	Josiah George Jennings, of Great Charlotte Street, Blackfriars Road, in the county of Surrey.	An improvement in the arrangement of the overflow pipes of baths, wash-hand basins, and other vessels.
2788	,,	Josiah George Jennings, of Great Charlotte Street, Blackfriars Road, in the county of Surrey.	Improvements in connecting earthenware, rain pipes, and soil pipes of water-closets, and in valve water-closets.
2789	,,	Josiah George Jennings, of Great Charlotte Street, Blackfriars Road, in the county of Surrey.	An improvement in the rising pipe and suction valve of pumps.
2790	11th Dec. 1855.	Bernard Hughes, of Rochester, New York, United States, but now of 67, Gracechurch Street, London.	A machine for making spokes and tool handles.
2791	,,	Bernard Hughes, of Rochester, New York, United States, but now of 67, Gracechurch Street, London.	A knot-tying sewing machine.
2793	,,	Jean Marie Preaud, of Lyons, in the empire of France.	Certain improvements in india-rubber springs.
2794	,,	Alexandre Tolhausen, of No. 7, Duke Street, Adelphi, London, county of Middlesex, Sworn Interpreter at the Imperial Court of Paris.	Certain improvements in mariners' and land compasses.
2795	,,	John Horsley, of Cheltenham, in the county of Gloucester, Analytical Chemist.	Certain means of treating quinine and iodine, and other mineral medicines, in order to cause them to combine with cod-liver oil, or any other fish oil, or with seed oil.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2798	11th Dec. 1855.	Reuben Levy, of Manchester, in the county of Lancaster, Manufacturing Clothier.	An improvement in wearing apparel.
2801	,,	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improved machinery for manufacturing bolts.
2802	,,	Alexandre Forot, of Paris.	Improvements in parasols.
2803	,,	Samuel Clarke, of Albany Street, Regent's Park, in the county of Middlesex.	Improvements in lanterns for affording light, and for cooking.
2804	,,	Rogers Ruding, of 51, Bunhill Row, in the city of London.	An improvement in printing silks and other woven fabrics with gold and other metal leaf or powder.
2805	12th Dec. 1855.	Robert W. Davis and Daniel Davis, of Yellow Springs, in the county of Greene, and state of Ohio.	An improved vice.
2806	,,	Martin Billing, of Birmingham, in the county of Warwick, Stationer, and Walter George Whitehead, of Birmingham aforesaid, Manufacturer.	A new or improved waterproof fabric or material.
2807	,,	Isaac Beardsell, of the firm of Isaac Beardsell and Company, Huddersfield, in the county of York, Manufacturer.	Improvements in the finishing of mohair cloths and other textile fabrics, and in the machinery employed for that purpose.
2808	,,	George Heron Hay and David Syme Hay, both of Edinburgh, in the county of Midlothian, North Britain, Photographic Artist.	Improvements in photographic pictures.
2809	,,	Robert Midgley, of Salterlee Mill, in the Parish of Halifax, and county of York, and George Collier, of Halifax, in the said county.	Improvements in preparing worsted, mohair, alpaca, cotton, and other yarns.
2810	,,	William Leighton, of the town and county of Newcastle-upon-Tyne, General Broker.	Improvements in paddle wheels.
2811	,,	Richard Holben, of Barton, Cambridgeshire.	Improvements in apparatus for chopping barley.
2812	,,	Thomas Rickett, of Stoney Stratford, in the county of Buckingham, Engineer.	Improvements in pressure gauges.
2814	13th Dec. 1855.	David Hart, of Trinity Square, in the county of Middlesex, Gentleman.	Improvements in signalling or communicating between parts of a railway train, and in the instruments and apparatus employed for such purpose.
2815	,,	Alphonse Louis Poitevin, Civil Engineer, of Paris, in the French empire.	Improved photographic printing.
2816	,,	Alphonse Louis Poitevin, Civil Engineer, of Paris, in the French empire.	Improved photographic engraving.
2822	,,	George Hall Nicoll, of Dundee, in the county of Forfar, North Britain, Ironmonger.	Improvements in fire-places or heating apparatus.
2823	14th Dec. 1855.	John Walter Friend, of Freemantle, Southampton, Watch and Clock Maker.	An improved registering log and deep sea lead.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2825	14th Dec. 1855.	Alfred Krupp, of Essen, in the kingdom of Prussia, Cast Steel Manufacturer.	Improvements in railway and other wheels, and in the method of and machinery for manufacturing the same.
2826	,,	George Tomlinson Bousfield, of Sussex Place, Loughborough Road, in the county of Surrey.	Improvements in machinery for the manufacture of cut pile fabrics.
2827	,,	Charles John Todd and Robert Pinkney, of the firm of Blackwood and Co., Ink Manufacturers, Long Acre, in the county of Middlesex.	A balance pen.
2828	,,	Edward Orange Wildwan Whitehouse, of Brighton, in the county of Sussex, Surgeon.	Improvements in apparatus for measuring fluids.
2829	,,	Peter Haworth, of Manchester, in the county of Lancaster, Patent Leather Manufacturer, and Alexander Forrest, of Birmingham, in the county of Warwick, Gentleman.	An improvement in the manufacture of belts, bands, braces and other similar articles of wearing apparel.
2830	15th Dec. 1855.	William Henry Newman, of 45, Cannon Street Road, London, in the county of Middlesex, Corn Dealer.	An improved fire-lighter.
2832	,,	Thomas Warren, of Glasgow, in the county of Lanark, North Britain, Glass Manufacturer.	Improvements in the manufacture and moulding or shaping of glass.
2833	,,	John Aspinall, of Limehouse, in the county of Middlesex, Civil Engineer.	Improvements in machinery for curing sugar and extracting moisture therefrom, parts of which are applicable to separating liquids and moisture from substances containing the same.
2834	,,	Edward Brown Hutchinson, of Moorgate Street, in the city of London, Artist.	An improved apparatus for forming and cutting elliptical figures.
2835	,,	Ebenezer Rogers, of Abercarn, in the county of Monmouth, Mining Engineer.	Improvements in safety doors for mines.
2836	,,	George Coats, of Glasgow, in the county of Lanark, North Britain, Coal Master.	Improvements in horse shoes and in attaching the same to the horses' feet.
2837	,,	Agnes Wallace, of Nether Place, Bleach Works, in the county of Renfrew, North Britain, and John Wallace, of the same place, Bleachers.	Improvements in bleaching, washing or cleansing textile fabrics and materials.
2839	,,	William Clay, of Liverpool, in the county of Lancaster, Iron Manufacturer.	Improvements in the manufacture of bar iron.
2842	,,	Paul Marie Salomon, of Rue Neuve St. Eustache, Jacques Loir Montgazan, of Rue de Bondy, and Charles Marie Joseph de Flers, of Rue Lafitte, all in Paris, in the empire of France.	Improvements in the manufacture of gas from coals, and in the production of bituminous coke in that manufacture, and also in the apparatus connected therewith.
2843	17th Dec. 1855.	Samuel Fletcher Cottam, of the city of Manchester, Machinist.	Certain improvements in mules for spinning cotton and other fibrous materials.
2845	,,	Charles Bracegirdle, of Congleton, in the county of Chester, Silk Manufacturer.	Improvements in the manufacturing of bolting cloths employed in dressing flour.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2846	17th Dec. 1855.	HENRY STEWART, of Baker Street, in the county of Middlesex, Gentleman.	A machine or apparatus for cleaning and polishing forks, spoons, and other like curved articles.
2848	,,	OMROD COFFEEN EVANS, Doctor of Medicine, of the city of New York, United States of America.	Improvements in digging machinery.
2850	,,	GEORGE GOTTS GOLDING, at Messrs. W. Cubitt's and Co., Gray's Inn Road, London.	Improvements in boilers for heating, warming, or raising steam.
2851	,,	WILLIAM SANGSTER, of Cheapside, in the city of London.	Improvements in the manufacture of stays and corsets.
2853	,,	WILLIAM HEMSLEY, of Melbourne, in the county of Derby.	An improvement in the manufacture of elastic pile fabrics.
2855	,,	JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of Glasgow, North Britain, Gentleman.	Improvements in ships' tillers.
2859	18th Dec. 1855.	ALEXANDRE TOLHAUSEN, of No. 7, Duke Street, Adelphi, London, county of Middlesex, Sworn Interpreter at the Imperial Court of Paris.	An improved harvesting machine.
2860	,,	JOHN PIERRPONT HUMASTON, of Newhaven, in the United States, Civil Engineer.	Improvements in instruments for composing and transmiting telegraph messages.
2862	,,	DAVID LLOYD PRICE, of Beaufort, in the county of Brecknock, Electrical Engineer.	Improvements in electric telegraphs and in appliances connected therewith as applied to railway trains and fixed stations.
2863	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	An improved mode of manufacturing wrought iron cannon.
2864	,,	HIRAM HYDE, of Truro, Nova Scotia, Gentleman.	An improved mode of purifying alcohol or alcoholic spirits.
2867	,,	FREDERICK ROBERT AUGUSTUS GLOVER, of Bury Street, St. James, in the county of Middlesex, Master of Arts.	An improved instrument or apparatus for taking angles and measuring lines, surfaces, and solids, and ascertaining the variation of the needle.
2868	,,	FREDERICK ROBERT AUGUSTUS GLOVER, of Bury Street, St. James, in the county of Middlesex, Master of Arts.	Improvements in the construction of breakwaters, sea walls, and other structures, or foundations of structures, which lie partially or entirely under water.
2870	19th Dec. 1855.	GEORGE ROSS, of Birmingham, in the county of Warwick, Engineer, and THOMAS WILKES, of Birmingham aforesaid, Machinist.	New or improved machinery for the manufacture of bolts, rivets, spikes, screw blanks, screws, nuts for screws, and washers.
2871	,,	RICHARD RUSTON, of Birmingham, in the county of Warwick, Coach Maker.	Improvements in the construction of anchors and appendages to be used therewith.
2874	,,	HENRY ROBERT ABRAHAM, of 11, Howard Street, Strand, in the county of Middlesex.	Improvements in carriages and in certain appurtenances and appendages which belong to those used as hospital conveyances or ambulances.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2876	20th Dec. 1855.	Robert Walker, of Eccleston, near Prescott, in the county of Lancaster, Colliery Viewer.	Improvements in applying power to, and in machinery for raising and lowering coals and other articles from and into mines.
2878	,,	Andrew Shanks, Engineer, 6, Robert Street, Adelphi, Westminster.	Certain improvements in instruments for indicating pressures.
2879	,,	James Fleming, junior, of Newlandsfields, in the county of Renfrew, North Britain, Bleacher.	Improvements in bleaching, washing, cleansing, and preparing textile fabrics and materials.
2880	,,	Dundas Smith Porteous, of the town of Paisley, in the county of Renfrew, Scotland.	Regulating the pressure of gas, steam, water, or other fluids.
2881	,,	Evan Evans, of South Wales - -	Improvements in combining and fixing railway bars.
2883	,,	Philip Antrobus, of Chepstow, in the county of Monmouth, Gentleman.	Improvements in preserving and packing flour.
2884	,,	John Barcroft, of Hanley, in the county of Stafford, Basket Maker.	An improvement in the materials to be used in the manufacture of baskets and basket work.
2886	,,	Louis Rudolph Bodmer, of 2, Thaives Inn, in the city of London.	Improvements in hydraulic seed crushing machines or oil presses.
2887	21st Dec. 1855.	David Dunne Kyle, of Albany Street, Regent's Park, in the county of Middlesex.	A method of communicating motion.
2888	,,	Jean Baptiste Emile Saffroy, Banker, of Bordeaux, in the empire of France.	An improved break for railway carriages
2889	,,	John Watson, of Glasgow, in the county of Lanark, North Britain, Manufacturer.	Improvements in the manufacture or production of articles of ladies' dress.
2896	,,	Henry Francis, of 456, West Strand, in the county of Middlesex, Engineer.	Improvements in apparatus for cutting out parts of garments.
2897	,,	Charles Glover, of the city of Lincoln, Carpenter and Joiner.	Removing snow from a line of railways.
2898	,,	William Joseph Curtis, of No. 1, Sebbon Street, Islington, Civil Engineer.	Improvements in fog signals, and in laying the same upon the rails of railways.
2899	22nd Dec. 1855.	John Gedge, of No. 4, Wellington Street South, Strand, in the county of Middlesex, Patent Agent.	Improvements in cutting and folding paper to form letters or notes and envelopes in one piece.
2900	,,	Myles Kennedy, of Ulverstone, in the county of Lancaster, and Thomas Eastwood, of Preston, in the same county.	Improvements in pump buckets, which improvements are also applicable to lift pumps, air pumps, and all similar apparatus.
2901	,,	James Newman, of Birmingham, in the county of Warwick, Manufacturer, and William Whittle, of Smethwick, in the county of Stafford, Engineer.	Improvements in the manufacture of hooks and eyes, and in machinery to be employed in the manufacture of the hooks aforesaid.
2902	,,	John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of Glasgow, North Britain, Gentleman.	Improvements in furnaces for steam boilers and other heating purposes.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2903	22nd Dec. 1855.	William Stevenson, of Lochwinnoch, in the county of Renfrew, North Britain, Manufacturer, and William Crawford, of the same place, Wool Spinner.	Improvements in machinery or apparatus for carding or preparing fibrous materials.
2904	,,	Christopher Dresser, of Waterloo Cottage, Waterloo Street, Hammersmith.	Improvements in the mode of effecting what is called "Nature printing."
2906	,,	Edward Rowcliffe, of 2, Gloucester Terrace, West Grove, Blackheath.	Improvements in the manufacture of blocks or slabs for paving and building purposes.
2908	,,	David Dick, Engineer, of Paisley, in the county of Renfrew, in Scotland.	A new and improved regulator for gas.
2910	24th Dec. 1855.	Frederic Holdway, of No. 12, Mount Street, Grosvenor Square, in the county of Middlesex, Coach Maker.	Improvements in carriages and various parts of the same.
2912	,,	Thomas Cowburn and George Walker Muir, both of the city of Manchester, in the county palatine of Lancaster, Engineers.	Improvements in steam boilers, and in valves and parts connected therewith.
2913	,,	William Symons, Jack Maker, of Tavistock, in the county of Devon.	Improvements in the suspension roasting jack.
2916	,,	John Barton, of Stockport, in the county of Chester, Shuttle Manufacturer.	Improvements in shuttles or shuttle tongues.
2918	26th Dec. 1855.	Alexandre Tolhausen, of No. 7, Duke Street, Adelphi, London, county of Middlesex, Sworn Interpreter at the Imperial Court of Paris.	Certain improvements in railway axle-boxes.
2921	,,	Frank Clark Hills, of the Chemical Works, Deptford.	Improvements in economizing fuel.
2923	,,	Thomas Duppa Duppa, of Longville, in the county of Salop.	Improvements in generating and heating steam.
2924	,,	David McCallum, of 3, Victoria Place, Stonehouse, in the county of Devon.	Improvements in electric telegraphs.
2928	27th Dec. 1855.	Alfred Krupp, of Essen, in the kingdom of Prussia, Cast Steel Manufacturer.	Certain improvements in guns and gun carriages.
2929	,,	Nicholas Douglass, of St. George's in the Fields, in the county of Middlesex, Engineer.	Improvements in the construction of lighthouses, beacons, piers, and other similar erections.
2940	28th Dec. 1855.	Henry George Baily, of the Vicarage, Swindon, in the county of Wilts, Clerk.	Improvements in machinery for digging and forking land.
2942	29th Dec. 1855.	Lewis Harrop, Cotton Spinner, Samuel Barlow, Overlooker, and Alexander Boyd, Machine Maker, all of Oldham, in the county of Lancaster.	Certain improvements in self-acting mules for spinning and doubling cotton and other fibrous materials.
2943	,,	Herbert Redfern, of Shelton, in the county of Stafford.	Improvements in skates.
2946	,,	William Lange, of 56, Tachbrook Street, in the county of Middlesex, Merchant.	Improvements in biscuit ovens.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2947	29th Dec. 1855.	William Brown, of Glasgow, in the county of Lanark, North Britain, Merchant.	Improvements in cooking and culinary vessels and utensils, and in the application and conveyance of heat.
2948	„	George Royds Birch, of Paddington -	A form and folding desk combined, adapted for the use of schools.
2956	31st Dec. 1855.	Archibald Turner, of Leicester, Elastic Web Manufacturer.	Improvements in the manufacture of looped fabrics.
2957	„	James Cochran Stevenson and John Williamson, of South Shields, Alkali Manufacturers.	Improvements in the manufacture of soda and alkali.

FOREIGN PATENTS.

BELGIUM.*

List of Patents of Inventions and of Importation Delivered on the 2nd December, 1858.†

(*Communicated by the Belgian Government.*)

(For previous List, see No. 519 of this Journal.)

1. F. J. Ribes, of Brussels, for an imported invention of "Improvements in canvass for tapestry."—Dated 29th September, 1858.—(French Patent, 21st July, 1858.)
2. L. Schilgen, of Liége, for "A composition of silvered and gilt soap."—Dated 30th October, 1858.
3. Ch. Wauters-Roels, of Ghent, for "A filter with a moderator-reservoir."—Dated 3rd November, 1858.
4. J. J. Rissack, of Herstal, for "Modifications in fastening breech-loading guns."—Dated 5th November, 1858.
5. L. N. de Meckenheim, of Ixelles, for "A kitchen range."—Dated 6th November, 1858.
6. A. Bauquin, represented by A. Depuichault, of Schaerbeek, for an imported invention of "A system of machines for threshing corn."—Dated 6th November, 1858.—(French Patent, 2nd June, 1858.)
7. Ph. Fromont, of Châtelineau, a Patent of Improvement for "Modifications in his hand cock."—Dated 6th November, 1858.—(Original Patent, 12th June, 1858.)
8. P. Van Hercke, of Ostende, for "An apparatus for preventing smoke from coming down the chimney."—Dated 8th November, 1858.
9. Robert and Co., of Liége, for "A system of breech-loading fire-arms."—Dated 5th November, 1858.
10. H. Michel, of Liége, a Patent of Improvement for "Additions to his system of brushes."—Dated 6th November, 1858.—(Original Patent, 26th October, 1858.)
11. E. C. Shepard, of Antwerp, for "A system of electrical lamps."—Dated 6th November, 1858.
12. F. Del Marmol, of Vedrin, for "An apparatus for evaporating soda salts."—Dated 8th November, 1858.
13. J. F. Lefebure, of Brussels, a Patent of Improvement for "Additions to his process for retting textile substances."—Dated 8th November, 1858.—(Original Patent, 6th January, 1857.)
14. Ed. Myers and V. Van Anghem, of Brussels, for "A machine for crushing printing ink and colours."—Dated 8th November, 1858.
15. Candeil, of Brussels, for "Manufacture of preserved vegetables."—Dated 8th November, 1858.
16. F. Couregelongue, represented by X. Raclot of Brussels, for "A safety apparatus against the explosion of steam boilers."—Dated 8th November, 1858.
17. Arbault Brothers, represented by X. Raclot, of Brussels, for "Manufacture of files."—Dated 8th November, 1858.
18. N. S. Dodge, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the treatment of the waste of vulcanized india rubber."—Dated 8th November, 1858.—(French Patent, 3rd November, 1858.)
19. A. Hepner and Co., represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the manufacture of circular figured tissues."—Dated 8th November, 1858.—(French Patent, 14th October, 1858.)
20. J. P. E. Massière, represented by H. Biebuyck, of Brussels, for an imported invention of "Applying waterproof metallic paper, called 'tinned paper.'"—Dated 8th November, 1858.—(French Patent, 1st September, 1858.)
21. E. Heckscher, represented by H. Biebuyck, of Brussels, for an imported invention of "A purifying apparatus for separating coal, schist, and other strange substances."—Dated 8th November, 1858.—(French Patent, 13th October, 1858.)
22. G. Alton and J. Fernie, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the construction of boilers and other vessels resisting pressure."—Dated 8th November, 1858.—(French Patent, 21st October, 1858.)
23. A. J. A. Allié, represented by H. Biebuyck, of Brussels, for an imported invention of "A system of instruments for measuring the dimension of heads for hats."—Dated 8th November, 1858.—(French Patent, 2nd November, 1858.)
24. E. Cuvelier, represented by H. Biebuyck, of Brussels, for "A system of miners' lamps."—Dated 8th November, 1858.
25. A. Bouillet, of Nimy-Maisières, for "A mill for grinding the bark of oaks."—Dated 9th November, 1858.
26. G. Coulon, represented by L. Pelletier, of Hornu, for an imported invention of "A rotary steam engine."—Dated 9th November, 1858.—(French Patent, 8th July, 1858.)
27. L. Pelletier, G. Coulon, and Alf. Doulceron, of Hornu, for an imported invention of "A grease-cock for steam engines."—Dated 9th November, 1858.—(French Patent, 6th September, 1858.)

* For the Belgian Patent Law, see Nos. 292 and 348 of this Journal.

† All Specifications of Patents which have been in force not less than six months, may be inspected or translations of them be had at the Library of the Great Seal Patent Office, where also translated Indexes may be consulted.

28. A. Cabany, of Mons, for "Double wedges for railroads."—Dated 8th November, 1858.

29. J. Michaux and Co., represented by L. Pelletier, of Hornu, for "A grease-cock applicable to pivots of moving arbors."—Dated 9th November, 1858.

30. Ed. Tomlinson, represented by H. Biebuyck, of Brussels, for an imported invention of "Manufacture of pirn-tubes for taking in thread, and forming spools for weaving."—Dated 10th November, 1858.—(English Patent, 28th April, 1858.)

31. J. Herman, of Souveraine-Wandre, for "A system of breech-loading fire-arms."—Dated 10th November, 1858.

32. C. P. P. Hecht, represented by H. Biebuyck, of Brussels, for an imported invention of "A kind of smoking pipes."—Dated 11th November, 1858.—(French Patent, 4th November, 1858.)

33. H. J. Masse, of Leuze, for "A process for discolouring beetroot-juice."—Dated 12th November, 1858.

34. Alf-Roux, represented by L. N. de Meckenheim, of Ixelles, a Patent of Improvement for "Manufacture of artificial marble."—Dated 12th November, 1858.—(Original Patent, 23rd October, 1858.)

35. C. A. de Cappot and A. M. Jarriant, represented by H. Biebuyck, of Brussels, for an imported invention of "A water-meter."—Dated 12th November, 1858.—(French Patent, 11th November, 1858.)

36. W. Harding, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in revolvers."—Dated 12th November, 1858.—(English Patent, 24th May, 1858.)

37. R. Jobson, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in apparatus for making moulds for casting moulds and other articles."—Dated 12th November, 1858.—(English Patent, 12th August, 1858.)

38. F. W. Mowbray and J. Broadley, represented by R. S. Kirkpatrick, of Ixelles, for an imported invention of "Improvements in various parts of weaving looms."—Dated 12th November, 1858.—(English Patent, 8th April, 1858.)

39. L. J. Verheggen, represented by A. J. Verheggen, of Houffalize, for "A thrashing machine."—Dated 12th November, 1858.

40. J. Trocquenet, of Mons, for "An hydraulic and atmospheric press applicable as a motor."—Dated 11th November, 1858.

41. Mundo, Briollet-Dumontet and Co., represented by J. Benoist, of St. Josse-ten-Noode, for "A chemical and mechanical means of obtaining heat."—Dated 15th November, 1858.

42. P. G. Chaltin, of Alost, for "An apparatus for absorbing the sulphurous acid issuing from vats containing hops."—Dated 15th November, 1858.

43. D. Fryer, T. L. C. Watt, and W. Holmes, represented by J. Piddington, of Brussels, for an imported invention of "Improvements in tanning."—Dated 15th November, 1858.—(English Patent, 3rd of November, 1858.)

44. M. C. Gobert-Lebrun, represented by A. Depuichault, of Schaerbeek, for "Tournure trousers or drawers."—Dated 15th November, 1858.

45. S. Krotkoff, represented by A. Depuichault, of Schaerbeek, for "A safety apparatus against thieves."—Dated 15th November, 1858.

46. E. H. Goddier, represented by A. Depuichault, of Schaerbeek, for "A mode of assembling pipes of iron, gutta percha, or other substances."—Dated 15th November, 1858.

47. P. A. de Gemini, represented by H. Biebuyck, of Brussels, for an imported invention of "Manufacture of tallow and composite candles."—Dated 16th November, 1858.—(French Patent, 17th December, 1857.)

48. Ed. Fairburn, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in machines for carding wool and other filamentous substances."—Dated 16th November, 1858.—(English Patent, 11th May, 1858.)

49. J. L. Vallée, represented by H. Biebuyck, of Brussels, for an imported invention of "An economical kneading machine."—Dated 16th November, 1858.—(French Patent, 23rd September, 1858.)

50. F. Blanckart, of Liége, a Patent of Improvement for "Modifications in breech-loading guns."—Dated 13th November, 1858.—(Original Patent, 1st June, 1858.)

51. R. P. Paris-Paris, of Battignies, for "An iron stop-plank with a double cross."—Dated 16th November, 1858.

52. R. P. Paris-Paris, of Battignies, for "A double square iron stop-plank."—Dated 16th November, 1858.

53. L. Giordano, represented by O. Daillencourt, of Brussels, for an imported invention of "Improvements in fishing nets."—Dated 17th November, 1858.—(French Patent, 8th May, 1857.

54. G. J. Bourbouze, represented by O. Daillencourt, of Brussels, for an imported invention of "A system of breaks applicable to all vehicles."—Dated 17th November, 1858.—(French Patent, 8th November, 1858.)

55. A. Berson and J. Beaujanot, represented by O. Daillencourt, of Brussels, for an imported invention of "A mode of advertising."—Dated 17th November, 1858.—(French Patent, 26th October, 1858.)

56. A. L. D. Favier, represented by O. Daillencourt, of Brussels, for an imported invention of "A process for mounting and strengthening tanned leather."—Dated 17th November, 1858.—(French Patent, 27th May, 1858.)

57. P. G. Antheunis, of Overboulacre-lez-Grammont, for "A machine for arranging matches in frames for being manufactured."—Dated 18th November, 1858.

58. V. Delhausse, of Liége, for "A composition for protecting metal pens from oxidation."—Dated 17th November, 1858.

59. Aug. Detombay, of Marcinelle, for "A system of turn-tables for railways."—Dated 17th November, 1858.

60. N. Libotte, of Gilly, for "A mechanism of crochets for loading and unloading carts used in mining."—Dated 17th November, 1858.

61. N. Libotte, of Gilly, a Patent of Improvement for "Improvements in breaks for stopping or retarding the motion of extraction machines."—Dated 17th November, 1858.—(Original Patent, 16th August, 1858.)

62. N. Libotte, of Gilly, for "A system of eccentrics for railways."—Dated 17th November, 1858.

63. N. Libotte, of Gilly, a Patent of Improvement for "Modifications in his system of parachutes for mines."—Dated 17th November, 1858.—(Original Patent, 23rd June, 1858.)

64. H. I. Van-Eycken, of Brussels, for "Manufacture of springs for crinoline petticoats and for a machine for obtaining those products."—Dated 18th November, 1858.

65. Lecerf, Bauwens, and Co., represented by X. Raclot, of Brussels, a Patent of Improvement for "Additions to his mode of manufacturing artificial whalebone."—Dated 18th August, 1858.—(F. P. Roussel's original Patent, 18th August, 1857.)

66. J. C. Boisneau, represented by H. Biebuyck, of Brussels, for an imported invention of "A moveable horse-gin." — Dated 18th November, 1858.—(French Patent, 13th November, 1858.)

67. H. Bouchet, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A bleaching process applicable to linen and cotton tissues."—Dated 18th November, 1858.—(Original Patent, 26th November, 1856.)

68. A. Grivel, jun., and J. F. V. Mouilleron, represented by H. Biebuyck, of Brussels, for an imported invention of "An improved loom for the manufacture of lace, braid, and net-work."—Dated 18th November, 1858.—(French Patent, 8th November, 1858.)

69. L. Orts, represented by H. Biebuyck, of Brussels, for "An apparatus for introducing certain substances into boilers for removing their incrustations."—Dated 18th November, 1858.

70. A. F. Talma and J. J. Noël, of Brussels, for "A process for smelting aluminium and applying the latter."—Dated 19th November, 1858.

71. V. V. Falour, represented by A. Depuichault, of Schaerbeek, for an imported invention of "A system of collars for traction horses." — Dated 19th November, 1858. — (French Patent, 5th August, 1858.)

72. H. Petitjean, represented by A. Depuichault, of Schaerbeek, for an imported invention of "A system of iron Venetian blinds." — Dated 19th November, 1858. — (French Patent, 12th May, 1857.)

73. J. Tenaud, represented by A. Depuichault, of Schaerbeek, for an imported invention of "Manufacture of refractory bricks."—Dated 19th November, 1858. — (French Patent, 29th May, 1858.)

74. J. Britton, of Ledeberg-lez-Gand, for "A system of pipes of stretched iron for heating hothouses, hospitals, and other places."—Dated 12th November, 1858.

75. J. Sidders, of Ghent, for "A geographical chronometer."—Dated 17th November, 1858.

76. H. A. Archereau and P. E. Conillard, of Charleroi, for "Obtaining steam of water, superheated steam, air and hot gases."—Dated 19th November, 1858.

77. Ph. Fromont, of Chatelineau, for "A ball and socket system applicable to lomotives."—Dated 20th November, 1858.

78. C. J. B. Dubois, of Arguennes, for "A cooling apparatus of blue stone for breweries."—Dated 20th November, 1858.

79. C. Martin, of Pepinster, for "Applying endless cloth to machines for carding wool and other filamentous substances."—Dated 20th November, 1858.

80. L. J. Heuzé, of Hodimont, for "Improvements in looms for weaving by means of several shuttles."—Dated 20th November, 1858.

81. L. Faraut, represented by A. Hennelle, of Brussels, for an imported invention of "A saw with three blades, and a rectilinear, alternate, or continuous progression."—Dated 20th Novemher, 1858.—(French Patent, 20th October, 1858.)

82. L. Faraut, represented by A. Hennelle, of Brussels, for an imported invention of "A moveable crane with a jointed jib and vertical rotation."—Dated 20th November, 1858.—(French Patent, 20th October, 1858.)

83. J. Journeaux, represented by Masson-Fouquet, of Brussels, for "Manufacture of flexible pipes coated internally and externally with an impervious substance."—Dated 20th November, 1858.

84. F. Vandooren, of Ghent, for "Trelliswork of flat iron."—Dated 19th November, 1858.

85. Ch. Lungley, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the construction of portable vessels and boats."—Dated 20th November, 1858.—(English Patent, 23rd April, 1858.)

86. S. Davey and A. L. Chanu, represented by H. Biebuyck, of Brussels, for an imported invention of "A composition for exploding mines."—Dated 20th November, 1858.

87. A. J. A. Allié, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "Additions to his system of instruments for measuring the dimension of the head for hats."—Dated 20th November, 1858.—(Original Patent, 8th November, 1858.)

88. Ch. Russery, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "Additions to his process for manufacturing cranked axles of locomotives."—Dated 20th November, 1858.—(Original Patent, 6th November, 1856.)

89. Prince S. Dolgorouki, represented by H. Biebuyck, of Brussels, for "A cylinder press for extracting juice from pulps."— Dated 20th November, 1858.

90. A. E. Servier, represented by A. Godtschalck-Duval, of Brussels, for an imported invention of "An electro-magnetic indicator of pressure or level."—Dated 23rd November, 1858.— (French Patent, 10th November, 1858.)

91. A. Galy-Cazalet, represented by E. Dansaert, of Brussels, for an imported invention of "Improvements in the manufacture of cast and wrought iron and steel."—Dated 23rd November, 1858.—(French Patent, 15th July, 1858.)

92. J. Barbe, represented by D. Jassin, of Liége, for "Applying telescopes to fire-arms."—Dated 23rd November, 1858.

FRANCE.

Current List of Patents of Invention and Certificates of Addition.

1858.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

Note.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

4870. Charles Armand Morin, of Glomel, département de la Côte d'Or, for "Saline manure."—Dated 30th October, 1858.

4871. Sylvain Peyrot, of 70, Grand Chemin d'Aix, Marseille, département des Bouches du Rhône, for "An apparatus for carrying up rubbish and lifting and lowering materials in building houses."—Dated 2nd November, 1858.

4872. François Casult, of 1, Montie des Accoules, Marseille, département des Bouches du Rhône, for "A machine for impregnating timber and marble."—Dated 2nd November, 1858.

4873. Mathurin Gaturel. of Agen, département de Lot et Garonne, for "An improved photographic frame."—Dated 2nd November, 1858.

4874. Etienne Lantillon, of 5, Montin de la Bouche, Lyon, département du Rhône, for "A composition for preventing incrustations of steam-boilers."—Dated 3rd November, 1858.

4875. François Gillet, of Troyes, département de l'Aube, a Certificate of Addition to his Patent of 20th November, 1856, for "A circular loom for weaving ribbed knittings."—Dated 3rd November, 1858.

4876. Stephany Baron, of Brentigny, département des Vosges, for "A machine for thrashing, rasping roots, and cutting chaff."—Dated 3rd November, 1858.

4877. Claude Terrat, of St. Martin-la-Plaine, département de la Loire, for "Construction of a wine press."—Dated 4th November, 1858.

4878. Peltier Brothers, of Rue de la Regratterie, Poitiers, département de la Vienne, for "Manure, called 'improved guano.'"—Dated 4th November, 1858.

4879. Augustin Joseph Cresson, of 12, Rue de Chaulnes, Rennes, département d'Ille et Vilaine, for "A mode of heating apartments."—Dated 4th November, 1858.

4880. Langin and Heimburger, of 1, Rue Militaire de l'Hôpital, Strasbourg, dêpartement du Bas Rhin, for "A safety system applicable to carriages."—Dated 28th October, 1858.

4881. Lucien Migeon, of Larochefoucault, département de la Charente, for "A warp frame and throstle worked by hand."—Dated 28th October, 1858.

4882. Jean Baptiste Hugeux, of 10, Marché au Verjus, Lille, département du Nord, a Certificate of Addition to his Patent of 19th November, 1857, for "An apparatus for thrashing all kinds of grain."—Dated 8th November, 1858.

4883. Million, of 31, Quai de la Charité, Lyon, département du Rhône, for "Improvements in their gas-motive machine as patented 8th June, 1857."—Dated 4th November, 1858.

4884. Jules Auguste Truffault, of Plat d'Etain, commune de Tours, département d'Indre et Loire, for "A machine for making paper."—Dated 4th November, 1858.

4885. Pierre Eugène Beaujouan, of Place Notre Dame, Bourges, département du Cher, for "An apparatus for making collections."—Dated 4th November, 1858.

* For the French Patent Law see No. 228 of this Journal.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).
Macclesfield (*Useful Knowledge Society*).
Manchester (*Chetham Hospital*).
——— (*Camp Field*).
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*).
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).

Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices.

Admiralty, Steam Department.
——— Surveyor of Navy.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Sheerness ditto.
——— Devonport ditto.
——— Portsmouth ditto.
——— Chatham ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec; Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville, } Paris.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin.
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il più gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, as translated or transcribed from Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240 and 348.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 527 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

DRAIN TILES AND PIPES. Price 6*d.*
MANUFACTURE OF IRON AND STEEL, Parts I. and II, price 6*d.* each; Part III. (completing the series), price 4*s.*
MANURE. Price 6*d.*
SEWING AND EMBROIDERING. Price 6*d.*
MARINE PROPULSION, Parts I. and II., price 1*s.* each; Part III. (completing the series), 2*s.*
PRESERVATION OF FOOD. Price 6*d.*
AIDS TO LOCOMOTION. Price 1*s.*
STEAM CULTURE. Price 2*s.*
WATCHES, CLOCKS, AND OTHER TIMEKEEPERS. Price 1*s.* 6*d.*

The following are in the press:—

PRINTING CALICOES AND OTHER WOVEN FABRICS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
COMBUSTION OF FUEL.
FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ.
INDIA RUBBER AND GUTTA PERCHA: FIRE, AIR, AND WATER PROOFING.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE, Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 528. TUESDAY, JANUARY 25, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given that

2071. WILLIAM THOMSON, of the city of Manchester, in the county of Lancaster, Commission Agent, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in bleaching yarn warps, or similar materials."

As set forth in his petition, recorded in the said office on the 13th day of September, 1858.

2088. And SELIM ST. CLAIR MASSIA, of Pall Mall, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in stoves or fire places."—A communication from Jules Cesar Thimoteé Mousseron.

As set forth in his petition, recorded in the said office on the 14th day of September, 1858.

2102. And CHARLES HADLEY, of Lower Hurst Street, Birmingham, has given the like notice in respect of the invention of "Improvements in omnibusses, cabs, railway carriages, waggons, and other similar vehicles."

As set forth in his petition, recorded in the said office n the 17th day of September, 1858.

2108. And JOSEPH BLACKWOOD BEASLEY, of Cashel, county Tipperary, of Ireland, has given the like notice in respect of the invention of "Improvements in the construction of sporting and all other guns."

2110. And HENRY WILLIAM GRYLLS, of No. 47, Mark Lane, in the city of London, Licensed Custom House Agent, has given the like notice in respect of the invention of "Improvements in apparatus employed in submerging or laying down electric telegraph cables."

As set forth in their respective petitions, both recorded in the said office on the 18th day of September, 1858.

2113. And HENRY BARROW, of Birmingham, in the county of Warwick, Saddler, has given the like notice in respect of the invention of "An improvement or improvements in cartridge boxes."

2114. And HENRY FIRMIN, of Wapping, in the county of Middlesex, Carman, has given the like notice in respect of the invention of "A machine for cleansing chaff and other food for horses and cattle."

As set forth in their respective petitions, both recorded in the said office on the 20th day of September, 1858.

2119. And LEON DE PARIENTE, of Paris, France, Gentleman, has given the like notice in respect of the invention of "Improvements in apparatus to be applied to gas burners, with the object of increasing the lighting power of the gas flame."—A communication.

2120. And JEAN CLEMENT EMILE MALVEZIN, of Paris, France, Gentleman, has given the like notice in respect of the invention of "Improvements in the manufacture of tubes, pipes, or mains, for conducting liquids or gas, or for other similar purposes."

2121. And JOHN BETHELL, of No. 8, Parliament Street, Westminster, Gentleman, has given the like notice in respect of the invention of "Improvements in treating pyrites."

2124. And ANGIER MARCH PERKINS, of Francis Street, Gray's Inn Road, has given the like notice in respect of the invention of "Improvements in surface condensers."

As set forth in their respective petitions, all recorded in the said office on the 21st day of September, 1858.

2137. And ALFRED FAUVIN JALOUREAU, of Paris, in the French empire, Manufacturer, has given the

like notice in respect of the invention of "Improvements in the manufacture of pipes."

2139. And Thomas Callender Hinde, of Dudley, in the county of Worcester, Iron Merchant, has given the like notice in respect of the invention of "An improvement or improvements in the manufacture of iron and steel."

As set forth in their respective petitions, both recorded in the said office on the 23rd day of September, 1858.

2175. And John Morrison, of Birmingham, in the county of Warwick, Machinist, has given the like notice in respect of the invention of "An improvement in or addition to sewing machines."

2181. And Augustin Normand, of Havre, in the empire of France, Shipbuilder, has given the like notice in respect of the invention of "Improvements in constructing ships and vessels propelled by screw or such like propellers."

As set forth in their respective petitions, both recorded in the said office on the 30th day of September, 1858.

2207. And Anthony Bessemer, of Upper Holloway, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in the manufacture of iron and steel, and in apparatuses to be employed therein."

2213. And John Harcourt Brown, of the Abbey Mills, Romsey, in the county of Hants, has given the like notice in respect of an invention of "Improvements in the manufacture of cartridges."

As set forth in their respective petitions, both recorded in the said office on the 5th day of October, 1858.

2217. And Jozé Luis, Patent Agent, of No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, has given the like notice in respect of the invention of "A new method of joining sheet iron, cast iron, gutta percha, and other tubes, by means of muffles."—A communication.

As set forth in his petition, recorded in the said office on the 6th day of October, 1858.

2239. And Richard Searle, of Woodford Wells, in the county of Essex, Gentleman, has given the like notice in respect of the invention of "Improvements in insulating and preserving and laying submarine and other telegraphic wires or cables."

As set forth in his petition, recorded in the said office on the 8th day of October, 1858.

2445. And Andrew Barclay, of Kilmarnock, in the county of Ayr, North Britain, Engineer, has given the like notice in respect of the invention of "Certain improvements in electric and magnetic or electro magnetic telegraphs, applicable to submarine and land communication."

As set forth in his petition, recorded in the said office on the 2nd day of November, 1858.

2456. And Peter Alfred Mawdsley, of Seacombe, in the county of Chester, Smalt Manufacturer, has given the like notice in respect of the invention of "Improved machinery or apparatus for drying yarns after being sized or stiffened, and the use or application of a certain substance or substances in the sizing, stiffening, or otherwise preparing yarns and woven fabrics, or either of them."

2457. And Peter Alfred Mawdsley, of Seacombe, in the county of Chester, Smalt Manufacturer, has given the like notice in respect of the invention of "The use or application of a certain substance or substances in the manufacture, stiffening, or sizing of paper."

As set forth in his respective petitions, both recorded in the said office on the 3rd day of November, 1858.

2573. And James Samuel, of Great George Street in the city of Westminster, Civil Engineer, has given the like notice in respect of the invention of "Improvements in sleepers or bearers for rails."

As set forth in his petition, recorded in the said office on the 16th day of November, 1858.

2804. And John Vickers Scarborough, of Belfast, in the county of Antrim, Ireland, Gutta Percha Boot Manufacturer, has given the like notice in respect of the invention of "Improvements in apparatus for the manufacture of boots and shoes."

As set forth in his petition, recorded in the said office on the 7th day of December, 1858.

2829. And Henry Wilson, of Norton, in the county of Durham, Brass Finisher, has given the like notice in respect of the invention of "Improvements in the construction of pumps."

As set forth in his petition, recorded in the said office on the 9th day of December, 1858.

2836. And Andrew Barclay, of Kilmarnock, in the county of Ayr, North Britain, Engineer, has given the like notice in respect of the invention of "Improvements in obtaining motive power by means of electricity, magnetism, and electro-magnetism."

As set forth in his petition, recorded in the said office, on the 10th day of December, 1858.

2878. And Thomas Moss, of Gainsforth Street, Islington, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in printing bank notes, bills of exchange, and other documents requiring like security against being copied."

As set forth in his petition, recorded in the said office on the 15th day of December, 1858.

2900. And James MacKenzie, Manager to William Strode, of St. Martin's-le-Grand, in the city of London, Gas Engineer, has given the like notice in respect of the invention of "Improvements in those gas burners known as ventilating sun burners."

As set forth in his petition, recorded in the said office on the 18th day of December, 1858.

2937. And Andrew Barclay, of Kilmarnock, in the county of Ayr, North Britain, Engineer, has given the like notice in respect of the invention of "Improvements in obtaining and distributing or applying electricity and magnetism, and in obtaining motive power therefrom."

As set forth in his petition, recorded in the said office on the 23rd day of December, 1858.

2958. And William Armand Gilbee, of No. 4, South Street, Finsbury, London, Patent Agent, has given the like notice in respect of the invention of "Improvements in treating fatty bodies, and in the apparatus employed therein."—A communication.

As set forth in his petition, recorded in the said office on the 27th day of December, 1858.

2984. And Hippolyte Charles Vion, of Paris, in the empire of France, Civil Engineer, has given the like notice in respect of the invention of "A new mode of obtaining atmospheric electricity, and its industrial applications, and in apparatus for the same."

2996. And John Knowelden, of Southwark, in the county of Surrey, Engineer, and Richard Downes Edwards, of Upper Belgrave Place, in the county of Middlesex, have given the like notice in respect of the invention of "Improvements in hydraulic engines, and in apparatus connected therewith."

As set forth in their respective petitions, both recorded in the said office on the 30th day of December, 1858.

9. And James Garforth, of Dukinfield, in the county of Chester, Engineer, has given the like notice in respect of the invention of "Certain improvements in steam engines."

13. And William Eccles, of 34, Surrey Street, Strand, Westminster, in the county of Middlesex, and of the University of Cambridge, Master of Arts, has given the like notice in respect of the invention of "Improving the machinery or apparatus for regulating the tension of the twist threads or warp whilst it is weaving in power looms into cloth."

21. And George Tomlinson Bousfield, of Loughborough Park, Brixton, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in machinery for forming dough into cakes or bread crackers."—A communication.

As set forth in their respective petitions, all recorded in the said office on the 1st day of January, 1859.

25. And Robert Tempest and James Tomlinson, both of the Roach Iron Works, Rochdale, in the county of Lancaster, Machine Makers, have given the like notice in respect of the invention of "Improvements in certain machines for preparing cotton and other fibrous materials."

As set forth in their petition, recorded in the said office on the 3rd day of January, 1859.

50. And John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman has given the like notice in respect of the invention of "Improvements in machinery or apparatus for boring or piercing rocks, applicable also to the dressing or working of stone, and as a power hammer generally."—A communication from Monsieur Germain Sommeiller, residing at Turin, in the kingdom of Sardinia, Engineer.

As set forth in his petition, recorded in the said office on the 6th day of January, 1859.

75. And Ferdinand Lehr, of Hoboken, in the state of New Jersey, United States of America, has given the like notice in respect of the invention of "Improvements in machinery for manufacturing metallic ribs for umbrellas, parasols, and other articles."

As set forth in his petition, recorded in the said office on the 10th day of January, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

25th January, 1859.

1676. Alphonse Sax, of Paris, France, Musical Instrument Maker, for an invention of "Improvements in wind musical instruments."—Dated 26th July, 1858.

1678. John Hardie, of the town and county of Stirling, North Britain, Plumber, for an invention of "Improvements in apparatus for regulating the flow or passage of fluids."—Dated 26th July, 1858.

1683. Edward Jones, Gentleman, of Olive House, 20, Camden Cottages, Camden Town, in the parish of St. Pancras, and county of Middlesex, for an invention of "Effecting a better system of drainage, and the machinery and apparatus necessary for the same, whereby the sewage manure is collected and conveniently exported for use, and the noxious effluvia prevented from contaminating the air of populous cities and towns, and whereby the drains may be more strongly and securely built by the manufacture of a more suitable and better material."—Dated 26th July, 1858.

1684. Henry Jackson, of 130, Powis Street, Woolwich, in the county of Kent, for an invention of "Improvements in preparing lubricating matters."—Dated 26th July, 1858.

1687. Peter Augustin Godefroy, of 3, King's Mead Cottages, New North Road, Islington, in the county of Middlesex, Operative Chemist, for an invention of "Improvements in the cleansing of gutta percha, and in the more perfect insulation of electric telegraph wire."—Dated 26th July, 1858.

1688. Henry Glover, of New York, United States of America, Mathematical instrument Maker, for an invention of "Improvements in instruments for measuring angles and taking altitudes."—Dated 26th July, 1858.

1691. John Emes, of 110, Great Russell Street, Bloomsbury, and 123, New Bond Street, Oxford Street, London, both in the county of Middlesex, for an invention of "A portable folding bedstead." Dated 27th July, 1858.

1693. Alexander Taylor, of No. 1, Wellington Cottages, De Beauvoir Town, Kingsland, for an invention of "Improvements in pianofortes."—Dated 27th July, 1858.

1694. Constantine Nicolaus Kottula, of Liverpool, in the county of Lancaster, Soap Manufacturer, for an invention of "Improvements in the manufacture of soap."—Dated 27th July, 1858.

1696. George Hurn, of Norwich, in the county of Norfolk, for an invention of "Improving the manufacture of certain articles made from fibrous materials."—Dated 28th July, 1858.

1705. Henry Harden, of Dundalk, in the county of Louth, Ireland, Locomotive Superintendent to the Dublin and Belfast Junction Railway Company, for an invention of "Improvements in the construction of tubular steam boilers."—Dated 28th July, 1858.

1711. James Musgrave, of Belfast, Ireland, for an invention of "Improvements in stalls and enclosures for horses, cows, and pigs."—Dated 29th July, 1858.

1713. George Seaborn Parkinson, of No. 10, Lambton Terrace, Kensington, Middlesex, Gentleman, for an invention of "An improved connecting apparatus for working railway breaks and effecting a communication between railway guards and drivers."—Dated 29th July, 1858.

1715. Joseph Lester Hinks, of Birmingham, in the county of Warwick, Manufacturer, for an invention of "Improvements in machines for cleaning knives, forks, spoons, and such other articles as are or may be cleaned by polishing, also in machines for sharpening knives."—Dated 29th July, 1858.

1740. Charles de Bergue, of No. 9, Dowgate Hill, in the city of London, Engineer, for an invention of "Improvements in submarine telegraphic cables, and in machinery for paying out or laying down the same."—Dated 31st July, 1858.

1749. William Beauchamp Bagnal Harvey, of Bagnal Villa, Gresham Road, Brixton, in the county of Surrey, for an invention of "Improvements in fly or screw presses."—Dated 2nd August, 1858.

1774. James Bray Pascoe and John Roberts Thomas, of Chacewater, in the county of Cornwall, Engineers, for an invention of "An improved method of and apparatus for feeding boilers of all steam engines with liquid without the aid of the force pump heretofore used."—Dated 4th August, 1858.

1783. Donald McCrummen, of Gourock, in the county of Renfrew, North Britain, Gentleman, for an invention of "Improvements in the manufacture or production of paper, which improvements are also applicable in the production of alkaline and other salts."—Dated 5th August, 1858.

1784. Colin Mather, of Salford Iron Works, in the parish of Manchester, county of Lancaster, for an invention of "Improvements in shearing machines."—Dated 5th August, 1858.

1799. John Smith the younger, of Coven, near Wolverhampton, in the county of Stafford, Engineer, for an invention of "Improvements in agricultural steam engines, and locomotive steam engines to be used on common roads."—Dated 7th August, 1858.

1802. John Imray, of 65, Bridge Road, Lambeth, in the county of Surrey, Engineer, for an invention of "Improvements in apparatus used in printing."—Dated 7th August, 1858.

1803. John Taylor, of Roupell Park, Streatham Hill, in the county of Surry, for an invention of "Improvements in the manufacture of blocks for the construction of sewers and drains."—Dated 7th August, 1858.

1843. Henry Smith and Thomas Woodhouse Ashby, of Stamford, in the county of Lincoln, Agricultural Implement Makers, for an invention of "Improvements applicable to haymaking machines, whereby such machines are rendered useful for other agricultural purposes."—Dated 12th August, 1858.

1849. Thomas Rickett, of the Castle Foundry, Buckingham, for an invention of "Improvements in locomotive engines and other carriages to facilitate their transit."—Dated 13th August, 1858.

1945. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improved machinery for sorting silk or other thread according to its size or thickness."—Dated 27th August, 1858.

1967. Leopold Wiart, of Cambrai, in the empire of France, Civil Engineer, for an invention of "An improved mode of generating steam or heating water or liquids."—Dated 30th August, 1858.

2186. James Thomas Peter Newbon and Thomas Smith, both of 63, Fenchurch Street, in the city of London, Naval Architects, and James Brown, of No. 37, Tollet Street, Mile End, in the county of Middlesex, Engineer, for an invention of "An improved method of lifting and lowering ships' anchors."—Dated 1st October, 1858.

2450. Smith Bottomley, of Bradford, in the county of York, Warehouseman to Messrs. Churton, Bankart, and Hirst, of Bradford, in the said county, Stuff Merchants, for an invention of "Improvements in the manufacture of moreens and other fabrics of a similar character."—Dated 3rd November, 1858.

2609. Benjamin Rider, of 61, Red Cross Street, Boro', in the county of Surrey, Leather Dresser and Hat Leather Manufacturer, for an invention of "Improvements in ventilating hats and caps and in the preparation or manufacture of the material of which those articles are made."—Dated 18th November, 1858.

2643. John Young, of Wolverhampton, in the county of Stafford, Manufacturer, for an invention of "Improvements in fastenings for window sashes and casements, and in chain used for suspending window sashes."—Dated 20th November, 1858.

2661. William Warne, James Archibald Jaques, and John Americus Fanshawe, all of Tottenham, in the county of Middlesex, India Rubber Manufacturers, for an invention of "An improved fabric applicable for covering floors and walls and for other analogous purposes."—Dated 23rd November, 1858.

2681. Colin Mather, of Salford, in the county of Lancaster, Machinist, for an invention of "An improved steam trap or apparatus for allowing the escape of water and air from pipes, vessels, or chambers heated by steam."—Dated 25th November, 1858.

2753. Edmund Leopold Benzon, of Sheffield, in the county of York, Steel Manufacturer, for an invention of "The manufacture of useful alloys of aluminium."—Dated 1st December, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To January 22, 1859, inclusive.*)

20th January.

160. John Wordsworth Robson, of Grundy Street, Poplar New Town, Middlesex, Engineer, for an invention of "Improvements in machinery appertaining to waterclosets and pumps."—Complete Specification.—Dated 21st January, 1856.

21st January.

162. Pierre Lewis Tieffé-Lacroix, of Metz, in the empire of France, Mechanician, Watchmaker, for an invention of "Improvements in machinery for cutting files."—Dated 22nd January, 1856.

218. William Beasley, of Smethwick, in the county of Stafford, Manufacturer, for an invention of "Improvements in machinery or apparatus to be employed in rifling the barrels of fire-arms and ordnance."—Dated 26th January, 1856.

22nd January.

193. George Brooks Pettit, and Henry Fly Smith, of Oxford Street, in the county of Middlesex, Gas Engineers, for an invention of "Improvements in gas heating apparatus."—Dated 24th January, 1856.

250. Charles Frederick Claus, of Latchford, in the county of Chester, Chemist, for an invention of "Improvements in the preparation of hides or skins, also applicable to the preparation of the entrails of animals."—Dated 30th January, 1856.

Erratum in Journal of 21st January.

50. For "boring, piercing," read "boring or piercing."

FOREIGN PATENTS.

BELGIUM.*

List of Patents of Inventions and of Importation Delivered on the 16th December, 1858.†

(*Communicated by the Belgian Government.*)

(For previous List, see No. 521 of this Journal.)

1. F. E. Gregoir, of Brussels, for "A lamp for burning photogen."—Dated 4th November, 1858.
2. J. T. Mambourg, of Liége, for "A system of economical stoves and kitchen ranges, with a revolving grate."—Dated 26th November, 1858.
3. P. E. Chéron, represented by O. Dardenne, of Liége, for an imported invention of "A forge apparatus, called 'regulating blast-pipe.'"—Dated 23rd November, 1858.—(French Patent, 30th May, 1857.)
4. P. J. Hanrey, of Monceau-sur-Sambre, a Patent of Improvement for "A system of distributing steam."—Dated 26th November, 1858.—(Original Patent, 18th September, 1858.)
5. Ed. Oosterlinck, represented by A. Hennelle, of Brussels, for an imported invention of "Manufacture of galvanic nettings, hair pins, and garters."—Dated 25th November, 1858.—(French Patent, 7th September, 1858.)
6. B. S. Piatoff, represented by H. Biebuyck, of Brussels, for an imported invention of "A process for welding iron."—Dated 25th November, 1858.—(French Patent, 13th November, 1858.)
7. L. Sneguireff and B. S. Piatoff, represented by H. Biebuyck, of Brussels, for an imported invention of "A process for coppering, silvering, and gilding cast and wrought iron and steel."—Dated 25th November, 1858.—(French Patent, 13th November, 1858.)
8. H. Wilde represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in lightning-rods,"—Dated 25th November, 1858.—(French Patent, 10th November, 1858.)
9. J. J. E. Lenoir and R. Boudon, represented by H. Biebuyck, of Brussels, for an imported invention of "An electro-magnetic machine."—Dated 25th November, 1858.—(French Patent, 26th August, 1858.)

* For the Belgian Patent Law, see Nos. 292 and 348 of this Journal.

† All Specifications of Patents which have been in force not less than six months, may be inspected or translations of them be had at the Library of the Great Seal Patent Office, where also translated Indexes may be consulted.

10 F. Preston and W. MacGregor, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in file-cutting machines."—Dated 25th Novembor, 1858.—(English Patent, 15th August, 1858.)

11. W. Sellers, represented by A. Anoul, of Ixelles, for an imported invention of "A machine for turning metal bars and shafts, cylindrical rings, and for screw-cutting."—Dated 25th November, 1858.—(American Patent, 1st June, 1858.)

12. Cordier Brothers, represented by X. Raclot, of Brussels, for an imported invention of "Manufacture of tissues without wrong sides for the manufacture of foot coverings." — Dated 26th November, 1858.—(French Patent, 3rd November, 1858.)

13. P. Brunon, represented by X. Raclot, of Brussels, for an imported invention of "A system of taps."—Dated 26th November, 1858.—(French Patent, 21st October, 1858.)

14. J. B. Borde, represented by H. Biebuyck, of Brussels, for "A process for bleaching textile substances to be used in the manufacture of paper pulp."—Dated 26th November, 1858.

15. L. G. Scriba, represented by H. Biebuyck, of Brussels, for an imported invention of "A combined porte-monnaie purse."—Dated 26th November, 1858.—(French Patent, 5th March, 1858.)

16. L. G. Scriba, represented by H. Biebuyck, of Brussels, for an imported invention of "A cigar-case."—Dated 26th November, 1858.—(French Patent, 21st November, 1858.)

17. J. Firnstahl, represented by H. Biebuyck, of Brussels, for an imported invention of "A machine with a double eccentric for printing square shawls of all lengths."—Dated 26th November, 1858.—(Austrian Patent, 18th September, 1856.)

18. R. J. Clifton, represented by H. Biebuyck, of Brussels, for an imported invention of "A system of castors for furniture." — Dated 26th November, 1858.—(French Patent, 25th November, 1858.)

19. J. M. Cosnard, represented by H. Puech, of Brussels, for an imported invention of "A system of split gas-burners called 'dividing and spreading burner.'"—Dated 26th November, 1858.—(French Patent, 23rd July, 1857.)

20. Ed. d'Heurle, represented by O. Dardenne, of Liége, for "A handle for holding legs of mutton, with moveable and jointed catches."—Dated 26th November, 1858.

21. Ed. d'Heurle, represented by O. Dardenne, of Liége, for an imported invention of "An apparatus called 'philaromatic measure and case.'"—Dated 26th November, 1858. — (French Patent, 2nd March, 1858.)

22. P. A. Cap, represented by L. C. Duru, of Brussels, a Patent of Improvement for "Construction of billiard-tables for drawing-rooms" — Dated 27th November, 1858.—(Original Patent, 15th March, 1858.)

23. V. F. Van Aughem, of Brussels, a Patent of Improvement for "A system of rollers for sinking stamps and seals."—Dated 29th November, 1858. —(Original Patent, 7th July, 1858.)

24. Charles Bertrand, represented by A. Matton, of Brussels, for an imported invention of "Improvements in mould stands of sugar works."—Dated 29th November, 1858.—(American Patent, 30th March, 1858.)

25. N. F. Boreiko de Chodzko, represented by A. Matton, of Brussels, for an imported invention of "A smoke-consuming apparatus."—Dated 29th November, 1858. — (French Patent, 20th July, 1858.)

26. W. Palmer, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in revolving fire-arms."—Dated 29th November, 1858.—(American Patent, 28th September, 1858.)

27. F. Cobbaert, of Grammont, for "A system of putting matches into frames."—Dated 27th November, 1858.

28. L. Cheneux, of Ougrée, for "An apparatus for introducing coal into coke-kilns, and for simultaneously removing coke therefrom." — Dated 29th November, 1858.

29. J. Desmet Séant, of Mons, for "An apparatus with a continuous rotation applicable to gas-lighting."—Dated 29th November, 1858.

30. J. Félix, represented by A. Allard, of Brussels, a Patent of Improvement for "Additions to his system of castors for furniture."—Dated 30th November, 1858. — (Original Patent, 11th July, 1856.)

31. D. J. Hainaut, of Watermael Boitsfort, a Patent of Improvement for "Modifications in his economical heating and condensing apparatus."—Dated 30th November, 1858.—(Original Patent, 17th May, 1858.)

32. J. de Mannstein, represented by H. Biebuyck, of Brussels, for an imported invention of "Construction of furniture which may be taken to pieces and easily conveyed." — Dated 30th November, 1858.—(Austrian Patent, 20th May, 1857.)

33. H. Comblain, of Saive, a Patent of Improvement for "Modifications in his system of fire-arms."—Dated 29th November, 1858.—(Original Patent, 31st March, 1854.)

34. P. Olivier, of Herstal, for "Improvements in Lefaucheux's guns."—Dated 29th November, 1858.

35. G. Uhlorn, represented by R. Centner, of Verviers, for an imported invention of "A machine for bevelling the teeth of fillet-cards."—Dated 1st December, 1858.—(Prussian Patent, 25th August, 1858.)

36. J. A. C. N. Delpech, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "Additions to his force and lift pump."—Dated 1st December, 1858. — (Original Patent, 28th June, 1854.)

37. J. Courage and F. Bennett, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in furnaces for smelting, reducing and calcining ores, dross, scoria, and residues."—Dated 1st December, 1858.—(English Patent, 24th November, 1858.)

38. A. S. Béliard, represented by H. Biebuyck, of Brussels, for an imported invention of "A machine for pumicing felt hats."—Dated 1st December, 1858.—(French Patent, 12th August, 1858.)

39. C. Tillière, of Brussels, for 'A motive-wheel with moveable wings or ladles, applicable to all currents of water."—Dated 1st December, 1858.

40. F. S. Perrave-Michal, represented by A. Picard, of Brussels, for an imported invention of "A bridle without bit and curb-chain."—Dated 20th December, 1858.—(French Patent, 11th July, 1856.)

41. Tremouroux Brothers, and Burlet, of Saint Gilles-lez-Bruxelles, for "A cylinder of rolling-mills for the manufacture of spoons and forks of wrought iron."—Dated 2nd December, 1858.

42. E. C. Martin, represented by O. Daillencourt, of Brussels, for an imported invention of "Improvements in preparing natural phosphate of lime."—Dated 2nd December, 1858.—(French Patent, 8th September, 1858.)

43. A. Richard, represented by D. de Vos-Verraert, of Brussels, for "A bath that may be folded up."—Dated 2nd December, 1858.

44. F. Lombaer, of Molenbeek-St.-Jean, for "A system of moveable book-binding."—Dated 2nd December, 1858.

45. J. Descamps, of Quaregnon, for "A spring cage for extracting coal from pits."—Dated 27th November, 1858.

46. Th. Greenwood and J. Batley, represented by R. Busk, of Ghent, for an imported invention of "Improvements in machines for combing and heckling flax and other similar products."—Dated 1st December, 1858.—(English Patent, 8th January, 1858.)

47. Th. Greenwood, J. Batley, and J. Dockray, represented by R. Busk, of Ghent, for an imported invention of "Improvements in carding, cleaning, and cylindering cotton, wool, waste of silk, and other products."—Dated 1st December, 1858.—(English Patent, 8th October, 1858.)

48. C. Fleury, of Brouck-lez-Liége, a Patent of Improvement for "Modifications in his beverage called 'fair fleurine and white fleurine.'"—Dated 3rd December, 1858.—(Original Patent, 18th August, 1857.)

49. A. H. Blochouse, of Huy, for "An apparatus for lubricating axles of carts with grease in a solid state."—Dated 6th December, 1858.

50. J. C. F. Simiam, represented by A. Hennelle, of Brussels, for "A composition for preventing incrustations of steam boilers."—Dated 3rd December, 1858.

51. J. C. F. Simian, represented by A. Hennelle, of Brussels, for "An apparatus for introducing disincrustating substances into steam boilers."—Dated 3rd December, 1858.

52. L. F. H. Droinet and E. Maldant, represented by M. A. Mennons, of Brussels, a Patent of Improvement for "A system of metal packings of pistons of steam engines."—Dated 3rd December, 1858.—(Original Patent, 28th July, 1858.

53. J. A. Gautier, represented by A. Picard, of Brussels, for an imported invention of "Improvements in the manufacture of manure."—Dated 4th December, 1858.—(French Patent, 30th October, 1858.)

54. P. Seinsevin, of St. Josse-ten-Noode, for an imported invention of "A liqueur, called 'Tonivicine.'"—Dated 4th December, 1858.—(F. A. Seinsevin's French Patent, 2nd February, 1858.)

55. E. L. Pensuete, represented by J. Piddington, of Brussels, for an imported invention of "A steam engine for ramming and removing piles."—Dated 6th December, 1858.—(French Patent, 8th August, 1857.)]

56. P. B. E. Martin, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "An electro-motive apparatus."—Dated 6th December, 1858.—(Original Patent, 18th June, 1858.)

57. W. Moxon, Y. Clayton, and S. Fearnley, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in looms for weaving carpets and other looped fabrics."—Dated 6th December, 1858.—(French Patent, 2nd December, 1858.)

58. F. Durand and H. A. Pradel, represented by J. Sainthill, of Brussels, for an imported invention of "A self-acting loom for weaving figured stuffs."—Dated 6th December, 1858.—(French Patent, 3rd December, 1858.)

59. S. Lees, represented by J. Sainthill, of Brussels, for an imported invention of "Improvement in the manufacture of mineral oil."—Dated 6th December, 1858.—(English Patent, 5th January, 1858.)

60. C. de Poorter, of Ixelles, for "Processes for the manufacture of certain double strong and elastic tissues, being a substitute for Patent and other leather."—Dated 6th December, 1858.

61. P. J. Lejeune, of Liége, for "A system of breech-loading guns of one piece, being applicable to all fire-arms."—Dated 23rd November, 1858.

62. M. E. Mueseler, of Liége, for "Improvements in breech-loading pistols and their cartridges."—Dated 4th December, 1858.

FRANCE.

Current List of Patents of Invention and Certificates of Addition.

1858.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

Note.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

4886. Auguste Malet, of Vienne, département de l'Isère, for "A system of goffering cloth."—Dated 5th November, 1858.

* For the French Patent Law see No. 223 of this Journal.

4887. Armand Henry Marin, of 71, Rue Notre Dame, Troyes, département de l'Aube, a Certificate of Addition to his Patent of 24th September, 1858, for "Manufacture of coffee syrup."—Dated 8th November, 1858.

4888. Jacques Mayaud, of 20, Rue Groult d'Arcy, Vaugirard, département de la Seine, for "Purifying natural phosphate of lime."—Dated 27th October, 1858.

4889. Joseph François Bonnaterre, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A drainage pump."—Dated 27th October, 1858.

4890. Amand Hyacinthe Ferry, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, a Certificate of Addition to his Patent of 15th June, 1858, for "Improvements in the construction of brass instruments."—Dated 27th October, 1858.

4891. Thomas Keick, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "A supplementary mechanism applicable to all sewing machines."—Dated 28th October, 1858.

4892. Albert Fouquerelle and Co., of 20, Rue Bergère, Paris, for "Combinations of printed tissues."—Dated 28th October, 1858.

4893. Hippolyte Petitjean, represented by Castelbon, of 15, Passage des Petites Ecuries, Paris, a Certificate of Addition to his Patent of 12th May, 1857, for "A kind of Venetian blinds."—Dated 28th October, 1858.

4894. Joseph Mairet, represented by Girard, of 13, Rue Cadet, Paris, for "A machine for cutting continuous paper."—Dated 28th October, 1858.

4895. Pierre Nicolas Victor Jacquemin, domiciled with Vial, of 17, Rue des Juifs, Paris, for "A frame with slides, applicable to chimneys and chimney stoves."—Dated 28th October, 1858.

4896. Nicolas Toussaint, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of steel springs."—Dated 28th October, 1858.

4897. François Xavier Kukla, represented by Brade, of 22, Rue Ste. Anne, Paris, for "A calorifere stove heated by gas."—Dated 28th October, 1858.

4898. Jean Charles Martin, of 103, Quai Valmy, Paris, for "An apparatus for carburetting gas."—Dated 28th October, 1858.

4899. Jean Pierre Aimé Charlet, of 41, Rue Richelieu, Paris, for "A mode of rivetting shanks of buttons."—Dated 29th October, 1858.

4900. Messrs. Kilbourn, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in knitting frames."—Dated 29th October, 1858.—(English Patent, expiring 3rd September, 1872.)

4901. Etienne Vivien, of 13, Rue de Strasbourg, Chapelle St. Denis, for "Smoke-consuming chimneys with a direct current of air."—Dated 29th October, 1858.

4902. Sérphin Brothers, of 172, Faubourg St. Martin, Paris, for "An apparatus for mixing sugar."—Dated 29th October, 1858.

4903. Christian Auguste Jacob Behne, of 6, Rue Dubois, Champerret de Neuilly, for "A system of rescuing vessels."—Dated 29th October, 1858.

4904. Jean Adam Machenaud de Laterriere, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A machine for working timber."—Dated 29th October, 1858.

4905. Jean Louis Marie, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 22nd April, 1858, for "A system of pump for compressing air or gas and fluids, &c."—Dated 29th October, 1858.

4906. Charles Sanglier, of 55, Rue de Lourcine, Paris, a Certificate of Addition to his Patent of 2nd November, 1857, for "Applying copper to basket work."—Dated 29th October, 1858.

4907. Augustin Marie Herland, of 138, Rue de Ménilmontant, Paris, a Certificate of Addition to his Patent of 31st July, 1858, for "A system of mounting straps on drums and pulleys."—Dated 30th October, 1858.

4908. Jacques Etienne Daud, of 62, Rue Ménilmontant, Paris, a Certificate of Addition to his Patent of 24th September, 1858, for "Shoes and boots, &c."—Dated 30th October, 1858.

4909. Sénéchal and Bridlay, the former of Belleville, the latter of 19, Rue Rambuteau, Paris, a Certificate of Addition to their Patent of 16th February, 1858, for "A break for carriages."—Dated 30th October, 1858.

4910. Jean Marie Deyey, of 110, Faubourg St. Honoré, Paris, a Certificate of Addition to his Patent of 1st September, 1858, for "Counters (for games)."—Dated 30th October, 1858.

4911. Edouard Massey, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Kind of seal for wet stamps."—Dated 30th October, 1858.

4912. Armand Charles Messager, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A mechanical process for preparing vegetable hair."—Dated 30th October, 1858.

4913. Henry François Cohade, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A peculiar kind of figured thread."— Dated 30th October, 1858.

4914. William Warne, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the construction of elastic roads and linings of walls, and in the manufacture of elastic mats, brushes, and pads for packing."—Dated 30th October, 1858. — (English Patent, expiring 1st September, 1872.)

4915. Jacques Denis Montéage, of 144, Rue de la Villette, Belleville, for "Materials for hydraulic brickwork."—Dated 30th October, 1858.

4916. André Jacques Amand Gauthier, represented by Brade, of 22, Rue Ste. Anne, Paris, for "Improvements in the manufacture of manure."—Dated 30th October, 1858.

4917. Jean Backhausen, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Manufacture of fabrics with velvet and chenille designs, of all colours, and without wrong sides."—Dated 30th October, 1858.—(Austrian Patent, expiring 15th March, 1872.)

4918. Hendrickx Brothers, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "An apparatus for obtaining gas for domestic purposes.' —Dated 30th October, 1858.—(American Patent expiring 27th January, 1872.)

4919. Louis Fleurus Gustave Petitpierre-Pellion, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in centrifugal hydro-extractors, for finishing and drying tissues, filamentous and pulverulent substances, and for treating sugar."—Dated 30th October, 1855.

4920. Rigolet and Co., represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to their Patent of 16th June, 1857, for "A continuous filter worked by pressure."—Dated 30th October, 1858.

4921. Lenordez, Paulet, and Vasner, the former of Neuilly, the second of Thernes, and the latter of Clichy la Garenne, for "A thrashing machine."—Dated 2nd November, 1858.

4922. Antoine Fidèle Amand Bout, domiciled with Toutain, of 19, Rue Molière, Auteuil, for "A swimming and life apparatus, called 'sandals of Neptune.'"—Dated 2nd November, 1858.

4923. Prosper Sauvage, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "A voltaic element for graduating the current."—Dated 2nd November, 1858.

4924. Charles Louis Barrois, of 18, Rue de Jouy, Paris, for "A regulating perigraphic or periendographic slide."—Dated 2nd November, 1858.

4925. Jean Joseph Etienne Lenoir, of 6, Rue des Filles du Calvaire, Paris, a Certificate of Addition to his Patent of 26th August, 1858, for "An electric motor"—Dated 2nd November, 1858.

4926. Charles Joseph Mettais, of 8, Rue des Jeuneurs, Paris, for "A goffering and quilling machine."—Dated 2nd November, 1858.

4927. Auguste Michel Anisit Pravet, of Caserne de Tournon, Paris, for "A system of stops by means of which fiery horses are paralyzed without fail."—Dated 2nd November, 1858.

4928. Messrs. Hublier, of 18, Rue Castex, Paris, a Certificate of Addition to their Patent of 11th December, 1858, for "A registering apparatus for carriages."—Dated 2nd November, 1858.

4929. Joseph Vallod, of 26, Rue d'Angoulême du Temple, Paris, a Certificate of Addition to his Patent of 2nd October, 1852, for "An apparatus for lubricating shafts, axles, and pivots, &c."—Dated 2nd November, 1858.

4930. Aléxandre Nicolas Theroude, of 5, Rue de Montmorency, Paris, for "A mechanical apparatus for entertainments at evening parties."—Dated 2nd November, 1858.

4931. Louis Sautter and Co., represented by Maurice Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of reflectors of foliated glass."—Dated 2nd November, 1858.

4932. James Stuart, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in distilling asphalt, pitch, tar, and other bituminous substances."—Dated 2nd November, 1858.—(English Patent, expiring 26th May, 1872.)

4933. Frederick William Mowbray and James Brodley, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in means or apparatus employed in weaving."—Dated 2nd November, 1858.—(English Patent, expiring 8th April, 1872.)

4934. Louis Victor Lemaignen, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An economical process for the manufacture of cloth, Lisieux stuffs, and beaver for foot-coverings."—Dated 2nd November, 1858.

4935. Abel Joseph Antoine Allié, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Instruments for measuring the dimension of the head for hats."—Dated 2nd November, 1858.

4936. Charles Pierre Pauthier, of 261, Rue St. Denis, Paris, for "Manufacture of gimp lace-work on small looms."—Dated 2nd November, 1858.

4937. Antoine Mattei, of 3, Place Sorbonne, Paris, for "An instrument called 'forcipine (forceps.)'"—Dated 3rd November, 1858.

4938. Pierre Louis Rossignol, of Rue du Bail, Fécamp, département de la Seine Inférieure, for "A kind of axles."—Dated 4th November, 1858.

4939. Eugène Lacroix, of 23, Boulevart St. Hilaire, Rouen, département de la Seine Inférieure, for "A mechanism for rendering propellers variable."—Dated 6th November, 1858.

4940. Charles Félix Sebille, of 4, Rue Dudruzène, Nantes, département de la Loire Inférieure, a Certificate of Addition to his Patent of 28th November, 1857, for "Manufacture of leaden pipes that are tinned inside."—Dated 8th November, 1858.

4941. Julien Aléxandre Nicolleau, of 3, Rue du Chapeau Rouge, Nantes, département de la Loire Inférieure, for "A rolling-mill for dressing and bending metallic flat bands."—Dated 8th November, 1858.

4942. François Rochet, of St. Just la Pendice, département de la Loire, for "Dressing yarns of thread, cotton, wool, hair, horse-hair, for being woven and twisted in a dry state."—Dated 8th November, 1858.

4943. Pierre Rigola, of 8, Rue Boileau, Nantes, département de la Loire Inférieure, for "A mode of drying, sorting, and pressing matches."—Dated 8th November, 1858.

4944. Emile Cuvelier, of Anzin, département du Nord, for "Miners' lamps."—Dated 8th November, 1858.

4945. Millot Brulé, of Sault-des-Rethel, département des Ardennes, for "An agglutinant and retractible truss."—Dated 10th November, 1858.

4946. Jean Kissel, of 14, Rue Bonafous, Bordeaux, département de la Gironde, a Certificate of Addition to his Patent of 12th July, 1854, for "A spring mattress."—Dated 10th November, 1858.

4947. Fulgence Jean Baptiste Galois, of 16, Rue Napoléon, Amboise, département d'Indre et Loire, a Certificate of Addition to his Patent of 8th December, 1857, for "A moveable and inexplosive coffee-pot."—Dated 6th November, 1858.

4948. Etienne François Rey-Guilliard, of 13, Boulevart St. Guillaume, Montpellier, département de l'Hérault, for "Cigaret paper that cannot be unrolled." — Dated 8th November, 1858.

4949. Anne Jean Baptiste Jobard Eugène du Mesnil, of Brazey-en-Plaine, département de la Côte d'Or, for "A windmill applicable to agricultural and industrial purposes."—Dated 8th November, 1858.

4950. Edouard Corne, of Libon, commune de Monsempron, département de Lot et Garonne, for "Inodorous fecal manure."—Dated 9th November, 1858.

4951. Pasturel and Gentets, of 25, Rue de Chartres, Lyon, département du Rhône, a Certificate of Addition to their Patent of 19th November, 1857, for "A spinning machine."—Dated 9th November, 1858.

4952. Auguste Verdier, of Montauban, département de Tarn et Garonne, for "A system of pumps."—Dated 9th November, 1858.

4953. Aléxandre Royaux, of Leforest, département du Pas de Calais, a Certificate of Addition to his Patent of 30th April, 1856, for "Improvements in the manufacture of yellow tiles."—Dated 10th November, 1858.

4954. Messrs. Heau, of 28, Rue de l'Empereur, Orléans, département du Loiret, for "A machine for dressing iron." — Dated 10th November, 1858.

4955. Auguste Guermonprez, of Rue d'Arras, Lille, département du Nord, for "Purified fat, oils, oleine of horses, oleine of tallow, being a substitute for olive oil."—Dated 11th November, 1858.

4956. Pierre François Guillot, of 29, Route de Choisy, near la Barrière de Fontainebleau, for "A process for controlling telegraphic messages by means of the printing manipulator."—Dated 3rd November, 1858.

4957. Dissard and Fermery, the former of 30, Rue d'Assas, Paris, the latter of Belleville, for "Applying a kind of ribbon to metrical measures." —Dated 3rd November, 1858.

4958. George Pigott, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in Jacquart machines used in the manufacture of net, lace, and other tissues." — Dated 3rd November, 1858.

4959. Aléxis François Marie Picard, of 4, Rue Beauregard, Paris, for "A system of controlling railway tickets."—Dated 3rd November, 1858.

4960. Rudolphe Bodner, represented by Richard Lloyd, of 2, Rue de Paradis Poissonnière, Paris, for "An apparatus for removing sands, mud, and other similar substances from docks, canals, harbours, rivers, &c."—Dated 3rd November, 1858.—(English Patent, expiring 24th April, 1872.)

4961. Nathaniel Shattswell Dodge, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the treatment of the waste of vulcanized india rubber."—Dated 3rd November, 1858.

4962. Pierre Joseph Pouplin, of 87, Rue Ménilmontant, Paris, for "A drawing-room pistol."— —Dated 3rd November, 1858.

4963. Newmann Rodier, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in apparatus for regulating the flow of gas." —Dated 3rd November, 1858.—(English Patent, expiring 26th August, 1872.)

4964. Charles François Bailly, of 16, Quai de l'Ecole, Paris, for "Machine for washing and drying linen."—Dated 3rd November, 1858.

4965. Louis Aléxandre Foret, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, a Certificate of Addition to his Patent of 6th August, 1858, for "Manufacture of fabrics."—Dated 3rd November, 1858.

4966. Charles Edouard Lecomte, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Cigar-cases, watch-cases, &c."—Dated 3rd November, 1858.

4967. Dominique Aléxis Ernest Renault, o 69, Rue de Vaugirard, Paris, for "A process for casting curved and hollow branches for gas lights." —Dated 3rd November, 1858.

4968. Cordier Brothers, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "Preparing flannel tissues for the manufacture of foot coverings thereof."—Dated 4th November, 1858.

4969. Géry François Joseph Griffon, of 15, Quai Bourbon, Paris, for "An instrument for taking out money from cash-boxes."—Dated 4th November, 1858.

4970. Aléxandre Raffin, domiciled with Dugenne, of 81, Rue Rambuteau, Paris, a Certificate of Addition to his Patent of 22nd July, 1858, for "Arrangements in low warp looms."—Dated 4th November, 1858.

4971. Valery Jean Baptiste Platel, of 22, Rue Notre Dame de Nazareth, Paris, a Certificate of Addition to his Patent of 9th July, 1857, for "A system of guns."—Dated 4th November, 1858.

4972. Joseph Alcibiade Paulin Mestadier, of 119, Boulevart Montparnasse, Paris, for "A system of crotchets of several wires."—Dated 4th November, 1858.

4973. Pierre Simon, of 6, Rue d'Orléans à la Vilette, for "A process for drying wood."—Dated 4th November, 1858.

4974. Jacques François Vigny, of 19, Rue du Temple, Paris, for "An apparatus for milling chocolate."—Dated 4th November, 1858.

4975. Victor Ferdinand Jeauneau, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 7th November, 1857, for "A flower chest or box." —Dated 4th November, 1858.

4976. Charles Philippe Hecht, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A kind of smoking-pipes."—Dated 4th November, 1858.

4977. Paul Alexandre Brunet, of 118, Rue de Paris, St. Denis, a Certificate of Addition to his Patent of 21st May, 1858, for "A kind of clogs." —Dated 4th November, 1858.

4978. Camus, Giboire, and Petit, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "Improvements in railway chairs."—Dated 4th November, 1858.

4979. Reader and Dewicki, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in looms for manufacturing lace, embroidered or bobbin tissues, and other similar canvass."—Dated 4th November, 1858.—(English Patent, expiring 8th February, 1872.)

4980. Jules François Norbert Mathon, domiciled with Coltat, of 110, Rue d'Enfer, Paris, for "A rotary steam engine called 'cyclodynamic engine.'"—Dated 5th November, 1858.

4981. Ciriaco Novi, domiciled with Frecassi, of 1, Rue St. Pierre Montmartre, Paris, for "A kind of masks."—Dated 5th November, 1858.

4982. François Tobie, of 5, Rue Basse du Transit, Vaugirard, a Certificate of Addition to his Patent of 7th July, 1858, for "A warlike machine for the artillery."—Dated 5th November, 1858.

4983. Louis Augustin Gouy, domiciled with Hamot, of Rue Aubry le Boucher, Paris, for "A kind of tricot."—Dated 5th November, 1858.

4984. Guillaume Bac, of 12, Rue Portefoin, Paris, for "A vertical machine for filing metallic eyelets." —Dated 5th November, 1858.

4985. Vincent Victor Falour, represented by Castelbon, of 15, Passage des Petites-Ecuries, Paris, a Certificate of Addition to his Patent of 3rd August, 1858, for "A collar, applicable to all traction horses."—Dated 5th November, 1858.

4986. Jacques Krafft, of 9, Rue de Paradis Poissonnière, Paris, for "Process for making india-rubber billiard cues."—Dated 5th November, 1858

4987. Louis Norbert Gourguechon, of 148, Rue de Rivoli, Paris, for "A system of inlaid floor."— Dated 5th November, 1858.

4988. Joseph Pierre Gillard, represented by Brade, of 22, Rue Ste. Anne, Paris, for "Improvements in apparatus for obtaining hydrogen gas by means of water-steam, and applying the same to lighting and heating." — Dated 5th November 1858.

4989. Whaite and Sener, represented by Gardissal, of 29, Boulevart Montmartre, Paris, for "Improvements in coffee pots."—Dated 5th November, 1858.—(American Patent, expiring 22nd May, 1870.)

4990. Etienne Avoies Fleureau, of 27, Rue Montorgueuil, Paris, for "A sytem of spittoons." —Dated 6th November, 1858.

4991. Adolphe Auguste Goupil, represented by Dreyfous, of 54, Rue de Bondy, Paris, a Certificate of Addition to his Patent of 11th April, 1857, for "A machine for unheading and gutting sardines." —Dated 6th November, 1858.

4992. Thomas Preston, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of tissues with a cut pile on warp looms."—Dated 6th November, 1858. —(English Patent, expiring 5th May, 1872.)

4993. Jean Auguste Bazet, of 9, Rue Lafayette, Paris, a Certificate of Addition to his Patent of 1st October, 1857, for "A so-called 'neogasogene apparatus for obtaining artificial gaseous beverages.'"—Dated 6th November, 1858.

4994. Louis Auguste Tellier, of 11, Rue Lebouteux, Batignolles, for "Manufacture of flannel combined with insulating substances for soles, plastrons, &c."—Dated 6th November, 1858.

4995. Justus Liebig, represented by Pelouze, of 11, Quai Conti, Paris, a Certificate of Addition to his Patent of 10th April, 1858, for "Process for coating mirrors with copper or gold."—Dated 6th November, 1858.

4996. Jacinto Barrau, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in processes for friezing pile fabrics."— Dated 6th November, 1858.—(Spanish Patent, expiring 28th October, 1872.)

4997. Pierre Bruno Joseph Elie Cabanes, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction and arrangement of corn mills."—Dated 6th November, 1858.

4998. Auguste Prouvost, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 4th April, 1857, for "Arrangements in boilers for generating, superheating, and regenerating steam." — Dated 6th November, 1858.

4999. Auguste Prouvost, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 22nd December, 1856, for "Improvements in the arrangement of steam-boilers."— Dated 6th November, 1858.

5000. Auguste Prouvost, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certifiate of Addition to his Patent of 9th September, 1857, for "A pyromotor, or machine worked by air, gas, steam, &c."—Dated 6th November, 1858.

5001. Jean Baptiste Tarlot, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 14th October, 1858, for "Improvements in thrashing machines." — Dated 6th November, 1858.

5002. Gustave Palmer Harding, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of hats."—Dated 6th November, 1858.

5003. Adéon Férandelle, domiciled Rue St. Honoré, Hôtel du Puy de Dôme, Paris, for "An hydraulic wheel."—Dated 8th November, 1858.

5004. Jean Charles Martin, of 103, Quai Valmy, Paris, a Certificate of Addition to his Patent of 28th October, 1858, for "An apparatus for carburetting gas."—Dated 8th November, 1858.

5005. Mundo, Briollet, Dumontet, and Co., domiciled 11, Rue de Sèvres, Paris, for "A chemical and mechanical process for obtaining heat at a cheap rate."—Dated 8th November, 1858.

5006. Joseph Toussaint Caussemille, of 12, Boulevart de la Gare, Marseille, département de Bouches du Rhône, for "Arrangements in cigarets paper."—Dated 5th November, 1858.

5007. Joseph Toussaint Causemille, of 12, Boulevart de la Gare, Marseille, département des Bouches du Rhône, for "Arrangements in cigaret-paper."—Dated 6th November, 1858.

5008. Saurageot and Greisch, of Montélimar, département de la Drôme, for "A system of levers for switches on railways."—Dated 8th November, 1858.

5009. Rebouillon and Allemand, the former of Compagne Imbert, the latter of 54, Rue Neuve, Marseille, département des Bouches du Rhône, for "Applying the game of trente et un to cross-bow shooting."—Dated 8th November, 1858.

5010. Edmond Demars, of 10, Rue Constantine, Lyon, département du Rhône, for "Compressed beer-yeast exempt from bitterness."—Dated 10th November, 1858.

5011. Louis Matton, of Lozanne, département du Rhône, for "A compound lever for raising water."—Dated 10th November, 1858.

5012. Barthélemy Picard, of Fontenay le Chateau, département des Vosges, a Certificate of Addition to his Patent of 11th June, 1857, for "A new system of grinding-stones."—Dated 12th November, 1858.

5013. Frédéric Etienne Vernet, of Vaison, département de Vaucluse, for "A suction lift and projecting pump with a mixed system and without friction."—Dated 12th November, 1858.

5014. Claude Auguste Vuillermoz, of Nantua, département de l'Ain, for "Cards moved by water."—Dated 12th November, 1858.

5015. Armand Febvre, with Mr. Dessaigne, of 21, Cours Napoléon, Lyon, département du Rhône, a Certificate of Addition to his Patent of 14th November, 1857, for "A methodical apparatus for concentrating sulphuric acid at the highest degree."—Dated 12th November, 1858.

5016. Béchet and Grangier, of Avignon, département de Vaucluse, for "A self-acting chain pump applicable as a motor and water-raising machine."—Dated 13th November, 1858.

5017. Ernest Jadin, of Ste. Suzanne, Ile de la Réunion, for "Improvements in zinc coverings of houses."—Dated 11th November, 1858.

5018. Guérin and Béjot-Gandel, of Verdun-sur-le Doubs, département de Saône et Loire, for "A system of pumps."—Dated 9th November, 1858.

5019. Michaux and Co., represented by Bazin, of Anzin, département du Nord, for "A lubricator for transmission machinery."—Dated 11th November, 1858.

5020. Lacroix, Laroche, and Co., of Larochandy, département de la Charente, for "A process for impregnating paper, during its manufacture, with any liquid in order to render it dioptric, opaque, ribbed, &c."—Dated 11th November, 1858.

5021. Pierre Nicolas Cordebart, of Angoulême, département de la Charente, for "Applying a metallic lattice to the movable part of cast-iron frames of skylights."—Dated 11th November, 1858.

5022. Jules Drounau, of Cognac, for "An iron hoop applicable to casks in general, and which may be lengthened or narrowed by means of rivetted hooks."—Dated 13th November, 1858.

5023. Louis Jacques Château, of Fontaine la Guyon, département d'Eure et Loire, for "An agricultural implement."—Dated 13th November, 1858.

5024. Charles Chrétien, of 50, Rue d'Armentières, Lille, département du Nord, for "An economical washing machine with a reciprocating motion."—Dated 15th November, 1858.

5025. Edouard Augustin Boudier, of 22, Rue Méridienne, Rouen, département de la Seine Inférieure, a Certificate of Addition to his Patent of 8th December, 1857, for "Arrangements in steam engines."—Dated 11th November, 1858.

5026. Edouard Tomlinson, represented by Burel, of 3, Rue d'Harcourt, Rouen, département de la Seine Inférieure, for "Improvements in the manufacture of spinning tubes, and machines and apparatus used therein."—Dated 13th November, 1858.

5027. Mauroux, of Passage, département de Lot et Garonne, a Certificate of Addition to his Patent of 24th May, 1858, for "A mode of heating steam boilers, &c."—Dated 15th November, 1858.

5028. Jean Adolphe Aubert, of 33, Chemin du Coudray, Nantes, département de la Loire Inférieure, a Certificate of Addition to his Patent of 17th August, 1858, for "A harvesting machine."—Dated 15th November, 1858.

5029. Jean Nouet, of 5, Rue Charles au Mans, département de la Sarthe, for "A mechanism for immediately putting off fiery horses from carriages."—Dated 15th November, 1858.

5030. François de Amegaza, of 65, Cours d'Albret, Bordeaux, dèpartement de la Gironde, for "A machine for regenerating power."—Dated 15th Novembvr, 1858.

5031. Pierre Antoine Eugène Regnauld d'Epercy, of 92, Rue Trésorie, Bordeaux, département de la Gironde, for "A constant battery without porous diaphragms."—Dated 15th November, 1858.

5032. Pierre Bardelle, of Metz, déptrtement de la Moselle, a Certificate of Addition to his Patent of 10th October, 1857, for "A system of stopping fiery horses instantaneously."—Dated 15th November, 1858.

5233. Chrisostome Eyraud, of 3, Rue du Vernay, St. Etienae, département de la Loire, for "Revolving guns and pistols with fire-lock and gearing."—Dated 15th November, 1858.

5034. Athanase Girard, of 25, Rue de l'Intendance, Tours, département d'Indre et Loire, for "Railway signal masts."—Dated 10th November, 1858.

5035. Charles Ruffet, of Avenue de Launay, Nantes, département de la Loire Inférieure, a Certificate of Addition to his Patent of 15th January, 1858, for "A safety apparatus for feeding steam boilers."—Dated 16th November, 1858.

5036. Charles Isidore Constant Venant, of 36, Rue de la Poterne, Orléans, département du Loiret, for "A smoke-consuming ventilator."—Dated 15th November, 1858.

5037. Fortunat Finance, of St. Dié, département des Vosges, a Certificate of Addition to his Patent of 20th November, 1856, for "A machine for forging nails."—Dated 15th November, 1858.

5038. Pierre Joseph Glotin, of 12, Rue des Faussets, Bordeaux, département de la Gironde, a Certificate of Addition to his Patent of 30th July, 1858, for "A propellor of vessels, &c."——Dated 15th November, 1858.

5039. Debas-Talabas, of Castres, département du Tarn, a Certificate of Addition to his Patent of 24th October, 1857, for "Improvements in lithographic presses."—Dated 15th November, 1858.

5040. Joseph Antoine Dalmas, of 44, Rue Haute Rotonde, Marseille, département des Bouches du Rhône, a Certificate of Addition to his Patent of 21st April, 1858, for "Inodorous basins of closets."—Dated 16th November, 1858.

5041. Charles Levy, of Bams, département des Vosges, for "A machine for the manufacture of nails."—Dated 16th November, 1858.

5042. Camion Brothers, of Moremon, département des Ardennes, for "A machine for preparing sand for castings, &c."—Dated 16th November, 1858.

5043. Augustin Zeiger, of 42, Place Impériale, Lyon, département du Rhône, for "Substituting metallic blades for chords in pianos."—Dated 17th November, 1858.

5044. Dupalais Beaud and Prévost, of 76, Cours Bourbon, Lyon, département du Rhône, for "Toilet vinegar, called 'anti-nephitic water.'"—Dated 17th November, 1858.

5045. Cabany, of Anzin, département du Nord, for "Double wedges for railways."—Dated 18th November, 1858.

5046. Joseph André Vaillant, of 8, Rue Neuve Jéninci, Alger, for "A truss with a slight and gradual pressure."—Dated 28th October, 1858.

5047. Millon Marchessaux and Ferrand, of Alger, a Certificate of Addition to their Patent of 7th November, 1857, for "A mode of vulcanizing coal."—Dated 4th November, 1858.

5048. Gravier and Laval, of Nîmes, department du Gard, for "Manufacture of a fabric for making plush carpets."—Dated 15th November, 1858.

5049. Joseph Isidore Morel, of Péronne, département de la Somme, for "Fountain pens."—Dated 16th November, 1858.

5050. François Caillier, of 9, Rue de la Fosse, Nantes, département de la Loire Inférieure, for "A machine for cutting gum."—Dated 17th November, 1858.

5051. Emile Babonneau, of Chateaubriand, département de la Loire Inférieure, for "A motor applicable to all machines."—Dated 17th November, 1858.

5052. Benoit Gilbert Dutel, of St. Quentin département de l'Aisne, for "A machine for making festoons which are usually made by hand."—Dated 18th November, 1858.

053. Bickerton and Preston, represented by Daubréville, of 60, Boulevart de Strasbourg, Paris, for "A thermo-pneumatic lubricator for lubricating shafts, axles, and other parts of machinery in motion."—Dated 8th November, 1858.—(English Patent, expiring 12th April, 1872.)

5054. Louis Marie Trouble, of 1, Rue du Four St, Honoré, Paris, for "A printing handle applicable to wet stamps."—Dated 8th November, 1858.

5055. Messrs. Leblon-Lefebvre, represented by Amouroux, of 333, Rue St. Martin, Paris, for "A chicory composition called 'gluten.'"—Dated 8th November, 1858.

5056. Grivel and Mouilleron, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in the manufacture of lace, braid, and lace-work, and net tissues in general."—Dated 8th November, 1858.

5057. Jean Baptiste Loiseau, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Trimming ladies' cloaks and other similar dresses."—Dated 8th November, 1858.

5058. Gustave Jean Bourbouze, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A break applicable to all vehicles."—Dated 8th November, 1858.

5059. Rivoire, Devallois, and Delegue, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in metallic springs for petticoats."—Dated 8th November, 1858.

5060. Pierre Carmien, of 24, Rue des Marais, St. Martin, Paris, for "A regulating hour glass of electric clocks."—Dated 9th November, 1858.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 4th January, 1859, and each bearing that date.

No. 22,477. Henry B. Adams, of Brooklyn, N. Y., for an "Improved automatic boiler feeder."

"I am well aware that oscillating chambers have been used for the purpose of gauging or supplying water; therefore, I do not claim broadly the use of oscillating chambers for the purpose of supplying water to a steam boiler; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement and combination, substantially as herein shown and described, of the chambers L, L, shell K, and adjustable weight O, for the purposes set forth. I also claim the combination of the valves P with the chambers L, as and for the purposes herein shown and described."

No. 22,478. Jonathan Ball, of Elmira, N. Y., for an "Improved manufacture of umbrella rings."

"What I claim as my invention, and desire to secure by Letters Patent, as a new article of manufacture, is, an um-

brella ring, having the ends of the ribs or the stretchers and the wire to confine them cast within, as herein set forth."

No. 22,479. Thomas Bennett, of New York, N.Y., for an "Improvement in grinding mills."

"I do not claim broadly a grinding cone H placed within a conical shell D, for this is a well-known grinding device, and is employed in a great variety of mills; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the adjustable conical shell D, in combination with the grinding cone H, placed or secured upon a shaft C having no end play or longitudinal adjusting movement, the parts being arranged substantially as and for the purpose set forth. I further claim, in combination with the adjustable shell D and cone H, the cob-cutting D^1 permanently attached to the shaft C, and having its shell I fitted over the end of shell D, for the purpose set forth."

No. 22,480. Lewis Bishop, of Talladega, Ala., for an "Improvement in elastic saddles."

"I am aware that elastic saddles have been previously constructed, but so far I am aware a vertical play or spring has only been given the seat, no provision being made for a rocking movement. This rocking movement is an essential feature of the invention, it eases to a great extent the sudden jar attending the gait known as a trot, and as the motions of the animal can only be transmitted to the seat though the loops *a* and elastic bars B, B, it will at once be seen that the seat C will neutralize or ease to a very great extent the sudden jars, concussions, &c. attending the movement of the animal. I do not claim broadly the employment or use of a spring or elastic seat attached to a saddle, for such device has been previously used; but so far as I am aware a rocking movement in connection with a vertically vibrating one has not hitherto been given the seat. What I claim, and desire to secure by Letters Patent, as an improved article of manufacture, is, a saddle having a seat C suspended on springs B, by means of loops *a* and eyes *b*, and otherwise made as herein shown and described."

No. 22,481. Micheal Bomberger, of Hummelstown, Pa., for an "Improvement in corn shellers."

"What I claim as my invention, and desire to secure by Letters Patent, is, so arranging the rollers E, E (provided with helical springs, as described), in combination with the loose rings *h*, *h*, as to operate in the manner and for the purposes as set forth. I also claim the employment of the loose bar G, when arranged with rollers E, E, helical springs *f*, adjusting bars D, D, and shelling cylinder B, substantially as and for the purposes described."

No. 22,482. William H. Brown, of Middletown, N. Y., for an "Improvement in horse rakes."

"What I claim as new, and desire to secure by Letters Patent, is, the arrangement and combination of the segment rack *e*, toothed sector and arms *g*, *h*, rod *i*, lever *j*, and frame E, as and for the purpose herein shown and described."

No. 22,483. A. C. Brownlick, of Buffalo, N. Y., for an "Improvement in harvesters."

"Having thus fully described my improvement in harvesters, what I claim, and desire to secure by Letters Patent, is, the axle F, in combination with the pinions *o*, *t*, *v*, D, shaft H, and pillow block N, constructed, arranged, and operating substantially in the manner described for the purpose specified."

No. 22,484. Joel Bryant, of Brooklyn, N.Y., for an "Improvement in seed planters."

"Having now set forth the nature and object of my invention, I hereby disclaim the use of all other cultivating plows and seed-planting apparatus, and desire to secure by Letters Patent, what I hereby claim as my invention, to wit, I claim in connection with the cultivating plow A the seed planting apparatus B, consisting of the drill plow *c*, seed box *d*, seed slide *e*, driving rod *r*, covering wheel *o*, and sod clearer *k*, the same being constructed and operating substantially as herein described, and for the purposes set forth."

No. 22,485. John Burt, of Hartford, Conn., and William W. Willant, of Syracuse, N. Y., for an "Improved construction of spectacles."

"What we claim, therefore, and desire to secure by Letters Patent is, the employment of the link joint A, to the nose piece X, for the purpose as described. The construction and arrangement of the short bows F, springs H, cups E, or pads, substantially in the manner and for the purpose as set forth and described."

No. 22,486. David Buzzell, of Charlestown, Mass., for an "Improved rocking chair."

"I do not claim an extension foot rest, or one so applied to a chair, as to be capable of being moved toward or away from the seat of the chair, and whether such foot rest be sustained by cords or weights or not, as such a foot rest is very old, and has been in use many years; nor do I claim a chair constructed as shown in the United States Patent, No. 19,352, but I claim in combination with the chair stand or frame, the movable leg rest and the sliding foot applied to such leg rest essentially as described, a mechanism by which, when the leg rest is moved or swung upon its fulcra or bearings, the sliding foot rest shall be moved on its supports, either toward or away from the seat, substantially as specified; I also claim the combination of the foot levers and the rockers applied to the chair or seat frame, and so as to operate together substantially as described. I also claim the combination of the toggles, the lifting levers, and their connections with the foot levers and rockers, the same being for the purpose of so operating the said rockers and levers as to cause the chair to be supported on the ground or floor, either by the two rocker or the four foot levers, as set forth. I also claim so combining a foot rest with a movable or turning leg rest, that the former shall be movable relatively to the latter, as specified."

No. 22,487. Calvin Cannaday, of Indianapolis, Ind., for an "Improvement in cotton cultivators."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, 1st, the two shares or blades E, E^1, when placed obliquely with each other, pivoted to their respective standards *c*, *c*, and adjusted by the rod G, nut *g*, and fork F, substantially as and for the purpose set forth. 2nd, the employment or use of the reciprocating hoe L, attached to the bar K, which is connected with the rod I, the hoe being operated substantially as shown, to wit, through the medium of the cam J, and spring *j*, in connection with the pin *l* and springs *n*, *n*, so that the transverse movement of the hoe relatively with the row of the plants will be obtained, and also a vertical movement to allow the hoe to clear the plants when passing over them previous to each thining out strokes, substantially as shown and described. 3rd, the lever N, when applied to the rod I, and used in connection with the thining hoe L, substantially as and for the purpose set forth."

No. 22,488. Augustus C. Carey, of Lynn., Mass., for an "Improved carpet fan sweeper."

"Thus far I have spoken of my improved fan as particularly applicable to sweeping carpets, but it is evident that it may also be employed upon machines for sweeping walks or even streets, and for gathering leaves from the surface of lawns, I do not, therefore, confine myself to its use simply as a carpet sweeper. Claim.—I do not claim the employment of a fan in a sweeping machine, for the purpose of conveying the dust to the receptacle after it has been swept up by a revolving brush, but what I do claim as my invention, and desire to secure by Letters Patent, as an improvement in sweeping machines, is the use of a fan F, for the purpose of sweeping the carpet or other surface in place of the revolving brush heretofore employed for the purpose."

No. 22,489. Gardner Chilson, of Boston, Mass., for an "Improvement in cooking range."

"I lay no claim to the arrangement of ovens, elevated chamber or shell and flues as claimed in the United States Patent, numbered 11,295, as my invention or arrangement of flues, and the mode of carrying the heat about the ovens differ essentially therefrom. What I do claim, is, my improved arrangement of flues against the bottoms, the outer sides, the tops, the inner sides, and in rear of the two ovens, whereby the smoke after passing over the the tops of the two ovens, or either, is made to descend between them, and pass out into the back flue in manner as described. And with the said arrangement of flues or the parts thereof to which the same specially belong, or in other words, the top and diving flues of the two ovens, I claim the arrangement and application of a curved valve N, and its arched recess M, the whole being made to operate substantially in manner above described. I also claim the protector plate H, as combined and arranged with reference to the fire-place, the two ovens and the flue between the two ovens, and so as to support the ovens as set forth. I also claim the above described mode of making the upright flue D, leading from the fire-place or boiling chamber to the flue space about the oven, such flue being made with a reflecting back and tapering sides, and in other respects substantially as specified. I also claim the expansion safety plate *t*, as arranged with respect to the fire-place, and applied on the top plate of the boiling chamber in manner and for the purpose substantially as specified."

No. 22,490. Everard M. Clark, of Lancaster, Pa., for an "Improvement in smut machines."

"What I claim as my invention, and desire to secure by Letters Patent, are the diagonal grooved wings or beaters S,

the upper and longer grooved wings or beaters Q, the two sliding valves O, O, on the bottom of the machine for regulating the draught, when combined substantially as herein set forth."

No. 22,491. H. W. Collender, of New York, N. Y., for an "Improved billiard cue tips."

"What I claim as my invention, and desire to secure by Letters Patent, is, the new article of manufacture herein named, to wit, a cue leather or cue tip coated on its flat surface with a soluble gum or cement as described, for the purpose set forth."

No. 22,492. W. B. Culver, of Scranton, Pa., for an "Improvement in apparatus for hoisting and dumping coal."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement and combination of the rod G, bars *f*, E, *c*, *c*, *i*, *j*, *j*, bail H, and inclined guides *e*, as and for the purpose herein shown and described."

No. 22,493. George H. Dickerman, of Boston, Mass., for an "Improvement in band-boxes."

"I claim the combination of a removable standard with the paper band-box, arranged substantially in the manner described for the purpose herein-before set forth."

No. 22,494. John B. Duane, of Schenectady, N.Y., for an "Improvement in cultivators."

"Having described my invention, I claim and desire to secure by Letters Patent, the arrangement and combination of the frame D, having wheels (*g*), bar F, wheel G, bar E, and frame A, as and for the purpose herein shown and described."

No. 22,495. John W. Einhaus, of New York, N. Y., for an "Improved escapement for time-keepers."

"Having now described my invention, and its operation, I will proceed to set forth, what I claim and desire to secure by Letters Patent of the United States. What I claim is, the use of a triangular-shaped pallet lever for an escapement pallet for clocks, watches, &c., with an escapement wheel contracted in the manner herein-before set forth; but irrespective of such use of my block pallet, I make no claim to the construction of the escapement wheel of itself, as my invention relates exclusively to the use and application of the block pallet substantially as herein-before set forth."

No. 22,496. George B. Field, of St. Louis, Mo., for an "Improvement in spading machines."

"Claim.—What I claim is propelling the shovels H, by means of single cranks G, attached to handles X, and guided by adjustable arms or levers L, so that the lower end of the shovels when in motion shall run in separate lines or furrows, the whole being constructed, arranged, and operating substantially as herein described."

No. 22,497. Micah Gillam, of Alba, Pa., for an "Improvement in washing machines."

"Having thus fully set out the construction and operation of my invention, what I claim as new, and desire to secure by Letters Patent, is, the beaters or lifters arranged upon the rocker shaft within the half cylindrical tub lined with anti-friction rollers, the rocker-shaft being operated by the lever, vertical shaft, and connecting rods, and the whole being constructed and operated as herein set forth."

No. 22,498. William Gourley and Isaac Krebs, of Winchester, Va., for an "Improvement in the means of operating carriage brakes."

"Having described in full, the nature, construction, and operation of our improvements, what we claim as new, and desire to have secured by Letters Patent of the United States, is, the construction and application of the compound or double lever *d*, *d*, *e*, *e*, as described, and the crank-shaped rubber rod or brake bar *g*, *h*, *i* and T-shaped spring L, when combined and operated substantially as herein set forth and described."

No. 22,499. E. H. Hancock, of Augusta, Geo., for an "Improved machine for sawing laths."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the combination of the peculiar spirally-toothed feed rollers G, G¹, ordinary toothed or fluted feed rollers H, H¹, and obliquely set guide or gauge O, when the whole is arranged as described, and relatively to the saws, for the purposes herein set forth. 2nd, the combination of the rollers G¹, H, swinging frames L¹, L¹, shaft J pinions K, K, spur wheel L, and cog-wheel D, substantially as and for the purposes set forth. 3rd, the arrangement of the swing table B, bearing a portion of the machinery with respect to the frame A, and the rest of the machinery thereon, as set forth."

No. 22,500. John S. Harbison, of Sacramento, Cal., for an "Improvement in bee hives."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the graduating chamber B, in combination with the curtain C, and ventilating passages E and F, whereby air is admitted without light, into the hive, arranged substantially as and for the purpose herein described. 2nd, providing the adjustable sectional comb-frames K, with the flexible metal clamps *b*, *b*, when the frames are constructed and arranged in the manner described, for the purposes specified. While not claiming broadly the removal of a tier of boxes at one operation, nor the boxes of a tier separately, by means of a clamp irrespective of the mode of construction, I do claim, 3rd, the device composed of the parts L, *f*, *d*, *c*, in combination with a horizontal tier of boxes, arranged and operated as and for the purposes described."

No. 22,501. John W. Hedenberg, of St. Louis, Mo., for an "Improvement in coffee pots."

"I do not claim the condenser or reservoir, as these have been used before; but what I claim as my invention, and desire to secure by Letters Patent, is, the application of the chimney or pipe to the open space between the coffee pot and the condenser, for the purpose of causing a current of cold air to pass between the coffee pot and condenser, as set forth."

No. 22,502. Charles Howell, of Cleveland, Ohio, for an "Improvement in rotary harrows."

"Having thus described my improvement, what I claim as new, and desire to secure by Letters Patent, is,—first, the arrangement and combination of three rotary harrows, when the axis of each is inclined, in the manner and for the purposes substantially as described. Secondly, the arrangement of the hook (*c*), in relation to the front harrow when combined with two harrows in the rear, arranged to operate in the manner set forth."

No. 22,503. Lucius J. Knowles, of Warren, Mass., for an "Improved method of operating the valves of pumping engines."

"Claim:—I am aware that steam valves have been operated by means of the exhaust steam as it escapes from the cylinder, but such device will manifestly not answer in an engine that is required to start automatically at any instant when steam is admitted, and whatever may be the position of the main piston, as after a short stop there will be no exhaust steam to actuate the valve; I am also aware that the slide valve of direct-action engines has been moved partly by a tappet arm upon the main piston rod, and through the balance of its throw by an auxiliary piston, actuated by steam admitted through a secondary valve, which valve was opened by the tappet arm which started the main valve; and I, therefore, lay claim to neither of the above devices; but what I claim as my invention, and desire to secure by Letters Patent, is, controlling the motions and positions of the plunger G exclusively by steam admitted from the steam chest and by suitable exhausts, as set forth, for the purposes specified. 2nd, I claim the within-described arrangement of the induction ports *a* and *p* with respect to the exhaust ports *z* and *h*, and with respect to the throw of the plunger G, for the purpose specified. 3rd, I claim admitting a quantity of steam before the advancing plunger through the passages *s*, *h*, and *i*, *r*, for the purpose of arresting its motion, as set forth. 4th, I claim the secondary exhaust ports *v*, v^2, operating as described, for the purpose set forth. 5th, the peculiar construction of the main valve F, whereby the pressure upon the same is relieved as it passes the center of its throw and the piston is caused to start more gradually, as set forth."

No. 22,504. Isaac Krebs, of Winchester, Va., for an "Improvement in the means of operating carriage brakes."

"Having described the nature, construction, and operation of my improvements, and being fully aware that rubber blocks and brakes have been applied to the hubs of wheels, and operated also by draw rods and levers; therefore, such devices in themselves I do not claim; but what I do claim, and desire to have secured by Letters Patent of the United States, is, the levers *h*, I, J, with movable fulcrum *g*, *g*, the sliding adjusting connection rod and tap *n*, *n*, P, the slotted clip or fulcrum support *d*, *e*, *f*, and the spring rubber *r*, *s*, when constructed and arranged in combination as herein-before set forth and described."

No. 22,505. JOHN H. LEACH, of Oakville, M'd., for an "Improvement in machines for sowing guano and other fertilizers."

"Having thus fully set out the construction and operation of my invention, what I claim as new, and desire to secure by Letters Patent, is,—1, the arrangement of the covering section of the drill within the frame of the roller section, as and for the purposes herein set forth; and in connection therewith, I claim the arrangement of the box between the hopper and distributing spout, the box being attached to the hopper by pliable or elastic material, and being vibrated with the spout by the toothed wheel upon the axle, as herein described."

No. 22,506. T. LUCE and J. H. MORRISON, of Detroit, Mich., for an "Improvement in railroad sleeping cars."

"Having thus described our invention, what we claim as new, and desire to secure by Letters Patent, is, the folding berth bottoms C attached to each side of a central partition B within the body of the car, in connection with the double row of single seats E, E, at each side of the car, with a passage way *n* between them, the innermost row of seats at each side of the car being provided with falling backs, and the whole arranged substantially as and for the purpose set forth."

No. 22,507. HENRY MAULE, of Philadelphia, Pa., for an "Improvement in railway alarm."

"Having thus described my improvement, what I claim as my invention, and desire to secure by Letters Patent, is, the employment of the lever C, D, or its equivalent, in combination with an extra rail I, I^1, and with the steam whistle, the whole arranged and operating, substantially as above described, for sounding the steam whistle at any desired parts of the road."

No. 22,508. R. C. MAUCK, of Conrad's Store, Va., for an "Improvement in corn harvesters."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, the bearing wheel G, arranged substantially as and for the purpose set forth. 2nd, the combination of the bearing wheel G, and the rest block *a* for submitting the stalk to the knife in the best manner to effect the cut. 3rd, guiding the machine by the passage of the groove I, over the stumps of the cut product."

No. 22,509. N. OLNEY and CHARLES H. KELLOGG, of Amhurst, Mass., for an "Improved spoke machine."

"We are aware that expanding cutter heads have been previously used, and we, therefore, do not claim broadly such device; but having thus described our invention, what we claim as new, and desire to secure by Letters Patent, is, the expanding cutter heads D, in connection with the guides or patterns G, G, I, attached to the reciprocating carriage F, in which the stick A^1 to be operated upon is placed the guides or patterns G, G, I, actuating the cutter heads respectively by means of the mechanism, substantially as shown and described for the purpose set forth. We further claim, in combination with the expanding cutter heads D, and the guides or patterns G, G, I, on the carriage F, the circular saws Y, Y, fitted in the frame V, operated automatically by the carriage F, substantially as set forth."

No. 22,510. A. J. PEAVEY, of South Montville, Me., for an "Improved machine for cutting and punching iron."

"I do not claim the universal die box as such; but what I claim as my invention, and desire to secure by Letters Patent, is, the cylindrical die box B, in combination with the circular punch socket D, both punch and die being by their means capable of revolution upon their axes and adjustment to the required angles of the teeth of the saw to be gummed as herein specified. I do not claim the dividing plate and the parts necessary for its convenient operation, nor operating the punches by lever and cam separately considered; but I do claim the combination of the dividing plate O and its appendages, substantially as described, with the punching apparatus in the manner and for the purpose specified."

No. 22,511. C. S. PETTENGILL, of New Haven, Conn., for an "Improvement in revolving fire-arms."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, combining the hammer and the rotating dog with the trigger by means of a forked tumbler H, and a cam L, working on the same pin, the said cam being formed with a notched tail *m*, to engage and operate in combination with a horn on the trigger, substantially as and for the purpose set forth. 2nd, the bent dog I, applied as described on a fixed conical stud on the center of the rear of the breech supported, and combined with a cam L, on the tumbler pin *c*, to operate substantially as described. 3rd, the arrangement of the helical main spring upon a bolt which is jointed to the hammer, and which slides through a fixed guide in the rear thereof, substantially as herein described."

No. 22,512. WILLIAM PROVINES, of Columbia, Mo., for an "Improved machine for ditching, grading, &c."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement and combination of the elevators I, rods K, shaft *f*, disk H, and shaft G, substantially as and for the purpose herein shown and described."

No. 22,513. C. B. ROGERS, of Deep River, Conn., for an "Improvement in machinery for pointing the teeth of hair combs."

"I do not claim broadly a wheel B, placed on a rotary shaft A, provided with a screw thread on its periphery, and recesses to form cutters irrespective of the form of said recesses, for such device is in common use; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, forming the recesses *c*, at the center and from the edges of the periphery of the wheel B, towards its center, so that each recess shall extend only partially across the periphery of the wheel and still cutting surfaces be formed entirely across it, without breaking or dividing the screw thread *b*, entirely across the wheel at any one point, substantially as and for the purpose set forth."

No. 22,514. PAUL A. SABBATON, of Albany, N. Y., for an "Improvement in sifting shovels."

"Having thus described my invention, I claim, and desire to secure by Letters Patent, as an improved article of manufacture, a screening shovel composed of malleable cast iron, and otherwise made as herein shown and described."

No. 21,515. GELSTON SANFORD, of Poughkeepsie, N. Y., for an "Improvement in grinding and crushing mills."

"What I claim as my invention, and desire to secure by Letters Patent of the United States, is,—First, the arrangement and combination of a conical grinding surface, with a concentric shell composed of stationary and adjustable wedges or staves, which are provided with a means of adjustment, substantially as herein-before described, and substantially for the purposes herein before set forth. Second, the arrangement of the projecting surfaces C^1 of the cone, substantially as herein-before described and shown, so that by reversing the direction of the rotation of the cone small or large bodies may be crushed and ground in the mill."

No. 22,516. WILLIAM F. SHAW, of Boston, Mass. for an "Improvement in lamps."

"Thus far the foraminous deflector has been spoken of as particularly applicable to lamps, but it is obvious that it may, with equal advantage, be employed in connection with gas burners. I do not therefore intend to confine myself to its use in the peculiar lamp above described, but intend to apply it wherever it may be found to be useful. I am aware that deflectors have been perforated with holes near their base, the body of the deflector being of unperforated sheet metal; but I lay no claim to such a deflector as it would not accomplish the ends which I have in view; but what I do claim as my invention, and desire to secure by Letters Patent, is, the foraminous deflector herein described, operating in the manner substantially as set forth. 2nd, I claim the foraminous deflector, in combination with the perforated bottom air chamber, as set forth."

No. 22,517. ISAAC M. SINGER, of New York, N.Y., for an "Improvement in sewing machines."

"What I claim as my invention, and desire to secure by Letters Patent, in sewing machines, is, placing the spool within the shuttle, without any attachment, so that the heads thereof shall run in contact with the case of the shuttle, to give the required drag, substantially as described. I also claim, in combination with the shuttle cases, and the spool placed therein, without any connection, substantially as described, the employment of the spring plates, substantially as described, to form spring bearings for the pivots of the spool, as set forth. And I also claim the shuttle case and spool placed therein without any attachment, as described, in combination with the inclosing plate and the face of the shuttle

race, substantially as described, by means of which combination the spool is held in place by simply placing the shuttle in its race substantially as described."

No. 22,518. David Stuart, of Philadelphia, Pa. for an "Improvement in Franklin stoves."

"I do not claim forming an air space or chamber in which air circulates behind or in contact with the fire backs of stoves, and passes thence in a heated condition into the apartment, as that has long been known and used, but what I do claim as my improvement in Franklin stoves, is, forming the fire back of such stoves by the front wall of a cell or chamber, around or on both sides of which the draught passes, and through which the air circulates, as set forth, said cell or chamber being constructed and connected with the stove, in the manner set forth."

No. 22,519. William Herrmann Stubble, of Boston, Mass., for a "Lithographic printing press."

"Claim.—I claim the cylinder of rollers *m*, in combination with a revolving tympan and scraper, operating as set forth for the purpose described. 2nd, I claim the method of interrupting the motion of the gears C^2, and of again engaging them with the rack by means of the cams f^2, lever E^2, and pin a^2, operating in the manner set forth. 3rd, I claim hanging the parts which operate the scraper on springs 17, in the manner substantially as specified."

No. 22,520. George W. Tolhurst, of Liverpool, Ohio, for an "Improvement in cultivators."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the flanged quadrants F, pivots D, clamp hook E, braces C and C^1, teeth A, B, and rigid frame G, in the manner and for the purposes herein set forth and described."

No. 22,521. Alonzo Warner and Cyrus A. Warner, of Bristol, Conn., for an "Improved catch for hanging drapery."

"We do not claim the device of S. R. C. Denison, patented August 5/56, or that of D. N. B. Coffin, June 9/57; but what we claim, and desire to secure by Letters Patent, for hanging drapery, is, the spring catch B, as a new and improved article of manufacture, constructed as and for the purpose specified."

No. 22,522. Daniel Watson, of Newport, Ohio, for an "Improved mode of operating drain ploughs."

"Having thus fully described the nature and operation of my ditching plow, what I claim therein as new, and desire to secure by Letters Patent, is, combining with the crab or anchor H, and the plow, a traveling capstan J, which are connected together by a rope or chain, as herein represented, for the purpose of working said plow, as described."

No. 22,523. William Wells, of Boston, Mass., for an "Improvement in corn shellers."

"I claim the arrangement and combination of the shelling wheel A, guide B, clearer D, and weighted or spring presser C, constructed and operating in the manner described, for the purpose specified."

No. 22,524. Alonzo Whitcomb, of Worcester, Mass., for a "Copying press."

"Having thus described my improvement in screw presses, what I claim therein as new, and desire to secure by Letters Patent, is, when the screw is arranged to pass through and traverse a nut in the cross bar, connecting the screw and platen with each other in presses, by means of a cap on the upper side of the platen, with a spiral thread on its interior to correspond with the thread on the lower end of the screw, substantially as described, and for the purpose as set forth.

No. 22,525. Benjamin F. Bee, of Harwich, Mass., assignor to himself and James A. Woodbury, of Boston, Mass., for an "Improved screw propeller."

"What I claim, therefore, as my invention, and desire to secure by Letters Patent, is, the combination of the cylinder *a* with the longitudinal plates *e*, substantially as described."

No. 22,526. B. Bridendolph, of Clear Spring, Md., assignor to himself and O. K. Bovey, of said Clear Spring, for an "Improvement in horse rakes."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement, substantially as shown, of the handles C, C, rake head A, shafts D, D, runners F, F, and links or rods E, for the purpose set forth."

No. 22,527. Matthew Chapman, of Greenfield, Mass., assignor to the J. Russell Manufacturing Company, of said Greenfield, for an "Improvement in attaching handles to cutlery."

"I do not claim making handles for cutlery by compressing the same into the proper form by means of dies, for this has been previously done, horn and other substances having been thus compressed for similar and analogous purposes; but having thus described my invention, what I claim as new and desire to secure by Letters Patent, is, placing the handles in the rough on the tangs of the implements with or without the rivets, and compressing the same while on the tangs into proper form by means of dies, substantially as and for the purpose set forth."

No. 22,528. James C. Cooke, of Middletown, Conn.' assignor to the Russell Manufacturing Company, of said Middletown, for an "Improvement in manufacturing webbing."

"I do not herein claim the double hose, but my improvement or new fabric; therefore I claim as a new manufacture a fabric or belting, made not only of two or more sets of body warps and a single filling thread, passed through the decussations of the said warps alternately or otherwise, but with confining warps arranged and crossed on the filling, and between the body warps and at various or numerous intervals between the two edges of the fabric, so as to bind together the cloths made by the body warps, and form them with no straight or continuous parallel ridges."

No. 22,529. Robt. Fitts, of New Ipswich, N.H., assignor to C. and G. C. Winchester, of Ashburnham, Mass., for an "Improved method of bending wood."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, bending a piece of wood around a fixed form by means of the series of blocks, levers and connecting bars, arranged and operating in the manner set forth. 2nd, and in combination with the above, I claim the spring face plate *u*, attached to the blocks E, substantially in the manner and for the purpose specified."

No. 22,530. William G. Hamilton, of New York, N. Y., assignor to John C. Hamilton, of said New York, for an "Improvement in bridge walls in boiler furnaces."

"The particular improvement which constitutes my said invention, and which I claim as having been originally and first invented by me, is, the hanging of the bridge wall upon an axis, in the manner described, or equivalent, by which it is made capable of being folded down out of the way, as set forth, and also the making of the axis hollow terminating with an opening forward as described and shown, for the purpose stated."

No. 22,531. David E. Hughes, of New York, N.Y., assignor to American Telegraph Company, of said New York, for an "Improvement in electro-magnetic telegraphing."

"I claim introducing into that portion of the electric current which passes to the opposite pole of the machine at the station where the operator is working a retarder, such substantially as herein described, whereby said portion shall not reach the near ground plate, until after the other portion of the same current shall have passed over the line wire, and reached the distant ground plate, whereby said current is enabled to flow through the machine situated at the place of the operator, as aforesaid, without setting said machine in motion, substantially as described."

No. 22,532. Damase Lamoureux, of New York, N.Y., assignor to Alexander Douglas and Samuel S. Sherwood, of said New York, for an "Improvement in manufacturing corsets and bustles."

"I do not claim making a bustle of hoops, either wholly or partially encircling the body of the wearer, and forced back away from the body upon the back side, by means other than the combination of the bustle with the corset. What I claim as my invention, and desire to secure by Letters Patent, is, the new article of manufacture constituting a corset and bustle, when constructed in the manner described for the purposes set forth."

No. 22,533. Stephen C. Mendenhall, of Richmond, Ind., assignor to Isaac Lamb, of said Richmond, for an "Improvement in looms."

"I claim herein as new, and desire to secure by Letters Patent, 1st, the treadle roller G, carrier E, F, and spring H, in combination with the scroll cam I, arranged in the box D, for the purpose of operating the treadles, substantially in the manner described. 2nd, the hook J, having an adjustable and hinged attachment to the breast beam, when combined with a set screw to determine its position, and operating on the scroll cam, in the manner set forth. 3rd, the combination with the treadle of the graduated series of mortises *z*, and pin *y*, for the purpose of regulating the width of the shed. 4th, the combination of the picker spring P' sliding catches *o*, triggers *u*, and straps Q, T, for the purpose of throwing the shuttle, as set forth. 5th, the combination of the double eccentric pulley R, S, and straps Q, T, with the set screws 6, arranged substantially in the manner described, for the purpose of expanding the picker spring P, in such a manner as to equalize the power at each forward motion of the lay or batten."

No. 22,534, Goodloe H. Taylor, of Shelburne, Mass., assignor to himself and William Sherwin, of Shelburne Falls, Mass., for an "Improvement in lasts."

"Having thus fully described the nature and object of my fastening, and shown wherein it differs from all other things for a similar purpose, what I claim therein as new, and desire to secure by Letters Patent, is, so pivoting the hook or lever *c* as that the strain shall come upon said pivot, and not upon the spring, by which means I effect a better and more certain fastening, as set forth and explained."

No. 22,535. James D. Willoughby, of Carlisle, Pa., assignor to C. M. Alexander, of Washington, D. C., for an "Improvement in sealing cans and bottles."

"Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is,—1st, the arrangement of the disks B and E, screw F, and top *c*, with the rubber D, in such a manner that when the rubber is compressed its periphery will press tightly against the insides of the can or bottle mouth, while its center presses against the rod or screw F, for the purpose of effectually excluding the air, as is herein fully described. 2nd, I also claim the subject of the 1st claim, in combination with the neck of the bottle or can, as constructed for the purposes herein set forth."

No. 22,536. Ephraim D. Rosencrantz and Willard H. Smith, of New York, N. Y, assignors to said Rosencrantz and Barton E. Clark, of said New York, for an "Improvement in burners for vapour lamps."

"What we claim as our invention, and desire to secure by Letters Patent, is, the employment of a tube A for holding the wick when provided with a plate (*a*) and perforations *f*, *f*, for the purposes set forth. We claim the employment of a cap D, or heater, having perforations (*b*, *b*,) tangential to its periphery, substantially as set forth, when used with a wick tube A, in the manner and for the purposes set forth."

No. 22,537. Charles E. H. Richardson, of Philadelphia, Pa., for an "Improvement in coffins."

"What I claim as my invention, and desire to secure by Letters Patent, is, the construction of a coffin or casket, made air and moisture tight by a double lining of cloth and cork, prepared and combined in the manner and for the purpose, substantially as above described."

Re-issues.

Abraham Coates, of New York, N. Y., for an "Improvement in regulating the flow of oil to the wick in carcel lamps." — Patented 25th March, 1856.—Re-issued 4th January, 1859.

"Claims.—What I claim as my invention, and improvement in lamps, in which the oil is forced to the wick so as to overflow, is, regulating the supply of oil to the burner by means of the self-employing drip cup, operating upon the supply valve. I claim also, placing the fountain or reservoir for the oil above the lens, with its draught opening, and its supply pipe within the barrel or chamber of the lens."

Henry Burt and James T. Hedden, of Newark, N. J., for an "Improved machine for making hames."— Patented 17th February, 1857.—Re-issued 4th January, 1859.

"Claim.—The forging of metal into useful forms by the employment of two or more pairs of rolls, having their surfaces cut away, and combined and rotating and pressing the metal progressively into shape, being conducted from one pair of rolls to another through the agency of the guides."

H. A. Harvey, of New York, N.Y., assignee through mesne assignment of Thomas W. Harvey, late of said New York, for an "Improvement in machinery for dressing screw heads."—Patented 18th August, 1846.—Re-issued 4th January, 1859.

"Claims.—First, the employment of a pair of spring pincers which receive the blanks one at a time, and presents them to the jaws point foremost. Second, in combination with the mandrel and jaws, or equivalent means for receiving and holding the screw blanks, the employment of a punch or driver for inserting the blanks to the required distance Third, the combination of the movable rest with the movable cutter head, and for the purpose of giving support to the blank and get out of the way so soon as the cutting operation is completed, and is claimed, whether the cutting operation be performed on the head or any other part oi the blank. Fifth, the particular manner of constructing the adjustable turning head, the slide or seat piece, the tool holder, sliding on the piece between the check pieces, with the respective adjustments thereof, combined, arranged, and operating so as to effect the setting of the tool. The manner of operating the griping dies, and of separating the blanks in the hopper and conveying them to the feeding fingers, being similar to those described and used in the machine for cutting the threads."

Anthony W. Goodell, of Brooklyn, N. Y., and Nelson R. Scovell, of Albany, N. Y., assignees through mesne assignment of Wm. Lyon, of Newark, N. J., for an "Improvement in sewing machines."—Patented December, 1854.—Re-issued 4th January, 1859.

"Claims.—First, the combination of a feeding foot, pressed on to the cloth and moved to feed the cloth, and then released from said cloth and returned to its former position with a clamping foot that is raised when the feed of the cloth takes place. Second, the vibrating bar, feeding foot, arm, and revolving studs, arranged and acting to communicate motion to the feeding foot. Third, a looping instrument, constructed with a cavity or notch and an eye carrying the second thread, and receiving a sideways movement after the said looper has passed through the loop of needle thread, for the purpose of carrying the second thread across and beyond the descending path of the needle, when said looper remains in a position for the needle to enter said cavity or notch as it descends between the looper and the second thread, and then said looper receives a sideways movement to its original position, to clear the needle in drawing back. Fourth, the reciprocating looper, formed with the cavity, and with an incline, in combination with a stationary screw, or its equivalent, to communicate the required sideways movement to the looper. Fifth, the arrangement of the segmental spring looper and arm on the rocking shaft, for the purpose of adjusting and securing (by the screws) the looping point in the desired position with great ease and accuracy."

Designs.

Conrad Harris and Paul W. Zoiner, of Cincinnati, O., assignors to Harris, Zoiner, and Co., of said Cincinnati, for a "Design for dining-room stoves."

"Claim.—The scrolls, figures, and fluting, thereby forming an ornamental design for dining-room stoves, to be called the 'Trio.'"

Conrad Harris and Paul W. Zoiner, of Cincinnati, Ohio, assignors to Harris, Zoiner, and Co. of same place, for "Designs for cook's stoves."

"Claim.—The scrolls, foliage, and mouldings, and thereby for an ornamental design for coal cooking stoves, to be known and called the 'Pluto.'"

Extensions.

Henry Stanley, of Poultney, Vt., for an "Improvement in coal stoves."—Patented 4th January, 1845.—Extended 4th January, 1859.

"Claim.—The manner in which I have combined and arranged the two stories thereof, consisting of two cylinders, with the eight triangular radiating flues arranged around and in contact with them, said flues communicating with the flue space in the plinth with the intermediate chamber and with the cornice space, the two latter being divided by partitions into anterior and posterior portions, and there being also openings through the upper end of the upper cylinder into the cornice space, it being distinctly understood that I do not make any claim to either of the individual parts, taken separately and alone, but that I limit my claim to the combination and arrangement thereof as a whole, not intending, however, by this claim, to confine myself, in constructing my stove, to the particular form of the respective parts, but to vary these as I may deem expedient whilst I attain the same end."

Eleazer Carver, of Bridgewater, Mass., for an "Improvement in saw cotton gin."—Patented 4th January, 1845.—Extended 4th January, 1859.

"Claim.—The combination of a cylinder brush, having fans on the end thereof with a cotton gin."

List of Specifications, &c. published during the week ending 20th January, 1859.

No.	Price.	Subject-Matter.
		1858 (*Disclaimer*).
23	3*d.*	Pneumatic pegs, brackets, &c.
158	3*d.*	Bending and reefing ships' sails, &c.
1248	7*d.*	Gas meters.
1341	1*s.* 5*d.*	Composing and distributing types.
1343	3*d.*	Preparing and casting metals.
1344	9*d.*	Gas stoves, &c.
1345	3*d.*	Guides for winding or reeling machines.
1346	6*d.*	Machinery for breaking or crushing stones, ores, &c.
1348	1*s.* 1*d.*	Smoke consuming apparatus, &c.
1349	7*d.*	Manufacture of woven fabrics.
1350	7*d.*	Door knobs or handles.
1351	6*d.*	Steam boilers.
1353	10*d.*	Refrigerating apparatus.
1354	3*d.*	Manufacture of steel.
1356	3*d.*	Fireproof composition or wash.
1357	3*s.*	Machinery and tools for the manufacture of umbrellas and parasols, &c.
1358	3*d.*	Obtaining motive power.
1359	1*s.* 10*d.*	Apparatus to be used in the construction of small boats.
1360	10*d.*	Sewing machine.
1361	9*d.*	Instrument for charging cartridges.
1362	3*d.*	Screening, winnowing, and corn-dressing machines.
1363	1*s.* 6*d.*	Treatment of India and China grass, &c.
1364	10*d.*	Machinery for scutching and heckling flax, hemp, &c.
1365	3*d.*	Apparatus for indicating the height of water in steam boilers.
1366	3*d.*	Construction of iron ships.
1367	7*d.*	Equilibrium slide valve for steam engines.
1368	7*d.*	Moulds for casting.
1369	3*d.*	Manufacture of hats.
1370	3*d.*	Manufacture of japanned wares.
1371	3*d.*	Looms for weaving, &c.
1372	3*d.*	Gasaliers.
1373	4*d.*	Apparatus for the manufacture of fuel.
1374	3*d.*	Apparatus for obtaining motive power.
1375	8*d.*	Machinery for putting straps or belts on to pulleys or drums, &c.
1376	3*d.*	Treatment of zinc ores, &c.
1377	3*d.*	Manufacture of india rubber or gutta percha solutions, &c.
1378	3*d.*	Fire-arms.
1379	3*d.*	Manufacture of cords, ropes, and cables.
1380	3*d.*	Clogs, shoes, &c.
1381	6*d.*	Obtaining electro motive power.
1382	3*d.*	Obtaining tungstic acid, &c.
1383	3*d.*	Printing cotton and other fabrics, &c.
1385	3*d.*	Apparatus for obtaining and applying motive power.
1386	7*d.*	Steam vessels.
1387	7*d.*	Steam vessels.
1388	7*d.*	Ocean steamers.
1389	6*d.*	Mode of combining the engines and propeller shafts of steam vessels.
1390	5*d.*	Engines worked by steam or atmospheric pressure.
1391	6*d.*	Manufacture of laths, &c.
1393	3*d.*	Preserving or waterproofing ropes, &c.
1394	3*d.*	Steam cocks.
1396	3*d.*	Method of supporting knapsacks.
1397	1*s.* 3*d.*	Machinery for grinding, smoothing, and polishing glass.
1398	8*d.*	Lamps.
1399	3*d.*	Water-closets.
1400	6*d.*	Separating the fibres of wood for the manufacture of paper, &c.
1401	3*d.*	Manufacture of spoons and forks
1403	3*d.*	Apparatus for ventilating, &c.
1405	3*d.*	Spinning machines.
1408	3*d.*	Machinery for felling trees.
1411	3*d.*	Manufacture of white lead.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

Free Patent Museum and Library, South Kensington.

NUMBERS of VISITORS for the Week ending 22nd January, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Jan. 17	Monday -	143	504	647—Fine.
„ 18	Tuesday -	145	336	481— „
„ 19	Wednesday	103	91	194— „
„ 20	Thursday -	100	—	100— „
„ 21	Friday -	72	—	72— „
„ 22	Saturday -	148	—	148—Dull.
	Total -	711	931	1642

Total number of visitors since the period of free daily admission (12th May, 1858) to 22nd January, 1859, —60,240.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS. —This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

The following contribution has been received since the last notice:—

From HENRY DIRCKS, Esq.:

Portrait of the late Mr. John Roberts, of St. Helen's, Lancashire, a working miner, rewarded by the Society of Arts for his Invention of an Apparatus for use in exploring houses on fire, foul sewers, &c.; and afterwards for Improvements in Davy's Safety Lamp. Drawn from life by the Donor in 1829.

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ.

The following are in the press:—

PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE, Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(Registered for transmission abroad.)

No. 529. FRIDAY, JANUARY 28, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2832. To JOHN BETHELL, of No. 8, Parliament Street, in the county of Middlesex, Gentleman, for the invention of "Improvements in machinery and apparatus for the preservation and coloring of wood."

On his petition, recorded in the Office of the Commissioners on the 10th day of December, 1858.

3004. To JOHN HENRY SIEVERS, of 48, Rathbone Place, Oxford Street, London, Gentleman, for the invention of "Apparatus for tightening and releasing the belly bands of riding saddles."—A communication from Monsieur Charles Zipp, of Paris.

On his petition, recorded in the Office of the Commissioners on the 31st day of December, 1858.

---

28. To EDMUND BALCHIN, of Myton Gate, Hull, in the county of York, Gun Maker, for the invention of "An improved construction of projectile, applicable to the whale fishery."

On his petition, recorded in the Office of the Commissioners on the 3rd day of January, 1859.

---

52. To ISAAC HOLDEN, of St. Denis, near Paris, in the empire of France, and ANGUS HOLDEN, of Bradford, in the county of York, for the invention of "Improvements in means or apparatus employed in preparing and combing wool and other fibres."

54. To JEAN JOSEPH FLORANCE, of Paris, France, Merchant, for the invention of "Improvements in reels or spooling-wheels."

56. To ANDREW BARCLAY, of Kilmarnock, in the county of Ayr, North Britain, Engineer, for the invention of "Improvements in electric and magnetic telegraphs."

58. And to HENRY REYNOLDS, of Denmark Hill, in the county of Surrey, Gentleman, for the invention of "Improvements in refining and decolorizing saccharine substances."

On their several petitions, recorded in the Office of the Commissioners on the 7th day of January, 1859.

---

60. To HENRY HARDEN, of Dundalk, in the county of Louth, Ireland, Locomotive Superintendent to the 'Dublin and Belfast Junction Railway Company,' for the invention of "Improvements in fire bars for steam boiler and other furnaces."

62. To DENNY FRIEDLAUDER, of Manchester, in the county of Lancaster, Wholesale Tobacconist, for the invention of "An improved smoking pipe."

64. And to FREDERICK VERSMANN and ALPHONS OPPENHEIM, of Bury Court, St. Mary Axe, in the city of London, Analytical Chemists, for the invention of "Improvements in the treatment of various substances, by which to render the same uninflammable."

On their several petitions, recorded in the Office of the Commissioners on the 8th day of January, 1859.

---

72. To ROBERT DAWSON CLEGG, of Manchester, in the county of Lancaster, for the invention of "Improvements in signalling apparatus."

74. To THOMAS JAMES CLAXTON, of the city of Montreal, Canada, Merchant, for the invention of "Improvements in the manufacture of boots and shoes."—A communication from Mellen Bray, of Montreal aforesaid, Boot and Shoe Maker.

76. And to JOHN STEWART MARGETSON, of Cheapside, in the city of London, for the invention of "An improved box or case, suitable for hats, collars, and other useful purposes."

On their several petitions, recorded in the Office of the Commissioners, on the 10th day of January, 1859.

80. To Charles Middleton Kernot, of Gloucester House, West Cowes, Isle of Wight, in the county of Southampton, Doctor of Medicine, Doctor of Laws and Logic, Doctor of Philosophy, and Member of the Royal College of Surgeons, England, &c., for the invention of "Improvements in purifying and decolorising paraffine, and rendering the same white, hard, and sweet."

82. To Benjamin Robbin, of Yarmouth, Nova Scotia, Master Mariner, for the invention of "Improvements in the machinery for working pumps."

84. To David Edward Hughes, of New York, but now residing at Northampton Square, in the county of Middlesex, Telegraphic Engineer, for the invention of "An improved mode of insulating electrical conducting wires."

86. To Robert Hawthorn and William Hawthorn, both of the town and county of Newcastle-upon-Tyne, Engineers, for the invention of "Improvements in apparatus for promoting combustion and preventing smoke in coal-burning locomotives and other steam-boiler furnaces."

88. And to Frederick Versmann and Alphons Oppenheim, of Bury Court, St. Mary Axe, in the city of London, Analytical Chemists, for the invention of "Improvements in rendering fabrics and substances non-inflammable."

On their several petitions, recorded in the Office of the Commissioners on the 11th day of January, 1859.

---

90. To Philippe Bouché, of 57, Rue de Bretagne, Paris, in the empire of France, Stays Manufacturer, for the invention of "Improvements in the used means for mechanically raising up the gowns of ladies and young ladies."

91. To William Bray and William Thomas George Bray, both of Folkestone, in the county of Kent, Engineers, for the invention of "Improvements in locomotive and traction engines."

92. To William Oliver, of Shadwell, in the county of Middlesex, for the invention of "Improvements in boats, and in the mode of propelling them."

93. To John Thomson, of Dundee, in the county of Forfar, Manufacturer, for the invention of "Improvements in the manufacture of rugs."

94. To Joseph Hands, of Elgin Crescent, Notting Hill, in the county of Middlesex, Surgeon, for the invention of "Improvements in preserving or preparing skins intended to be converted into leather, or otherwise manufactured."

95. To Joseph Gibbons, of No. 345, Oxford Street, in the county of Middlesex, for the invention of "Improvements in fixing door and other knobs."

96. To Samuel Canning and Henry Clifford, both of Leadenhall Street, in the city of London, Engineers, for the invention of "Improvements in machinery for paying out and for recovering or picking up submarine telegraph ropes, cables, or chains."

97. To Thomas Elwell, of Paris, in the empire of France, Engineer, for the invention of "Improvements in governors for steam engines and other motive power engines."

98. To William McNaught, of Manchester, in the county of Lancaster, Engineer, and William McNaught, of Rochdale, in the county of Lancaster, Engineer, for the invention of "Improvements in steam engines and in apparatus connected therewith."

99. To Samuel Phillips, of Moseley, in the county of Worcester, Gentleman, for the invention of "Improvements in fastenings for securing windows, shutters, and doors, and for other similar uses."

100. To Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, for the invention of "A new or improved metallic alloy."

101. To Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, for the invention of "An improvement or improvements in the manufacture of cast steel."

102. To Charles Neale May, of Devizes, in the county of Wilts, Engineer, for the invention of "Improvements in sluice valves."

103. And to Charles Beslay, of 52, Rue St. Sebastien, Paris, in the empire of France, Engineer, for the invention of "Improvements in coating or covering iron or steel with tin, zinc, or lead, or alloys of those metals, by electrical deposit."

On their several petitions, recorded in the Office of the Commissioners on the 12th day of January, 1859.

---

104. To Charles Neale May, of Devizes, in the county of Wiltshire, Engineer, for the invention of "An improved heat indicator."

105. To Richard Ashton Lightoller, of Chorley, in the county of Lancaster, Cotton Spinner, for the invention of "Certain improvements in machinery or apparatus for spinning cotton or other fibrous materials."

107. To William Henry Crispin, of Marsh Gate Lane, Stratford, in the county of Essex, Copper Smelter, for the invention of "Improvements in the construction of ships and other sailing and steam vessels."

108. To Henry Critchley, of Bury, in the county of Lancaster, Engineer, and Solomon Elston, of the same place, Engineer, for the invention of "Certain improvements in pistons for steam engines or other purposes."

109. To George Scopes, of Needham Market, in the county of Suffolk, Bricklayer, for the invention of "Improvements in apparatus for communicating motion to cots, cradles, and other articles for children's use."

110. To John Picksley and Reuben Sims, of Bedford Foundry, Leigh, in the county of Lancaster, Machine Makers, for the invention of "Improvements in lawn mowing machines."

111. To William Henry Morrison, of Nottingham, Manufacturer, for the invention of "Improvements in wind musical instruments."

112. To Daniel Lancaster Banks, of Kennington, in the county of Surrey, Engineer, for the invention of "A method of constructing a travelling suspension rail or roadway, applicable, among other uses, as a bridge and lifting agent."

113. To James John Stevens, of Darlington Works, Southwark, in the county of Surrey, Engineer, for the invention of "Improvement in railway signal apparatuses."

114. To François Jules Manceau, of Paris, in the empire of France, Manufacturer, and Eugene Napoléon Vieillard, of the same place, Gunsmith, for the invention of "Improvements in breech-loading fire arms and in cartridges."

115. To John Grist, of Beazley Crescent, Old Ford, in the county of Middlesex, Engineer, for the invention of "Improvements in machinery for cutting and shaping staves and heads for casks, and for the manufacture of casks."

116. To William Arthur Chadwick, of Wandsworth Road, in the county of Surrey, Merchant, for the invention of "A musical instrument, chiefly for teaching the intervals of musical scales."

118. To Thomas Herbert, of the firm of Thomas Herbert and Company, of Nottingham, and Edward Whitaker, also of Nottingham, for the invention of "Improvements in the manufacture of warp lace."

119. To Owen Rowland, of No. 4, Chapel Street West, May Fair, in the county of Middlesex, for the invention of "Improvements in laying electric telegraph wires in streets."

120. To Joseph Barrans, of No. 2, Caledonian Terrace, Queen's Road, Peckham, in the county of Surrey, for the invention of "Improvements in traction and portable steam engines."

121. And to Thomas Sampson, of Calle Cartaños, No. 8, Barcelona, Spain, for the invention of "Improvements in apparatus for feeding steam boilers with water."

On their several petitions recorded in the Office of the Commissioners on the 13*th day of January*, 1859.

---

122. To Samuel Holt, of the city of Manchester, in the county of Lancaster, Silk Manufacturer, for the invention of "A new and improved manufacture of woven silk fabrics."

124. To William Craft, of 12, Cambridge Road, Hammersmith, and Thomas Wilson, of Bradmore House, Chiswick, both in the county of Middlesex, for the invention of "Improvements in drawers and napkins so as to render the same waterproof."

125. To William Davis, of No. 2, Ann Street, Globe Fields, Mile End, in the county of Middlesex, for the invention of "Improvements in sluice valves."

126. To John Dauglish, of Tunbridge Wells, M.D., for the invention of "Improvements in obtaining carbonic acid gas."

127. And to Robert Romaine, of Chapel Street, Bedford Row, in the county of Middlesex, Gentleman, for the invention of "An improved arrangement of portable railway."

On their several petitions, recorded in the Office of the Commissioners on the 14*th day of January*, 1859.

---

129. To William Henry Edward McKnight, of Lydiard House, near Swindon, co. Wilts, for the invention of "An upright-celled boiler applicable to all heating purposes by hot water or other fluid."

131. To Daniel Lancaster Banks, of 3, Kennington Row, Kennington Park, in the county of Surrey, Engineer, for the invention of "Improvements in the method of constructing a travelling suspension rail or roadway, to be used for the cultivation of land."

133. And to William Betts, of Wharf Road, City Road, in the county of Middlesex, Capsule Manufacturer, for the invention of "Improvements in the manufacture of capsules, and in the apparatus to be employed therein."

On their several petitions, recorded in the Office of the Commissioners on the 15*th day of January*, 1859.

---

135. To William Morgan, of 31, Grafton Street, Fitzroy Square, in the county of Middlesex, Gentleman, for the invention of "Improvements in printing and stencilling, and in the apparatus or machinery used therein, also for certain applications of such printing and stencilling."

137. To James Montgomery, of the city of New York, in the United States of America, for the invention of "Improvements in the construction of the hulls of steam and other vessels, and in the feed-water heaters, boilers, water-gauges, condensers, engines, and propelling machinery appertaining to the former, a portion of which improvements (with the exception of those on the hull, are applicable to analogous useful purposes."

139. To Pierre Amable de Saint Simon Sicard, of Paris, in the French empire, Chemist, for the invention of "An improved process and apparatus for converting cast iron into steel."

141. To William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "An improvement in sewing machines."—A communication from Elias Howe, junior, of Brooklyn, in the United States of America.

143. To Roger George Salter, of Alphington, in the county of Devon, Engineer, for the invention of "Improvements in apparatuses for collecting or picking up letters, papers, and other articles requiring to be stamped or printed."

145. And to Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, for the invention of "Improvements in the manufacture of cast steel."

On their several petitions, recorded in the Office of the Commissioners on the 17*th day of January*, 1859.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

28*th January*, 1859.

1714. Jesse Brierley, of Kirkheaton, in the county of York, Manufacturer, for an invention of "Improvements in machinery or apparatus for spinning wool and other fibres."—Dated 29th July, 1858.

1716. Joseph Frederick Wilks Featherstonhaugh, of Surrey Square, Newington, in the county of Surrey, Engineer, and Francis Wise, of Peckham Grove, Camberwell, in the same county, Consulting Engineer, for an invention of "An improved self-acting apparatus for admitting water to steam boilers and indicating the water level."—Dated 30th July, 1858.

1722. James Watkins, of Newport, in the county of Monmouth, for an invention of "Improvements in machinery or apparatus for the manufacture of tallow and other candles."—Dated 30th July, 1858.

1723. Christian Schiele and Frederick Schiele, both of Oldham, in the county of Lancaster, Engineers, for an invention of "Certain improvements in 'hydro-extractors' or centrifugal drying machines, and in the method of lubricating their bearings, which method is also applicable to other bearings where lubrication is required."—Dated 30th July, 1858.

1725. Thomas Webb, of Tutbury, in the county of Derby, Cotton Spinner, and James Craig, of the same place, Manager, for an invention of "Improvements applicable to spinning, doubling, winding, and warping yarns or threads."—Dated 30th July, 1858.

1726. John Davey, Mine Agent, Hugh Sims, Accountant, John Mayne, Mine Agent, William Hodge, Smith, and John Gerrans, Miner, all of the parish of Gwennap, in the county of Cornwall, for an invention of "An improved construction of valve, applicable to various descriptions of engines or machinery."—Dated 30th July, 1858.

1729. Joseph Sharp Bailey, Machine Wool Comber, of Keighley, in the county of York, for an invention of "Improvements in machinery for combing wool and other fibrous materials."—Dated 31st July, 1858.

1733. George Ashcroft, Engineer, and Henry Walker Wood, Gentleman, both of Blackweir, Cardiff, in the county of Glamorgan, South Wales, for an invention of "An improvement in hydraulic machinery."—Dated 31st July, 1858.

1734. George Davies, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, for an invention of "Improvements in apparatus for planing electrotype and stereotype plates."—A communication from Robert Wheeler, resident at Brooklyn, in the state of New York, U. S. A.—Dated 31st July, 1858.

1736. Henry Conybeare, of Abingdon Street, in the city of Westminster, Civil Engineer, for an invention of "Improved apparatus and machinery for the laying of submarine telegraph cables."—Dated 31st July, 1858.

737. Henry Conybeare, of Abingdon Street, in the city of Westminster, Civil Engineer, for an invention of "Improvements in apparatuses for generating and super-heating steam, and for producing the condensation of steam."—Dated 31st July, 1858.

1750. James Lee Norton, of Belle Sauvage Yard, Ludgate Hill, in the city of London, for an invention of "Improvements in apparatus for drying wool and other substances."—Dated 2nd August, 1858.

1758. Robert Cunningham, of Paisley, in the county of Renfrew, North Britain, Card Perforator, for an invention of "Improvements in the production of letter-press printing surfaces, and surfaces used in reproducing ornamental patterns or devices by printing or otherwise, and in the apparatus connected therewith."—Dated 3rd August, 1858."

1760. George Bell, Die Maker, in the employment of Thorne and Lemon, of Fore Street, in the city of London, Engineers, for an invention of "Improvements in embossing and printing dies, and in the manufacture of 'lace' or perforated embossed paper."—Dated 3rd August, 1858.

1763. John Greenwood, of Rawden, near Leeds, in the county of York, for an invention of "Improvements in the construction of steam boilers and other apparatus for heating water or superheating steam, which improvements are also applicable when heating air."—Dated 3rd August, 1858.

1768. James Taylor, of Birkenhead, Engineer, for an invention of "Pneumatic and hydraulic machines."—Dated 4th August, 1858.

1776. Jozé Luis, Patent Agent, of 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, for an invention of "A new system of truss."—A communication from a Foreigner residing abroad.—Dated 5th August, 1858.

1859. Archibald Slate, of Adelaide Road, Haverstock Hill, in the county of Middlesex, for an invention of "Improvements in blast furnaces, and in smelting iron ore."—Dated 14th August, 1858.

1946. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Improvements applicable to vessels employed in the manufacture of glass or the melting of vitreous substances."—Dated 27th August, 1858.

1950. Jonathan Ireland, of the city of Manchester, in the county of Lancaster, Foundry Engineer, for an invention of "Improvements in cupola furnaces."—Dated 28th August, 1858.

1978. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "An improvement in gas burners."—Dated 31st August, 1858.

2046. Joseph Wright senior and Joseph Wright junior, of 5, Market Terrace, Caledonian Road, Islington, in the county of Middlesex, Eyelet and Punching Machine Manufacturers, for an invention of "Improvements in machinery and apparatus used for preparing fabrics or materials to receive eyelet holes or fastenings and fixing eyelet holes, and in fastenings for stays and other articles."—Dated 9th September, 1858.

2156. Collinson Hall, of Navestock, in th county of Essex, Esquire, for an invention o "Improvements in apparatus for applying power to the cultivation of the soil."—Dated 25th September, 1858.

2310. Thomas Wright Gardener Treeby, of No. 1, Westbourn Terrace Villas, Paddington, in the county of Middlesex, Gentleman, for an invention of "An improvement in breech loading fire arms and cannon."—Dated 16th October, 1858.

2317. Benjamin Nickels, of Mitcham, in the county of Surrey, Analytical and Metallurgic Chemist, for an invention of "Improvements in electric telegraphs."—Dated 16th October, 1858.

2399. John William Mott, of Lea Bridge Road, in the county of Middlesex, for an invention of "Improvements in pouches of india rubber for holding tobacco or other substances."— Dated 27th October, 1858.

2452. Hyacinthe Tertian-Moret, of No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, for an invention of "The application of a mineral named Deterso, as a disinfecting, preserving, absorbing, and curative powder."—Dated 3rd November, 1858.

2498. William Smith, of Little Woolstone, in the county of Buckingham, for an invention of "Improvements in apparatus for supporting the hauling ropes when hauling ploughs and other agricultural implements by steam power."—Dated 8th November, 1858.

2606. John May Miller, of Barnstaple, in the county of Devon, Lace Manufacturer, and John Fear, of the same place, Machinist, for an invention of "Improvements in machinery for winding fibrous substances or materials when in the form of thread or yarn on to the bobbins or wheels used in lace machinery."—Dated 18th November, 1858.

2652. Edward Hammond Bentall, of Heybridge, in the county of Essex, Ironfounder, for an invention of "An improvement in the construction of turnip cutters."—Dated 22nd November, 1858.

2660. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improved machinery for sweeping floors."—Dated 23rd November, 1858.

2698. Robert Alexander, of Dillichip, in the county of Dumbarton, North Britain, Bleacher, for an invention of "Improvements in treating, preparing, and bleaching textile fabrics and other materials."—Dated 27th November, 1858.

2721. John Gresham, of Hull, Esquire, for an invention of "Improvements in apparatus for preserving ships' papers, and other papers and writings, in case of the loss of or accident to a ship whilst at sea."—Dated 29th November, 1858.

2754. Lauchlan Mac Kirdy, of the Glebe Sugar House, Greenock, in the county of Renfrew, North Britain, Sugar Refiner, for an invention of "Improved combined bathing, washing, and water-closet apparatus."—Dated 2nd December, 1858.

2755. Lauchlan Mac Kirdy, of the Glebe Sugar House, Greenock, in the county of Renfrew, North Britain, Sugar Refiner, for an invention of "Improvements in the manufacture of sugar."—Dated 2nd December, 1858.

2767. Charles Coates, of Sunnyside, near Rawtenstall, in the county of Lancaster, Engineer, for an invention of "Improvements in maundrills for printing."—Dated 3rd December, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 26th January*, 1859, *inclusive.*)

24th January.

222. John Wormald, of Manchester, in the county of Lancaster, Calenderer and Packer, for an invention of "Certain improvements in machinery or apparatus for folding, 'fenting,' and making up goods or fabrics."—Dated 28th January, 1856.

254. John Lee Stevens, of the city of London, Civil Engineer, for an invention of "Improvements in doors or apparatus for regulating the supply of air to steam-boiler and other flues and furnaces."—Dated 30th January, 1856.

25th January.

236. Daniel Foxwell, of Manchester, in the county of Lancaster, Card Manufacturer, for an invention of "Improvements in sewing-machines." Dated 29th January, 1856.

26th January.

269. Thomas Hurst, of Tanner Street, Barking, in the county of Essex, Railway Contractor, for an invention of "Improvements in the connecting of the rails or 'metals' generally used on railways." —Dated 31st January, 1856.

FOREIGN PATENTS.

BAVARIA.*

List of Patents for Inventions Delivered during the year 1858.†

(*Communicated by the Bavarian Government.*)

(For preceding List, see No. 424 of this Journal.)

1. Friedrich Michaelis, of Magdeburg, for "Adding unpoisonous compounds of chlorine to beetroot juice, before, during, or after its separation."—Dated 1st January, 1858; expiring 7th September, 1859.

* For the Patent Law of Bavaria, see No. 262 of this Journal.

† The Specifications of expired Patents may be consulted in the Public Free Library of the Great Seal Patent Office, where translations may also be had.

2. Joh. Heim and Jos. Birlbauer, of Nuremberg, for "Machines for spinning cigars by inserting tobacco therein."—Dated 7th January, 1858; expiring 7th January, 1868.

3. Evan Leigh, of Manchester, for "Improvements in apparatus of machines for spinning cotton."—Dated 7th January, 1858; expiring 7th January, 1860.

4. Arbel Lucien Deflassieux, of Rive de Giers' France, for "Manufacture of wheels for railway carriages."—Dated 2nd February, 1858; expiring 2nd February, 1859.

5. François and Eloi Schmitz, of Paris, for "Machines for pressing and conglomerating peat."—Dated 12th February, 1858; expiring 12th February, 1860.

6. J. H. Prillwitz, of Berlin, for "Improvements in the manufacture of seamless leather articles."—Dated 14th February, 1858; expiring 14th February, 1862.

7. Rudolph Bodmer, of London, for "Improvements in safety-valves of steam-engines."—Dated 14th February, 1858; expiring 14th February, 1860.

8. Léon Joseph Tomme, of Paris, for "A grease-box for lubricating axles of railway carriages."—Dated 28th February, 1858; expiring 28th February, 1860.

9. Martin Steinhauser, of Waldsee, Wurtemburg, for "A peculiar construction of kilns for carbonizing bones."—Dated 4th March, 1858; expiring 4th March, 1863.

10. E. H, Gummi, of Munich, for "A composition being a substitute for court-plaister."—Dated 20th March, 1858; expiring 20th March, 1859.

11. Jean Schlumberger, of Guebwiller, France, for "Improvements in the construction of machines for undoing, combing, and stretching wool, cotton, and other fibrous substances."—Dated 26th March, 1858; expiring 26th March, 1863.

12. François Schmidt, of Paris, for "A new system of hydraulic presses."—Dated 31st March, 1858; expiring 31st March, 1860.

13. Eugen Grenet and Alexis Navin, of Paris, for "A new construction of electrical batteries."—Dated 31st March, 1858; expiring 31st March, 1860.

14. Anton Hahn, of Munich, for "Closets which are cleared and closed by themselves, and which do not admit of any draught."—Dated 12th April, 1858; expiring 12th April, 1860.

15. James Edward Earnshaw, of Nuremburg, for "Rotary steam-engines."—Dated 15th April, 1858; expiring 18th April, 1863.

16. Dr. Baron von Liebig, of Munich, for "Manufacture of galvanized silver mirrors."—Dated 20th April, 1858; expiring 20th April, 1860.

17. Wilhelm Heinrich Christ. Voss, of Augsburg, for "Reaction water-wheels."—Dated 8th May, 1858; expiring 8th May, 1863.

18. Joseph Schloer, of Hallziechen, for "Utilizing the gases issued from the mouth of furnaces by re-introducing them in the blast pipe of furnaces."—Dated 8th May, 1858; expiring 8th May, 1868.

19. W. Terreaux, of Paris, for "A system of valves for pumps and other purposes."—Dated 28th May, 1858; expiring 28th May, 1859.

20. Johann Timpe, of Rheine, Westphalia, for "A mangle."—Dated 3rd July, 1858; expiring 3rd January, 1863.

21. Gottfried Niedermaier and Conrad Oberreit, both of Lindau, for "A kneading machine."—Dated 2nd July, 1858; expiring 2nd July, 1863.

22. Karl Bulow, of Görlitz, for "A gas meter."—Dated 17th July, 1858; expiring 17th January, 1863.

23. Benjamin Tilgmann, of Philadelphia, for "Means of hardening greasy and oily substances."—Dated 31st July, 1858; expiring 31st July, 1860.

24. Johann Quirin, of Mittelbexbach, for "A forge."—Dated 31st July, 1858; expiring 31st July, 1861.

25, Joseph Kielinger, of Munich, for "A process for printing linen with encaustic colours."—Dated 4th August, 1858; expiring 4th August, 1859.

26. E. Ekmann, of Stuttgart, for "A sawing mill with vertical saws."—Dated 15th August, 1858; expiring 15th August, 1864.

27. D. H. Ziegler, of Winterthur, for "Self-acting lubricating apparatus."—Dated 31st August, 1858; expiring 31st August, 1860.

28. Philipp Herrmann, of Offenburg, for "An apparatus for lubricating railway carriages and transmission machinery."—Dated 1st November, 1858; expiring 1st May, 1863.

29. Charles Felix Sebille, of Nantes, for "Manufacture of pipes which are tinned inside."—Dated 5th November, 1858; expiring 5th November, 1860.

30. Benjamin Madoult de Buffon, of Paris, for "Filtering tubes, improvements in filtering processes, and cleaning apparatus."—Dated 5th November, 1858; expiring 5th November, 1860.

31. Thoas' Paper-Mills, of Hainsberg, near Dresden, for "Grinding fibrous substances for the manufacture of paper."—Dated 5th November, 1858; expiring 5th May, 1863.

32. J. A. Gantenbein, of Augsburg, for "A bolting apparatus for mills."—Dated 7th November, 1858; expiring 7th November, 1861.

33. J. J. Huber, of Geneva, for "Jewellery articles with moveable parts."—Dated 13th November, 1858; expiring 13th November, 1861.

34. Georg Kolb, of Bayreuth, for "A peculiar method of boring mountains by means of wire cables."—Dated 23rd November, 1858; expired 23rd November, 1862.

35. John and Ezra Harthan, of Timbersbruck, Chester, for "Obtaining motive-power by means of machines worked by steam or compressed air."—Dated 29th November, 1858; expired 29th November, 1861.

36. Heinrich Honegger, of Ruti, Switzerland, for "Pinchers for stretching fabrics in weaving."—Dated 31st December, 1858; expiring 31st December, 1859.

FRANCE.

Current List of Patents of Invention and Certificates of Addition.

1858.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

Note.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

5061. Thuillier and Staudinger, of 74, Rue de Bondy, Paris, a Certificate of Addition to their Patent of 9th November, 1857, for "A copying press."—Dated 9th November, 1858.

5062. Denis Marassich, of 24, Boulevart de Strasbourg, Paris, for "A turbine apparatus for evaporating perfumes." — Dated 9th November, 1858. — (English Patent, expiring 29th May, 1872.)

5063. François Delsarte, of 3 bis, Rue de la Croix Boissière, Chaillot, for "A phonoptical apparatus for tuning pianos with mathematical precision."—Dated 9th November, 1858.

5064. Thomas Guinier, of 23, Rue de Grenelle St. Honoré, Paris, a Certificate of Addition to his Patent of 17th May, 1858, for "Improvements in all kinds of taps, &c."—Dated 9th November, 1858.

5065. Ferdinand Carré, domiciled with Jacquemart, of 10, Rue St. Anasthase, Paris, a Certificate of Addition to his Patent of 23rd June, 1857, for "An apparatus for manufacturing ice."—Dated 9th November, 1858.

5066. Philippe Nicolas Cordier, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Ruling lithographic works." —Dated 9th November, 1858.

5067. Jérôme Jean Baptiste Adolphe Pichault, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of making good broken axles of carriages and vehicles in general." —Dated 9th November, 1858.

5068. René Charles Videgrain, of 17, Rue des Batignollaises, Batignolles, for "Flint-stone pipes." —Dated 10th November, 1858.

5069. René Charles Videgrain, of 17, Rue des Batignollaises, Batignolles, for "Waterproof inlaid floors."—Dated 10th November, 1858.

5070. Félix Génevois, of 48, Rue de l'Orillon, Belleville, for "A kind of soap."— ated 10th November, 1858.

5071. François Malbet, of 3, Rue Constantine, Paris, for "A basin for invalids."—Dated 10th November, 1858.

5072. Etienne Brocard, of 26, Rue de la Roquette, Paris, for "Copper and brass copper casings without soldering for making cylinders for printing stuffs." — Dated 10th November, 1858.

5073. Edouard Aristide Servier, of 16, Rue Mazagran, Paris, for "An electro-magnetic apparatus for ascertaining the highest and lowest pressure or level." — Dated 10th November, 1858.

5074. Charles François Lepage, of 24, Avenue de Chichy, Batignolles, for "Spring fastenings for windows, doors, &c."—Dated 10th November, 1858.

5075. Adolphe Bonvallet, of 98, Rue du Château d'Eau, Paris, a Certificate of Addition to his Patent of 9th April, 1856, for "A mode of printing long-stapled tissues, &c."—Dated 10th November, 1858.

5076. Preston and McGregor, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in machines for making files."— Dated 10th November, 1858.— (English Patent, expiring 15th April, 1862.)

5077. Henry Wilde, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in lightning rods." — Dated 10th November, 1858.

5078. Jean Villeneuve, represented by Mathieu of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 17th November, 1856, for "Improvements in the manufacture of hair bags for pressing fat substances."—Dated 10th November, 1858.

5079. John Sivéet Wilway, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Arrangements in bells."—Dated 10th November, 1858.

5080. Louis Auguste Mielle, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of advertizing boards."—Dated 10th November, 1858.

5081. Joseph Petit-Aubry, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An apparatus for unskidding carriages."—Dated 10th November, 1858.

5082. Tanvier, of 43, Rue du Temple, Paris, for "A sowing and planting apparatus."—Dated 11th November, 1858.

5083. Joseph Louis Gaudebert, of 130 and 132, Rue St. Martin, Paris, for "Foot coverings with invisible metallic seams."—Dated 11th November, 1858.

5084. Pierre Eugène Duchassaing, represented by Brade, of 22, Rue Ste. Anne, Paris, a Certificate of Addition to his Patent of 26th April, 1858, for "An apparatus for carrying about candle-lights."— Dated 11th November, 1858.

5085. Droinet and Maldant, of St. Denis, a Certificate of Addition to their Patent of 19th

* For the French Patent Law see No. 228 of this Journal.

April, 1858, for "A system of metallic mountings." —Dated 11th November, 1858.

5086. Victor Legrip, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 13th November, 1855, for "Utilizing the scoria of iron."—Dated 11th November, 1858.

5087. Antoine Joseph Décret, of 15, Rue du Pressoir, Belleville, for "A kind of soles."—Dated 11th November, 1858.

5088. De Cappot and Jarriant, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "An hydraulic counter."—Dated 11th November, 1858.

5089. Chadwick and Frost, represented by Perpigna, of 42, Rue Neuve, St. Augustin, Paris, a Certificate of Addition to their Patent of 22nd September, 1857, for "Apparatus for gauging or measuring water, &c."—Dated 11th November, 1858.

5090. Robert Jobson, represented by Basset, of 14, Boulevart Montmartre, Paris, for "Improvements in apparatus for making moulds for casting shells and other articles."— Dated 11th November, 1858.—(English Patent, expiring 12th August, 1872.)

5091. Pierre Dietens, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of letter paper, bills, circulars, and other notes."—Dated 11th November, 1858.

5092. Charles Christien Schlodauer, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A mode of imitating diamonds and precious stones on paper, stuffs, &c."—Dated 11th November, 1858.

5093. Emile Constant Martin, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 8th September, 1858, for "Purifying phosphate of natural lime."—Dated 11th November, 1858.

5094. Robert Newman, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A brush for cleaning tubes of boilers."—Dated 11th November, 1858.

5095. Louis Jean Anselme Ernest Trotry-Latouche, of 5, Rue des Quartre Fils, Paris, for "Means of fulling hats of wool and hair, &c."—Dated 12th November, 1858.

5096. Vincent Marie Arthur Migeot de Baran, of 95, Rue du Théâtre, Grenelle, for "A kind of syphon."—Dated 12th November, 1858.

5097. Paul Auguste Amédée Trouttet, domiciled with Jolicler, of 2, Rue de l'Ecole de Médicine, Paris, for "A calorifere-stove for heating carriages."—Dated 12th November, 1858.

5098. Henry Louis Marie, of 10, Rue St. Ferdinand aux Thernes, for "A system of conveying loaded boats from one place to another."—Dated 12th November, 1858.

5099. Alphonse Gravier, domiciled with Armengaud, of 23, Boulevart de Strasbourg, Paris, for "A so-called 'hydro-motive wheel.'"—Dated 12th November, 1858.

5100. Frédéric Greffier, of 2, Rue des Bassins, Passy, for "A system and apparatus for conveying substances which may be mixed with water or any other liquid, at great distances."—Dated 12th November, 1858.

5101. François Jacques Michel Guillemard, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 13th August, 1857, for "Travelling-bags, &c."—Dated 12th November, 1858.

5102. Alfred Isidore Parent, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An apparatus for manufacturing all kinds of capsules, and embossed and stamped articles."—Dated 12th November, 1858.

5103. François Gigon, of Bâlot, département de la Cote d'Or, for "Substituting wrought iron for cast iron in the manufacture of the chief parts of the American plough."—Dated 15th November, 1858.

5104. Eugène Jean Voisin, of de Maiziers, département du Cher, for "Obtaining jointed mouldings on hard finished surfaces."—Dated 17th November, 1858.

5105. Jean Isidore Duguay, of Argenteuil, département de Seine et Oise, for "A chaff-cutting machine."—Dated 17th November, 1858.

5106. Charles Placide Nézeraux, of Matha, département de la Charente Inférieure, for "Improvements in flour-mills."—Dated 17th November, 1858.

5107. Aléxandre de Chabrière, of 134, Boulevart Longchamps, Marseille, département des Bouches du Rhône, for "A system of lamps."—Dated 18th November, 1858.

5108. Jean Bernard, of 2, Rue Porte-Royale à la Rochelle, département de la Charente Inférieure, for "A composition, called 'Corallis stone,' for restoring edge-tools." — Dated 18th November, 1858.

5109. Dromart and Dussillol, of Préchac, département de la Gironde, a Certificate of Addition to their Patent of 6th July, 1858, for "A process for distilling and clarifying resinous substances." —Dated 19th November, 1858.

5110. Michel Locqueneux, of 6, Rue Comtesse, Valencienne, département du Nord, for "A continuous smoke-consuming process."—Dated 20th November, 1858.

5111. Langenhagen and Hepp, of Saint Union, département du Bas Rhin, for "Manufacture of bonnets from palm leaves, panama, and plaited straw."—Dated 10th November, 1858.

5112. Théophile Grison, of Deville-les-Rouen, département de la Seine Inférieure, for "A float for lightening vessels."—Dated 17th November, 1858.

5113. Jules Louis Ganne, of Cour Cheverny, département de Loir et Cher, a Certificate of Addition to his Patent of 24th April, 1858, for "A system of thrashing machines."—Dated 19th November, 1858.

5114. Antoine Richard, of 20, Rue de Bourbon, Lyon, département du Rhône, for "A bath that may be folded up"—Dated 19th November, 1858.

5115. Jacques Schumacher, of 56, Rue de Chabrol, Lyon, département du Rhône, for "Plain and cut glasses for watches and clocks."—Dated 20th November, 1858.

5116. Million, of 31, Quai de la Charité, Lyon, département du Rhône, a Certificate of Addition

to their Patent of 4th November, 1858, for "Improvements in motive machines worked by gas, &c."—Dated 20th November, 1858.

5117. Antoine Bonnard, of 31, Place de la Charité, Lyon, département du Rhône for "A grease box."—Dated 20th November, 1858.

5118. Henri Billan, of 41, Rue St. James, Bordeaux, département de la Gironde, for "An apparatus for lighting cigars or pipes in the open air."—Dated 20th November, 1858.

5119. François Maillard, of 4, Rue St. Dominique, Lyon, département du Rhône, for "A railway break acting on the rails and wheels."—Dated 17th November, 1858.

5120. Edouard Fairburn, represented by Zacharie, of 40, Rue de Bourbon, Lyon, département du Rhône, for "Improvements in machines or or apparatus for carding wool and other fibrous substances."—Dated 17th November, 1858.

5121. Claude Cavarac, of 1, Quai St. Antoine, Lyon, département du Rhône, for "Tools for manufacturing bezils of jewellery in general."—Dated 18th November, 1858.

5122. Jean François Cordel, of 7, Rue Ferrandière, Lyon, département du Rhône, for "A machine for beating and carding wool and other substances, and being applicable to corn threshing."—Dated 18th November, 1858.

5123. Pierre Remy Nepreux-Hortet, of 33, Rue Coquebert, Reims, département de la Marne, a Certificate of Addition to his Patent of 19th November, 1857, for "A machine for piercing bottle stands."—Dated 19th November, 1858.

5124. Louis Nicolas Thiré, of Houdainville, département de l'Oise, a Certificate of Addition to his Patent of 5th May, 1858, for "A thrashing machine."—Dated 18th November, 1858.

5125. Bertrand and Pédouin, of Salon, département des Bouches du Rhône, a Certificate of Addition to thier Patent of 2nd June, 1858, for "A machine for expanding wooden smoking pipes, &c."—Dated 19th November, 1858.

5126. André and Rivat, of Pontcherra, département de l'Isère, a Certificate of Addition to their Patent of 29th October, 1857, for "A furnace for smelting steel."—Dated 19th November, 1858.

5127. Aléxandre Jacob Herché, of Louvier, département de l'Eure, a Certificate of Addition to his Patent of 18th September, 1858, for "A machine for thrashing corn and other grain."—Dated 20th November, 1858.

5128. Paul Eugène Alexis Lapierre, of 41, Rue de Dieu-Lumière, Reims, département de la Marne, a Certificate of Addition to his Patent of 28th November, 1857, for "A machine for boring timber for buildings and cartwright's work."—Dated 20th November, 1858.

5129. Joseph Toussaint Caussemille, of 12, Boulevart de la Gare, Marseille, département des Bouches du Rhône, for "Goffering so-called 'slide match-boxes.'"—Dated 20th November, 1858.

5130. Jules Marque-Morel, of 11, Rue des Lingers, Abbeville, département de la Somme, for "An application to burners of oil-lamps."—Dated 20th November, 1858.

5131. Louis Girard, of Pertuis, département de la Vaucluse, for "An apparatus for crushing almonds."—Dated 22nd November, 1858.

5132. Mathieu Castay, of Vic-Fezensac, département du Gers, for "Construction of metal bridges and apparatus for constructing the same."—Dated 22nd November, 1858.

5133. Adrien Perret, of Firminy, département de la Loire, for "Applying the theory of logarithms to the construction of a circular calculating machine, called 'calculating disk.'"—Dated 22nd November, 1858.

5134. Jean Baptiste Loraux, of Muternes, commune de Wimy, département de l'Aisne, for "Manufacture of fronts of pottery for aqueducts."—Dated 24th November, 1858.

5135. René Creuzé des Roches, of Grand Maison, commune d'Ingrandes, département de l'Indre, a Certificate of Addition to his Patent of 20th November, 1856, for "A moveable horsegin."—Dated 18th November, 1858.

5136. Vincent-Viry and Gegout, of Gerardmer, département des Vosges, for "Machines for the manufacture of wooden boxes and laths for paperworks and ceilings."—Dated 20th November, 1858.

5137. Agricol Aurouze, of 116, Rue Carreterie, Avignon, département de la Vaucluse, for "An horizontal water-wheel, worked sideways."—Dated 23rd November, 1858.

5138. Philibert Clunet, of 55, Quai de Serin, Lyon, département du Rhône, for "A travelling case."—Dated 23rd November, 1858.

5139. Charles Auguste Kœhler, of Bitschwiller, département du Haut Rhin, for "Improvements in flyers of bobbin-frames."—Dated 23rd November, 1858.

5140. Auguste Eugène Fiéret, of Place du Marché au Blé, Epernay, département de la Marne, for "A system of stoppering bottles containing gaseous liquids."—Dated 23rd November, 1858.

5141. Bernard Joachim La Mothe, of 78, Cours de Tourny, Bordeaux, département de la Gironde, for "Construction of chairs and arm-chairs."—Dated 24th November, 1858.

5142. Auger and Cretin, of 34, Rue Sala, département du Rhône, for "A closed gas motor."—Dated 25th November, 1858.

5143. Lanfrey and Brun, of 10, Place Napoléon département du Rhône, for "A machine for combing and carding flock-silk or waste of cocoons."—Dated 25th November, 1858.

5144. Charles De Vendeuvre, of 15, Rue Crebillon, Nantes, département de la Loire Inférieure, for "Kilns for drying and baking ceramic products."—Dated 25th November, 1858.

5145. Batley, Greenwood, and Dockray, represented by Robert Burk, of 4, Rue Nigrier, Lille, département du Nord, for "Improvements in carding filamentous substances."—Dated 25th November, 1858.—(English Patent, expiring 8th October, 1872.)

5146. Georges Tabourin, of 20, Rue Constantine, Lyon, département du Rhône, a Certificate of Addition to his Patent of 21st October, 1858, for "A system of telegraphs."—Dated 24th November, 1858.

5147. Gabriel Emile Charageat, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, a Certificate of Addition to his Patent of 8th February, 1854, for "Improvements in the construction of parasols, &c."—Dated 12th November, 1858.

5148. Pierre Carmien, of 24, Rue des Marais, St. Martin, Paris, for "A system of telegraphic printing."—Dated 13th November, 1858.

5149. Hunt and Pochin, represented by Creuseton, of 12, Rue Godot de Mauroi, Paris, for "Improvements in treating and applying resin and resinous substances."—Dated 13th November, 1858.

5150. Talma and Noël, represented by Tardieu, of 13, Rue de Tournon, Paris, for "A process for smelting aluminium and applying the same."—Dated 13th November, 1858.

5151. Aléxandre Cochet, of 177, Rue de Charenton, Paris, a Certificate of Addition to his Patent of 1st May, 1858, for "A guano extract."—Dated 13th November, 1858.

5152. Christian Jean Nathan Leidenroth, of 38, Rue de Charonne, Paris, for "A system of extending or folding furniture."—Dated 13th November, 1858.

5153. Jean Marie Laffas, of 36, Rue de la Paix, Batignolles, a Certificate of Addition to his Patent of 3rd March, 1858, for "A water-meter."—Dated 13th November, 1858.

5154. Léonard Mathieu, of 1, Place de la Rotunde, Paris, for "A process for modifying substances."—Dated 13th November, 1858.

5155. François Coignet, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 29th March, 1855, for "Manufacture of economical beton without hydraulic lime."—Dated 13th November, 1858.

5156. Antoine Roux-Mollard, of 8, Rue Martel, Paris, a Certificate of Addition to his Patent of 30th March, 1858, for "Printing gold and silver colours."—Dated 13th November, 1858.

5157. Aîmé Van-Langenhove, of 29, Rue de Londres, Paris, a Certificate of Addition to his Patent of 8th January, 1858, for "Manure."—Dated 13th November, 1858.

5158. Auguste Mathieu, represented by Amouroux, of 333, Rue St. Martin, Paris, for "A machine for burling stuffs."—Dated 13th November, 1858.

5159. Charles Husson, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 15th December, 1857, for "Improvements in the manufacture of transparent tissues, &c."—Dated 13th November, 1858.

5160. Jacques Henry Beaud, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A motor applicable to all kinds of vehicles."—Dated 13th November, 1858.

5161. Schwartzkopf and Philipson, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A machine for boring stone."—Dated 13th November, 1858.

5162. Jules Félix Gevelot, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in machines for the manufacture of cartridges."—Dated 13th November, 1858.

5163. Jules Cumming, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of horse-gins."—Dated 13th November, 1858.

5164. Jean Marie Auguste Eugène Fabart, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 16th November, 1857, for "Manufacture of tissues."—Dated 13th November, 1858.

5165. Julien Briere, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A system of breaks."—Dated 13th November, 1858.

5166. Charles Lungley, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of portable vessels and boats, and parts belonging thereto."—Dated 13th November, 1858.

5167. Basile Stepanoviche Piatoff, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A process for welding iron."—Dated 13th November, 1858.

5168. Snéguireff and Piatoff, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Processes for coppering, silvering, and gilding cast and wrought iron and steel."—Dated 13th November, 1858.

5169. Cordonnier and Bouchet, of 7, Impasse St. Bernard, Faubourg St. Antoine, Paris, for "An apparatus for cleaning salsifics."—Dated 13th November, 1858.

5170. Parent and Hamet, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to their Patent of 13th March, 1858, for "A kind of buttons."—Dated 13th November, 1858.

5171. Jacques Edouard Godeau, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Jointed cushions with backs for travellers."—Dated 13th November, 1858.

5172. Joseph Constant Boisneau, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A moveable horse gin."—Dated 13th November, 1858.

5173. Pierre Jacques Eugène Jassenne, domiciled with Jassenne, of 46, Rue des Jeuneurs, Paris, a Certificate of Addition to his Patent of 20th May, 1857, for "A turbine worked by air or water."—Dated 15th November, 1858.

5174. François Jacques Lecocq, of 25, Rue des Vinaigriers, Paris, for "Manufacture of drawn rods."—Dated 15th November, 1858.

5175. Ferdinand Pierre Jean Vanden Ouwelant, of 84, Rue de Richelieu, Paris, for "A smoke-consuming apparatus."—Dated 15th November, 1858.

5176. Louis Pierre Aléxandre Martin (de Provins), of 79, Rue des Marais St. Martin, Paris, a Certificate of Addition to his Patent of 20th November, 1857, for "Improvements in keyboard instruments and especially in expressive organs."—Dated 15th November, 1858.

Erratum in Journal of 21st January.

55. For "burner regulator" read "burners regulator."

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).

Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices.

Admiralty, Steam Department.
———— Surveyor of Navy.
———— Deptford Dockyard.
———— Woolwich ditto.
———— Sheerness ditto.
———— Devonport ditto.
———— Portsmouth ditto.
———— Chatham ditto.
———— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.

Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Time-keepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*

The following are in the press:—

Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c.
Electricity and Magnetism: their Generation and Applications.
Typographic, Lithographic, and Plate Printing.
Bleaching, Dyeing, and Printing Yarns and Fabrics.
Preparation of Fuel, and Apparatus for its Combustion.
Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing.
Production and Applications of Gas.
Steam Engines.

B. Woodcroft.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

No. 530. TUESDAY, FEBRUARY 1, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given that

2126. THEODORE BYRON HUBBELL, of Regent Street, in the city of Westminster, Gentleman, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "An improvement in hooped petticoats."—A communication.

2127. And JOHN HOPE, of the state of Rhode Island, of the United States of America, has given the like notice in respect of the invention of "An improved calico printing roller."

2129. And THOMAS HOWE, of Millwall, Poplar, has given the like notice in respect of the invention of "Improvements in smiths forges."

As set forth in their respective petitions, all recorded in the said office on the 22nd day of September, 1858.

2140. And DANIEL GRANT, of Ludgate Hill, in the city of London, Printer, has given the like notice in respect of the invention of "Improvements in colour-printing presses."

As set forth in his petition, recorded in the said office on the 23rd day of September, 1858.

2146. And HENRY HENSON HENSON and WILLIAM FREDERICK HENSON, both of 38, Parliament Street, in the city of Westminster, have given the like notice in respect of the invention of "Improvements in waterproofing leather woven fabrics, fibrous, and other materials, and also of rendering them fire-proof, or partially fire-proof."

2147. And RUDOLPH BODMER, of 2, Thavies Inn, Holborn, in the city of London, has given the like notice in respect of the invention of "An improved apparatus for preventing explosion in steam boilers."—A communication.

2150. And GEORGE LEEDHAM FULLER, of Lombard Street, in the city of London, Civil Engineer, has given the like notice in respect of the invention of "Improvements in steam engines."

As set forth in their respective petitions, all recorded in the said office on the 24th day of September, 1858.

2161. And WILLIAM LANDER, of the city of Bristol, Engraver, has given the like notice in respect of the invention of "Improvements in engraving and printing for the purpose of ornamenting china and earthenware."

As set forth in his petition, recorded in the said office on the 27th day of September, 1858.

2164. And EDWIN LEWTHWAITE, of Halifax, in the county of York, Clock and Watch Maker, and GEORGE AMBLER, of Queenshead, near Halifax aforesaid, Clock and Watch Maker, have given the like notice in respect of the invention of "Improvements in clocks, watches, chronometers, and other timepieces."

2165. And BENJAMIN JONES, Iron Founder, of the city of York, has given the like notice in respect of the invention of "Improvements in press wheel rollers or clod crushers, which improvements are also applicable to rollers for crushing, bruizing, and pulverizing roots and other substances."

As set forth in their respective petitions, both recorded in the said office on the 28th day of September, 1858.

2172. And GEORGE TOMLINSON BOUSFIELD, of Loughborough Park, Brixton, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in apparatus for and in the manufacture of paper bags and other similar articles."—A communication.

As set forth in his petition, recorded in the said office on the 29th day of September, 1858.

2203. And LOUIS A. NORMANDY, junior, of 67, Judd Street, London, in the county of Middlesex, has given the like notice in respect of the inven-

tion of "Improvements in the manufacture of sulphate of copper."—A communication.

As set forth in his petition, recorded in the said office on the 4th day of October, 1858.

2206. And James Mills, of Manchester, in the county of Lancaster, Machinist, has given the like notice in respect of the invention of "Certain improvements in machinery or apparatus for roving, slubbing, or spinning cotton and other fibrous materials."

2209. And William Menelaus, of Dowlais Iron Works, in the county of Glamorgan, Manager, has given the like notice in respect of the invention of "Improvements in machinery for straightening rails and wrought iron bars."

As set forth in their respective petitions, both recorded in the said office on the 5th day of October, 1858.

2241. And William Augustus Munn, of Throwley House, near Faversham, in the county of Kent (late a Major in the East Kent Regiment Militia), a Deputy Lieutenant and Justice of the Peace for the said county of Kent, has given the like notice in respect of the invention of "Improvements in horse-hoes."

2245. And Joseph Travers Smith, of Gray's Inn, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in electric cables."

2246. And Evan Birchley, of Upper Severn Terrace, in the city of Worcester, Attorney's Clerk, has given the like notice in respect of the invention of "An improved construction of cartridge."

As set forth in their respective petitions, all recorded in the said office on the 8th day of October, 1858.

2270. And Leonard Wray, of No. 5, Devonshire Street, Portland Place, London, Gentleman, has given the like notice in respect of the invention of "New and improved compounds for the coating or insulating of submarine electric telegraph wires, and which are also applicable to the coating or insulating of electric telegraph wires laid underground."

2271. And Thomas Cotterill Shaw, of Hanley, in the county of Stafford, Architect and Surveyor, and Frederic Henshaw Cooper, of Hanley aforesaid, Ironmonger, have given the like notice in respect of the invention of "A new or improved construction and mode of working engines by the agency of air or gases in conjunction with electricity, for obtaining or producing motive power."

As set forth in their respective petitions, both recorded in the said office on the 12th day of October, 1858.

2287. And Lambert Cowell, of Adelphi, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in apparel affording the means for preserving life at sea, and to prevent accidents to persons casually immersed in water."

2289. And Alexander Gordon, Member of the Institution of Civil Engineers in London, and residing at Little Fifehouse, Whitehall, in the city of Westminster, has given the like notice in respect of the invention of "Improvements for manufacturing cast iron steel and wrought iron."

—A communication from Antoine Galy Cazalat, of Paris.

As set forth in their respective petitions, both recorded in the said office on the 14th day of October, 1858.

2301. And William Bacon, of Prestwich, in the county of Lancaster, Engineer, has given the like notice in respect of the invention of "Improvements in the mode of constructing valves, valve cocks, gates and stop cocks, which may be used in steam engineering, and for other purposes."—A communication from J. R. and H. S. Robinson, of Clinton, in the United States of America.

As set forth in his petition, recorded in the said office on the 15th day of October, 1858.

2343. And Robert Griffiths, of No. 69, Mornington Road, Regent's Park, London, Engineer, has given the like notice in respect of the invention of "Improvements in baths."

As set forth in his petition, recorded in the said office on the 20th day of October, 1858.

2351. And James Murdoch Napier, of York Road, Lambeth, Engineer, has given the like notice in respect of the invention of "Improvements in printing presses and printing machines."

As set forth in his petition, recorded in the said office on the 21st day of October, 1858.

2382. And Alfred Vincent Newton, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "An improvement in the manufacture of candles."—A communication.

As set forth in his petition, recorded in the said office on the 25th day of October, 1858.

2479. And Robert Eardley Pinhey, of Woolstan, in the county of Hampshire, and John Wood, of No. 58, High Street, Southampton, in the town and county of Southampton, Hampshire, have given the like notice in respect of the invention of "Improvements in apparatus for ascertaining the variation of ships compasses for local errors."

As set forth in their petition, recorded in the said office on the 5th day of November, 1858.

2613. And George Howe, Engineer, and John Norton, Plumber, both of Sheffield, in the county of York, have given the like notice in respect of the invention of "An improved method of boiling water or worts for brewery's, distillery's, &c., by steam, or for heating rooms, public buildings, churches, chapels, factories, &c."

2627. And Arthur James Thorman, of No. 8, Lime Street, in the city of London, Ship Agent, has given the like notice in respect of the invention of "Improvements in chain cables and chains."

As set forth in their respective petitions, both recorded in the said office on the 19th day of November, 1858.

2671. And Charles Edwards Amos, of the Grove, in the borough of Southwark, Engineer, has given the like notice in respect of the invention of "Improved apparatus for raising and supporting ships or vessels while undergoing repair,

which apparatus is also applicable for facilitating the passage of ships or vessels over bars, sand-banks, or in shallow waters."

As set forth in his petition, recorded in the said office on the 25th day of November, 1858.

2687. And MICHAEL MEYERS, of No. 9, Great Alie Street, Goodman's Fields, London, Umbrella and Parasol Manufacturer, has given the like notice in respect of the invention of "Improvements in parasols."

As set forth in his petition, recorded in the said office on the 26th day of November, 1858.

2746. And GEORGE WILLIAM BALES, of Ipswich, in the county of Suffolk, Gun Maker, has given the like notice in respect of the invention of "Improvements in apparatus for retaining doors, sashes, or frames, when shut or closed."

As set forth in his petition, recorded in the said office on the 1st day of December, 1858.

2856. And RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E. C., Patent Agent, has given the like notice in respect of the invention of "Improvements in the manufacture of cranked axles and shafts."—A communication from Messieurs Russery, Lacombe, and Co., residing at Rive de Gier, France.

As set forth in his petition, recorded in the said office on the 13th day of December, 1858.

2931. And JOSEPH JAMES WELCH, of 17, Cheapside, in the city of London, has given the like notice in respect of the invention of "Improvements in the manufacture of neck-ties, scarfs, or cravats."

As set forth in his petition, recorded in the said office on the 22nd day of December, 1858.

28. And EDMUND BALCHIN, of Myton Gate, Hull, in the county of York, Gun Maker, has given the like notice in respect of the invention of "An improved construction of projectile, applicable to the whale fishery."

As set forth in his petition, recorded in the said office on the 3rd day of January, 1859.

52. And ISAAC HOLDEN, of St. Denis, near Paris, in the empire of France, and ANGUS HOLDEN, of Bradford, in the county of York, have given the like notice in respect of the invention of "Improvements in means or apparatus employed in preparing and combing wool and other fibres."

53. And EDWIN HEYWOOD, of Halifax, in the county of York, has given the like notice in respect of the invention of "Improvements in weaving."

56. And ANDREW BARCLAY, of Kilmarnock, in the county of Ayr, North Britain, Engineer, has given the like notice in respect of the invention of "Improvements in electric and magnetic telegraphs."

As set forth in their respective petitions, all recorded in the said office on the 7th day of January, 1859.

77. And JOHN WHITE, of Finchley, in the county of Middlesex, Surgeon, has given the like notice in respect of the invention of "Improvements in cleansing or purifying air, and in increasing or reducing the temperature thereof, and in the application of air so treated to sanitary and other uses."

As set forth in his petition, recorded in the said office on the 10th day of January, 1859.

93. And JOHN THOMSON, of Dundee, in the county of Forfar, Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture of rugs."

94. And JOSEPH HANDS, of Elgin Crescent, Notting Hill, in the county of Middlesex, Surgeon, has given the like notice in respect of the invention of "Improvements in preserving or preparing skins intended to be converted into leather, or otherwise manufactured."

As set forth in their respective petitions, both recorded in the said office on the 12th day of January, 1859.

105. And RICHARD ASTON LIGHTOLLER, of Chorley, in the county of Lancaster, Cotton Spinner, has given the like notice in respect of the invention of "Certain improvements in machinery or apparatus for spinning cotton or other fibrous materials."

113. And JAMES JOHN STEVENS, of Darlington Works, Southwark, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "Improvements in railway signal apparatuses."

115. And JOHN GRIST, of Beazley Crescent, Old Ford, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improvements in machinery for cutting and shaping staves and heads for casks, and for the manufacture of casks."

As set forth in their respective petitions, all recorded in the said office on the 13th day of January, 1859.

124. And WILLIAM CRAFT, of 12, Cambridge Road, Hammersmith, and THOMAS WILSON, of Bradmore House, Chiswick, both in the county of Middlesex, have given the like notice in respect of the invention of "Improvements in drawers and napkins so as to render the same waterproof."

126. And JOHN DAUGLISH, of Tunbridge Wells, M.D., has given the like notice in respect of the invention of "Improvements in obtaining carbonic acid gas."

127. And ROBERT ROMAINE, of Chapel Street, Bedford Row, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "An improved arrangement of portable railway."

As set forth in their respective petitions, all recorded in the said office on the 14th day of January, 1859.

137. And JAMES MONTGOMERY, of the city of New York, in the United States of America, has given the like notice in respect of the invention of "Improvements in the construction of the hulls of steam and other vessels, and in the feed-water heaters, boilers, water-gauges, condensers, engines, and propelling machinery appertaining to the former, a portion of which improvements (with the exception of those on the hull), are applicable to analogous useful purposes."

As set forth in his petition, recorded in the said office on the 17th day of January, 1859.

And notice is hereby further given, that all persons, having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

1st February, 1859.

1744. Joseph William Schlesinger, of Red Grove House, South Lambeth, in the county of Surrey, Gentleman, for an invention of "A new or improved machine for roasting and basting articles of food."—A communication from a Foreigner residing abroad.—Dated 2nd August, 1858.

1747. Stephen Hine, of Macclesfield, in the county of Chester, Silk Manufacturer, for an invention of "Certain improvements in machinery or apparatus for twisting, doubling, and re-twisting, and winding silk or other similar fibrous material."—Dated 2nd August, 1858.

1766. Charles Callebaut, Merchant, of 2, Rue Ste. Appoline, Paris, in the empire of France, and of 45, Essex Street, Strand, London, for an invention of "Improvements in sewing machines."—Dated 4th August, 1858.

1779. Joze Luis, Patent Agent, of No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, for an invention of "A machine for drilling and grooving the naves of wheels, and also to force the axle box into the naves."—A communication from a Foreigner residing abroad.—Dated 5th August, 1858.

1785. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improvements in knitting frames."—A communication from M. Ulysse Puech, of Paris, a Foreigner residing abroad.—Dated 5th August, 1858.

1794. Stephen Carey, of Clink Street Wharf, Bankside, Southwark, in the county of Surrey, Builder and Contractor, for an invention of "An improved system of forming the permanent way of railroad transit, also common tramway and channel or watercourse by the means of cast iron plates or boxes peculiarly constructed so as to make one continuous way or channel."—Dated 6th August, 1858.

1795. George Weston, of No. 6, Pond Hill, Sheffield, in the county of York, for an invention of "A washing machine."—Dated 7th August, 1858.

1820. Robert Hanham Collyer, M.D. and C.E., of No. 3, Park Road, Regent's Park, county of Middlesex, for an invention of "An improved coating composition to protect vessels from marine, animal, and vegetable substances."—Dated 10th August, 1858.

1837. James Fogg, of Great Lever, near Bolton, in the county of Lancaster, Book Keeper, for an invention of "Improvements in pressure gauges."—Dated 12th August, 1858.

1893. Francis Preston, of the city of Manchester, Mechanical Engineer, and William McGregor, of the same place, Mechanic, for an invention of "Improvements in machinery for cutting files."—Dated 20th August, 1858.

1924. John Macintosh, of North Bank, Regent's Park, in the county of Middlesex, for an invention of "Improvements in insulating telegraphic wires or conductors, and in apparatus employed therein, part of which apparatus is applicable to the manufacture of tubes from india rubber."—Dated 24th August, 1858.

2037. Alexander McEwan Peters, of Edinburgh, in the county of Mid-Lothian, North Britain, Plumber, for an invention of "Improvements in apparatus for regulating the flow or passage of fluids."—Dated 8th September, 1858.

2373. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in telegraphic apparatus."—Dated 23rd October, 1858.

2416. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "An improved method of attaching wheels to the axles of railway carriages."—Dated 29th October, 1858.

2651. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improved apparatus for propelling and steering vessels."—Dated 22nd November, 1858.

2775. Ralph Pickering, of Lockerbie, in the county of Dumfries, Railway Inspector, for an invention of "Improvements in communicating signals from one part of a railway train to another."—Dated 4th December, 1858.

2821. Henry Maudslay, of No. 4, Cheltenham Place, Lambeth, in the county of Surrey, Civil Engineer, for an invention of "Improved glass and other vitreous vessels."—Dated 9th December, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 28th January*, 1859, *inclusive.*)

27th January.

299. Elisha Smith Robinson, of the city of Bristol, Paper Merchant, for an invention of "Improvements in machinery for lithographic and zincographic printing."—Dated 4th February, 1856.

28th January.

255. John Gretton, of Burton-upon-Trent, in the county of Stafford, Brewer, for an invention of "Improvements in brewing."—Dated 30th January, 1856.

261. Henry Tylor, of the firm of Tylor and Pace, of New Bond Street, in the county of Middlesex, Manufacturers, for an invention of "An improved joint, applicable to cots, bedsteads, and other frames in metal."—Dated 31st January, 1856.

268. John Barker Anderson, of East Hill, Wandsworth, in the county of Surrey, Soap Manufacturer, for an invention of "Improvements in the manufacture of soap, parts of which improvements are applicable to preparing materials for the purposes of illumination, and also for the purposes of lubrication."—Dated 31st January, 1856.

287. Benjamin Franklin Miller, of the city, county, and state of New York, United States of America, for an invention of "Improvements in ventilators for chimneys and other purposes."—Dated 1st February, 1856.

313. James Howard, of Bedford, Agricultural Implement Maker, for an invention of "Improved apparatus for making mould for castings."—Dated 5th February, 1856.

Erratum in Journal of 28th January.

114. For "Manceau" read "Manceaux."

FOREIGN PATENTS.

FRANCE.

CURRENT LIST of PATENTS of Invention and Certificates of Addition.

1858.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

NOTE.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

5177. ALEXIS FRÉDÉRIC HERBILLON, represented by Clerdent, of 29, Rue des Martyrs, Paris, a Certificate of Addition to his Patent of 13th January, 1858, for "Improvements in the manufacture of dolls by using cork."—Dated 15th November, 1858.

5178. ETIENNE BROCARD, of 26, Rue de la Roquette, a Certificate of Addition to his Patent of 10th November, 1856, for "Casings of copper and brass without soldering for the manufacture of cylinders for printing stuffs."—Datad 15th November, 1858.

5179. MARIE LOUISE LISE BEAUDELORIX, of 104, Boulevart Monceau, Batignolles, a Certificate of Addition to her Patent of 14th December, 1858, for "Improvements in the manufacture of mechanical barcelonnettes, &c."—Dated 15th November, 1858.

5180. LISE BEAUDELOUX, of 104, Boulevart Monceau, Batignolles, a Certificate of Addition to her Patent of 2nd September, 1858, for "Metallic lace, various sorts of points for the manufacture of fancy articles."—Dated 15th November, 1858.

5181. ETIENNE DEMOLINS, represented by Richard, of 53. Rue Vivienne, Paris, for "A system for preventing carriages from running off the rails."—Dated 15th November, 1858.

5182. BOURET and FERRÉ, of 11, Rue du Perche, Paris, for "A system of stamping gold, silver, copper, and other metal rings."—Dated 15th November, 1858.

5183. BATAILLE, sen. and jun., represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of iron framework for covering halls, stations, &c."—Dated 15th November, 1858.

5184. CAMILLE MAZOUDIER, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Applying electric telegraphs to the service in eating houses."—Dated 15th November, 1858.

5185. JOHN OXLEY, represented by Daubréville, of 60, Boulevart de Strasbourg, Paris, for "Improvements in fixing and mounting frames of doors or windows of carriages."—Dated 16th November, 1858.

5186. NICOLAS LIBOTTE, represented by Daubréville, of 60, Boulevart de Strasbourg, Paris, for "A system of breaks for steam and other engines."—Dated 16th November, 1858.

5187. PIERRE LOUIS MARIE ADOLPHE DE VILLERS, of 106, Rue du Bac, Paris, for "A system of extinguishers."—Dated 16th November, 1858.

5188. DE FREY, MALLET, and Co. (Société), domiciled with Delagrange, of 71, Rue des Marais St. Martin, Paris, for "Waterproof coating for rendering canvass impervious."—Dated 16th November, 1858.

5189. WILLIAM SELLERS, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "A machine for turning metal bars and axles, cylindrical rings and for screw cutting."—Dated 16th November, 1858.—(American Patent, expiring 11th June, 1872.)

5190. GEORGE BARTHOLOMEW, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "Improvements in gas meters called 'water meters.'"—Dated 16th November, 1858.—(English Patent, expiring 11th June, 1872.)

5191. JEAN ADRIEN DELEUIL, of 6, Rue du Pont de Lodi, Paris, for "Improvements in photography."—Dated 16th November, 1858.

5192. ARCHEREAU and COUILLARD, of 118, Rue de Flandres à la Villette, for "A process for obtaining water-steam, hot air, and gases."—Dated 16th November, 1858.

5193. JACQUES LOUIS BOUCHER, of Rue de Bercy' au coin de la Rue d'Artois, Paris, for "An apparatus for drying stuffs, linen, and tissues in general."—Dated 16th November, 1858.

5194. BERNARD AUGUSTE SERRES, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A substance being a substitute for gutta-percha and caoutchouc."—Dated 16th November, 1858.

5195. ABEL JOSEPH ANTOINE ALLIÉ, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 2nd November, 1858, for "Instruments for measuring the dimension of the head for fitting hats."—Dated 16th November, 1858.

5196. DOMINIQUE ARTIGE, of 43, Rue de Grenelle, Grenelle, for "Improvements in grease boxes for railway carriages, &c."—Dated 17th November, 1858.

5197. CHARLES ULYSSE COLOMB-MÉNARD, of Rue Barabonne, Lodière, département de l'Hérault, for "A calculating machine for making additions, subtractions, and multiplications."—Dated 22nd November, 1858.

5198. JULES JOSEPH TEISSEIRE, of 44 B, Allées de Meilhan, Marseilles, département des Bouches du Rhône, a Certificate of Addition to his Patent of 19th June, 1858, for "Smoking pipes with purifying tubes."—Dated 22nd November, 1858.

* For the French Patent Law see No. 228 of this Journal.

5199. Constant Brocsolles, of 6, Rue St. Famille, Versailles, départment de Seine et Oise, for "A system of escapements for watches."—Dated 23rd November, 1858.

5200. Falguère and Soubrié, the former of Claira, the latter of Perpignan, département des Pyrenées Orientales, for "Impervious foot coverings."—Dated 23rd November, 1858.

5201. Stanislas Lemoine-Brabant, of 3, Rue du Levant, Reims, département de la Marne, a Certificate of Addition to his Patent of 2nd February, 1858, for "An apparatus for preserving slubs in spinning machines."—Dated 24th November, 1858.

5202. Guillaume Cassang, of Vergt de Biron, département de la Dordogne, a Certificate of Addition to his Patent of 8th April, 1857, for "A system of breaks, &c."—Dated 24th November, 1858.

5203. Fortuné Célestin Auphan, of 2, Cours St. Louis, Marseille, département des Bouches du Rhône, for "A truss."—Dated 25th November, 1858.

5204. Jean Mathieu Rey, of Tournon, domiciled with Teyssier, of Valence, département de la Drôme, for "A wheelbarrow."— Dated 25th November, 1858.

5205. Jean Marie Magnin, of 26, Quai de l'Archevêché, Lyon, département du Rhône, a Certificate of Addition to his Patent of 5th July, 1854, for "A machine for sewing and embroidering, &c."—Dated 25th November, 1858.

5206. Michel Locqueneux, of 6, Rue Comtesse, Lille, département du Nord, for "A continuous carbonizing kiln."—Dated 27th November, 1858.

5207. Eschenauer-Benecke and Co., of 24, Quai des Chartreux, Bordeaux, département de la Gironde, for "A system for melting and bleaching fat of oxen and other animals by a single operation."—Dated 27th November, 1858.

5208. Amand Jumeau, of St. Martin en Bierre, département de Seine et Marne, a Certificate of Addition to his Patent of 26th June, 1858, for "A machine for mortising and boring naves of carriage wheels, &c."—Dated 20th November, 1858.

5209. Claude Carteron, of Selongey, département de la Côte d'Or, for "A machine for destroying moles."—Dated 24th November, 1858.

5210. Jean Claude Mignot, of Messia-les-Clichy, département du Jura, for "A press for pressing the residue of grapes."—Dated 25th November, 1858.

5211. Nicolas Benjamin Nappée, of St. Nabord, département des Vosges, for "A mode of suspending bells, for facilitating their ringing and regulating the strokes."—Dated 26th November, 1858.

5212. Jacques Peurey, of Grand Lucé, département de la Sarthe, for "Improvements in Parand's machine for stoppering bottles, as patented 2nd July, 1856, said improvement consisting of an opening made at the side of the cylinder for introducing the stoppers in said machine."— Dated 26th November, 1858.

5213. Michel Menétrier, of Sellieres, département du Jura, for "An instrument applicable to all machines for accelerating their action."—Dated 27th November, 1858.

5214. Auguste Aubert, of 15, Rue des Capucins, Lyon, département du Rhône, for "A system of breaks."—Dated 27th November, 1858.

5215. Ludovic Londynski, of 3 bis, Rue de Rivoli, Paris, for "A kind of toys."—Dated 17th November, 1858.

5216. Meneut and Gorgu, domiciled with Letellier, of 8, Rue des Martyrs, Paris, for "A system of railway switches."—Dated 17th November, 1858.

5217. Louis Narcisse Simon, of 34, Rue du Petit-Carreau, Paris, for "Double tissues with running strings employed in belts for pages of ladies' dresses."—Dated 17th November, 1858.

5218. Roca and Delas, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Machines for manufacturing and moulding necks and stoppers of bottles, decanters, flasks, &c., of any ceramic substance."—Dated 17th November, 1858.

5219. Ebenezer Lester, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of railway carriages."—Dated 17th November, 1858.

5220. Henri Rudolphe Poninski, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 12th March, 1856, for "Improvements in the manufacture of artificial leaves and flowers."— Dated 17th November, 1858.

5221. Louis François Clément Breguet, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 12th September, 1857, for "Improvements in Morse's telegraphs." — Dated 17th November, 1858.

5222. Guillout and Ruffier, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in safety railway breaks."—Dated 17th November, 1858.

5223. Jean Baptiste Léon Mignot, of 21, Rue d'Hauteville, Paris, a Certificate of Addition to his Patent of 13th October, 1857, for "A preparation for drying asphalt, tar, &c., and rendering the same sinewy."—Dated 17th November, 1858.

5224. Jean Baptiste Léon Mignot, of 21, Rue d'Hauteville, Paris, a Certificate of Addition to his Patent of 19th June, 1857, for "Drain-pipes, water, gas, and other pipes."—Dated 17th November, 1858.

5225. Henri Laurent Muller, of 5 or 6, Rue des Poitevins, Paris, for "A mode of advertising, called 'perfumed advertisements.'"—Dated 17th November, 1858.

5226. Jean Eugène Leclaire, of 2, Passage St. Bernard, Faubourg St. Antoine, Paris, a Certificate of Addition to his Patent of 19th June, 1858, for "Improvements in toilet furniture."—Dated 17th November, 1858.

5227. Paul Adolphe Auguste Beau, of 11, Rue de la Monnaie, Paris, for "A pocket stereoscope."—Dated 17th November, 1858.

5228. Joseph Nicolas Brutus Broquet, of 9, Rue Fontaine au Roi, Paris, for "A kind of buckles."—Dated 18th November, 1858.

5229. Charles Boutet, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 5th June, 1858, for "Mountings of parasols."—Dated 18th November, 1858.

5230. François Coignet, with Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 29th March, 1855, for "Using all kinds of beton in constructions in in general."—Dated 18th November, 1858.

5231. Marie Simon Langlois, of 2, Rue Carnot, Paris, for "Encaustic gluten for painting."—Dated 18th November, 1858.

5232. Jean Périnaud, of 95, Boulevart Beaumarchais, Paris, for "A system of finishing woollen and mixed stuffs." — Dated 18th November, 1858.

5233. Félix Marie Baudouin, of 3, Rue des Récollets, Paris, a Certificate of Addition to his Patent of 8th February, 1858, for "Improvements in the construction of submarine telegraphic cables."—Dated 18th November, 1858.

5234. Jules François Mathias, of 120, Rue St. Denis, Paris, for "Goffering bonnets."—Dated 19th November, 1858.

5235. Touy Petitjean, represented by Brosette, of 5, Rue Jean Jacques Rousseau, Paris, a Certificate of Addition to his Patent of 8th October, 1855, for "A process for silvering mirrors and glass in general."—Dated 19th November, 1858.

5236. Charles Théodore Launay, of 7, Rue des Acacias, Vaugirard, for "A gas manometer." —Dated 19th November, 1858.

5237. Prince Serge Dolgoruki, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A cylindrical press, called 'sergiane.'"—Dated 19th November, 1858.

5238. André Guichard, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Manufacture of garlands, and other ornaments for tombs." —Dated 19th November, 1858.

5239. John George Taylor, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in articles for the writing desk, and in their manufacture."—Dated 19th November, 1858.

5240. Jean Jacques Monnié, domiciled with Lunel, of 41, Rue des Bourdonnais, Paris, a Certificate of Addition to his Patent of 11th August, 1858, for "A machine for dry-rubbing and polishing inlaid floors, &c." — Dated 20th November 1858.

5241. Martin Nicolle, of 13, Rue des Filles du Calvaire, Paris, for "A gas carburator."—Dated 20th November, 1858.

5242. Tryer, Watt, and Holmes, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Improvements in tanning hides and leather."—Dated 20th November, 1858.—(English Patent, expiring 3rd November, 1872.)

5243. Marié Joseph Denis Farcot, of St. Owen, a Certificate of Addition to his Patent of 16th February, 1854, for "Improvements in the means of obtaining steam." — Dated 20th November, 1858.

5244. Pierre Richard, of 15, Rue St. Jean, Faubourg St. Germain, for "A system of presses."— Dated 20th November, 1858.

5245. Claude Conreaud, of 56, Rue St. Maur-Popincourt, Paris, a Certificate of Addition to his Patent of 21st October, 1857, for "A piston-can for oil or grease."—Dated 20th November, 1858.

5246. Bernard Lala-Borderie, of 15, Rue de Varenne, Paris, for "An hydraulic motor."—Dated 20th November, 1858.

5247. Charles John Carr, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in forge and other hammers."— Dated 20th November, 1858.—(English Patent, expiring 7th May, 1872.)

5248. Frédéric Versmann, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in purifying and softening water."—Dated 20th November, 1858.

5249. Enay Giraud, of 192, Rue de Paris, Belleville, for "A perfume."—Dated 20th November, 1858.

5250. Joseph Antoine Jean Redier, of 16, Rue des Petites Ecuries, Paris, a Certificate of Addition to his Patent of 30th April, 1856, for "A clock." —Dated 20th November, 1858.

5251. Prosper Victor Hippolyte Debriges, of 6, Rue Neuve St. Etienne, Paris, for "A mode of lighting waters for fishing by night."—Dated 20th November, 1858.

5252. Charles de Jongh, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 13th May, 1856, for "A mechanical process for sorting the staples of a bundle of carded filaments for spinning, according to length." — Dated 20th November, 1858.

5253. Pierre Joseph Lutterbach, represented by his Daughter, of 97, Rue St. Honoré, Paris, a Certificate of Addition to his Patent of 20th November, 1857, for "A kind of respiratory belt." —Dated 20th November, 1858.

5254. Napoléon Félix Boreiko de Chodzko, of 33, Chemin de Ronde de la Barrière Blanche, Paris, a Certificate of Addition to his Patent of 20th July, 1858, for "A smoke-consuming apparatus."—Dated 20th November, 1858.

5255. Charles Jules Joannis, domiciled with Médard, of 192, Rue du Temple, Paris, a Certificate of Addition to his Patent of 21st November, 1857, for "A pocket umbrella."—Dated 22nd November, 1858.

5256. Henry Gustave Delvigne, of 16, Rue des Acacias aux Ternes, for "A kind of pistol."—Dated 22nd November, 1858.

5257. Noel Henri Beltête, represented by Dreyfous, of 54, Rue de Bondy, Paris, a Certificate of Addition to his Patent of 26th January, 1856, for "Manufacture of bezils in general." — Dated 22nd November, 1858.

5258. Antoine Lambert Kraemer, of 48, Chaussée Ménilmontant, Belleville, for "An instrument

called 'regenerator of the source of life.'"—Dated 22nd November, 1858.

5259. Edward Charles Priest, of 20, Rue de l'Observatoire, Paris, for "An hydraulic machine."—Dated 22nd November, 1858.

5260. Noemi Thurel, of 9, Rue d'Arcole, Paris, for "Net veils, called 'Egyptian veils.'"—Dated 22nd Novemher, 1858.

5261. Jean Louis Marie, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 22nd April, 1858, for "A pump for compressing air, gas, and fluids, &c."—Dated 22nd November, 1858.

5262. Louis Sourbien, of 8, Rue de la Charonnerie, St. Denis, for "A toy, called 'parachute arrows.'"—Dated 22nd November, 1858.

5263. Jean Freland, represented by Herpst, of 39, Rue de l'Echiquier, Paris, a Certificate of Addition to his Patent of 14th February, 1856, for "A system of semi-elliptical framework."—Dated 22nd November, 1858.

5264. Hippolyte Guillaume Garin, of 1, Rue de la Glacière, Passage Penel, Clignancourt, a Certificate of Addition to his Patent of 27th November, 1857, for "Improvements in the construction of flags for railways."—Dated 22nd November, 1858.

5265. Nicolas Duproz, of Aumont, Caen, département du Calvados, for "A force and lift pump, called 'Artesian pump.'"—Dated 20th November, 1858.

5266. Samuel Gnahn, of Wissembourg, département du Bas Rhin, for "A mill for pulverizing sugar."—Dated 22nd November, 1858.

5267. Michel Gœtz, of 31, Faubourg de Savenne, Strasbourg, département du Bas Rhin, for "A machine for disinfecting cesspools."—Dated 22nd November, 1858.

5268. Louis Rangod, of Valence, département de la Drome, for "A continuous wringing and washing machine, for washing tissues, silk-handkerchiefs, calico, &c. coming from the dye."—Dated 25th November, 1858.

5269. Olivier and Co., of Valence, département de la Drôme, for "Improvements in Olivier's process for stretching raw silk, as patented 23rd June, 1855."—Dated 27th November, 1858.

5270. Belmont and Perret, of 4, Rue Terraille, Lyon, département du Rhone, for "A shearing machine with a pointed lever."—Dated 27th November, 1858.

5271. Joseph Marleix, of 80, Rue Centrale, Lyon, département du Rhone, for "A symbolical collar."—Dated 30th November, 1858.

5272. Isidore Lerat, of Houdain, département du Nord, for "An economical system of heating by baking lime."—Dated 1st December, 1858.

5273. Hippolyte Masse, domiciled with Franchomme, of 17, Rue des Canonniers, Lille, département du Nord, for "Processes for discolouring beetroot juice."—Dated 1st December, 1858.

5274. Edme Marie Musard, of 47, Rue aux Surs, Paris, for "A system of brass instruments."—Dated 22nd November, 1858.

5275. Jean Louis Lucas, of 1, Rue Neuve St. Eustache, Paris, a Certificate of Addition to his Patent of 26th May, 1858, for "A preservative cosmetic."—Dated 22nd November, 1858.

5276. Henri Heidinger, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An absolutely constant electric battery."—Dated 22nd November, 1858.

5277. Louis Gustave Scriba, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A cigar case for preserving cigars."—Dated 22nd November, 1858.

5278. Davey and Chanu, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A composition for working mines, quarries, and extensive railway works."—Dated 22nd November, 1858.

5279. Jules Eugène Suffit, of 14, Carrefour de l'Odéon, Paris, for "An instrument for measuring declivities."—Dated 22nd November, 1858.

5280. Poivret and Charles Amos, and junr., domiciled with Georges, of 59, Rue de Saintonge, Paris, for "Manufacture of a kind of tricot on circular looms."—Dated 23rd November, 1858.

5281. Hublier, of 18, Rue Castex, Paris, a Certificate of Addition to their Patent of 11th October, 1858, for "A registering apparatus for carriages."—Dated 23rd November, 1858.

5282. Aimé François Joseph Lannoy, represented by Amouroux, of 333, Rue St. Martin, Paris, for "An apparatus for heating vehicles."—Dated 23rd November, 1858.

5283. Joseph Apollon Détroyat, of 10, Rue de Choiseul, Paris, a Certificate of Addition to his Patent of 26th October, 1857, for "A comb-cleaning apparatus."—Dated 23rd November, 1858.

5284. Métra and Bellat, of 21, Rue du Dragon, Paris, for "A kind of carpet."—Dated 23rd November, 1858.

5285. Pierre Cottin, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "A seat with a moveable shaft."—Dated 23rd November, 1858.

5286. Alfred Hope Johnson Bastable, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "Improvements in apparatus used for obtaining light."—Dated 23rd November, 1858.—(English Patent, expiring 11th September, 1872.)

5287. Henri François Gaultier de Claubry, of 45, Rue des Fossés St. Victor, Paris, a Certificate of Addition to his Patent of 23rd February, 1857, for "Treatment of suds."—Dated 23rd November, 1858.

5288. Marie Louise Koegel Fichter, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "Making net voilettes by hand."—Dated 23rd November, 1858.

5289. Pouget and Lelong, the former of 10, Rue de Malte, the latter of 26, Boulevart St. Denis, Paris, for "Various applications to schist lamps."—Dated 23rd November, 1858.

5290. Louis Auguste Mielle, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 10th November, 1858, for "A system of advertising tables."—Dated 23rd November, 1858.

5291. Ernest François Jean Baptiste Cozette' represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Various applications of aluminium alloyed with certain metals."—Dated 23rd November, 1858.

5292. Caillet and William, of 8, Rue Thévenot, Paris, for "A comb-cleaning apparatus."—Dated 23rd November, 1858.

5293. Charles Prieur, represented by Daubréville, of 23, Boulevart de Strasbourg, Paris, for "A clasp for travelling bags."—Dated 24th November, 1858.

5294. Emmanuel Buxtor, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of knitted fabrics."—Dated 24th November, 1858.

5295. Layet and Fiéfuet de Sauville, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A system of continuous blasts."—Dated 24th November, 1858.

5296. Charles Joseph Mettais, of 8, Rue des Jeuneurs, Paris, a Certificate of Addition to his Patent of 2nd November, 1858, for "A goffering and quilling machine."—Dated 24th November, 1858.

5297. Antoine Gabriel Brocot, domiciled 62, Rue Charlot, Paris, for "Arrangements in clocks, and especially in the suspension of pendulums."—Dated 24th November, 1858.

5298. Thimoléon Zoé Louis Mauzel, of 44, Rue du Dragon, Paris, for "Improvements in clocks watches."—Dated 24th November, 1858.

5299. Narcisse Louis Simon, represented by Tolhausen, of 35, Boulevart Bonne Nouvelle, Paris, a Certificate of Addition to his Patent of 17th November, 1858, for "Double tissues with running strings employed in belts for pages of ladies' dresses."—Dated 24th November, 1858.

5300. Bailey, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in machines for combing wool and other fibrous substances."—Dated 24th November, 1858.—(English Patent, expiring 12th May, 1872.)

5301. Amédée Séguy, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A tobacco-pouch, called 'American pocket.'"—Dated 24th November, 1858.

5302. Josselin and Bertrand, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to their Patent of 24th April, 1858, for "A mode of closing inodorous closets, &c."—Dated 24th November, 1858.

5303. Auguste Soins d'Alégambe, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 16th August, 1858, for "A process for wringing yarns."—Dated 24th November, 1858.

5304. Rowett, Paignon, and Daudaux, of 21, Rue de Hanôvre, Paris, for "Construction and mode of construction of electric telegraph wires."—Dated 25th November, 1858.

5305. Serge Krotkoff, represented by Pelet, of 10, Rue Mogador, Paris, for "A safety apparatus against thieves."—Dated 25th November, 1858.

5306. Eugène Goddier, represented by Pelet, of 10, Rue Mogador, Paris, for "Applying talc or mica to various purposes."—Dated 25th November, 1858.

5307. Marie Joseph Dangles, of 70, Rue d'Angoulême, Paris, a Certificate of Addition to his Patent of 10th September, 1858, for "Improvements in the construction of slides, inlets, and regulators of steam engines."—Dated 25th November, 1858.

5308. Eugène Charrière and Co., represented by Besançon, of 25, Rue St. Quentin, Paris, for "A process for tempering steel."—Dated 25th November, 1858.

5309. François Coignet, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 22nd January, 1857, for "Construction of monolite foot-pavements, or pavements of flag-stones."—Dated 25th November, 1858.

5310. Aléxandre Lambert, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A toy."—Dated 25th November, 1858.

5311. Ernest Stelzl, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A kind of glass painting."—Dated 25th November, 1858.

5312. Jean Pierre Calandre, of 77, Rue de la Verrerie, Paris, for "A so-called 'Parisian inkstand.'"—Dated 25th November, 1858.

5313. Pierre Bernard, of 32, Rue Basse du Rempart, Paris, for "A machine for cutting up horn."—Dated 25th November, 1858.

5314. Meinrad Hitz, of 3, Rue St. Dominique, Paris, a Certificate of Addition to his Patent of 18th March, 1857, for "A system of toys."—Dated 25th November, 1858.

5315. Emile Muller, of 33, Rue de Chabrol, Paris, a Certificate of Addition to his Patent of 1st April, 1858, for "A fire-place with reversed hollow intermediate abutments."—Dated 25th November, 1858.

5316. Emile Muller, of 33, Rue de Chabrol, Paris, for "An apparatus for glueing wood by means of steam."—Dated 25th November, 1858.

5317. Robert Juckes Clifton, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Improvements in castors."—Dated 25th November, 1858.

5318. Gustave Besson, of 7, Rue des Trois Couronnes, Paris, a Certificate of Addition to his Patent of 18th March, 1858, for "Improvements in musical instruments."—Dated 25th November, 1855.

5319. Gustave Besson, of 7, Rue des Trois Couronnes, Paris, a Certificate of Addition to his Patent of 18th January, 1855, for "Improvements in brass instruments."—Dated 25th November, 1858.

5320. Charles Peugeot, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A mechanical process for manufacturing tools for carpenters, joiners, and others."—Dated 25th November, 1858.

5321. Joseph Haussmann, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A peculiar arrangement of drums and interior ventilators for dressing machines."—Dated 25th November, 1858.

5322. Pierre Prosper Baudouin, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 9th February, 1858, for "A card with two large joined doffers, &c., with tops, &c."—Dated 25th November, 1858.

5323. Joseph Bouland, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A jointed folding rod with a brush for cleaning fire-arms and for other purposes."—Dated 25th November, 1858.

5324. Alexis Bouret, of Neufchâteau, département des Vosges, for "A press for cutting the edges of books."—Dated 29th November, 1858.

5325. Jean Noël Mauzaize, of Chartres, département d'Eure et Loir, for "A mechanism for throwing horizontal axles in and out of gear."—Dated 30th November, 1858.

5326. François Auguste Ducrot, of 2, Rue Duquai, Louvier, département de l'Eure, for "A kind of gas regulator."—Dated 29th November, 1858.

5327. Messrs. Arbault, of Périgueux, département de la Dordogne, a Certificate of Addition to their Patent of 18th May, 1858, for "A machine for cutting files."—Dated 29th November, 1858.

5328. Jean Martin Cosnard, of 10, Rue d'Albertas, Marseille, département des Bouches du Rhône, for "A split gas-burner for obtaining a convergent and steady light."—Dated 30th November, 1858.

5329. Jean Pierre Girard, of Coutances, département de la Manche, for "A coffee-mill."—Dated 1st December, 1858.

5330. Balard and Usiglio, of Alois, département du Gard, for "A method of manufacturing carbonate of soda and potash, by means of lixivia, which have previously been washed by metallic oxides."—Dated 29th December, 1858.

5331. Jean François Xavier Perrin, of Vuillafaus, département du Doubs, a Certificate of Addition to his Patent of 5th July, 1853, for "A system of pumps with two cylinders of a different diameter." — Dated 30th November, 1858.

5332. Jean François Xavier Perrin, of Vuillafaus, département du Doubs, for "Improvements in the construction of pumps with a single action and a direct motion, called 'pumps for carriages and watering.'"—Dated 30th November, 1858.

5333. Jean Bergeron, of Fléac, département de la Charente, for "An apparatus for distilling wines and other alcoholic substances."—Dated 30th November, 1858.

5334. Jean Verset, of Haute Grand Rue, Nantes, département de la Loire Inférieure, for "Working and chasing zinc without tempering the same, for the manufacture of grooved pipes used in conveying the waste-water of houses."—Dated 1st December, 1858.

5335. Marceline Boyer Guignon, of Marseille, département des Bouches du Rhône, for "Knitting petticoats by hand or machinery." —Dated 2nd December, 1858.

5336. Frédéric Chenel, of 4, Place du Commerce, Nantes, département de la Loire Inférieure, a Certificate of Addition to his Patent of 5th December, 1857, for "A machine for thrashing trefoil and other grain."—Dated 2nd December, 1858.

5337. Jacques Etienne Porcher, of Luce, département d'Eure et Loir, a Certificate of Addition to his Patent of 6th March, 1858, for "A regulator billiard table."—Dated 2nd December, 1858.

5338. Bernard and Vallette, of 7, Rue des Fossés, St. Etienne, département de la Loire, for "Two systems of locks with spring roundings, one being a two and a half lock with one bolt, the other being called 'English lock with spring roundings.'"—Dated 2nd December, 1858.

5339. Monnier and Co., of 2, Rue Thiars, Marseille, département des Bouches du Rhône, for "An apparatus for introducing certain substances into steam boilers for protecting the same from incrustations."—Dated 3rd December, 1858.

5340. Adrien Cabarrus, of Grignols, département de la Gironde, a Certificate of Addition to his Patent of 27th July, 1858, for "Means and arrangements for applying breaks to railway-carriages."—Dated 3rd December, 1858.

5341. Marie Marguerite Beaujeu Cognard, of St. Just en Chevalet, département de la Loire, for "Obtaining embroideries without wrong sides, by the needle."—Dated 3rd December, 1858.

5342. Vincent Verneuil, of Moulins, département de l'Allier, for "Using the mistletoe in making liqueurs, preserves, and pastry."—Dated 3rd December, 1858.

5343. Premier, senr. and junr., of Romans, département de l Drôme, for "An economical process for manufacturing preserved fruit."—Dated 4th December, 1858.

5344. Aléxandre Plaff, domiciled with Kirchleim, of Cours Noir, Strasbourg, département du Bas Rhin, for "A so-called 'barometric motor.'"—Dated 30th November, 1858.

5345. Emile Scriba, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A kind of expansion bag for ladies, and for other purposes."—Dated 25th November, 1858.

5346. Jules Chopin, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 11th July, 1856, for "A gas carburator." — Dated 25th November, 1858.

5347. Aléxis Lamy, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Applying barlooms."—Dated 25th November, 1858.

5348. Alfred Marsh, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in gas retorts for extracting gas from oils or other liquid substances."—Dated 25th November, 1858.—(American Patent, expiring 10th August, 1872.)

5349. Joël Haywood Tatum, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in the manufacture of candles." —Dated 25th November, 1858.—(American Patent, expiring 5th October, 1872.)

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

LIST of PATENTS, with Claims annexed, issued from the United States Patent Office, for the week ending 11th January, 1859, and each bearing that date.

No. 22,538. WM. PAGGET ALLEN, of Dubuque, Iowa, for an "Improvement in composition for friction matches."

"I do not claim the use of the general substance marked as A. in the foregoing specification as a coating for the tips of matches, nor the combination of phosphorous with earthy substances to render it less inflammable, nor its combination with glutinous substances to cause it to adhere; but what I do claim is, 1st, the combination of phosphorous with the substances marked B and C, in the proportions and manner substantially and for the purpose set forth in the foregoing specification. 2d, the combination of phosphorus with the substances marked D and E, in the said proportions and manner and for said purpose. 3d, the combination of phosphorus with the substance marked A, in said proportion and manner and for said purpose."

No. 22,539. JOHN ALLENDER, of New London, Conn., for an "Improved roller for expressing water from clothes."

"Claim.—I claim a roller consisting of a spirally coiled spring arranged on a shaft or roller; made smallest in the middle (to allow the spring to yield), covered with india-rubber or some flexible material that will yield or bend readily as the spring yields to the cloth, clothes, or other article being squeezed by the rollers."

No. 22,540. JAMES BARKLEY, of Weston, Mo., for an "Improved door spring."

"Claim.—I do not claim, broadly, the devices herein employed, as I am aware that many forms and arrangements of these have been used; but having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is, the employment of the spring B, which shall be provided with a hook *a* at one end, and which shall be secured to the casing at the other by means of two half staples, thus making a spring which is adjustable to both ends capable of being detached from either the door or casing in a moment of time, as herein specified."

No. 22,541. BENJN. BEERS, of New Fairfield, Conn., for an "Improvement in canteens."

"Claim.—I claim the combination with said canteen of the additional vessel made by hollowing out a piece of wood and inserting its edge in a groove in the end or head."

No. 22,542. A. J. BOWERS, of Richmond, Va., for an "Improved method of securing together the sides of cast-metal columns."

"Claim.—Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, securing the plates or sides of metal columns together by means of the projections *a, a, e, e*, ledge *c*, provided with notches *d* and the wedges *f, f*, substantially as shown and described."

No. 22,543. THOS. BIRCH and LEWIS BRADLEY, of Hartford, Conn., for an "Improved water-closet."

"The nature of our improvement consists in constructing an air vessel, or in the employment of an air vessel, to produce a gradual stoppage of the flow of water as applied to waterclosets. Claim.—We are aware that various devices have been used for the purpose herein described, by the use of water and air valves of different construction; but what we claim, and desire to secure by Letters Patent, is, the arrangement of the metallic rim B, arm C, disk F, cap G, lever Q, in the manner as and for the purpose described."

No. 22,544. DUNCAN BRUCE, of Paspebiac, Canada, for an "Improvement in artificial manure."

"Claim.—I do not claim the use of burned clay as an absorbent, nor of charred vegetable substances, for the purpose of disinfecting animal matters, neither do I claim making use for the above purpose of any mixture of these substances, when not prepared as above described; but what I do claim as my invention, and desire to secure by Letters Patent, as a new article of manufacture, is, the manure manufactured by the within described process, the animal matters being first decomposed in the manner set forth, and subsequently disinfected be charred shale, or its equivalent, as described."

No. 22,545. GEORGE BUCHANAN, of Hickory, Pa., for an "Improved school desk and chair combined."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, a seat C, pivoted near its front edge to a stationary frame, and hinged near its rear edge to a movable back, and having its arms pivoted by their rear ends to the movable back, and hinged to the stationary frame, substantially as and for the purposes set forth."

No. 22,546. J. D. C. CARPENTER, of Cincinnati, O., for an "Improved device for setting laterally circular saws."

"My invention consists in the use of two cranks or a rock shaft, acting as an eccentric for moving or setting the saw shaft and saw laterally. Claim.—Having thus fully described my invention, what I claim and desire to secure by Letters Patent of the United States, is, the rock shaft F, connected with arms *e*, and acting as an eccentric, or as two cranks for adjusting the saw shaft laterally, substantially as set forth."

No. 22,547. JOHN B. CORNELL, of New York, N.Y., for an "Improved burglar proof safe."

"Claim.—Having thus fully described my improvement in burglar proof safes, what I claim therein as my invention, and desire to secure by Letters Patent, is, combining a cast-iron door frame with the wrought-iron portions of the frame of a safe, in such a manner that the molten iron, which is afterwards, whilst in a melted state, combined with the said safe frame, will form a burglar-proof protecting casing around the said door frame, substantially as herein set forth."

No. 22,548. ELIJAH H. DANFORTH, of Jamestown, N.Y., for an "Improved lathe attachment for finishing dental plates."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the mechanical devices herein specified, consisting of the piston *c, c*, bed pieces *a, a*, boxes *b, b*, slides *e, e*, and *j*, and the crank, constructed and operated for dental and other purposes as herein described, and I also claim the adjustable crank, as it is arranged and attached to the specified parts of this machine, as herein set forth."

No. 22,549. THOS. DANIELS, of Toledo, Ohio, for an "Improved soda-water apparatus."

"Claims.—Having thus fully described my invention, what I claim and desire to secure by Letters Patent of the United States, is,—1st, the arrangement of the whole apparatus, the sirup cans being elevated above the refrigerator, to which is provided with the group stop cock, substantially as set forth for the purposes described. 2d, the arrangement of the tubes *d* and G, for conducting the sirups and the water to the top of the ice chamber, without cooling them, and concentrating the cooler portions of these liquids below the ice, near the place of discharge, substantially as described."

No. 22,550. A. L. DENNISON, of Waltham, Mass., for an "Improved method of securing the cylindrical balance springs of watches."

"My invention consists in a peculiar construction of top plate, and in connection therewith in placing the cylindrical spring beneath the balance, and between it and the fork. Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, placing the cylindrical spring *h* beneath the balance, and between it and the fork, and cutting away the upper plate to furnish room for its accommodation, as set forth."

No. 22,551. Eugene Duchamp, of St. Martinsville, La., for an "Improved Lewis for attaching tackles to blocks of stone."

"Claim.—Having thus described my invention, I claim, and desire to secure by Letters Patent, as an improved article of manufacture, a 'Lewis,' composed of a shell A, air pump D, nozzle or tube B, packing E, staple G, and otherwise made as shown and herein described."

No. 22,552. Saml. Falwell, of Memphis, Tenn., for an "Improvement in endless conveyors for removing earth."

"Claim.—I do not claim an endless chain or series of buckets or boxes for carrying or conveying purposes; but what I claim as my improvement, is,—first, the series of sectional cars *e*, *e*, in an endless connection, each car being provided with terminal or track wheels *h*, and intermediate wheels *g*, *g*, of varying and lesser diameter than the track wheels, and shoulder stops *k*, *k*, or equivalents thereof, substantially as herein above set forth. Second, I claim the combination of such cars with an upper and lower track, and wheels *c*, *c*, as set forth."

No. 22,553. Moses G. Farmer, of Salem, Mass., for an "Improved electro-magnetic fire alarm apparatus."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the circuit wheel *a*, and the crank or handle by which it is actuated, in combination with the key H and the electro-magnetic circuit, operating in the manner substantially as set forth, to send a definite signal from a sub-district to the central station. 2nd, I claim the method of completing the circuit when the door of the signal box is closed, through the springs M and N, as set forth for the purpose described."

No. 22,554. John S. Gray, of New York, N. Y., for an "Improved door spring."

"Claim.—Having thus fully described my improvement, what I claim, and desire to secure by Letters Patent, is, the combination of the socket *a*, *b*, bolt *c*, and hold-fast *f*, with the torsion spring, constructed and arranged substantially in the manner and for the purposes set forth."

No. 22,555. I. R. Haldeman and I. S. Haldeman, of Bloomington, Ill., for an "Improved washing machine."

"Claims.—Having thus described our invention, what we claim as new, and desire to secure by Letters Patent, is,—first, the arrangement of the springs F, and supporting beams E, in connection with the sliding frame G, that carries the lower series of fluted rolls H, for the purposes set forth. Secondly, the clasp Q, as constructed and operated, for the purposes set forth. Thirdly, the sliding standard R, or its equivalent, in combination with the rack bar Y and pawl X, the whole being arranged and operated in the manner and for the purposes substantially as set forth."

No. 22,556. Eden S. Howell, of Hope, N. J., for an "Improved washing machine."

"Claim.—Having fully described the construction and operation of my improved washing machine, and not wishing to limit my invention to the exact detail of mechanical construction illustrated, what I claim therein as new, and desire to secure by Letters Patent, is,—1stly, the combination of the 'live rubber' *k*, with the horizontal sliding and rotating shaft G, vibrating pressing lever H, and ratchet *g*, or its equivalent, the whole arranged and operating substantially as herein-before described, for the purposes set forth. 2ndly, in combination with the rocking and pressing rubber K, the perforated rubber partition E, substantially as described. 3rdly, the detachable lever *m*, and bar O, substantially described, for the purpose set forth."

No. 22,557. Thos. J. Hubbard, of Hamilton, N. Y., for an "Improvement in flail caps."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the construction of flail caps of casting metals in separate parts or sections with the lip or crescent tongue formed upon the interior thereon, as above described."

No. 22,558. Edwd. Hunt and Henry Davis Pochin, of Talford, England, for an "Improvement in preparation of resins."—Patented in England, 27th April, 1858.

"Our invention or discovery consists in certain new articles of commerce produced from resin and resinous substances, and purified and partially deprived of their color by an improved process. Claim.—Having thus described the nature of our invention, and the best means with which we are acquainted of performing the same, we would have it understood that we are aware that stills and steam worms, capable of distributing small jets of steam, have been before used in a somewhat similar way for the treatment of oils and fatty matters, and for improving the quality of resin oil obtained from substances similar to those used by us in the processes herein-before described; but such a process has never, so far as we can ascertain, been applied to any such substances as are proposed to be operated upon by our processes, for the purposes of obtaining the resinous and solid products above specified as the result of our said processes; we therefore claim as our invention or discovery, and desire to have secured to us by Letters Patent, the new articles of commerce herein-above specified, as produced by the processes herein-above mentioned, or by any similar mode or process, said articles or products not having been hitherto known in commerce or used in the arts."

No. 22,559. R. V. Jones, of Johnstown, Pa., for an "Improved sausage stuffer."

"Claim.—I am aware that screws have been used in presses of various kinds; I therefore do not claim the screw in pressing or stuffing sausages; but what I do claim, and desire to secure by Letters Patent, is, the piston rod and supporting recess, constructed as described, in combination with the pronged nut and screw, for the purpose specified."

No. 22,560. Henry W. Joslin, of Trenton, N. J., for an "Improvement in treatment of india-rubber."

"Claim.—Having thus clearly described my improved process for curing or vulcanizing india rubber, I will state what I claim, and desire to secure by Letters Patent:—I claim the use and employment of sulphuret of zinc, either artificial or native, substantially prepared by the aforesaid process above described in combination with india-rubber, for the purpose of curving or vulcanizing it in form and manner as herein set forth, without the use of free sulphur in any way, in combination with the rubber."

No. 22,561. John L. Knowlton, of Glassborough, N. J., for an "Improvement in stump extractors."

"Claim.—I claim, and desire to secure by Letters Patent, the lever C with its catches G and G^1, in combination with the hauling chain H and springs M and M^1, or their equivalents, when the said chain is guided so as to prevent it from twisting or from moving laterally or vertically, as herein set forth."

No. 22,562. Olivier Lafreniere, of New York, N. Y., for an "Improvement in horse collars."

"Claim.—Having thus described my invention, I claim, and desire to secure by Letters Patent, as an improved article of manufacture, a horse collar, having its lower part provided with a metallic tube C, to give form to and hold the packing, and otherwise made as herein set forth."

No. 22,563. Henry Lester, of Cincinnati, O., for an "Improvement in roofing compositions."

"Claim.—I do not wish to be understood as claiming the manner of applying my composition, or of any of the within-named ingredients when taken separately; but what I do claim as new and of my own invention, and desire to secure by Letters Patent, is, a composition for roofing and similar purposes, produced from the mixture of the ingredients herein described, in the proportions and for the purposes set forth."

No. 22,564. John Marvin, of Bellport, N. Y., for an "Improved taper gauge for carpenters."

"Claims.—Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the employment or use of a conical roller C applied to a block or stock B of the gauge, and connected with a rack *a* of the pencil bar A, in the manner shown, or in any equivalent way, so that the roller will be rotated as the gauge is shoved along, and the bar A moved longitudinally by the rotation of the roller, so as to produce the desired result. I further claim, in combination with the conical roller C, the adjustable band *c* and fence *e*, applied to the block or stock B, for the purpose of regulating the degree of taper of the line *h*, substantially as described."

No. 22,565. Edwd. Maynard, of Washington, D. C., for an "Improvement in metallic cartridge cases."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, as a new manufacture, is, an

improved metallic cartridge, composed of a brass cup, combined with an exterior steel disk, substantially as herein set forth."

No. 22,566. Chas. McBurney, of Roxbury, Mass., for an "Improvement in india-rubber hose pipes."

"Claim. What I claim as my invention, and desire to secure by Letters Patent, as a new article of manufacture, is, a semi-elastic composition pipe, compounded of the ingredients, and in the proportions substantially herein specified, when vulcanized as set forth."

No. 22,567. Alexr. R. McCans, of Ashley, Missouri, for an "Improved machine for sawing shingles from the bolt."

"My invention consists, first, in the combination of devices for swinging the saw past the bolt, so as to saw off the shingles, and for returning it again for the next succeeding similar operation; and secondly, in the combination of devices for setting the bolt, to give the proper taper to the shingles which are cut 'but and point' therefrom. Claim.—Having thus fully described the nature, object, and operation of my machine, what I claim therein as new, and desire to secure by Letters Patent, is, in combination with a saw hung in a swinging arm, the spur *h*, rack *i*, and sliding bar E, for drawing said saw through the bolt, to sever the shingle therefrom, and to trip and allow the saw to fall back for the next similar operation, substantially as described. I also claim, in combination with a pivoted table for holding the bolt, the shifting bars R, R, arranged and operating substantially as herein described, for bringing the bolt up to the saw in such manner as to alternately reverse the ends of said bolt from which the buts and points of the shingles are cut, as set forth."

No. 22,568. Thos. E. McNeill, of Philadelphia, Pa., for an "Improvement in railroad car seats."

"Claims.—What I claim as my invention, and desire to secure by Letters Patent, is, 1st, jointing the ends of the arm rests I to the ends of the upright standards L, at the corners of the seats, and providing their opposite ends with sliding bolts or bars M, and right angled plates P, and half pivots or pins I^1, for enabling their ready attachment, when in a horizontal position, by the bars H, and their upright elevation to form a support for the hinged portions G^1 of the backs G, when the seats are swung round upon the crank bars B, substantially in the manner and for the purpose before described. 2nd, I claim the combination of the hinged board T, with the projecting ledges T^1 on its surface, with the box-like frame A^2, forming the rest for the bottom A^1, of the seat next the end of the car, in which it can be enclosed, as before described. 3rd, in combination with the swinging seats, I claim the box-like frames N, and the platforms U, V, attached to the same by the cranks U^1, and jointed bars W, arranged and operating in the manner and for the purpose herein set forth."

No. 22,569. Geo. Morgan, of Brooklyn, N. Y., for an "Improvement in stone-cutting machines."

"Claim.—Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement of cutters I of gradually increasing length in such relation to hammers G, and to a sliding carriage T, that, by the action of the hammers on the cutters, an incision is made through the whole length of a block of stone which is placed on the carriage, substantially as and for the purpose specified."

No. 22,570. Antoine Niel, of Brooklyn, N. Y., for an "Improvement in apparatus for incressing draught of chimneys."

"Claim.—Having thus fully and clearly described the construction and operation of my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement of the exterior tube, having the expanded conical and cylindrical portions constituting the chamber of compression, and the contracted annular space between the two tubes above the conical part of the tube (*c*), with the inner tube, the two tubes bearing the relation to each other as herein set forth, and forming an apparatus for improving the draught of chimneys, as herein described."

No. 22,571. Antoine Niel, of Brooklyn, N. Y., for an "Improvement in bridle bits."

"Claim.—Having thus fully set out my invention, what I claim as new, and desire to secure by Letters Patent, is, 1, the combination of the grip or bars constructed substantially as described, with the bars of the bit of the horse. 2d, attaching the griper bars by their double-eyed ends, and by the screw nuts to the bars (*g*) and (*a*), as here set forth."

No. 22,572. Theodore Noel, of Memphis, Tenn., for "Improved spectacle frames."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the employment of springs *b*, *b*, applied to the frame, substantially as and for the purposes herein specified."

No. 22,573. James O'Hara, of Pittsburgh, Pa., for an "Improvement in retorts for distilling oils from coal."

"Claim.—I do not claim, generally, the use of a stirring apparatus within a retort, as I am aware that such apparatus has been used in retorts for some distilling processes; but what I claim as my invention, and desire to secure by Letters Patent, is, the employment, in an upright retort for distilling coal, of a revolving screw, of a circumference smaller than the interior of the retort, so applied, that while by its revolution, it produces a continuous elevation of the central portion of the charge, it permits and causes a continuous descent of the surrounding portion by gravitation, and thus produces a positive continuous and uninterrupted upward and downward circulation, substantially as and for the purpose herein set forth."

No. 22,574. Albert Ostrander, of New York, N.Y., for an "Improvement in gas burners."

"Claim.—Having now described my invention, and its mode of manufacture, I will proceed to set forth what I claim, and desire to secure by Letters Patent of the United States, I am aware that similar compositions of materials have been known and used previous to my use of them, and therefore, irrespective of the application of the composition of felspar, quartz, and asbestos, in the manufacture of my gas burner, I make no claim to it; but what I do claim is, in the manufacture of gas burners made of the composition of felspar, quartz, and asbestos, having the peculiar formation of the vents herein-before set forth."

No. 22,575. B. Frank Palmer, of Philadelphia, Pa., for an "Improvement in artificial forearms."

"The nature of my invention consists in the modifications of my improved arm and hand, for the purpose of adapting them to the amputation below the elbow. Claims.—Having thus fully described my invention, what I claim, and desire to secure by Letters Patent, is, 1st, closing the hand by means of a strap operated by an attachment to the shoulder of the opposite arm, substantially in the manner described. 2d. The clamp H, constructed and operating as described and applied to the purpose specified."

No. 22,576. B. Frank Palmer, of Philadelphia, Pa., for an "Improvement in artificial arm and hand."

"Claims.—Having thus fully described my invention, what I claim therein as new, and desire to secure by Letters Patent, is as follows:—1st, giving a sinuous course to the flexor tendons of the fingers, by means of the sheaves, for the purpose described. 2d, opening the fingers by means of extensor tendons, antagonizing the flexors by means of springs, substantially as described. 3rd, the wrist joint, constructed as described, of a ball and socket, held in contact by cords Z, Z, arranged and operating substantially as specified. 4, giving a soft and elastic covering to the shaft V, and the wrist C, for the purpose of imitating the changes of form which take place in the natural arm, during the movements of the radius, and the play of the pronator and supinator muscles, substantially as described. 5, the mode herein-described of attaching the arm to the body."

No. 22,577. Edwin R. Pease and Richd. R. Hayman, of Poughkeepsie, N. Y., for an "Improvement in peg cutters."

"Claim.—We claim as a new article of manufacture, the above-described machine for cutting off or removing pegs and nails from the insides of boots and shoes, substantially as described."

No. 22,578. Edmond Pesier, of Valenciennes, France, for an "Improvement in the manufacture of sugar."—Patented in France, 29th March, 1858.

"This invention consists in the application to the manufacture of sugar of alcohol, and agents capable of effecting, when mixed with this liquid, the elimination of mineral or organic matters incorporated with the sugar in the juice of saccharíferous plants. Claim—Having thus described the nature of my invention, so as to enable others skilled in the art to carry out the same I observe, in conclusion that I

do not claim the use of alcohol in the purification of crude sugar. But what I do claim and wish to be protected by Letters Patent of the United States is, treatment of the saccharine juices of plants, in the manner described, by the use of alcohol, in combination with other special agents."

No. 22,579. Warren B. Potter, of Boston, Mass., for an "Improvement in nursery bottles."

"Claim.—Having thus fully described the nature of my invention, what I claim is, a nursing bottle of glass, having a metallic cap screwed upon it, and a metallic lacteal tube, when said cap is provided with a flange for the reception of the elastic nipple, and the whole is made and put together, substantially as herein set forth."

No. 22,580. Alfred Proseus, of Philadelphia, Pa., for an "Improvement in grinding mills."

"Claim.—I claim, and desire to secure by Letters Patent, placing across the recesses formed by the teeth of the shells, or of those of the burrs, or of both, of conical grinding mills, any convenient number of obstructing strips, as and for the purpose herein set forth."

No. 22,581. Augustus Prenatt, of Buffalo, N. Y., for an "Improved machine for dressing hoops."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, placing the cutters (*c*) in the cutter head (B), in such position that the plane of their cutting edge will cross their axis of motion at an angle of forty-five degrees (or nearly so), and also stand inclined to the horizontal plane of their axis, at an angle of forty-five degrees (or nearly so), substantially as set forth. 2d, I claim the arrangement of the cutter (*g*) in the vertically moving gate (F) (including the adjustable roller H), for the purpose of dressing the edge of the hoop, and for giving the hoop any required width, as herein described."

No. 22,582. Geo. M. Prentiss, of Worcester, Mass., for an "Inkstand."

"Claim.—Having described my invention, I claim, and desire to secure by Letters Patent, as an improved article of manufacture, an inkstand having a plunger E, constructed and fitted as hercin shown and described."

No. 22,583. Isaac Reamer, of Conrad's Store, Va., for an "Improvement in corn harvesters."

"Claims.—What I claim as my invention, and desire to secure by Letters Patent, is, 1st, the combination of the elastic lower guide *a* with the adjustable upper rigid guide *e*, when these parts are arranged for joint operation in the manner described for the purpose specified. 2nd, the arrangement and combination of guide *h* and swinging clearer G, for removing the corn from the platform, in the manner described."

No. 22,584. Albert C. Richard, of Newtown, Conn., for an "Improvement in detaching paper from vulcanized gum."

"I do not claim as new the mechanism described, nor do I wish to be understood as limiting myself to the use of such mechanism exclusively, as the same may be varied without altering the nature of my invention. What I claim as my invention, and desire to secure by Letters Patent, is, subjecting the surface or surfaces of vulcanized india rubber, gutta percha, or other elastic gum, sheets, valves, belts, or other objects which have been so vulcanized or cured between or on paper, and to which the paper adheres, to a mechanical process of regular bending and continual elongation, substantially as described, having the continuous effect of drawing or detaching the filaments or atoms of the elastic gum which adhere to or which have entered into the pores of the paper, gradually and regularly therefrom and thereout simultaneously across the whole width of the surface operated upon, in the manner as herein set forth, or in any other manner, producing substantially the same result."

No. 22,585. Wm. Ripley, of Edgartown, Mass., for an "Improved framing square."

"I do not claim the mere repetition of the bevel or miter slots and square arms, as applied to the rule A, provided with a lip B; but what I do claim is, the improved manufacture of framing square, as made with its bearing ledge, its squaring arms, mitre slots, and mortising slots, arranged together and with respect to a base rule A, substantially as set forth.

No. 22,586. Stephen Scotton, of Richmond, Ind., for an "Improvement in machinery for oiling the journals of locomotives."

"Claims.—What I claim as my invention, and desire to secure by Letters Patent, is, 1st, the combination of the weighted shaft B, the spiral spring F, and the box C, with the journal of a locomotive carriage, substantially as herein set forth. 2d, I claim the metal cup H, in combination with the box C, and upright shaft B, or their equivalents, for the purposes herein specified. 3rd, I claim the nut J, when combined with the upright shaft B and cup H, or their equivalents, in the manner and for the purposes herein specified."

No. 22,587. Lewis Solomon, of New York, N.Y., for an "Improvement in treating auriferous and argentiferous pyrites."

"My invention consists in a new and improved process of extracting the precious metals from their ores, by which a much greater per centage is obtained than heretofore. Claim.—I do not intend to confine myself to the specific times and proportions mentioned in the foregoing specification, these being merely incidental to and not of the essence of the invention; but what I claim as new, and desire to secure by Letters Patent, is,—First, extracting gold and silver from auriferous and argentiferous pyrites, in the manner substantially as herein set forth. Secondly, the application of wood ashes to the roasted ore during the process of grinding, and of soda ash, for the purposes specified."

No. 22,588. Otis W. Stanford, of Cincinnati, Ohio, for an "Improvement in grinding surfaces for mills."

"Claim.—I claim the employment of a system of circular grinding teeth, when arranged in the manner and for the purposes above set forth. I also claim arranging around the outer surface of the disk intercepting V-shaped teeth, to operate in the manner and for the purposes herein specified."

No. 22,589. Casper V. Statter and Geo. W. Wilson, of Walnut Grove, Ill., for an "Improvement in foot trip-hammers."

"Claim.—Having thus described our invention, what we claim as new, and desire to secure by Letters Patent, is, arranging a hammer B, in such relation to an anvil I, by means of levers E and F, and links D, D, that the same can be operated by means of a hand lever L, or by foot levers J, J, substantially as herein described. And we also claim the arrangement of the hand lever L, in such relation to the foot levers J, and to the chisel O, that both the hammer B, and the chisel O, may be operated by the motion of the hand lever, in the manner and for the purpose substantially as specified. And in combination with the above-described hammer, we further claim connected the handle N of the chisel with the arm M, by means of an adjustable rod *g*, so that the cutting edge of the chisel may be accommodated to different thicknesses of iron, substantially as herein set forth."

No. 22,590. Richd. A. Stewart, of St. Bernard Parish, La., for an "Improvement in defecating and clarifying cane juice."

"My invention or improvement consists in passing or disseminating, in any convenient manner, throughout the saccharine matter, sulphurous acid or gas, produced by a slow combustion, in a nearly retort of sulphur or common roll brimstone. Claim.—Having fully made known the nature of my improvement, and the manner in which I have reduced the same to practice, I do not claim broadly the use of sulphurous gas or sulphurous acid gas, in the manufacture of sugar; but what I claim as new, in the defecation and clarification of cane juice and other liquid or semi-liquid forms of saccharine matter, is disseminating throughout the same sulphurous gas or sulphurous acid gas, for the purposes herein set forth."

No. 22,591. H. K. Symmes, of Newton, Mass., for an "Improvement in gas retorts."

"I do not lay claim to any particular form of retort, neither do I claim the passage C, for the conduct of the gas from the rear of the retort to its mouth, nor for any other purpose. Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, dispensing with the mouthpiece of the ordinary horizontal gas generating retort and dividing the mouth of the retort into two portions, one of which is brought into permanent connection with the stand pipe, the other being employed for the purpose of charging the retort, as set forth."

No. 22,592. Joel H. Tatum, of New York, N. Y., for an "Improvement in manufacture of candles."

"Claim.—Having thus described my invention, what I claim, and desire to secure by Letters Patent, as an improved article of manufacture, is, a candle, having its stock com-

posed of tallow, stearic acid, and gum camphor, with or without bees'-wax, in about the proportions herein specified, and the exterior of the candle covered with a compound, composed of stearic acid, gum camphor, and gum damar, or equivalent flux, in about the proportions herein set forth."

No. 22,593. Benjn. C. Tilghman, of Philadelphia, Pa., for an "Improvement in hardening fatty substances." — Patented in England, 2nd May, 1857.

"I do not claim generally the process of hardening fatty substances by sulphuric acid, as I am aware that this has been before proposed; but in such cases, the heat employed has been under or about 212° Far. Now, I have found that the hardening effect of sulphurous acid is very greatly increased, by causing it to act upon the fatty substances at more elevated temperatures, preferring from about 350° to 550° Far.; but which may be varied from a little above 212° Far. to above the distilling point of the fatty substance, and it is to this modification of the process, that this part of my claim extends and is confined. I am also aware, that it has been before proposed to decompose fatty substances and soaps into fat acids, and to purify fatty substances from mucilage, gelatine, &c., by means of sulphurous acid, and also to subject fatty substances to the action of strong sulphuric acid, whereby sulphurous acid is generated in the fat itself, and I wish it to be understood, that I make no claim to any of the above processes. I claim the hardening of acid and neutral fatty substances, by subjecting them to the action of sulphurous acid at elevated temperatures, either with or without pressure as above described. I also claim the use of oxide of copper, or its chemical substitutes, to remove from fat acids, the sulphuretted impurity produced therein by treatment with sulphurous acid as above described. I also claim the methods of preserving the color of white neutral fats, when treated by sulphurous acid at elevated temperatures, by using the sulphurous acid entirely free from air or oxygen, and by using fats pure and neutral, and free from any mixture of acid, rancid or decomposed fats."

No. 22,594. Jeremiah C. Tilton, of Sanbornton Bridge, N. H., for an "Improvement in temples for looms."

"I do not claim the mere application of teeth to a spring to be forced away from the temple lip or cloth bearer, by the action of a wedge or its equivalent at the time of beating up of the loom, as such is found in the well-known Stellman temple; nor do I claim the application of a stationary spur plate to a temple, with the pins in the said plate inclined at an angle to the breast beam and in the direction in which the lay beats up, the same being shown in the United States Patent, numbered nine thousand nine hundred, and for the purpose therein mentioned; but what I do claim, is, the application of the cloth bearer carrier to its support, by a hinge arranged in manner substantially as described, that is so as to allow the carrier and its bearer to be drawn backward under circumstances as described."

No. 22,595. Artemas B. Vant, and Arlon M. Cook, of Milford, Mass., for an "Improvement in corn shellers."

"We do not claim a convex wheel as such, as a somewhat similar one has been used, but operating in a different way from ours; but what we claim as new, and desire to secure by Letters Patent, is, we claim the combination and arrangement of the smooth revolving pressure plate or wheel H, with the convex toothed wheel E, and guard plates *i* and *j*, when constructed and operating substantially in the manner and for the purposes above set forth and described."

No. 22,596. James Wansbrough, of Southwark, county of Surrey, England, for an "Improvement in hydrofuze fabrics."—Patented in England, 13th December, 1853.

"Having now described the nature of my said invention, and in what manner the same is to be, and may be performed, I would remark, in conclusion, that I do not claim the exclusive use of any of the materials, matters, or substances, above-mentioned and referred to; neither do I claim the coating or covering of a woven fabric with a flock material, as the same has already been done for many years though without the desired result in point of durability and utility; but, what I claim, and desire to secure by Letters Patent, is, securing the flocks or other finely divided substance after it has been sifted or spread on to the surface, and callendered by applying to the surface thereof a solution of india rubber or allied gum, substantially as described. And I also claim, in combination with the method of securing the flock, substantially as described, the subjecting of the same to a steaming process, substantially as and for the purpose specified."

No. 22,597. Ross Winans, of Baltimore, Md., for an "Improvement in locomotive engines."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the blast equalizing pipe, proportioned to the chimney, and arranged substantially as herein set forth. I likewise claim a blast pipe of less diameter than the smoke pipe, and having a bell mouth, in combination with an exhaust nozzle and the bottom on which the sparks lie, substantially as herein set forth."

No. 22,598. Geo. Windle, of Edenburgh, Va., for an "Improved surveying instrument."

"Claims.—What I claim as my invention, and desire to secure by Letters Patent, is, 1st, attaching the adjusting weight of the magnet case directly to the universal joint on which said case turns and swings, substantially as and for the purposes set forth. 2d, the arrangement of the pointer which designates the number of degrees at which the movable frame and telescope stand adjusted on an adjusting screw, which has the surface of its head graduated so as to indicate minutes, in combination with a stationary pointer, and with an extension formed on the pointer which comes opposite the degrees on the magnet case, substantially as and for the purposes set forth."

No. 22,599. John E. Wootten, of Philadelphia, Pa., for an "Improvement in steam valves."

"Claim.—Having thus fully described the construction and operation of my improved mode of balancing the pressure upon slide valves; what I claim, and desire to secure by Letters Patent, is, the application of the anti-friction roller L, in combination with a diaphragmatic piston D, or an equivalent therefor, substantially as and for the purpose herein set forth."

No. 22,600. Wm. E. Worthen and John J. Althause, of New York, N. Y., for an "Improved mode of constructing slats for blinds."

"Claim.—What we claim as our invention, and desire to secure by Letters Patent, is, a sheet metal blind slat or luffer board, made up of the combination of a slit tube, with two thicknesses of sheet metal; the whole being substantially such as herein before specified."

No. 22,601. Wm. S. Worthington, of Newtown, N. Y., for an "Improvement in apparatus for evaporating.

"I do not claim broadly any arrangement of fires and flues for heating the sides without heating the bottoms of evaporating pans; but what I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of a series of two or more grated fire places *a*, *b*, *c*, and communicating passages *f*, *g*, and flues *h*, *h*, in a casing C, on each or either side of a pan or train of pans, substantially as and for the purpose herein set forth."

No. 22,602. Moses G. Farmer, of Salem, Mass., assignor to Wm. F. Channing, of Boston, Mass., for an "Improved electro-magnetic apparatus for setting water engines in motion."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the combination of an electro-magnetic escapement with the cock or water valve *k*[1], and with the detent Q, of a water engine, separately or conjointly, for the purpose of controlling its motion from a distance, especially in its application to a fire alarm telegraph. 2d, I claim the employment of two or more arms of progressively increasing weight, in combination with a water engine and with an electro-magnet, or its equivalent, for the purpose of releasing machinery as set forth, the first of the weighted arms being liberated by the electro-magnet, while the last one of the series releases the machinery, each of the weighted arms being returned to its normal position by the action of the water engine."

No. 22,603. Joseph R. Gates, of Indianapolis, Ind., assignor to himself and Alexr. Corey, of Shelbyville, Ind., for an "Improvement in automatic grain scales."

"Claim.—What I claim, and desire to secure by Letters Patent, is,—1st, the lever *h* and spring *q*, when used for the treble purpose of operating the cut-off gate *r*, discharging or loosening the bottom valve *l*, and preventing the weights *e* and *f* from raising the scale box C, and drawing the slide *r* until the bottom *l* is closed, thereby regulating the cut-off and flow of grain without using the weight of the grain while the same is being weighted. 2nd, the combination and arrangement of the spring and weight *m* with the elbow con-

necting rod *j* and lever *i*, when constructed and operated substantially as and for the purposes described."

No. 22,604. Geo. Kenny, of Milford, N. H., assignor to himself and Josephus Baldwin, of Nashua, N.H., for an "Improved mode of attaching thills to axles."

"I do not claim encompassing the bolts D in elastic tubes, irrespective of the particular arrangement herein shown and described; but having thus described my invention, what I claim as new, and of my invention, and desire to secure by Letters Patent, is, the combination of the pressing and locking india-rubber tube E with the eyes *a*, *a*, *b*, and bolt D, with its nut *e*, substantially in the manner and for the purposes above described."

No. 25,605. James Lyon, of New York, N.Y., assignor to Jesse J. Davis, of said New York, for an "Improvement in machines for sawing marble."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the reciprocating bar *d*, adjustable rollers *f*, *f*, adjustable frames *g*, *g*, and diagonally slotted slides *h*, *h*, in relation to each other and to parts that connect with and guide the saws, for the purposes and substantially as specified."

No. 22,606. Thos. J. Mayall, of Roxbury, Mass., assignor to himself and Geo. N. Davis, of Boston, Mass., for an "Improvement in manufacture of emery wheels and sticks."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the employment of hard vulcanized rubber tempered with olive oil, as set forth, in combination with powdered emery, or its equivalent, for the manufacture of polishing wheels and sticks, as specified."

No. 22,607. Thos. J. Mayall, of Roxbury, Mass., assignor to himself and Benjn. F. Cooke, of Boston, Mass., for an "Improvement in elastic draw bar and bumper."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the above described combined draw bar and bumper, consisting of the elastic cylinder E, the heads A, A^2, bars B, springs *d*, and bolt K, constructed and operating in the manner substantially as herein set forth."

No. 22,608. Thos. Windell, of New Albany, Ind., assignor to J. B. Ford, James W. Shield, and H. L. Bridwell, of said New Albany, for an "Improvement in mowing machines."

"The nature of my invention consists in the arrangement of the spring, as described, at the outer guard, and also in the employment and arrangement of the box which connects the gearing of the machine. Claims.—Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is,—1st, the employment, in connection with a single frame piece A^1 of the box D^1, which is cast in the manner herein specified, with axle P, journal bearings *t* and *u*, and flanges *s*, s^1, in one piece, for the purpose of connecting and securing all the gearing necessary for the operation of the machine, as herein fully set forth. 2nd, the spring *c*, secured at one end to the front of the outer guard, and playing freely in the opening in the rear of said guard, in combination with the adjusting screw *o*, whereby the convexity of the spring shoe is increased and diminished with the elevation or depression of the cutter, in the manner and for the purpose described."

No. 22,609. Wm. Wright, of New York, N. Y., assignor to himself and Frederick Wright, of said New York, for an "Improvement in gas burners."

"I do not claim the reduction of excessive pressure in gas burners by so constructing the burners as to cause the gas to be intercepted and divided into small streams, and to pass in a circuitous direction, as I am aware that there are many gas burners so constructed; but I claim, and desire to secure by Letters Patent as an improved article of manufacture, a gas burner provided with a double-flanged cup C, having openings (*d*, *d*, *e*, *e*,) and otherwise constructed, substantially as herein shown and described."

No. 22,610. Ernest Otto Pohl, of Philadelphia, Pa., for an "Improved method of enabling moving railroad trains to telegraph their own passings at certain stations."

"Claim.—I confine my claim to the particular apparatus described in this specification and illustrated in the accompanying drawings, and what I claim as my invention, and desire to secure by Letters Patent, is, the use of a self-acting electro-magnetic railway alarm telegraph, acting reliably of itself, without the necessity of human intervention, and arranged and operating in the manner and for the purposes substantially as above described."

No. 22,611. F. O. Degener, of New York, N. Y., for an "Improvement in printing presses."—Antedated 11th July, 1858.

"Claim.—So arranging or hanging an oscillating bed with an oscillating platen in such manner that the motion of one will control the action of the other, so that by their forward movement they shall close and give an impression, and upon their reverse movement the form shall be inked and the platen be brought into the proper position necessary for the reception of the sheet, and thus alternate from one of their positions to the other. 2d, I claim the arrangement of an oscillating bed and platen as described with the cam to cause the frisket to assume the desired position, so as to hold the sheet of paper while it is being conveyed from one position to the other, all of which is hercin described."

Re-issues.

Lucius J. Knowles, of Warren, Mass., for an "Improvement in safety indicator for steam boilers."—Patented 10th February, 1857.—Re-issued 11th January, 1859.

"Claims.—A feed apparatus controlled by expansion and contraction, in combination with an expansion 'tell tale' placed below the desired water level and above the level to which it would not be safe for the water in the boiler to descend, substantially as set forth. Secondly, I claim the within-described arrangement of the vessels, and as applied and connected with the feed pumps and steam whistle for the purpose of regulating the pump and sounding an alarm as set forth. Thirdly, I claim connecting the pipe with the boiler by means of the feed pipe, as set forth, for the purpose described."

Edward F. Jones, of Boston, Mass., for an "Improvement in lamps."—Patented 4th May, 1858.—Re-issued 11th January, 1859.

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, securing the chimney to the removable deflector, and both of them to the lamp cap by means of a spring operating in the manner substantially as set forth. 2d, I claim a detached deflector in combination with a chimney, when the chimney is secured to the cap independently of the deflector as set forth."

Designs.

S. W. Gibbs, of Albany, N. Y., assignor to Evan Backus, of Stuyvesant, N. Y., for a "Design for parlor stoves."

"Claim.—What I claim as original, and desire to secure by Letters Patent, is, the combination of ornaments and ornamental configuration of the different plates of parlor Franklin stoves as described and set forth in the accompanying drawings."

Thaddeus Davis, of New York, N. Y., for a "Design for ink bottles."

"Claim.—What I claim as new, and desire to secure by Letters Patent, is, the general configuration of the parts to form a new and original design for an ink bottle."

Additional Improvement.

Albert Heth and Gaylon Hall, of Adams Centre, N. Y., for an "Improved cross-cut sawing machine."—Patented 24th August, 1858.—Additional improvement dated 11th January, 1859.

"Claims.—What we claim as new, and desire to secure by Letters Patent, is, attaching the bar or beam to the vertical bar by a pivot, and securing the bar or beam, and beam, in a proper relative position with each other, by means of the rod, loop, and nut, or their equivalents, so that the bar or beam may be more or less inclined according to the thickness of the log and the bar always retained in a vertical position. We further claim, in combination with the oscillating platform, lever, and saw-bar, the bar, provided with an adjustable weight, and arranged substantially as shown to operate as and for the purpose set forth."

List of Specifications, &c. published during the week ending 28th January, 1859.

No.	Price.	Subject-Matter.
1355	3*d.*	Manufacture of charcoal.
1384	3*d.*	Application of iron and other materials in the construction of churches, &c.
1392	5*d.*	Locomotion, &c.
1395	7*d.*	Preserving and colouring wood.
1402	11*d.*	Treatment of old or waste felted fabrics.
1404	4*d.*	Purification of alkaline lees.
1406	8*d.*	Manufacture of door plates, signboards, &c.
1407	6*d.*	Machinery for cutting or treating dye-woods, roots, &c.
1409	10*d.*	Collapsible framework for bedsteads, sofas, &c.
1410	3*d.*	Manufacture of steel.
1412	3*d.*	Manufacture of cheese.
1413	3*d.*	Apparatus for regulating the flow of fluids.
1414	1*s.*	Machinery for bleaching or cleansing textile fabrics or materials.
1415	5*d.*	Treatment of iron ores, &c.
1416	3*d.*	Manufacture of hats.
1417	1*s.* 6*d.*	Machinery for warping yarns or threads.
1418	10*d.*	Gas apparatus.
1419	7*d.*	Steam boilers and furnaces.
1420	9*d.*	Manufacture of horticultural buildings, &c.
1421	3*d.*	Dyeing and printing cotton, &c.
1422	6*d.*	Governors for steam engines, &c.
1423	3*d.*	Embroidering.
1424	6*d.*	Pistons and plungers.
1425	6*d.*	Manufacture of shaft couplings.
1426	1*s.* 1*d.*	Apparatus for stretching and drying woven fabrics.
1427	3*d.*	Fitting ships' water-closets.
1428	9*d.*	Machinery for the manufacture of friction matches.
1429	10*d.*	Machinery for the manufacture of bolts and rivets.
1430	3*d.*	Railway signals.
1431	6*d.*	Machine for sowing seed.
1432	3*d.*	Obtaining printing surfaces.
1433	6*d.*	Apparatus for curling and spinning horse-hair, &c.
1434	3*d.*	Mounting and fitting wheels and axles to carriages, &c.
1435	3*d.*	Fire arms and ordnance, &c.
1436	8*d.*	Furnaces for melting iron, steel, &c.
1437	3*d.*	Plating ships or batteries with iron or steel.
1438	10*d.*	Horse-hoes, &c.
1439	3*d.*	Manufacture of fuel from peat.
1440	5*d.*	Chain harrows.
1441	3*d.*	Treating malt.
1442	6*d.*	Finishing lace and other fabrics.
1443	3*d.*	Implements for cultivating land and depositing seed.
1444	3*d.*	Intercepting and treating sewage.
1445	3*d.*	Sash bars.
1446	3*d.*	Land roller.
1447	11*d.*	Machinery for the manufacture of healds for looms.
1448	7*d.*	Boxes or caddies for coffee, tea, &c.
1449	8*d.*	Electric telegraphs.
1450	1*s.* 4*d.*	Apparatus for boring wells.
1451	3*d.*	Withdrawing cartridge cases from breech-loading guns.
1453	6*d.*	Reaping machine.
1454	9*d.*	Machinery for spinning rope yarns, &c.
1455	3*d.*	Shirt collars.
1456	3*d.*	Manufacture of manure from fœcal and other matters.
1457	3*d.*	Cleansing tidal rivers.
1458	10*d.*	Manufacture of nails.
1459	8*d.*	Printing.
1461	3*d.*	Machinery for cleaning and preparing cotton, &c.
1462	3*d.*	Cooking utensil.
1466	3*d.*	Preparation of paper for copying letters, &c.
1467	3*d.*	Construction of sewage ways.
1471	3*d.*	Universal meridian.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

Free Patent Museum and Library, South Kensington.

Numbers of Visitors for the Week ending 29th January, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Jan. 24	Monday -	254	485	739—Fine.
„ 25	Tuesday -	188	411	599— „
„ 26	Wednesday	149	101	250— „
„ 27	Thursday -	122	—	122— „
„ 28	Friday -	96	—	96— „
„ 29	Saturday -	170	—	170— „
	Total -	979	997	1976

Total number of visitors since the period of free daily admission (12th May, 1858) to 29th January, 1859, —62,216.

This Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. Woodcroft.

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).
Macclesfield (*Useful Knowledge Society*).
Manchester (*Chetham Hospital*).
——— (*Camp Field*).
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*).
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Society of Arts (*John Street, Adelphi*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices.

Admiralty, Steam Department.
——— Surveyor of Navy.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Sheerness ditto.
——— Devonport ditto.
——— Portsmouth ditto.
——— Chatham ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec; Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville, } Paris.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin.
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, as translated or transcribed from Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.

Wurtemberg, No. 314.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*

The following are in the press:—

PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE, Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 531. FRIDAY, FEBRUARY 4, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2438. To MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for the invention of "An improved system of railway brakes."—A communication from Claude Arnoux, residing at Paris.

On his petition, recorded in the Office of the Commissioners on the 2nd day of November, 1858.

2740. To RICHARD LAMING, of Hayward's Heath, in the county of Sussex, for the invention of "Improvements in purifying gas, and in turning sulphuretted hydrogen carbonic acid and ammonia, or their compounds, to profitable account."

On his petition, recorded in the Office of the Commissioners on the 1st day of December, 1858.

2962. To FREDERICK WILLIAM TURNER, of Foxhole Colliery, Swansea, in the county of Glamorgan, Mechanical Engineer, for the invention of "Improvements in steam engines, condensers, and steam boilers, and in promoting combustion in the furnaces of the same."

On his petition, recorded in the Office of the Commissioners on the 27th day of December, 1858.

2968. To ABRAHAM LYONS, of the firm of Jacob Lyons and Sons, of Finsbury, in the county of Middlesex, for the invention of "Improvements in travelling bags."

On his petition, recorded in the Office of the Commissioners on the 28th day of December, 1858.

8. To JAMES WALKLAND, of Green Lane, Sheffield, in the county of York, Silver-Piercer, for the invention of "An apparatus for lighting cigars and tobacco."

18. And to ISAAC WOOD, of Charing Cross, for the invention of "Improvements in cutting and finishing corks, and in machinery used for such purposes."—A communication from abroad by Henry F. Cox and Alexander Millar, of New York.

On both their petitions, recorded in the Office of the Commissioners on the 1st day of January, 1859.

106. To WILLIAM BENNETTS, of Tuckingmill, in the county of Cornwall, Workman, for the invention of "Improvements in mechanism used for preventing accidents when raising or lowering skips, baskets, or apparatus, particularly applicable to mines."

117. And to WILLIAM WILSON, of Newcastle-on-Tyne, Hat Manufacturer, for the invention of "Improvements in machinery for felting bodies of hats and bonnets."—A communication from abroad by J. S. Taylor, of Danbury, Connecticut, United States of America.

On both their petitions, recorded in the Office of the Commissioners on the 13th day of January, 1859.

128. To JOSEPH ECCLES, of Blackburn, in the county of Lancaster, Cotton Manufacturer, for the invention of "Improvements in the manufacture of articles from clay earths for building purposes, as substitutes for such articles as are usually formed of stone and other materials."

130. To POLYNICE AUGUSTE VIETTE, of No. 25, Faubourg de Schaerbeck, near Brussels, a Major in the service of His Majesty the King of the Belgians, for the invention of "Certain inks applicable for engraving and lithographic purposes."

132. To ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, for the invention of "Improvements in the manufacture of cast steel."

134. And to ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, for the inven-

tion of "An improvement or improvements in the manufacture of cast steel."

On their several petitions, recorded in the Office of the Commissioners on the 15th day of January, 1859.

---

136. To THOMAS EDWARDS, of Liverpool, in the county of Lancaster, Gas Engineer, for the invention of "Improvements applicable to letter boxes and other like receptacles."

138. To EDWARD THOMAS HUGHES, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W. C., for the invention of "Improvements in machinery or apparatus for sowing seed."—A communication from Constant Beure and Edouard Barret, resident at Grand-Sancey, département du Doubs, in the empire of France.

140. To SAMUEL THOMAS COOPER, of Upper Clapton, in the county of Middlesex, Gentleman, for the invention of "Improvements in the use and application of artificial light."

142. To EDWARD BROOKS, of 43, Edward Street, Dorset Square, in the county of Middlesex, Locksmith, for the invention of "Improvements in locks."

144. And to GEORGE COLLIER and JOHN COLLIER, both of Halifax, in the county of York, for the invention of "Improvements in means or apparatus for washing and drying wool and other fibres, part of which improvements is also applicable for other purposes, where steam, hot water, or other fluids are required to be conveyed under pressure through moveable connections."

On their several petitions, recorded in the Office of the Commissioners on the 17th day of January, 1859.

---

146. To JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for the invention of "A new machine for putting-on, equalizing, and drying the colors on paper for hangings, bookbinding, boarding, and fancy paper of every description."—A communication from J. P. Faure, residing in Paris, in the empire of France.

147. To WILLIAM NEWMAN, of Aston, near Birmingham, in the county of Warwick, Brassfounder, for the invention of "New or improved furniture for window and other blinds."

148. To JOHN FOSTER, of Lancaster, in the county of Lancaster, Corn Merchant, for the invention of "Certain improvements in machinery or apparatus called 'spinning frames' and 'roving frames' employed for spinning and roving flax, tow, hemp, jute, and other fibrous substances."

149. To GEORGE HAMILTON, of Liverpool, in the county of Lancaster, Professor of Chemistry, Queen's College, Liverpool aforesaid, for the invention of "Improvements in treating rosin and resinous substances to obtain products therefrom, and in treating the products obtained from rosin and resinous substances."

150. To HENRY GALLON, JOSEPH HENRY BEAN, and SAMUEL LUMB, of Leeds, Machine Makers, for the invention of "Improvements in machinery for slotting, morticeing, tenoning, and cutting wood, iron, and other substances."

151. To CHARLES DICKSON ARCHIBALD, of Rusland Hall, in the county palatine of Lancaster, England, Engineer, at present being in the city of New York, United States of America, for the invention of "Generating force."—A communication from Henry Munro Paine, residing at Worcester, Mass.

152. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E. C., Patent Agent, for the invention of "An improved silk thread, and a new fabric made entirely or partially from the same."—A communication from C. Depoully, senior, residing at Paris.

153. To RICHARD GARRETT, junior, of Leiston Works, Saxmundham, in the county of Suffolk, and JAMES KERRIDGE, Foreman to Messrs. Garret and Sons, of Leiston Works aforesaid, for the invention of "An improved arrangement of combined thrashing and dressing machine."

154. To JOHN FAWCETT, of Kingston-upon-Hull, in the county of same town, Merchant, for the invention of "An improved preparation of food for cattle and horses."

155. To RICHARD BRADLEY and WILLIAM CRAVEN, of Westgate Common Foundry, Wakefield, in the county of York, Engineers, for the invention of "Improvements in machinery or apparatus for manufacturing bricks, tiles, and other similar articles."

156. To WILLIAM TROTTER, of South Acomb, in the county of Northumberland, Farmer, for the invention of "Improvements in reaping machines."

157. And to JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in air pistols and guns."—A communication from Jacques Louis Lemaire Daimè, residing at Paris, in the empire of France, Merchant.

On their several petitions, recorded in the Office of the Commissioners on the 18th day of January, 1859.

---

159. To WILLIAM AUGUSTUS FREDERICK POWELL, of Bristol, in the county of Somersetshire, Potter, for the invention of "Improvements in stopping or closing jars and bottles."

161. To THOMAS CLARKE, of Litchurch Lane, near Derby, in the county of Derby, and of Staveley, in the county of Derby, Moulder, for the invention of "Improvements in the manufacture of core barrels for piles or columns used either for railway piles or columns, or for water pipes or sewerage pipes."

162. To EDWARD THOMAS HUGHES, of the firm of Hughes and Son, Patent Agents, No. 123, Chancery Lane, London, W.C., for the invention of "Improvements in machinery or apparatus for measuring and sorting silk and other textile materials."—A communication from Jules Veyrin, Silk Merchant, residing at Lyons, in the empire of France.

163. To JAMES WHITEHEAD, of Halifax, in the county of York, Wire Manufacturer, for the invention of "Improvements in the means or machinery for the manufacture of purled wire."

164. To Ebenezer Stevens, of 5, Patriot Row, Cambridge Road, in the county of Middlesex, for the invention of "An improved cooking utensil."

165. To Thomas Andrew Evans, of 15, Queen's Road, Bayswater, and Walter James Handscombe Rodd, of 38, Arlington Square, Islington, Artist, for the invention of "A new method of advertising."

166. To William Poupard, of Blackfriars Road, in the county of Surrey, Engineer, for the invention of "An improved wheel-skid or shoe."

167. And to John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Certain improvements in the manufacture or production of lasts, boot-trees, and clogs, and in the machinery and apparatus employed in the production of such articles."—A communication from Jules Mathieu, residing at Paris, in the empire of France.

On their several petitions, recorded in the Office of the Commissioners on the 19th day of January, 1859.

---

170. To James Croft Reid, of Liverpool, in the county of Lancaster, Master Mariner, and William Milner, of the same place, Manufacturer, for the invention of "Certain improvements in the construction of ships and vessels."

171. To Harvey Hilliard and Thomas Chapman, Cutlery Manfacturers and Patentees of the "Furbator," of Glasgow, in the county of Lanark, North Britain, for the invention of "Improvements in table knives, and in table-knife sharpeners."

172. To Abraham Lindo, of Batignolles, in the French empire, Chemist, for the invention of "Improvements in manufacturing soap."

173. To William Woofe, of the city of Gloucester, Agriculturalist, for the invention of "Improvements in implements for ploughing, tilling and paring land."

174. To Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W. C., for the invention of "Improvements for preventing incrustation in steam boilers or other vessels."—A communication from Herr Von Langen Royal, Architect, residing at Berlin, in the kingdom of Prussia.

176. To Samuel Phillips, of Moseley, in the county of Worcester, Gentleman, for the invention of "Improvements in sliding sashes, shutters, or doors."

177. To William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improved apparatus for measuring water and other liquids."—A communication from Mr. Alfred Nobel, Engineer, of Paris, in the empire of France.

178. To Thomas Greenwood, John Batley, and Jacob Dockray, of Leeds, in the county of York, Machinists, for the invention of "Improved machinery for converting hemp and flax fibres into yarn, twine, ropes, and cordage."

179. To Joseph Bent, of Newhall Street, Birmingham, in the county of Warwick, Military Ornament Manufacturer, for the invention of "Certain improvements in clasps or fastenings applicable for belts, garters, and other purposes."

180. To James Shanks, of Arbroath, in the county of Forfar, North Britain, Machinist, for the invention of "Improvements in mowing machines."

181. To Josiah Latimer Clark, of Haverstock Hill, and John Muirhead, of Gloucester Road, Regent's Park, both in the county of Middlesex, for the invention of "Improvements in electric telegraphs, and in the apparatus used in working the same."

182. And to Henry Sagar, of Broughton, near the city of Manchester, in the county of Lancaster, Bleacher and Dyer, and Alexander Schultz, of Paris, in the kingdom of France, and of the city of Manchester aforesaid, Chemist, for the invention of "Improvements in producing pink shades on cotton fabrics or yarns."

On their several petitions, recorded in the Office of the Commissioners on the 20th day of January, 1859.

---

183. To Thomas Richardson, of 20, New Bridge Street, Newcastle-on-Tyne, for the invention of "Improvements in the manufacture of manure."

184. To Samuel Osler, of Great Yarmouth, in the county of Norfolk, and John Barton Balcombe, of Brixton, in the county of Surrey, Gentleman, for the invention of "Improvements in apparatus for treating fish, so as to adapt it for manure, and in using the same alone or in combination with super-phosphate of lime or other phosphates."

185. To Louis Le Prince, of No. 261, Regent Street, in the county of Middlesex, Bootmaker, for the invention of "The improvement of ladies boots and shoes, called the caméleon boot and the caméleon shoe."

186. To George Bell Harkes, of No. 1, Montague Terrace, Trinity Square, Southwark, in the county of Surrey, for the invention of "An improved machine for washing, wringing, and mangling."

187. To George Ellis, of No. 4, Collier Street, Pentonville, in the county of Middlesex, Merchant for the invention of "The improvement of muffs, to be called the patent reticule muff."

188. To John Hick and William Hargreaves, of Bolton-le-Moors, in the county of Lancaster, Engineers, trading under the firm of Benjn. Hick and Son, for the invention of "Improvements in the construction of steam boilers."

189. To Richard Howell, of Smethwick, in the county of Stafford, Gas Fitter, and Richard James Willder, of Birmingham, in the county of Warwick, Hatter, for the invention of "An improvement or improvements in taps or stop cocks."

191. To William Wells, of Greenland, near Halifax, in the county of York, Cotton Spinner, for the invention of "Improvements in machinery or apparatus employed in spinning and twisting cotton, and other fibrous substances."

192. To Alfred Davenport, of Birmingham, in the county of Warwick, Gas Purifier Manufacturer, for the invention of "An improved regulating burner for gas."—A communication from Henry Woodward, residing at New York, in the United States of America.

93. To James Childs, of Windsor House, Windsor Road, Putney, in the county of Surrey, for the invention of "An improvement in applying heat in the manufacture of artificial gums and teeth, and other articles composed of india rubber, or gutta percha, combined with sulphur."

194. To James Hill Hume, of Broughty Ferry, in the county of Forfar, North Britain, Baker, for the invention of "Improvements in warming apparatus for the feet."

195. To André Jacques Amand Gautier, Jean Gilbert Dumay, Jean Theodore Persin, of Paris, France, Gentlemen, for the invention of "An improved manure."

197. To James Newman, of Birmingham, in the county of Warwick, Manufacturer, for the invention of "Improvements in the manufacture of chains."

198. To Bernard Lauth, late of Pittsburgh, State of Pennsylvania, U. S. A., but now residing at Surrey Street, in the city of Westminster, Mechanician, for the invention of "An improved mode of, and improved machinery for, rolling plates, bars, rods, and shafts."

199. And to John Edwards, of No. 77, Aldermanbury, in the city of London, for the invention of "Improvements in the manufacture of buckles."

On their several petitions, recorded in the Office of the Commissioners on the 21st day of January, 1859.

---

201. To David Moseley, of the Chapel Field Works, Ardwick, in the city of Manchester, Manufacturer of India Rubber and Gutta Percha, for the invention of "Improvements in the manufacture of india-rubber thread."

203. To Edward Dorsett, of 76, Old Broad Street, in the city of London, Tar Distiller, and John Bennington Blythe, of Minerva Place, New Cross, in the county of Kent, Merchant, for the invention of "Improvements in the distillation of oil from coal tar, and in apparatus for preserving timber therewith."

205. To William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improved machinery for cutting files."—A communication from Milton D. Whipple, of the United States of America.

207. And to Christian Sharps, of Philadelphia, in the State of Pennsylvania, United States of America, Manufacturer of Fire-arms, for the invention of "Improvements in breech-loading repeating fire-arms."

On their several petitions, all recorded in the Office of the Commissioners on the 22nd day of January, 1859.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

4th February, 1859.

1781. Evan Leigh, of Manchester, in the county of Lancaster, Mechanical Engineer, for an invention of "Improvements in machinery or apparatus for preparing and spinning flax, wool, silk waste, or other fibrous materials."—Dated 5th August, 1858.

1788. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improvements in the manufacture of lace."—Dated 5th August, 1858.

1791. George Hinton Bovill, of Durnsford Lodge, Wimbledon, in the county of Surry, for an invention of "Improvements in the manufacture of gas, also in the manufacture of coke and other fuel."—Dated 6th August, 1858.

1797. John Walker, of City Road, in the county of Middlesex, Engineer, for an invention of "Improvements in the manufacture of electric telegraph cables."—Dated 7th August, 1858.

1804. James Walker, of Glasgow, in the count- of Lanark, North Britain, Engineer, for an inveny tion of "Improvements in machinery or apparatus for moulding or shaping metals."—Dated 7th August, 1858.

1818. Alfred Barchou, of Number 49, Saint Augustin's Road, Camden Town, in the county of Middlesex, Working Jeweller, for an invention of "Improvements in the mode of fastening the soles and heels of boots and shoes."—A communication from a Foreigner residing abroad.—Dated 10th August, 1858.

1821. Francois Haeck, of Schaerbeck, near Brussels, in the kingdom of Belgium, Gentleman, for an invention of "Improvements in the construction of cocks, taps, or valves."—Dated 10th August, 1858.

1835. Jacques Henri Marie Maissiat, of Paris, in the empire of France, Chemist, for an invention of "Improvements in wheels."—Dated 12th August, 1858.

1864. Louis Alexandre Forot, Merchant, of 2, Rue Sainte Appoline, Paris (empire of France), and of 45, Essex Street, Strand, London, for an invention of "A new mode of ornamenting fabrics, and in the apparatus connected therewith."—Dated 14th August, 1858.

1958. Edward Massey, of Tysoe Street, Clerkenwell, in the county of Middlesex, Ship's Log Manufacturer, for an invention of "Improvements in ships logs."—Dated 30th August, 1858.

2195. Hypolite Monier, from Marseilles, in the empire of France, and from 2, Francis Street, Golden Square, in the county of Middlesex, Manufacturer, for an invention of "A new gas burner."—Dated 2nd October, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 31st January*, 1859.)

273. Edward Schischkar, of Halifax, in the county of York, Manufacturer, for an invention of "Improvements in dyeing and colouring wools, hairs, silks, yarns, and textile fabrics made of the same materials, either wholly or partially."—Dated 1st February, 1856.

279. Andrew Lamb, of Southampton, in the county of Hants, Engineer, and John Ronalds, of the same place, Shipbuilder and Naval Architect, for an invention of "An improvement in the construction of iron ships, boats, and other similar structures."—Dated 1st February, 1856.

419. Charles Scott Jackson, of 18, Cannon Street, in the city of London, Lieutenant in the Royal Navy, for an invention of "An improvement in preserving and disinfecting timber and other substances."—Dated 19th February, 1856.

FOREIGN PATENTS.

FRANCE.

Current List of Patents of Invention and Certificates of Addition.

1858.

(*Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.*)

Note.—The duration of a Patent is fifteen years, except wher determined by that of a previously existing foreign Patent.* e

5350. William Palmer, represented by Perpigna, of 42, Rue Neuve St. Augustins, Paris, for "Improvements in fire-arms."—Dated 25th November, 1858.—(American Patent, expiring 28th October, 1872.)

* For the French Patent Law see No. 228 of this Journal.

5351. François Lebacq, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "A system of horse-shoes."—Dated 26th November, 1858.

5352. Georges Fronton, of 64, Rue Amelot, Paris, for "A mechanical process for making Annonay paper."—Dated 26th November, 1858.

5353. Dominique Artige, of 43, Rue de Grenelle, Grenelle, for "Improvements in steam engines fixed to their furnaces and boilers."—Dated 26th November, 1858.

5354. James Ridsdale, represented by Girard, of 85, Rue de Sèvres, Paris, for "Improvements in fountain penholders."—Dated 26th November, 1858.—(English Patent, expiring 6th October, 1872.)

5355. Hector Grand de Chateaneuf, of 30, Avenue de la Porte Maillot, aux Thermes, for "A smoke-consuming apparatus applicable to gas burners, oil-lamps, and lighting and heating apparatus."—Dated 26th November, 1858.

5356. Edmond Armand Louis Dargy, of 12, Rue du Docteur, Betignolles, a Certificate of Addition to his Patent of 20th February, 1858, for "An hydro-rotary blast engine."—Dated 26th November, 1858.

5357. Chevreau-Lorrain, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A lighting apparatus with a supplementary wick."—Dated 26th November, 1858.

5358. Aimé Delpech, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 26th April, 1852, for "A force and lift pump."—Dated 26th November, 1858.

5359. Pierre Guillaume, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A piston cock protector."—Dated 26th November, 1858.

5360. Joseph Petit-Gudenchet, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 23rd August, 1858, for "Textile and filamentous substances for conveying electricity."—Dated 26th November, 1858.

5361. Courage and Bennett, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in furnaces for smelting, reducing, and calcining ores, scoria, and their residues."—Dated 26th November, 1858.—(English Patent, expiring 24th November, 1872.)

5362. Jacques Auguste Bourguet, of 22, Petite Rue St. Pierre, Paris, for "Manufacture of plates of cast porcelain paste with relief castings, applicable to decorating furniture, bronze, and to other purposes."—Dated 26th November, 1858.

5363. Laubenière, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 20th June, 1857, for "Manufacture of kneed-axles for locomotives, &c."—Dated 27th November, 1858.

5364. Jean François Ernest Hallié, of 83, Rue d'Enfer, Paris, for "Modifications in the arrangements of rails with respect to their strength

and the passage of trains thereon."—Dated 27th November, 1858.

5365. Remond Lenoir, of 8, Rue Baillif, Paris, for "Improvements in the manufacture of shirts."—Dated 27th November, 1858.

5366. Pierre Victor Reclus, of 14, Rue du Temple, Paris, a Certificate of Addition to his Patent of 21st August, 1858, for "An alarum."—Dated 27th November, 1858.

5367. Nicolas François Corbin-Desboissières, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Atmospheric and mixed fireplaces, applicable to reverberatory furnaces and apparatus heated at a high temperature, to steam-boilers, and to domestic purposes."—Dated 27th November, 1858.

5368. Pierre Paul Hulin, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Manufacture of metallic powder, and applying the same to industrial arts."—Dated 27th November, 1858.

5369. Léonard Schémitt, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in puzzle-boxes applicable to cigar-cases, liqueur-cases, &c."—Dated 27th November, 1858.

5370. Jacques Lacombe, represented by Poitout, of 85, Rue Ménilmontant, Paris, for "A mechanical process for engraving and engine turning."—Dated 27th November, 1858.

5371. Aléxandre Félix Ouarnier, of 45, Rue des Vinaigriers, Paris, for "Improvements in the manufacture of cartridges for breech-loading guns."—Dated 27th November, 1858.

5372. Lister and Warburton, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in spinning."—Dated 27th November, 1858.—(English Patent, expiring 26th May, 1872.)

5373. Martin and Legraud, the former of La Chapelle, the latter of Bercy, for "A self-acting manometer cock."—Dated 27th November, 1858.

5374. Brun Brothers, Son, and Denoyel, of 25 et 27, Rue des Jeuneurs, Paris, for "A kind of tournure petticoats."—Dated 27th November, 1858.

5375. Louis Jules Brandt, represented by Bieler, of 5, Rue Bonaparte, Paris, for "An apparatus for manufacturing oil for watches."—Dated 29th November, 1858.

5376. Berthier and Berger, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "Manufacture of alcohol from the residue of breweries."—Dated 29th November, 1858.

5377. Jules Joseph Adolphe Very, of 43, Cours de Vincennes, St. Mandé, for "Combined toilet and chest of drawers."—Dated 29th November, 1858.

5378. Paul François Breuillé, of 61, Faubourg Montmartre, Paris, for "An india-rubber money box."—Dated 29th November, 1858.

5379. Lollier and Gueneau, of 27, Rue Descartes, Paris, for "An aerial pop-gun."—Dated 29th November, 1858.

5380. Marie Cruchet, of 4, Rue des Filles du Calvaire, Paris, for "Smoking pipes with a mechanical motion."—Dated 29th November, 1858.

5381. Charles Renault, of 58, Rue de la Chaussée d'Antin, Paris, for "Improvements in curtain rods of windows."—Dated 29th November, 1858.

5382. Jacques Grassay, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 14th October, 1858, for "Making hose of canvass imbibed with tar and bitumen."—Dated 29th November, 1858.

5383. Victor César Auguste Priqueley, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A kind of wooden turrel pins with screws."—Dated 29th November, 1858.

5384. Joseph Bernachon, of 29, Rue Breda, Paris, for "A calking plinth."—Dated 29th November, 1858.

5385. Herbert William Hart, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Apparatus for regulating the pressure of gas."—Dated 29th November, 1858.—(English Patent, expiring 29th January 1872.)

5386. Jacques Elidat de Malbec, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 25th January, 1855, for "A plain obturator or closing apparatus."—Dated 29th November, 1858.

5387. François Schmitz, of 1, Rue de Poissy, Paris, a Certificate of Addition to his Patent of 29th March, 1858, for "Improvements in the treatment of peat."—Dated 30th November, 1858.

5388. Gabriel Marie Valentine Verpy, of 55, Rue Vivienne, Paris, for "A kind of bonnets."—Dated 30th November, 1858.

5389. Charles Joseph Eugène Dumont, domiciled with Grand Jean, of 28, Rue Neuve Coquenard, Paris, a Certificate of Addition to his Patent of 27th August, 1858, for "An apparatus for carbonizing gas."—Dated 30th November, 1858.

5390. Furcy Amédée Marlette, of 36, Rue des Trois Couronnes, Paris, for "Rocking or lever buttons."—Dated 30th November, 1858.

5391. Paul Vié, of 157, Rue de l'Université, Paris, for "A machine for the manufacture of screw foot coverings."—Dated 30th November, 1858.

5392. Leconte and Doudet, domiciled with Baurain, of 72, Rue Notre Dame des Champs, Paris, for "A system of locks."—Dated 30th November, 1858.

5393. Sicard and Ferrand, the former of 46, Rue du Chemin Vert, the latter of 71, Rue Popincour, Paris, for "Manufacture of castors of bedsteads."—Dated 30th November, 1858.

5394. Montigny and Lespinasse, of 52, Rue Jean-Goujon, Paris, for "A system of mechanical stoppering by means of a pressure obtained by screws."—Dated 30th November, 1858.

5395. Ralph Peacock, represented by Grandchamp, of 23, Rue Lenostre, Rouen, département de la Seine Inférieure, for "An apparatus for rendering furnaces smoke-consuming or regulating the combustion therein."—Dated 1st December, 1858.

5396. Pierre Paul Castaing, of 10, Rue Baronie, Toulouse, département de la Haute Garonne, for "A machine for dressing hats."—Dated 2nd December, 1858.

5397. Nicolas Marin, of Troyes, département de l'Aube, a Certificate of Addition to his Patent of 6th January, 1858, for "A game of geography for teaching children."—Dated 4th December, 1858.

5398. Jean Baptiste Adolph Dugléré, of 25, Rue de la Sourdière, Paris, a Certificate of Addition to his Patent of 22nd November, 1853, for "An apparatus for emptying cespools, &c."—Dated 30th November, 1858.

5399. Claude Gavioli, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, a Certificate of Addition to his Patent of 25th October, 1855, for "A mechanism for playing the flute, &c."—Dated 30th November, 1858.

5400. Claude Gavioli, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the construction of organs."—Dated 30th November, 1858.

5401. André Désiré Oursel, of 197, Rue St. Antoine, Paris, a Certificate of Addition to his Patent of 22nd July, 1858, for "A system of gas apparatus."—Dated 30th November, 1858.

5402. Pierre Emile Martin, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 11th June, 1858, for "An apparatus worked by means of the reaction of water, air, &c."—Dated 30th November, 1858.

5403. Gombeau and Royer, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to their Patent of 10th July, 1858, for "A mill for grinding barley, &c."—Dated 30th November, 1858.

5404. Victor Constant Lieuvain, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Machines for winding off skeins of yarns."—Dated 30th November, 1858.

5405. Emile Gaspard Gratin Lazeu, of 24, Rue Muller, Montmartre, for "A decimal calculating apparatus for demonstrating the nature of numbers, for showing the respective place of the units of the various orders, for always obtaining the exact total sum of additions, for initiating children into the rules of subtraction, by teaching them the rules of addition, and, lastly, for marking points at games."—Dated 30th November, 1858.

5406. Terreil and Chateau, the former of 7, Rue Guy-la-Brosse, Paris, the latter of Ivry, for "A process for purifying the acetic acid obtained in distilling organic substances, wood, coal, &c., and for separating said acid from the tar with which it is mixed."—Dated 1st December, 1858.

5407. Alphonse Honoré Antheaume, of 97, Rue de la Verrerie, Paris, for "Using a vacuum apparatus for concentrating caramel in general."—Dated 1st December, 1858.

5408. Thomas Louis Augustin Lemaitre, of 83, Bois de Romainville, Bagnolet, for "A system of bells or clock-work, applicable to railways'"——Dated 1st December, 1858.

5409. Joseph Nicolas Royer, of 47, Rue Grenetat, Paris, a Certificate of Addition to his Patent of 2nd October, 1858, for "A machine for preparing waddings for dresses." — Dated 1st November, 1858.

5410. Jean François Quétel, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of machines for planing and grooving friezes of inlaid floors."—Dated 1st November, 1858.

5411. Roquincourt and Dorot, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Applying aniline to industry." — Dated 1st November, 1858.

5412. Jean Faivre, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in vitreous substances, and in substances which are polished by means of emery."—Dated 1st December, 1858.

5413. Adolphe Oppenheimer, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in portemonnaies, cigar-cases, &c."—Dated 1st December, 1858.

5414. Louis Aléxandre Boité, represented by Richard, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 28th August, 1857, for "Improvements in the arrangement and manufacture of chafing pans or feet-warmers."—Dated 1st December, 1858.

5415. Jean René Delabarillère, of 21, Rue Neuve des Petits Champs, Paris, for "A liquid for the hair."—Dated 1st December, 1858.

5416. Auguste Colas, of 21, Rue Vielle de St. Germain, Courbevoie, for "A machine for assembling the various parts of wheels."—Dated 1st December, 1858.

5417. Hippolyte Adrien Mutelle, of 42, Rue Miromesnil, Paris, a Certificate of Addition to his Patent of 4th March, 1851, for "A system of wheel tyres."—Dated 1st December, 1858.

5418. Bernard Bienfait, of 1, Rue Bourbon-Villeneuve, Paris, for "A kind of legs of boots and half-boots."—Dated 1st December, 1858.

5419. Jean Severin Leroy, of 3, Place du Théâtre, Grenelle, for "Currying leather."—Dated 1st December, 1858.

5420. Messrs. Fontaine, of 40, Rue du Petit-Lion, Paris, for "A mode of cutting gloves."—Dated 1st December, 1858.

5421. Daniel Caille, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A process for preserving wine for conveyance."—Dated 1st December, 1858.

5422. Adrien Jacques Charles Maurice, of 61, Rue du Faubourg St. Martin, Paris, for "A system of arm-chairs for railways."—Dated 1st December, 1858.

5423. Marc André Baudit, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in mounting buckles for sword-belts, belts, garters, &c."—Dated 1st December, 1858.

5424. Jean Pierre Marie Delille, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A substance for preventing incrustations in steam boilers."—Dated 1st December, 1858.

5425. Marie Louis Valentin Piette, of 16, Rue de Rivoli, Paris, for "A steam apparatus for purifying paste."—Dated 1st December, 1858.

5426. I. F. Colfs-Heyne, represented by Langlois, of 43, Rue des Marais St. Martin, Paris, for "A

system of railway chairs and rails."—Dated 1st December, 1858.

5427. Amans de Chavagneux, of 58, Quai de la Migesserie, Paris, for "A system of arranging wefts for weaving fabrics."—Dated 2nd December, 1858.

5428. Alfred Charles François Van Ackere, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "So-called 'Imperial counters' (for games."—Dated 2nd December, 1858.

5429. Pierre Bruno Joseph Eli Cabanes, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 8th July, 1856, for "Improvements in bolting machines."—Dated 2nd December, 1858.

5430. Hippolyte Jean Picard, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in plaster-mills."—Dated2ndDecember, 1858.

5431. Jacques Michel Mackiewiez, of 30, Quai d'Orléans, Paris, for "Capsules for medicamental substances."—Dated 2nd December, 1858.

5432. Pierre Louis Eugène Pros, domiciled Rue et Hotel Marsolier, Paris, for "An alimentary substance."—Dated 2nd December, 1858.

5433. Candelot alias De Fulgens, of 24, Rue St. Honoré, Paris, a Certificate of Addition to his Patent of 3rd May, 1858, for "A chemical compound for obtaining waterproof coatings."—Dated 2nd December, 1858.

5434. Veron and Flantin, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An expansion stereoscope."—Dated 2nd December, 1858.

5435. Laumonier and Burdel, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A kind of flacon called 'library flacon.' "—Dated 2nd December, 1858.

5436. Messrs. Gillot, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A moveable caoutchouc clasp for portemonnaies, pocketbooks, &c."—Dated 2nd December, 1858.

5437. Moxon, Clayton, and Fearnley, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in looms for weaving carpets, and other looped and pile tissues." —Dated 2nd December, 1858.

5438. Edouard Joseph Dezalleux, of 3, Impasse Rivoli, Belleville, for "A machine for putting corn into the mill hopper."—Dated 2nd December, 1858.

5439 Bonnet Frédéric Brunel, represented by Claye, with Bourgeois, of 4, Rue de Mulhouse, Paris, for "A process for manufacturing Prussian blue."—Dated 3rd December, 1858.—(English Patent, expiring 27th September, 1870.)

5440. Michel Monin, represented by Bresson, of 57, Rue de Bretagne, Paris, for "A combined trunk and cushion."—Dated 3rd December, 1858.

5441. Seevolo Dupuis, of 188, Rue d'Allemagne, Sapetite-Villette, for "A so-called 'oscillating cutting machine.' "—Dated 3rd December, 1858.

5442. Pierre Louis Eugène Pros, domiciled Rue et Hôtel Marsolier, Paris, for "An alimentary substance."—Dated 3rd December, 1858.

5443. Ludovic Charles Adrien Joseph Guyot d'Arlincourt, of 3 bis, Rue de la Bruyère, Paris, for "A telegraph apparatus."—Dated 3rd December, 1858.

5444. Joseph Emile Humbert, of 5, Rue St. Martin, Paris, a Certificate of Addition to his Patent of 14th October, 1858, for "A constant and economical battery."—Dated 3rd December, 1858.

5445. Crisol Fauconnier, of 15, Avenue Parmentier, Paris, for "An application to the upper floors of covered stations, &c., and a system of turntables."—Dated 3rd December, 1858.

5446. Chantrel, Calvet, and Liebermann, the former of 43, Rue de Clichy, Paris, a Certificate of Addition to their Patent of 4th December, 1857, for "A water meter."—Dated 3rd December 1858.

5447. Jean Hyacinthe Salières, of 61, Rue de la Verrerie, Paris, for "A system of tubular spherical gridirons."—Dated 3rd December, 1858.

5448. Augustin Lebourg, of Gassetot-le-Mauconduit, département de la Seine Inferiéure, for "A rocking carriage."—Dated 3rd December, 1858.

5449. Jean Fréderic Schmutz, of 2, Rue du Renard-Prêchant, Strasbourg, département de Bas Rhin, for "A machine for crushing colours."—Dated 4th December, 1858.

5450. Hyacinthe Barthez, of 29, Rue Argenterie, Montpellier, for "Toilet-vinegar called 'vinegar of Alcibiades.' "—Dated 4th December, 1858.

5451. Louis Passot, domiciled with David, of Dijon, département de la Côte d'Or, for "A machine for the manufacture of nails for shoeing horses, mules, &c."—Dated 4th December, 1858.

5452. Frédéric Giroud d'Argoud, of 14, Rue du Commerce, Lyon, département du Rhône, a Certificate of Addition to his Patent of 13th April, 1858, for "A system of grinding and baking, &c."—Dated 6th December, 1858.

5453. Trénée Leduc, of 2, Rue du Faubourg-Croncels, Troyes, département de l'Aube, a Certificate of Addition to his Patent of 25th May, 1858, for "A sewing machine."—Dated 6th December, 1858.

5454. Henry Henson-Henson, William Frédéric Henson, represented by Zacharie, of 40, Rue de Bourbon, Lyon, département du Rhône, a Certificate of Addition to their Patent of 29th September, 1858, and expiring 24th September, 1872, for "A system of waterproofing leather, and fibrous, cotton, and other stuffs."—Dated 6th December, 1858.

5455. Paul Emile Gratien Lécorney, of 31, Rue de l'Orme, of Malzéville, near Nancy, département de la Meurthe, for "An embroidery stitch, called 'flower stitch.' " — Dated 7th December, 1858.

5456. Tolijon, represented by his Wife, of 40, Place de Beaune, Châlon, département de Saône et Loire, a Certificate of Addition to his Patent of 24th January, 1856, for "A composition imitating marble, &c."—Dated 7th December, 1858.

5457. Gilles Senat, of 94 and 96, Rue Lecoq, Bordeaux, département de la Gironde, for "A machine for pumicing varnished leather."—Dated 7th December, 1858.

5458. Charles Desurmont and Goudeau, of Seclin, département du Nord, a Certificate of Addition to their Patent of 15th September, 1858, for "A weaving apparatus."—Dated 8th December, 1858.

5459. Charles Anciot, of 50, Rue d'Elbeuf, Rouen, département de la Seine Inférieure, for "Reeds with stiff heddles for weaving machines."—Dated 3rd December, 1858.

5460. Louis Marque, of Vienne, département de l'Isère, for "A safety musrole or nose-band for subduing fiery horses."—Dated 4th December, 1858.

5461. Poissant, Caillaux, and Gauguier, of Amiens, département de la Somme, for "Processes and machines for thoroughly decorticating grain."—Dated 16th December, 1858.

5462. Emile Pavy, of Girardet, département d'Indre et Loire, for "An economical granary or apparatus for preserving grain."—Dated 6th December, 1858.

5463. Camentron, Despax, and Bordanave, of Daix, département des Landes, for "A mechanism worked by pedals for skidding carriages." Dated 6th December, 1858.

5464. Joachim Gueyton, of Valence, département de la Drôme, for "A twilling apparatus for spinning frames."—Dated 6th December, 1858.

5465. Charles Auguste Koehler, of Bitschwiller, département du Haut Rhin, for "A system of fingers of flyers with castors."—Dated 6th December, 1858.

5466. Lalive-Peney, of 10, Rue de la Pyramide, Macon, département de Saône et Loire, for "A system of moveable or immoveable rocking or lever bridges, whereby brick-work and floors are superseded."—Dated 9th December, 1858.

5467. Auguste Lecocq, of Wervicq-Gud, département du Nord, for "A machine for peeling flax."—Dated 9th December, 1858.

5468. Flaissier Brothers, of Nîmes, département du Gard, for "Improvements in the healds of upper warps."—Dated 4th December, 1858.

5469. Flaissier Brothers, of Nîmes, département du Gard, a Certificate of Addition to their Patent of 4th May, 1858, for "Applying velvet designs on short nap tissues, or so-called 'imitation velvet.'"—Dated 4th December, 1858.

5470. Charles Placide Nézeraux, of Matha, département de la Charente, for "An improved distilling boiler, especially for distilling wines."—Dated 6th December, 1858.

5471. Paul Joseph Meslin, of St. Sauveur-sur-Douves, département de la Manche, for "A cylinder press (for liquids)."—Dated 7th December, 1858.

5472. Jean Marie Durafour, of 48, Rue de la Charité, Lyon, département du Rhône, for "Improvements in the manufacture of jewels."—Dated 7th December, 1858.

5473. Gustave de Coninck, of 43, Rue de la Côte, Hâvre, département de la Seine Inférieure, for "Magazines for preserving corn."—Dated 7th December, 1858.

5474. Gustave de Coninck, of 43, Rue de la Côte, Hâvre, département de la Seine Inférieure, for "A regulator or counter for the flow of liquids by means of cocks."—Dated 7th December, 1858.

5475. Frédéric Loquay, of Angoulême, département de la Charente, for "A system of twyers applicable to bellows or ventilators."—Dated 8th December, 1858.

5476. Georges Charmetant, of 17, Rue de Chartres, Lyon, département du Rhône, for "Inodorous water-closets."—Dated 8th December, 1858.

5477. Pierre Garcin, of 7, Rue Monsieur, Lyon, département du Rhône, for "Apparatus for singeing thread or stuffs of silk, wool, or cotton."—Dated 9th December, 1858.

5478. Jean Baptiste Grandry, of 3, Passage Neveu, Faubourg St. Denis, for "Mineral mastic."—Dated 3rd December, 1858.

5479. Adéon Ferandelle, domiciled with Avercene and Collette, of 8, Rue des Vieux Augustins, Paris, a Certificate of Addition to his Patent of 8th November, 1858, for "An hydraulic wheel."—Dated 4th December, 1858.

5480. Guillaume Félix Aroux, domiciled with Desprez and Latour, of 2, Rue de la Feuillade, Paris, for "Processes for sowing and planting in a line without sowing machine."—Dated 4th December, 1858.

5481. François Aléxis Pradalier, of 15, Rue Ficatier, Courbevoie, a Certificate of Addition to his Patent of 18th February, 1858, for "A mechanical cask-game."—Dated 4th December, 1858.

5482. Verliac and Baud, the former of 14, Rue St. Jean, Montmartre, for "A system of moveable hammers."—Dated 4th December, 1858.

5483. Bondoux and Dujat, of 75, Rue du Temple, Paris, for "A box for post stamps, containing a mechanism for issuing the stamps and cutting them at pleasure."—Dated 4th December, 1858.

5484. Henri Raymond, of 130, Rue St. Honoré, Paris, for "A washing machine."—Dated 4th December, 1858.

5485. Messrs. Maréchal, of 12, Rue de Nemours, Paris, for "Applying slides to French window-bolts."—Dated 4th December, 1858.

5486. Valentin Muller, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 21st October, 1858 for "A copying press for travellers."—Dated 4th December, 1858.

HANOVER.*

List of Patents of Invention Delivered between the 1st October and 31st December, 1858.

(*Communicated by the Hanoverian Government.*)

(For preceding List, see No. 510 of this Journal.)

1. L. Kripp, of Celle, for "An apparatus for stopping and disengaging so-called 'weigh-bridges.'"—5 years.—Dated 13th October, 1858.
2. R. Thode, of Hainsberg, near Dresden, for "A machine for grinding paper-pulp."—5 years.—Dated 13th October, 1858.
3. L. Andree and Co., of Magdeburg, for "An apparatus for cutting round matches, for sorting the same, and putting them into frames."—5 years.—Dated 21st October, 1858.
4. Benjamin Nadault de Busson, of Paris, for "Filtering tubes and improvements in the present mode of filtering, and for cleaning filtering apparatus."—5 years.—Dated 21st October, 1858.
5. Timpe, of Rheine, for "A machine for the manufacture of tiles."—5 years.—Dated 12th November, 1858.
6. Friedrich Siemens, of Berlin, for "Improvements in so-called 'regenerators for smelting and reheating furnaces, and for other purposes.'"—5 years.—Dated 14th November, 1858.
7. Julius von Sparre, of Eisleben, for "A new method of separating granular substances of a different specific gravity."—5 years.—Dated 15th November, 1858,
8. F. A. Andrée, of Essen, for "A mechanism for working rudders of vessels by means of a combined muscular and spring power."—5 years.—Dated 20th November, 1858.
9. Heinrich Mehrtens, of Bremerhafen, for "A sewing machine."—5 years.—Dated 14th November, 1858.
10. Luigi Ferrari Corbelli, of London, for "A method of obtaining aluminium."—5 years.—Dated 16th December, 1858.
11. E. Schmidt, of Heidelberg, for "An apparatus for preserving beer."—5 years.—Dated 16th December, 1858.
12. Fr. Bödeker, of Hanover, for "Improvements in sewing machines."—5 years.—Dated 22nd December, 1858.
13. Keutel, of Eisleben, for "A kitchen range."—5 years.—Dated 22nd December, 1858.
14. Captain Sleeboom, of Hamburg, for "Construction of keels of vessels, whereby vessels or ships are prevented from driving to leeward."—5 years.—Dated 27th December, 1858.
15. W. A. Schrödter, of Breslau, for "A system of extracting clear wort from amylaceous plants by means of a centrifugal triturating process, likewise for a new steam apparatus for meshing and cooling."—5 years.—Dated 27th December, 1858.
16. Fr. Töbelmann, of Osnabrück, for "A glass sieve for washing coke, coals, sand, ores, and other substances."—5 years.—Dated 27th December, 1858.
17. F. Willmer, of Hanover, for "A machine for rasping dye-wood."—5 years.—Dated 27th December, 1858.
18. Karwiesé, of Graudenz, for "An apparatus for stopping fiery horses and skidding the wheels of carriages at the same time."—5 years.—Dated 31st December, 1858.

* For the Hanoverian Patent Law, see No. 231 of this Journal.

UNITED STATES OF AMERICA.

(*Communicated by the Commissioner of Patents.*)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 18th January, 1859, and each bearing that date.

No. 22,612. R. L. Allen, of New York, N. Y., for an "Improvement in potato diggers."

"I am aware that the dirt-sifting wings of potato-digging plows are common, and therefore do not claim them; but what I claim as my invention, and desire to secure by Letters Patent, is, the arrangement and combination of the removable wings *b*, *c*, with the double mould board, substantially as set forth. I also claim the arrangement and combination of the central or dividing bar *a*, with the standard C, by means of the notched fastening *e* and d^1, substantially as set forth."

No. 22,613. Wm. J. Alston, of Williamson County, Tenn., for an "Improved ring lock."

"Having thus described my improvement in 'ring locks,' what I claim therein as new, and desire to secure by Letters Patent, is, the friction springs, arranged substantially as described, in combination with the inner rings of the lock, for the purpose set forth."

No. 22,614. Stephen R. Andres, of Troy, N. Y., and Saml. Andres and McDonough Bucklin, of New York, N. Y., for an "Improvement in apparatus for drying grain, malt, &c."

"We do not confine ourselves to the precise form of our machine described in this specification, as the same may be changed without changing the character of our invention, what we claim as our invention, and desire to secure by

Letters Patent, is, the use or employment of a blast or current of hot air introduced into the cylinder through a hollow journal or its equivalent, when said current of hot air is brought into direct contact with the substance to be dried thereby, in combination with a cylinder made adjustable to any angle as described."

No. 22,615. Ernst Bagnicki, of New York, N. Y., for an "Improvement in syringing apparatus."

"What I claim as my invention, and desire to secure by Letters Patent, is, the construction of a chair, substantially as described, and containing a pump, with an arrangement of the valve chambers, in the manner and for the purpose substantially as specified."

No. 22,616. John Barker and Edwd. W. Barker, of Baltimore, Md., for an "Improved amalgamator."

"We do not confine ourselves to the precise arrangement or form, or construction of the parts as described, as other forms and arrangements may be used in carrying out the principles of our improvements; having thus described our improvements in amalgamators, what we claim therein as new, and desire to secure by Letters Patent, is, First, the combination of a set of crushing or attrition rollers, with an upper and lower rubber, arranged substantially as described for the purpose set forth. Second, we also claim introducing an independent current of water into the amalgamator, substantially as described, so as to flow around the lower end of the feed pipe, and meet and mingle with the inflowing current of material, for the purpose as set forth. Third, in combination with the rollers, we claim constructing the lower rubber hollow, with openings to admit the quicksilver into the interior, for the purpose as set forth. Fourth, constructing the lower rubber with a vertical passage through its centre, arranged substantially as described, for the purpose set forth. Fifth, the combination of the concave plate, arranged substantially as described, with the rollers, for the purpose of directing the inflowing current to the centre and between the rollers. Sixth, constructing recesses on the interior of the casing, over the journals, arranged substantially as described, for the purpose set forth."

No. 22,617. James F. Beckwith and Adin G. Gage, of South Alabama, N. Y., for an "Improvement in seed planters."

"Having thus fully described our invention, what we claim as new, and desire to secure by Letters Patent, is, the arrangement of the tooth O, discharge spout L, coverers I, hoppers B, B, frame piece A, A, lever F, and bar D, substantially in the manner and for the purpose herein fully set forth."

No. 22,618. Wm. H. Bell, of Washington, D. C., for an "Improvement in self-primer for fire-arms."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, First, the combination of the shield *f*, plunger *i*, spring *k*, and screw head *h*, in the manner described, with the magazine chamber *b*, for the purposes set forth. Secondly, the arrangement and combination of the pin *n* on the piston, *i* and slot *m*, in the shield *f*, with the slot *o*, in the side of the hammer, for the purpose specified. Thirdly, the removable guard plate *q*, as arranged and operated for the purposes set forth."

No. 22,619. Peter Born, of New York, N. Y., for an "Improved sofa frame."

"What I claim as new, and desire to secure by Letters Patent, as a new and improved article of manufacture, is, a complete frame of a sofa, made of thin layers of wood, in the manner substantially as herein specified."

No. 22,620. Jules Joseph Henri Brianchon, of Paris, France, for an "Improvement in composition for ornamenting glass."

"Claim.—The yellow coloring composed of resin, nitrate of uranium, essence of lavender, and the flux of bismuth; also the orange-red coloring, composed of resin, nitrate of iron, essence of lavender, and the flux of bismuth; also the imitation gold coloring, composed of the above described orange-red coloring, and the yellow coloring mixed together, with additional parts of the preparation of uranium and iron; also, the variegated prismatic coloring, composed of ammoniuret or cyanuret of gold, or gold dye, turpentine, essence of lavender, the bismuth flux and uranium; also the mother of pearl coloring, composed of the bismuth flux, the flux of lead, chloride of antimony, resin, lavender or other essence, and colophony; all of the above colorings being made and applied in the manner and in proportions substantially as herein set forth."

No. 22,621. Reuben R. Brown, of Buffalo, N. Y., for an "Improvement in lubricating compounds."

"I claim a lubricator made of the ingredients, and in the proportions substantially as herein set forth."

No. 22,622. W. G. Bulgin, of West Jersey, Ill., for an "Improvement in seeding machines."

"I am aware that rotary coulters I, have been previously used; and also levelers F, or their equivalents; seed distributing devices, similar to the serrated plate C, have also been used; but I am not aware that the parts have been arranged relatively with each other, to operate as herein shown. I claim, therefore, as new, and desire to secure by Letters Patent, the rotary coulter I, leveler F, with share H' attached, and harrow teeth K, arranged relatively with respect to each other, and to a seed box A, provided with a suitable seed distributing device, so as to operate substantially as and for the purpose set forth."

No. 12,623. Abner L. Butterfield, of West Dummerston, Vt., for an "Improved wind wheel."

"I am aware that collapsible sails for wind wheels have been previously used; and I am also aware that valves have been employed and arranged, similar to those herein shown and described. I therefore, do not claim broadly, the sails E, nor the valves; but I do claim as new, and desire to secure by Letters Patent, attaching the sails E, to the frames D, of the arms C, substantially as shown, so as to permit of a self-lateral adjustment of the same, and using the catches *o*, and slides *g*, with cords attached for respectively locking the sails and freeing them from the locks or catches, substantially as described."

No. 22,624. Geo. Churchill, of Hartford, Conn., for an "Improvement in belt clasps."

"What I claim and desire to secure by Letters Patent, is, the combination of the plates A, A', pins B, screws F, as and for the purpose described."

No. 22,625. John Clark, of Williamsburgh, N. Y., for an "Improved mode of operating window blinds."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, attaching toothed flanches *d* or pinions to the tenons c^1 of the slats C, and having the flanches or pinions gear into a sliding rack bar D, placed in the stile B of the blind, and actuated by the pinion *f* and supplemental rack teeth *e*, or their equivalents, substantially as and for the purposes set forth."

No. 22,626. Saml. Colt, of Hartford, Conn., for an "Improved mode of coupling gun-stocks with pistols."

"Having described the construction and operation of my improvement, what I claim therein as new, and desire to secure by Letters Patent, is, the neck piece B^1, with its projecting end B^2, B^2, passing under shoulders in the lock frame, in combination with the holder pins *d*, *d*, and clamping bar *f*, arranged and operating substantially as described, for the purpose set forth."

No. 22,627. Saml. Colt, of Hartford, Conn., for a "Canteen gun stock."

"I do not wish to limit myself to any particularity of construction or kind of material, but claim as my invention, and desire to secure by Letters Patent, so constructing the stock of a gun that it shall constitute a canteen, substantially as described."

No. 22,628. J. M. Connel, of Newark, Ohio, for an "Improved boot-blacking apparatus."

"I make no claim to the construction of brushes of two sections, as shown in several patented knife polishers, but I claim as new, and as an improvement on the patented boot-blacking machine of J. M. and J. Connel, the concave-edged self-adjusting brush wheel B in combination with the spring foot piece F, constructed, arranged, and operating as described."

No. 22,629. G. D. Cotton, of Galesburgh, Ill., for an "Improvement in ploughs."

"Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is, combining and arranging together the beam D, the standards *d* and *e*, upright *a*, lever E, brace Z, bar H, axle B, and pole C, said pole reaching forward and resting upon the neck yoke, in the manner and for the purpose herein specified."

No. 22,630. Jesse Cunningham, of Marshall, Mo., for an "Improvement in cultivators."

"I do not claim the reversible bar J with a marker or wheel *g* attached, for such device has been previously used; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, attaching the furrow shares H to a swinging frame formed of the shaft E, bar F, and arms *b*, placed in a mounted frame A, in combination with the buttons *c*, *c*, provided with step-like projections *d* for regulating or adjusting the hight or inclination of said share frame, and consequently the depth of the furrows, substantially as described."

No. 22,631. Wm. M. C. Cushman, of Albany, N. Y., for an "Improvement in R. R. chairs."

"What I claim, and desire to secure by Letters Patent, is, the buttress (E, E,) at each end of the outside jaw, flanch, or rib (D), in combination with the same and united thereto, and with the top or bearing surface (*c*), as and for the purposes herein described and set forth."

No. 22,632. Levi S. Deming, of Newington, Conn., for an "Improvement in horse rakes."

"What I claim, and desire to secure by Letters Patent, is, the combination of the fingers B, shaft or axle A, cam F, and lever G, these several parts being constructed, arranged, operated, and operating in the manner described, for the purpose specified."

No. 22,633. L. J. Dickason and John Frazee, of Georgetown, Ohio, for an "Improved spoke machine."

"What we claim as our invention, and desire to secure by Letters Patent, is, 1st, the within-described mode of operating the cutter frame J, with its cutters K, and also the emery wheel *h*, and its frame L, so as to throw them all clear of the spoke S^1, after the operation of turning and smoothing, that is to say, we claim the employment of the two arms R^1, R^{11}, upon the shaft R, operated by means of a hand lever R^{111}, in the manner and for the purposes set forth. 2d, we claim the adjustable spring rests N^1, N^{11}, when arranged and operating in the manner and for the purposes set forth. 3rd, we claim the spring arm *n*, spring catch m^1, pitman n^1, and bent lever n^{11}, in combination with the lever K^{11}, clutch I, and rod *l*, all arranged and operating so as to throw the pulley wheel H in and out of gear with the shaft G substantially in the manner and for the purposes herein set forth."

No. 22,634. Richd. Doble and M. Angelo Starr, of Richmond, Ind., for an "Improved machine for making printers' rules."

"What we claim as our invention, and desire to secure by Letters Patent, is, the combination of the graduated plates H, H, having arc-formed and radial graduations, and the guide bars J, J, with their clamping screws *g*, *g*, and screw clamps *h*, *i*, *h*, *i*, the whole applied, arranged, and operating, substantially as described, in relation to the saw D, for the purpose herein set forth."

No. 22,635. Wm. W. Draper, of Greenfield, Mass., for an "Improvement in file handles."

"I do claim the application of jaws to tool handles; nor do I claim the above described mode of operating such jaws; but what I do claim is the centralizing socket, or socket piece and spring, in combination with the handle and the fastening jaws, and their operative mechanism applied within the said handle, the whole being made to operate, substantially in manner as herein-before described."

No. 22,636. Chas. Escudier, of Pattersonville, La., for an "Improvement in bathing apparatus."

"What I claim as my invention, and desire to secure by Letters Patent, is, the new application in bathing apparatus of two boilers, and steam pipe connected thereto, affording when united, an apparatus for the application of whatever kind of bath may be desired."

No. 22,637. James D. Foster, of Montgomery, Ala., for an "Improvement in ox yokes."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, constructing the bows B of four parts *a*, *a*, *b*, b^1, the parts *a*, *a*, being permanently attached to the stock A, and the parts *b*, b^1, attached by hinge joints *c*, *c*, to the parts *a*, *a*, and provided with a fastening C, substantially as and for the purpose set forth."

No. 22,638. Ambrose Foster and Harvey Brown, of New York, N. Y., for an "Improvement in machinery for moving rail-road cars on railways."

"We do not claim the moving of cars on rail roads, by stationary power and an endless rope or chain, for that is an old device, but our improvement consists in the mode of attaching to and moving the cars, by means of the devices above set forth, in which we claim, first, the rope supporter H, constructed and arranged substantially in the manner and for the purposes set forth. Second, we claim the sliding rods E, with the coiled springs F attached, or their equivalent, for the use and purpose set forth. Third, we claim the grab or catch G, constructed, arranged, and operated, substantially in the manner and for the purposes set forth."

No. 22,639. J. Fraser, of Rochester, N. Y., for an "Improved vegetable cutter."

"What I claim as my invention, and desire to secure by Letters Pantent, is, the combination of the eccentric rod *k*, arranged substantially as described, with the pivoted or adjustable bed B, which bears the knife G, for the purposes herein specified."

No. 22,640. Hugh Gerred, of Sparta, Ill., for an "Improved cattle pump."

"I do not claim broadly a valvular bucket attached by a pulley to a platform, irrespective of the arrangement of the parts herein shown and described, for such device has been previously used, and may be seen in the device of Jared Ayers, patented April, 1856, but I do claim as new, and desire to secure by Letters Patent, the arrangement and combination of the guides *f*, bucket D, (the latter having a valve *c*, clasp *d*, and spring *e*,) the trough F, platform E, and wheels (*m*, *l*, *i*, *g*,) as and for the purposes herein shown and described."

No. 22,641. Henry Goulding, of San Francisco, Cal., for an "Improved steam valve."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, supplying the working cylinder of the engine or machine, each successive stroke with its impelling gas or vapor, from reservoirs previously charged therewith, and under the control of a valve or valves, essentially as set forth, the same serving as a substitute for a 'cut-off' to work the gas expansively, in the manner described. 2nd operating a valve, in part or in whole, by the gas or steam, at full pressure, from the supply pipe acting to propel it in the one direction, when the same is used in concert with an opposing force, to the valve, produced by the expansion of the gas in its passage to or performance of its work, substantially as specified. 3rd, the combination of the valve B and valve cylinder or case A, with its reservoirs E, F, and the several inlets or outlets for action together, in the manner described, and whereby the one valve B is made to govern the ingress and egress of the gas to or from the reservoirs, as well as to control the inlet and exhaust of the working cylinder, as herein set forth."

No. 22,642. Rensselaer D. Granger, of Philadelphia, Pa., for an "Improvement in heating apparatus."—Ante-dated 24th November, 1858.

"I do not claim broadly an air chamber situated in a casing and exposed to the action of the fire within the same, as such a device has been heretofore used; but I claim, and desire to secure by Letters Patent, combining the air chamber G with the separate perforated chamber H, having an independent communication with the air, substantially as herein set forth, so that the said perforated chamber may serve the double purpose of consuming the gases arising from the ignited fuel, and of preventing the rapid destruction of the bottom of the chamber G by the action of the fire."

No. 22,643. Rensselaer D. Granger, of Philadelphia, Pa., for an "Improvement in coal stoves."—Ante-dated 24th November, 1858.

"I claim, and desire to secure by Letters Patent, hanging within the stove and immediately above the fire a perforated chamber H, when so constructed and arranged that the air shall have free access to the interior of the said chamber, and when the latter shall admit of being readily raised and lowered, or its position in regard to the fire, otherwise altered, for the purpose specified."

No. 22,644. Robt. Gray, of Anson, Me., for a "Fish trap."

"What I claim as my invention, and desire to secure by Letters Patent, are, the strainer (Fig. 3), the vibrating slats T, T^1, and the V-shaped chambers V, V^1, all in the manner and for the purposes substantially as set forth in the above specification."

No. 22,645. Benjn. F. Grinnell, of New York, N. Y., for a "Fastening for breast pins, &c."

"I claim, and desire to secure by Letters Patent, the permanent hook D and spring E, in combination with the hinged pin C of a breast pin or other article of jewellery, when the spring is so bent as to direct the pin, when the latter is depressed, into the hollow of the hook, and when the spring and hook are otherwise arranged in respect to each other, substantially as herein set forth."

No. 22,646. John H. Griscom, of New York, N.Y., for an "Improvement in house ventilation."

"What I claim as my invention, and desire to secure by Letters Patent, is, the employment of an auxiliary flue or tube, connecting the hot-air flue with the ventilating flue, in the manner and for the purpose proposed."

No. 22,647. John M. Hall, of Warrenton, Ga., for an "Improvement in cotton cultivators."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, in combination with the series of adjustable revolving hoes, the scrapers K, K, in advance of them, substantially in the manner and for the purpose described."

No. 22,648. Lyman P. Harris, of Mansfield, Ohio, for an "Improvement in apparatus for evaporating saccharine juice."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1, the stationary, yet portable, fire-place B, with its stops C, C, and springs H. 2, I claim the portable movable, and inclined furnace A, and its combination with the stationary fire place. 3, I claim the handles M, and their springs L, and their combination with the springs H, also the rod F, or its equivalent. 4, I claim the racks O, and their combination, also the movable flue or plate P, and its rod R, and their combinations with the movable furnace A, and stationary fire place B. 5, I do not claim the heater 8, nor evaporator 10, as my invention; but I claim as an improvement, the application of one or more strainers 2 and valves 1 to the heater and evaporator."

No. 22,649. Theodore Heermans, of Mitchellsville, Tennesee, for an "Improvement in coffee roasters."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, the within specified arrangement of the plates or shelves D, D^1, for the purposes set forth. 2nd, the combination of a window or windows in one or both ends of a coffee roaster, with the inclined elevating plates or shelves, substantially as and for the purposes set forth."

No. 22,650. John L. Hoag, of Genoa, Ill., for an "Improvement in corn planters."

"Having thus described my invention, I claim, and desire to secure by Letters Patent, the arrangement and combination of the arm (*g*), lever K, and bar H, said lever serving as an oblique brace to hold the bar H, (as is shown in Fig. 2,) as and for the purposes set forth. I also claim the arrangement and combination of the lever (*h*), slide (*i*), lever (*j*), upright Q, bar P, and swinging frames O, M, as and for the purposes herein shown and described."

No. 22,651. Mark W. House, of Cleveland, Ohio., for an "Improvement in revolving harrows."

"Having thus fully described my invention, what I claim and desire to secure by Letters Patent, is, the combination with the spindle of a revolving harrow, of the cap *e* and box *d*, for the purpose and substantially in the manner described."

No. 22,652. James Hughes and Nathan Stonecipher, of Cambridge, Ind., for an "Improvement in corn planters."

"We claim as new, and of our invention herein, the described arrangement of the gravitating trigger H. connecting rods I, perforated slide F, hoppers *e* and e^1, and scorer D, operating as described, to deposit seed at each pressure and relaxation of the thumb of the driver."

No. 22,653. John H. Irwin, of Carlinville, Ill., for an "Improved cattle pump."

"I do not claim the use of rising and falling platforms, separately considered; but I do claim as new, and desire to secure by Letters Patent, the platforms B, B^1, weight F, drum C, and pulley D^1, placed loosely on drum C, and connected with it by the pall *c* and ratchet *b*, the whole being combined and arranged to operate as and for the purpose set forth."

No. 22,654. Wm. Johnston and Hugh Forbes, of Brooklyn, N.Y., for an "Improvement in composition for lining metal pipes."

"We do not claim inserting an india rubber, gutta percha, or equivalent pipe, previously made into a metallic pipe; nor do we claim the apparatus by which it is applied; but what we claim, and desire to secure by Letters Patent, is, the composition of matter, substantially as set forth, for lining metallic or other pipes or surfaces of a similar kind, substantially as set forth."

No. 22,655. Wm. F. Ketchum, of Buffalo, N.Y., for an "Improvement in harvesters."

"Having thus described my invention, and some of its advantages, I will remark that I do not here claim the use of a cap or an opening in the guard tooth, generally to prevent clogging; but I claim the combination of the openings in the guard tooth below the cutters, with the caps above the cutters, substantially as described."

No. 22,656. Henry A. Landry, of Camden, N. J., assignor to R. G. Ransford, of Troy, N. Y., for an "Improvement in R. R. chairs."

"What I claim as my invention, and wish to secure by Letters Patent, is, the improvement of a projecting piece of metal, either cast on the rail-road chair, or made of wrought iron or steel, and affixed, and rising up alongside of the rails on railroads, where two rails meet, and of sufficient height to receive all or a part of the weight of the machinery, while passing over that particular part of the rails, as herein described, disclaiming any right to any particular form or pattern of chair to which my improvement may be applied."

No. 22,657. Wm. Layland, of Mixerville, Ind., for an "Improvement in car couplings."

"What I claim as my invention, and desire to secure by Letters Patent, is, the employment of the combined adjustable latch and catch (F, T,) when constructed and operated substantially as herein described for the purposes set forth.

No. 22,658. Joseph Leeds, of Philadelphia, Pa., for an "Improvement in ventilating registers."

"Having thus fully described the nature of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, in combination with a register, the hanging of the valve A by its center, as shown, so as to make said valve a regulator or cut-off to the ascending current of air from N to M, and at the same time a regulator of the ingress or the egress of air to or from an apartment, and thus causing a register to serve the purpose of a ventilator, as herein described."

No. 22,659. Ferdinand Lehr, of Hoboken, N. J., for an "Improved machine for bending umbrella ribs."

"I do not claim a mandrel around which the wire is bent by a revolving stub, as such mandrel has been affixed to the shaft carrying the revolving stub. In that case, however, difficulty existed in removing the spoke or rib when bent from off the said mandrel, but by my machine the mandrels and bending stubs withdrawing from each other, and the mandrels pulling out of the holes or eyes, this difficulty is avoided. What I claim as my invention, and desire to secure by Letters Patent, is, first, a reciprocating pincer taking the wire from a fixed, and drawing the same through the machine, dropping from said wire, and then returning below to its previous position, so as to be out of the way of the bending or coiling of the wire into eyes or loops, as set forth. Second, I claim attaching said pincers on a traveling carriage by one side thereof, while the power for sliding said pincers lengthwise of the machine is applied to the other jaw, whereby the clamping and releasing of the wire is effected by the act of moving said pincers, as set forth. Third, I claim attaching one end of said pincers on a stud or shaft, in combination with the stops 6 and 7, spring 9, and slotted connecting link *f*, whereby the sliding, clamping, depressing and elevating motions are given to the pincers by the reciprocations of said rod *f*, as set forth. Fourth, I claim the shear *i*, i^1, receiving the compound motion set forth from the cams (*h* and 10), in the manner and for the purpose specified. Fifth, I claim the clamping levers *k*, k^1, in combination with the ledges 13, 14, and shafts *p*, p^1, that press against and hold the wire while the loops are being formed, as set forth. Sixth, I claim the mandrels in combination with the turning shafts and stubs, when the said mandrels are projected from the blocks, or their equivalents, for the wire to be bent around the same to form the loops or eyes in the spokes or ribs, and withdrawn from said eyes when the same have

been bent, substantially as set forth. Seventh, I claim the arrangement of the sliding bar l, and the connections therefrom, to the clamping levers k, k^1, and slides m, m^1, whereby the clamps and mandrels z are simultaneously actuated, as set forth. Eighth, I claim the sliding stocks o, o, carrying the shafts p and turning stubs, for allowing the withdrawal of said stubs out of the way of the traveling pincers, substantially as set forth; and in combination therewith I claim the bar n^1, and connections therefrom to said stocks o, o, for communicating endwise motion to said stock, for the purpose and as specified. Ninth, I claim the sliding mandrel Z^1 and turning shaft p, 2, connected as set forth, in combination with the jaws 32, or their equivalents, for turning the eye or loop in the end of the spoke or rib, as described and shown. Tenth, I claim the arrangement of the cranks q & t, and slotted connecting rods q^1, t^1, for communicating motion successively to the slides r, and u^1, and from the same to the turning stubs or loop formers, as set forth."

No. 22,660. Joseph Mansfield, of Jefferson, Wis., for an "Improvement in milk coolers."

"What I claim as my invention, is, the improved portable milk cooler, when constructed in the manner and for the purpose set forth."

No. 22,661. Richard Mansley, of Philadelphia, Pa., for an "Improvement in hemp brakes."

"I do not claim broadly, the employment in hemp brakes of horizontally moving slides with bars so situated that the hemp may be presented vertically to the machine, as such a device has been heretofore used; but I claim and desire to secure by Letters Patent, operating the horizontal slide D, with its transverse bars, by the cam H, arm G, and spring J, when arranged substantially as described, and when the said spring is so graduated that the slide shall instantly recede, after reaching the limit of its outward movement, as and for the purpose herein set forth."

No. 22,662. Richard Mansley, of Philadelphia, Pa., for an "Improvement in machinery for tarring oakum."

"I claim and desire to secure by Letters Patent, the perforated vessel F, or its equivalent, placed within a stationary vessel D, which contains the compound for tarring oakum, a jet of steam being admitted to the stationary vessel, while a reciprocating motion is imparted to the perforated vessel, as and for the purpose herein set forth."

No. 22,663. Benjn. A. Mason, of Newport, R.I., for an "Improved horse-shoe nail machine."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the four hammers arranged in pairs, the two constituting each pair being mounted to strike simultaneously and in opposite directions, and the two pairs working at right angles with each other or nearly so, substantially as described and for the purpose set forth. And I also claim the employment of an elastic bush, in the connection of the hammers with the cranks by which they are operated, substantially as and for the purpose set forth."

No. 22,664. Charles Monson, of New Haven, Conn., for an "Improvement in holders for lamps."

"I claim the mode or means substantially as herein-before specified, of counterbalancing the system of levers or lazy tongs, or the same and one or more articles suspended from or supported by them, and this, whether the counterbalance weight be applied so as to push or pull on the levers of the lazy tongs as explained. I also claim the method substantially as described of steadying the tube or rod e, or its equivalent suspended or extending from the lower termination of the system of crossed levers or lazy tongs, viz., by the collar or slide p, the levers o, o, and the connections f, g, applied to the part e, and the lazy tongs, and made to operate essentially as herein-before specified."

No. 22,665. Richd. Montgomery, of New York, N. Y., for an "Improved mode of constructing a combined street pavement and R. R. track."

"Having described my combined pavement and track, what I claim therein as new, and of my invention, and desire to secure by Letters Patent, is, a combined street pavement and rail-road track, constructed substantially as shown and described."

No. 22,666. Henry S. North, of Middletown, Conn., and Edwd. Savage, of Cromwell, Conn., for an "Improvement in revolving fire-arms."

"We are aware that many applications of packing rings or thimbles have been made to breech loading fire-arms, to be acted upon by the force of the explosion, to close the joint between the chamber and breech; and that application has been made to fire-arms of the same kind of a thimble to be acted upon by similar agency, to close a joint between the chamber and barrel. We therefore disclaim entirely the use of rings or thimbles, when not applied as herein described, in combination with a rotating chambered cylinder, having also a longitudinal movement. But what we claim as our invention, and desire to secure by Letters Patent, is, 1st, the employment of the movable cylindrical bushings or thimbles b, b, applied substantially as herein described, within cavities i, i, formed in the front portions of the chambers of a rotating chambered breech, which has a longitudinal movement to operate and be operated upon, substantially as herein specified, in combination with a valve-like seat e, e, which is formed upon the rear of the barrel. 2d, the combination of the slide F, working in the bottom of the cylinder frame A, and the double-jointed trigger guard D, E, part of which constitutes also part of a lever, through whose agency the rotation of the cylinder and cocking of the hammer are effected, the whole operating substantially as and for the purpose herein specified."

No. 22,667. John K. O'Neil, of Kingston, N. Y. for an "Improved wash board."

"What I claim as my invention, and desire to secure by Letters Patent, is, the flexible rubber B, constructed as described, and combined with the wash board A, so that its upward movement shall be assisted by a spring, or its equivalent, arranged substantially as specified."

No. 22,668. Benjn. Payn, of Albany, N. Y., for an "Improvement in coloring and curing tobacco stems."

"What I claim as my invention, and desire to secure by Letters Patent, is, coloring and curing tobacco stems at one operation, by subjecting them to the action of steam, as and for the purposes herein set forth."

No. 22,669. Thos. Payne, of Ridgefield, Conn., for an "Improved clothes sprinkler."

"Having thus fully described the nature of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, a clothes sprinkler having an interior self-closing stopper, and made and operating substantially in the manner and for the purpose herein set forth."

No. 22,670. Saml. Pierce, of Troy, N. Y., for an "Improvement in furnaces."

"Having fully described my invention, what I claim as new therein, and desire to secure by Letters Patent, is, the series of detachable or removable heat radiating plates J, J, constructed with points or stems a, a, projecting from their surfaces, both of the surfaces being radiating surfaces, in the manner and for the purposes substantially as herein described. Also, in combination with a horizontal fire box and fire chamber, and the outer casing K, I claim a series of plane heat radiating plates, or a series of corrugated heat radiating plates, arranged substantially in the manner and for the purposes as herein described."

No. 22,671. Saml. F. Pratt, of Roxbury, Mass., for an "Improved carpet sweeper."

"I claim, in combination with the case A and the rotary brush B of a carpet sweeper, a serrated or toothed clearer E, applied so as to cleanse the brush, during and by its revolutions. I also claim the arrangement of serrated or toothed clearers on opposite sides of the brush, in order that it may be cleansed while being rotated in either direction. I also claim the arrangement of the serrated clearer, in the case of the carpet sweeper, in such manner, that the said clearer shall form part of or be maintained by the dust receptacle. I do not claim the application of a single elastic tired driving wheel to the driving wheel affixed on the brush shaft; but claim the arraugement of two of the elastic tired wheels on opposite sides of the driving wheel of the brush shaft, as described, and so applying the said shaft in the case, and to the fork of the handle, as to enable the brush wheel to be forced in close contact with its drivers, not only when the machine is moved in either direction, but by the force exerted through the handle, and to so move the machine, the same ensuring the rotary motion of the brush, whenever the machine may be in the act of being moved on and over a carpet."

No. 22,672. R. B. Prindle, of Coventry, N. Y., for an "Improved mode of attaching thills to vehicles."

"Having thus fully described my improved method of attaching shafts to vehicles &c., what I claim as new, and desire to secure by Letters Patent, is, the flange on the bolt

or pin, so made and inserted that it cannot be removed when the joint is varied from the position in which the bolt is introduced."

No. 22,673. Wm. W. Purdy, of Liverpool, Ohio, for an "Improvement in rolling and pressing wool."

"What I claim as new, and desire to secure by Letters Patent, is, the combination of the sectional rollers I and I¹, with the straps F and breast piece E, for the purpose of rolling and pressing fleeces of wool, as herein described."

No. 22,674. John W. Riggs, of New York, N. Y., for an "Improvement in truss springs."

"I claim constructing springs for trusses in the manner and for the purposes substantially as set forth herein."

No. 22,675. E. K. Root, of Hartford, Conn., for an "Improved method of packing cartridges."

"Having fully described my improved method of packing or holding cartridges, and not wishing to confine myself to any exact shape of package, peculiar mechanical construction of box or arrangement therein of the cartridges and caps, what I claim as new, and desire to secure by Letters Patent, is, packing or putting up cartridges between two blocks, or their equivalents, substantially as herein-before described. I also claim forming in the package or holder, herein-before described, a receptacle or receptacles for containing caps or other primings, substantially as described."

No. 22,676. John F. Seaman, of Clyde, N.Y., for an "Improvement in seeding machines."

"I do not claim the distributing device formed of seed cells *f*, made in a cylindrical head *e*, in connection with cut-off brushes *h*, for this is an old and well-known device, neither do I claim broadly rotating covering shares, irrespective of the construction and arrangement herein shown; but having thus described my invention, what I do claim as new, and desire to secure by Letters Patent, is, operating the seed distributing device, by means of the part *b* of the handle C¹, attached by a pivot *d* to the other part *c* of said handle, and connected at its lower end to the shaft E by a cord or chain *i*, the above parts being used in connection with the spring F, attached directly to the other handle C of the implement, and to the shaft E by a cord or chain *k*, the whole being arranged substantially as and for the purpose set forth."

No. 22,677. Solomon Shetter, of Allegheny, Pa., for an "Improved horse-shoe machine."

Having thus described my improvement and its operation, what I claim as of my invention, and desire to secure by Letters Patent of the United States, is,—First, the curved arms (*w* 1) of clamps (*s*), moved and operated by the friction rollers (2) and the backward and forward movements of table (*c*), when the clamps (*s*) are used in connection with the dies (*t*) and (*w*), as herein described, and for the purpose set forth. Second, the use of the flexible strip (*n*), for the purpose of operating the clearer (*u*) as herein described, and for the purpose set forth. Third, the arrangement on the upper surface of table (*c*) of ties (*t* and *w*), springs (*x*), the under jaw (*v*) of the shears, and the clearer (*u*), when used and operated in connection with the clamps (*s*), friction rollers (2), roll (*t* 1), shear (*d*), and swage (*f*), as herein described, and for the purposes set forth."

No. 22,678. Stephen Wm. Smith, of Brooklyn, N.Y., for an "Improved sweeping machine."

"Having thus described my improved machine for sweeping carpeted and other surfaces, I will state what I claim, and desire to secure by Letters Patent,—First, I claim the combination of the gears F and G, with the driving wheel, constructed and operating substantially as described, and for the purposes specified. Second, the method of adjusting the brush by the plate K, which admits of both vertical and lateral adjustment, as described and specified. Third, I also claim preventing the escape and rising of the dust by means of the flexible curtain L, arranged and operating substantially as described and specified."

No. 22,679. Benjn. F. Smith, of New York, N.Y., for an "Improvement in manufacture of white lead."

"What I claim as my invention, and desire to secure by Letters Patent, is, the manner of filling the chamber with metallic lead by means of the open work tables or racks, in which the lead in detached pieces rests, arranged one above the other in successive and close series, substantially as described, and whereby a more thorough and equal circulation of the fumes or gases amongst the lead is produced. I also claim constructing the converting chamber with an inclined bottom, substantially as and for the purposes set forth. I also claim the method herein described, of extracting from the converting chamber, the carbonate of lead and other incidental products, by means of a current or currents of water passing through said chamber from top and bottom, substantially in the manner and for the objects herein set forth. I also claim subjecting the carbonate of lead and other incidental products previous to their extraction from the converting chamber to the action of steam, substantially in the manner and for the purpose specified."

No. 22,680. Ferdinand M. Sofge, of Columbus, Ga., for an "Improvement in horse power."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the cogged wheel A, having the supporting flange No. 1, and the wheel B, with corresponding cogs and bearing revolving upon the supporting ring I, the whole constructed and operating substantially as and for the purpose above set forth."

No. 22,681. P. P. Stewart, of Troy, N. Y., for an "Improvement in cooking stoves."

"What I claim as my invention of improvements on the well known return flue stove herein specified is, in combination with a stove, such as described, making the front plate of the oven open with doors, and an apron to receive and hold a tin kitchen or roaster, substantially as specified, that the heat radiated by the front plate of the fire chamber may be aided by the heat radiated by all the oven plates, as specified, when combined with an end door, whereby the draught may be controlled without the aid and independent of the front doors. And I also claim the boiler having a removable cover, and two inclined flues, which are separate at the lower end united into one at top to connect with the chimney, substantially as described, in arrangement with the exit flue space to which the boiler is fitted, and into which the gaseous products of combustion are discharged from the series of direct and return flues, substantially as and for the purpose specified."

No. 22,682. W. M. Waggoner, of Middletown, Ind., for an "Improvement in devices for gathering grain into gavels."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the stationary fingers E, E, G, G, and the fly or gathering fingers H, H, attached to a suitable framing or stancheons mounted on wheels, and arranged to operate substantially as and for the purpose set forth."

22,683. Louis B. Wakeman, of Baltimore, Md., for an "Improvement in devices for reefing sails."

"What I claim as my invention, and desire to secure by Letters Patent, is, the employment of the smooth surfaced clamp E, E¹, as described, when in combination with the forked screw bolt 5, or its equivalent, carrying the blocks through which the rolling halyards d^1, d^1, pass, for the purposes set forth. I also claim giving direction to windlass ropes *d*, *d*, by the bent arm *b*, when in combination with the clamp E, E, and forked screw bolt 5, when fitted with an ordinary block, operating in the manner and for the purposes set forth."

No. 22,684. Wm. M. Whiteley and Andrew Whitely, of Springfield, Ohio, for an "Improvement in harvesters."

"What we claim as our invention, and desire to secure by Letters Patent, is, a finger, so constructed that the slot or opening above the cutters shall increase in capacity from front to rear, in combination with the clearing projection described, passing directly into the rear corner of said opening, in the manner described, for the purpose specified. We also claim forming the clearing projections of a bent extension of the cutter, substantially as herein-before described."

No. 22,685. John Young, of West Galway, N. Y., for an "Improvement in R. R. chairs."

"There may be modifications of my construction, therefore, I do not design to confine myself to the precise devices shown; I claim the combination of bearing surfaces *a*, capable of forming any desired angle with each other, and the securing portion a^1 of the chair, substantially as and for the purpose set forth."

No. 22,686. Joseph Bloom, of Philadelphia, Pa., assignor to R. E. Rogers, of said Philadelphia, for an "Improvement in umbrella frames."

"Having thus fully set out my invention, what I claim as new in the construction of umbrella and parasol frames, and desire to secure by Letters Patent, is,—1st, the bow or rib, constructed substantially as described. I am aware that the

bow or rib, and the brace, or sustaining rod, have been attached to collars upon the standard by a piece of metal having an enlarged end affixed to the end of the bow or rib, and a like piece of metal affixed to the end of the brace, the enlarged end fitting into a slit of a sheet metal collar, the flange of which must be swaged down upon the enlarged end, in order to hold it in place, and I therefore do not claim this method; but I do claim, 2d, connecting the bow or rib, and the brace, or sustaining rod, to the collars upon the stem or standard, by the means herein set forth. I am also aware, that the end of the brace or sustaining rod has been connected to the bow or rib, by the end of the brace being riveted to a band, which may be sprung into a groove in the inner surface of the bow or rib, and I therefore do not claim this method of connecting the two parts here named; but what I do claim, is, 3d, connecting the brace or sustaining rod to the bow or rib, by the spring band embracing the bow, as herein set forth."

No. 22,687. Franz Anton Lohage, of Unna, Prussia, assignor to Edmund Leopold Bewzon, of Boston, Mass., for an "Improvement in the manufacture of steel."— Patented in England, 29th January, 1850.

"I would observe that the commencement of the above process, that is, the fusing and boiling the pig iron, is similar to the operation usually carried on in the puddling furnace in the manufacture of wrought iron; I do not, therefore, intend to claim such part of the process; but what I desire to claim as new and of my invention, in the above described process, is, regulating the heat and stopping the decarbonization of the fused mass of metal in the finishing process in the puddling or reverberatory furnace, as set forth, before it becomes converted into malleable or wrought iron, and whereby I obtain steel, in the manner herein specified."

No. 22,688. Nelson Orcutt, of Binghamton, N. Y., assignor to himself and G. W. Gregory, of said Binghamton, for an "Improved paddle-wheel."

"What I claim as my invention, and desire to secure by Letters Patent, is, the centrally suspended paddle or bucket without any stop, means, difference of area, or of weight, for holding it in a working position, but left entirely to the action of the forces exerted upon it during the revolution of the wheel, as herein set forth."

No. 22,689. Hamilton E. Smith, of Philadelphia, Pa., assignor to himself, B. B. Nelson, of Cortland Co., N. Y., and John L. Myers, of Chemung Co., N. Y., for an "Improved grain fan and corn sheller."

"I do not claim, broadly, combining a grain fan and a corn sheller in one instrument; but I claim, and desire to secure by Letters Patent, arranging the spiked roller C and slotted shield D of a corn sheller on the frame of a grain fan, in respect to and in combination with the seive frame E, blower G, and inclined plane J of the said grain fan, in the manner herein described, so that the said blower, sieve, frame, and inclined plane, may serve the purpose of separating the cobs from the shelled kernels of corn, and the latter from the chaff and other refuse."

No. 22,690. Cyrus B. Thayer, of Boston, Mass., assignor to himself and Charles Robinson, of Cambridgeport, Mass., for an "Instrument for turning the leaves of music books, &c."

"What I claim as my invention, and desire to secure by Letters Patent, is, the double holding cords E, E, E, elastic springing cords G, G, G, or their equivalents, back B, provided with clamps C, D, and notch or catch *b*, and the curved concentric rod or way F, arranged and operating in connection with and in relation to each other, substantially in the manner and for the purpose herein specified. I also claim the escapement catch H, constructed, arranged, and operating in connection with the curved rod F, and thimble of the holding cords E, E, E, substantially as described."

Re-issue.

Geo. Neilson, of Boston, Mass., for an "Improvement in ventilating window for rail road cars."— Patented 30th May, 1854.—Re-issued 18th January, 1859.

"Claims.—The converging ventilating window, as made with deflecting and light penetrating sides or surfaces, and an air opening, and a closing window or cover, essentially as above explained, and to be applied to the opening of a side of a railway car, substantially as specified. And I claim the arrangement of a deflector guard entirely around the window opening, and in respect to the deflecting sides as specified, not intending to claim a deflector or guard as applied to a car window opening, but to claim its arrangement on four deflecting sides or plains, and entirely around the opening between them, as set forth."

Design.

James R. Hyde, of Troy, N. Y., for a "Design for cooking stove."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, ornamenting the doors, front plate, side plates, and feet of cooking stoves, as herein specified and represented in the annexed photographic drawing."

Additional Improvement.

John Keezer, of Chillicothe, Ohio, for an "Improvement in hominy mortars."—Patented 2nd March, 1858.—Additional Improvement, dated January, 1858.

Claim.—"What I claim, and desire to secure by Letters Pateut, is, the application and combination of the slide, with its spring, and roughening of the lower end of the pestle, for the uses and purposes specified and substantially set forth."

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 532. TUESDAY, FEBRUARY 8, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given that

2169. JOHN MANNING, of Cambridge, Engineer, and THOMAS PAUL, of Houghton, in the county of Huntingdon, Miller, have given notice at the Office of the Commissioners of their intention to proceed with their application for Letters Patent for the invention of "An improved stone staff to be used in dressing millstones."

As set forth in their petition, recorded in the said office on the 29th day of September, 1858.

2173. And THOMAS BRITT, of No. 9, St. Thomas Terrace, Church Street, Old Kent Road, Camberwell, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "An improvement in the propelling of steamboats."

2174. And JOSEPH WRIGHT, Engineer, of Birmingham, in the county of Warwick, has given the like notice in respect of the invention of "Certain improvements in the mode of arranging and moving fire-bars for locomotive puddling and other furnaces."

As set forth in their respective petitions, both recorded in the said office on the 30th day of September, 1858.

2189. And Sir EDWARD BELCHER, of No. 40, Charing Cross, has given the like notice in respect of the invention of "Improvements in the manufacture of telegraphic cables."

As set forth in his petition, recorded in the said office on the 1st day of October, 1858.

2192. And JOSEPH ROGERS, of No. 9, Queen Square, Bartholomew Close, in the city of London, Rope Maker, has given the like notice in respect of the invention of "Improvements in submarine electric telegraph cables."

2194. And WILLIAM BRIERLEY the elder, of Cleckheaton, in the county of York, Machine Maker, has given the like notice in respect of the invention of "Improvements in looms for weaving carpets and other fabrics."

2197. And HENRY GEORGE COLLINS, of Paternoster Row, in the city of London, has given the like notice in respect of the invention of "Improvements in the production of blocks or surfaces to be used in printing."

As set forth in their respective petitions, all recorded in the said office on the 2nd day of October, 1858.

2211. And JOHN HARCOURT BROWN, of the Abbey Mills, Romsey, in the county of Hants, has given the like notice in respect of the invention of "Improvements in the manufacture of projectiles."

2216. And MORITZ JACOBY and FREDERIC RAINFORD ENSOR, of Nottingham, have given the like notice in respect of the invention of "Improvements in the manufacture of bobbin net or twist lace, and other fabrics made in twist lace machines."

As set forth in their respective petitions, both recorded in the said office on the 5th day of October, 1858.

2219. And GEORGE COLLIER, of Halifax, in the county of York, has given the like notice in respect of the invention of "Improvements in winding machines."

As set forth in his petition, recorded in the said office on the 6th day of October, 1858.

2243. And CHARLES WILLIAM LANCASTER, of New Bond Street, in the City of Westminster, Gun Maker, has given the like notice in respect of the invention of "A metal or metallic alloy, especially adapted to the manufacture of fire-arms and ordnance."

As set forth in his petition, recorded in the said office on the 8th day of October, 1858.

2249. And Charles Edward Bull, of Wells, in the county of Norfolk, Gentleman, has given the like notice in respect of the invention of "An apparatus for containing and preserving articles of value from loss or damage in cases of shipwreck."
As set forth in his petition, recorded in the said office on the 9th day of October, 1858.

2275. And Jean Alexandre Gasse, of Paris, in the empire of France, Merchant, has given the like notice in respect of the invention of "Improvements in railway breaks, and in apparatus for working the same."

2277. And Maurice Sautter, of Paris, Boulevart Montmartre, 14, has given the like notice in respect of the invention of "Improvements in air-engines."—A communication from Mr. Joseph Gill, resident at Marsala, Sicily.
As set forth in their respective petitions, both recorded in the said office on the 12th day of October, 1856.

2279. And Henry Parker, of Sledmere Castle, in the East Riding of the county of York, Farmer and Land Agent, has given the like notice in respect of the invention of "An improved apparatus for the cultivation of land and other agricultural operations."
As set forth in his petition, recorded in the said office on the 13th day of October, 1858.

2298. And William Edward Newton, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "An improved construction of cabin or state-room for steam-boats and other vessels."—A communication.
As set forth in his petition, recorded in the said office on the 14th day of October, 1858.

2308. And Laurent Marcus, of the Province of Algiers, in Africa, now in Paris, Gentleman, has given the like notice in respect of the invention of "An improved reaping machine."
As set forth in his petition, recorded in the said office on the 16th day of October, 1858.

2363. And Richard Waller, of No. 50, Baker Street, Portman Square, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in obtaining motive power, and in apparatus connected therewith."
As set forth in his petition, recorded in the said office on the 22nd day of October, 1858.

2398. And Thomas Almond, of No. 22, Pickering Place, Paddington, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improvements in furnaces for the better combustion of smoke."
As set forth in his petition, recorded in the said office on the 27th day of October, 1858.

2412. And Pierre Brunon, of Paris, France, Manufacturer, has given the like notice in respect of the invention of "An improved mode of manufacturing cocks."
As set forth in his petition, recorded in the said office on the 29th day of October, 1858.

2553. And Manuel Leopold Jonas Lavater, of the Strand, in the county of Middlesex, India Rubber Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture of mats, coverings for floors and other surfaces, and other cellular articles when india-rubber compounds are used."
As set forth in his petition, recorded in the said office on the 13th day of November, 1858.

2592. And Richard Archibald Brooman, of No. 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improvements in apparatus for the manufacture of lace and net."—A communication from Messieurs A. Grivel, jun., and J. F. V. Mouilleron, both residing in Paris.
As set forth in his petition, recorded in the said office on the 17th day of November, 1858.

2674. And Rudolph Bodmer, of No. 2, Thavies Inn, Holborn, London, has given the like notice in respect of the invention of "Improvements in valves for regulating the supply of steam."—A communication.
As set forth in his petition, recorded in the said office on the 25th day of November, 1858.

2734. And John Coulson, of the firm of J. and W. Midworth, of Newark, in the county of Nottingham, Engineers, has given the like notice in respect of the invention of "Improvements in threshing and dressing machines."
As set forth in his petition, recorded in the said office on the 30th day of November, 1858.

2762. And Thomas Bailey, of New Orleans, United States, and of 17, Russell Street, Birmingham, in the county of Warwick, Gun Manufacturer, has given the like notice in respect of the invention of "A mechanical movement applicable to loading fire-arms and other purposes."
As set forth in his petition, recorded in the said office on the 3rd day of December, 1858.

2966. And John Sinclair, of the city of Dublin, Ireland, Turner and Fitter, has given the like notice in respect of the invention of "Improvements in pistons."
As set forth in his petition, recorded in the said office on the 28th day of December, 1858.

74. And Thomas James Claxton, of the city of Montreal, Canada, Merchant, has given the like notice in respect of the invention of "Improvements in the manufacture of boots and shoes."—A communication from Mellen Bray, of Montreal aforesaid, Boot and Shoe Maker.
As set forth in his petition, recorded in the said office on the 10th day of January, 1859.

117. And William Wilson, of Newcastle-upon-Tyne, Hat Manufacturer, has given the like notice in respect of the invention of "Improvements in machinery for felting bodies of hats and bonnets."—A communication from abroad by J. S. Taylor, of Danbury, Connecticut, United States of America.
As set forth in his petition, recorded in the said office on the 13th day of January, 1859.

155. And Richard Bradley and William Craven, of Westgate Common Foundry, Wakefield, in the county of York, Engineers, have given the like notice in respect of the invention of "Improvements in machinery or apparatus for manufacturing bricks, tiles, and other similar articles."

As set forth in their petition, recorded in the said office on the 18th day of January, 1859.

161. And Thomas Clarke, of Litchurch Lane, near Derby, in the county of Derby, and of Staveley, in the county of Derby, Moulder, have given the like notice in respect of the invention of "Improvements in the manufacture of core barrels for pipes or columns used either for railway piles or columns, or for water pipes or sewerage pipes."

As set forth in his petition, recorded in the said office on the 19th day of January, 1859.

170. And James Croft Reid, of Liverpool, in the county of Lancaster, Master Mariner, and William Milner, of the same place, Manufacturer, have given the like notice in respect of the invention of "Certain improvements in the construction of ships and vessels."

171. And Harvey Hilliard and Thomas Chapman, Cutlery Manufacturers and Patentees of the 'Furbator,' of Glasgow, in the county of Lanark, North Britain, have given the like notice in respect of the invention of "Improvements in table knives, and in table-knife sharpeners."

172. And Abraham Lindo, of Batignolles, in the French empire, Chemist, has given the like notice in respect of the invention of "Improvements in manufacturing soap."

178. And Thomas Greenwood, John Batley, and Jacob Dockray, of Leeds, in the county of York, Machinists, have given the like notice in respect of the invention of "Improved machinery for converting hemp and flax fibres into yarn, twine, ropes, and cordage."

As set forth in their respective petitions, all recorded in the said office on the 20th day of January, 1859.

188. And John Hick and William Hargreaves, of Bolton-le-Moors, in the county of Lancaster, Engineers, trading under the firm of Benjn. Hick and Son, have given the like notice in respect of the invention of "Improvements in the construction of steam boilers."

194. And James Hill Hume, of Broughty Ferry, in the county of Forfar, North Britain, Baker, has given the like notice in respect of the invention of "Improvements in warming apparatus for the feet."

As set forth in their respective petitions, both recorded in the said office on the 21st day of January, 1859.

205. And William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improved machinery for cutting files."—A communication from Milton D. Whipple, of the United States of America.

207. And Christian Sharps, of Philadelphia, in the state of Pennsylvania, United States of America, Manufacturer of Fire-Arms, has given the like notice in respect of the invention of "Improvements in breech loading repeating fire-arms."

As set forth in their respective petitions, both recorded in the said office on the 22nd day of January, 1859.

And notice is hereby further given, that all persons, having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

8th February, 1859.

1812. Thomas Goode Messenger, of High Street, Loughborough, in the county of Leicester, Horticultural Builder and Plumber, for an invention of "Improvements in the manufacture of garden engines, which are also applicable to fire or other engines."—Dated 9th August, 1858.

1839. Alexander John Paterson, of Edinburgh, Esquire, for an invention of "An improvement in propelling ships and vessels."—Dated 12th August, 1858.

1847. François Jules Manceaux, of Paris, in the empire of France, Manufacturer, for an invention of "Improvements in stocks for fire-arms."—Dated 13th August, 1858.

1931. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in bellows."—A communication from a Foreigner residing abroad.—Dated 26th August, 1858.

1947. William Kempe, of Holbeck Mills, Leeds, for an invention of "Improvements in apparatus used for winding woollen and other fabrics on rollers, in order to such fabrics being boiled or faced when on the rollers."—Dated 27th August, 1858.

1969. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in the construction of governors or regulators for steam engines."—A communication from William W. W. Wood and John Rice, both of the city of Philadelphia, state of Pennsylvania, United States of America.—Dated 30th August, 1858.

1973. Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for an invention of "An improved apparatus for mounting the driving bands of machinery in movement."—A communication from a Foreigner residing abroad.—Dated 31st August, 1858.

2003. August Guye, of Clerkenwell, in the county of Middlesex, for an invention of "Improvements in the escapement of chronometers and watches."—Dated 4th September, 1858.

2057. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "An improvement in water wheels."—Dated 10th September, 1858.

2187. Matthaeus Hipp, Technical Inspector of the Swiss Telegraphs, of Berne, in Switzerland, for an invention of "Improvements in electric telegraphs."—Dated 1st October, 1858.

2411. Walter Hall and Arthur Wells, both of Erith, in the county of Kent, India Rubber Web Manufacturers, for an invention of "Improvements in electric telegraph cables, and in machinery employed in the manufacture thereof."—Dated 28th October, 1858.

2653. Thomas Spencer, of the firm of John Spencer and Sons, of Newcastle-upon-Tyne, Steel and Spring Manufacturers, for an invention of "Improvements in the manufacture or construction of springs."—Dated 22nd November, 1858.

2757. William Robertson, of Dundee, in the county of Forfar, North Britain, Engineer, and James Guthrie Orchar, of the same place, Engineer, for an invention of "Improvements in machinery or apparatus for winding yarns or thread."—Dated 2nd December, 1858.

2905. James Soutter, of Edinburgh, in the county of Mid Lothian, Turner, for an invention of "Improvements in apparatus for drying or airing linen or other articles of wearing apparel."—Dated 18th December, 1858.

2953. Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for an invention of "An improved composition for the protection of certain metallic surfaces."—A communication from a Foreigner residing abroad.—Dated 27th December, 1858.

2957. John Shaw, of Manchester, in the county of Lancaster, Mechanic, for an invention of "A new mechanical combination called 'an indefinite feed movement.'"—Dated 27th December, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 5th February*, 1859, *inclusive.*)

4th February.

416. Stephen Fitchew Cox, of the city of Bristol, for an invention of "Improvements in the manufacture of leather and in the machinery for that purpose."—Dated 19th February, 1856.

5th February.

310. Michael Leopold Parnell, Patent Lock Manufacturer, of No. 283, Strand, in the parish of St. Clement Danes, in the county of Middlesex, for an invention of "An improvement in the construction of locks."—Dated 5th February, 1856.

327. James Edward Duyck, of Wandsworth, in the county of Surrey, Gentleman, for an invention of "Improvements in the manufacture of oil cake."—Dated 6th February, 1856.

343. John Elce and Samuel Fletcher Cottam, both of the city of Manchester, Machinists, for an invention of "An improved mode of lubricating the spindles of machinery used in preparing and spinning cotton and other fibrous materials, revolving in a lifting rail."—Dated 9th February, 1856.

354. William Horatio Harfield, of 113, Fenchurch Street, for an invention of "Improvements in the manufacture of metallic screw nuts."—A communication.—Dated 11th February, 1856.

358. George Tomlinson Bousfield, of Sussex Place, Loughborough Road, in the county of Surrey, for an invention of "An improvement in treating fats and oils."—A communication.—Dated 12th February, 1856.

Errata in Journal of 4th February.

151. For "Engineer" read "Esquire."

174. For "Herr Von Langen Royal" read "Herr Von Langen."

186. After "Surrey" add "Engineer."

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

FOREIGN PATENTS.

AUSTRIA.*

List of Patents for Inventions which were Delivered, Prolonged, and became Void during the Month of October, 1858.†

(Communicated by the Austrian Government.)

1. Patents Granted.

1. Georg Mayerhofer, of Graz, for "Manufacture of metal billiard cues."—1 year.—(Secret.)—Dated 6th October, 1858.

2. Ziegler Brothers, of Ruchla, near Eisenach, represented by Doctor Michael Melkus, of Vienna, for "A new construction of bowls of smoking pipes."—3 years.—(Secret.)—Dated 6th October, 1858.—(Saxen-Coburg Gotha Patent, 1st April, 1858; and Grand Duchy of Saxony Patent, 14th April, 1858.)

3. Carl Ventzke, of Berlin, represented by Dr. Max Von Schickh, of Vienna, for "A peculiar apparatus for pressing the juice from beetroot and other pasty fibrous substances."—1 year.—(Secret.)—Dated 6th October, 1858.

4. Ulysses Puech, of Paris, represented by Georg Märkl, of Vienna, for "A rectilinear self-acting knitting frame."—1 year.—(Public.)—Dated 6th October, 1858.

5. David Chlodwig Knab, of Paris, represented by Georg Märkl, of Vienna, for "Improvements in distilling coal, brown coal, peat, &c., and utilizing their sub-products."—1 year.—(Public.)—Dated 7th October, 1858.

6. Julius Thomas Belleville, of Paris, represented by Georg Märkl, of Vienna, for "A smoke-consuming grate with a continuous feeding apparatus."—1 year.—(Public.)—Dated 7th October, 1858.

7. Samuel Singer, of Vienna, for "A press and cutting machine for obtaining embossed lace-work of leather, silvered, gilt, or bronzed, and raised buttons on wooden and metal forms."—1 year.—(Secret.)—Dated 7th October, 1858.

8. Alois Thoma and Johann Hnewkosky, both of Brux, for "Apparatus for obtaining coke from common brown coal, and from coals unfit for that purpose, by removing the water and bitumen therefrom and mixing them with a plastic substance, said coke being applicable in metallurgical processes as a substitute for charcoal and the common coke of coal."—1 year.—(Secret.)—Dated 7th October, 1858.

9. Johann Christoph Endris, of Vienna, for "Improvements in the permanent way of railways."—2 years.—(Secret.)—Dated 7th October, 1858.

10. Ludwig Manzi, of Milan, for "Improvements in common and military ovens for baking bread and biscuits."—1 year.—(Public.)—Dated 7th October, 1858.

11. Gruber, of Vienna, for "A machine for manufacturing the elastic mountings of shoes, braces, porte-monnaies, &c."—1 year.—(Secret.)—Dated 7th October, 1858.

12. J. Carl Krise and Johann Krise, both of Carolinenthal, near Prague, for "Manufacture of hats and other felt articles by mixing wool with dressed fur of rabbits, cotton, and downy feathers."—2 years.—(Secret.)—Dated 7th October, 1858.

13. Eduard Nehse and Carl Nehse, both of Neustadt, on the Rubenberge, Hanover, represented by Dr. Claudius Ferdin. Höchsmann, of Vienna, for "Machines and apparatus for compressing peat, brown coal, and coal dust by a dry or wet process."—4 years.—(Secret.)—Dated 9th October, 1858.—(Hanoverian Patent, 17th March, 1858.)

14. Johann Jacob Guillet, of Paris, domiciled at Mflan, for "Obtaining an artificial lighting substance for domestic and industrial purposes from the residues of animal, vegetable, and mineral products."—1 year.—(Public.)—Dated 9th October, 1858.

15. Joseph Bailony, of Schwechat, Lower Austria, for "An expeditious mode of tanning sole-leather by means of a peculiar air-pump, mesh, and ooze of tannic acid, and an acid decoction of oak gall nuts, strengthened by spirit of wine."—1 year.—(Secret.)—Dated 12th October, 1858.

16. Joseph Francis, of New York, U.S. (represented by Dr. Claudius Höchsmann), of Vienna, for "Improvements in the manufacture of metal boats."—5 years.—(Secret.)—Dated 14th October, 1858.

17. Joseph Francis, of New York, U.S. (represented by Dr. Claudius Höchsmann), of Vienna, for "Construction of wagons, caissons, and other carriages, whereby they may be used for conveying soldiers and other objects by land and water."—5 years.—(Secret.)—Dated 15th October, 1858.

18. Robert Wilhelm Thode, of Dresden, represented by Eduard Schmidt, of Vienna, for "A machine and process for grinding fibrous substances for the manufacture of paper."—2 years—(Public.)—Dated 9th October, 1858.

19. Alexander Carl Paul Ludwig de Ville Chabrol, of Paris, represented by Martin, of Vienna, for "Improvements in sewing machines."—1 year.—(Secret.)—Dated 9th October, 1858.

20. Joseph Stoufs, of Vienna, for "Obtaining fast lithographic designs on fabrics."—1 year.—(Secret.)—Dated 9th October, 1858.

21. Napoleon Tettamanzi, of Turin, represented by Titus Ricordi, of Milan, for "A peculiar process

* For the Austrian Patent Law, see No. 291 of this Journal.

† In the case of inventions patented in other states as well as in Austria, the Specifications (whether described as "public" or not) may in most cases be consulted, or translations of them be had, at the Library of the Commissioners' Office.

for rearing silkworms." — 2 years. — (Secret.) — Dated 9th October, 1858.

22. Georg Zugmayer, of Waldegg, near Wr. Neustadt, for "An economical and expeditious mode of smelting and refining copper by means of blasts, so as to be ready for forging and rolling."—5 years. —(Secret.)—Dated 12th October, 1858.

23. Victor Schäffner, of Altrohlau, near Karlsbad, for "Obtaining a metallic lustre on porcelain and stone-ware."—2 years.—(Secret.)—Dated 12th October, 1858.

24. Moriz Mandel, of Prague, for "Improvements in the manufacture of vegetable oils for burning and lubricating purposes,"—1 year. — (Secret.)— Dated 13th October, 1858.

25. Emanuel Wrzolik, of Troppau, for "An apparatus for converting a rectilinear continuous motion into another motion, and vice versâ, by varying at the same time the velocity, and consequently the proportion of power to weight, without using cog-wheels or similar contrivances."—1 year. —(Secret.)—Dated 13th October, 1858.

26. Joseph Blümel, of Blaz, Bohemia, for "A machine for removing the roots of trees from lands."—1 year.—(Public.)— Dated 9th October, 1858.

27. Johann Christoph Endris, of Vienna, for "Improvements in the manufacture of paints."— 2 years.—(Secret.)—Dated 13th October, 1858.

28. Anton Anton, of Tepliz, Bohemia, for "Coating whips and canes with india rubber, gum, or gutta percha, whereby they are protected from dampness and heat, and made more flexible."— 1 year.—(Public.)—Dated 13th October, 1858.

29. Dr. Julius Fornara, of Vienna, for "Peculiar iron wheels and rails, to be used for conveyance on common roads and railways."—1 year.—(Public.) Dated 13th October, 1858.

30. Anton von Webern, of Prävali Unterdrauburg, Carinthia, for "Manufacturing coal-cokes from the waste of mineral and vegetable coal without using any mechanical pressure, or any other strange plastic substance."—1 year.—(Public.)— Dated 13th October, 1858.

31. Friedrich Hilbert, of Vienna, for "Improvements in the construction of double-action force and lift pumps, with clack-valves on a common clack-plate."—1 year.—(Secret.)—Dated 20th October 1858.

32. Carl Kronig, of Vienna, for "Manufacture of sugar moulds of papier-mâché."—1 year.—(Secret.) —Dated 18th October, 1858.

33. Michael Fröhlich, of Graz, for "Manufacturing, by means of the sewing machine, of waterproof hats of wool, and of imitation straw hats of raw silk, and yellow English fabrics that may be washed." — 2 years.—(Secret.)—Dated 20th October, 1858.

34. Arnold W. Braun, of Pest, for "A technical mechanical apparatus for exercising the hand in calligraphic writing."—1 year.—(Secret.)— Dated 20th October, 1858.

35. Ludwig Cassina, of Greco, near Milan, for "Improvements in his rotary sowing machine, whereby the sowing is promoted, and the machine is made to move more freely."—1 year.—(Public.) —Dated 20th October, 1858.

36. Nadault de Buffon, of Paris, represented by A. Martin, of Vienna, for "A filtering apparatus." —3rd year.—(Public.)—Dated 20th October, 1858.

37. John Harthan and Ezra Harthan, both of Timberbrock, near Congleton, in county of Chester, England, represented by Eduard Schmidt, of Vienna, for "Obtaining a motive power by means of a peculiar rotary machine, worked by steam or compressed air, in which the direct pressure is used as a propelling power, in combination with the reactionary power." — 10 years. — (Secret.)— Dated 20th October, 1858.—(English Patent, 26th January, 1858.)

38. Hermann Ehrenfeld, of Braunhirfchersgrund, near Vienna, for "Improvements in whitening starch so as to remain unalterable." — 1 year. — (Secret.)—Dated 20th October, 1858.

39. Giuseppe Corazina and Sons, of Brescia, for "A peculiar method of waterproofing leather."— 1 year.—(Secret.)—Dated 20th October, 1858.

40. Neander Oskar Paul Meister, of Chemnitz, Saxony, represented by Dr. Claudius Ferdin. Höchsmann, of Vienna, for "A peculiar process for giving a metallic lustre to textile vegetable and animal fibres and fabrics made thereof."—1 year. —(Secret.)—Dated 20th October, 1858. — (Saxon Patent, 8th May, 1856.)

41. Neander Oskar Paul Meister, of Chemnitz, Saxony, represented by Dr. Claudius Ferdin. Höchsmann, of Vienna, for "A process in dyeing for increasing the metallic lustre of fabrics made of vegetable fibres."—1 year.—(Secret.)—Dated 20th October, 1858.—(Saxon Patent, 8th May, 1856.)

42. Philipp Stanislaus Kodym, of Scharka, near Prague, for "Construction of stoves in which the smoke, after being partly consumed, is made to circulate in lower canals, whereby a greater economy in fuel, a better heating, and ventilation, are obtained."—1 year.—(Public.)—Dated 22nd October, 1858.

43. Joseph Spatz, of Ofen, for "An improved method of manufacturing pockets in men's dresses."—4 years.—(Secret.)—Dated 22nd October, 1858.

44. Alois Schubert, of Vienna, for "Manufacture of figures, animals, and chiefly images of saints, by means of a peculiar plastic substance."—1 year.— (Secret.)—Dated 22nd October, 1858.

45. Carl Emil Weber, of Mühlhausen, France, represented by Alphons Dietz, of Vienna, for "Machines for dyeing and scouring fabrics."— 5 years.—(Public.)—Dated 23rd October, 1858.— (French Patent, 9th August, 1853.)

46. Joseph Cavaggia and Anselm Spinelli, of Avignon, France, represented by Georg Märkl, of Vienna, for "A method of obtaining motive power in machines."—1 year.—(Public.)— Dated 23rd October, 1858.

47. Johann Lamatsch, of Vienna, for "Purifying fresh ox-gall for industrial purposes, and making the same as limpid as water."—1 year.— (Secret.) —Dated 23rd October, 1858.

48. Jacob Nachtmann, of Hartberg, Styria, for "Improvements in Dzierzor's beehives, whereby they may be enlarged and diminished, the same being also provided with double walls of coal, reeds, and straw."—1 year.—(Public.)—Dated 23rd October, 1858.

49. Stephan Wolff, of Szigethvár, Hungary, for "A French polish for repolishing old furniture in little time."—1 year.—(Secret.)—Dated 24th October, 1858.

50. Adolph Vincenz Bartl, of Liesing, Lower Austria, for "Manufacture of uniform cards with designs and fixed gold borders for apothecaries."—1 year.—(Secret.)—Dated 26th October, 1858.

51. Leopold Eder, of Linz, for "Manufacture of foot coverings from a waterproof substance which has not been used thereto hitherto."—1 year.—(Secret.)—Dated 29th October, 1858.

52. Peter Joseph Ouyet, of Paris, represented by Georg Märkl, of Vienna, for "A peculiar mode of applying vulcanized india rubber to valves and cocks."—1 year.—(Public.)—Dated 29th October, 1858.

53. Johann Wunderer, of Vienna, for "A machine for piercing cigars lengthwise and for splitting them from the inside, whereby they are made to dry quicker and to burn more easily."—2 years.—(Public.)—Dated 29th October, 1858.

54. A. Pleischl and Son, of Vienna, for "Conveying liquids, such as milk, wine, beer, &c., by means of a peculiarly closed apparatus, whereby the air is made to escape without refilling."—1 year.—(Public.)—Dated 29th October, 1858.

55. Hermann Steinmann, of Vienna, for "Improvements in the construction of steam boilers."—1 year.—(Secret.)—Dated 29th October, 1858.

56. Ottavio Coletti, of Turin, represented by Archita Rignanti, of Milan, for "A tow boat worked by water power for ascending rivers."—1 year.—(Secret.)—Dated 29th October, 1858.

57. Hermann Ehrenfeld, of Braunhirschengrund, near Vienna, for "Improvements in his patent compressed yeast, whereby the same is made quite pure and durable."—1 year.—(Secret.)—Dated 30th October, 1858.

58. Guinou, Marnas, and Bonnet, of Lyon, represented by Cornelius Kasper, of Vienna, for "Manufacture of a peculiar substance, called 'French purple.'"—1 year.—(Secret.)—Dated 30th October, 1858.

59. B. S. Krämer, of Vienna, for "Improvements in manufactured goods by obtaining thread barege."—1 year.—(Public.)—Dated 30th October, 1858.

60. Jacor Philipp Hirsch, of Vienna, for "Mounting waterproof military caps with steel springs and self-acting elastics of gum elastic."—1 year.—(Public.)—Dated 30th October, 1858.

61. Emil Peltier, of Paris, represented by Johann Jos. Ant. von Sonnenthal, of Vienna, for "A machine for manufacturing air-tight tin boxes, especially for preserving fruit."—1 year.—(Secret.)—Dated 30th October, 1858.

62. Julius Dulait, of Charleroy, Belgium, represented by Dr. Ferdinand Kaufmann, of Mährisch-Neustadt, for "Improvements in the construction of kilns for obtaining coke from coals by consuming the gases of distillation."—To 13th April, 1867.—(Secret.)—Dated 30th October, 1858.—(Belgian Patent, 14th April, 1854.)

2. Patents Prolonged.

1. Georg Weninger and Severin Zavisics, for "Improvements in apparatus for making the beds of invalids and wounded persons."—3rd year.—(Secret.)—Dated 20th September, 1856.

2. Eduard Beckmann Olofson, for "A diamond paint for protecting iron from rust."—2nd year.—(Secret.)—Dated 19th September, 1857.

3. Alois Baumann, for "A means of destroying flies."—2nd year.—(Secret.)—Dated 19th September, 1857.

4. Johann Darzens, for "Closed spittoons."—3rd year.—(Secret.)—Dated 13th October, 1856.

5. Ludwig Setzer, for "Improvements in the construction of billiard tables."—2nd year.—(Secret.)—Dated 21st September, 1857.

6. Victor Augustin Kienzy, for "A machine for clearing and ploughing land."—2nd year.—(Public.)—Dated 28th September, 1857.

7. Johann Heinrich Chaudet, for "A process for scouring the waste of cloth and wool and boiling silk."—2nd year.—(Public.)—Dated 28th September, 1857.

8. Johann Boschek and Co., for "Improvements in Hensmann's thrashing machine."—2nd year.—(Secret.)—Dated 29th November, 1857.

9. Carl Alexander de Fonbone (assignees Clevis Knab and Co., Paris), for "Improvements in apparatus for manfacturing coke and lighting gas."—7th to 9th year.—(Public.)—Dated 18th October, 1856.

10. Egnaz Michael Firnstahl, for "A machine for printing small neckerchiefs."—3rd year.—(Secret.)—Dated 18th September, 1856.

11. Barbara Schmidt, for "Manufacture of selvage shoes of linen or any other woven linen, woollen, or silk fabric."—3rd year.—(Secret.)—Dated 21st September, 1856.

12. M. Alkau, for "A process for spooling cocoons and obtaining raw silk."—2nd year.—(Public.)—Dated 28th September, 1857.

13. Cäsar Bozotti and Co., for "A machine applicable to spindles of silk-throwing machines for spooling and registering the skeins of weft-organzine or sewing silk."—2nd and 5th year.—(Public.)—Dated 1st December, 1857.

14. Moriz Gall (Ludwig Gall, assignee), for "Improvements in obtaining copper from vitriol water by putting in iron, and by a galvanic process without iron, whereby the costs are greatly diminished, and whereby the galvanism obtained thereby, after being conducted on electro-magnets, may be used as a motive power."—3rd year.—(Secret.)—Dated 23rd September, 1856.

15. Carl von Stallauer and Ludwig Wittmann (the latter's share assigned to Albert Seliger), for "Enamelling oil-paintings, engravings, lithographs, plain or coloured, photographs, maps, paper-hangings, &c."—2nd year.—(Secret.)—Dated 25th November, 1857.

16. Michael Winkler, for "Improvements in sign-boards with indestructive oil inscriptions."—6th year.—(Secret.)—Dated 22nd September, 1853.

17. Johann Peter Klein and Wilhelm Zipser, for "A gig-mill."—3rd year.—(Secret.)— Dated 18th October, 1856.

18. Johann Peter Klein and Wilhelm Zipser, for "Improvements in gig-mills."—2nd year.—(Secret.)—Dated 3rd October, 1857.

19. Henry Louis Dormoy, for "A process for obtaining cheap imitation silk laces."—5th year.—(Secret.)—Dated 27th March, 1855.

20. François Durand, for "A twisting machine."—4th year. — (Public.) — Dated 24th October, 1855.

21. Carl König, for "A composition of various substances for removing and preventing incrustations of boilers." — 2nd year. — (Secret.)—Dated 4th October, 1857.

22. Leopold Salzer, for "Obtaining embossings on paper."—2nd year.—(Secret.)—Dated 7th November, 1857.

23. Samuel Kampl, for "Protecting ladies' dresses from tear and wear."—2nd and 3rd year.—(Secret.) Dated 28th December, 1857.

24. Anton Jaun, for "Improvements in combining threads in the manufacture of twilled fabrics."—6th year.—(Secret.)—Dated 26th September, 1853.

25. Johann Czermak, for "Improvements in the manufacture of wicks of torches." — 2nd year.—(Secret.)—Dated 28th September, 1857.

26. Ferrando Giani, for "A machine for rearing silkworms, and hatching eggs."—2nd year.—(Public.)—Dated 3rd October, 1857.

27. Salomon Schlesinger and Thomas Hansen, for "Improvements in apparatus for turning over sheets on fly-presses."—4th year—(Secret.)—Dated 30th September, 1855.

28. Heinrich Hofer, for "An apparatus for regulating machines used for preparing substances for spinning."—3rd year.—(Public.)—Dated 30th December, 1856.

29. Alexander von Boer, for "Improvements in the manufacture of tallow candles by means of a chemical bleaching process."—2nd year.—(Secret.)—Dated 22nd September, 1857.

30. Franz Kiss, for "A mode of extracting silver-ores containing gold and copper-ores containing gold and silver." — 2nd year.— (Secret.) —Dated 28th September, 1857.

31. Georg Roth, for "Improvements in fixing shanks to metal buttons without soldering."—3rd year.—(Secret.)—Dated 9th October, 1856.

32. Franz Wagner, for "Manufacture of cast-steel in pressed fire-proof crucibles heated by means of coke."—3rd year.—(Secret.)— Dated 17th October, 1856.

33. Eduard Schmidt and Friedrich Paget, for "A chemical ink for printing bank notes, bills of exchange, &c."—2nd year.— (Secret.) —Dated 4th October, 1857.

34. Eduard Schmidt and Friedrich Paget, for "Manufacture of paper."—2nd year.—(Secret.)—Dated 8th October, 1857.

35. Carl Dinkler, for "Improvements in the manufacture of stamps of all kinds."—3rd year.—(Secret.)—Dated 9th October, 1856.

36. Joseph Bossi, for "Improvements in the plate of the printing table of his patent machine for printing from below."—3rd year.—(Secret.)—Dated 10th October, 1856.

37. Johann Villicus, for "An apparatus for the manufacture of wooden pegs of soles, by means of a peculiar plane-iron." — 3rd year. — (Secret.)— Dated 22nd Ootober, 1856.

38. Franz Hoffmann, for "An improved manure compound."— 2nd year. — (Secret.) — Dated 1st November, 1857.

39. Anton Plischke, for "A new sewing and tambouring machine." — 6th year. — (Secret.) — Dated 12th October, 1853.

40. Simon Jarsowitz, for "A vegetable soap."—4th and 5th year.—(Secret.)—Dated 20th October, 1855.

41. Joseph Hermann, for "Improvements in steel-plated plane irons, and other edged tools."—4th and 5th year.—(Secret.)—Dated 19th December, 1855.

42. Christian Haumann, for "Stuffing by means of hardened steel-bands, springs, or without steel-wire."—3rd year.—(Secret.)—Dated 13th October, 1856.

43. Adolph de Milly, for "A process for saponifying fats."—3rd and 4th year.—(Secret.)—Dated 28th October, 1856.

44. Benedict Filippi, for "Applying the English mechanism to Viennese pianos."—7th year.—(Secret.)—Dated 12th October, 1852.

45. Ernst Werner Siemens and Johann Georg Halske, for "A regenerating fire-place."—4th and 15th year.—(Public.)—Dated 13th May, 1857.

46. Franz Bozek, for "Improvements in circular segment mangles."—6th year.—(Public.)—Dated 5th January, 1854.

47. Leopold Hahn, for "Improvements in the manufacture of vamps of half boots."—8th year.—(Public.)—Dated 4th November, 1851.

48. James Seymour (Eduard Zulzer, assignee), for "Improvements in sewing machines."—3rd year.—(Public.)—Dated 13th October, 1856.

49. Joseph Von Gál, for "Improvements in the manufacture of staves of casks."—3rd year.—(Public.)—Dated 22nd Oetober, 1856.

50. Leopold Köppel (Anna Maria Köppel, assignee), for "Improvements in universal telegraph advertisements."— 8th year. — (Public.) — Dated 23rd October, 1851.

51. Carl Lauth and Ernst Depoully, for "Improvements in dyeing and printing fibrous substances, textures, feathers, skins, &c."—2nd year.—(Secret.)—Dated 4th October, 1857.

---

3. Patents which have become Void.*

1. Franz Victor, for "Improvements in the manufacture of perfumery by a cold process."—Dated 2nd July, 1857; disclaimed 24th June, 1858.

---

* The Specifications of these Patents may be consulted in the original language, or translations be had at the Public Free Library.

2. Ferdinand Reiber and Heinrich Breiter, for "Improvements in the manufacture of metal match boxes and snuff boxes."—Dated 15th April, 1858; disclaimed, 11th June, 1858.

3. Joseph Lampe, for "Manufacture of manure of boiled bones."—Dated 31st May, 1855; expired 31st May, 1858.

4. Archibald Reid and Carl O'Neil, for "Improvements in the treatment of copper ores."—Dated 19th July, 1857; expired 19th July, 1858.

5. Jacob Franz Heinrich Hemberger, for "Improvements in preparing European and Chinese flax, hemp, and other vegetable fibrous substances."—Dated 6th April, 1853; expired 6th April, 1858.

6. Wilhelm Schulze, for "A new cement, called 'terrazzinio.'"—Dated 15th April, 1853; expired, 15th April, 1858.

7. Nicolaus Schmitt, for "A new method of preparing coals and ores."—Dated 26th April, 1853; expired 26th April, 1858.

8. Carl Hartmuth, for "Improvements in the manufacture of fire clay tiles."—Dated 20th April, 1853; expired 20th April, 1858.

9. Otto Baumann, for "An eccentric cylinder press for pressing out the juice of beetroot, oil, &c."—Dated 24th April, 1853; expired 24th April, 1858.

10. Clemens Ambrozi, for "A chemical process for preparing all kinds of tartaric compounds from bases which have not been used hitherto."—Dated 7th April, 1854; expired 7th April, 1858.

11. Franz Chrismar, for "A new motor."—Dated 17th April, 1855; expired 17th April, 1858.

12. Wilhelm Suda, for "Manufacture of so-called 'Akart candles.'"—Dated 21st April, 1855; expired 21st April, 1858.

13. Eugen Rimmel, for "Manufacture of artificial india rubber."—Dated 22nd April, 1855; expired 22nd April, 1858.

14. Theresia Winkler, for "Improvements in the manufacture of so-called 'American pomatum.'"—Dated 7th April, 1853; expired 7th April, 1858.

15. Wilhelm Adolph Zempliner, for "Manufacture of elastic gold, silver, and other metal chains."—Dated 26th April, 1856; expired 26th April, 1858.

16. Antonio Luraschi, for "Improvements in the cushions of billiard tables."—Dated 6th April, 1856; expired 6th April, 1858.

17. A. Heinrich, for "A new system of so-called 'curved patent axles.'"—Dated 28th April, 1856; expired 28th April, 1858.

18. Julian Galletzky, for "Improvements in the manufacture of elastic beds, bottoms of bedsteads, and iron folding bedsteads."—Dated 29th April, 1856; expired 29th April, 1858.

19. Carl Miksits, for "A machine for expelling the smoke from chimney flues."—Dated 10th April, 1857; expired 10th April, 1858.

20. Prosper Durand, for "A process for manufacturing coke from wood and peat, anthracite, and other coal."—Dated 10th April, 1857; expired 10th April, 1858.

21. Ignaz Regensburger and Joseph Bischof, for "Improvements in catoptric apparatus for measuring distances."—Dated 13th April, 1857; expired 13th April, 1858.

22. Samuel Jägermayer, for "Means of separating earthy solutions in water for applying the latter to washing, and especially to scouring wool, by economising soap."—Dated 13th April, 1857; expired 13th April, 1858.

23. Anthon Blumenthal, for "Hats for protecting vines from frost and hoar frost."—Dated 16th April, 1857; expired 16th April, 1858.

24. Johann Martin Hess, for "Improvements in the manufacture of card boxes and other articles."—Dated 18th April, 1857; expired 18th April, 1858.

25. Johann Paul, for "Improvements in the construction of lamps for burning resinous oil."—Dated 20th April, 1857; expired 20th April, 1858.

26. Michael Neuburger, for "Improvements in mowing machines."—Dated 22nd April, 1857; expired 22nd April, 1858.

27. Hippolyte Arséne Marie, for "A clasp for fastening dresses, travelling bags, &c."—Dated 22nd April, 1857; expired 22nd April, 1858.

28. Carl Alder, for "Improvements in obtaining extract of gall-nuts and other tanning and dyeing products."—Dated 22nd April, 1857; expired 22nd April, 1858.

29. Alfred Egan, for "A peculiar distributing regulator for locomotives."—Dated 22nd April, 1857; expired 22nd April, 1858.

30. Albert Stähle, for "Breech-loading shooting guns."—Dated 22nd April, 1857; expired 22nd April, 1858.

31. Simon Ghidiglia and Ludwig Turtetti, for "Improvements in buckles without tongues."—Dated 29th April, 1857; expired 29th April, 1858.

32. Paul de Plument, for "Improvements in petticoats."—Dated 29th April, 1857; expired 29th April, 1858.

33. Gottlieb Friedrich August Quidde, for "An apparatus for propelling vessels, boats, and other floating bodies."—Dated 4th May, 1856; expired 4th May, 1858.

34. Amadée Louis Bendent and Jean Louis Marie Paul Benoit, for "A new process of treating arsenical ores and copper ores."—Dated 8th July, 1856; expired 8th July, 1858.

35. Wilfried de Tonvielle and Eugen Grenet, for "An electro-magnetic apparatus to be used as a motive power."—Dated 8th July, 1856; expired 8th July, 1858.

36. Hans Rees, John London, and Otto Ahlström, for "A machine for boring and cutting stone."—Dated 14th July, 1856; expired 14th July, 1858.

37. Anton Richter, for "A machine for equalling and rounding the teeth of the wheels of watches."—Dated 29th May, 1858; disclaimed 21st October, 1858.

38. August Prinz, for "A metal for obtaining electric current."—Dated 11th July, 1857; expired 11th July, 1858.

39. Gerhard Uhlhorn, for "An apparatus for obtaining an efficient working power of steam-

engines and mills working together."—Dated 10th October, 1856; annulled 26th October, 1858, because of its not having been worked.

40. Carl Böhm, for "Improvements in the crystallizing process and treatment employed in the manufacture of stearine candles of animal grease."—Dated 8th May, 1846; expired 8th May, 1858.

41. Louis Leo Wolf, for "Improvements in the construction of horse gins."—Dated 12th May, 1848; expired 12th May, 1858.

42. Franz Horski, for "Improvements in sowing and tilling machines."—Dated 29th May, 1852; expired 29th May, 1858.

List of Specifications, &c. published during the week ending 4th February, 1859.

No.	Price.	Subject-Matter.
1460	4*d.*	Collecting and disposing of sewage.
1463	1*s.* 11*d.*	Machine for manufacturing square bags of paper, &c.
1464	1*s.* 5*d.*	Machine for manufacturing conical bags of paper, &c.
1465	3*d.*	Adjustable spindle for locks and latches.
1468	3*d.*	Moulding, casting, and coating metal articles.
1469	1*s.* 9*d.*	Agricultural machinery, &c.
1470	3*d.*	Locks, &c.
1472	10*d.*	Circular knives and saws.
1473	3*d.*	Wheels.
1474	9*d.*	Machinery for drying yarn and woven fabrics.
1475	3*d.*	Reefing sails.
1476	1*s.* 1*d.*	Manufacture of millboard, &c.
1477	8*d.*	Gridirons.
1478	3*d.*	Apparatus for preventing the explosion of steam boilers.
1479	10*d.*	Steam boilers and engines.
1480	9*d.*	Omnibuses.
1481	9*d.*	Manufacture of sheet metal.
1482	7*d.*	Machinery for separating grain, minerals, &c.
1483	3*d.*	Electric conductors.
1484	3*d.*	Copper rollers or cylinders for printing.
1485	10*d.*	Machines for cutting hay, straw, &c.
1486	1*s.* 5*d.*	Looms for weaving, &c.
1487	9*d.*	Regulating the recoil of springs used in railway engines, carriages, &c.
1488	6*d.*	Lamps.
1489	1*s.* 4*d.*	Machinery for turning metal shafting, &c.
1490	6*d.*	Spinning and doubling machinery.
1491	5*d.*	Electric telegraph cables or ropes.
1492	6*d.*	Shaft bearer, &c.
1501	3*d.*	Treating and colouring photographic pictures.
1511	1*s.* 4*d.*	Propellers for vessels.
1521	3*d.*	Reels or spooling wheels.
1525	3*d.*	Treating sewage matter.
1527	3*d.*	Smoothing irons for linen, &c.
1661	7*d.*	Machinery for hulling and finishing rice, &c.
2068	7*d.*	Candlesticks or holders.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).
Macclesfield (*Useful Knowledge Society*).
Manchester (*Chetham Hospital*).
——— (*Camp Field*).
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*).
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).

Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices.

Admiralty, Steam Department.
——— Surveyor of Navy.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Sheerness ditto.
——— Devonport ditto.
——— Portsmouth ditto.
——— Chatham ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec; Toronto.
New Brunswick.

The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

Free Patent Museum and Library, South Kensington.

NUMBERS of VISITORS for the Week ending 5th February, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Jan. 31	Monday -	236	713	949—Fine.
Feb. 1	Tuesday -	190	613	803— „
„ 2	Wednesday	129	67	196— „
„ 3	Thursday -	78	—	78— „
„ 4	Friday -	63	—	63— „
„ 5	Saturday -	184	—	184— „
	Total -	880	1393	2273

Total number of visitors since the period of free daily admission (12th May, 1858) to 5th February, 1859, —65,516.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*

The following are in the press:—

PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE, Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 533. FRIDAY, FEBRUARY 11, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2920. To ROBERT CLEGG, of Islington, in the county of Middlesex, FREDERICK ANGERSTEIN, of Kennington, in the county of Surrey, and GEORGE FERRY, of Hackney, in the said county of Middlesex, for the invention of "Improved mechanism for imparting reciprocating motion to machinery, and more especially pumps."

2924. And to MICHAEL RENNEY, of Queen Street, Dublin, Mechanical Engineer, for the invention of "Improvements in bridges."

On both their petitions, recorded in the Office of the Commissioners on the 22nd day of December, 1858.

---

68. To EDWARD COBBOLD, of Hendon, in the county of Middlesex, Gentleman, for the invention of "Improvements in instruments for writing and marking, and for the preparation of certain substances for conversion into instruments for writing and marking, and for the application to useful purposes of certain products, arising from preparation aforesaid."

On his petition, recorded in the Office of the Commissioners on the 8th day of January, 1859.

---

160. To PEHR AMBJORN SPARRE, of Stockholm, but now of 50, Chancery Lane, in the county of Middlesex, for the invention of "Improvements in the manufacture of paper, suitable for bank-notes, cheques, bills, and similar articles."

On his petition, recorded in the Office of the Commissioners, on the 19th day of January, 1859.

---

190. To CHARLES O'HARA, of Toronto, Canada West, but now residing at No. 4, Upper Seymour Street, Hyde Park, in the county of Middlesex, Esq., for the invention of "Improvements in propellers, for propelling steam-boats, ships, and vessels."

On his petition, recorded in the Office of the Commissioners on the 21st day of January, 1859.

---

202. To BENJAMIN TEMPLAR, of the city and county of Bristol, Dyer, for the invention of "Improvements in umbrellas and parasols."

204. To MICHAEL HENRY, of 84, Fleet Street, in the city of London, Patent Agent, for the invention of "Improvements in machinery or apparatus for manufacturing corks and bungs."—A communication from Messrs. Dalverny and Thouzellier, residing at Sommières, in France.

206. To THOMAS WEBSTER RAMMELL, of No. 16, Spring Gardens, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in atmospheric propulsion, and the structures, tubes, machinery, and apparatus applicable thereto."

208. And to RICHARD BARTER, of St. Ann's Hill, Blarney, in the county of Cork, Doctor of Medicine, for the invention of "Improvements in heating and ventilating buildings, and in apparatus connected therewith."

On their several petitions, recorded in the Office of the Commissioners on the 22nd day of January, 1859.

---

209. To WILLIAM COLLETT HOMERSHAM, of Adelphi Terrace, Strand, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in floating gridirons or stages for repairing ships or other vessels."

210. To ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, for the invention of "Improvements in the manufacture of cast steel and iron."

211. To ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, for the invention of "An improvement in the manufacture of cast steel."

212. To Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in pumps."—A communication from François Ruff, residing at Paris.

213. To Joseph Laubereau, of Paris, in the empire of France, Civil Engineer, for the invention of "Improvements in air engines."

214. To John Smith and William Henry Smith, of 8, Upper Fountain Place, City Road, in the county of Middlesex, Manufacturers, for the invention of "Certain improvements in manufacturing paper, and in producing watermarks, patterns, figures, letters, and devices thereon, and in the construction of the mechanism employed therein."

215. To John Savory, of 143, New Bond Street, Chemist and Druggist, and William Robert Barker, of the same place, Chemist, for the invention of "Improvements in bottles for medicines and poisons."

216. To John Fowler, junr., of Cornhill, Robert Burton, of Kingsland, in the county of Middlesex, David Greig, of New Cross, in the county of Kent, and Jeremiah Head, of Newcastle-on-Tyne, for the invention of "Improvements in agricultural implements, and in apparatus used for hauling agricultural implements by steam power."

217. To Arthur Warner, of 31, Threadneedle Street, in the city of London, and William Tooth, of Sumner Street, Southwark, in the county of Surrey, for the invention of "Improvements in the manufacture of iron and gases for such and other uses."

218. To John Guy Proger, of 13, Trinity Street, Cardiff, and David Davies, of Stuart Street, Bute Docks, Cardiff, in the county of Glamorgan, for the invention of "Improvements in lanterns used on board ship to signal to the steersman."

219. To the Right Honourable James, Earl of Caithness, of Hill Street, in the county of Middlesex, for the invention of "Improvements in parts of the permanent way of railways."

220. To Michael Swan, of Henstridge Villas, St. John's Wood, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in ballasting ships, applicable also to the extinguishing fires on board ships."

221. And to William Tasker the younger, of the Firm of William Tasker and Sons, of Waterloo Iron Works, near Andover, in the county of Hants, Engineers, for the invention of "Improvements in ploughs."

On their several petitions, recorded in the Office of the Commissioners on the 24th day of January, 1859.

---

223. To John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in machinery or apparatus for cutting and shaping wood."—A communication from Peter H. Niles, residing at Boston, in the United States of America.

224. To Rudolph Bodmer, of 2, Thaives' Inn, Holborn, in the city of London, for the invention of "Improved resin and resinous substances."—A communication from Mr. Jean Creuseton, residing at Paris, in the empire of France.

225. To William Cutts, of Oldham, in the county of Lancaster, Engineer, for the invention of "Improvements in the manufacture of bobbins, spools, and cop tubes, and in the machinery employed therein."

226. To William Hodgson and Henry Hodgson, of Bradford, in the county of York, Tool and Machine Makers, for the invention of "Improvements in machinery or apparatus for preparing and spinning wool and other fibrous substances."

227. To John White, of Finchley, in the county of Middlesex, Surgeon, for the invention of "Improvements in means or apparatus to facilitate respiration under water, or under the influence of fire, or in other situations where an artificial supply of air may be required, part of which improvements is also adapted to facilitate movement in or upon the surface of water."

228. To William Andrews, of 30, Cornhill, in the city of London, Engineer of the Submarine Telegraph Company, for theinvention of "Improvements in electric telegraphs."

229. To Frederick John Jones, of Aldermanbury, in the city of London, Manufacturer, for the invention of "An improvement in shirt fronts."

230. To Henry Brecknell, of the city of Bristol, Brass Founder, and John Dyer, of the same place, Gentleman, for the invention of "Improvements in cocks and valves."

231. To Isaiah Woodcock, of Commercial Street, Spitalfields, in the county of Middlesex, Frame Manufacturer, for the invention of "Improvements in barometer and thermometer dials."

232. To Benjamin Joseph Spedding, of 9, Cross Street, Birkenhead, in the county of Chester, Patent Agent, for the invention of "Improvements in apparatus for generating and regulating gas, and for impregnating the same with volatile hydrocarbon fluids."

233. To Charles Grant Kelvey, of Rock Ferry, Birkenhead, in the county of Chester, and William Holland, of the same place, Chronometer Makers, for the invention of "An improved escapement for chronometers and other timekeepers."

234. And to William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "An improvement in life preserving vests."—A communication from T. A. Dlano, residing in the United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 25th day of January, 1859.

---

235. To William Richmond Alexander, of Glasgow, in the county of Lanark, North Britain, Merchant, for the invention of "Improvements in furnaces and apparatus for the manufacture of sugar, and for the consumption or prevention of smoke."

236. To Isaac Hammond, of the city of Winchester, in the county of Hants, Gun Maker, for the

invention of "Improvements in breech loading fire arms, and in cartridges to be used therewith."

237. To Obed Hussey, of Baltimore, United States of America, for the invention of "Improvements in the construction of ships' blocks."

238. To David Graham, of the firm of Graham, West, and Company, of Wapping, in the county of Middlesex, Millwrights and Engineers, for the invention of "An improved method of driving centrifugal machines."—A communication from T. Hanning, residing in the Mauritius.

239. To Jonas Wells, of Keighley, in the county of York, Brass Founder, and William Clough, of Sutton, near Keighley aforesaid, Millwright, for the invention of "An improved coupling for railway carriages and analogous uses."

240. To Frederick Carl Christian Paulsen and Albin Alsing, both of Emmett Street, Limehouse, in the county of Middlesex, for the invention of "Improvements in preparing beverages usually called punch."

241. To Mark Fernandez, of No. 2, Devonshire Square, Bishopsgate Street Without, in the city of London, Merchant, for the invention of "Improvements in straw and hay cutters."

242. And to James Kerr, of 17, Bedford Terrace, Trinity Square, Southwark, in the county of Surrey, Engineer, for the invention of "Improvements in the construction of revolving fire-arms."

On their several petitions, recorded in the Office of the Commissioners on the 26th day of January, 1859.

---

243. To James Mercer, of Boston, in the state of Massachusetts, United States America, temporarily residing at Liverpool, in the county of Lancaster, Currier, for the invention of "Improvements in the process of currying leather."—A communication from Mr. Joseph Armstrong, Currier, residing in the county of Middlesex, and state of Massachusetts, America.

244. To Wilson Ager, of Rhorsburg, in the county of Columbia, state of Pennsylvania, United States of America, for the invention of "Improvements in machinery for cleaning rice."

245. To Thomas Hartshorne, of West Bromwich, in the county of Stafford, Brassfounder, for the invention of "An improved metal to be used for making journey brasses for mills, rollers, forges, and all kinds of shafts and machinery, and also for shipping and for bearings for shafts and journey brasses in general."

246. To Elijah Dixon, of Preston, in the county of Lancaster, Mechanic, and Henry Whittaker, of the same place, Mechanic, for the invention of "Improvements in apparatus used in weaving textile fabrics."

47. To James Meacham, of Birmingh am, in the county of Warwick, for the invention of "Improvements in pens and penholders."

248. To Henry Duncan Preston Cunningham, of Bury, near Gosport, in the county of Hants, Esq., for the invention of "An improvement in the rig of ships or vessels."

249. To Henry Rawson, of Leicester, for the invention of "Improvements in machinery for preparing wool and other fibrous substances."

250. To James Buckingham, of Walworth Common, in the county of Surrey, Civil Engineer, and George Salt, of Saltaire, near Bradford, in the county of York, Manufacturer, for the invention of "Improvements in the construction and adaptation of drawing and other rollers employed in drawing and compressing fibres, which improved construction of rollers is also applicable in compressing fabrics."

251. To Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., for the invention of "Improvements in the manufacture of biscuits."—A communication from Messrs. Pascal and Sirben, residing at Toulouse, département de la Haut Garonne, in the empire of France.

252. To George Francis Bradbury, of Oldham, in the county of Lancaster, and Joseph Jackson King, of Glasgow, in the county of Lanark, North Britain, for the invention of "Improvements in certain apparatus applicable to sewing machines."

253. To William Crowther, of Leeds, in the county of York, Manufacturing Chemist, for the invention of "Improvements in the manufacture of prussiates of potash or soda, and in recovering a useful material therefrom."

254. And to James Gathercole, of Bath Terrace, Camberwell, New Road, in the county of Surrey, Gentleman, for the invention of "Improved machinery for manufacturing envelopes and paper bags."

On their several petitions, recorded in the Office of the Commissioners on the 27th day of January, 1859.

---

255. To Ignazio Zacheroni, native of Italy, residing at Liverpool, in the county of Lancaster, Artist, for the invention of "An improved mode or method of preventing the escape of smoke into the atmosphere, and in the construction of chimney 'pots' or 'tops' for curing smoky chimneys."

256. To William Robertson, of the city of Manchester, in the county of Lancaster, Mechanician, for the invention of "A new apparatus for propelling boats on canals, rivers, and lakes of moderate depth."

257. To George Bartholomew, of the town and county of Linlithgow, North Britain, Edge Tool Maker, for the invention of "Improvements in shoes for horses and other animals requiring such shoes, and in the means of attaching the same to the feet."

258. To Charles Edwards Amos, of the Grove, in the borough of Southwark, Engineer, and John Francis, of Bangor, in North Wales, Engineer, for the invention of "Improvements in water pressure engines, and their application to pumping machinery."

259. To Frederick Prince, of 138, New Bond Street, in the county of Middlesex, Gunmaker, for the invention of "A new breech loading gun."

260. To William Yates, of Mary Street, Bromley, in the county of Middlesex, Engineer, for the invention of "Improvements in furnaces."

261. To Robert Griffiths, of No. 69, Mornington Road, in the county of Middlesex, for the invention of "Improvements in regulating the pressure

of steam in steam-boilers, and in preventing the accumulation of deposit therein."—Partly a communication from Charles Nelson Copeland, residing at New York.

262. To HENRY WATSON, of High Bridge Works, Newcastle-upon-Tyne, for the invention of "Improvements in the manufacture of Knotter-plates, used in the manufacture of paper."

263. And to ANDREW BARCLAY, of Kilmarnock, in the county of Ayr, North Britain, Engineer, for the invention of "Improvements in obtaining and distributing or applying electricity and magnetism."

On their several petitions, recorded in the Office of the Commissioners on the 28th day of January, 1859.

---

264. To LOUIS LEISLER, of Glasgow, in the county of Lanark, North Britain, Merchant, for the invention of "Improvements in extracting metallic copper from the pyrites residuum of vitriol works, and from other substances."—A communication from Doctor Hasenclever, residing at Aix-la-Chappel, in Prussia.

265. To JOSIAH LANE, of West Bromwich, in the county of Stafford, Machinist, for the invention of "New or improved machinery for the manufacture of screws, and for tapping nuts for screws."

266. To JAMES MACKENZIE, Manager to William Strode, of Saint Martin's-le-Grand, in the city of London, Gas Engineer, for the invention of "An improved method of operating ventilating valves, especially applicable to ventilating gas burners."

267. To JOSEPH MARINO, of the city of Stockholm, in the kingdom of Sweden, Mechanician, for the invention of "An inodorous closet or commode."

268. To GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, Saint Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, for the invention of "Improvements in apparatus applicable to measuring, regulating the pressure of, and consuming gas for illumination."—A communication from J. M. Legris, residing at Paris, in the empire of France.

269. To HENRY GRISSELL, of Regents Canal Iron Works, Eagle Wharf Road, in the county of Middlesex, Engineer, for the invention of "Improvements in machinery for moving ships or vessels on slips or inclined ways."

271. And to JAMES MEACHAM, of Birmingham, in the county of Warwick, for the invention of "Improvements in apparatus for clasping and closing books, purses, reticules, and other similar articles, and for retaining and securing paper documents, letters, bills, and other memoranda."

On their several petitions, recorded in the Office of the Commissioners on the 29th day of January, 1859.

---

272. To THOMAS PLUNKETT SMITH, of Stanmore, in the county of Middlesex, Schoolmaster, for the invention of "An apparatus for guiding or directing the pen or pencil in writing or drawing."

274. To JOHN RAYWOOD, Engineer, of Wentworth, in the county of Yorkshire, for the invention of "Certain improvements in the construction and method of working sewing machines."

276. To JAMES ROBERTSON, of Glasgow, in the county of Lanark, North Britain, Engineer, for the invention of "Improvements in details, by which motive force is transmitted in machinery."

278. And to JOHN PETER BOOTH, of Cork, in the kingdom of Ireland, Feather Factor, for the invention of "Improvements in ventilating ships."

On their several petitions, recorded in the Office of the Commissioners on the 31st day of January, 1859.

---

280. To JOSEPH GRIMOND, of the city of Manchester, in the county of Lancaster, Manufacturer, for the invention of "Improvements in the manufacture of hearth rugs."

282. To JOHN HOSKING, of No. 5, Catherine Terrace, Gateshead-on-Tyne, in the county of Durham, and THOMAS COCK, of Cleator-Moor, near Whitehaven, in the county of Cumberland, for the invention of "Improvements in furnaces or fire places."

286. To MARY ANN WALKER, of the firm of Charlotte and Mary Ann Walker, trading under the name of Richard Walker, as Percussion Cap Manufacturers, of Graham Street, Birmingham, in the county of Warwick, and RICHARD WALKER, Manager of the said works, also of Birmingham as aforesaid, for the invention of "Certain improvements in the manufacture of percussion-caps, and in the apparatus for effecting certain parts of the same."

288. To THOS. PARAMORE PURSSGLOVE, Battersea, Surrey, for the invention of "Improvements in barometers."

292. To CHARLES CROCKFORD, of Holywell, Flintshire, Smelter, for the invention of "A mode or method of producing metallic sulphates."

294. And to EDWARD HAMMOND BENTALL, of Heybridge, near Maldon, in the county of Essex, Ironfounder, for the invention of "Improvements applicable to machinery for grinding or pulverizing various substances."

On their several petitions, recorded in the Office of the Commissioners on the 1st day of February, 1859.

---

296. To EDWARD ELLIS ALLEN, of Brompton Row, in the county of Middlesex, Engineer, for the invention of "Improvements in stereoscopic apparatuses."

298. To ROBERT LANCASTER, of Orrell, near Wigan, in the county of Lancaster, Mining Engineer and Viewer, for the invention of "An improved mode of ventilating coal and other mines."

300. To JOSEPH ROCK COOPER, of Birmingham, in the county of Warwick, Gun Manufacturer, for the invention of "Improvements in breech loading fire arms."

302. To JOHN BUNCHER, of Birmingham, in the county of Warwick, Brass Founder, for the invention of "Improvements in the manufacture of eyes or fastenings for stair rods."

304. To JOHN HIRST, junior, of Dobscross, in Saddleworth, in the county of York, Merchant, and JAMES HOLLINGWORTH, of the same place, Joiner, for the invention of "Improvements in the construction of power looms."

306. And to Henry Fridlington Kemp, and William Skey, of the Root Distillery, Louth, Lincolnshire, for the invention of "An improved food for cattle."

On their several petitions, recorded in the Office of the Commissioners on the 2nd day of February, 1859.

Invention protected for Six Months by the Deposit of a Complete Specification.

Notice is hereby given that the petition of

325. Jacques Marie Edouard Masson, of Rue des Fossés, St. Thomas Evreux, France, Gentleman, praying for Letters Patent for the invention of "Improvements in apparatus to facilitate working under water," was deposited and recorded in the Office of the Commissioners on the 4th day of February, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

11*th February*, 1859.

1824. John Talbot Pitman, of the American and European Patent Offices, 67, Gracechurch Street, London, for an invention of "An improved mode of operating apparatus for lifting and pressing."—A communication from a Foreigner residing abroad.—Dated 11th August, 1858.

1826. Robert Clark Gist, Gentleman, of 36, Cannon Street, in the city of London, for an invention of "Improvements in knitting machines."—A communication from a Foreigner residing abroad.—Dated 11th August, 1858.

1840. Robert Jobson, of Wordsley, in the county of Stafford, Ironfounder, for an invention of "Improvements in apparatus used when making moulds for casting shells and other articles."—Dated 12th August, 1858.

1842. Robert Jobson, of Wordsley, in the county of Stafford, Ironfounder, for an invention of "Improvements in apparatus for supplying water to axle-tree boxes, and other journal bearings, to lubricate the same."—Dated 12th August, 1858.

1844. Robert Jobson, of Wordsley, in the county of Stafford, Ironfounder, for an invention of "Improvements in apparatus for crushing and sifting."—Dated 12th August, 1858.

1845. William Beaumont Nortcliffe, of Fell Grove, near Huddersfield, in the county of York, Dyer, for an invention of "An improvement in dyeing woollen, worsted, cotton, silk, linen, and other textile fabrics, and fibrous substances."—Dated 13th August, 1858.

1848. Charles Llewellyn Light, of Pall Mall East, in the county of Middlesex, Engineer, for an invention of "Improvements in electric telegraph ropes or cables."—Dated 13th August, 1858.

1850. John Petrie, junior, of Rochdale, in the county of Lancaster, Ironmonger, for an invention of "Improvements in machinery or apparatus for stretching and drying woven fabrics."—Dated 13th August, 1858.

1851. Thomas Worth, of Rochdale, in the county of Lancaster, Wire Card Maker, and Henry Spencer, of the same place, Agent, for an invention of "Improvements in machinery or apparatus for preparing for spinning, and for spinning cotton and other fibrous materials, in winding and warping yarns of the said materials, and in making wire cards for such preparing machinery."—Dated 13th August, 1858.

1855. John Cartmel, of Stamford Street, in the county of Surrey, Hat Manufacturer, for an invention of "Improvements in the manufacture of hats, caps, and other coverings for the head."—Dated 14th August, 1858.

1857. Joseph Holt, of Shelf, near Halifax, in the county of York, Mechanic, for an invention of "Improvements in looms for weaving."—Dated 14th August, 1858.

1858. James Smith, of Seaforth, near Liverpool, in the county of Lancaster, Gentleman, and Sydney Arthur Chease, of Liverpool aforesaid, Gentleman, for an invention of "Improved arrangements for obtaining and applying motive power."—Dated 14th August, 1858.

1860. Samuel Cunliffe Lister and James Warburton, of Manningham, in the county of York, for an invention of "Improvements in dying wool, hair, cotton flax, and similar materials, also yarns and textile fabrics made from such materials, also in dying and tanning other substances and materials, also in washing wool, and in discharging the gum from silk."—Dated 14th August, 1858.

1879. Jozé Luis, Patent Agent, of No. 1 B, Welbeck St., Cavendish Sqre., London, in the county of Middlesex, for an invention of "A new safety system for preventing an accidental discharge in fire arms."—A communication from a Foreigner residing abroad.—Dated 18th August, 1858.

1885. Alexander Pilbeam, Architect, 2, Lonsdale Place, Notting Hill, for an invention of "A bradawl screw."—Dated 19th August, 1858.

1918. William Horatio Harfield, of Fenchurch Street, in the city of London, for an invention of "Improvements in windlasses."—Dated 23rd August, 1858.

1954. James Dupré Brabazon, of Lanes Hotel, St. Albans Place, Haymarket, Esquire, for an invention of "Improvements in giving motion by sails to screw and other propellers of ships and vessels."—Dated 28th August, 1858.

1988. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improvements in the manufacture of alumina."—A communication from M. Le Chatelier, Mining Engineer, residing at Paris, in the empire of France.—Dated 1st September, 1858.

2001. George Tomlinson Bousfield, of Loughborough Park, Brixton, in the county of Surrey, for an invention of "Improvements in knitting machinery."—Dated 3rd September, 1858.

2111. Thomas Vicars, senior, Thomas Vicars, junior, and Thomas Ashmore, Engineers, and James Smith, Baker, all of Liverpool, in the county palatine of Lancaster, for an invention of "Improvements for the consumption of smoke in moveable furnaces or chauffers for heating bakers'

and other like ovens."—Dated 18th September, 1858.

2321. Charles West, 15, Mornington Place, Camberwell New Road, London, for an invention of "Improvements in the mode of insulating and covering wire."—Dated 18th October, 1858.

2633. Charles Fréderic Vasserot, of 45, Essex Street, Strand, London, Patent Agent, for an invention of "Improvements in fire-arms and ordnance, and in the projectiles to be used therewith."—A communication from Peter Rector Smith, of 2, Rue St. Appoline, Paris, in the empire of France, now residing in the United States of America.—Dated 20th November, 1858.

2701. Charles Burrell, of Thetford, in the county of Norfolk, Engineer, for an invention of "Improvements in traction engines and carriages."—Dated 27th November, 1858.

2720. Caleb Bedells, of Leicester, for an invention of "Improvements in the manufacture of elastic fabrics, and the machinery employed in this manufacture."—Dated 29th November, 1858.

2776. Edouard Aristide Servier, of Paris, in the empire of France, Engineer, for an invention of "Improvements in pressure and fluid level indicators."—Dated 4th December, 1858.

2839. George Fergusson Wilson, of Belmont, Vauxhall, in the county of Surrey, for an invention of "Improvements in the manufacture of lubricating oils."—Dated 10th December, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 9th February*, 1859, *inclusive.*)

7th February.

452. John Sharp Cromartie Heywood, of Battle Bridge, in the county of Middlesex, and George Lloyd, of Great Guildford Street, Southwark, in the county of Surrey, for an invention of "Improvements in condensing vapours in distillatory operations, the manufacture of varnishes, melting and distilling of fats, and other manufacturing or chemical operations, and obtaining useful products therefrom."—Dated 22nd February, 1856.

8th February.

356. Henry Bessemer, of Queen Street Place, New Cannon Street, in the city of London, Civil Engineer, for an invention of "Improvements in the manufacture of malleable or bar iron and steel."—Dated 12th February, 1856.

359. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent, for an invention of "Improvements in the manufacture of cast steel."—A communication.—Dated 12th February, 1856.

9th February.

345. John Wallace Duncan, of Grove End Road, St. John's Wood, in the county of Middlesex, Gentleman, for an invention of "Improvements in or connected with apparatus for the generation and application of steam for impelling purposes."—Dated 9th February, 1856.

366. Samuel Fox, of Stocks Bridge, in the parish of Peniston, in the county of York, Wire Manufacturer, for an invention of "Improvements in springs for railway and other carriages."—Dated 13th February, 1856.

FOREIGN PATENTS.

FRANCE.

Current List of Patents of Invention and Certificates of Addition.

1858.

(*Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.*)

Note.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

5487. Jean Honoré Lavigne, represented by Barrault, of 33, Faubourg St. Martin, Paris, for "A kind of gridiron."—Dated 4th December, 1858.

5488. Emile Honoré Diot, of 25, Rue de Bucy, Paris, a Certificate of Addition to his Patent of 27th April, 1858, for "Improvements in ladies' bonnets."—Dated 4th December, 1858.

5489. Henri Gresle, of 231, Rue St. Martin, Paris, a Certificate of Addition to his Patent of 25th June, 1858, for "A process for lubricating machines."—Dated 4th December, 1858.

5490. Jacques Warne and Fanshawe, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "An improved tissue for coating boards, walls, and for other similar purposes."—Dated 4th December, 1858.

5491. Hamm, Fischer, and Co., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of wooden boxes or cases."—Dated 4th December, 1858.

5492. Jean François Guétel, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in machines for burnishing friezes of inlaid floors."—Dated 4th December, 1858.

5493. Mathieu Carmine, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A smoke-consuming calorifere stove with a reversed bell."—Dated 4th December, 1858.

5494. Drayson and Binney, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in cables of submarine and subter-

* For the French Patent Law see No. 228 of this Journal.

raneous telegraphs."—Dated 4th December, 1858. —(English Patent, expiring 18th October, 1872.)

5495. Auguste Prouvost, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 22nd December, 1856, for "Improvements in the arrangement of steam generators."—Dated 4th December, 1858.

5496. Jean Pierre Napoléon Leras, domiciled with Armengaud, senr., of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 26th August, 1854, for "Improvements in heating apartments."—Dated 4th December, 1858.

5497. John Bethell, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in apparatus for preparing timber."—Dated 4th December, 1858.

5498. Charles Auguste Sandoz, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A stereoscope with circulating and alternating views."—Dated 4th December, 1858.

5499. Martial Pidault, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 23rd May, 1857, for "An improved revolving pistol."—Dated 4th December, 1858.

5500. X. Meyer and Co., represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Arrangements in generators with a common fire."—Dated 4th December, 1858.

5501. Henri Ignace de Roux, of 27, Rue St. Lazare, Paris, for "Letter envelopes."—Dated 4th December, 1858.

5502. Louis Aléxandre Joseph Bruet, of 7, Rue Lepelletier, Paris, for "An instrument called 'trino-chrometer, or trichronometer.'"—Dated 4th December, 1858.

5503. Joseph Louis Fillion, represented by Daubréville, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 21st May, 1858, for "Manufacture of wood pasteboard-boxes, &c."—Dated 6th December, 1858.

5504. François Trarieux, represented by Daubréville, of 23, Boulevart de Strasbourg, Paris, for "Improvements in pumps worked by horse gins."—Dated 6th December, 1858.

5505. Charles Victor Beslay, of 52, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 21st July, 1858, for "A process for tinning metals."—Dated 6th December, 1858.

5506. Pierre Léonard Marc Debain, of 132, Boulevart du Mont-Parnasse, Paris, for "Applying compressed air to industrial purposes."—Dated 6th December, 1858.

5507. Jean Baptiste Poussin, domiciled with Barbier, of 55, Rue Bourbon-Villeneuve, Paris, for "A lime-kiln."—Dated 6th December, 1858.

5508. Caussade and Barrère, of 12, Rue Dugay-Trouin, Paris, for "A sewing machine."—Dated 6th December, 1858.

5509. Adolphe Chabert, of 35, Rue de Javel, Grenelle, for "A kind of metre for tailors."—Dated 6th December, 1858.

5510. Fourny, alias Auguste Pierre Dulys, of 35, Rue de Meaux, La Villette, for "An atmospheric wheel."—Dated 6th December, 1858.

5511. Guillaume Félix Aroux, domiciled with Desprez and Latour, of 2, Rue de la Feuillade, Paris, for "An apparatus for furrowing the soil before sowing."—Dated 6th December, 1858.

5512. Henry Rogers, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in the construction of electric telegraph cables or conductors."—Dated 6th December, 1858.

5513. Alfred Vervoort, of 34, Rue Notre Dame de Lorette, Paris, a Certificate of Addition to his Patent of 6th October, 1858, for "Applying photography to all kinds of screens, &c."—Dated 7th December, 1858.

5514. Louis Adam Colin, of 28, Rue Caumartin, Paris, a Certificate of Addition to his Patent of 28th September, 1850, for "Improvements in the construction of pianos."—Dated 7th December, 1858.

5515. Guillaume Félix Aroux, of 2, Rue de la Feuillade, Paris, for "An agricultural pressing cylinder."—Dated 7th December, 1858.

5516. Charles Mollingre, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "An apparatus for vapour-baths."—Dated 7th December, 1858.

5517. Hilaire Alphonse Hardon, represented by Herpst, of 39, Rue de l'Echiquier, Paris, a Certificate of Addition to his Patent of 29th December, 1857, for "A system of framework."—Dated 7th December, 1858.

5518. Guillaume Félix Aroux, of 2, Rue de la Feuillade, Paris, for "A compressing cylinder with multiple wheels."—Dated 7th December, 1858.

5519. Derudder, Rousson, and Samin, represented by Dujarrier, of 11, Faubourg St. Martin, Paris, for "A system of fancy chairs."—Dated 7th December, 1858.

5520. Georges Manin, of 24, Rue Neuve Coquenard, Paris, for "Railway signals."—Dated 7th December, 1858.

5521. Charles Callebaut, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, a Certificate of Addition to his Patent of 27th February, 1854, for "Improvements in sewing machines."—Dated 7th December, 1858.

5522. Hippolyte Adien Mutelle, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A system of motive levers, especially for working tenders, railway-carriages, &c., and being also applicable to other purposes."—Dated 7th December, 1858.

5523. Russery and Lacombe, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to their Patent of 2nd November, 1854, for "A process for manufacturing cranked axles."—Dated 7th December, 1858.

5524. Astley Paston Price, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 22nd October, 1857, for "Improvements in the manufacture of zinc."—Dated 7th December, 1858.

5525. Lees and Jaques, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in the means of generating steam and economizing fuel."—Dated 7th December, 1858.—(English Patent, expiring 3rd July, 1872.)

5526. Pierre Adolphe Maury, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 3rd June, 1857, for "A machine for cutting velvet."—Dated 7th December, 1858.

5527. Eugène Emile Pinot, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Vessels with a moveable bottom for keeping pomatum."—Dated 7th December, 1858.

5528. Aléxandre Louis Pouget, of Tours, département d'Indre-et-Loire, a Certificate of Addition to his Patent of 4th July, 1857, for "A self-acting apparatus for registering the exact time spent by passengers in carriages."—Dated 7th December, 1858.

5529. Antoine Bichler, of 4, Rue de l'Union, Marseille, département des Bouches du Rhône, for "A continuous filter."—Dated 8th December, 1858.

5530. Alphonse Joly, of Grenoble, département de l'Isère, a Certificate of Addition to his Patent of 23rd October, 1858, for "A system of fixed signals worked by electricity, &c."—Dated 9th December, 1858.

5531. Casimir Auguste Gaude, of 5, Rue des Précheurs, Toulon, département du Var, for "A mode of shipping liquids by means of a pump-syphon."—Dated 10th December, 1858.

5532. Alphonse Pellouin, of Flers, département de l'Orne, for "A double loom for simultaneously weaving two warps."—Dated 18th December, 1858.

5533. André Morel, of Mosnières, département du Nord, for "Modifications in substances used for discolouring juice and syrups."—Dated 3rd December, 1858.

5534. Georges Frédéric Black, of St. Olle-les-Cambray, département du Nord, for "A system of bringing the safety apparatus of steam-boilers within the sight of the firemen."—Dated 3rd December, 1858.

5535. Aléxandre Vallet, of Ponthion, département de la Marne, for "Aerostatic or compressed air paillasses and mattresses."—Dated 9th Decem-1858.

5536. BarthélemyBurlat, of Longes, département du Rhône, for "A metallic motor applicable to all kinds of machines."—Dated 10th December, 1858.

5537. Vial and Garnier, of Grande Rue de la Guillotière, Lyon, département du Rhone, a Certificate ofAddition to their Patent of 24th February, 1858, for "Manufacture of open-worked and solid wheels for locomotives and railway-carriages."—Dated 11th December, 1858.

5538. Allemand and Pierre Darmet, of 19, Quai de Bondy, Lyon, département du Rhône, for "A liquid for destroying insects."—Dated 11th December, 1858.

5539. Auguste Henri Petiteau, of 42, Rue de la Scellerie, Tours, département d'Indre-et-Loire, a Certificate of Addition to his Patent of 16th February, 1857, for "An oven for baking pastry and bread."—Dated 7th December, 1858.

5540. Jules Parfait and Joseph Honoré Petit, domiciled with the former, 1, Rue des Tauxelles, Troyes, département de l'Aube, for "A kind of locks."—Dated 11th December, 1858.

5541. Jules Parfait and Joseph Honoré Petit, domiciled with the former, 1, Rue des Tauxelles, Troyes, département de l'Aube, for "A kind of lock."—Dated 11th December, 1858.

5542. Guillaume Barthélemy, of Lormont, Banlieu de Bordeaux, département de la Gironde, for "A mechanism for windlasses."—Dated 11th December, 1858.

5543. Claude Feboret, of 4, Rue Magdeleine, Dijon, département de la Côte d'Or, for "Letter-envelopes showing the postmark on the inside letter."—Dated 10th December, 1858.

5544. Emile Haunet, of 10, Rue St. Brice, Reims, département de la Marne, for "Means of destroying insects in general, their eggs and larvae, and especially the eggs and larvae of the pyrial, destroying vines."—Dated 11th December, 1858.

5545. Stehelin and Co., of Bitschwiller, département du Haut Rhin, for "Improvements in the construction of heating apparatus."—Dated 13th December, 1858.

5546. Charles Terrier, of 2, Place Henri IV., Lyon, département du Rhône, for "An apparatus for cooling and pumping liquids from cellars into the upper stories."—Dated 13th December, 1858.

5547. Hector Penassio, of Undelys, département de l'Eure, for "A multiple spindle for twisting and doubling textile or filamentous substances and especially silk."—Dated 13th December, 1858.

5548. François Marie Gaud, of 4, Rue Belly, Lyon, département du Rhône, for "A system of candle matches."—Dated 13th December, 1858.

5549. Binard and Tamaselle, of Burgerac, département de la Dordogne, for "A machine for mincing meat."—Dated 14th December, 1858.

5550. François Leblanc, of Neuville sur Saône, département du Rhône, for "Improvements in skidding railway trains by means of their weight."—Dated 14th December, 1858.

5551. Frédéric Kuhlmann, of Lille, département du Nord, a Certificate of Addition to his Patent of 20th October, 1856, for "A process for manufacturing baryta, strontian, and their salts, &c."—Dated 14th December, 1858.

5552. Henri Henroz, represented by Delhaye, of Teumont, département du Nord, for "Improvements in glass furnaces."—Dated 15th December, 1858.

5553. Louis Pineill, of 5, Rue du Fours St. Jacques, Perpignan, département des Pyrenées Orientales, for "A system of tubing artesian wells."—Dated 10th December, 1858.

5554. Procope Boudin, of Aix en Othe, département de l'Aube, for "A system of needles for circular or rectilinear frames for making ribbed hosiery articles."—Dated 14th December, 1858.

5555. Alfred Eugène Mareuze, of Anizy le Château, département de l'Aisne, for "Defecating beetroot."—Dated 15th December, 1858.

5556. Louis Delauzun, of Oron, for "A coffee mill with slides."—Dated 4th December, 1858.

5557. Constant Verger, of 22, Rue des Fossés St. Georges, Tours, département d'Indre et Loire, for "Metal socles applicable to funeral crosses."—Dated 11th December, 1858.

5558. Jean Louis Chambon, of Lavoutte, département de l'Ardèche, for "An elastic spring mattress."—Dated 15th December, 1858.

5559. Servais Delseaux, of 27, Rue du Curé St. Sauveur, Lille, département du Nord, for "A steam moderator."—Dated 17th December, 1858.

5560. Jouannin and Co., represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in machines for making fishing-nets."—Dated 7th December, 1858.

5561. John Broughton, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in slides of steam engines."—Dated 7th December, 1858.

5562. Sébastien Ley, of 2, Rue de la Fidélité, Paris, for "A system of gas-burners."—Dated 8th December, 1858.

5563. John Bethell, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of alum."—Dated 8th December, 1858.—(English Patent, expiring 3rd June, 1872.)

5564. Des Mazis and Du Chastaingt, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "Improvements in baking tins for bakers."—Dated 8th December, 1858.

5565. Christophe Jacquot, of 22, Rue La Fayette, Paris, for "A system of holders of petticoats."—Dated 8th December, 1858.

5566. Frédéric Alphonse Lampérière, domiciled with Cretey, of 32, Rue de Grenelle St. Honoré, Paris, for "A system of soles and heels for foot coverings."—Dated 8th December, 1858.

5567. John Ericsson, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in air engines."—Dated 8th December, 1858.

5568. John Robertson, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in musical instruments."—Dated 8th December, 1858.—(English Patent, expiring 17th November, 1872.)

5569. Messrs. Huse, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "An improved apparatus for propelling and governing vessels."—Dated 8th December, 1858.

5570. Sébastien Grandis, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A system of railway wedges."—Dated 8th December, 1858.—(Sardinian Patent, expiring 19th November, 1872.)

5571. Stephens, jun., and Jenkins, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of rails of railways."—Dated 8th December, 1858.

5572. Ernest Courade de Caranza, of 97, Rue Neuve des Petits Champs, Paris, for "A system of furnaces for manufacturing lighting gas, and apparatus for purifying the same."—Dated 8th December, 1858.

5573. Pierre Fosse, of 106, Route d'Orléans, Montrouge, for "Brick flag-stones of printed baked clay."—Dated 8th December, 1858.

5574. Charles Hippolyte Mourceau, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of carpets for furniture."—Dated 8th December, 1858.

5575. Sellerier and Mrs. Grazon, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, a Certificate of Addition to their Patent of 24th September, 1858, for "Applying a substance for supporting dressing articles of ladies."—Dated 8th December, 1858.

5576. Guinnebrrt and Morel, the former of 20, Rue de la Harpe, the latter of 8, Rue du Renard St. Saveur, Paris, for "Manufacture of chlorine."—Dated 8th December, 1858.

5577. François Cavayé, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 7th July, 1857, for "A swimming apparatus."—Dated 8th December, 1858.

5578. Pierre Antoine de Gemini, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 17th December, 1857, for "A process for inserting wicks into candles."—Dated 8th December, 1858.

5579. Xavier Lenormand, represented by Amouroux, ef 333, Rue St. Martin, Paris, for "Improvements in corn-mills."—Dated 9th December, 1858.

5580. Michel Laurent Abadie, of 5, Rue du Parc Royal, Paris, for "A kind of matches."—Dated 9th December, 1858.

5581. Van Burer Ryerson, represented by Fleischman, of 27, Boulevart des Italiens, Paris, for "Improvements in submarine works."—Dated 9th December, 1858.—(American Patent, expiring 19th October, 1872.)

5582. George Joseph Oudotte, of 83, Rue d'Allemagne, and of 14, Passage Montier, Petite Villette, for "A system of mechanical horses and carriages."—Dated 9th December, 1858.

5583. Hiram Hutchinson, of 102, Rue Richelieu, Paris, for "A mode of obtaining figures or designs on stuffs, leather, or other tissues, by means of india rubber or other similar substances."—Dated 9th December, 1858.

5584. Emile Armand Meudt, of 24, Rue des Lilas, Belleville, for "A system of heating."—Dated 9th December, 1858.

5585. Julien Aléxandre Alphonse Bonnin, of 59, Rue de Grenelle, St. Germain, for "Assembling cast-iron pipes, by means of conical dovetails with screw ribs, for the conveyance of water or gas, and which may be mounted and unmounted in a cold state."—Dated 9th December, 1858.

5586. François Régis Fialon, of 29, Rue du Mail, Paris, for "Ladies' bonnets of esparto of one single piece, and without frame."—Dated 9th December, 1858.

5587. George Edward Chenoweth, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in harvesting machines."—Dated 9th December, 1858.—(English Patent, expiring 30th March, 1872.)

5588. Emile Victor Michel Enault, of 29, Rue Montorgueil, Paris, for "Leather springs, being a

substitute for steel springs in petticoats."—Dated 9th December, 1858.

5589. Joseph Jean Marcais, of 132, Rue de Rivoli, Paris, for "Arrangements in Bunsen's battery, and mode of fixing the diaphragms of fulminating paper, and applying the same to Daniel's battery."—Dated 10th December, 1858.

5590. Hippolyte Lecornu, represented by Dufay, of 110, Rue de Rivoli, Paris, for "An hydropneumatic mill."—Dated 10th December, 1858.

5591. John Bethell, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in purifying coal gas."—Dated 10th December, 1858.

5592. John Bradley Lloyd, with Favie, of 12, Rue du Faubourg St. Martin, Paris, for "A process for rolling sheet-iron."—Dated 10th December, 1858.

5593. Jean Francisque Antonin Gravier, of 45, Avenue de Clichy, Batignolles, for "A rotary knitting machine."—Dated 10th December, 1858.

5594. Charles Adolphe Baudry, of 15, Rue Malher, Paris, for "A system of cartridge-boxes."—Dated 10th December, 1858.

5595. Messrs. Fontaine, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A mode of cutting gloves."—Dated 10th December, 1858.

5596. Jean Baptiste Falguière, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 10th September, 1857, for "A system of mills with vertical millstones, worked at a great speed."—Dated 10th December, 1858.

5597. Price Griffiths, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in the manufacture of coupling-boxes and keys for fastening drums, pulleys, fly-wheels, &c. on axles."—Dated 11th December, 1858.—(English Patent, expiring 25th May, 1872.)

5598. Louis Charles Riottot, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 21st November, 1857, for "Improvements in penholders, pencil-cases, &c."—Dated 11th December, 1858.

5599. Félix Stanislas Mongelard, of 6, Rue de Singer, Passy, for "A puzzle mechanism applicable to cigar-cases, &c."—Dated 11th December, 1858.

5600. François Blanckhart, represented by Libert, of 4, Rue Cadet, Paris, for "Breech-loading guns."—Dated 11th December, 1858.

5601. Pierre Carmien, of 31, Rue de Bretagne, Paris, a Certificate of Addition to his Patent of 9th November, 1858, for "An hour-glass, for regulating electrical clocks."—Dated 11th December, 1858.

5602. Mrs. Legras-Deschamps, of Boulevart de la Gare d'Ivry, Commune d'Ivry, for "A powder for improving the skin."—Dated 11th December, 1858.

5603. Léonard François Lion, of 15, Rue de Gavel, Grenelle, for "A machine for making riveted pins for foot-coverings."—Dated 11th December, 1858.

5604. Napoléon Marc, of 7, Rue Ferdinand, Faubourg du Temple, Paris, a Certificate of Addition to his Patent of 16th December, 1857, for "A process for manufacturing waddings."—Dated 11th December, 1858.

5605. Pierre Averseng, of 42, Rue St. Eustache, Paris, for "Elastics for mattresses, seats, &c."—Dated 11th December, 1858.

5606. François Norbert Servais, of 215, Rue de Paris, Belleville, for "Artificial flowers on the upper part of fans."—Dated 11th December, 1858.

5607. Pierre Armand DeFontainemoreau, of 5, Rue Gailloy, Paris, for "Improvements in the treatment of fat, neutral, acid substances, &c."—Dated 11th December, 1858.

5608. Henri Louis Maril, of 10, Rue St. Ferdinand aux Ternes, a Certificate of Addition to his Patent of 12th October, 1858, for "Economical construction of pavilions and houses."—Dated 11th December, 1858.

5609. Rudolphe Wappenstein, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Improvements in the manufacture of artificial-whalebone for umbrellas, parasols, &c."—Dated 11th December, 1858.—(English Patent, expiring 8th June, 1872.)

5610. Auguste Gilles, of 203, Rue de Robec, Rouen, département de la Seine Inférieure, for "Floors of ovens for baking paste."—Dated 13th December, 1858.

5611. Messrs. Fraisse-Brossard, of Rue de la Paix, St. Etienne, département de la Loire, a Certificate of Addition to their Patent of 6th October, 1858, for "A system of dyeing velvet ribbons with all colours, and black tints."—Dated 16th December, 1858.

5612. Charles Gornet, of Troyes, département de l'Aube, for "A kind of pen-holder."—Dated 16th December, 1858.

5613. Jean Baptiste Hippolyte Manigler, of 1, Rue Royale, St. Etienne, département de la Loire, a Certificate of Addition to his Patent of 19th December, 1857, for "A means of applying caoutchouc varnish on metals and other corrosive substances."—Dated 16th December, 1858.

5614. Cassard and Terrolle, of 18, Quai Baco, Nantes, département de la Loire Inférieure, for "A machine for cutting, crushing, or triturating furze or similar plants."—Dated 17th December, 1858.

5615. Benjamin Leroux, of 7, Rue Boileau, Nantes, département de la Loire Inférieure, for "Drying and torrefying substances containing azote for agricultural purposes, so as to preserve their fertilizing power."—Dated 17th December, 1858.

5616. Claude Genevois, of Creusot, département de Saône et Loire, for "A system of screw-piston for tightening segments without removing the piston-plate."—Dated 18th December, 1858.

5617. Jean Baptiste Arthur Legros, of Tournan, département de Seine et Marne, for "An harvesting machine."—Dated 13th December, 1858.

5618. Etienne Jean Baptiste Mignan, of Melette, département de la Marne, a Certificate of Addition to his Patent of 19th December, 1857, for "A machine for destroying mice."—Dated 16th December, 1858.

5619. Pierre Jacques Théodore Jahan, of 65, Rue du Faubourg Bannier, Orléans, département du Loiret, a Certificate of Addition to his Patent of 5th December, 1856, for "A substitute for railway wedges and chairs."—Dated 17th December, 1858.

5620. Augustin Frédéric Brevard, of Tencin, département de l'Isère, for "Means of rendering vessels insubmersive, of extinguishing fires on board of vessels, and of raising sunken vessels."—Dated 18th December, 1858.

5621. Dujardin, of Lille, département du Nord, for "A printing apparatus applicable to manipulators of dial telegraphs of French railways, and to other purposes." — Dated 20th December, 1858.

5622. Jean Pierre Raissac, of 1, Place Maronne, Marseille, département des Bouches du Rhône, for "Manure which destroys insects."— Dated 13th December, 1858.

5623. Joseph Antoine Dalmas, of 44, Rue Haute Rotonde, Marseille, département des Bouches du Rhône, a Certificate of Addition to his Patent of 21st April, 1858, for "Inodorous pans for closets."—Dated 14th December, 1858.

5624. Henry Duchesne, of 30, Rue Condé, Dijon, département de la Côte d'Or, for "A cravat shirt without buttons."—Dated 15th December, 1858.

5625. Aléxis Joseph Damey, of Dôle, département du Jura, for "Manufacture of nuts."—Dated 16th December, 1858.

5626. Auguste Monnier and Co., of 2, Rue Théars, Marseille, département des Bouches du Rhône, a Certificate of Addition to their Patent of 9th May, 1856, for "A recipient for feeding steam boilers with a solution of wood ashes for the purpose of dissolving the salts and tartar therein." —Dated 16th December, 1858.

5627. Antoine Banneau, of St. Sylvestre, département de Lot et Garonne, for "A harvesting machine for cutting corn."—Dated 17th December 1858.

2628. Jean Baptiste Aimé Boulenger, of Auneuil, département de l'Oise, a Certificate of Addition to his Patent of 11th February, 1858, for "Inlaid mosaic flagstones of baked clay."—Dated 17th December, 1858.

5629. Jean Baptiste Vellu, of Auxerre, département de l'Youne, for "Rocking carriages."—Dated 17th December, 1858.

5630. Géminien Luppi, of 14, Rue des Augustins, Lyon, département du Rhone, for "Improvements in machines for undoing and woofing the thread of cocoons by the same operation."—Dated 18th December, 1858.

5631. Schorb and Gerin, of 5, Rue de Jarente, Lyon, département du Rhone, for "A rotary steam engine with a double action."—Dated 20th December, 1858.

5632. Pierre Marie Thevenet, of 32, Rue Rupin, Lyon, département du Rhone, for "A machine for piercing metals."—Dated 20th December, 1858.

5633. Pozier and Gougault, of Sedan, département des Ardennes, for "Mastic for cylinders."—Dated 21st December, 1858.

5634. Ricci and Co., represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of artificial wax flowers."—Dated 11th December, 1858.

5635. Delanoue, Leclère, and Cunat, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in syphons applicabls to apparatus for diluting absinthe and other liquids."—Dated 11th December, 1858.

5636. Théodore Félix Houpeaux, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of cartridges." —Dated 11th December, 1858.

5637. Brondel and Co., represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certiffcate of Addition to their Patent of 22nd May, 1858, for "An apparatus for utilizing waste steam."—Dated 11th December, 1858.

5638. Guillaume Baltz, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A writing desk with mechanical arrangements."—Dated 11th December, 1858.

5639. Théodore Marie Rabatté, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A machine for folding envelopes, paper bags, &c." —Dated 11th December, 1558.

5640. Jacques Etienne Feuillatre, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Sanitary pans for closets."— Dated 11fh December, 1858.

5641. Théodore Auguste Marie Sortais, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of telegraphic transmission."—Dated 11th December, 1858.

5642. Adolphe Durot, represented by Engel, of 31, Rue des Jeuneurs, Paris, for "Means of engraving cylinders for printing fabrics and paper."—Dated 13th December, 1858.

5643. Charles Calixte Grenier, of 12, Rue St. Claude au Marais, Paris, for "Rendering ropes impervious."—Dated 13th December, 1858.

5644. Louis Rolland, of 64, Rue du Château d'Eau, Paris, for "Hinges with stops."—Dated 13th December, 1858.

5645. Hugues Champonnois, of 8, Rue de la Tussienne, Paris, for "Extracting sugar from beetroot and other sacchariferous plants by means of alcohol."—Dated 13th December, 1858.

5646. Henri François Toussaint, of 5, Rue Bergère, Paris, for "Separating substances of the same volumen, according to their specific weight, by means of a column of water, and process for amalgamating those substances."—Dated 13th December, 1858.

5647. Jacques Noël Boneau, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "Manufacture of a tissue for braces on a weaving machine."—Dated 13th December, 1858.

5648. Léon Briquet, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Petticoats with moveable trimmings with or without tournure."—Dated 13th December, 1858.

5649. Alfred Christophe D'Yochet, represented by Bos-Darnis, of 39, Rue de l'Echiquier, Paris, a Certificate of Addition to his Patent of 12th December, 1856, for "Improvements in instruments for sinking artesian wells."—Dated 13th December, 1858.

5650. Joseph Hall, represented by Rowland, of 224, Rue de Rivoli, Paris, for "Improvements in slide clack valves of steam engines."—Dated 14th December, 1858.—(English Patent, expiring 12th June, 1872.)

5651. Jean Baptiste Jara Mignon, of 149, Rue Ménilmontant, Paris, for "A system of turntables."—Dated 14th December, 1858.

5652 Clair Frédéric Laurent, of 47, Rue de Sèvres, Paris, for "A kind of mosaic."—Dated 14th December., 1858.

5653. Lleyd and Edwards, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in aquaria, fish-ponds, basins, vessels, and recipients for keeping fish and live water animals, and water plants or products."—Dated 14th December, 1858.—(English Patent, expiring 17th July, 1872.)

5654. Miller and Fear, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A system and apparatus for winding thread of silk, cotton, or other filamentous or fibrous substances on bobbins for net and lace frames."—Dated 14th December, 1858.—(English Patent, expiring 18th November, 1872.)

5655. Paul Charles Charpantier, represented by Mathieu, of 45, Rue St. Sébastien, Paris. for "A subterraneous and external system of irrigation, applicable to agriculture and horticulture."—Dated 14th December, 1858.

5656. Petin, Gaudet, and Co., and Kreutzbergers, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Mechanical processes for boring guns."—Dated 14th December, 1858.

5657. Claude Desbeaux, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 27th March, 1858, for "A piece of furniture for keeping books and drying cigars."—Dated 14th December, 1858.

5658. Favelier and Co., of 48, Rue Charlot, Paris, for "Applying ornamental stuffs on collars, bracelets, and glass trinkets."—Dated 14th December, 1858.

5659. Amand Blot, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 11th November, 1854, for "Manufacture of gold, silver, and other rings."—Dated 14th December, 1858.

5660. Auguste François Chapiseau, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Silvering white metal, and applying that process to small and large gold articles."—Dated 14th December, 1858.

5661. Hermann and Rheinauer, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of lubricating axles of carriages and transmission arbors."—Dated 14th December, 1858.

5662. Jean François Fuzellier, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Manufacture of hinges, hasps, joints, &c."—Dated 14th December, 1858.

5663. Gabriel Edouard Fournier, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 24th December, 1857, for "A boring system."—Dated 14th December, 1858.

5664. Guillaume Ferdinand de Doutret, of 16, Rue de l'Université, Paris, for "An economical process or means of obtaining dynamic electricity."—Dated 15th December, 1858.

5665. Duval and Digeon, of 5, Rue Monsigny, Paris, for "An apparatus for irrigating and for clearing pipes applicable to drainage."—Dated 15th December, 1858.

5666. Pierre François Barbé, of 76, Rue Montmartre, Paris, for "A liquid for 'foot baths.'"—Dated 15th December, 1858.

5667. Chevillot and Givelet, of 4, Rue Beaurepaire, Paris, for "A machine for working leather."—Dated 15th December, 1858.

5668. Samuel Lees, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in the manufacture of mineral oil."—Dated 15th December, 1858.

5669. Charles Victor Auguste Baux, represented by Mathieu, of 45, Rue St, Sébastien, Paris, for "A machine for washing leather waste for the manufacture of glue."—Dated 15th December, 1858.

5670. William Davis, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in awls and other articles."—Dated 15th December, 1858.—(English Patent, expiring 10th June, 1872.)

5671. Joseph Marie Legris, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 25th January, 1856, for "A combined counter and regulator."—Dated 15th December, 1858.

5672. Joseph Marie Legris, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 18th February, 1854, for "A gas regulator."—Dated 15th December, 1858.

5673. Peugeot Brothers, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A universal wrench."—Dated 15th December, 1858.

5674. Louis Rudolphe Bodmer, represented by Tolhausen, of 35, Boulevart Bonne Nouvelle, Paris, for "Improvements in hydraulic oil presses."—Dated 15th December, 1858.

5675. Théodore Hermann Diesel, of 38, Rue Notre Dame de Nazareth, Paris, for "A toy."—Dated 16th December, 1858.

5676. Armand Adolphe Lemoine, domiciled 34, Rue St. Paul, Paris, a Certificate of Addition to his Patent of 10th February, 1855, for "A candlestick for public sales."—Dated 16th December, 1858.

5677. Paul Alexandre Poutierre, of 15, Rue des Moines Prolongée, Batignolles, for "A system of rails for railways."—Dated 16th December, 1858.

5678. Julien Telle, of 21, Rue d'Angoulême du Temple, Paris, for "An apparatus for preventing persons from being run over by carriages."—Dated 16th December, 1858.

5679. Nathan Defries, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in gas-counters."—Dated 16th December, 1858.—(English Patent, expiring 2nd July, 1872.)

5680. Binet and Colignon, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Tents with jointed frames."—Dated 16th December, 1858.

5681. Charles Girard Ernest Jacquot, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A barometric apparatus for evaporating or drying any substance."—Dated 16th December, 1858.

5682. Antoine Louis Adolphe Favier, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "An atmospheric apparatus for tanning, imbibing, and strengthening leather or tissues."—Dated 16th December, 1858.

5683. Louis Fleurus Gustave Petitpierre-Pellion, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A stereoscopic apparatus."—Dated 16th December, 1858.

5684. Pierre Pourret, of Rue Henry IV., Bordeaux, département de la Gironde, a Certificate of Addition to his Patent of 24th December, 1857, for "A system of glass stoppers fixed at a high pressure."—Dated 20th December, 1858.

5685. Schlumberger and Co., of Guebwiller, département du Haut Rhin, for "A machine for sorting, stretching, and cleaning cotton and other filamentous substances."—Dated 21st December, 1858.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions, &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson. (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent Nos.* 33 *and* 85, *respectively dated* 8*th April*, 1626, *and* 23*rd July*, 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pitcoale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated* 22*nd February*, 1620, *and* 2*nd May*, 1638. Price 8*d.*
5. Description of the nature and working of the patent Water scoop Wheels invented by William Whelee, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated* 24*th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset, Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent, No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will, III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated* 7*th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent, No.* 602, *dated* 16*th March* 1744.) Price 1*s.*

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in he Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. Curtis for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities :—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).
Macclesfield (*Useful Knowledge Society*).
Manchester (*Chetham Hospital*).
———— (*Camp Field*).
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*).
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Society of Arts (*John Street, Adelphi*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*)
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States :—

Public Offices.

Admiralty, Steam Department.
———— Surveyor of Navy.
———— Deptford Dockyard.
———— Woolwich ditto.
———— Sheerness ditto.
———— Devonport ditto.
———— Portsmouth ditto.
———— Chatham ditto.
———— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec; Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin.
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, as translated or transcribed from Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240 and 348.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*

The following are in the press:—

PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE
Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 534. **TUESDAY, FEBRUARY 15, 1859.** **Price 2d.**

Notices to Proceed.

NOTICE is hereby given that

2198. JOHN CHAPPELL HOLMAN, of London Street, Fitzroy Square, in the county of Middlesex, and EDWARD WALTER HOLMAN, of Grafton Street, Fitzroy Square, in the same county, Pianoforte Manufacturers, have given notice at the Office of the Commissioners of their intention to proceed with their application for Letters Patent for the invention of "An improved pianoforte action."

As set forth in their petition, recorded in the said office on the 2nd day of October, 1858.

2201. And RICHARD DOLBY and JOHN GATES, of Liverpool, in the county of Lancaster, Enamellers, have given the like notice in respect of the invention of "An improved process of transfer printing, and ornamenting on glass and other transparent substances."

2205. And FRANCIS TREVITHICK, of Penzance, in the county of Cornwall, has given the like notice in respect of the invention of "Improvements in applying sails and keels to boats and vessels."

As set forth in their respective petitions, both recorded in the said office on the 4th day of October, 1858.

2212. And GEORGE HAMILTON, of St. Martin's-le-Grand, and WILLIAM HENRY NASH, of Poplar, Engineer, have given the like notice in respect of the invention of "Improvements in locks."

As set forth in their petition, recorded in the said office on the 5th day of October, 1858.

2221. And CHRISTOPHER HILL, of the Great Western Railway, Chippenham Station, has given the like notice in respect of the invention of "Improvements in omnibuses, and in apparatus for upholding the windows of omnibuses and other carriages."

2225. And CHARLES BAYLIS, of the Poultry, in the city of London, Solicitor, has given the like notice in respect of the invention of "An improved mode of constructing and arranging under-ground chambers, in populous cities or towns, for the reception of gas and water pipes and telegraph wires."

As set forth in their respective petitions, both recorded in the said office on the 6th day of October, 1858.

2226. And DONALD NICOLL, of the firm of H. J. and D. Nicoll, No. 114, Regent Street, and No. 22, Cornhill, London, has given the like notice in respect of the invention of "Improvements in the manufacture of cloaks and other garments, and for their application to purposes to which they have not hitherto been applied."

2229. And JEAN CLAUDE NOUVEAU, of No. 2, Rue Sainte Appoline, Paris, in the empire of France, and of No. 45, Essex Street, Strand, London, has given the like notice in respect of the invention of "Improvements in stopping or stoppering bottles, and other vessels containing non-gaseous liquids."

2230. And DAVID NAYLOR, of Stockport, in the county of Chester, Carpet Manufacturer, has given the like notice in respect of the invention of "Improvements in looms for weaving carpets and other fabrics, and in the methods of manufacturing the same."

As set forth in their respective petitions, all recorded in the said office on the 7th day of October, 1858.

2234. And JOZÉ LUIS, of No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "A new cutting and stamping press."—A communication.

2235. And JAMES LEETCH, of Margaret Street, Cavendish Square, in the county of Middlesex, Gun Maker, has given the like notice in respect of the invention of "An improved method of constructing fire-arms."

2236. And Edward Villiers Rippingille, of the parish of Chorlton-upon-Medlock, Greenhays, Manchester, Artist, has given the like notice in respect of the invention of "The improvement of fire arms and artillery."

2237. And Thomas Waller, of Rose Lane, Ratcliff, Engineer, has given the like notice in respect of the invention of "Improvements in stoves and fire places, for the prevention of smoke, and the better ventilation of apartments."

2242. And No. Thomas Roberts and John Dale, of Manchester, in the county of Lancaster, Manufacturing Chemists, have given the like notice in respect of the invention of "An improved process for obtaining salts of soda and other alkalies."

2244. And Alfred Felton, of No. 184, Brick Lane, Spitalfields, in the county of Middlesex, Currier, has given the like notice in respect of the invention of "Improvements in instruments used for inserting and fixing metal eyelets."

2247. And Frederick William Gerhard, of Tichborne Street, Haymarket, in the county of Middlesex, Mineral Surveyor, has given the like notice in respect of the invention of "Improvements in the manufacture of aluminium and sodium."

As set forth in their respective petitions, all recorded in the said office on the 8th day of October, 1858.

2252. And William Crofts, of Lenton Terrace, Park Side, Nottingham, Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture of fabrics by bobbin net, or twist lace machinery."

As set forth in his petition, recorded in the said office on the 9th day of October, 1858.

2259. And Joseph Beattie, of Lawn Place, South Lambeth, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in locomotive and other steam engines."

As set forth in his petition, recorded in the said office on the 11th day of October, 1858.

2269. And John Field Swinburn, of Birmingham, in the county of Warwick, Gun Manufacturer, has given the like notice in respect of the invention of "Improvements in fire-arms."

As set forth in his petition, recorded in the said office on the 12th day of October, 1858.

2280. And Robert Ridley, of Low Wortley, in the county of York, Engineer, has given the like notice in respect of the invention of "Improvements in safety cages for mine shafts."

2283. And Anton Benda, of 79, Basinghall Street, in the city of London, Importer of Foreign Goods, has given the like notice in respect of the invention of "Improvements in the manufacture of models of the human and other figures, to be used as toys for tuition, and for other purposes."—A communication.

As set forth in their respective petitions, both recorded in the said office on the 13th day of October, 1858.

2291. And Thomas Ingram, of Bradford, in the county of York, Foreman, has given the like notice in respect of the invention of "Improvements in means or apparatus for signalling between the parts of a train of carriages."

2292. And William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in tanning hides, and in apparatus employed therein."—A communication from Antoine Louis Adolphe Favier.

2294. And Henry Martin, of Old Kent Road, in the county of Surrey, and of 8, Scott's Yard, in the city of London, has given the like notice in respect of the invention of "Improvements in separating starch from gluten in apparatus used therein, and also in preparing cement from gluten."

As set forth in their respective petitions, all recorded in the said office on the 14th day of October, 1858.

2306. And George Tomlinson Bousfield, of Loughborough Park, Brixton, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in machinery for cutting the threads of wood screws."—A communication from New York, United States of America.

As set forth in his petition, recorded in the said office on the 15th day of October, 1858.

2323. And Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E. C., Editor of the Mechanics' Magazine and Patent Agent, has given the like notice in respect of the invention of "Improvements in the manufacture of small chains and links for the same."—A communication from H. Jesson, of Paris.

2326. And Alfred Wilks Drayson, of Plumstead, in the county of Kent, Captain in the Royal Artillery, and Charles Richard Binney, of Woolwich, in the same county, Captain in the Royal Engineers, have given the like notice in respect of the invention of "Improvements in submarine telegraphic cables."

As set forth in their respective petitions, both recorded in the said office on the 18th day of October, 1858.

2338. And John Grant, of Hyde Park Street, in the county of Middlesex, Captain late Royal Artillery, has given the like notice in respect of the invention of "Improvements in constructing and arranging ovens suitable for baking bread."

As set forth in his petition, recorded in the said office on the 19th day of October, 1858.

2364. And Robert Kennedy and James Armstrong, both of Lisburn, in the kingdom of Ireland, has given the like notice in respect of the invention of "An improved kiln for drying grain."

2365. And Charles Clay, of Walton Grange, Wakefield, in the county of York, has given the like notice in respect of the invention of "Improvements in apparatus for harrowing, scarifying, and cultivating land."

As set forth in their respective petitions, both recorded in the said office on the 22nd day of October, 1858.

2387. And Benjamin Goodfellow, of Hyde, in the county of Chester, Engineer, has given the like

notice in respect of the invention of "Certain improvements in steam engines."
As set forth in his petition, recorded in the said office on the 27th day of October, 1858.

2410. And JAMES SMITH, of the city of Bristol, Horse-hair Seating and Curled-hair Manufacturer, has given the like notice in respect of the invention of "Improved hats and coverings for the head."
As set forth in his petition, recorded in the said office on the 28th day of October, 1858.

2487. And WILLIAM ZIERVOGEL, of Hettstädt, near Eisleben, in the kingdom of Prussia, has given the like notice in respect of the invention of "Improvements in apparatus for distilling products from bituminous coal, schist, peat, and other like substances."
As set forth in his petition, recorded in the said office on the 6th day of November, 1858.

2493. And EMILE ALCAN, of No. 4, Coleman Street Buildings, in the city of London, Merchant, has given the like notice in respect of the invention of "An improved method of treating, of preparing materials to be manufactured into paper applicable to lie-washings in general."—A communication.
As set forth in his petition, recorded in the said office on the 8th day of November, 1858.

2648. And ROBERT NELSON, of New York, in the United States of America, temporarily residing at Ramsey, in the Isle of Man, Mariner, has given the like notice in respect of the invention of "Improvements in apparatus for raising and lifting water and other liquids."
As set forth in his petition, recorded in the said office on the 22nd day of November, 1858.

2809. And MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, No. 39, Rue de l'Echiquier, Paris, in the empire of France, has given the like notice in respect of the invention of "An improved apparatus for ascertaining and registering the work of certain kinds of lever balances."—A communication.
As set forth in his petition, recorded in the said office on the 7th day of December 1858.

2908. And SAMUEL HUNTER, of Newcastle-upon-Tyne, Gentleman, has given the like notice in respect of the invention of "Improvements in the construction of anchors."
As set forth in his petition, recorded in the said office on the 20th day of December, 1858.

2954. And JOHN RADLEY, of No. 22, Upper Sackville Street, in the city of Dublin, Hotel Keeper, has given the like notice in respect of the invention of "An improved cooking apparatus."
As set forth in his petition, recorded in the said office on the 27th day of December, 1858.

2995. And SAMUEL STEPHEN BATESON, of No. 17, Bolton Street, May Fair, in the county of Middlesex, Barrister-at-Law, has given the like notice in respect of the invention of "Improvements in generating steam."
As set forth in his petition, recorded in the said office on the 30th day of December, 1858.

68. And EDWARD COBBOLD, of Hendon, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in instruments for writing and marking, and for the preparation of certain substances for conversion into instruments for writing and marking, and for the application to useful purposes of certain products arising from preparation aforesaid."
As set forth in his petition, recorded in the said office on the 8th day of January, 1859.

82. And BENJAMIN ROBBIN, of Yarmouth, Nova Scotia, Master Mariner, has given the like notice in respect of the invention of "Improvements in the machinery for working pumps."
As set forth in his petition, recorded in the said office on the 11th day of January, 1859.

221. And WILLIAM TASKER the younger, of the firm of William Tasker and Sons, of Waterloo Iron Works, near Andover, in the county of Hants, Engineers, have given the like notice in respect of the invention of "Improvements in ploughs."
As set forth in his petition, recorded in the said office on the 24th day of January, 1859.

224. And RUDOLPH BODMER, of 2, Thavies' Inn, Holborn, in the city of London, has given the like notice in respect of the invention of "Improved resin and resinous substances."—A communication from Mr. Jean Creuseton, residing at Paris, in the empire of France.
As set forth in his petition, recorded in the said office on the 25th day of January, 1859.

237. And OBED HUSSEY, of Baltimore, United States of America, has given the like notice in respect of the invention of "Improvements in the construction of ships' blocks."
As set forth in his petition, recorded in the said office on the 26th day of January, 1859.

250. And JAMES BUCKINGHAM, of Walworth Common, in the county of Surrey, Civil Engineer, and GEORGE SALT, of Saltaire, near Bradford, in the county of York, Manufacturer, have given the like notice in respect of the invention of "Improvements in the construction and adaptation of drawing, and other rollers employed in drawing and compressing fibres, which improved construction of rollers is also applicable in compressing fabrics."
As set forth in their petition, recorded in the said office on the 27th day of January, 1859.

261. And ROBERT GRIFFITHS, of No. 69, Mornington Road, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in regulating the pressure of steam in steam boilers, and in preventing the accumulation of deposit therein."—Partly a communication from Charles Nelson Copeland, residing at New York.

263. And ANDREW BARCLAY, of Kilmarnock, in the county of Ayr, North Britain, Engineer, has given the like notice in respect of the invention of "Improvements in obtaining and distributing or applying electricity and magnetism."
As set forth in their respective petitions, both recorded in the said office on the 28th day of January, 1859.

304. And JOHN HIRST, junior, of Dobscross, in Saddleworth, in the county of York, Merchant, and JAMES HOLLINGWORTH, of the same place, Joiner, have given the like notice in respect of the invention of "Improvements in the construction of power looms."

As set forth in their petition, recorded in the said office on the 2nd day of February, 1859.

---

325. And JACQUES MARIE EDOUARD MASSON, of Rue des Fossés St. Thomas, Evreux, France, Gentleman, has given the like notice in respect of the invention of "Improvements in apparatus to facilitate working under water."

As set forth in his petition, recorded in the said office on the 4th day of February, 1859.

And notice is hereby further given, that all persons, having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

15th February, 1859.

1866. PAUL EMILE CHAPPUIS, Patentee and Manufacturer of Daylight Reflectors and Stereoscopes, 69, Fleet Street, London, E.C., for an invention of "Improvements in stereoscopes and stereoscopic apparatus."—Dated 16th August, 1858.

1868. LOUIS ADOLPHE HERRMANN and ERNEST INNOCENT EMILE HERRMANN, Engineers, of Paris, in the empire of France, for an invention of "Improvements in connecting together pipes, tubes, or ways for the conveyance of water or other fluid, and in means or apparatus for regulating the flow or discharge and supply of such fluid, and in means or apparatus for facilitating the forming of such connections."—Dated 16th August, 1858.

1872. WARDLE EASTLAND EVANS, Musical Instrument Maker, of Norfolk Street, Sheffield, in the county of York, for an invention of "Improvements in harmoniums, concertinas, organs, and other similar keyed instruments."—Dated 17th August, 1858.

1875. JOHN NORTON, of Rosherville, in the county of Kent, late Captain in Her Majesty's 34th Regiment, for an invention of "Improvements in projectiles."—Dated 17th August, 1858.

1876. FRANCIS SHAW, of Siddal's Road, Derby, in the county of Derby, Silk Throwster and Silk Merchant, for an invention of "Improvements in spindles for the spinning of silk and other fibrous material."—Dated 17th August, 1858.

1901. FRANÇOIS FRÉDÉRIC DELPY, of Paris, France, Jeweller, for an invention of "Improvement or improvements in metallic stay busces."—Dated 21st August, 1858.

1993. GEORGE PRICE, of Wolverhampton, in the county of Stafford, Iron Safe Manufacturer, and WILLIAM DAWES, of Wolverhampton aforesaid, Engineer, for an invention of "Improvements in steam engines, steam boilers, and apparatus connected therewith."—Dated 2nd September, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 12th February*, 1859, *inclusive.*)

11th February.

363. JOHN MILLS, of the firm of Mills and Whittaker, of Oldham, in the county of Lancaster, Engineer, for an invention of "Certain improvements in the slide valves of steam engines."—Dated 13th February, 1856.

380. WALTER MCFARLANE, of Glasgow, in the county of Lanark, North Britain, Engineer, for an invention of "Improvements in building and structural works and fittings in metal."—Dated 14th February, 1856.

385. EDMUND MOREWOOD and GEORGE ROGERS, of Enfield, in the county of Middlesex, for an invention of "Improvements in drying and coating iron and copper."—Dated 14th February, 1856.

403. HYAM JACOB HYAMS, of Stanhope Street, Hampstead Road, in the county of Middlesex, Gas Meter Maker, for an invention of "Improvements in the construction of gas meters."—Dated 16th February, 1856.

405. ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improvements in the construction of steam-engines for the purpose of converting the reciprocating motion into a rotary motion, and for operating the side valves."—A communication.—Dated 18th February, 1856.

12th February.

390. EDOUARD DEISS, of Paris, in the empire of France, Manufacturer of Chemical Products, for an invention of "A method or methods of and apparatus for extracting oils, fats, greases, and resins from bones, raw wool, seeds, and other substances containing the same, and recovering a certain agent employed in the process."—Dated 14th February, 1856.

Erratum in Journal of 11th February.

2924. For "Renney" read "Kenney."

FOREIGN PATENTS.

FRANCE.

CURRENT LIST of PATENTS of Invention and Certificates of Addition.

1858.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

NOTE.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

5686. ALEXANDRE DAUDY, of 8, Rue Gaignolle, Limoges, département de la Haute Vienne, for "A hygienic coral (for children)."—Dated 22nd December, 1858.

5687. FRÉDÉRIC MAIGRON, Quartier St. Louis, Marseille, département des Bouches du Rhône, for "A machine for cutting old ropes."—Dated 20th December, 1858.

5688. MICHEL LOUP, of 34, Rue de l'Hôpital, Givors, département du Rhône, a Certificate of Addition to his Patent of 29th October, 1857, for "A combined hydraulic counter and magnet-motor." — Dated 21st December, 1858.

5689. LÉON CASIMIR TAUFFRET, of Cours St. Louis, Marseille, département des Bouches du Rhône, for "A system of springs and levers for wagons."—Dated 21st December, 1858.

5690. GUSTAVE DEROGNAT, of 21, Port St. Clair, Lyon, département du Rhône, for "Improvements in applying velvet on various tissues." — Dated 21st December, 1858.

5691. LOUIS DUPIR, of St. Leux d'Esserent, département de l'Oise, for "An apparatus for clearing fecula of stones." — Dated 22nd December, 1858.

5692. JACQUES BRUN, domiciled with Gerest, of 2, Rue du Grand Moulin, St. Etienne, département de la Loire, for "A system of unmounting Lefaucheux' gun-barrels."—Dated 22nd December, 1858.

5693. PIERRE JACQUES DORMOY, of 89, Rue St. Vincent de Paul, Bordeaux, département de la Gironde, a Certificate of Addition to his Patent of 22nd December, 1857, for "A mode of lubricating."—Dated 22nd December, 1858.

* For the French Patent Law see No. 228 of this Journal.

5694. FÉLIX LEROY, of Bapaume, département de la Seine Inférieure, for "A machine for beating and cleaning cotton."—Dated 22nd December, 1858.

5695. VIDAL and OLIVEAU, of 7, Quai de la Douane, Bordeaux, département de la Gironde, a Certificate of Addition to their Patent of 24th December, 1857, for "A cover for cigaret paper." —Dated 22nd December, 1858.

5696. ALPHONSE GELLY, with Fauquet-Lemaitre, Rouen, département de la Seine Inférieure, for "A machine with a hot chamber, for sizing textile substances."—Dated 23rd December, 1858.

5697. JULES RENÉ CHANTOISEAU, of Liseaux, département du Calvados, for "A process for felting cloth whilst fulling the same."—Dated 23rd December, 1858.

5698. JULES JANNESSE, of 5, Rue Tours de Gassies, Bordeaux, dèpartement de la Gironde, a Certificate of Addition to his Patent of 9th October, 1858, for "An apparatus for mixed navigation." — Dated 23rd December, 1858.

5699. HENRY KURTH, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in mountings of umbrellas, parasols, &c."—(American Patent, expiring 20th May, 1872.)—Dated 16th December, 1858.

5700. JOHN GEORGE TAYLOR, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 19th November, 1858, for "Improvements in writing desk articles, &c."—Dated 16th December, 1858.

5701. JEAN BAPTISTE LOISEAU, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 8th November, 1858, for "Trimmings of ladies' mantles and of similar dresses."—Dated 16th December, 1858.

5702. FRANÇOIS SILVESTRE, domiciled 9, Rue de Bondy, Paris, for "A colouring substance."—Dated 16th December, 1858.

5703. FÉLIX AROUX, of 2, Rue de la Feuillade, a Certificate of Addition to his Patent of 14th July, 1857, for "Processes for cultivating gramineous plants."—Dated 17th December, 1858.

5704. ADRIEN RIFFARD, domiciled with Reeves, of 5, Rue de la Tour, Passy, for "A process for retting textile plants."— Dated 17th December, 1858.

5705. ANDRÉ JULIEN JOSEPH ROBERTI, of 7, Chemin de Ronde de la Barrière de Ménilmontant, for "Frames of portmonnaies without rivetting." —Dated 17th December, 1858.

5706. HENRI BOSSHARD, of 87, Rue de Ménilmontant, Paris, for "A machine for glueing wadding." —Dated 17th December, 1858.

5707. PIERRE FRANÇOIS GUILLOT, of 29, Route de Clichy, near the Barrière de Fontainbleau, a Certificate of Addition to his Patent of the 3rd November, 1858, for "A process for controlling telegraphic messages, &c."—Dated 17th December, 1858.

5708. VICTOR LEVASSEUR, of 125, Rue d'Allemagne, à la Villette, for "A system of cupboard with a looking glass."—Dated 17th December, 1858.

5709. Jean Jacques Anatole Bouquet de la Grye, of 38, Rue de Verneuil, Paris, for "A barometer."—Dated 17th December, 1858.

5710. Henri Arrault, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A case of military surgical instruments."—Dated 17th December, 1858.

5711. Henri Arrault, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Manufacturing natural mineral water by means of lozenges."—Dated 17th December, 1858.

5712. Jean Léandre Clément, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 26th May, 1858, for "Pianos with a continuous and mixed action, &c."—Dated 17th December, 1858.

5713. Jean Louis Nestor Fourneaux, of 31, Avenue de St. Cloud, Passy, a Certificate of Addition to his Patent of 19th August, 1857, for "Improvements in expressive organs."—Dated 17th December, 1858.

5714. Claude Mamès Augustin Marion, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Arrangements of boxes for preserving nitrated paper for day and night photographs."—Dated 17th December, 1858.

5715. Constant Christinet, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Manufacture of a liqueur."—Dated 17th December, 1858.

5716. Emile Jacques Bertin, of 40, Rue de la Chausée d'Antin, Paris, for "A kind of gloves."—Dated 18th December, 1858.

5717. Ferdinand Dancart, represented by Fringant, with Masse, of 10, Rue de Provence, Paris, for "A railway-break, &c."—Dated 18th December, 1858.

5718. Stehelin and Co., represented by Stehelin, of 14, Rue de la Banque, Paris, for "A card with circular self-acting clearers."—Dated 18th December, 1858.

5719. Ferdinand Tavernier, of 38, Rue de l'Echiquier, Paris, for "Improvements in the manufacture of fulled stuffs."—Dated 18th December, 1858.

5720. Caulliez and D'Herbès, the former of Belleville, the latter of Passy, for "An apparatus for manufacturing Seltzer water."—Dated 18th December, 1858.

5721. Eugène Desclercs, represented by Therion, of 95, Boulevart Beaumarchais, Paris, for "Working lever presses by means of straps."—Dated 18th December, 1858.

5722. Louis Henri Cordier, domiciled with Laurent, of 73, Rue des Marais St. Martin, Paris, for "An harmonic key-board."—Dated 18th December, 1858.

5723. Hippolyte Charles Vion, of 52, Passage Vivienne, Paris, for "An electrical battery, called 'terrestrial atmospheric battery.'"—Dated 18th December, 1858.

5724. Joseph Marie Legris, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A so-called 'universal gas burner.'"—Dated 18th December, 1858,

5725. Jean Antoine Malzac, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the transmission of movement."—Dated 18th December, 1858.

5726. Nicolas Jean Baptiste Florimond Boucher, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of fire-engines and other pumps."—Dated 18th December, 1858.

5727. Munro and Campbell, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of capsules and other metallic articles."—Dated 18th December, 1858.—(English Patent, expiring 28th October, 1872.)

5728. Moisant and Co., represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 10th April, 1858, for "Processes for extracting lamp oil."—Dated 18th December, 1858.

5729. Louis Arnier, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 4th April, 1857, for "A system of applying the best known means to the production of steam."—Dated 18th December, 1858.

5730. Joachim Antoine Joseph Liebermann, of 19, Rue du Temple, Paris, a Certificate of Addition to his Patent of 2nd June, 1856, for "Improvements in the manufacture of fecula and starch."—Dated 18th December, 1858.

5731. René Gabriel Clerjaud, of 21, Rue de Grenelle Ste. Honoré, Paris, a Certificate of Addition to his Patent of 27th December, 1856, for "Aromatic wine punch."—Dated 18th December, 1858.

5732. Hortense Barnouillie Morcoux, of 22, Rue de Calais, Paris, a Certificate of Addition to her Patent of 1st June, 1858, "A kind of pens."—Dated 18th December, 1858.

5733. Adolphe Bouez, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A twisting apparatus for spooling wheels."—Dated 18th December, 1858.

5734. Courbe and Bourdin, the former of Montmartre, the latter of St. Denis, for "Casting stereotype plates for printing fabrics."—Dated 18th December, 1858.

5735. Jean Louis Vergniais, of 8, Rue Taitbout, Paris, for "A machine for manufacturing heads of bolts by stamping."—Dated 20th December, 1858.

5736. Sébastien Ley, of 2, Rue de la Fidélité, Paris, for "A gas carburator."—Dated 20th December, 1858.

5737. Midard Auguste Eugène Méresse, of 109, Boulevart Beaumarchais, Paris, for "Reproducing sketches of pictures and ornaments in oil, varnish, glue, &c."—Dated 20th December, 1858.

5738. Edmond Jules Camille Deville, of 54, Rue Madame, Paris, for "An apparatus for extinguishing fires in chimneys, &c."— Dated 20th December, 1858.

5739. Pierre Félix Varenne, of 2 (bis), Rue Vivienne, Paris, for "An apparatus for filtering the smoke of tobacco."—Dated 20th December, 1858.

5740. Denis Adolphe Ray, of 128, Rue Mouffetard, Paris, for "A system of match cases."—Dated 20th December, 1858.

5741. D. and U. Pressoir, of 63, Rue Quincampoix, Paris, for "Manufacture of paper and pasteboard."—Dated 20th December, 1858.

5742. John Robb, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in propellers of ships and vessels."—Dated 20th December, 1858.

5743. Laurent Marie René Péan, of 6, Rue Ste. Barbe, Paris, for "Improvements in inkstands with india-rubber or leather stoppers."—Dated 20th December, 1858.

5744. Pierre Antoine Camproger, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A so-called 'Pompadour nosegay holder."—Dated 20th December, 1858.

5745. Alfred Edmond Cornu, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A system of differential manometers with a column of mercury and a dial for measuring the pressure of atmospheres up to one thousand."—Dated 20th December, 1858.

5746. Jean Claude Durand, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of chain cables."—Dated 20th December, 1858.—(English Patent, expiring 29th March, 1872.)

5747. Jean Claude Durand, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of iron."—Dated 20th December, 1858.—(English Patent, expiring 30th March, 1872.)

5748. Jean Jules Petit, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Processes and apparatus for carbonizing and torrefying peat, wood and other fuel."—Dated 20th December, 1858.

5749. Ferdinand Chemin, of Rue, département de l'Yonne, for "Coverings of chamber-utensils for preventing the sensation of cold."—Dated 20th December, 1858.

5750. Louis Constant Desaint, of 7, Rue de l'Ecaille, Epernay, département de la Marne, for "Metallic capsules for wine and other liquids."—Dated 23rd December, 1858.

5751. Vincent Bay, of 13, Place des Reigneaux, Lille, département du Nord, for "Brickwork of boilers for breweries."—Dated 27th December, 1858.

5752. Victor Ferdinand Jeduneau, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An apparatus for sweeping public roads, and removing the mud therefrom."—Dated 10th December, 1858.

5753. André Gaupillat, François Illig, and Ernest Gaupillat, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Cartridges for Devisme revolvers, and all kinds of guns and pistols."—Dated 20th December, 1858.

5754. Pierre Jacques Eugène Jassemme, domiciled with Jassemme, of 46, Rue des Jeuneurs, Paris, for "A compressed-air turbine."—Dated 21st December, 1858.

5755. Jean Marie Delaroche, of 41, Rue de Grenelle St. Germain, Paris, for "A system of rocking doors applicable to furnaces and stoves."—Dated 21st December, 1858.

5756. Arthur Edmund Langlois, of 49, Rue de l'Ancry, Paris, a Certificate of Addition to his Patent of 14th April, 1858, for "Clearing paraffine."—Dated 21st December, 1858.

5757. Amédée Lavallée, of 11, Rue St. Gilles, Paris, for "Treating chromium iron by the wet process."—Dated 21st December, 1858.

5758. John Shaw, represented by Creuseton, of 12, Rue Godot de Mauroy, Paris, for "Manufacture of square and oblong bags, and apparatus employed thereat."—Dated 21st December, 1858.

5759. John Shaw, represented by Creuseton, of 12, Rue Godot de Mauroy, Paris, for "Manufacture of conical bags and apparatus employed thereat."—Dated 21st December, 1858.

5760. John Shaw, represented by Creuseton, of 12, Rue Godot de Maury, Paris, for "A machine whereby an infinite or perpetual feeding motion is obtained."—Dated 21st December, 1858.

5761. Charles Wheatstone, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in electric telegraphs and in apparatus relating thereto.—Dated 21st December, 1858.—(English Patent, expiring, 2nd June, 18 2.)

5762. Jean Pierre Aléxandre Tahan, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A holder of bills, papers, cards, letters, &c. with a transparent front-piece."—Dated 21st December, 1858.

5763. Dida and Krafft, the former of 20, Rue Vivienne, the latter of 9, Rue de Paradis Poissonnière, Paris, for "Means or processes for superseding hat bodies in general."—Dated 21st December, 1858.

5764. François César Eugène Mormenteuil, domiciled with Deverty, of 53, Rue aux Ours, Paris, for "A schist lamp."—Dated 21st December, 1858.

5765. Amable Jean Louis Thiébaut, of 33, Rue Louis Le Grand, Paris, a Certificate of Addition to his Patent of 23rd September, 1858, for "A twyer with a spout for forges."—Dated 21st December, 1858.

5766. Philippe Auguste Lasalle, of 58, Rue St. Georges, Paris, a Certificate of Addition to his Patent of 22nd December, 1857, for "Mechanical processes for the manufacture of carriage-wheels, &c."—Dated 22nd December, 1858.

5767. Pierre Louis Gautrot, of 60, Rue St. Louis, Paris, a Certificate of Addition to his Patent of 4th June, 1856, for "Pistons and cylinders with a conical rotation, applicable to musical instruments."—Dated 22nd December, 1858.

5768. Marie Basle Gaspard Mallet, of 304, Rue St. Denis, Paris, a Certificate of Addition to his Patent of 23rd September, 1858, for "A kind of tournure."—Dated 22nd December, 1858.

5769. Léon Charles Antoine Dalemagne, of 43. Rue de Seine, Paris, a Certificate of Addition to his Patent of 20th September, 1856, for "Processes for converting sandstone into flintstone."—Dated 22nd December, 1858.

5770. Willis Humiston, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of mould candles."—Dated 22nd December, 1858.—(English Patent, expiring 4th April, 1868.)

5771. Théodore Knauth, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in fire-arms."—Dated 22nd December, 1858.

5772. Eléonore Couturier, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of lace."—Dated 22nd December, 1858.

5773. John Buchanan, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in propelling ships and vessels and all kinds of boats."—Dated 22nd December, 1858.—(English Patent, expiring 10th November, 1872.)

5774. Collier and Crossley, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in joints of pipes or tubes, especially in such joints as are liable to motion and high pressure."—Dated 22nd December, 1858.

5775. Louis Ernest Descroisettes, of 151, Faubourg St. Denis, Paris, for "Applying silk embroidery on silk collars, tissues, and on sleeves for ladies."—Dated 22nd December, 1858.

5776. Daniel Frodsham, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in tubular steam boilers."—Dated 22nd December, 1858.—(English Patent, expiring 13th November, 1872.)

5777. Egide Verheyen, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An apparatus for improving corn."—Dated 22nd December, 1858.

5778. Louis François Devisme, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of revolvers."—Dated 22nd December, 1858.

5779. Charles Callebaut, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Tools or apparatus for cambering, finishing, or regulating articles before or after sewing, stitching, &c., and especially those made on the sewing machine."—Dated 22nd December, 1858.

5780. A. Baillet, Caumont, and Co., represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in constructing and ornamenting fans."—Dated 22nd December, 1858.

5781. Narcisse Léon Charles Sallé, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A vade-mecum toilet case."—Dated 22nd December, 1858.

5782. Julian Carminati, of 154, Rue Mouffetard, Paris, a Certificate of Addition to his Patent of 3rd June, 1853, for "Improvements in the arrangement of vessels or apparatus for making gaseous beverages."—Dated 23rd December, 1858.

5783. Duplan and Maronnier, of 18, Rue Vivienne, Paris, for "Printing tissues."—Dated 23rd December, 1858.

5784. Douay-Lesens, domiciled with Armengaud, senr., of 45, Rue St. Sébastien, Paris, for "A continuous cutting machine with circular blades."—Dated 23rd December, 1858.

5785. Sébastien Ley, of 2, Rue de la Fidélité, Paris, a Certificate of Addition to his Patent of 8th December, 1858, for "A system of gas burners."—Dated 23rd December, 1858.

5786. Antoine Mattei, of 3, Place Sorbonne, Paris, for "A surgical instrument called 'Leniceps.'"—Dated 23rd December, 1858.

5787. Mainfroy and Dubois, of 14, Rue Cadet Paris, for "Spring petticoats."—Dated 23rd December, 1858.

5788. Mrs. Prost, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to her Patent of 21st December, 1857, for "Preparing and preserving skins, furs, carpets, woollen articles, &c."—Dated 23rd December, 1858.

5789. Joseph Maudslay, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in the construction of furnaces for smelting iron, steel, and other metals."—Dated 23rd December, 1858.—(English Patent, expiring 24th June, 1872.)

5790. Frédéric Lidy, represented by Ricordeau of 23, Boulevart de Strasbourg, Paris, for a Certificate of Addition to his Patent of 24th May, 1856, for "Glueing and mounting brushes (for painting)."—Dated 23rd December, 1858.

5791. Augustin Marie Herland, of 138, Rue Ménilmontant, Paris, a Certificate of Addition to his Patent of 31st July, 1858, for "Mounting straps on drums and pulleys."—Dated 24th December, 1858.

5792. Charles Horstmann, represented by his Brother, of 45, Rue Rambuteau, Paris, a Certificate of Addition to his Patent of 16th July, 1855, for "A loom for weaving with various shuttles."—Dated 24th December, 1858.

5793. Jean Baptiste Félix Maneut, of 60, Rue Fontaine au Roi, Paris, for "Toilet vinegar."—Dated 24th December, 1858.

5794. Antoine Richelmi, represented by Partou, of 4, Place St. Germains des Près, Paris, for "A kneading-machine with a cylindrical drum and an internal pressure cylinder."—Dated 24th December, 1858.—(Sardinian Patent, expiring 30th September, 1873.)

5795. Joseph Grizard, represented by Barrault, of 23, Boulevart de Strasbourg, Paris, for "A household utensil for preventing boiling liquids from flowing over."—Dated 24th December, 1858.

5796. François Grimault, of 43, Rue des Martyrs, Paris, for "Preparing syrups by concentrating the same in a vacuum."—Dated 24th December, 1858.

5797. Côme Damien Chataing, of 32, Rue de la Villette, Belleville, a Certificate of Addition to his Patent of 14th July, 1858, for "A system of pumps."—Dated 24th December, 1858.

5798. Louis Alexandre Thomas, of 46, Faubourg St. Denis, Paris, for "An apparatus for heating by means of coals."—Dated 24th December, 1858.

5799. Jean Frey, of 58, Rue Beaubourg, Paris, for "A system of closing with or without keys."—Dated 24th December, 1858.

5800. Anacharris Ménier, of 33, Rue Montmartre, Paris, for "A so-called 'kite-balloon.'"—Dated 24th December, 1858.

5801. François Blanchon, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Candlesticks."—Dated 24th December, 1858.

5802. Jean Ribeyre, of Rue du Bois de Cros, Clermont-Ferrand, département du Puy de Dôme, for "A pivot-box applicable to vertical axles or arbors."—Dated 22nd December, 1858.

5803. Pierre Champon, of 54, Cours Champion, Bordeaux, département de la Gironde, for "A fireplace transmitting pure heat, and provided with an invisible boiler."—Dated 23rd December, 1858.

5804. Corsiglia and Tèssieux, of 98, Rue Duguesclin, Lyon, département du Rhône, for "A perpetual motor with a continuous power."—Dated 24th December, 1858.

5805. Antoine Rivière, of 30, Côte des Carmélites, Lyon, département du Rhône, for "A compensating spindle for throwing silk."—Dated 24th December, 1858.

5806. François Grellet, of Longjumeau, département de Seine et Oise, for "An apparatus applicable to gearings for throwing them in and out of gear."—Dated 24th December, 1858.

5807. Pierre Hélaine, of 33, Lyon, département du Rhône, a Certificate of Addition to his Patent of 29th December, 1857, for "Treatment of tinctorial, vegetable, and other substances."—Dated 27th December, 1858.

5808. Dollfus, Mieg, and Co., of Dornach, département du Haut Rhin, for "An application in printing tissues."—Dated 24th December, 1858.

5809. François Revilliod, of Vizille, département de l'Isère, a Certificate of Addition to his Patent of 16th September, 1858, for "A mode of superposing tissues, whereby peculiar effects are produced."—Dated 27th December, 1858.

5810. André Xavier Dubrulle-Chevallier, of Drouai, département du Nord, a Certificate of Addition to his Patent of 3rd May, 1858, for "An improved bucket pump."—Dated 29th December, 1858.

5811. Julien Aléxandre Nicolleau, of 3, Rue du Chapeau Rouge, Nantes, département de la Loire Inférieure, for "A draw plate for bending and dressing metals, being chiefly applicable to cooperage."—Dated 31st December, 1858.

5812. Louis Pasquay, of Wasselone, département du Bas Rhin, for "Using figured napped tissues with wrong sides, made on circular looms, for the manufacture of foot coverings."—Dated 24th December, 1858.

5813. Frachon-Dugas, Crollard, and Co., of Voiron, département de l'Isère, for "A drying apparatus used in the manufacture of paper."—Dated 24th December, 1858.

5814. Marie Lambert Louis Mathieu-Vivario, of Alençon, département de l'Orne, for "A so-called 'obelisk lime-kiln.'"—Dated 27th December, 1858.

5815. Eugène Pasquier, of Reims, département de la Marne, a Certificate of Addition to his Patent of 30th December, 1857, for "Improvements in the construction of machines for drying wool, &c."—Dated 28th December, 1858.

5816. Darrigan and Gorostarson, the former of Dax, the latter of St. Vincent de Tyrosse, département des Landes, for "Manufacture of resinous substances."—Dated 28th December, 1858.

5817. Henri Félix Chalange, of Rue Caroline et d'Orléans, Hâvre, département de la Seine Inférieure, for "A calorifere-stove heated by gas."—Dated 29th December, 1858.

5818. Jules Veyrin, of 29, Rue des Capucins, Lyon, département du Rhône, for "A counting and sorting apparatus."—Dated 29th December, 1858.

5819. Adrien Cabarrus, of Grignols, département de la Gironde, a Certificate of Addition to his Patent of 27th July, 1858, for "A railway break."—Dated 29th December, 1858.

5820. Pierre Guiet, of St. Remy la Varenne, département de Maine et Loire, for "A smut-mill."—Dated 29th December, 1858.

5821. Vassivière, senr. and junr., of 36, Rue St Marcel, Lyon, département du Rhône, for "A vertical flowing furnace for the manufacture of animal charcoal."—Dated 29th December, 1858.

5822. Garnier and Vial, of 2, Rue Touville, Lyon, département du Rhône, a Certificate of Addition to their Patent of 30th November, 1857, for "Manufacture of axles of railway carriages and locomotives by means of rollers."—Dated 29th December, 1858.

5823. Alfred Dupont, of 27 bis, Rue du Curé St. Sauveur, Lille, département du Nord, for "A reel for assembling thread."—Dated 29th December, 1858.

5824. Chouet and Ballefins, Sabelle de Mai, of 20, Chemin St. Lazare, Banlieu de Marseille, département des Bouches du Rhône, for "A day and night telegraph for the navy and merchantmen."—Dated 30th December, 1858.

5825. Chouet and Ballefins, Sabelle de Mai, of 20, Chemin St. Lazare, Banlieu de Marseille, département des Bouches du Rhône, for "A registering log for mathematically ascertaining the speed of vessels and ships."—Dated 30th December, 1858.

5826. Jean Baptiste Royet, of 9, Rue de la Charité, St. Etienne, département de la Loire, for "Breech-loading guns."—Dated 30th December, 1858.

5827. Louis Jacques Château, of Fontaine la Guyon, département d'Eure et Loire, for "Preserving corn, flour, fruits, and eggs by using the pneumatic engine and lime."—Dated 30th December, 1858.

5828. Billiet-Godefroy and Co., of St. Quentin, département de l'Aisne, for "A tissue for making Isabelle bands."—Dated 31st December, 1858.

5829. D'Herbas, Amblard, and Bonnin, of Rue des Ollivettes, Nantes, département de la Loire Inférieure, for "Heating bakers' ovens."—Dated 31st December, 1858.

PRUSSIA.*

List of Patents for Invention Delivered and Cancelled during the month of January, 1859.

(*Communicated by the Minister of Commerce and Public Works.*)

1. Patents Delivered.

1. Timpe, of Cologne, for "A brick machine."—5 years.—Dated 3rd January, 1859.

2. Carl Beermann, of Berlin, for "An apparatus for sewing-machines for obtaining whipped stitches."—5 years.—Dated 13th January, 1859.

3. Rudolph Berger, of Cöthen, for "A safety-apparatus in needle-guns, for preventing them from going off without intent."—5 years.—Dated 14th January, 1859.

4. I. M. Maerz, of Berlin, for "A weight-manometer for ascertaining the expansion of steam in steam-boilers."—5 years.—Dated 17th Jannary, 1859.

5. G. Simony, of Berlin, for "A self-acting variable expansion-gear of steam-engines."—5 years.—Dated 17th January, 1859.

6. Appelius, of Livorno, for an imported invention of "A pantographic telegraph."—5 years.—Dated 20th January, 1859.

2. Patents Cancelled.

1. W. Nohl, of Cologne, for "An expansion-gear of oscillating steam-engines."—Dated 27th May, 1857.—Cancelled 13th January, 1859.

2. C. F. Wappenhans, of Berlin, for "A feeding table for carding machines."—Dated 26th November, 1857.—Cancelled 14th January, 1859.

* For the Prussian Patent Law, see Nos. 313 and 329 of this Journal.

UNITED STATES OF AMERICA.

(*Communicated by the Commissioner of Patents.*)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 25th January, 1859, and each bearing that date.

No. 22,691. J. C. Appenzeller, of Cincinnati, O., for an "Improvement in treatment of fatty acids."

"I do not claim subjecting the fatty matters mixed with lime to the direct action of steam, but what I do claim as my invention, and desire to secure by Letters Patent, is, after subjecting the mixture for a time to the direct action of steam, shutting off the steam from it, and raising its temperature by the application of heat to the exterior of the vessel, substantially as herein described."

No. 22,692. Robt. Bailey, of Troy, N. Y., for an "Improvement in valves for steam engines."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement and combination of the tubular valve I, seat C, induction pipe D, eduction valve E, levers H, M, and cams J, J^1, N, substantially as and for the purpose herein shown and described."

No. 22,693. Wm. Baker, of Walpole, Ind, for an "Improvement in car seats and couches."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, 1st, the arrangement and combination of the boards G, F, arms *i*, curved bar *e*, legs K, fenders *l*, slide E, seat B, and rods C, as herein shown and described. 2nd, the arrangement and combination of the curtain H, the seat backs D, drums Z, weights *v*, curtains *u*, and rod I, as herein shown and described, so that when the rod I descends the curtain *u* will fall, and the curtain H rise, and when the rod I is released all the curtains will be simultaneously rolled up."

No. 22,694. Gerard Bancker, of New York, N. Y., for an "Improvement in brick machines."

"Having now described my invention, and its mode of construction, I will proceed to set forth what I claim and desire to secure by Letters Patent of the United States.—What I claim therefore is, first, the combination of the adjustable plunger K with the side rods L, and rods j^1 and j^2 of the rotating mould box for operating the compressors, in the manner described for the purposes specified. I also claim the use of the cleat Q in combination with the rotating moulding box G, and semi-circular stationary cap plate N, substantially as described and for the purposes hereinbefore set forth. I also claim the use of an elevator plunger R, operating as set forth, in combination with the rectangular rotatory mould box G, adjustable compressors H^1 and H^2, and cap plate N, as a device for moulding and compressing clay into bricks, and discharging the same therefrom."

No. 22,695. Joseph Beckel, of New York, N. Y., for an "Apparatus for displaying stereoscopic pictures."

"Having thus fully described my invention, what I claim and desire to secure by Letters Patent is,—First, in combination with an endless chain of pictures, constructed and arranged as described, the revolving prism *a*, *a*, *a*, arranged and operating as described. Second, the rest or stop C, arranged and operating as specified. Third, the concave D, *d*, D, arranged and operating in the manner described. Fourth, the pads or cushions 1, 2, 3, 4, &c., arranged and operating as specified."

No. 22,696. W. H. Benson, of Wetumpka, Ala., for an "Improvement in wind wheels."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, constructing a wind wheel of a series of strips or slats *a*, placed centrally on a shaft A, spread and overlapped, and secured together and to the shaft A, substantially as shown and described."

No. 22,697. Edmund Bigelow, of Springfield, Mass., for an "Improved soda water apparatus."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of a set of syrup cans, ice chamber, and draft pipe, substantially as described. I also claim the combination of a measuring faucet, with the herein described and claimed arrangement of devices for drawing syrups and soda water."

No. 22,698. Seth Boyden, of Newark, N. J., for an "Improvement in machinery for forming hat bodies."

"I do not claim the endless apron C, picker B, and rotating perforated cone E, for these have been long known and used in machines for forming hat bodies; but having thus described my invention, what I do claim as new, and desire to secure by Letters Patent, is, conveying the fur from the picker B, to the perforated cone E, by means of jets of steam issuing from tubes *d*, arranged relatively with the picker B, and cone E, substantially as described, to effect the desired purpose."

No. 22,699. John Gottlieb Broemser, of St. Louis, Mo., for an "Improved Lounge."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the within described arrangement of the spring catch G, and the serrated arc F, in combination with the pawl *f*, which gears into ratchet teeth *e*, at the lower edge of the hinges D, and which is attached to a rocking cross bar E, and connected to the catch G, substantially as and for the purpose set forth. And I also claim the valve K, in the seat A, which is operated by an arbor L, and by means of a cam *l*, and a hook *m*, in combination with the sliding frame N, constructed substantially as and for the purpose specified."

No. 22,700. Wm. W. Cansler, of Baltimore, Md., for an "Improved boot jack."

"I will now state what I claim and desire to secure by Letters Patent, viz:—I claim the metal folding boot jack described, with pointed prongs and pointed end as a new article of manufacture."

No. 22,701. Jarvis Case, of Bloomington, Ill., for an "Improvement in mole plough."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is,—First, so suspending the 'mole' to the beam or the coulter, as that it cannot go vertically beyond a given depth, whilst it may move laterally, substantially as described. I also claim extending the nose of the mole into the rear of the coulter, so that it cannot at any time run out of the line of cut of said coulter at its point, substantially as described."

No. 22,702. Seth Cheney, of Kiantone, N. Y., for an "Improved field fence."

"What I claim as new, and desire to secure by Letters Patent, is,—I claim the particular construction of panels and its combination with the rails, in the manner and for the purposes set forth."

No. 22,703. Saml. Cheney, of Cleveland, Ohio, for an "Improvement in lamps."

"What I claim as my improvement, and desire to secure by Letters Patent, is, the gas tube G, and openings E, E, in combination with the wick tube C, and cap H, when these several parts are constructed and arranged as described, and operating substantially in the manner and for the purpose set forth."

No. 22,704. Augustus M. Church, of Augusta, Geo., for an "Improved amalgamator."

"I do not claim to have invented any of the separate parts of this machine, as they have been long used for various purposes, and are well known. What I claim, and desire to secure by Letters Patent, is, the arrangement herein described, of the vibrating riffles of the inclined trough, constructed and operated as set forth, by which it is proposed to save the finest particles of the gold, by amalgamation."

No. 22,705. John C. Clime, of Philadelphia, Pa., for an "Improved method of hanging reciprocating saws."

"Having thus described my invention, what I claim, and desire to secure by Letters Patent, is, the employment of a spring, either straight or spiral, to suspend the fulcrum of pitman bars or other reciprocating levers, in the manner substantially set forth in the foregoing specification."

No. 22,706. Francis Cotton, of Brooklyn, N. Y., for an "Improved portable bedstead."

"I do not claim a jointed bedstead, so that when not in use it may be folded; nor do I desire to claim constructing an invalid bedstead, in which the head or feet of the invalid may be raised or lowered, by elevating or depressing either of the end supports; nor am I desirous of claiming the use of side rails hinged at a given point, to enable them to be folded. But I claim the arrangement of the stand, rails, straps and end supports, the whole forming a new and improved article of manufacture, namely, an improved portable bedstead."

No. 22,707. Isaac N. Crehore, of Boston, Mass., and Francis Stiles, jr., of Leicester, Mass., for an "Improvement in paper rag engines."

"We are aware that a solid cast metal bed plate for paper mill engines has been made, having a series of diamond shaped knives upon its surface; but such bed plate is objectionable from its liability to breakage and the difficulty of repairing it when once injured or broken at any point. We do not, therefore, claim such device, or any improvement upon solid cast metal bed plates; but what we do claim, is a bed plate, composed of sheet metal knives, corrugated or formed with a series of angles or curved lines, through their entire length, in the manner described, for the purpose specified."

No. 22,708. D. W. Crocker, of Deposit, N. Y., for an "Improvement in rail road chairs."

"I do not claim the longitudinal division of the chair; nor the use of a key passing through the chair; but what I claim as my invention, and desire to secure by Letters Patent, is, the arrangement and combination, substantially as herein shown and described, of the inclined grooves *c*, *c*, key C, jaws B, and rail A, so that the weight of the cars will depress the base parts *a*, *a*, of the chair, and thereby cause the jaw parts *b*, to gripe the rail A more firmly."

No. 22,709. Daniel S. Curtiss, of Madison, Wis., for an "Improved field fence."

"What I claim, therefore, as my invention, and desiro to secure by Letters Patent, is, the mode of notching the ends of the rails, and keying together the ends of the panels, in the manuer and for the purpose herein described and set forth."

No. 22,710. Abbot R. Davis, of East Cambridge, Mass., for an "Improvement in corn huskers."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the rolls B and C, spring board D, slotted projection K, and conical projection J, when these several parts are constructed and arranged for operation, in the manner described and for the purpose specified."

No. 22,711. Wm. T. Dennis, of Richmond, Ind., for an "Improvement in sugar cane mills."

"What I claim as my invention, and desire to secure by Letters Patent, is, the plating or covering of the iron roller of sugar cane mills, with tin, or other anti-corrosive metal or substance, for the uses and purposes herein described."

No. 22,712. John Drown, of Huron, N. Y., for an "Improved construction of posts for field fences."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the braces C, C, one fixed and the other hinged or pivoted thereto, in combination with the rails A, A, and chair B, substantially as herein specified."

No. 22,713. Richard Dudgeon, of New York, N.Y., for an "Improvement in hydraulic press."

"What I claim as my invention, and desire to secure by Letters Patent, is, the within described hydraulic press, consisting of the injection piston A, chambers B and C, and ram D, the whole constructed and operating substantially as and for the purposes set forth."

No. 22,714. Daniel E. Eaton, of Boston, Mass., for an "Improvement in shoe horns."

"I am aware of the invention set forth in No. 11,445. of United States Patents, whereby a spring clamp, with a concave holding jaw is claimed, in combination with a shoe slip or shoe horn. I make no use of any such spring clamp, or one which, when the shoe slip or horn is applied to the heel of a shoe, and the shoe is being drawn on the shoe by pull on the instrument, maintains its hold on the shoe by the action of a spring. In my improved instrument the hold of the nipper jaw on the shoe is obtained by the grasp of a person's hand during the act of drawing the shoe on his foot. The greater the resistance of the shoe the stronger will be the grasp of the nipper jaw, the spring serving to open the jaws, or in other words to force the nipper jaw away from the shoe horn. This results from the peculiar application of the jaws to crossed levers. An upwards pull on a spring clamp, such as is represented in the said patent tends to lessen its hold on the shoe, so an upward pull on the spring clamp shoe slip, when the upper parts of the slip and its spring clamp are grasped by the hand of a person, operates to loosen the hold of the clamp on the shoe. In view, therefore, of the invention as described in the said patent, I do not claim a shoe slip or horn, having a holding jaw forced against the slip or horn by a spring; what therefore I claim, is, the improved shoe horn, as made with a heel guid and nipper jaw applied to two corossed levers, and so as to operate together substantially as specified."

No. 22,715. Lewis Eikenberry, of Easton, Pa., for an "Improvement in iron bridges."

"What I claim as my invention, and desire te secure by Letters Patent, is,—1st, having the uprights and diagonals of the side framings of the bridge so united together that they shall be capable of turning on their points of connection, and thus, whenever expansion or contraction in the metal occurs, they may be able to compensate therefor without ceasing to brace the bridge at top and bottom, substantially as and for the purposes set forth. 2d, the combination of lattice side frames of bridges formed of diagonal braces and angle iron uprights, which are united together so as to turn on their points of connection, as above stated, with tubular, semi-tubular, or angle iron arches, substantially as and for the purposes set forth."

No. 22,716. W. H. Elliot, of Plattsburgh, N. Y., for an "Improvements in coffee pots."

"I do not claim condensing the vapor of coffee, so as to prevent the aroma from passing off independent of the peculiar devices and the method of employing them, as herein set forth; but what I do claim, and wish to have secured to me by Letters Patent, is,—First, the combination of boiler *a*, stillworm condenser *b*, conducting or discharge tube *g*, the external opening of the stillworm at *g*, when these devices are so arranged in relation to each other, that an opening to the external air shall be provided for the non-condensible gases, while the condensible vapors are reduced to a liquid without coming in contact with the condenser water, and then turned by conductors into the boiler, as and for the purpose specified. Second, the arrangement of the joint *c* below the spout, so that no vapor can pass through the spout without first passing the joint, as set forth. Third, the employment of conductors in combination with the condenser, for the purpose of filling the water joint or keeping it full, as and for the purpose specified."

No. 22,717. Lewis C. England, of Owego, N. Y., for an "Improvement in tanning."

"I claim, firstly, applying the liquor to the bark while said bark is being discharged from the mill, for the twofold purpose of making it a conveyor of the same and a preserver of the dust thereof, as set forth. I claim, secondly, the method of applying the heated liquor to the bark, for the purposes and in the manner substantially as set forth."

No. 22,718. Jno. B. Ford, Addison Sullivan, and Albert Gregg, of New Albany, Ind., for an "Improvement in threshing machines."

"Having thus fully described our invention, what we claim as new, and desire to secure by Letters Patent, is, the combination of the cutting cylinders A, A, provided with knives, the cylinder C, and concave B, provided with teeth, the screns D, and the fan E, substantially in the manner herein specified, and for the purpose set forth."

No. 22,719. Wm. A. Fosket and Elliot Savage, of Meriden, Conn., for an "Improvement in sewing machines."

"We claim the feeding device, constructed and arranged substantially as herein set forth, and so operating as to cause the cloth to progress by grasping the same with a positive force in contradistinction to the employment of spring pressure between two surfaces moving in unison while feeding. We also claim setting the shank of the revolving and reciprocating looping hook at an angle to the bed plate, substantially as specified, when said looping hook is constructed in the manner herein described or referred to, for the purpose of avoiding motion of the said hook in the direction of the axis of revolution. We also claim operating the slide plate O from above the sewing table by means of a feed foot having two motions, one vibratory in the line of feed, the other reciprocatory and perpendicular to the table or thereabouts."

No. 22,720. Carl Frank, of Cleveland, Ohio, for an "Improvement in smut mills."

"What I claim as my invention, and desire to secure by Letters Patent, is, arranging between the trough c^1, containing the grain to be scoured and the scouring cylinder *k*, a slotted hollow cylinder *d* revolving within another hollow cylinder e^1, as above described."

No. 22,721. John Frezer, of Newberry, Pa., for an "Improvement in horse powers."

"The particular improvement which constitutes my said invention, and which I claim as having been originally and first invented by me, is, the combination of the flange *r* upon the end of the sweep shaft with the groove in the collar R, or its equivalent, for securing the shaft J against longitudinal motion, as set forth, in connection with the wheel H, pinion M, attached to the sweep shaft and the stationary wheel, and pinion L and N, which keep the shaft J in a directly radial position."

No. 22,722. F. J. Gardner, of Washington, N. C., for an "Improved combined chair and lounge."

"I do not claim broadly, irrespective of construction and arrangement, an adjustable chair or a combined rocking chair and lounge, for such devices are in common use, and arranged in various ways; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the seat A, back B, and supplemental back C, connected together by joints, and provided respectively with the legs *d*, d^1, arms E, E, and rockers D, D, the whole being arranged substantially as and for the purpose set forth."

No. 22,723. Conrad Gersten, of Brooklyn, N.Y., for an "Improvement in lanterns."

"What I claim as my invention, and desire to secure by Letters Patent, as an improvement in lanterns, is, the mode of controlling the currents of air which feed the flame, by taking the air from the top of the lantern and causing it to pass down in a narrow annular passage to the apertures leading to the burner, substantially as described, in combination with the deflector which encloses the burner chamber, substantially as described. I also claim, in combination with a lantern, in which the flame is protected against disturbing causes outside, substantially as described, the arrangement substantially as described for controlling the wick from outside the lantern, as described. I also claim combining with the burner and the oil reservoir, and interposed between the two, an air chamber for preventing the oil from being over heated, as described."

No. 22,724. E. A. Goodes, of Philadelphia, Pa., for an "Improved boring machine."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, 1st, the adjustable worm H, attached to its shaft D, and arranged substantially as and for the purpose set forth. 2nd, the gauge plate E, attached to the bow F^1, in connection with the index *g*, on the mandrel C, for the purpose specified. 3rd, the arrangement of the tube *j* on the shaft *k*, pinion l^1 on said shaft, the pulley *l* on the tube *j*, and also the pinion *i* and the rack *h* on the mandrel C, substantially as and for the purpose set forth."

No. 22,725. John Hindman, of Haynesville, Mo., for an "Improvement in hemp brakes."

"I am aware that reciprocating beaters have long been used for breaking hemp, and I, therefore, do not claim broadly, such device; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the reciprocating beater D, stationary bar E, and reel F, combined and arranged to operate substantially as and for the purpose set forth."

No. 22,726. John C. Hintz, of Cincinnati, O., for an "Improved machine for sawing winding forms."

"Having thus fully described my invention, the following is what I claim as new therein, and desire to secure by

Letters Patent, 1st, in the described combination with one or more shifting supports or rests, I claim the rocking bench J, suspended at or near its midwith, by journals *j*, and provided with suitable feeding and canting mechanism, substantially as set forth. 2nd, in the described connection with a carriage E, and crane D, and with a rocking bench J, having the described or equivalent feeding and canting mechanism, I claim the vibratory and arched rest F, armed with spikes *f*, the whole being arranged and operating, substantially as set forth. 3rd, in the described combination with a rocking rest J, and speroidal feed roller B, I claim the pointer S, *s*, adjustable in hight, and having the described automatic retrograde motion, so as to indicate on the top of the slab, the relative position of the bottom of the kerf, as set forth. 4th, in the described combination with the rocking bench J, I claim the prying lever Q, constructed and operating substantially as set forth."

No. 22,727. E. N. Horner, of New Brighton, Pa., for an "Improvement in method of extracting oil from coal."

"What I claim as my invention, and desire to secure by Letters Patent, is, the use of a mixture of cream of tartar, common salt, and slaked lime, for the purpose of condensing the oleaginous vapor produced by the dry distillation of coal, shale, or other bituminous minerals, extracting the oil from the gas, and depriving the gas of its inflammable quality, and throwing off the sulphurous vapor, in the manner hereinbefore described."

No. 22,728. Benjn. Illingsworth, of Freeport, Ill., for an "Improved washing machine."

"Having described my invention, I claim, and desire to secure by Letters Patent, as an improved article of manufacture, a washing machine having a tilting box B, cylinder D, spring rollers (*f*, *j*,) and otherwise constructed as herein shown and described."

No. 22,729. Richd. Jenkins, of Covington, Ky., for an "Improvement in lamps."

"I am aware that lamp caps have been so constructed that currents of air are kept circulating about and through the base of the flame, therefore I do not claim this arrangement; but what I do claim as my invention, and desire to secure by Letters Patent, is, the combination of the inner and outer cones, when arranged in relation to the wick tube and each other, substantially as specified, and supplied with air or oxygen, for the purpose of maintaining a perfect combustion of the heavier gases or matter rising by capillary attraction, in the space or chamber existing between the cones, and thus producing with coal oil, a brilliant flame, with very little, if any, blue appearance at its base above the outer cone, substantially as set forth."

No. 22,730. John Jones, of Baltimore, Md., for an "Improvement in machines for making clay pipes."

"I do not claim the manufacture of pipe of two sizes, as various devices of moulds have been used for that purpose; but what I claim as my invention, and desire to secure by Letters Patent, is, the two-sized permanent core or mandrel, in combination with the fixed die A, and adjustable jaws C, D, constructed, arranged, and operating in the manner described for the purpose specified."

No. 22,731. Augustus Jouan, of San Francisco, Cal., for an "Improved screw propeller."

"What I claim as my invention, and desire to secure by Letters Patent, is, combining with the rigid blades of a propeller an elastic blade, substantially as described."

No. 22,732. Augustus Jouan, of San Francisco, Cal., for an "Improvement in apparatus for evaporating sugar juice."

"What I claim as of my invention, and desire to secure by Letters Patent, is, the floating cover applied to the evaporation of saccharine liquids, or for concentrating heat for other purposes; constructed, arranged, and operated substantially as herein set forth."

No. 22,733. Wm. W. Karshner. of Cincinnati, O., for an "Improvement in electro-bathing apparatus."

"I do not wish to be understood as broadly claiming the insulating of a patient for the purpose of electro-medical treatment; but what I do claim is, 1st, the suspending non-conducting bands (*f*, *f*, *f*, *f*,) the conducting foot plate (*h*), insulated from the bath tub by the non-conducting substance (*g*), all substantially as set forth; and, 2nd, I claim the combined use of the above-described non-conducting bands (*f*, *f*, *f*, *f*), the conducting foot-piece (*h*), and the non-conducting substance (*g*), or their equivalents, for the purpose of administering an electric bath for therapeutic purposes, as before described."

No. 22,734. Henry Kattenhorn, of New York, N. Y., for an "Improvement in revivification of bone black."

"I claim as of my invention, the method of washing bone black, or animal charcoal, in the purifying of sugar, substantially as herein described."

No. 22,735. Chauncey G. Keeny, of Manchester, Conn., for an "Improvement in knitting machines."

"What I claim, therefore, and desire to secure by Letters Patent, is, the employment of a card attachment to knitting machines, substantially in the manner and for the purpose as described."

No. 22,736. Wm. Kennish, jr., of New York, N.Y., for an "Improvement in marine steam engines."

"What I claim as my invention, and desire to secure by Letters Patent, is, the application of an auxiliary pipe to the present discharge pipe of a marine steam engine, in the manner and for the purpose described in the specification."

No. 22,737. Columbia G. Loynes, of Lenox, Mass., for an "Improved machine for cutting and setting saw teeth."

"What I claim as my invention, and desire to secure by Letters Patent, is, the devices for punching and shearing metals, as described, arranged in connection with the saw gummer and saw sett, the whole constructed and operating in the manner set forth."

No. 22,738. Wm. C. McBride, of Raritan, N. J., for an "Improvement in machinery for scutching flax."—Patented in England, 20th May, 1856.

"I do not claim either set of feeders separately, as making part of my present invention, having described a similar arrangement in Letters Patent granted to me by the Government of Great Britain, in the year 1852. What I do claim as my invention, and desire to secure by Letters Patent, is, the mode of operation of the combined rotating blades or beaters, with the interposed stocks, substantially as described. And I also claim, combining two scutching machines, substantially such as herein described, or equivalents thereof, by means of the two feeding wheels with their bands, arranged substantially as herein described, for transferring the fibres which have been scutched at one end, that the other end may be properly presented to the second scutcher, as set forth. And I also claim, in combination with the two sets of feeding bands and wheels, or their equivalents, the sustaining and guiding table, substantially as described, by which the upper unscutched ends of the fibre are held up, guided, and properly presented to the second scutcher, as set forth."

No. 22,739. Antonio Meucci, of Clifton, N. Y., assignor to D. B. Loraini, of said Clifton, for an "Improvement in manufacture of candles."

"I am aware that moulds of plaster of Paris, or other porous materials, partially or wholly saturated with grease, have been used in the manufacture of articles of plaster of Paris, and other ornamental objects; and, therefore, do not claim the invention of such moulds, or their employment in other arts. But what I claim as my invention or discovery, in the candle manufacture, and desire to secure by Letters Patent is, the method of forming mould candles in saturated porous candle moulds, substantially as herein set forth, in contra-distinction to the method in general use, of forming them of candle moulds of impervious metal."

No. 22,740. U. D. Mihills, of Hartford, Wis., for an "Improvement in heating apparatus."

"I claim a heat controlling cylinder, in which the regulating disks, shaped as described, are connected with a detachable frame, the same being arranged and operated as herein-before specified."

No. 22,741. Wm. H. Milhouse, of Sugar Town, Pa., for an "Improved washing machine."

"Having thus fully described my invention, what I do claim as new, and desire to secure by Letters Patent, is,—1st, securing strips of india rubber edgwise in slots in the concave D, and rubber E, by means of the slats which are bolted in between the successive strips, as herein fully set forth. The arrangement of the adjustable frame F, levers *a* and *b*, swinging rubber E, pitman *d*, and shaft *e*, with the concave

when the whole are combined, constructed, and operated in the manner, and for the purpose herein set forth."

No. 22,742. B. F. S. Monroe, of Utica, N. Y., for an "Improved bed bottom."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the two frames A, C, with the springs B secured between them, the frames being connected by the cross bands F, covered or enclosed by any suitable fabric E, and the upper frame supporting the seat or mattress D, the whole being arranged substantially as and for the purpose set forth."

No. 22,743. Walter Peck, of Rockford, Ill., for an "Improvement in pumps."

"I am aware that hollow plungers have been made, and do not wish to be understood as laying any claim thereto the plunger A, as herein-before specified, for the purposes set forth; but what I do claim as my invention, and desire to secure by Letters Patent, is, 2d, the combined arrangement of the stationary standards *c*, vibrating lever *a*, and lifting spring *b*, with, 3rdly, the combined arrangement of the hollow plunger A, having a cylinder C and spout *f*, and attached directly to the handle *a*, with the stationary chamber D, and steadying springs B, as herein specified."

No. 22,744. Frank P. Pfleghar, of Whitneyville, Conn., for an "Improvement in combined punch and awl."

"I do not claim a plurality of cutter tubes *d*, of different sizes, attached to a rotating head *b*, for the purpose of punching holes of different sizes, for such device, or its equivalent, has been previously used; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the rotating hollow head *b*, provided with a series of cutter tubes *d* of different sizes, in combination with the awl *h*, attached to or forming a part of the bent bar or rod E, which, as well as the head *b*, is attached to the jaw C, and provided with a spring plate or stop *m*, the whole being arranged substantially as and for the purpose set forth."

No. 22,745. Geo. W. Pittman, of Bushwick, N. Y., for an "Improvement in machinery for twisting fibrous substances."

"What I claim as my invention, and desire to secure by Letters Patent, is, the application of the flyer B, or its equivalent, substantially as described, in combination with the rollers D, D^1, and spool F, or other equivalent means of holding the sliver, and taking up the twist produced by the flyer, whereby the same operation is made to spin the sliver into yarn, and twist the same with one or more other yarns, simultaneously as herein set forth."

No. 22,746. Michael Posz, of Shelbyville, Ind., for an "Improvement in razor strops."

"I claim as a new article of manufacture the self-lubricating razor strop, when constructed in the manner described."

No. 22,747. Hiram H. Reynolds, of Buffalo, N. Y., for an "Improvement in belt trusses."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the T-spring E with the conical spring H, pad B, belt A, and perineal strap *c*, the whole being arranged substantially as shown."

No. 22,748. M. H. Risou, of Paris, Tenn., for an "Improvement in photographic plate vises."

"I do not claim the use of an adjustable jaw and a clamping jaw, the former stopped by a pawl working in a ratchet in the bed piece, and the latter operated by an eccentric attached to the bed piece; but I claim, and desire to secure by Letters Patent, as an improved article of manufacture, a photograph vise, having its eccentric lever E provided with a groove (*g*), a clamping jaw D, provided with a catch (*f*) to engage (*g*) a jaw C, provided with a spring pawl (*d*) which engages a rack (*e*), and otherwise constructed as herein shown and described."

No. 22,749. Daniel Robinson, of Lenox, Pa., for an "Improvement in wagon brake."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the combination and arrangement of the sliding frame F, curved bars *c* attached to the rock shafts D, D, and passing through the traverse bars *d* of the frame F, and the shoes E attached to the ends of the rock shafts; the several parts being fitted in the truck or bed A, substantially as and for the purpose set forth."

No. 22,750. Philip P. Ruger, of New York, N.Y., for an "Improved machine for splitting wood."

"Having thus fully described my improvements, what I claim, and desire to secure by Letters Patent, is, the spring or yielding guide for relieving the cross bars *e*, in the manner specified and for the purposes set forth. I also claim the guide plate *x*, with the uprights *y*, constructed and arranged, in combination with the wood splitters, as herein-before specified."

No. 22,751. B. A. Russell, of Deep River, Conn., for "Improved ball furniture casters."

"What I claim as new, and desire to secure by Letters Patent, is, a new article of manufacture in my improved furniture caster, when composed of cylinder or casing A, either with or without the radial set screws G, or ribs G^1, in combination with the plate D and ball F, when constructed, arranged, and operated in the manner and for the purposes set forth."

No. 22,752. Christian Sharps, of Philadelphia, Pa., for an "Improvement in breech-loading arms."

"I claim and desire to secure by Letters Patent,—First, forming on the outer end of the sliding bush G, as the sole bearing point against the breech, an annular inclined projection, with a sharp annular edge *b*, coinciding with the smallest portion of the bore of the said bush, as and for the purpose herein set forth. Second, the annular termination e^{11} of the sliding bush fitting into an annular recess *d*, formed in the barrel, and overlapped by the sharp edged annular projection, substantially as herein set forth and for the purpose specified. Third, the convex base *n*, as fitted into a concave socket in the breech, so as to form a self-adjusting base for the end of the barrel."

No. 22,753. Christian Sharps, of Philadelphia, Pa., for an "Improvement in breech-loading repeating fire-arms."

"Having now described the nature of my invention, and the manner in which the same is carried into effect, I wish it to be understood that I do not desire to confine myself to the use of a barrel block with four bores, or to the precise devices herein described for altering the position of the projection *s*, in as much as a barrel block with more or less than four bores may be used in connection with my improvement, and as different devices may be used for changing the position of the said projection; but I claim, and desire to secure by Letters Patent,—First, exploding in succession a number of cartridges of the class herein described, by means of a projection caused to revolve by the movement of the hammer when the said cartridges are so arranged in respect to the said projection, that the latter shall strike the edge only of each cartridge in succession, as herein set forth. Second the catches *t*, *t*, so arranged on the stock in respect to the bores of the barrel block, that on moving the latter from the breech they may be the means of withdrawing the whole of the cartridges simultaneously from their respective bores, as herein set forth."

No. 22,754. Philip Shreiner, of Columbia, Pa., for an "Improvement in stoves."

"What I claim as my invention, and desire to secure by Letters Patent, are the air supplying tubes and air heating cylinders, when combined with a stove, the heat of which is unobstructed by outside casings."

No. 22,755. Stillman Thorp, of Portland, Me., and Wesley Thorp, of Turner, Me., for an "Improvement in boot heels."

"We do not claim an elastic metallic spring or plate applied in the shank of a boot, nor do we claim a rotary heel piece applied separately from the metallic shank piece, as we are aware that neither is new; but what we do claim is, a combination of the metallic plate spring or shank stiffener, and the rotary heel piece, connected together and applied to the heel and shank of a boot or shoe, substantially as specified."

No. 22,756. Wm. B. Twiford, of Chincoteague, Va., for an "Improved washing machine."

"What I claim as my invention, and desire to secure by Letters Patent, is, the opposing incline planes *e*, *e*, on the underside of the ends of the sliding roller frame E, in combination with fixed concave projections or ledges *c*, *c*, on the sides of the tub or box, and with grooves B of greater width than the diameter of the journals of the roller in the sides of the box, substantially as and for the purposes set forth."

No. 22,757. James H. Washington, of Baltimore, Md., for an "Improved method of blowing off steam boilers."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, connecting the pipe C by an elastic or yielding joint to the stationary pipe B, and furnishing its opposite end with a float D that will keep the inlet into said pipe C at or a little below the surface of the water in the boiler, so as to blow off sediment, &c. at the surface, however much it may rise or fall or vary, substantially as described."

No. 22,758. Saml. Wetherill, of Bethlehem, Pa., for an "Improvement in furnaces for distilling zinc."

"What I claim as my invention, and desire to secure by Letters Patent, is, the employment of vertical retorts with movable caps at top and movable cups at bottom, substantially as described, in combination with the fire chamber of a furnace and suitable chambers for the circulation of heat, substantially as described, when applied to the reduction of ores of zinc to the metallic state, as set forth. I also claim, in combination with retorts for the reduction of the ores of zinc to the metallic state, the mode of mounting the vertical retorts by having them sustained by their lower ends resting in suitable sockets, substantially as described, and unconfined at their upper ends, whereby they are free to yield to unequal expansion, as set forth. I also claim, in combination with retorts for the reduction of the ores of zinc to the metallic state, the employment of two fires with separated ashpits, substantially as described, whereby the fires can be separately cleansed and stocked to admit of applying a continuous heat to the retorts, as set forth. I also claim, in combination with vertical retorts for the reduction of the ores of zinc to the metallic state, the employment of perforated central tubes, substantially as described, for the discharge of the metallic vapors from the charge, and the condensation thereof to the metallic state, as described. And I also claim, the combination of the vertical retorts, the perforated central tubes, and the movable cups and appendages at bottom, and the movable caps at top, substantially as herein described, all concurring in the more ready charging of the retorts, the working of the charge, the escape and condensation of the metallic vapor to the metallic state, and the delivery thereof, and the discharge of the residuum from the retorts, and the recharging of them, as set forth."

No. 22,759. Jesse Wheelock, of Lancaster, N. Y., for an "Improvement in boat for transporting railroad cars."

"1st, I claim the arrangement of the ropes or chains (*y*), pulleys (Z), and timbers (*c*), when applied to each end of a boat for the purpose of holding the boat steady at the bow and stern while the cars are being transferred to or from the boat, the whole constructed and operated substantially as herein set forth. 2d, I claim the arrangement of the bumper dock (A^1) relatively to the dock (A) and slip (F), for the purpose of arresting the headway of the boat and allowing it to be drawn sidewise into the slip (F), so that the track which runs lengthwise of the boat may be brought into line with the suspended track, as described. 3d, I claim the combination of the suspended track with or without the short portion (N) with the track on the boat, for the the purpose of conveniently transferring the cars to or from the boat at whatever hight the boat may stand in the water, substantially as herein described."

No. 22,760. Geo. W. Williamson, of Scranton, Pa., for an "Improvement in heating apparatus."

"Having described the nature and operation of my invention, I wish it distinctly understood that I do not claim dampers, or their equivalent, in my invention; neither do I claim a stationary flat plate or a series of them with an opening around the outer edge for a draft passage; neither do I claim to be the inventor of a combustion chamber; but what I do claim, and desire to secure by Letters Patent, is, the application to fire chambers or smoke flues of a double series of plates, when the same are constructed, combined, and arranged in the manner and for the purpose herein set forth."

No. 22,761. Geo. W. Wilson and Andrew Johnson, of Walnut Grove, Ill., for an "Improved washing machine."

"Having described my invention, I claim, and desire to secure by Letters Patent, as an improved article of manufacture, a washing machine, having upon the central cylinder C a plate (*g*), arms (*h*, *h*), curved slots (*j*), and rod (*i*), for securing the clothes, and in the upper part of the cover B a rubbing device D, consisting of a slat (*m*) with slats or corrugations (*o*) at its sides and rollers (*p*), and otherwise constructed as herein shown and described."

No. 22,762. Geo. Wingate, of Philadelphia, Pa., for an "Improved rotary pump."

"I claim and desire to secure by Letters Patent, the revolving bucket wheel, with any suitable number of pistons operated by the cam K, in combination with the exterior casing B, its chambers and partitions, the whole being arranged for joint action, substantially as and for the purpose herein set forth."

No. 22,763. Herman Winter, of New York, N.Y., for an "Improvement in valve gear of oscillating steam engines."

"I claim as of my invention,—First, the method, substantially as herein specified, of causing a shaft, by means of which the valves of an engine are moved, to revolve through the agency of a cam, a lever, and a crank, and the oscillation of the cylinder to which the shaft is attached, all the parts being substantially such as specified, and acting in combination substantially in the manner specified. Second, I claim the combination of a toe, keyed to some rod, which actuates a valve or valves with an adjustable swinging toe and a revolving cam, the combination being substantially such as herein set forth to serve the purpose described."

No. 22,764. Geo. L. Witsil, of Wilmington, Del., for an "Improved washing machine."

"I do not claim the shape of the tub; nor do I claim the corrugated surfaces; neither do I claim the passing the clothes between the two surfaces, one being a cylinder, and the other the surface of the tub, for I am aware that the ribbed surfaces have been used long since, and that V. R. Stewart has already (June 24, 1856) patented a machine having a ribbed cylinder, revolving in proximity to a concave board, between which the articles in washing pass; but what I claim as my invention, and desire to secure by Letters Patent, is, the combination of the corrugated or fluted conical cylinder, placed vertically with the corrugated or fluted sides of the conical tub, arranged and operated as shown and described for the purpose specified."

No. 22,765. Robt. A. Wright and Louis Jules Fouché, of Paris, France, for an "Improvement in process for decomposing fats."

"Claims.—Having described the nature of our invention, and the manner in which the same is to be performed, we do not claim the application of super-heated water for decomposing fatty bodies, nor the form of the apparatus above described, which may vary somewhat according to conditions and circumstances; but what we claim as our invention, is, producing a continuous automatic circulation of highly heated water in a very finely divided state, through the bodies under treatment, by means of an apparatus constructed and employed substantially as herein shown and described."

No. 22,766. Wm. D. Young, of Baltimore, Md., for an "Improved boot jack."

"Having described my invention, I claim the construction of boot jack substantially as herein set forth, when used in combination with a chair as described."

No. 22,767. Daniel C. Colby, of Keene, N. H., assignor to himself and David W. Ransom, of Croydon, N. H., for an "Improved clothes frame."

"Having above described my improved clothes dryer, and its mode of operation; what I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the levers D, E and F, as above described in combination with the pawl K, and the shaft G, operating substantially as herein set forth."

No. 22,768. Silas C. Durgin, of Holyoke, Mass., assignor to himself and Ammon R. Durgin, of Nashua, N. H., for an "Improvement in drawing frames for drawing fibrous materials."

"What I claim is, the arrangement of the conical draft rollers between the gauge trumpet and the other reducing rollers, and supporting such trumpet by mechanism essentially as described (or the equivalent therefor), which will enable the said trumpet to operate both as a gauge to the sliver and to guide it to the rollers, and to be vibrated with respect to the conical rollers in manner and for the purpose as explained. I also claim the combination of mechanism for supporting and vibrating the trumpet, the same consisting of the bent lever E^1, the overbalance carrying lever F,

and the stationary stud; and when such combination of mechanism is employed in manner and for the purpose described, I claim the arrangement of the supporting arm *g* of the weight *h* above the fulcrum of the lever F, in manner as and to operate with reference to the lateral drag of the sliver on the trumpet, as specified."

No. 22,769. JONATHAN HILLER and JOSEPH BULLOCK, of Cohoes, N. Y., assignors to William Smith, of Albany, N. Y., for an "Improvement in knitting machines."

"We do not claim a slide operating by a bent arm at one end to enter breaches in the fabric, and at the other by moving a ring which is attached to and operates it shift a coupling apparatus. We claim the apparatus attached to the stop carriage, viz., the combination of the slides H and G, pawl *g*, gauge *i*, and arm *m*, operating together upon the breaking of the fabric to uncouple the driving power, by and in combination with the ring R, pin J, and spring *d*, which release the detent U, substantially in the manner and for the purposes set forth in the within specification."

No. 22,770. DAVID E. HUGHES, of New York, N. Y., assignor to the American Telegraph Company of said New York, for an "Improvement in telegraphing machines."

"I claim, firstly, giving to the key, while still pressed by the operator, a second motion, at the instant that the circuit is closed or broken, as the case may be, so that an indication of said closing or breaking will be given to the operator, for the purposes set forth. Secondly, the method herein described, or governing the position of the letters upon the type wheel, with respect to that of the platen or roller over which the paper travels, in order to insure an exact position of any particular letter at the moment of printing the same, viz. by so advancing or retarding the said type wheel upon its shaft whenever it has lost or gained in time, in regard to the travel of the circuit breaker at the distant station, that the letter indicated will be certain to stand directly over the said platen at the moment the latter brings the paper into contact with said letter. Thirdly, effecting the printing of each letter, without arresting the motion of the type wheel, by causing the platen to revolve in the same direction and with the same speed as the type wheel, while said platen is bringing up and holding the paper in contact, whereby the paper is advanced along with the type or letter from which it is receiving an impression. Fourthly, the devices by which the type wheel is started from its zero by an operator at a distant station, consisting of the shaft (*g*) set in motion by the electric current, and acting in combination with the clutch lever (*n*) and the wheel E, whereby the type wheel will be advanced up to the time that it becomes engaged with its driving shaft, substantially as set forth."

No. 22,771. HEZEKIAH KNOWLES, of New London, Conn., assignor to Fellows, Hoffman, and Co., of New York, N. Y., for an "Improvement in lamps."

"I do not claim, separately, either of the deflectors above described, nor the introduction of a current of air at the base of the chimney, and between it and the upper deflector; but what I do claim as my invention, and desire to secure by Letters Patent, is, the lower or diaphragm reflector surrounding the wick tube at or near its upper edge, substantially as and for the purpose specified, in combination with the upper deflector and the chimney, having suitable openings for the supply of a draught of air to the inside, and to feed the flame outside of the upper deflector, substantially as and for the purpose specified."

No. 22,772. GEO. W. RICHARDSON and ROBT. GLOVER, of Grayville, Ill., assignors to themselves, I. B. Williams, and Wm. A. Horrall, of White Co., Ill., for an "Improvement in harvesters."

"What we claim as our invention, and desire to secure by Letters Patent, is,—First, the jointed spring arm (a^{11}), arranged and operating in the manner and for the purposes set forth, in combination with the spring catch (i, i^1,) operating so as to catch and hold the arm (a^{11}) when it has gathered the grain, and retain it in their position until the bundle is ready to be deposited free from the platform (*p*). Second, the raker (a, a^1, a^{11}), in combination with the rod (r), crank (c), rod (r^{11}), and retracting weight (w), arranged and operating to produce the reciprocating movements for gathering and delivering the gavel, in the manner described. Third, in combination with the arm (a^{11}), the connecting rod (m), and bent lever (l), operated through the medium of rod (n, n^1), pin (n^{11}), and rest (n^{111}), by the driving wheel (C), substantially in the manner and for the purposes set forth."

RE-ISSUES.

AUGUSTUS ELIAERS, of Boston, Mass., for "Improved reclining chairs."—Patented 11th May, 1858.—Re-issued 25th January, 1859.

"Claims.—First, the general arrangement of devices herein described for actuating and sustaining both the back and foot rest, the same consisting of the arms f^1, f^1, attached to the back in a projection thereof, and having a shaft which travels in grooves formed in the supporting frame work of the chair and the arms, the whole being combined with the foot rest and frame, as set forth herein. Secondly, I claim the combination of device herein described, whereby the back can be placed and held in any desired position, and at same time the proper length of arms retained, the same consisting of the hinged rails *p*, *p*, sliding arms *s*, *s*, locked upon said rails in any desirable manner, and mortises to receive the said rails, as set forth. Thirdly, I claim the foot rest, constructed and arranged substantially as described, when combined with a spring or weight, or its equivalent, to operate as set forth, so that the said foot rest may be raised or lowered at will, to adapt itself to the length of the limb of the occupant, substantially as described. Fourthly, in combination with a reclining chair, constructed as described, I claim the peculiar joint between the back and arms, the same consisting of the arm g^1, attached to the back, and turning upon a pivot in the groove or mortised sliding arm, whereby a very long arm may be obtained, as set forth."

ROSS and THOS. WINANS, of Baltimore, Md., for an "Improvement in hulls of steam vessels."—Patented 26th October, 1858.—Re-issued 25th January, 1859.

"Claim.—What we claim under this Patent as our improvement in steam vessels, is, constructing the hull in the form of a spindle, substantially as above described."

COLONIAL PATENTS.

VICTORIA.

LIST of LETTERS PATENT issued during the Year 1858.

(Continued from page 1288 of Journal for 1858.)

103. FREDERICK SEPTIMUS PEPPERCORNE, of Woolloomoolloo, in the colony of New South Wales, Civil Engineer, for an invention of "A new application of motive power to machinery, called 'The gravitation or automatic engine,' and of the method of applying the force of gravity to the said engine for the purpose of giving motion to machinery."—Dated 8th May, 1858.

104. JOHN IGNATIUS BLEASDALE, of Melbourne, in the county of Bourke, Roman Catholic Clergyman, for an invention for "Silicatizing stone, brick, cement, or other building material, and thereby protecting the same respectively against the destructive action of rain, moisture, water, or air."—Dated 31st May, 1858.

105. WILLIAM STEVENS, of Huntley, near Sandhurst, in the colony of Victoria, for an invention intituled "Improvements in the construction and working of stamps for crushing minerals."—Dated 7th June, 1858.

106. EDWARD HENDERSON, of Melbourne, in the county of Bourke, Engineer, for an invention of "Certain improvements in working cranes and other machinery for lifting."—Dated 27th July, 1858.

107. CHARLES HEAPE, of Melbourne, in the county of Bourke, for an invention intituled "Improvements in washing wool, linen, and other fabrics."—Dated 20th August, 1858.

108. HENRY TAYLOR, of St. Kilda, in the county of Bourke, for an invention intituled "Improvements in propelling vessels."—Dated 25th March, 1858.

109. Robert Bowie, of Yarra Bend, in the county of Bourke, Surgeon, for an invention for the purpose of "Decomposing or rendering innocuous morbific matters tending to excite or produce contagious or infectious diseases or disorders, and for purifying and preserving animal or vegetable substances."—Dated 21st April, 1858.

110. Samuel P. Hogg, of Melbourne, in the county of Bourke, for an invention of "Certain improvements in amalgamating metals."—Dated 15th June, 1858.

111. Joseph Curet, of Melbourne, in the county of Bourke, for an invention of "A new description of spring applicable to beds, chairs, sofas, and other purposes where springs are used."—Dated 12th July, 1858.

112. James Henry Payne, of Ballaarat, in the colony of Victoria, for an invention intituled "Improvements in machinery for puddling and amalgamating earthy matters, and in working winches and other machines."—Dated 9th August, 1858.

113. Minor King, of Melbourne, in the county of Bourke, for an invention intituled "Improvements in machinery for crushing quartz."—Dated 26th August, 1858.

114. Francis Porter Mansfield and Cyrus Hewitt, both of Melbourne, in the county of Bourke, for an invention intituled "Improvements in extracting the stumps of trees, and in pulling down trees."—Dated 6th September, 1858.

115. Bevan George Sloper, of Melbourne, in the county of Bourke, Civil Engineer, for an invention for "Improvements in refrigeration and the making of ice, and for the machinery for effecting the same."—Dated 7th September, 1858.

116. Samuel Theodore Flint, of Melbourne, in the county of Bourke, for an invention intituled "Improvements in preparing materials used for making up cap fronts."—Dated 20th August, 1858.

Registrar General's Office, Melbourne,
14th December, 1858.

List of Specifications, &c. published during the week ending 11th February, 1859.

No.	Price.	Subject-Matter.
1493	1s. 5d.	Dressing, separating, and cleaning seeds, &c.
1494	5d.	Fire-places or stoves.
1495	6d.	Generating steam and economising fuel.
1496	3d.	Filtering apparatus.
1497	2s. 3d.	Breech loading fire-arms and ordnance, &c.
1498	7d.	Apparatus for churning, &c.
1499	4d.	Treating sewage and other matters, &c.
1500	3s. 4d.	Apparatus for measuring, regulating, and preventing waste when supplying fluids.
1502	6d.	Manufacture of bricks.
1503	7d.	Soldering irons.
1504	1s. 7d.	Water-closets, &c.
1505	3d.	Recovering oxides of manganese, &c.
1506	7d.	Castors for furniture.
1507	3d.	Manufacture of cast steel.
1508	4d.	Coverings for floors, &c.
1510	9d.	Apparatus for feeding steam boilers with water, &c.
1512	4d.	Marine propellers.
1513	1s.	Locks.
1514	6d.	Slide valves for steam engines.
1515	6d.	Goffering and crimping machines, &c.
1516	7d.	Roller blinds.
1517	9d.	Steam, air, or gas engines.
1518	7d.	Propelling vessels.
1519	1s. 5d.	Machinery for making bricks, tiles, &c.
1520	1s. 5d.	Apparatus for laying and recovering submarine telegraphic cables.
1522	3d.	Treatment and preparation of peat for fuel.
1523	5d.	Ornamenting metallic bedsteads, &c.
1524	6d.	Machinery for cutting dye woods.
1526	3d.	Preparation of black lead.
1528	8d.	Rolling iron for the manufacture of bolts and pins.
1529	7d.	Floating breakwaters, batteries, &c.
1530	3d.	Application of heated air for drying corn, hay, &c.
1531	10d.	Self acting hook or holder for mine hoists, &c.
1532	1s. 4d.	Breaks for steam engines.
1533	3d.	Railway breaks.
1534	5d.	Treating bituminous oils.
1535	1s. 4d.	High-pressure steam engine.
1536	10d.	Brewing, &c.
1537	7d.	Adjustable pipe tongs.
1538	3d.	Laying submarine telegraphic cables.
1539	10d.	Ovens.
1540	3d.	Treating sewage.
1541	6d.	Treating sewage, &c.
1542	10d.	Breakwaters, &c.
1543	7d.	Drying wool and other fibres.
1544	3d.	Finishing woven fabrics.
1546	1s. 4d.	Apparatus for preventing the explosion of steam boilers.
1547	4s. 9d.	Weaving.
1548	3d.	Conveyance of letters and parcels.
1549	3d.	Manufacture of manure.
1550	3d.	Pneumatic springs for railway carriages, &c.
1551	1s. 5d.	Manufacture of wrought-iron wheels and bosses, &c.
1552	9d.	Umbrellas and parasols.
1553	3d.	Manufacture of articles from whalebone, horn, &c.
1554	10d.	Reefing and furling sails.
1555	10d.	Machinery for weaving fancy looped or knotted fabrics.
1560	3d.	Apparatus for the manufacture of confectionery.
1561	3d.	Apparatus for stopping leaks in ships.
1564	3d.	Pianofortes.
1566	3d.	Manufacture of blocks for constructing sewers, &c.
1568	3d.	Pianofortes.
1571	3d.	Lubricating the valves and pistons of steam engines.
1575	3d.	Machinery for planing, slotting, and shaping metals.
1576	3d.	Manufacture of bags, sails, &c.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5s. must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities :—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).
Macclesfield (*Useful Knowledge Society*).
Manchester (*Chetham Hospital*).
——— (*Camp Field*).
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*).
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Society of Arts (*John Street, Adelphi*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States :—

Public Offices.

Admiralty, Steam Department.
——— Surveyor of Navy.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Sheerness ditto.
——— Devonport ditto.
——— Portsmouth ditto.
——— Chatham ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec; Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin.
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Free Patent Museum and Library, South Kensington.

NUMBERS of VISITORS for the Week ending 12th February, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Feb. 7	Monday -	167	532	699—Showery.
„ 8	Tuesday -	119	434	553—Wet.
„ 9	Wednesday	49	51	100— „
„ 10	Thursday -	82	—	82—Fine.
„ 11	Friday -	66	—	66— „
„ 12	Saturday -	140	—	140— „
	Total -	623	1017	1640

Total number of visitors since the period of free daily admission (12th May, 1858) to 12th February, 1859, —67,156.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*

The following are in the press:—

PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 535. FRIDAY, FEBRUARY 18, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

14. To MONTAGUE WIGZELL, of Friar's Green, Exeter, in the county of Devon, for the invention of "An improved form of nail or driving article."
On his petition, recorded in the Office of the Commissioners on the 1*st day of January*, 1859.

42. To WILLIAM CORFIELD the younger, of Charlton-Adam, in the county of Somerset, for the invention of "Improvements in chains for coupling, cranes, cables, mining purposes, hoisting, and all other purposes where chains are used."
On his petition, recorded in the Office of the Commissioners on the 5th day of January, 1859.

66. To WILLIAM DELANY, of the city of Chicago, Cook county, and city of Illinois, United States of America, for the invention of "Improvements in submarine boats or vessels, and in apparatus used for working under water."—A communication from abroad, by Lodner D. Phillips, of the state of Chicago aforesaid.

70. And to WILLIAM EDWARD NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in steam engines and steam generators."—A communication from abroad, by Louis Arnier, of Marseilles, in the empire of France.
On their petitions, both recorded in the Office of the Commissioners on the 8*th day of January*, 1859.

169. To WILLIAM CLARK, of No. 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Certain improvements in boots and shoes, and in the machinery, apparatus, and means employed in such manufacture." — A communication from Charles Jules Pierre Desnos, of 29, Boulevard St. Martin, Paris, in the empire of France.
On his petition, recorded in the Office of the Commissioners, on the 19*th day of January*, 1859.

196. To WILLIAM HENRY MORRISON, of Nottingham, Manufacturer, and HENRY KINSEY, of the same place, Machinist, for the invention of "Improvements in means or apparatus employed in the manufacture of bonnet-fronts, ruches, ribbon trimmings, and other goffered, or pleated articles."
On their petition, recorded in the Office of the Commissioners on the 21*st day of January*, 1859.

273. To DANIEL BENTLEY, of Accrington, in the county of Lancaster, Millwright and Engineer, for the invention of "Improvements in self-acting apparatus, applicable to letter-press printing-machines, for supplying and removing the paper."

275. To THOMAS WILSON, of Birmingham, in the county of Warwick, Engineer, for the invention of "Improvements in breech loading and other fire arms."

277. To HENRY JUSTINIAN NEWCOME, of Shenley, in the county of Herts, for the invention of "An improved apparatus for heating or warming buildings."

279. And to ALFRED VINCENT NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "An improved method of extracting gold and silver from their ores."—A communication from Lewis Solomon, residing in the United States of America.
On their several petitions, recorded in the Office of the Commissioners on the 31*st day of January*, 1859.

281. To LAURENT RIGOLIER, Engineer, residing at Lyon Place Grolier No. 5, Rhône, in the empire of France, for the invention of "A new brake for railway carriages."

283. To Samuel Birchall Eveleigh, of Salford, in the county of Lancaster, Hat Manufacturer, for the invention of "An improved form or construction of hats or covering for the head."

285. To Samuel Plimsoll, of 32, Hatton Garden, E.C., London, in the county of Middlesex, Coal Merchant, for the invention of "Mining apparatus for use in mining coal and other minerals, and also for separating the small coal and crushed ores from the shale, dirt and other matters with which it may be in combination, and for drying the same."

287. To Robert Gormully, of No. 13, Grafton Street, Fitzroy Square, parish of St. Pancras, Middlesex, for the invention of "Improvement of pianofortes with upright frames."

289. To Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E. C., Patent Agent, for the invention of "Improvements in sewing machines."—A communication from J. P. Pirsson, residing in New York.

291. To Michael Loam, of Treskerby House, Truro, Cornwall, for the invention of "Improvements in machinery for raising sewage and other waters and matters."

293. To Michael Henry, of 84, Fleet Street, in the city of London, Patent Agent, for the invention of "The manufacture and useful applications of certain bituminous products and compounds of bitumen with other matters, and treating and applying certain natural bitumen or bitumens for such purposes."—A communication from Moisant and Company, residing at Havannah.

295. And to William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "An improved blowing machine."—A communication from Mr. Antoine Louis Hyacinthe Fiefnet de Sauville, of Paris, in the empire of France, a foreigner residing abroad.

On their several petitions, recorded in the Office of the Commissioners on the 1st day of February, 1859.

---

297. To Edward Wilkins, of No. 7, Addington Place, Camberwell, in the county of Surrey, Gentleman, for the invention of "Improvements in drain pipes and tiles for draining and liquid manuring land."

299. To François Félix Rateau, of No. 60, Boulevart de Strasbourg, Paris, Practical Engineer, for the invention of "An improved steam-engine actuated by regenerated steam."

301. To Samuel Tearne, of Birmingham, in the county of Warwick, Japanner, for the invention of "Improvements in ornamenting surfaces."

303. To Isaac Clements, of Birmingham, in the county of Warwick, Warehouse Clerk, for the invention of "A new or improved method of manufacturing curtain rings."

305. And to George Leach, of Leeds, in the county of York, Yarn Spinner and cloth Manufacturer, for the invention of "Improvements in leashing yarn or thread, in the hank, and in machinery for winding off the same."

On their several petitions, recorded in the Office of the Commissioners on the 2nd day of February, 1859.

307. To Thomas Storer, of Birmingham, in the county of Warwick, Undertaker and Funeral Carriage Proprietor, for the invention of "A new or improved funeral carriage."

308. To Jeremiah Woodrow, of Oldham, in the county of Lancaster, Hat Manufacturer, for the invention of "Improvements in the manufacture of hats or covering for the head."

309. To William Clayton and Jacob Goodfellow, both of Blackburn, in the county of Lancaster, Engineers, for the invention of "Certain improvements in metallic pistons."

310. To Henry Constantine Jennings, of 8, Great Tower Street, in the city of London, Practical Chemist, for the invention of "Improvements in the manufacture of paper and artificial parchment and of gelatine, applicable to the sizeing of the same, and other purposes."

311. To John Petrie, junior, of Rochdale, in the county of Lancaster, Machinist, and Thomas Wrigley, of Heap Bridge, in the said county, Paper Manufacturer, for the invention of "Improvements in machinery or apparatus for washing rags and other materials for the manufacture of paper."

312. To Samuel Dobson Davison, of Leith, in the county of Mid Lothian, North Britain, Engineer, for the invention of "Improvements in locomotive steam-engines."

313. And to Alexander Gopsell Pooley, of Globe Wharf, Rotherhithe, in the county of Surrey, Agricultural Chemist, for the invention of "Improvements in preparing fish for manure, and in apparatus for the same."

On their several petitions, recorded in the Office of the Commissioners on the 3rd day of February, 1859.

---

315. To Hugh Greaves, of No. 5, Victoria Street, in the city of Westminster, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in the preparation of iron bars, of the various forms or sections used in the construction of sheet-iron structures, and in machinery employed for the same."

316. To Warren Thompson, of No. 2, Rue Sainte Appoline, Paris (France), and of No. 45, Essex Street, Strand, London, for the invention of "An improved printing telegraph."

317. To Alexander Allan, of Perth, in the county of Perth, North Britain, Engineer, for the invention of "Improvements in locomotive steam engines, in part applicable for retarding and stopping railway trains."

319. To Simon Lee Trotman, of Liverpool, in the county of Lancaster, Merchant, for the invention of "Improvements for the more effectually securing or fastening envelopes or other like receptacles, and the more securely affixing postage stamps, or other adhesive labels."

320. To Richard Archibald Brooman, of No. 166, Fleet Street, in the city of London, E.C., Editor of the Mechanics' Magazine and Patent Agent, for the invention of "An improvement in cooling worts and beer."—A communication from Madame Jolibois, residing at Dijon, France.

321. To Richard Archibald Brooman, of No. 166, Fleet Street, in the city of London, E.C.,

Editor of the Mechanics' Magazine and Patent Agent, for the invention of "Improvements in shirts."—A communication from L. Levy Neyman, residing in Paris.

322. To George Henry Baylis, of No. 13, Vauxhall Walk, Lambeth, in the county of Surrey, and Francis Robinson, of No. 88, Salisbury Street, Lisson Grove, in the county of Middlesex, for the invention of "An improved indicator for registering the withdrawal of liquids from vessels."

323. To Frederick Herbert Maberly, of Stow Market, in the county of Suffolk, Master of Arts, for the invention of "Improvements in obtaining spring power, and in its application to various purposes."

324. To Louis Bonneau, of No. 279, Rue Saint Denis, in the city of Paris, Civil Engineer, for the invention of "Improvements in apparatus for registering the time carriages are employed in conveying persons from place to place, and also in moving from place to place when unoccupied."

326. To Patrick Adie, of the Strand, in the county of Middlesex, Mathematical Instrument Maker, for the invention of "Improvements in apparatus for taking levels and measuring angles."

327. To William Robert Justice Packer, of No. 4, Leinster Street, in the parish of St. Marks, and county of the city of Dublin, Dyer and Scourer, for the invention of "Improvements in the plough or plough-share, for the purpose of more effectually pulverizing, breaking up, or cutting into small particles the earth or sod separated from the ground by the plough-share."

329. And to Andrew Barclay, of Kilmarnock, in the county of Ayr, North Britain, Engineer, for the invention of "Improvements in electric-magnetic or electro-magnetic telegraph ropes or conductors, and in machinery or apparatus to be used on board ship for laying or paying out the same."

On their several petitions, recorded in the Office of the Commissioners on the 4th day of February, 1859.

---

331. To Frederick Herbert Maberly, of Stow Market, in the county of Suffolk, Master of Arts, for the invention of "Improvements in apparatus for corking, for drawing corks, in taps, in the necks of bottles, in the bung-holes of barrels, and in similar articles."

332. To Nathaniel Greenhalgh, of Bolton, in the county of Lancaster, Cotton Spinner, and William Shaw, of the same place, Cotton Spinner, and James Mallison, junior, of the same place, Yarn Agent, for the invention of "Certain improvements in the treatment and preparation of yarns or threads previously to dyeing."

333. To Robert Tinkler, of Penrith, in the county of Cumberland, Churn Manufacturer, for the invention of "Improvements in churns."

334. To Henry Anderson, of Liverpool, in the county of Lancaster, Mechanic, for the invention of "An improved construction of apparatus for winding window blinds, sun shades, and similar articles on their rollers."

335. To Thomas Sykes, of Cleckheaton, in the county of York, Manufacturing Chemist, and Benjamin Clifford Sykes, of the same place, M. D., for the invention of "Improvements in obtaining or separating oily, fatty, greasy, tarry, waxy, and resinous substances from oleaginous seeds, nuts and fruits, wool, silk, hair, cotton, flax, line, hemp, furs, skins, leather, bones, fish, and other animal matters and refuse, woollen and cotton waste and refuse, also textile fabrics and refuse grease, produced in various branches of industry, indigo, lac, lac dye, and other dyes."

337. And to Major Booth, of Manchester, in the county of Lancaster, Finisher, and James Farmer, of Salford, in the same county, Machinist, for the invention of "Improvements in sizing or stiffening woven fabrics."

On their several petitions, recorded in the Office of the Commissioners on the 5th day of February, 1859.

---

338. To George Frederic Chantrell, of Liverpool, in the county of Lancaster, Furnace Engineer, for the invention of "Improvements in the treatment of charcoal after its manufacture or revivification."

340. To Abraham Lyons, of the Office for Patents, 77, Chancery Lane, in the county of Middlesex, for the invention of "A pocket protector."

342. To Matthew Curtis, of the city of Manchester, in the county of Lancaster, Machinist, and John Miller, of Staley Bridge, in the said county, Manager, for the invention of "Improvements in certain mules for spinning cotton and other fibrous substances."

344. To Thomas Sims, of Conduit Street, Regent Street, in the county of Middlesex, for the invention of "Improvements in the application of photography to engraving and printing."

346. And to John Smith, of Bradford, in the county of York, Machine Maker, for the invention of "Improvements in machinery or apparatus for preparing and combing wool and other fibrous substances."

On their several petitions, recorded in the Office of the Commissioners on the 7th day of February, 1859.

---

348. To Thomas Moss, of 69, Fleet Street, in the city of London, in the employment of Messrs. Perkins, Bacon, and Co., for the invention of "Improvements in the manufacture of paper and printing ink, suitable for bank notes, bills of exchange, and other documents requiring like security against being copied."

352. To Doctor Ernst Bagnicki, of New York, in the county and state of New York, in the United States of America, for the invention of "An improved syringing apparatus, for curing Leucorrhea, and similar sexual diseases."

354. To Robert Ritson Rowntree, of Kingston-upon-Hull, in the county of York, for the invention of "A portable tea testing apparatus."

356. To John Baldry Redman, of New Palace Yard, in the city of Westminster, Civil Engineer, for the invention of "An improvement in the construction of carriage ways."

358. To William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improved protectors for tobacco plants."—A communication from abroad, by Jules Romiguiére, of Paris, Advocate.

360. And to JOHN JUCKES, of Dame Street, Wharf Road, City Road, Islington, for the invention of "Improvements in stoves or fire-places."

On their several petitions, recorded in the Office of the Commissioners on the 8th day of February, 1859.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

18th February, 1859.

1880. ACHILLE VICTOR PINTA, of 63, King William Street, in the city of London, Foreign Law Agent, for the invention of "Improvements in blank forms of cheques or drafts on bankers payable on demand, relating to the crossing of such cheques or drafts."—Dated 18th August, 1858.

1887. WILLIAM FREDERICK PADWICK, of Hayling Island, in the county of Hants, Gentleman, for an invention of "A machine or implement to be employed on land sown with turnips, to protect them from the ravages of the fly; applicable also to the protection of other crops."—Dated 19th August, 1858.

1890. WILLIAM SMITH, of No. 18, Salisbury Street, Strand, Civil Engineer, for an invention of "Improvements in steam engines."—A communication from Mr. H. W. Gullett, Engineer, residing in Russia.—Dated 19th August, 1858.

1891. WILLIAM PEARCE, of Bristol, in the city and county of Bristol, Surgical Instrument Manufacturer, for an invention of "Improvements in the manufacture of air-tight bottles, jars, or similar articles."—Dated 20th August, 1858.

1896. PETER SPENCE, of Pendleton, in the county of Lancaster, Manufacturing Chemist, for an invention of "Improvements in the manufacture of alum."—Dated 20th August, 1858.

1897. JAMES LEWIS FIGGETT, of Missionary Place, Walworth, in the county of Surrey, Surgical Turner, for an invention of "An improved construction of syringe or hand pump."—Dated 20th August, 1858.

1905. WILLIAM HENSON, of Saint Just, in the empire of France, Engineer, for an invention of "Improvements in circular looms or knitting frames."—Dated 21st August, 1858.

2035. JEAN ULRICH FAESSLER-PETZI, of Lyons, in the empire of France, Merchant, for an invention of "An improved process for the boiling off of tussah silks or wild silks."—Dated 8th September, 1858.

2109. ARCHIBALD TURNER, of Leicester, Manufacturer, for an invention of "Improvements in looms for weaving."—Dated 18th September, 1858.

2381. GEORGE KENT, of High Holborn, in the county of Middlesex, Machinist, for an invention of "An improved churn."—A communication from a Foreigner residing abroad.—Dated 25th October, 1858.

2883. ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, for an invention of "A new or improved manufacture of cast steel."—Dated 16th December, 1858.

2921. ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, for an invention of "An improvement or improvements in the manufacture of cast steel."—Dated 22nd December, 1858.

2935. JAMES BROOM, of Glasgow, in the county of Lanark, North Britain, Iron Manufacturer, for an invention of "Improvements in the manufacture of steel."—Dated 23rd December, 1858.

2941. JOHN WRIGHT CHILD, of Halifax, in the county of York, Engineer, for an invention of "Improvements in the manufacture of fabrics, adapted to be used for curtains, coverings of furniture, table covers, and such like uses."—Dated 24th December, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 14th February*, 1859.)

391. EDWARD OLDFIELD, of the firm of Oddy, Thompson, and Oldfield, of the Adelphi Iron Works, Salford, in the county of Lancaster, Machine Makers, for an invention of "Certain improvements in self-acting mules for spinning."—Dated 15th February, 1856.

420. WILLIAM GWILLIM MERRETT, of 49, Leadenhall Street, for an invention of "An improvement in trousers and drawers."—Dated 19th February, 1856.

426. WILLIAM MUIR, of the Britannia Works, in the city of Manchester, Engineer, for an invention of "Improvements in slide lathes."—Dated 20th February, 1856.

438. JOHN BARSHAM, of Kingston-upon-Thames, in the county of Surrey, Manufacturer, for an invention of "Improvements in the manufacture of cases or packings for bottles and jars."—Dated 20th February, 1856.

Errata in Journal of 11th February.

2924. For "Michael Renney" read "Michael Kenney."

244. For "Improvements, &c." read "An improvement, &c."

259. For "Frederick Prince" read "Frederic Prince."

268. After "France" insert "Engineer."

269. For "ships or vessels" read "ships and vessels."

FOREIGN PATENTS.

FRANCE.

CURRENT LIST of PATENTS of Invention and Certificates of Addition.

1858.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

NOTE.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

5830. BAUDON-PORCHEZ, and Junr., of Lille, département du Nord, for "An hydrogen calorifere stove."—Dated 31st December, 1858.

5831. PROBST and Co., of Alger, département d'Alger, for "A system of moulds for making paste."—Dated 13th December, 1858.

5832. PROBST and Co., of Alger, département d'Alger, for "A kneading machine."—Dated 13th December, 1858.

5833. AUGUSTE REISS, of Faubourg de Pierre, Strasbourg, département du Bas Rhin, for "A system of screw-jacks."—Dated 28th December, 1858.

5834. PIERRE JOSEPH ALÉXANDRE COINTE, of Bores, département de la Somme, a Certificate of Addition to his Patent of 2nd January, 1858, for "A system of hydraulic wheels on points."—Dated 29th December, 1858.

5835. MACMILLAN-DUNLOP, represented, by Zacharie, of 40, Rue de Bourbon, Lyon, département du Rhône, a Certificate of Addition to his Patent of 29th September, 1858, for "Improvements in rollers or cylinders used in machines for printing fibrous and other substances."—Dated 21st December, 1858.

5836. PIERRE BIELLE, of 4, Rue St. François, Marseille, département des Bouches du Rhône, for for "Coating."—Dated 31st December, 1858.

5837. LOUIS KESSLER, of Metz, département de la Moselle, for "Improvements in apparatus for evaporating and condensing steam."—Dated 31st December, 1858.

5838. JACQUES LOUIS LEMAIRE, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in cigar-cases, portemonaies, and other similar articles."—Dated 24th December, 1858.

5839. LAMBERT HUBERT MAURISSEN, represented by Mathieu, 45, Rue St. Sébstien, Paris, for "Improvements in measuring-instruments."—Dated 24th December, 1858.

5840. PIERRARD and BAILLY, of 66, Rue Chapon, Paris, for "A process for chiselling gilt wood."—Dated 24th December, 1858.

5841. JOSEPH STAAL, of 92, Rue d'Orléans, Batignolles, for "Apparatus for closing vessels or recipients hermetically, and rendering them inodorous."—Dated 24th December, 1858.

5842. ADRIEN HIPPOLYTE DOURLET, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of artificial flowers and leaves."—Dated 24th December, 1858.

5843. FRANÇOIS XAVIER ALEXIS FAUVELLE-DELABARRE, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An apparatus for cutting combs."—Dated 24th December, 1858.

5844. AIMÉ JEAN BAPTISTE CORREAUX, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A process for veneering all kinds of articles."—Dated 24th December, 1858.

5845. NICOLAS HECTOR AUBERT, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An instrument for graphical works."—Dated 24th December, 1858.

5846. FRÉDÉRIC DUCIMETIÈRE-MONOD, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 10th September, 1856, for "A direct process of manufacturing chlorine."—Dated 24th December, 1858.

5847. ANDRÉ FRANÇOIS EMILE ROBERT, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Manufacture of india-rubber sounding dolls, balloons, and other objects."—Dated 24th December, 1858.

5848. ALPHONSE ALEXANDRE GEORGE, of 59, Rue Saintonge, Paris, for "A mode of continuously feeding steam boilers with the same water."—Dated 27th December, 1858.

5849. PATRICK MOIR-CRANE, represented by Rowland, of 224, Rue de Rivoli, Paris, for "Improvements in the manufacture of peat fuel."—Dated 27th December, 1858.—(English Patent, expiring 26th June, 1872.)

5850. ALEXANDRE CÉSAR LAMBERT, of 2, Place Louvois, Paris, for "Spring petticoats."—Dated 27th December, 1858.

5851. JACQUES HENRI ROUZÉ, of 14, Rue Notre Dame de Nazareth, Paris, for "Medallion buttons."—Dated 27th December, 1858.

5852. ALBERT PONCELIN, of 60, Rue de Paris, Clamart, for "An apparatus for making Seltzer water."—Dated 27th December, 1858.

5853. EUGÈNE BERTRAND ROGER, of 45, Rue de Cléry, Paris, for "A movement whereby clocks are made to go without being wound up."—Dated 27th December, 1858.

* For the French Patent Law see No. 228 of this Journal.

5854. Jean Marie André, of 10, Rue Ste. Elisabeth, Paris, for "Metallic lables for trees, shrubs, &c."—Dated 27th December, 1858.

5855. Williams and Ellison, represented by Fringant, with Masse, of 10, Rue de Provence, Paris, for "A system of stoppering."—Dated 27th December, 1858.—(English Patent, expiring 7th December, 1872.)

5856. Jean Baptiste Vergne, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 17th June, 1857, for "A propeller with a grooved screw."—Dated 27th December, 1858.

5857. John Colpill, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in processes for packing."—Dated 27th December, 1858.

5858. Louis Gauessl, domiciled with Boos, of 6, Rue et Hotel de Lyon, Paris, for "A process for scouring wool and cloth."—Dated 27th December, 1858.

5859. Léon Victor Camus, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in lighting apparatus, especially for railway signals, &c."—Dated 27th December, 1858.

5860. Théodore Rosé Léon Alfred Sudré, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 25th October, 1858, for "Manufacture of steel, &c."—Dated 27th December, 1858.

5861. Nicolas Amable Munier, represented by Daubréville, of 60, Boulevart de Strasbourg, Paris, for "A twyer and bellows."—Dated 28th December, 1858.

5862. Viellard-Migeon and Co., represented by Daubréville, of 60, Boulevart de Strasbourg, Paris, for "Improvements in machines for making wood screws."—Dated 28th December, 1858.

5863. Théophile François Berrens, of 17, Rue Laffitte, Paris, for "An apparatus for preparing timber."—Dated 28th December, 1858.

5864. François Carré, of Avenue de la Porte-Maillot, Passy, for "A kind of gauze wire."—Dated 28th December, 1858.

5865. Eugène Goddier, represented by Pelez, of 10, Rue Mogador, Paris, a Certificate of Addition to his Patent of 25th November, 1858, for "Applying talc or mica to various purposes."—Dated 28th December, 1858.

5866. Louis Migliavacca, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "So-called 'Milanese cakes.'"—Dated 28th December, 1858.

5867. Théophile Julien Laballe, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 22nd October, 1858, for "Applying designs and colours to india rubber."—Dated 28th December, 1858.

5868. Noël Nicolas Picot, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 11th May, 1858, for "A metallic band for measuring by the metre."—Dated 28th December, 1858.

5869. Christian E. Detmold, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in the system of working and jointing the ends of rails for railways."—Dated 28th December, 1858.

5870. Jean Baptiste Lacroix, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Quill penholders."—Dated 28th December, 1858.

5871. Edward Green, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in tables."—Dated 28th December, 1858.

5872. François Xavier Hurstel, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 29th December, 1857, for "A system of dyeing thread on bobbings or spools, tissues, &c."—Dated 28th December, 1858.

5873. Charles Rishworth, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of springs for sustaining loads and moderating concussion."—Dated 28th December, 1858.—(English Patent, expiring 20th January, 1872.)

5874. Alphonse Denis Taurigna, domiciled 11, Rue de la Monnaie, Paris, for "An economical apparatus with free air for hatching silkworms."—Dated 28th December, 1858.

5875. Louis Charlemagne Sambourg, represented by Hassenfeld, of 12, Place de la Bourse, Paris, for "Regulating apparatus worked by electricity by means of electro-motive power."—Dated 28th December, 1858.

5876. P. and E. Audouard, of 7, Cour des Fontaines, Paris, for "Fixing earrings without piercing the ears."—Dated 28th December, 1858.

5877. Alexandre Hrnry Dufresne, of 6, Rue de Sèze, Paris, a Certificate of Addition to his Patent of 14th May, 1856, for "A means of gilding."—Dated 29th December, 1858.

5878. Alphonse Alexandre George, of 59, Rue Saintonge, Paris, a Certificate of Addition to his Patent of 19th November, 1857, for "A smoke-consuming kitchen-range."—Dated 29th December, 1858.

5879. Thomas Spencer, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "Improvements in the treatment of iron ores and ferruginous sands, and in apparatus belonging thereto."—Dated 29th December, 1858.—(English Patent, expiring 23rd June, 1872.)

5880. François Duval, of 139, Rue du Faubourg Poissonnière, Paris, for "A candle lamp."—Dated 29th December, 1858.

5881. Auguste Lespiaut, of 6, Passage du Jeu-de-Boules, Paris, a Certificate of Addition to his Patent of 14th February, 1857, for "Cases of hunting cartridges."—Dated 29th December, 1858.

5882. Charles Wheatstone, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in electro-magnetic telegraphs, and in electrical apparatus for conveying signals or messages at a distance."—Dated 29th December, 1858.—(English Patent, expiring 2nd June, 1872.)

5883. Jean Gustave Tisserant, of 53, Rue Aumaire, Paris, for "A kind of water-gauge."—Dated 29th December, 1858.

5584. Jacques Léon Tardieu, domiciled with Feuillet, of 26, Rue Neuve St. Augustin, Paris, a Certificate of Addition to his Patent of 28th August, 1857, for "A porcelain kiln."—Dated 29th December, 1858.

5885. Leroy and Dubois, of 45, Boulevart St. Martin, Paris, for "Improvements in sewing machines."—Dated 29th December, 1858.

5886. Richard Gornall, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A machine for making hollow balls."—Dated 29th December, 1858.

5887. Jules Vergne, represented by Desnos, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 17th June, 1857, for "A propeller with a grooved screw."—Dated 29th December, 1858.

5888. Parent, Hamet, and Co., represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in silk tissue and other buttons."—Dated 29th December, 1858.

5889. Etienne, sen. and jun., represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A fixed or movable horse-gin."—Dated 29th December, 1858.

5890. Causserouge Brothers, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, a Certificate of Addition to his Patent of 24th May, 1856, for "Improvements in the composition of liqueurs."—Dated 29th December, 1858.

5891. Alexandre Louis Lévêque, with Dreyfous, of 54, Rue de Bondy, Paris, for "An apparatus for stopping fiery horses."—Dated 29th December, 1858.

5892. Pierre Alexandre Hue, of 78, Rue de la Verrerie, Paris, for "An elliptic or oval compass with shifting points for tracing and cutting ovals, being at the same time the most complete mathematical compass."—Dated 30th December, 1858.

5893. Philibert Gauthier, of 7, Place Louvois, Paris, for "A match case."—Dated 30th December, 1858.

5894. Nicolas Auguste Chasser, of 33, Rue Château, Landon, Paris, for "Argentiferous bronze."—Dated 30th December, 1858.

5895. Antoine René Berteloot, of 357, Rue St. Denis, Paris, for "Hermetic bolts applicable to all kinds of closings."—Dated 30th December, 1858.

5896. Marie Eugène Robert, of 4, Rue des Petits Hôtels, Paris, a Certificate of Addition to his Patent of 3rd April, 1858, for "A means of preserving balls, or so-called 'garden mirrors.'"—Dated 30th December, 1858.

5897. Constant de la Chaussée, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in apparatus for chasing metals."—Dated 30th December, 1858.

5898. Petin, Gaudet, and Co., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of wheel tyres without welding."—Dated 30th December, 1858.

5899. Petin, Gaudet, and Co., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Manufacture of bells, crucibles, and other articles of cast and hammered steel."—Dated 30th December, 1858.

5900. Germain Sommeiller, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "An apparatus for boring holes in mines."—Dated 30th December, 1858.

5901. Louis Barnabé Duboc, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in looms for twisting and twining filamentous substances."—Dated 30th December, 1858.

5902. Wimshurst and Trueman, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of metal sheets."—Dated 30th December, 1858.—(English Patent, expiring 1st July, 1872.)

5903. Mathieu Carmine, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 4th December, 1858, for "A smoke-consuming calorifere-stove."—Dated 20th December, 1858.

5904. Auguste Terssié, represented by Berlioz, of 4, Rue Duphot, Paris, for "A numbering machine."—Dated 30th December, 1858.

5905. John May, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in paddle wheels and using the same as propellers and rudders."—Dated 30th December, 1858.—(American Patent, expiring 8th September, 1872.)

5906. Simon Ferdinand Viéville, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of lace, blonde, &c."—Dated 30th December, 1858.

5907. Antoine Pierre, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, a Certificate of Addition to his Patent of 3rd October, 1857, for "Improvements in ruling machines."—Dated 30th December, 1858.

5908. Jean Baptiste Nicolas Maas, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of military ornaments."—Dated 30th December, 1858.

5909. Pierre Félix Bertrand, domiciled with Page, of 25, Rue Coquillière, Paris, for "A mode of conveying mineral waters."—Dated 30th December, 1858.

5910. Edouard Clarence Shepard, with Bricogne, of 50, Rue du Faubourg Poissonnière, Paris, for "Improvements in the construction of electrical lamps."—Dated 31st December, 1858.

5911. Saffrey, senr. and junr., represented by Bozon, of 14, Rue Lebouteux, Batignolles, for "Unravelling ropes and linen, hemp, and cotton fabrics, and preparing those substances for being spun again."—Dated 31st December, 1858.

5912. John Harcourt Brown, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of cartridges."—Dated 31st December, 1858.—(English Patent, expiring 5th October, 1872.)

5913. Philippe Lefebvre, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A piercing machine with a fixed vice."—Dated 31st December, 1858.

5914. Laville and Poumaroux, of 8, Rue Simon-le-Franc, Paris, a Certificate of Addition to their Patent of 22nd August, 1854, for "A kind of hats."—Dated 31st December, 1858.

5915. Jean Baptiste Lucas, of 4, Passage Joufroy, Batignolles, a Certificate of Addition to his Patent of 14th July, 1856, for "Hydraulic plaster."—Dated 31st December, 1858.

5916. Antoine Michel, of 35, Rue de Trévise, Paris, for "Coating against dampness."—Dated 31st December, 1858.

5917. Chauviteau and Rollin, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A system of separating and moderating gas and apparatus used thereat."—Dated 31st December, 1858.

5918. Jean Baptiste Pascal, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A motor."—Dated 31st December, 1858.

5919. Thomas Dunn, represented by Gough, of 238, Rue de Rivoli, Paris, for "Improvements in the mechanism and apparatus for changing the position of carriages on railways."—Dated 31st December, 1858.—(English Patent, expiring 28th May, 1872.)

5920. Louis Désiré Defienne, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "An apparatus with a current of electro-voltaic and magnetic induction."—Dated 31st December, 1858.

5921. George Lurig, represented by Bos Darnis, of 36, Rue de l'Echiquier, Paris, for "Improvements in melting soap."—Dated 31st December, 1858.

5922. Charles Zipp, of 2, Rue Madame, Paris, for "Improvements in saddles for horses."—Dated 31st December, 1858.

5923. Edward Ferguson, of Thann, département du Haut Rhin, for "Improvements in gas-lighting apparatus."—Dated 31st December, 1858.

5924. Charles Valmégère, of St. Chiniau, département de l'Hérault, for "A system of screw-vice with a reciprocating motion for equally distributing wool on the surface of drums of carding machines."—Dated 28th December, 1858.

5925. Jean Baptiste Giraud, of St. Gilles, département du Gard, for "A process for lighting, regulating, and extinguishing lamps without removing the chimney glass."—Dated 30th December, 1858.

5926. Alphonse Allain, for "Extracting copper from its ores."—Dated 31st December, 1858.

5927. François Vouillon, of Louviers, département de l'Eure, for "Means of manufacturing woollen thread for warps and wefts."—Dated 31st December, 1858.

End of the year 1858.

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Timekeepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*

The following are in the press:—

Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c.
Electricity and Magnetism: their Generation and Applications.
Typographic, Lithographic, and Plate Printing.
Bleaching, Dyeing, and Printing Yarns and Fabrics.
Preparation of Fuel, and Apparatus for its Combustion.
Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing.
Production and Applications of Gas.
Steam Engines.

B. Woodcroft.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

No. 536. **TUESDAY, FEBRUARY 22, 1859.** **Price 2d.**

Notices to Proceed.

NOTICE is hereby given that

2248. ANTOINE EPHREM GALLIARD, No. 2, Seymour Place, St. James's Churchyard, Clerkenwell, Middlesex, has given notice at the Office of the Commissioners, of his intention to proceed with his application for Letters Patent, for the invention of "Making self-supplying portable fountains, to play water or water perfumed."

2251. And LEWIS HOPE, of Bishopsgate Churchyard, in the city of London, Merchant, has given the like notice in respect of the invention of "Improvements in electric telegraph cables."—A communication.

As set forth in their respective petitions, both recorded in the said office on the 9th day of October, 1858.

2257. And CHARLES FRÉDERIC VASSEROT, of 45, Essex Street, Strand, London, Patent Agent, has given the like notice in respect of the invention of "Improvements in constructing reflectors."—A communication from Antoine Marie Balencie, residing in Paris, in the empire of France.

2266. And to THOMAS RIDDELL, of Carracou Terrace, Old Ford, Bow, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "An improved arrangement for sustaining window sashes and sliding pannels."

As set forth in their respective petitions, both recorded in the said office on the 11th day of October, 1858.

2274. And GEORGE BEADON, of Bathpool, in the county of Somerset, Captain in the Royal Navy, has given the like notice in respect of the invention of "Improvements in the construction of ships, boats, rafts, and vessels for passing through water, or through the atmosphere, or partly through the water and partly through the atmosphere."

As set forth in his petition, recorded in the said office on the 12th day of October, 1858.

2288. And CHARLES COWPER, of No. 20, Southampton Buildings, Chancery Lane, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "Improvements in the manufacture of articles of hard vulcanized india rubber and gutta-percha, and similar gums."—A communication from Gustavus Cuppers, residing at College Point, in Long Island, in the state of New York, in the United States of America.

2293. And SAMUEL PERKES, of Clapham, has given the like notice in respect of the invention of "Improvements in machinery for extracting oil from the cocoa nut and other vegetable matters."

2295. And GEORGE BAXTER, of Northampton Square, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in coloring photographic pictures."

2296. And THOMAS ARCHER, junior, of Dunston, near Gateshead, has given the like notice in respect of the invention of "Improvements in apparatus for preventing explosions of steam boilers."

2297. And SQUIRE DIGGLE, of Radcliffe, in the county of Lancaster, Machine Maker, has given the like notice in respect of the invention of "Improvements in looms for weaving."

As set forth in their respective petitions, all recorded in the said office on the 14th day of October, 1858.

2302. And GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in the manufacture of gloves, and in the apparatus employed therein."—A communication.

2307. And GEORGE FERGUSSON WILSON, of Belmont, Vauxhall, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in preparing compounds containing sulphur, for preventing and destroying blight, mildew, and insects."

As set forth in their respective petitions, both recorded in the said office on the 15th day of October, 1858.

2309. And Firmin Joseph Coulon and Simon Godefroid Giraud, of 2, Rue Sainte Appoline, Paris (empire of France), and of 45, Essex Street, Strand, London, have given the like notice in respect of the invention of "Improvements in the process of ornamenting skin and leather."

2316. And Arthur Dunn, of 1, Dalston Terrace East, in the county of Middlesex, Fancy Soap Maker, has given the like notice in respect of the invention of "An improvement in preparing marking compounds to be used on linen and other fabrics."

As set forth in their respective petitions, both recorded in the said office on the 16th day of October, 1858.

2327. And John Smith, of Newport, in the county of Salop, Engineer, has given the like notice in respect of the invention of "Improvements in rough-shoeing beasts of draught and burden."

As set forth in his petition, recorded in the said office on the 18th day of October, 1858.

2359. And Joseph Whitworth, of the city of Manchester, in the county of Lancaster, Engineer, has given the like notice in respect of the invention of "Improvements in guns, gun-carriages, and ammunition."

2330. And William Fothergill Batho and Eugene Moritz Bauer, of Salford, near Manchester, in the county of Lancaster, Engineers and Tool Makers, have given the like notice in respect of the invention of "Improvements in screws, worms, and wheels, and in machinery or apparatus for cutting the same."

As set forth in their respective petitions, both recorded in the said office on the 19th day of October, 1858.

2345. And John Wainwright, of Birkenhead, in the county of Chester, Dental Surgeon, has given the like notice in respect of the invention of "Improvements in ventilating houses and other places."

2346. And Samuel Thomas Clarke, of 30, Kildare Terrace, Westbourne Park, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in apparatus for crossing bankers' cheques and drafts."

As set forth in their respective petitions, both recorded in the said office on the 20th day of October, 1858.

2372. And William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in pumps."—A communication.

As set forth in his petition, recorded in the said office on the 23rd day of October, 1858.

2376. And Joseph James Welch and John Stewart Margetson, of Cheapside, in the city of London, have given the like notice in respect of the invention of "Improvements in the manufacture of scarfs for gentlemen's wear."

2379. And Thomas Ashworth and Joseph Ashworth, of Pendleton, in the county of Lancaster, Manufacturers, have given the like notice in respect of the invention of "Certain improvements in power looms for weaving."

2383. And Stephen Rossin Parkhurst, of the city and state of New York, United States of America, has given the like notice in respect of the invention of "Improvements in cotton gins."

As set forth in their respective petitions, all recorded in the said office on the 25th day of October, 1858.

2406. And Abel Heywood, of the city of Manchester, Paper Maker and Stainer, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for suspending paper and woven fabrics to be dried."—A communication.

2409. And William Munro, of 32, Bartholomew Close, in the city of London, Manufacturing Chemist, has given the like notice in respect of the invention of "A new manufacture of capsules and other metallic articles."

As set forth in their respective petitions, both recorded in the said office on the 28th day of October, 1858.

2436. And William Palmer, of the city and state of New York, United States of America, has given the like notice in respect of the invention of "Improvements in firearms."

As set forth in his petition, recorded in the said office on the 1st day of November, 1858.

2439. And Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, has given the like notice in respect of the invention of "An improved combination for the production of voltaic electricity and its application as a curative agent to certain parts of the human body."—A communication.

As set forth in his petition, recorded in the said office on the 2nd day of November, 1858.

2477. And Louis Schwartzkorf and Ferdinand Carl Philippson, both of Berlin, have given the like notice in respect of the invention of "Improvements in machinery for boring holes in rocks and minerals for blasting and other similar purposes."

As set forth in their petition, recorded in the said office on the 5th day of November, 1858.

2620. And Edmund Alfred Pontifex, of the firm of Pontifex and Wood, of Shoe Lane, in the city of London, Engineers and Coppersmiths, has given the like notice in respect of the invention of "Improvements in external surface condensers."

As set forth in his petition, recorded in the said office on the 19th day of November, 1858.

2740. And Richard Laming, of Haywards Heath, in the county of Sussex, has given the like notice in respect of the invention of "Improvements in purifying gas and in turning sulphuretted hydrogen, carbonic acid, and ammonia, or their compounds, to profitable account."

As set forth in his petition, recorded in the said office on the 1st day of December, 1858.

2774. And James Brookes Fisher and John Fisher, of Stourbridge, in the county of Worcester, Fire Brick Manufacturers, and James Bird the younger, of Kingswinford, in the county of Stafford, Agent, have given the like notice in respect of the invention of "An improvement in the doors and dampers of furnaces

and other places where intense heat has to be resisted."

As set forth in their petition, recorded in the said office on the 4th day of December, 1858.

2788. And JAMES GREENE ARNOLD, of Worcester, Massachusetts, in the United States of America, has given the like notice in respect of the invention of "Improvements in envelopes for letters and similar purposes."

As set forth in his petition, recorded in the said office on the 6th day of December, 1858.

2879. And WILLIAM MORGAN, of Witton Park Iron Works, near Darlington, in the county of Durham, has given the like notice in respect of the invention of "Improvements in the manufacture of iron."

As set forth in his petition, recorded in the said office on the 15th day of December, 1858.

2987. And THOMAS BELL, of Plaistow, in the county of Essex, has given the like notice in respect of the invention of "Improvements in purifying gas."

As set forth in his petition, recorded in the said office on the 30th day of December, 1858.

104. And CHARLES NEALE MAY, of Devizes, in the county of Wiltshire, Engineer, has given the like notice in respect of the invention of "An improved heat indicator."

As set forth in his petition, recorded in the said office on the 13th day of January, 1859.

147. And WILLIAM NEWMAN, of Aston, near Birmingham, in the county of Warwick, Brassfounder, has given the like notice in respect of the invention of "New or improved furniture for window and other blinds."

148. And JOHN FOSTER, of Lancaster, in the county of Lancaster, Corn Merchant, has given the like notice in respect of the invention of "Certain improvements in machinery or apparatus called 'spinning frames' and 'roving frames,' employed for spinning and roving flax, tow, hemp, jute, and other fibrous substances."

As set forth in their respective petitions, both recorded in the said office on the 18th day of January, 1859.

218. And JOHN GUY PROGER, of 13, Trinity Street, Cardiff, and DAVID DAVIES, of Stuart Street, Bute Docks, Cardiff, in the county of Glamorgan, have given the like notice in respect of the invention of "Improvements in lanterns used on board ship to signal to the steersman."

As set forth in their petition, recorded in the said office on the 24th day of January, 1859.

230. And HENRY BRECKNELL, of the city of Bristol, Brassfounder, and JOHN DYER, of the same place, Gentleman, have given the like notice in respect of the invention of "Improvements in cocks and valves."

As set forth in their petition, recorded in the said office on the 25th day of January, 1859.

249. And HENRY RAWSON, of Leicester, has given the like notice in respect of the invention of "Improvements in machinery for preparing wool and other fibrous substances."

As set forth in his petition, recorded in the said office on the 27th day of January, 1859.

266. And JAMES MAC KENZIE, Manager to William Strode, of St. Martin's-le-Grand, in the city of London, Gas Engineer, has given the like notice in respect of the invention of "An improved method of operating ventilating valves, especially applicable to ventilating gas burners."

267. And JOSEPH MARINO, of the city of Stockholm, in the kingdom of Sweden, Mechanician, has given the like notice in respect of the invention of "An inodorous closet or commode."

As set forth in their respective petitions, both recorded in the said office on the 29th day of January, 1859.

282. And JOHN HOSKING, of No. 5, Catherine Terrace, Gateshead-on-Tyne, in the county of Durham, and THOMAS COCK, of Cleator Moor, near Whitehaven, in the county of Cumberland, have given the like notice in respect of the invention of "Improvements in furnaces or fire-places."

286. And MARY ANN WALKER, of the firm of Charlotte and Mary Ann Walker, trading under the name of Richard Walker, as Percussion Cap Manufacturers, of Graham Street, Birmingham, in the county of Warwick, and RICHARD WALKER, Manager of the said Works, also of Birmingham as aforesaid, have given the like notice in respect of the invention of "Certain improvements in the manufacture of percussion-caps and in the apparatus for effecting certain parts of the same."

As set forth in their respective petitions, both recorded in the said office on the 1st day of February, 1859.

302. And JOHN BUNCHER, of Birmingham, in the county of Warwick, Brassfounder, has given the like notice in respect of the invention of "Improvements in the manufacture of eyes or fastenings for stair rods."

As set forth in his petition, recorded in the said office on the 2nd day of February, 1859.

326. And PATRICK ADIE, of the Strand, in the county of Middlesex, Mathematical Instrument Maker, has given the like notice in respect of the invention of "Improvements in apparatus for taking levels and measuring angles."

As set forth in his petition, recorded in the said office on the 4th day of February, 1859.

333. And ROBERT TINKLER, of Penrith, in the county of Cumberland, Churn Manufacturer, has given the like notice in respect of the invention of "Improvements in churns."

As set forth in his petition, recorded in the said office on the 5th day of February, 1859.

352. And Doctor ERNST BAGNICKI, of New York, in the county and state of New York, in the United States of America, has given the like notice in respect of the invention of "An improved syringing apparatus for curing leucorrhea and similar sexual diseases."

As set forth in his petition, recorded in the said office on the 8th day of February, 1859.

And notice is hereby further given, that all persons, having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

22nd February, 1859.

1909. Francis Puls, of Roxburgh Terrace, Haverstock Hill, in the county of Middlesex, Chemist, for an invention of "Improvements in the distillation of coal."—Dated 23rd August, 1858.

1910. Francis Puls, of Roxburgh Terrace, Haverstock Hill, in the county of Middlesex, Chemist, for an invention of "Improvements in the distillation of bituminous matters and gas tar."—Dated 23rd August, 1858.

1913. Lewis Higgins, of Jersey City, and Alexander Brown, of New York, in the United States of America, Mariners, for an invention of "Improvements in reefing the sails of navigable vessels."—Dated 23rd August, 1858.

1917. John Hunter Robinson, Manager to Grant, Brothers, of Clements Court, in the city of London, Manufacturers, for an invention of "An improved shirt."—Dated 23rd August, 1859.

1923. Henry Wilson, Engineer, in the employment of Powis and James, of Watling Street, in the city of London, Engineers, for an invention of "Improvements in the mounting of band saws."—Dated 24th August, 1858.

1927. Thomas Hill, of Heywood, in the county of Lancaster, Boiler Manufacturer, for an invention of "Improvements in machinery or apparatus for punching and shearing metals." — Dated 25th August, 1858.

1933. James Black, of Edinburgh, Machine Maker, for an invention of "An improved mode or means of obtaining, applying, and transmitting motive power."—Dated 26th August, 1858.

1935. Samuel Newman Rodier, of 21, Oak Village, St. Pancras, in the county of Middlesex, for an invention of "Improvements in apparatus for regulating gas."—Dated 26th August, 1858.

1938. Thomas Trotman, of 253, Albany Road, Camberwell, in the county of Surrey, Pin Maker, for an invention of "Improvements in hair pins."—Dated 27th August, 1858.

1939. Joseph Ellisdon, of Liverpool, in the county of Lancaster, Designer and Cabinet Maker, for an invention of "Improvements applicable to reading chairs and other articles used to sit or recline upon."—Dated 27th August, 1858.

1943. Herbert William Hart, of No. 69, Fleet Street, Gas Engineer, for an invention of "Improvements in the application of gas to chandeliers."—Dated 27th August, 1858.

1995. John Talbot Pitman, of the American and European Patent Offices, No. 67, Gracechurch Street, London, for an invention of "An improvement or improvements in the construction of pneumatic condensing apparatus, for the purpose of compressing air, aeriform, or gaseous bodies preparatory to their use as prime motors, or for other purposes." — A communication from a Foreigner residing abroad.—Dated 2nd September 1858.

2026. Louis Pellissier, Mechanician, and Jean Puytorac, Bailiff, both of Bordeaux, France, for an invention of "Improvements in railway breaks.' —Dated 7th September, 1858.

2052. John Knowles, of Bolton-le-Moors, in the county of Lancaster, Cotton Spinner, for an invention of "Certain improvements in machinery for preparing cotton and other fibrous materials." —Dated 10th September, 1858.

2061. Laurence Hill, of Port Glasgow, in the county of Renfrew, North Britain, Iron Shipbuilder, for an invention of "Improvements in apparatus for lowering or paying out ships' chains and anchors."—Dated 11th September, 1858.

2089. The Honorable William Erskine Cochrane, of Osnaburgh Terrace, Regent's Park, in the county of Middlesex, for an invention of "An improvement in the fastenings of railways."—Dated 14th September, 1858.

2222. James Ridsdale, of Stoke Newington, in the county of Middlesex, Accountant, for an invention of "An improved reservoir or fountain pen." —Dated 6th October, 1858.

2868. David Rowan, of Greenock, in the county of Renfrew, North Britain, Engineer, for an invention of "Improvements in steam engines."—Dated 15th December, 1858.

2897. James Clegg, of Keighley, in the county of York, Engineer, for an invention of "Improvements in lubricating the valves and pistons of steam engines."—Dated 17th December, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 19th February*, 1859, *inclusive.*)

17th February.

431. John Freer, of Rothley, in the county of Leicester, Agricultural Implement Maker, for an invention of "Improvements in machines for planting grain and seed, and an improved seed feeder and meter for planting-machines."—Dated 20th February, 1856.

538. Robert Maynard, Engineer, of Whittlesford, in the county of Cambridge, for an invention of "Improvements in machinery for cutting and separating agricultural produce." — Dated 3rd March, 1856.

18th February.

434. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of Glasgow, North Britain, Gentleman, for an invention of "Improvements in machinery or apparatus for lubricating bearings; parts of which improvements are applicable to the raising or elevating of liquids."—A communication from Eugène Bourdon, of Paris, in the empire of France, Mechanical Engineer.—Dated 20th February, 1856.

479. Charles Iles, of Birmingham, in the county of Warwick, Manufacturer, for an invention of "Improvements in pointing hair pins and in making up hair pins for sale."—Dated 25th February, 1856.

19th February.

440. Isaac Moll, Merchant, of Cologne, in the kingdom of Prussia, for an invention of "The treatment of the sulphate of alumine of commerce, and its formation of compounds useful for the disinfecting of organic substances in a state of putrefaction, as well as for other purposes."—Dated 21st February, 1856.

442. Jacques Henri Marie Maissiat, of Paris, in the empire of France, for an invention of "Improvements in projectiles for fire-arms."—Dated 21st February, 1856.

514. Charles Alexandre de Fonbonne, of Paris, for an invention of "Improved apparatus for the manufacture of coke, and for blasting, also for the production and extraction of illuminating and combustible gas, as well as ammoniacal and bituminous matters;—part of such apparatus being applicable to the consumption of smoke."—Dated 28th February, 1856.

FOREIGN PATENTS.

FRANCE.

Current List of Patents of Invention and Certificates of Addition.

1859.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

Note.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

1. Couturier and Gautier, the former of 11, Rue Albony, the latter of 88, Rue Popincourt, Paris, for "A compressed-air balloon."—Dated 3rd January, 1859.
2. Antoine Joseph Sax, of 50, Rue St. Georges, Paris, for "Arrangements in musical instruments."—Dated 3rd January, 1859.
3. Antoine Joseph Sax, of 50, Rue St. Georges, Paris, for "Arrangements in timbals."—Dated 3rd January, 1859.
4. Clapier and Laude, the former of 10, Passage Saulnier, Paris, the latter of Belleville, for "Stuffing seats with downy silk."—Dated 3rd January, 1859.
5. Heman-Gardiner, represented by Brandon, of 7, Rue des Moulins, Paris, for "Improvements in wheels and axles of railway carriages."—Dated 3rd January, 1859.—(American Patent, expiring 1st June, 1872.)
6. Léandre Bognier, domiciled 11, Rue Roguépine, Paris, for "Manufacture of three kinds of fuel."—Dated 3rd January, 1859.
7. Louis Laurent Ottenheim, of 29, Rue du Grand St. Michael, Paris, for "Mouth-pieces applicable to bits."—Dated 3rd January, 1859.
8. Louis Polydore Grand Collot, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An hypo-gastric belt, with a jointed pessary."—Dated 3rd January, 1859.
9. Charles Bochie, of 256, Quai Jemmapes, Paris, for "Improvements in the manufacture of cartridges, called 'anvil cartridges.'"—Dated 3rd January, 1859.
10. Daniel Henry Guillaume, of Route de Courbevoie, Asnières, for "Apparatus and processes for bleaching tissues and thread in skeins."—Dated 3rd January, 1859.
11. Jacques Etienne Daud, of 62, Rue Ménilmontant, Paris, a Certificate of Addition to his Patent of 24th September, 1858, for "Shoes and boots, &c."—Dated 4th January, 1859.
12. Brémoud and Thuilliez, the former of 70, Rue Neuve des Mathurins, the latter of 65, Rue Neuve des Mathurins, Paris, for "Improvements in thread guides of spinning machines."—Dated 4th January, 1859.
13. Louis Bonneau, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in registering apparatus for carriages."—Dated 4th January, 1859.
14. Joseph Dodge Weston, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in rolling iron for making bolts and pins."—Dated 4th January, 1859.—(English Patent, expiring 7th July 1872.)
15. Antoine Nicolas Miton, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "A clock flower-stand."—Dated 4th January, 1859.
16. Mathurin Jean Prudent Moriceau, of Mony, département de l'Oise, a Certificate of Addition to his Patent of 3rd March, 1858, for "An apparatus applicable to all kinds of boats."—Dated 3rd January, 1859.
17. Jean Pascal Lucet, of Fontenay-le-Comte, département de la Vendée, for "A motor for tanworks."—Dated 4th January, 1859.
18. Bernard Lethiers, of Jouy, département d'Eure-et-Loire, a Certificate of Addition to his Patent of 23rd August, 1858, for "A system of windmills."—Dated 5th January, 1859.
19. Victor Sainton, of Alençon, département de l'Orne, for "Hair network for all kinds of wigs."—Dated 5th January, 1859.
20. James Hadden Young, represented by Curtis, of Rue du Molinel, Lille, département du Nord, for "Improvements in composing and distributing type."—Dated 5th January, 1859.
21. Jules Bain, of St. Pierre du Regard, département de l'Orne, for "Brushes for cleaning grooved cylinders of drawing frames and other machines."—Dated 3rd January, 1859.
22. Adolphe Gailhard, of 9, Rue d'Issouard, Marseille, département des Bouches du Rhône, for "A continuous mechanical motor."—Dated 3rd January, 1859.
23. Arnaud Gibert, of 63, Rue des Joliblières, Bordeaux, département de la Gironde, for "A railway break."—Dated 3rd January, 1859.
24. Jean Baptiste Charles Cuvelier, of Marly, département du Nord, for "A crushing and grinding mill with a single cylinder."—Dated 5th January, 1859.
25. Curel and Fage, of 23, Rue Pavillon, Marseille, département des Bouches du Rhône, for "Extracting resinous substances from pines, firs, and other resinous essences by the wet process."—Dated 4th January, 1859.

* For the French Patent Law see No. 228 of this Journal.

26. Claude David, domiciled at Cognac, département de la Charente, for "Improvements in the manufacture of casks by machinery or by hand."—Dated 5th January, 1859.

27. Nicolas Louis Henri Valade, of 6, Faubourg d'Ignay, Epernay, département de la Marne, for "A process for waterproofing ropes and string."—Dated 6th January, 1859.

28. Edouard Chaillet, of Blamont, département du Doubs, for "A rotary pump."—Dated 6th January, 1859.

29. Jean Baptiste Dupré, of Château-Gouthier, département de la Mayenne, a Certificate of Addition to his Patent of 16th December, 1856, for "A system of pumps."—Dated 7th January, 1859.

30. Louis Baudelot, of Harancourt, département des Ardennes, a Certificate of Addition to his Patent of 22nd February, 1856, for "A cooling apparatus, &c."—Dated 7th January, 1859.

31. Ferdinand Chemin, of Rue, département de la Somme, a Certificate of Addition to his Patent of 20th December, 1858, for "Coverings of chamber utensils for preventing the sensation of cold."—Dated 4th January, 1859.

32. Ferdinand Chemin, of Rue, département de la Somme, for "Sanitary casings or envelopes of flat pots or basins for invalids, whereby the latter are protected from a cold sensation."—Dated 5th January, 1859.

33. Nefflier and Blandin, of Rue Johannin, Dijon, département de la Côte d'Or, for "A counting apparatus for preventing errors in paying articles bought by retail."—Dated 6th January, 1859.

34. Emile Poiret, of Mans, département de la Sarthe, a Certificate of Addition to his Patent of 9th January, 1858, for "Switches."—Dated 7th January, 1859.

35. Eugène Falguerolle, of 5, Rue Neuve aux Prêtres, Chaumont, département de la Haute Marne, a Certificate of Addition to his Patent of 5th June, 1857, for "An india-rubber ball used as a clack valve for feeding pumps of steam engines."—Dated 8th January, 1859.

36. Berthier and Co., of 8, Quai des Célestins, Lyon, département du Rhône, a Certificate of Addition to his Patent of 20th May, 1856, for "A whistle manometer."—Dated 7th January, 1859.

37. Valetty and Durand, of 56, Quai St. Vincent, Lyon, département du Rhône, a Certificate of Addition to their Patent of 15th February, 1858, "Improvements in Charray's embossing looms and applying the same to cotton tissues."—Dated 8th January, 1859.

38. Pierre Frédéric Schlotterbeck, of Rue Chaussée, Verdun, département de la Meuse, for "A portable urinal."—Dated 8th January, 1859.

39. Eugène Louis Robert, of Imphy, département de la Nièvre, a Certificate of Addition to his Patent of 9th January, 1858, for "An hydro-moveable winnowing apparatus."—Dated 8th January, 1859.

40. Charron Hautavoine, of Biermes, département des Ardennes, a Certificate of Addition to his Patent of 1st April, 1858, for "A plough."—Dated 8th January, 1859.

41. Pierre François Dacheux, represented by Caille, of Laon, départment de l'Aisne, a Certificate of Addition to his Patent of 15th April, 1858, for "A dressing machine, &c."—Dated 8th January, 1859.

42. Léon Foucault, of Charleville, département des Ardennes, for "An apparatus with a continuous circular action for crushing, compressing, punching."—Dated 8th January, 1859.

43. Jean Clavet, of 55, Rue des Faures, Bordeaux, département de la Gironde, a Certificate of Addition to his Patent of 21st September, 1858, for "A break, &c."—Dated 10th January, 1859.

44. Jean Baptiste Marre, of 8, Rue Rubens, Nantes, département de la Loire Inférieure, a Certificate of Addition to his Patent of 1st March, 1858, for "A pan, &c."—Dated 8th January, 1859.

45. Louis Marc Marie Portalier, of St. Malo, département d'Ille et Vilaine, a Certificate of Addition to his Patent of 22nd April, 1857, for "Double or single breech-loading guns."—Dated 10th January, 1859.

46. Louis Marc Marie Portalier, of St. Malo, département d'Ille et Vilaine, a Certificate of Addition to his Patent of 28th December, 1857, for "Priming cartridges for guns."—Dated 10th January, 1859.

47. Jean François Ferre, of Macon, département de Saône et Loire, for "An apparatus with a moveable regulator for sawing and breaking sugar."—Dated 11th January, 1859.

48. François Parisse, of Dénain, département du Nord, for "Pulleys with fluted grooves and chains with jointed cogs, applicable to all rotary movements."—Dated 11th January, 1859.

49. Adolphe Canu, of 8, Faubourg Ville Bourbon, Montauban, département de Tarn et Garonne, for "An apparatus for distributing lubricating substances."—Dated 7th January, 1859.

50. Michel Beck, of Pfaffenheim, département du Haut Rhin, for "Manufacture of crucibles which can bear the greatest heat and changes of temperature, &c."—Dated 8th January, 1859.

51. Jean Baptiste Adolphe Bastenaire, of St. Quentin, département de l'Aisne, for "A system of heating applicable to all manufactories."—Dated 10th January, 1859.

52. Coste, Chantin, and Lagier, of 39, Rue au Bon-Pasteur, Lyon, département du Rhône, for "An anti-robbery apparatus."—Dated 10th January, 1859.

53. Aléxandre Euvrard, of Besançon, département du Doubs, for "A mechanism with a steady motive power."—Dated 11th January, 1859.

54. Pierre Duchamp, of 17, Rue du Commerce, Lyon, département du Rhône, a Certificate of Addition to his Patent of 13th October, 1858, for "A system of continuous matches, &c."—Dated 11th January, 1859.

55. André Alexandre Cochois, of Seignelay, département de l'Yonne, for "Improvements in preparing colours."—Dated 11th January, 1859.

56. Auguste Sebbe, of Remigny, département de l'Aisne, for "A process for disinfecting and clarifying water impregnated with fat and infectious substances of all kinds of manufactories, and especially of sugar-works, stills, tan-works, dye-works, &c."—Dated 12th January, 1859.

57. Roquin-Evrard, of Coucy-le-Château, département de l'Aisne, for "A cylinder mill for crushing various substances."—Dated 12th January, 1859.

58. Jules Hippolyte Clément, of 17, Rue Tronchet, Paris, for "A break for stopping the rotary movement of wheels and all cylindrical bodies."—Dated 4th January, 1859.

59. Kob and Gustave Pick, of 112, Rue de Charenton, Paris, for "Paper-hangings."— Dated 4th January, 1859.

60. Pierre Godfrey, of 12, Rue Truffaut, Batignolles, for "Improvements in the manufacture of funeral garlands."—Dated 4th January, 1859.

61. Charles Benjamin Normand, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in life apparatus for the sea and other purposes."—Dated 4th January, 1859.

62. Ira Jagger, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A machine for making bread, and for giving the required form to dough and pastes."—Dated 4th January, 1859.

63. Worms and Co., represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, a Certificate of Addition to his Patent of 21st June, 1858, for "Improvements in the manufacture of buttons."—Dated 4th January, 1859.

64. Robert George Cecil Fane, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in the treatment of sewage matter, and in apparatus used therein."—Dated 4th January, 1859.

65. Jules Mauguin, of 59, Rue de la Chaussée d'Antin, Paris, for "Improvements in collars and saddles of horses."—Dated 4th January, 1859.

66. Louis Emile Constant Martin, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Purifying natural phosphate of lime."—Dated 4th January, 1859.

67. Emile Constant Martin, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 8th September, 1858, for "Purifying natural phosphate of lime."—Dated 8th January, 1859.

68. David Macaire, of 6, Rue Basse, Passy, a Certificate of Addition to his Patent of 7th March, 1851, for "A safety tap applicable to casks and vessels."—Dated 4th January, 1859.

69. Pierre Cyprien Metra, of 29, Rue du Dragon, Paris, for "Colouring feathers for flowers."—Dated 5th January, 1859.

70. Bernard Lauth, represented by Fleischmann, of 27, Boulevart des Italiens, Paris, for "Improvements in the manufacture of iron and steel."—Dated 5th January, 1859.

71. James Harebooth Gresham, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in copying presses."—Dated 5th January, 1859.

72. Joseph Chrétien Ferdinand Prengrueber, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A system of locomotion applicable to inland navigation."—Dated 5th January, 1859.

73. Candelot, alias De Fulgence, of 24, Rue St. Honoré, Paris, a Certificate of Addition to his Patent of 3rd May, 1858, for "A chemical compound, applicable as a waterproof coating."—Dated 5th January, 1859.

74. Victor Auguste Duval, of 37, Passage Vivienne, Paris, for "A system of destroying smoke, vapours, gas, &c."—Dated 5th January, 1859.

75. Ambroise Pierre Remond, of 50, Rue St. Maur, Paris, for "Improvements in lace frames for making fringes."—Dated 6th January, 1859.

76. Gerly and Brizard, of 5, Rue Pastourel, Paris, for "Improvements in wet stamp presses."—Dated 6th January, 1859.

77. Pouchard, jun., and Dauteur, jun., of 42, Rue de Tracy, Paris, for "Combs."—Dated 6th January, 1859.

78. John Wilson, represented by Sautter, of 2, Boulevart Montmartre, Paris, for "Improvements in floating docks."—Dated 6th January, 1859.—(English Patent, expiring 23rd September, 1872.)

79. Isaac Livermore, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of shuttles."—Dated 6th January, 1859.—(English Patent, expiring 13th November, 1872.)

80. Jean Henri Chapée, of 90, Rue des Gravillers, Paris, for "Improvements in backs of ledgers."—Dated 6th January, 1859.

81. Eugène Charles Devers, of 12, Rue des Martyrs, Paris, for "A process for evaporating and purifying water."—Dated 6th January, 1859.

82. Edme Louis Bonnet, of 17, Rue des Amandiers, Paris, for "A sugar-mould."—Dated 6th January, 1859.

83. François Prosper Rolland, of 166, Faubourg St. Martin, Paris, for "Arranging and keeping chocolate-powder in hermetically closed boxes."—Dated 6th January, 1859.

84. Polynice Auguste Viette, represented by Mennons, of 39, Rue de l'Echiquier, Paris, for "Inks for engraving and lithography."—Dated 6th January, 1859.

85. Pasquale Perelli Ercolini, represented by Mennons, of 39, Rue de l'Echiquier, Paris, for "An apparatus called 'horometer.'"—Dated 6th January, 1859.

86. Victor Debras, represented by Mennons, of 39, Rue de l'Echiquier, Paris, for "A harmonium for children, called 'marmotine.'"—Dated 6th January, 1859.

87. Charles Rydman, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Instruments for taking the measure for foot coverings."—Dated 6th January, 1859.

88. François Barthélemy, of 36, Rue Grenier St. Lazare, Paris, for "Manufacture of bonbons by mechanical means."—Dated 7th January, 1859.

89. Joseph Vallod, of 26, Rue d'Angoulême du Temple, Paris, for "An apparatus for lubricating bodies revolving on journals and roller, by means of a cased cylinder."—Dated 7th January, 1859.

90. Victor Mauban, of 5, Rue Boileau, Paris, a Certificate of Addition to his Patent of 12th February, 1858, for "A sowing machine."—Dated 6th January, 1859.

91. Alfred René Dalifol, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Annealing furnaces with fixed crucibles."—Dated 7th January, 1859.

92. Edouard Aristide Servier, of 16, Rue Mazagran, Paris, a Certificate of Addition to his Patent of 10th November, 1858, for "An electro-magneto-magnetic signalling apparatus."—Dated 7th January, 1859.

93. Séraphine Volat, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 11th April, 1857, for "Improvements in tournure petticoats."—Dated 7th January, 1859.

94. Emile Constant Martin, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 4th January, 1859, for "Purifying natural phosphate of lime."—Dated 7th January, 1859.

95. Alfred Louis Stanislas Chenot, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A method of obtaining, volatilizing, removing, and collecting volatile metals and metalloids, and their volatile alloys, and especially zinc."—Dated 7th January, 1859.

96. Ira Dimock, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A self-acting machine for making twist."—Dated 7th January, 1859.—(American Patent, expiring 13th March, 1870.)

97. Pierre Gidéon Barry, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Preparing thick mineral oils for lamps."—Dated 7th January, 1859.

98. Charles François Mongin, of 11, Rue des Juifs, Paris, for "Manufacture of saws."—Dated 8th January, 1859.

99. Jean Baptiste Gajando, of 5, Rue Notre Dame de Nazareth, Paris, for "A kind of toys."—Dated 8th January, 1859.

100. Pierre Poultriez, of 215, Faubourg St. Honoré, Paris, for "A lustral liquid."—Dated 8th January, 1859.

101. François Jules Manceaux, of 31, Quai Napoléon, Paris, for "Blades of bayonets."—Dated 8th January, 1859.

102. Charles Joseph Charles Pavy, domiciled Rue de Rivoli, Hôtel du Douvre, Paris, a Certificate of Addition to his Patent of 6th December, 1858, for "An apparatus called 'preservatory granary, &c.'"—Dated 8th January, 1859.

103. François Augustin Duchanois, of 20, Rue Traversière St. Antoine, Paris, for "Marking the points at billiard games."—Dated 8th January, 1859.

104. Samuel Flechter Cottam, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in machines for doubling or twisting cotton or other thread."—Dated 8th January, 1859.—(English Patent, expiring 11th August, 1870.)

105. Alfred Nobel, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A water meter."—Dated 8th January, 1859.

106. Cavé and Claparède, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A single or double apparatus for loading and unloading earth or loads, or for damming up rivers."—Dated 8th January, 1859.

107. Louis François Clément Breguet, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in arranging and constructing chronometers."—Dated 8th January, 1859.

108. Just Gidéon Mazoudier, of Clermont, département du Puy de Dôme, a Certificate of Addition to his Patent of 18th March, 1858, for "A wheelbarrow with two wheels underneath."—Dated 6th January, 1859.

109. Joseph Dumas, of Valence, département de la Drôme, for "Improvements in his system of natural fountains, as patented 14th January, 1858."—Dated 11th January, 1859.

110. Pierre Mialon, of Hauterives, département de la Drôme, for "An apparatus for expelling smoke."—Dated 11th January, 1859.

111. Pierre Vercasson, of St. Chamond, département de la Loire, for "A lace-loom with reduced bobbins."—Dated 12th January, 1859.

112. Pierre Moussy-Teysset, of 1, Rue du Grand-Moulin, St. Etienne, département de la Loire, a Certificate of Addition to his Patent of 27th September, 1858, for "A so-called 'escapement lock.'"—Dated 12th January, 1859.

113. Antoine Volant, of 12, Ile Gloriette, Nantes, département de la Loire Inférieure, for "A system of plaster kiln."—Dated 13th January, 1859.

114. Gilliot and Ungerer, of Erstein, département du Bas Rhin, for "A system of rectilinear joints, and clamping of pipes, tubes, bricks, and other ceramic articles."—Dated 8th January, 1859.

115. Frédéric Keim, of Thann, département du Haut Rhin, for "A shuttle cover for looms."—Dated 11th January, 1859.

116. Jean Perrier, of Nîmes, département du Gard, for "A system of stays of boilers."—Dated 11th January, 1859.

117. Jean Joseph Chareun, of 3, Rue de l'Espérance, Marseille, département des Bouches du Rhône, a Certificate of Addition to his Patent of 14th January, 1858, for "Construction of iron steam boats."—Dated 13th January, 1859.

118. Pierre Sieber, of Audincourt, département du Doubs, for "Manufacture of bars and rails, compressed at a low temperature, and apparatus used therewith."—Dated 13th January, 1859.

119. Victor D'Anthenaise, of Angers, département de Maine et Loire, for "A rotary harvesting machine."—Dated 14th January, 1859.

120. Jean Baptiste Marie, of 16, Rue du Palais de Justice, St. Etienne, département de la Loire, for "A nail machine." — Dated 14th January, 1859.

121. Jean Baptiste Penot-Gauthe, of St. Saulge, département de la Nièvre, for "Various systems of motion for obtaining a perpetual movement, and special lamps for lighting those machines."—Dated 14th January, 1859.

122. Ainé Vitaux, of 13, Rue de Jemmapes, Lisle, département du Nord, for "Working soap."—Dated 15th January, 1859.

123. Jean Pierre Langlois, domiciled with Ballu, of 18, Rue Mulet, Lyon, département du Rhône, a Certificate of Addition to his Patent of 8th January, 1855, for "A kind of tiles."—Dated 14th January, 1859.

124. Jacques Bernard, of 1, Place de la Fromagerie, Lyon, département du Rhône, for "A system of syringes."—Dated 14th January, 1859.

125. Paul Expert, of 57, Rue de la Guillotière, Lyon, département du Rhône, for "A stoppering apparatus."—Dated 15th January, 1859.

126. François Curé, of Déville, département de la Seine Inférieure, a Certificate of Addition to his Patent of 10th April, 1854, for "Improvements in cast-iron frames of skylights."—Dated 10th January, 1859.

127. Jean Eugène Chaure, of Place d'Armes, Vitry le Français, département de la Marne, for "Orthographic pigeon-holes."—Dated 15th January, 1859.

128. César Corron, of Section de Valbenoite, St. Etienne, département de la Loire, for "A machine for dyeing silk."—Dated 15th January, 1859.

129. Ferdinand Hippolyte Mengin, of Rue du Pont de Marne, Epernay, département de la Marne, for "A machine for stoppering bottles."—Dated 15th January, 1859.

130. De Dax, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in fire-arms, by firing the gunpowder by means of electricity."—Dated 8th January, 1859.

131. Geneste, sen. and jun., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in smoke-consuming apparatus, applicable to all heating apparatus, furnaces, steam apparatus, &c."—Dated 8th January, 1859.

132. Jean Phillippe Varlet, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in water-raising apparatus, applicable to fire-engines."—Dated 8th January, 1859.

133. Louis Le Chatelier, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 23rd February, 1858, for "Applying fluoric acids to the manufacture of soda and potash."—Dated 8th January, 1859.

134. Edme Ferdinand Evras, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of suspending ladies' dresses, applicable to napkin-holders."—Dated 8th January, 1859.

135. Martin Mabille, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A kind of gluten bread or cake."—Dated 8th January, 1859.

136. François Gustave Dauphin, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A mechanical table for the manufacture of candles."—Dated 8th January, 1859.

137. Jean Charles Antoine Lecour, of 29, Rue de l'Est, Paris, for "A scraping broom."—Dated 8th January, 1859.

138. Frédéric Ludewig, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Manufacture of a kind of yeast."—Dated 8th January, 1859.

139. Nicolas Marie Saligny, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, a Certificate of Addition to his Patent of 5th January, 1858, for "Improvements in the manufacture of portemonnaies, pocket books." — Dated 8th January, 1859.

140. Honoré de Ville, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in the manufacture of bitumenized pasteboard for roofings, and applying said pasteboard." Dated 8th January, 1859.

141. William Hervey Morrisson, represented by Goutz, of 238, Rue de Rivoli, Paris, for "Improvements in machines and apparatus for the manufacture of quillings, tours, trimming of bonnets, and other fashionable articles, goffered, curled, and folded."—Dated 10th January, 1859. —(English Patent, expiring 4th May, 1872.)

142. Théophile Guibal, of 53, Rue d'Enfer, Paris, for "A process for cleaving down rocks."—Dated 10th January, 1859.

143. Pierre Antoine Théodore Poincelin, of 56, Rue St. Sébastien, Paris, for "Apparatus and composition for the manufacture of vinegar."—Dated 10th January, 1859.

144. Roger, domiciled 18, Rue Vivienne, Paris, a Certificate of Addition to his Patent of 1st October, 1858, for "Collodion embroideries."—Dated 10th January, 1859.

145. Léon Jean Emile Dupont, domiciled with Amaury, of 10, Rue de Valois Palais-Royal, Paris, for "A process for separating grits from waste flour."—Dated 10th January, 1859.

146. Jean Eustache Lemaitre, represented by Bresson, of 57, Rue de Bretagne, Paris, for "Improvements in double-action pumps moved by gearings."—Dated 10th January, 1859.

147. François Jules Dufresne, represented by Bresson, of 57, Rue de Bretagne, Paris, a Certificate of Addition to his Patent of 13th August, 1857, for "Improvements in the mechanism of inodorous night-stools."— Dated 10th January, 1859.

148. Jean Ferdinand Lombard, represented by Bresson, of 57, Rue de Bretagne, Paris, for "A reversing for regulating the working of escapements."—Dated 10th January, 1859.

149. Louis Alexandre Martin, of 63, Rue St. Maur Popincourt, Paris, for "A double-action machine for planing wood for joinery, carriages, &c."—Dated 10th January, 1859.

150. Alphonse Félix Patry, represented by Richard, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of lace."—Dated 10th January, 1859.

151. Jean Baptiste Joseph Portier, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A system of subduing and stopping saddle or carriage horses."—Dated 10th January, 1859.

152. Désiré Langrand, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of tallow and composite candles."—Dated 10th January, 1859.

153. Joseph Caumont, of 34, Rue Richelieu, Paris, for "An apparatus called 'electric refouloir.'" —Dated 11th January, 1859.

154. Charles François Dupuis, of 62, Rue de Bondy, Paris, for "A system of hooks for ornaments."—Dated 11th January, 1859.

155. Jean Conrad Meyer, of 18, Grand Rue Chapelle St. Denis, for "An apparatus for cooling beer and other beverages or liquids."—Dated 11th January, 1859.

156. Espérance Augustin L'Huillier, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An apparatus for introducing substances into the throat."—Dated 11th January, 1859.

157. Claire Brune Marbority, of 14, Rue Richepause, for "A washing process."—Dated 11th January, 1859.

158. Alexis Frédéric Herbillon, represented by Clerdent, of 2, Rue d'Ambroise, Paris, a Certificate of Addition to his Patent of 13th January, 1858, for "Improvements in dolls by using cork." —Dated 11th January, 1859.

159. François Bruguière, of 37, Rue Louis Philippe, Paris, for "An hydraulic system for raising water."—Dated 12th January, 1859.

160. Victor Pean, of 17, Rue de Crussol, Paris, a Certificate of Addition to his Patent of 14th March, 1857, for "Processes for improving or drying walls, &c."—Dated 12th January, 1859.

161. Francis Lombaer, represented by Fringant, of 10, Rue de Provence, Paris, for "A kind of moveable book-binding."—Dated 12th January, 1859.

162. Pierre Conreur, represented by Fringant, of 10, Rue de Provence, Paris, for "A system of welding tyres of railway carriages, locomotives, &c."—Dated 12th January, 1859.

163. Colin Mather, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in drying thread in skeins."—Dated 12th January, 1859.

164. Colin Mather, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in apparatus for allowing the escape of water and air from pipes, vessels, or chambers heated by steam." —Dated 12th January, 1859.—(English Patent, expiring 25th November, 1872.)

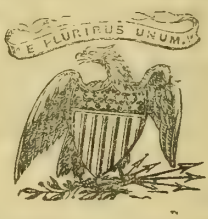
165. Robert Dawson, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A mercurial clock."—Dated 12th January, 1859.

166. Edme Augustin Chameron, of 162, Faubourg St. Martin, Paris, for "Improvements in manufacturing and assembling pipes."—Dated 12th January, 1859.

167. Louis Dominique Girard, of 44, Rue d'Enghien, Paris, a Certificate of Addition to his Patent of 13th March, 1857, for "Utilizing and distributing natural or artificial power, for the purpose of obtaining division of labour, &c."—Dated 12th January, 1859.

168. Emile Marcus, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "So-called 'ceramic jewels.'"—Dated 12th January, 1859.

169. Pierre Amable de Saint-Simon-Sicard, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A chemical and mechanical process for converting pig iron into steel."—Dated 12th January, 1859.



170. Louis François Devisme, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 22nd December, 1858, for "A system of revolvers."— Dated 12th January, 1859.

171. Maurice Augustin Sormani, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A folding tournure petticoat."— Dated 12th January, 1859.

172. Sébastien Pichancourt, represented by Daubréville, of 60, Boulevart de Strasbourg, Paris, for "A clyster."—Dated 13th January, 1859.

173. Joachim Antoine Joseph Liebermann, of 18, Boulevart du Temple, Paris, a Certificate of Addition to his Patent of 23rd December, 1856, for "A kind of presses."—Dated 13th January, 1859.

174. Théodore Knauth, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 22nd December, 1858, for "Improvements in fire-arms." — Dated 13th January, 1859.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 1st February, 1859, and each bearing that date.

No. 22,773. Manoah Alden, of Philadelphia, Pa., for an "Improved apparatus for raising and forcing fluids."

"I wish it to be distinctly understood that I lay no claim to the parts herein described, separately or disconnected from each other; but I claim, and desire to secure by Letters Patent, the wheel B, with any convenient number of buckets

formed by the opposite curved vanes *c*, said vanes being placed obliquely to the plane of rotation, and being of a tapering form, so that the buckets may be broader near the centre of the wheel, than at the edge of the same, in combination with a wheel race or chamber adapted to the form of the buckets and with the spiral channel D, the whole of the parts being arranged, in respect to each other, and constructed, as and for the purpose herein set forth."

No. 22,774. Chas. F. Allen, of Indianapolis, Ind., for an "Improvement in burners for vapour lamps."

"What I claim, and desire to secure by Letters Patent, is, the combination and arrangement of the tube F, and lighter G, when constructed and arranged substantially as and for the purposes set forth."

No. 22,775. Zachariah Atkinson, of Richmond, Geo., for an "Improvement in cotton press."

"Having thus fully described my invention, what I claim and desire to secure by Letters Patent, is, the cam rollers F in combination with the levers D and E, substantially as set forth for the purposes described."

No. 22,776. J. B. Atwater, of Berlin, Wis., for an "Improvement in car couplings."

"I do not claim the employment of any of the parts of this coupler to be new, uncombined and differently arranged, as I am aware that the pin has been thrown down in other couplers, by means of the link pressing against such parts as affect it; hence, I disclaim all other modes of effecting the result herein attained, confining myself to the arrangement specified herein, to wit: The arrangement of the tumbler *c*, rod C, connecting piece D, lever E, which is provided with a foot piece *o*, pin *d*, rollers *m*, *n*, and door or platform *i*, the whole being combined and operated in the manner and for the purpose herein specified."

No. 22,777. Chas. F. Bellows, of Seneca Falls, N. Y., for an "Improvement in pumps."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement and construction of a pump, as above set forth, by means of a right-handed and left-handed screws, the threads of one operating within those of the other, as above described, or other mode, substantially the same."

No. 22,778. D. P. Burdon, of Brooklyn, N. Y., for an "Improvement in ovens."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the arrangement of a series of hinged cars (*a*) around around a disk-plate (*d*), so that they will deliver bread pans with their contained bread at the proper place of discharge, and also receive the said pans in their revolution, substantially in the manner herein-before set forth; and in combination therewith, I claim the circular tract (A, A[1]), so arranged as to support the ends of said cars (*a*) upon friction rollers (*n*), while at the same time, allowing each car (*a*) to deposit its pan at the proper place, and restore said cars (*a*) to their proper position to receive the return pans, with their bread, in the manner and for the purposes herein set forth. 2d, I claim operating the sliding doors (E, B), by means of the radial arms (*b*) (or their equivalents), projecting from the driving shaft (*g*), so that the doors (E, B), will be alternately opened and closed at the proper time for delivering the bread, and receiving the bread to be baked. 3d, I claim operating the traversing follower (*r*, *r*[1]), by means of radial arms (*c*) (or their equivalents), for feeding the pans into the oven, when the same is so arranged that the pans will be fed into the cars (*a*), while the door (B) is open; and in combination therewith, I claim the compensating pulley wheel (*w*) and weight (*y*), for equalizing the motion and returning the traversing follower (*r*, *r*[1]).

No. 22,779. John Burnish, James Talbot, and Thos. W. Yardley, of Pottsville, Pa., for an "Improvement in fluxes for puddling iron."

"We do not claim the separate use as a flux of the substances herein mentioned, or a compound of any two or three of the said substances; but we claim, and desire to secure by Letters Patent, silicious sand, loam, alum, clay, lime, oxide of iron, and talcose rocks, when used collectively in or nearly in the proportions herein described, as a flux in the process of puddling iron."

No. 22,780. Ziba Casterline, of Liberty, Ind., for an "Improved washing machine."

"Having described my improvement, what I claim as my invention, and desire to secure by Letters Patent, is, the employment of balls *h*, *h*, *h*, attached to the rubber E of a washing machine, when said rubber has a reciprocating movement in the tub, constructed and operating in the manner and for the purposes set forth."

No. 22,781. Reuben Cave, of Louisville, Ky., for an "Improved machine for polishing metals."

"I do not claim the running of two polishing grit stones together or running them both at the same time; but what I claim as my new and useful invention and improvement, and desire to secure by Letters Patent, is, the running of two polishing grit stones edge to edge in opposite directions, one immediately above the other (and both running at the same time), the upper stone running one third faster than the under one."

No. 22,782. Willis L. Childs, of Piermont, N. Y., for an "Improvement in R. R. car seats."

"I do not claim broadly a reversible car seat; neither do I claim, irrespective of arrangement and construction, a car seat capable of being converted from an ordinary day seat into a sleeping couch at night, and vice versa; neither do I claim suspending a seat upon the point *a*[1], irrespective of arrangement and construction, for many plans have been devised for effecting such purpose; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, attaching to each end of the planes or boards A and B a curved or segment bar lapping by each other, so that they will form an arc, having for its center the point at which the planes or boards A and B are hinged or jointed. I also claim suspending a car seat upon the point *a* ×, in combination with the hinging of the planes or boards A and B, substantially as shown, so as to enable it to be reversed without concussion, and also to be used as a reclining seat or sleeping couch."

No. 22,783. Wm. Coutie, of Troy, N. Y., for an "Improved water wheel."

"What I claim as my invention, and desire to secure by Letters Patent, is,—First, I claim the stationary plates arranged as described, so as to prevent a rotary motion in the water when acting on a screw wheel. Second, I claim placing the gate below the surface of the back water in connection with the draft tube, for the purpose specified."

No. 22,784. Joseph Cowee, jr., of Keene, N. H., for a "Method of variegating wood."

"I do not claim broadly the condensation of the fibres of the wood for purposes of ornamentation; but having described my invention, I claim, and desire to secure by Letters Patent, the employment of rollers B, H, in the manner substantially as described, for the purpose of variegating wood, all as set forth."

No. 22,785. Wm. M. C. Cushman, of Albany, N. Y., for an "Improvement in splice of bar rails."

"Having thus described my invention, and having also described the flanch, fillet, or rib (*b*) outside of the flat bar rails, and up to and even with the top or bearing surface thereof, it is hereby expressly understood that I do not claim it even therewith, for the purpose of receiving the tread of car wheels or any part thereof of any train of cars passing over the rails of any railroad, or for any other purpose than specially to add strength to the splice plate, and to prevent lateral displacement of the flat bar rails aforesaid by means of the said splice plate; but what I do claim, and desire to secure by Letters Patent, is, in combination with the flat bar rail, the splice plate or piece Figure Six, constructed in the manner and for the purposes herein described."

No. 22,786. Chas. G. Dickinson, of Poughkeepsie, N. Y., for an "Improvement in harvesters."

"Disclaimer.—I do not claim the slots, neither the endless chain or belts. Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the curved arms O, curved feet E, and braces or compressors F, with the endless belts or chains B, when arranged with relation to each other, and to the platform A, and operating together in the manner described for the purpose specified."

No. 22,787. Porter Dodge, of Francistown, N.H., for an "Improvement in stoves."

"Having described my improvement in stoves, what I claim therein as new, and of my invention, and desire to secure by Letters Patent, is, an improved air-tight stove, the several parts being constructed and arranged in relation to each other substantially as shown and described."

No. 22,788. James B. Duff and Thos. W. Keating, of New York, N. Y., for an "Envelope machine."

"We do not claim, broadly, the invention of oscillating lappers to fold envelopes, nor do we claim the arrangement

and combination of a half circle with the heels or base of the lappers; but we distinctly disclaim the folding flaps projecting from the center, or nearly so, from the end of a shaft or shafts, and having their bearings on one end, or on each end thereof, whether with or without the half circles, as set forth in the 3d Claim of Milton G. Puffer's Patent, Nov. 23d, 1858, and we hereby disclaim all and every part covered by said Puffer's invention. Having thus fully described our invention, we will proceed to state what we claim as our invention, and desire to secure by Letters Patent:—1st, we claim the combination of the pasters *a*, *a*, the grooved pressure fingers S, S, and the spring plates K^1, K^1, the whole being applied to operate substantially as herein set forth. 2nd, in combination with a folding table, having its surface composed of india-rubber or other elastic substance, we claim the use of a plunger operating through a die above the said table, and provided with sharp projecting edges for the purpose, after it has forced the blank through the die, and thus turned back the flaps, of making a sharp crease where the fold is to be made by pressure between said edges and the elastic surface, substantially as herein described. 3rd, we claim placing the faces of the lappers I^1, I^2, I^3, I^4, in front of their centers of motion, and their axes above the level of the table, as herein shown and described, so that the plunger E, when it descends, shall pass close against the faces of the lappers and the heels of the lappers, when the latter close, will move outward away from the paper as herein shown and described. 4th, we claim having an open space between the heel of the lappers I^1, I^2, I^3, I^4, to receive and hold the edges of the paper, when it is pressed therein by the descent of the plunger, as and for the purposes herein shown and described."

No. 22,789. Wright Duryea, of Glencove, N. Y., for an "Improvement in apparatus to manufacture starch."

"I do not claim to have invented the process of obtaining the starch water, by frequent repetitions of the grinding, washing, and bolting processes; but what I claim as my invention, and desire to secure by Letters Patent, is,—1st, the within described system of arranging and combining the grinding, washing, and bolting apparatus, to wit: the arrangement of all the stones side by side with their respective washers conveniently placed below them, with the arrangement of the bolting cylinders below their respective stones in horizontal series, with one or more interposed endless chain elevators P, combining them with the stones next in order of succession in the series, as herein set forth, whereby the whole apparatus is brought within two stories of a building, and convenience is afforded for its supervision, and the other advantages herein set forth are obtained. 2nd, the combined arrangement of the lower bolting cylinders I, I, and inclined plane or table O, with the troughs or gutters *m* and *t*, substantially as described, whereby I am enabled to convey away the starch water and the tailings from the said cylinders, by a single conductor for each purpose."

No. 22,790. Chas. O. Farrington, of Brewer, Me., for an "Improvement in machine for turning or edging bricks."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the slats E, attached by joint hinges *a*, to the bars A, A, and connected by joints *c*, to the bar F, which has the spring G attached to it, the whole being arranged substantially as and for the purpose set forth."

No. 22,791. Chas. Fasoldt, of Rome, N. Y., for an "Improved escapement for time-keepers."

"What I claim as my invention is, the employment of a straight lever and collateral hook in the position and form indicated and described."

No. 22,792. Saml. T. Field, of Worcester, Mass., for "An improved machine for manufacturing wooden troughs."

"Having thus described my improvements in machines for sawing gutters, what I claim therein as new, and desire to secure by Letters Patent, is, arranging the bearings of the saw, and the mechanism by which it is driven, substantially as described, whereby the upper surface, and also the interior of the saw, is left unobstructed for the purpose set forth. I also claim, in combination with a cylindrical saw, a secondary cutter, arranged substantially as described, so as to groove the core of the stick, while it is being sawed out by the cylindrical saw."

No. 22,793. Joseph Fox, of Lansingburgh, N. Y., for an "Improved cracker machine."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is,—First, the depressions in the spaces between the grooves in one or both of the rollers that form the strips of dough from the sheet, as herein described, for the purpose specified. 2d, I also claim forming short sections of skin-covered strips of dough into disks or crackers by pressure applied to ends of the sections by the devices, substantially as herein described. 3d, I claim the rollers, substantially as described, by which the crackers are rolled on the apron, and by which the skin on the upper surface of the pressed crackers is improved. 4th, I also claim the combination of the straight edges for evening the rows of crackers before rolling, and also for docking, as specified, with the dockers, substantially as herein set forth. 5th, I also claim the employment of the clamp bars I, I^1, in combination with the knife H, as herein described, to cut off and hold the sections of the strips of dough, as the strips are fed through the bar G, as specified. 6th, and, finally, I claim the plane T, follower U, and second endless apron, substantially as combined and arranged among themselves, and with the other endless apron, for the purpose of taking rows of crackers from a moving endless apron, and placing them upon slides or bake pans."

No. 22,794. James Freeland and Robt. H. Lecky, of Alleghany, Pa., for an "Improvement in slide valves of steam engines."

"Having thus described the nature, construction, an operation of our improvement, what we claim as our invention, and desire to secure by Letters Patent of the United States, is,—First, the arrangement of t e armed flange M, on the steam pipe L, the columns R, the studs O, with nuts P, and the cap K, the whole being arranged and secured to the valve seat A, as herein described and represented. Second, the arrangement of chamber G with opening H, as herein described and represented, and for the purpose set forth. Third, the combination and arrangement of the armed flange M on the steam pipe L, columns R, studs O, with nuts P, stuffing box N, cap K, and slide valve B, with the valves seat A, the whole being arranged, combined, and operated as herein described, and for the purpose set forth."

No. 22,795. Joseph W. Gardner, of Shelburne Falls, Mass., for "Improved handles for table cutlery."

"Having thus described my invention, I claim, and desire to secure by Letters Patent, as an improved article of manufacture, a table knife having its handle composed of two or more parts (*a*, *b*,) the ends of which are encompassed by ferules (*d*), and otherwise constructed, as herein shown and described."

No. 22,796. Dwight Gibbons, of Rochester, N. Y., for an "Improvement in spermatic rings."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the employment, in a ring encircling the penis, of a sharp pin or point, attached to a spring, which is held by a roller *i*, or other equivalent rest, so as to prevent the protrusion of the said pin within the interior surface of the ring till distension of the penis occurs, and by its action on the spring causes its liberation from the roller or rest, and thereby permits the said spring to force the pin or point into the penis, substantially as described, with a sudden action, instead of with the gradual action peculiar to the points of other rings for the same purpose. 2nd, the combination of the two semi-circular, or nearly semi-circular springs, with the two rigid sockets, substantially as herein described, by means of a slot and set screw in one of the sockets, which permits the ring of the instrument to be adjusted to organs of various sizes."

No. 22,797. John W. Gould, of Elmira, N. Y., for an "Improvement in railway chairs."

"What I claim as my invention, and desire to secure by Letters Patent, is, the self-securing 'lock wedge' C, arranged in combination with the rails A, A, chair seat B, and key D, substantially in the manner and for the purpose herein specified."

No. 22,798. Nathl. B. Hatch, of Lawrenceville, Pa., for an "Improvement in retorts for distilling coal oil."

"What I claim as my invention, and desire to secure by Letters Patent, is, the application and use in retorts used in distillation of coal or other substances from which oil or gas is produceable, of a sweep bar or arm, with plates attached, substantially as above described, and operated so as to push or spread the material placed within over the floor or bottom, and at intervals discharge the same continuously in openings at or near the edge of the retort, substantially as set forth in the foregoing specification and drawings."

No. 22,799. Asa P. Hawse and Luther J. Adams, of Morrisville, Vt., for an "Improved scrubbing pail."

"We claim as our invention, the combination of pail P, rollers R, R^1, and pieces a, a^1, and C, arranged and operating substantially as and for the purposes set forth."

No. 22,800. Geo. W. Heard, of Boston, Mass., for an "Improvement in shirt collars."

"I claim as an improvement in the 'turn-down collar,' the construction of the same with four cravat slots or passages a, b, c, d, arranged therein, or with respect to the ends of the inner fold of the collar, and for the purpose of receiving a cravat or tie ribbon, substantially as specified. I also claim the above described mode of applying or arranging a cravat or necktie in the collar, constructed with the four slots or passages a, b, c, d, arranged within it, or with respect to the ends of its inner fold, essentially as herein-before explained."

No. 22,801. John Hebden, of Medford, Mass., for an "Improved washing machine."

"I claim the machine constructed substantially in manner and to operate as described, that is to say, with a removable dasher, or its equivalent, and a removable platform, combined and arranged with the suds, reservoir, and mangle rollers, essentially as set forth, the whole not only enabling the operation of washing the clothes, expressing the water from them, and mangling them, to be carried on consecutively, but causing clothes to be drawn out of the suds reservoir, and the expressed water to be received into it, as specified."

No. 22,802. Isaac A. Hedges, of Cincinnati, Ohio, for an "Improvement in mill for grinding cane, &c."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, surrounding the openings in the top and bottom plates with annular ledges L, when employed in connection with rollers, having recesses corresponding with them in their top V and bottom ends, substantially as described. 2d, I claim the regulator and adjuster, substantially as and for the purposes described. 3rd, I claim the oil tubes H, when used in connection with a recess containing waste oil, to conduct the same through the rollers to the bearings below. 4th, I claim the corrugated shells in combination with the rollers, for the purpose of readily converting the mill into a corrugated mill, constructed and adapted substantially as set forth."

No. 22,803. James A. Hendrick, of Providence, Pa., for an "Improved machine for grinding and polishing saws."

"I do not claim, separately, any of the parts herein shown and described; but having thus described my invention, what I do claim as new, and desire to secure by Letters Patent, is, the grindstone or emery wheel B, in combination with the feed rollers D, D, placed in the adjustable frame C, the whole being arranged to operate substantially as and for the purpose set forth."

No. 22,804. Dexter Henshaw, of Fitchburgh, Mass., for an "Improved clothes frame."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the four arms and the block, with the cords, screws, and braces, as above described, and for the pusposes aforesaid."

No. 22,805. W. T. Hildrup, of Harrisburgh, Pa., for an "Improvement in rotary harrows."

"What I claim, and desire to secure by Letters Patent, is, giving the sleeves B, B^1, an invariable connection at one extremity, and a variable connection attached to the draft bar at the other, substantially as and for the purpose set forth."

No. 22,806. Geo. W. Holman, of Beloit, Wis., for an "Improvement in machine for making meal and flour."

"I do not claim adjustable knives for the purpose of grinding grain, or screws for feeding grain to grinding surfaces in mill, or cone pulleys, or tangent screws, or emery wheel for sharpening knives; but I do claim the placing a series of knives supported by gudgeons in a circle or part of a circle, so that the thickness of the shaving cut by the edge of one knife shall be gauged by the back of the knife next to it, as and for the purpose specified. And I also claim the placing a series of knives supported by gudgeons, so that the rankness of set of all of them may be uniformly graduated by one operation, and so that their faces may be thrown back into one uniform surface for grinding or sharpening, substantially as set forth. I also claim the band f at the end of the knives, constructed and operating substantially as described. I also claim the arrangement of the reversed screw threads on the arbor n, and the reversed screw threads on the core, for the purpose of moving grain in opposite directions at the same time, as combined with the other parts of my machine, substantially as set forth above."

No. 22,807. Wm. H. Hope, of Washington, D. C., for an "Improvement in mill for grinding grain."

"What I claim, and desire to secure by Letters Patent, is, the combination of a cylindrical corn and cob cutter and crusher for grinding food for cattle, with two sets of grinding surfaces, arranged and operating substantially as and for the purposes set forth. 2nd, I claim the arrangement by which the cylindrical rollers or cutters and crushers and grinding surfaces may be operated, together or separately, as and for the purposes set forth and described. 3rd, the mode of regulating the cylinders and stone for the purpose of grinding course or fine by the use of the screw lever l attached to the journal boxes e, which move on ears or lugs firmly attached to frame F, in the manner described and specified."

No. 22,808. Wm. S. Hudson, of Paterson, N. J., for an "Improved apparatus for regulating the draft of steam engines."

"Having now fully described my invention, what I claim as new therein, and desire to secure by Letters Patent, is, First, the interposition of a perforated diaphragm E, constructed substantially as within described, between the steam and exhaust pipes, and extending down to or near the level of the lower tubes, substantially as and for the purposes herein shown and described. Second, making the apertures above the base of the diaphragm E of such area, that when the locomotive is standing still, the gaseous products of combustion may flow through without serious obstruction, but that when the combustion is increased by the blast a large portion is compelled to pass underneath, substantially as above set forth."

No. 22,809. Geo. C. Jennison, of Ware, Mass., for an "Improvement in ovens."

"I do not claim an endless carrier in combination with and arranged in a baking chamber, separated from a furnace or chamber of combustion by a partition wall, or equivalent, through which the heat from the furnace has to pass, in order to obtain access to the baking chamber; but what I do claim is, the application of the baking chamber of the endless carrier to the furnace, in such manner that the air within the said baking chamber may come into direct contact with the furnace charge, or heated volatile products arising therefrom, and be heated thereby without the heat having first to pass through any dividing wall or partition, or its equivalent. I also claim the arrangement of the baking chamber with respect to the furnace and its discharge flues, substantially as herein-before described, and as represented in the drawings, whereby the advantage of the ascending power of the heat is availed of, while the smoke is carried off by the flues. I also claim the arrangement of the charging and discharging orifices of the baking chamber, with reference to it, and the lower smoke eduction passage leading into the discharge flue of the oven. I also claim the arrangement and application of the pendulous platforms, and the endless carrier, together and within the vertical baking shaft. I also claim the combination and arrangement of one or more openings i, i, and their damper or dampers, with the baking chamber and its furnace and flues, arranged as specified."

No. 22,810. O. W. Jipson, of Rochester, N. Y., for an "Improvement in weighing scales."

"I do not claim separately any of the parts herein shown and described; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is,—1st, the sliding block H, when provided with the rollers k, l, and slides or supplemental weight I, arranged and combined, as shown, for the purpose specified, and with or without the rack j and pinion m. 2nd, the adjustable block J, provided with the slide or weight s, graduated bar r, in combination with the nut or supplementary weight q, as and for the purpose set forth. 3rd, the attachment of the lever C to the platform frame, as shown, whereby the same may be adjusted further in or out from the frame, as circumstances may require. 4th, the arrangement of the bars L, L, L, L, K, K, with their sockets v, v, b^1, b^1, and with the frame B, substantially as shown, to admit of the adjustment of the bars to receive platforms of greater or less size, as required. 5th, the employment or use of the sleeve F, attached or applied to the beam G, as and for the purpose specified."

No. 22,811. Edward Jones, of Brooklyn, N. Y., for an "Improvement in floating and revolving derrick."

"I believe I have described and represented my improved derrick, so as to enable any person skilled in the art to make

and use it; I will now state what I desire to secure by Letters Patent, to wit: I claim the arrangement of the turn-table or frame, which carries the derrick, when placed on the bottom of the scow or below the deck, substantially as described. I also claim supporting the upper turn table or frame of the derrick, by means of a circle and wheels, substantially as described."

No. 22,812. Wm. W. Lewis, of Cincinnati, Ohio, for an "Improved horse-shoe machine."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the combination, in a pair of rolls, of a groove b, b, b^1, and creasers a, which will, by their joint operation, exert pressure in a lateral as well as a longitudinal direction, substantially as and for the purpose set forth. In combination with the above, I claim, 2nd, dividing the rollers radially and vertically, substantially as and for the purposes set forth."

No. 22,813. Henry Martin, of Louisville, Ky., for an "Improved tool for crozing and chamfering barrels."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the stock A, provided with the rollers C, C, arranged so as to be capable of being adjusted longitudinally and laterally in the stock, substantially as and for the pnrpose set forth."

No. 22,814. J. B. Martin, of Wilmington, N. C., for an "Improvement in apparatus for increasing the draft of furnaces."

"Having thus described my improvements in apparatus for accelerating the draught of locomotives and other steam engines, &c., what I claim as my invention, and desire to secure by Letters Patent, is,—First, the combination of a fan with the exhaust, when arranged within the smoke stack, substantially as described, so that the exhaust steam, as it issues from the exhaust pipe, acts directly on the blades of the fan, and then passes with the products of combustion in a direct path through the fan and through the smoke-stack, thus causing the fan to turn with high velocity, and thereby accelerating the draft of the furnace, as set forth. Second, the combination of the deflecting plates with the blades of the fan, for the purpose of intercepting sparks and cinders, as above described."

No. 22,815. Thos. E. McNeill, of Philadelphia, Pa., for an "Improvement in sleeping cars."

"I do not claim, broadly, so altering the seats of railroad cars, that they may be arranged as longitudinal sleeping couches, in four rows, with two passages; but I claim, and desire to secure by Letters Patent,—First, constructing the seat C, of the swing-seat of a railway car, with guiding strips a and b, or their equivalents, and padded leaves H and H^1, hinged together and to the seat, so that the latter may be extended and form a comfortable couch for sleeping purposes. Second, the frame e^1, arranged to receive the padded board e, when the frame is hung to one end D of the couch, and the board to the opposite end by rods f, and when the whole is combined with the swing seat of a railway car, so as to form a rest for the back during the day, and a sleeping couch for the night, as herein set forth."

No. 22,816. C. A. Merchant and G. L. Patterson, of Frankfort, Ky., for an "Improvement in coffee pots."

"We do not claim a reservoir containing cold water, as such is well known; but what we do claim as our invention, and desire to secure by Letters Patent, is, the combination and arrangement of the cylinder H, in the reservoir B, with the tubes D, E, and F, C, in the manner and for the purpose herein-before described."

No. 22,817. Wm. T. Mills, of Galesburgh, Mich., for an "Improvement in clover pickers."

"I do not claim any of the members of this machine, individually, as they are not new; but having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is, providing the teeth F, F, with the holes i, i, i, and angular plate H, when arranged at the front edge of the adjustable platform, or box A, and in relation to each other, in the manner described, and for the purpose specified."

No. 22,818. Stephen F. Palmer, of New York, N. Y., for an "Improvement in discharging water from floating dry docks for canals."

"What I claim as my invention, and desire to secure by Letters Patent, is, the manner of discharging the water from a floating dock, by means of the under-ground trunk, in combination with the flexible apparatus, to convey the water from the dock without interfering with its rise and fall, not confining myself to any particular manner, provided it produces the same result, of giving the water a self-acting discharge, substantially as before described."

No. 22,819. Wm. P. Parrott and Stephen H. Head, of Boston, Mass., for an "Improved variable exhaust pipe."

"Claim.—What we claim as our invention, and desire to secure by Letters Patent, is, the within-described contracting orifice for blast pipes, constructed and operating in the manner and for the purpose substantially as herein set forth."

No. 22,820. Jones Patrick, of Chicago, Ill., for an "Improved variable exhaust pipe."

"Having thus fully explained the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, in combination with a revolving cylinder or plate of variable sized exhaust openings, the rock shaft, pawl, radius bar, and their several connections, substantially in the manner and for the purpose set forth."

No. 22,821. John F. Peabody, of Salem, Mass., for an "Improvement in sash supporter."

"I do not claim the invention of a rack and a catch; nor the arrangement of a rack, or its equivalent, in the grooved jamb of the window frame, so as to be covered by the sash while being raised, whether such rack be placed on the bottom of the groove and against the edges of the sash, or against the rear side of the groove, and against the rear or outer side of the sash; but what I do claim is, my improved application or arrangement of the rock bar D, with reference not only to the groove a of the window frame, but to the inner side of the sash B, and to the catch applied thereto, as described, the rack bar under such arrangement not only being in full view with the catch at any altitude in which the window sash may be placed in the frame, but operating not only to support the sash at such altitude, but to maintain it within the groove a, as specified."

No. 22,822. Sylvester W. Pearsall and Washington L. Pearsall, of New York, N. Y., for a "Photographic plate vise."

"What we claim as our invention, and desire to secure by Letters Patent, is, the spring rocking jaw and lever f, in combination with the movable jaw e, substantially as described and shown. We also claim the jaw pieces or facings of hard rubber or gutta percha, for the purposes and as specified. And we claim the arrangement of the rod d, stock c, and gudgeon b entering the socket a, and having the set screw k, by which the apparatus is retained in position, horizontally as specified."

No. 22,823. G. W. Penniston, of North Vernon, Ind., for an "Improvement in cotton bale hoops."

"Having thus fully described my invention, what I claim as my invention, and desire to secure by Letters Patent, is,—1st claim: the tye A, or friction key, constructed as described, with its convex inner bearings 1 and 2, Fig. 3, when constructed and operated in the manner and for the purposes above specified."

No. 22,824. Sylvester Persons and Alfred W. Cone, of Panama, N. Y., for an "Improvement in harvesters."

"Claim:—1st, we claim arranging and operating the chain cutters upon an adjustable and vibrating cutter frame, in the manner and for the purposes substantially as described. 2nd, we claim the arrangement of two or more rollers (J, J,) relatively to the chain cutters, multiplying wheel c, and adjustable vibrating cutter frame, so that the rollers will form a bearing for the chain cutters, and support and hold the chain in gear with the multiplying wheel, whatever may be the position of the adjustable vibrating cutter frame in passing over unlevel surfaces, substantially as herein set forth."

No. 22,825. J. E. Rice, of Oneida, N. Y., for an "Improvement in fanning mills."

"I do not claim, broadly, operating the shoe B by a crank; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement and combination of the suction chamber D, spouts E (j), plate F, and shoe B, substantially as and for the purpose herein shown and described."

No. 22,826. Nathan F. Rice, of New Orleans, La., for an "Improved filtering apparatus."

"Having thus described my invention, what I claim, and desire to secure by Letters Patent, is, First, passing the water through the filtering medium from below upwards, in the manner specified. Secondly, I claim the concavo-convex perforated false bottom or diaphragm, constructed and arranged substantially as described. Lastly, I claim the air tube K, leading from the lower chamber F, as and for the purpose specified."

No. 22,827. John W. Richards, of New York, N.Y., for an "Improved fire and ventilating apparatus for ships."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, arranging and applying the pipes F, F¹, J, or their equivalents, leading to the different parts of the vessel, in combination with suitable connections with a boiler and a blower or air forcing apparatus, that the said pipes may be used as required, to supply either air for ventilation or steam, for the extinction of fire, substantially as herein described. 2d, applying the several lengths of pipe in a train, that they are capable of being turned in their joint boxes or supports, for the purpose of giving such direction to the ventilating air supplied by each length, as the occupants of the berth or part of the vessel supplied by it may desire, as herein described."

No. 22,828. Thomas Russell, of New York, N.Y., for an "Improvement in ovens."

"I do not claim to be the inventor of an oven in which the substance to be baked travels horizontally from a door where it enters to a door on the same side where it is discharged; but what I claim as my invention, and desire to secure by Letters Patent, is, the employment, in such an oven, in combination with permanent ways or tracks, arranged at right angles to each other, within, without, and through the doorways, substantially as described, and with a series of carriages to run on such ways, of a system of horizontal screws and endless chains, applied substantially as specified, and of teeth, or their equivalents, on said carriages, to connect with said screws and chains: the whole operating substantially as and for the purpose set forth. And I also claim the opening of the oven doors, to admit and permit the exit of the carriages by the direct action on the doors of the carriages themselves, substantially as described, thereby dispensing with special machinery for that purpose."

No. 22,829. Gelston Sanford, of Poughkeepsie, N. Y., for an "Improvement in Buhr stone mills."

"Having thus fully described my improvements, what I claim as new, and desire to secure by Letters Patent, is, —First, I claim the mode of constructing the casing or shell, with a vertical or upright joint J, in combination with the lever G, and wedge K, as a fastener for the shell. 2d, I claim the grinding part Q, Q¹, and the elevating part 1, in combination with the cone B, and shell B¹, when constructed and operated in the manner and for the purposes above specified."

No. 22,830. Saml. S. Squire and Theodore Scharfenburg, of Brooklyn, N. Y., for an "Improved hinge."

"Having thus described our improved method of constructing hinges, we will state what we desire to secure by Letters Patent. We are aware that hinges have been constructed with a separate pin for each core; and also that centres have been cast on one leaf, and fitted by recesses on the other leaf, by means of cores or chills, and we, therefore, disclaim such devices. What we claim as our improvement, and for which we desire Letters Patent, is, providing the half leaves on one side of a butt, with the hinge pins G, G, or I, which are solid with the pattern, and form part thereof, when cast in the manner specified."

No. 22,831. Alfred Sheek, of Smith Grove, N.C., for an "Improvement in dressing millstones."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, in combination with a plain surfaced land *a*, the depression *c*, and convex furrow or surface from *c* to *e*, the whole forming a new mill dress, for the purpose and in the manner described."

No. 22,832. H. B. Thomas, of Portage City, Wis., for an "Improved rotary steam engine."

"I do not claim the arrangement of the revolving piston wheel of a rotary engine or pump, eccentrically within and in contact with an external cylinder; but what I claim as my invention, and desire to secure by Letters Patent, is, 1st, so constructing and combining a piston wheel and sliding pistons with two eccentric cylinders, one outside and the other inside the said wheel, that with a proper arrangement of induction and eduction passages, those parts of the pistons within the rim of the wheel, as well as those without, are rendered effective in the operation of the engine, as herein described, and it is thereby rendered double acting, either in its employment as a motor, or as a pump, or as a combined motor and pump. 2d, the combined arrangement herein described of the passages and cavities in the cylinder head B¹, ring valve I, and bonnet N."

No. 22,833. Wm. W. Wade, of Longmeadow, Mass., for an "Improvement in sewing machines."

"What I claim as my invention, and desire to secure by Letters Patent, is, the application to sewing machines of the ratchet or corrugated wheel and pall, the pall being kept in place by a friction cam or its equivalent as above described, and the motion being communicated to the machine, either by a double crank as above described, or by a single crank or other appropriate means. I do not claim a pall and ratchet, operated by a lever moved by the limb of the person using the machine."

No. 22,834. Geo. Walker, of Fort Jervis, N. Y., for an "Improved machine for grinding saws."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the arrangement and combination of the wheel I, and bed plate F, substantially as herein shown and described, whereby said driving wheel is made to drive the bed plate, and also to compensate for the pressure of the grindstone, as set forth. 2d, I claim the flat bottomed water recess (*c*, *c*,) in the face of the bed plate F, as shown."

No. 22,835. Chapman Warner, of New York, N. Y., for an "Improvement in cast-iron pavement."

"What I claim as my invention, and desire to secure by Letters Patent, is, the mode of constructing pavements of iron frames of any size, substantially of the form described above, and illustrated by the accompanying drawings, placed at right angles to each other, each surmounted by a single boss, which constitutes the traveling surface, it being so arched and placed upon the frame, and the frames so connected with each other, that the pressure arising from a weight imposed upon any boss, or upon any part of it, shall not be borne exclusively by any one part of the frames, but shall be diffused over it, and over the adjoining frames, the manner of connection at the same time preserving the regularity of the surface, by preventing the elevation or depression of any one boss above or below the surface of the others. The space left by the frames to be filled with any material which the circumstances of each particular case may determine."

No. 22,836. Chas. Williams, of Philadelphia, Pa., for an "Improvement in sizing for colored papers."

"Having thus fully described my invention, or improved sizing, what I claim as new, and desire to secure by Letters Patent, is, the employment or use in a sizing for marbled and other colored papers of the solution of the gum resin lac, in combination with the, a solution of either soap or bees-wax or both, the said solutions being made and incorporated together in the sizing, substantially in the manner and for the purposes described."

No. 22,837. Aurin Wood, of Worcester, Mass., for an "Improved machine for shaving the heads of screw blanks."

"What I do claim as my invention, and desire to secure by Letters Patent, is, the wheel with its volute and twisted slot substantially as described, in combination with the ways or the equivalent thereof, to present the blanks in order as described, by means of which combination the blanks are separated one by one, and gradually brought to a horizontal or nearly horizontal position, as set forth. I also claim, in combination with the wheel having a volute and twisted slot substantially as described, for receiving the blanks one by one from the separating wheel, as set forth. And I also claim the combination of the inclined ways, the separating wheel with its volute and twisted slot, the feeding tube and punch rod, or the equivalent thereof, with the jaws on the mandrel as described and for the purpose set forth. And I also claim communicating motion to the separating wheel, by an interposed spring spur or catch, or the equivalent thereof, substantially as described, that the spring connection between the impelling mechanism and the separating wheel or its equivalent may yield to any obstruction, and thus prevent injury to the mechanism as set forth."

No. 22,838. James Lee, of New York, N. Y., assignor to himself and Milton Finkle, of said New York, for a "Stereoscopic apparatus."

"I am aware that revolving stereoscopic machines have been in use previous to this time, operated in a variety of ways, one of which is by an endless band, patented by Alex. Beckers, April 7th, 1857, of the city of New York, but to my knowledge there is none constructed and operated upon the principle here claimed. I therefore claim the fan or segment hinge I, Fig. 2, or its equivalent, in combination with the picture holders F, F, for the purpose specified. I claim the controlling band H, or equivalent, for the use herein specified. I claim the elastic band E, or its equivalent, in combination with the pulley B, and rollers C, C, and D, D, for the purposes specified. I claim the picture holder Figs 4 and 5, as described, for the purposes set forth. Finally, I claim the combination as set forth and described; but do not confine myself to the exact proportions, as I may vary the same, while I obtain the same end, by means essentially the same."

No. 22,839. Ezra Pollard, of Albany, N. Y., assignor to himself and Joshua Gray, of Westfield, Mass., for an "Improved meat cleaver."

"I do not claim a masticator for pounding meat, separately, for that, or its equivalent, has been used before; neither do I claim the cleaver, or axe, when taken separately; but I claim the meat masticator C, in combination with the cleaver D, substantially and for the purposes specified."

No. 22,840. Reuben Shaler, of Madison, Conn., assignor to Geo. W. Shaler, of New York, N. Y., for a "Fly trap."

"Having thus fully described my said invention, and the manner in which it is to be carried into operation, the particular improvement which constitutes it, and which I claim as having been originally and first invented by me, is, the combination of the stud E, and cover *g*, when arranged in connection with the chambers B and C, as described, for the purpose set forth."

No. 22,841. Saml. E. Tompkins and John Maclure, of Newark, N. J., assignors to Saml. E. Tompkins aforesaid, for an "Improvement in harness saddle-trees."

"Having thus described our invention, what we claim as new, and desire to secure by Letters Patent, is, the tubular projection *a*, on the bow A, of the tree, substantially as shown, so as to form a case for the bolt D, and permit the securing of the wooden seat block to the tree, without injuring the same or allowing it to work loose, and at the same time securing the check rein hook C to the tree."

No. 22,842. Milton D. Whipple, of Charlestown, Mass., assignor to the Whipple File Company, for an "Improvement in machinery for cutting files."

"What I claim as my invention, and desire to secure by Letters Patent, is, the circular rolling cutter *f*, operating in the manner substantially as set forth. 2dly, I claim holding the face of the blank which is being cut up to a face plate or rest, by pressure upon its opposite sides, for the purpose specified. 3rd, I claim clamping the blank rigidly, while a cut is being made, and releasing it, preparatory to its being fed, as set forth. 4th, I claim the wedges *o*, operating as set forth, for the purpose of clamping the blanks, as described. 5th, I claim the shield *z*, against which the blank *q* rests, and which is fed up with the blank, in the manner and for the purpose substantially as set forth. 6th, I claim the within described machine for cutting files, consisting essentially of the combination of the elements above claimed, and operating in the manner substantially as set forth."

Re-issues.

Josiah Ells, of Pittsburgh, Pa., for an "Improvement in revolving fire arms." — Patented 25th April, 1854.—Re-issued 1st February, 1859.

"Claims.—1st, the combination of revolving breech and stationary barrel with a lock so constructed as that the trigger used to fire the pistol when drawn back raises the hammer to full cock and there holds it, the revolving breech being at the same time rotated so far as to bring one of the chambers in a direct line with the bore of the barrel and fastened in that position preparatory to firing the piece, substantially in the manner described. The peculiar arrangement of the parts of my lock herein-before described, whereby, as the trigger is drawn back to raise the hammer, the heel of the hammer on the point against which the main spring bears is brought so nearly under the center of motion of the hammer that the force of the main spring is counterbalanced by the pressure of the trigger on the toe of the hammer, and thus it will stand at full cock, or may be fired at once, as may be desired. The use of the tubular extension on the fore part of the rotating breech, extending beyond and underneath the breech end of the stationary barrel, through which tubular extension the end of the spindle projects, and into which the spindle fits closely, for the purpose of preventing the fowling of the spindle by the residuum of the smoke in firing. The use of a collar at the end of the tubular extension, for the purpose of forming, in combination with the spindle, a locking connection between the revolving breech and the stationary barrel, which is furnished with a corresponding recess for the reception of the collar, as herein-before set forth. Forming that part of the spindle which enters the bore of the rotating breech of smaller diameter at the front extremity than at the end nearest the lock, but by reducing its diameter suddenly so as to form a step or shoulder at one or more points within the rotating breech, in combination with the rotating breech having a bore of correspondingly diminished diameter, for the double purpose of sustaining the recoil of the breech in firing and of aiding to prevent the fowling of the spindle by presenting an obstruction to the passage of the smoke between the spindle and the surface of the bore of the rotating breech. Also, the connecting and locking the barrel and breech to the lock plate by means of a bracket and spring extending in front of the lock plate, in the manner described."

Thaddeus Hyatt, of New York, N. Y., for an "Improvement in vault lights."—Patented 19th September, 1854.—Re-issued 1st February, 1859.

"What I claim as my invention, and desire to secure by Letters Patent, in the continuation of illuminating vault covers, is, the open frame with its large aperture or apertures closed with glass, substantially as herein described, in combination with the protection grating, substantially as and for the purpose described."

Geo. Thompson, of East Tarentum, Pa., for an "Improvement in devices for putting up caustic alkalies." — Patented 18th October, 1856.— Re-issued 1st February, 1859.

"What I claim as my invention, and desire to secure by Letters Patent, is, the putting up of the caustic alkalies of soda and potassa in small quantities in air-tight wrappings, cases, or boxes, in the manner herein-before described, or its equivalent, for the purposes of introducing into general use for domestic and other purposes these articles which, owing to their peculiar chemical properties, have not heretofore been susceptible of general use in small quantities."

Design.

Apollos Richmond, of Brooklyn, N. Y., for a "Design for stoves."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is,—First, the form and pattern of the plates A, B, and E. Second, the beadings and escutcheons of the design shown. Third, the design of the molding H, the whole forming an ornamental stove, as herein described."

Additional Improvements.

James Crary, of Middleport, Ohio, for an "Improvement in shingle machines."—Patented 24th November, 1857.—Re-issue dated 28th September, 1858. — Additional improvement dated 1st February, 1859.

"Having thus described my improvements in my shingle machine, patented on the 24th November, 1857, what I claim as my invention, and desire to secure by Letters Patent, is, 1st, the use of the bridles or guides d^1, d^{11}, in combination with wrists a^1 of the shaving knives and the converging grooves and vertical slots, for the purpose of communicating to the shaving knives a combined drawing knife and approximating motion during the process of shaving the shingles, substantially as described. 2d, the use of the spring check plate E, in combination with the movable gate D, to permit one only at a time of the shingle bolts to pass to the shaving knives and prevent the bolt being drawn back on the retrocession of the feed board. 3rd, the use of a feed board composed of elastic bars or fingers, each capable of a slight depression at its extremity, so as to accommodate the surface of the feed board to any unevenness or twist in the shingle bolt."

CARLYLE WHIPPLE, of Cleveland, Ohio, for an "Improvement in reciprocating saws."—Dated 13th January, 1857.—Additional improvement dated 1st February, 1859.

"What I claim as my improvement, and desire to secure by Letters Patent, is, the adjustable ways D and E, and the friction wheels H and I, arranged and operating in the manner and for the purposes specified. I also claim the vibrating beams B and C, in combination with the ways D and E, and their dependent parts, constructed and operating in the manner and for the purposes set forth."

List of Specifications, &c. published during the week ending 18th February, 1859.

No.	Price.	Subject-Matter.
1556	3*d.*	Preparation of cocoa and chocolate, &c.
1557	3*d.*	Ventilation of sewers, &c.
1558	7*d.*	Drain pipes, &c.
1559	4*d.*	Ornamenting glass, &c.
1562	9*d.*	Fire engines, &c.
1563	7*d.*	Machinery for the manufacture of wire heddles.
1565	9*d.*	Apparatus for measuring gas.
1567	5*d.*	Manufacture of night lights.
1569	3*d.*	Manufacture of alloyed ingots.
1570	7*d.*	Ornamenting chandeliers, pendants, &c.
1572	3*d.*	Blind furniture.
1573	3*d.*	Supporting and carrying telegraph wires, ropes, and cables.
1574	6*d.*	Sugar cane mills.
1577	3*d.*	Pipe joint.
1578	10*d.*	Apparatus for the production of sparkling wines.
1579	6*d.*	Looms.
1580	6*d.*	Apparatus for warming air.
1581	6*d.*	Machinery for grinding bones, &c.
1582	3*d.*	Screw nail.
1583	3*d.*	Vacuum apparatus.
1584	7*d.*	Liquid meter.
1585	6*d.*	Distilling.
1586	3*d.*	Machinery for cutting turnips, &c.
1587	3*d.*	Machinery for submerging telegraphic cables.
1588	1*s.* 5*d.*	Washing, wringing, and mangling machines.
1589	3*d.*	Stove grates.
1590	10*d.*	Bearings for axles and shafts.
1591	2*s.* 6*d.*	Apparatus for the cultivation of land.
1592	7*d.*	Locomotive and other boilers.
1593	6*d.*	Repeating fire-arms.
1594	3*d.*	Artificial legs and arms.
1595	9*d.*	Breech loading arms.
1596	3*d.*	Apparatus for covering cotton and other thread with silk.
1597	3*d.*	Arithmetical machine.
1598	3*d.*	Apparatus for the production of light.
1599	4*d.*	Stoves, fire-places, and furnaces.
1600	3*d.*	Lathes.
1601	3*d.*	Fire alarum.
1602	3*d.*	Manufacture of capsule.
1603	9*d.*	Machinery for sizing warps.
1604	3*d.*	Condensing steam engines.
1605	7*d.*	Submarine electric telegraph cables, &c.
1606	3*d.*	Submerging telegraph cables.
1607	10*d.*	Submerging telegraph cables.
1608	4*d.*	Treating and smelting ores of tin, &c.
1609	5*d.*	Hardening india rubber, gutta percha, oils, &c.
1610	3*d.*	Bankers' cheques.
1611	5*d.*	Military capes or cloaks.
1612	7*d.*	Taps or valves, &c.
1614	3*d.*	Manufacture of coke.
1615	6*d.*	Machinery for pulping vegetable matter.
1616	3*d.*	Apparatus for the reception and treatment of sewage.
1617	3*d.*	Securing and forming envelopes.
1619	5*d.*	Oiling wools.
1644	10*d.*	Machinery for turning and cutting wood, &c.
1665	7*d.*	Apparatus for feeding steam boilers with water, &c.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. I.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by BENNET WOODCROFT, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions, &c. By SIMON STURTEVANT. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By JOHN ROVINSON. (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether NICHOLAS PAGE or Sir NICHOLAS HALSE was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent Nos.* 33 *and* 85, *respectively dated* 8*th April*, 1626, *and* 23*rd July*, 1635.) Price 2*d.*
4. DUD DUDLEY'S Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated* 22*nd February*, 1620, *and* 2*nd May*, 1638. Price 8*d.*
5. Description of the nature and working of the patent Water scoop Wheels invented by WILLIAM WHELER, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated* 24*th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) EDWARD SOMERSET, Lord Marquis of WORCESTER, &c. &c. (*Stat.* 15 *Car. II c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By THOMAS SAVERY. (*Letters Patent, No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By THOMAS SAVERY. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will, III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By JOHN ALLEN, M.D. (*Letters Patent, No.* 513, *dated* 7*th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By JONATHAN HULLS. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By SAMUEL SUTTON, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent, No.* 602, *dated* 16*th March* 1744.) Price 1*s.*

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities :—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).
Macclesfield (*Useful Knowledge Society*).
Manchester (*Chetham Hospital*).
——— (*Camp Field*).
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*).
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Society of Arts (*John Street, Adelphi*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States :—

Public Offices.

Admiralty, Steam Department.
——— Surveyor of Navy.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Sheerness ditto.
——— Devonport ditto.
——— Portsmouth ditto.
——— Chatham ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec; Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin.
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Free Patent Museum and Library, South Kensington.

NUMBERS of VISITORS for the Week ending 19th February, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Feb. 14	Monday -	133	606	739—Showery.
„ 15	Tuesday -	108	560	668—Wet.
„ 16	Wednesday	109	98	207—Fine.
„ 17	Thursday -	119	—	119— „
„ 18	Friday -	79	—	79— „
„ 19	Saturday -	196	—	196— „
	Total -	744	1264	2008

Total number of visitors since the period of free daily admission (12th May, 1858) to 19th February, 1859, —69,164.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS. —This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

The following contribution has been received since the last notice:—

From CHARLES COWPER, Esq.:—

Portrait of his Father, "Edward Cowper, Esq., Inventor of the Printing Machine in general use."

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*

The following are in the press:—

PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE, Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 537. FRIDAY, FEBRUARY 25, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2328. To EDMUND WALKER, of London Street, in the city of London, for the invention of "An improved filter."—A communication.
On his petition, recorded in the Office of the Commissioners on the 19th day of October, 1858.

2960. To JOHN DAVIES, of Liverpool, in the county of Lancaster, Provision Merchant, for the invention of "An improved portable self gas generating lamp."—A communication from James Lawrence Butler, resident at Brooklin, in the state of New York, one of the United States of America.
On his petition, recorded in the Office of the Commissioners on the 27th day of December, 1858.

123. To MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for the invention of "A new or improved time-measurer."—A communication from Pasquale Perelli-Ercolini, of Prémeno, in the Sardinian States.
On his petition, recorded in the Office of the Commissioners on the 14th day of January, 1859.

158. To JOSHUA THORNTON, of Cleckheaton, in the county of York, Machine Maker, for the invention of "Improvements in carding engines."
On his petition, recorded in the Office of the Commissioners, on the 19th day of January, 1859.

175. To THOMAS GREENWOOD and JOHN BATLEY, of Leeds, in the county of York, Machine Makers, for the invention of "An improvement in the process of gassing textile fabrics."—A communication from H. Van den Berghe, residing at Rue de St. Georges, Courtrai, Belgium.
On their petition, recorded in the Office of the Commissioners on the 20th day of January, 1859.

314. To MARK SMITH, of the firm of William Smith and Brothers, of the Sun Foundry, Heywood, in the county of Lancaster, Machine Makers, for the invention of "Certain improvements in looms for weaving."

328. To JOHN HONEYMAN, of Glasgow, in the county of Lanark, North Britain, Miller, for the invention of "Improvements in the construction of ships, vessels, and boats, and in propellers for propelling the same."

330. And to WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improvements in the means or apparatus for preserving grain, flour, eggs, and other vegetable and animal substances."—A communication from abroad by Louis Jacques Chateau, of Paris, Notary.
On their several petitions, recorded in the Office of the Commissioners on the 4th day of February, 1859.

339. To JAMES HOLROYD, of Leeds, in the county of York, Cloth Finisher, for the invention of "An improvement in apparatus used in finishing woollen and other cloths."

341. To WILLIAM HENRY CRISPIN, of Marsh Gate Lane, Stratford, in the county of Essex, Copper Smelter, for the invention of "An improved atmospheric and hydraulic engine for sailing and steam vessels."

343. To JOSEPH LEE, of 18, Monson Street, Lincoln, for the invention of "Improvements in the manufacture of cranks for steam engines and other purposes."

345. To EDWARD THOMAS HUGHES, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., for the invention of "Im-

provements in ovens."—A communication from Herr Von Langen, Royal Architect, of Berlin, in the kingdom of Prussia.

347. And to JOHN WILSON, of 55, John Street, Sunderland, for the invention of "Improvements in ventilating mines, and in combining apparatus used for such purpose."

On their several petitions, recorded in the Office of the Commissioners on the 7th day of February, 1859.

---

349. To EDWARD THOMAS HUGHES, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., for the invention of "Improvements in machinery or apparatus for sorting and numbering the threads or filaments of silk or other fibrous materials."—A communication from Fabius Mainardi, Merchant, of Lyons, in the empire of France.

351. To GEORGE THOMAS, of No. 47, Ham on Street, Paddington, in the county of Middlesex, Plasterer, for the invention of "A double-bottomed horse-shoe."

355. To JOHN ASPINALL, of Great Tower Street, in the city of London, Civil Engineer, for the invention of "An improvement in the refining of sugar."

357. To ALEXANDER CLARK, of Gate Street, Lincoln's Inn, in the county of Middlesex, Engineer and Revolving Shutter Manufacturer, for the invention of "Improvements in revolving shutters and blinds, and in apparatus connected therewith."

359. And to THOMAS STOKES CRESSEY, of High Street, Homerton, in the county of Middlesex, for the invention of "Improvements in machinery used in the manufacture of casks."

On their several petitions, recorded in the Office of the Commissioners on the 8th day of February, 1859.

---

361. To EDWARD WILKINS, of No. 7, Addington Place, Camberwell Road, in the county of Surrey, Gentleman, for the invention of "Improvements in flower vases."

362. To JOHN STEPHEN JOSEPH, of Rhostyllan, near Wrexham, in the county of Denbigh, North Wales, for the invention of "Improvements in coke ovens, and in cooling and extinguishing coke."

363. To WILLIAM ARCHER, of Bolton, in the county of Lancaster, Jacquard Machine Maker, for the invention of "Certain improvements in Jacquard machines."

364. To HUMPHREY JEFFERIES, of Birmingham, in the county of Warwick, Button Maker, for the invention of "An improvement in castors."

365. To JOSEPH CROSSLEY, of Halifax, for the invention of "Improvements in the means employed when steaming printed yarns."

366. To JAMES TAYLOR, of Stalybridge, Machinist, and CHARLES WILD, of Oldham, Doubler, both in the county of Lancaster, for the invention of "Improvements in self-acting mules for spinning and doubling."

367. To JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in firearms."—A communication from William H. Bell, residing at the city and county of Washington, in the district of Columbia.

369. To JAMES EDWARD MCCONNELL, of Wolverton, in the county of Bucks, Civil Engineer, for the invention of "Improvements in steam boilers and in the generation and treatment of steam."

370. To WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "An improved mode of bleaching and purifying, or refining sugar and vegetable juices or extracts."—A communication from abroad, by Emile Rousseau, of Paris, in the empire of France.

371. To EDWARD HERRING, of the Heath, Weybridge, in the county of Surrey, for the invention of "Improvements in the mashing and fermenting of grain for the production of alcohol."

372. And to WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Certain improvements in breech-loading fire arms, and in cartridges to be used in such fire-arms."—A communication from abroad, by Gilbert Smith, of the state of New York, in the United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 9th day of February, 1859.

---

373. To HENRY POTTER BURT, of Charlotte Row, Mansion House, in the city of London, for the invention of "Improvements in railway carriages and waggons."

374. To JOHN YOUNG, of Wolverhampton, in the county of Stafford, Manufacturer, for the invention of "An improvement or improvements in the construction of knobs, and the roses used for connecting knobs with doors, and with the cases of locks and latches, and other like fastenings."

375. To JOHN GEORGE TAYLOR, of Paris and of Glasgow, in the county of Lanark, Merchant, for the invention of "Improvements in writing materials, and the manufacture thereof."

377. To ROBERT JOSEPH ELLIS, of Liverpool, in the county of Lancaster, Merchant, for the invention of "Improvements in the apparatus for lifting sunken vessels and other submerged bodies."

379. To HECTOR INGER, of No. 3, Red Lion Square, Holborn, in the county of Middlesex, Commission Agent, for the invention of "The improvement of blinkers used by horses whilst drawing, to be called the 'Patent Safety Blinker.'"—A communication from Edward Souché, 1, Rue Charlot Auxternes, Paris, in the empire of France, Agent.

381. And to CRANLEY LANCELOT PERRY, of Sheepstead Farm, Marcham, in the county of Berks, for the invention of "An agricultural implement for paring and ploughing land."

On their several petitions, recorded in the Office of the Commissioners on the 10th day of February, 1859.

---

382. To MARTIN BILLING, of Birmingham, in the county of Warwick, Stationer, and WILLIAM KLOEN, of Aston, near Birmingham aforesaid,

Commercial Traveller, for the invention of "A method of, and apparatus for, decolourizing tea."

383. To JAMES EVANS, of Tarlton Street, Liverpool, in the county of Lancaster, Coach Builder, for the invention of "An improvement in 'hansom' cabs."

384. To JAMES PARKINSON, of Manchester, in the county of Lancaster, Dentist, for the invention of "A certain improvement in coffins."

385. To NICHOLAS BENNETT, of No. 4, Furnival's Inn, in the city of London, Gentleman, for the invention of "Improvements in the construction of brooms or brushes for sweeping or cleansing streets, roads, and thoroughfares, also applicable to domestic purposes."

387. To GEORGE HYDE, of No. 61, Fleet Street, in the city of London, Stationer and Manufacturer, for the invention of "A pen for producing a copy or copies of a letter or other writing simultaneously with the production of the original."

388. To ROBERT COGAN, of Red Lion Square, in the county of Middlesex, Glass Dealer, for the invention of "Improved instruments for crushing and mixing solid and liquid substances."

389. To HENRY ALBERT BARTLETT, of Thetford, in the county of Suffolk, for the invention of "Improvements in machinery to be used with or without the plough for clearing and cleaning land from weeds."

390. To CHARLES JACKSON, of Store Street, Bedford Square, in the county of Middlesex, Pianoforte Manufacturer, for the invention of "Improvements in the action of pianofortes."

391. To JAMES GRIMES, of No. 6, Osborn Street, Whitechapel, Pewterer and Beer Engine Manufacturer, for the invention of "Improvements in beer engines."

392. And to HENRY RANSFORD, of West Brompton, in the county of Middlesex, for the invention of "An improvement in building ships and other vessels."

On their several petitions, recorded in the Office of the Commissioners on the 11th day of February, 1859.

---

393. To GAYLARD HADWEN, of Audenshaw, in the county of Lancaster, and JOHN WADSWORTH, of Droylsden, in the said county, for the invention of "Improvements in Jacquard apparatus, applicable to power looms."

394. To HENRY LEA, of Birmingham, in the county of Warwick, Engineer, for the invention of "Improvements in changing or reversing motion."

395. To THOMAS WILLIS and GEORGE CHELL, both of Longsight, near the city of Manchester, Machine Makers, for the invention of "Improvements in machinery for spinning, twisting, doubling, and winding yarns and threads."

397. To JAMES CRABTREE, of Market Street, Bradford, in the county of York, Commission Agent, for the invention of "Improvements in the manufacture of bobbins and spools."

398. To SAMUEL HAZARD HUNTLY, of Upper Baker Street, in the county of Middlesex, for the invention of "Improvements in cooking apparatus."

399. To THOMAS WHITE, of Portsmouth, in the county of Southampton, Shipbuilder, and GEORGE JENKINS, of the same place, Engineer, for the invention of "Improvements in apparatus for raising and lowering slips along inclined slips."

400. To JAMES BENNETT and JOHN BENNETT, of the firm of Bennett and Sons, of Kingsland Road, in the county of Middlesex, Engineers, for the invention of "An improvement in refrigerators for cooling beer and worts."

401. To GEORGE BETJEMANN, GEORGE WILLIAM BETJEMANN, and JOHN BETJEMANN, all of Upper Ashby Street, in the county of Middlesex, Desk and Dressing-case Makers, for the invention of "Improvements in book slides."

402. To WILLIAM GEORGE RAWBONE, of Gloucester Street, in the county of Middlesex, Gun Maker, for the invention of "Improvements in fire-arms and ordnance."

403. To GEORGE TOMLINSON BOUSFIELD, of Loughborough Park, Brixton, in the county of Surrey, for the invention of "Improvements in revivifying the scarlet color of woollen cloth lace and embroidery, in use for military and other garments and furniture."—A communication from abroad by Messrs. Andrès, Burdell, and Chicard, of Paris.

404. To HENRY GARDNER, of No. 1, Old Quebec Street, Portman Square, in the county of Middlesex, for the invention of "Improvements in machinery for breaking and preparing flax and other fibres."

405. To ROBERT BELL, of Paris, in the empire of France, and of the Office for Patents, No. 4, Trafalgar Square, Charing Cross, in the county of Middlesex, for the invention of "Improvements in separating and recovering wool from fabrics composed of wool, or wool in connection with cotton and other vegetable substances."

406. To WILLIAM EDWARD NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in breech-loading fire-arms."—A communication from abroad, by James H. Merrill, of the United States of America.

407. And to WILLIAM EDWARD NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in sewing machines."—A communication from abroad by James Stebbings Moody, of the United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 12th day of February, 1859.

---

408. To JAMES PARKINSON, of Manchester, in the county of Lancaster, Dentist, for the invention of "Certain improvements in coffins."

409. To THOMAS HUNT, of Crewe, in the county of Chester, Engineer, for the invention of "Improvements in steam boilers or generators, and in the prevention or combustion of smoke."

410. To CHARLES SANDERS, Photographic Mat Manufacturer, of Harford Street, Birmingham, in the county of Warwick, for the invention of "Certain improvements in ornamenting English passepartouts for photographic pictures, also the glasses used with the same, and which said modes of ornamenting are also applicable to ornamenting photographic frames generally."

411, To JOHN WRIGHT, of New George Street, Sheffield, in the county of York, Spring Manufacturer, for the invention of "Improvements in reducing and rolling steel and iron wire, and other forms of those metals in long lengths."

412. To JOSIAH LATIMER CLARK, of Haverstock Hill, in the county of Middlesex, for the invention of "Improvements in the means of working railway signals and switches."

413. To JAMES COPCUTT, of 26, Kirby Street, Hatton Garden, in the county of Middlesex, for the invention of "Improvements in obtaining light from gases."

414. To ROBERT CLEGG, of Islington, in the county of Middlesex, FREDERICK ANGERSTEIN, of Kennington, in the county of Surrey, and JOHN WILLIAM PAGE, of Walworth Road, in the county of Surrey, for the invention of "Improvements in making soap."

415. And to ALFRED BUTTON CLARKE, of Edward Street, Blackfriars Road, in the county of Surrey, for the invention of "Improvements in discharging sewage and water from lands into tidal rivers, and in flooding lands therefrom, also conveying sewage and other waters or liquids across canals and over structures, part of such said improvements being applicable as a substitute for sluice cocks and valves."

On their several petitions, recorded in the Office of the Commissioners on the 14th day of February, 1859.

---

416. To EDWARD HENRY ALDRICH, of Shoreditch, in the county of Middlesex, for the invention of "Improvements in ladies' dress caps."

418. To ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, for the invention of "Improvements in the manufacture of steel iron and cast steel."

420. To WALTER RAYMOND, of No. 4, Albion Square, Dalston, in the county of Middlesex, Master Mariner, for the invention of "An improved life-raft."

422. And to JOHN THOMAS JONES, of Glasgow, in the county of Lanark, North Britain, Machinist, for the invention of "Improvements in sewing machines."

On their several petitions, recorded in the Office of the Commissioners on the 15th day of February, 1859.

Invention protected for Six Months by the Deposit of a Complete Specification.

NOTICE is hereby given that the petition of

483. WILLIAM STETTINIUS CLARK, of No. 76, Cannon Street West, in the city of London, and of 35, Boulevard Bonne Nouvelle, Paris, in the empire of France, praying for Letters Patent for the invention of "Improvements in the formation of cast iron rails for city railways, and also in the method of uniting the ends of two adjacent rails for railway use,"—a communication from Sidney A. Beers, Civil Engineer, now residing at Brooklyn New York,—was deposited and recorded in the Office of the Commissioners on the 22nd day of February, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

25th February, 1859.

1942. WILLIAM ESSON, of Cheltenham, in the county of Gloucester, Engineer, for an invention of "Improvements in wet gas meters."—Dated 27th August, 1858.

1948. JOHN FOWLER, junr., of Cornhill, in the city of London, and ROBERT BURTON, of Kingsland Road, in the county of Middlesex, for an invention of "Improvements in the construction and arrangement of locomotive and other carriages to facilitate their movement on common roads and other surfaces."—Dated 27th August, 1858.

1949. RICHARD KNIGHT, of Foster Lane, in the city of London, for an invention of "Improvements in apparatus for ærating liquids."—Dated 27th August, 1858.

1955. GEORGE WEEDON, of No. 41, Poland Street, in the county of Middlesex, and DAVID WILLIAM RICE, of No. 1, New Road, Woolwich, in the county of Kent, for an invention of "An improved knife and fork cleaning machine, part of which is applicable to other purposes."—Dated 28th August, 1858.

1959. JOHN BRAZIL, of Manchester, in the county of Lancaster, Calico Printer, and JOSEPH MCKINNELL, of the same place, Calico Printer, for an invention of "An improved method of indigo blue dyeing."—A communication from a Person residing abroad.—Dated 30th August, 1858.

1960. GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, for an invention of "Improvements in billiard tables and cues."—A communication from certain Foreigners residing abroad.—Dated 30th August, 1858.

1961. JOHN BRAZIL, of Manchester, in the county of Lancaster, Calico Printer, and JOSEPH MCKINNELL, of the same place, Calico Printer, for an invention of "An improved method of indigo blue dyeing."—Dated 30th August, 1858.

1963. JOHN OXLEY, of Camden Town, for an invention of "Improvements in baths."—Dated 30th August, 1858.

1964. GRIFFITH JONES, of Bangor Wharf, Pimlico, in the county of Middlesex, Slate Merchant, for an invention of "Securing joints in slate ridge roll."—Dated 30th August, 1858.

1965. JOSIAH LATIMER CLARK, of Adelaide Road, in the county of Middlesex, Civil Engineer, FREDERICK BRAITHWAITE, of Bridge Street, in the city of Westminster, Civil Engineer, and

George Edward Preece, of Bernard Street, in the county of Middlesex, Electrician, for an invention of "Improvements in telegraph cables."—Dated 30th August, 1858.

1966. Edward Lindner, of New York, in the United States of America, Engineer, for an invention of "Improvements in breech loading fire arms and ordnance and in cartridges."—Dated 30th August, 1858.

1970. Edward Spary, of Queen's Graperies, Park Street, Brighton, in the county of Sussex, Nurseryman and Florist, for an invention of "Improvements in fumigators."—Dated 31st August, 1858.

1976. Daniel Heyworth, Manager, Featherstall Mill, Littleborough, in the county of Lancaster, and John Heyworth, Manager, Prospect Mill, Hebden Bridge, in the West Riding of Yorkshire, for an invention of "Certain improvements in looms for weaving."—Dated 31st August, 1858.

1981. Philip Davies Margesson, of Woolwich, in the county of Kent, Captain, Royal Artillery, for an invention of "Improvements in treating sugar canes, and other canes containing saccharine matter in the preparation of food for animals, also in manufacturing sugar and worts or wash for brewing, distilling, and vinegar making, and in applying the resulting fibre in the manufacture of paper."—Dated 31st August, 1858.

1992. Joseph Walker and James Barnes, of Oakenshaw, in the county of Lancaster, Waterproof Cloth Manufacturers, for an invention of "Improvements in blankets and lappings for machine and block printing and other similar purposes."—Dated 2nd September, 1858.

1998. James Robertson, of Glasgow, in the county of Lanark, North Britain, Engineer, for an invention of "Improvements in driving-belts and springs."—Dated 3rd September, 1858.

2008. David Andrew, of Greenock, in the county of Renfrew, North Britain, Engineer, for an invention of "Improvements in apparatus for obtaining motive power."—Dated 4th September, 1858.

2018. James Shanks, of St. Helen's, in the county of Lancaster, Manufacturing Chemist, for an invention of "Improvements in the manure of chlorine."—Dated 7th September, 1858.

2032. William Parsons, of Pratt Street, Lambeth, Manufacturing Engineer, for an invention of "Improvements in apparatus to be applied to steam boilers in order to keep the surfaces of the tubular flues free from incrustation."—Dated 8th September, 1858.

2034. William Parsons, of Pratt Street, Lambeth, Manufacturing Engineer, for an invention of "Improvements in safety valves of steam boilers."—Dated 8th September, 1858.

2040. William Prisley, residing at No. 7, Townley Place, Brandon Street, Walworth, in the Parish of Newington, in the county of Surrey, for an invention of "Advertising by day or night."—Dated 9th September, 1858.

2045. Thomas Timms, of 1, Skelton Street, Greenwich, in the county of Kent, Coachman, for an invention of "Improvements in bits."—Dated 9th September, 1858.

2086. Robert Lakin, of Ardwick, in the county of Lancaster, Machinist, and John Wain, of the city of Manchester, in the said county, Mechanic, for an invention of "Improvements in spinning mules, and other machines of that class used for spinning cotton, and other fibrous substances."—Dated 14th September, 1858.

2107. John Gay Newton Alleyne, of Butterley Iron Works, Alfreton, in the county of Derby, for an invention of "Improvements in the manufacture of wrought iron beams and girders."—Dated 18th September, 1858.

2122. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "An improved machine for sweeping carpets and floors."—Dated 21st September, 1858.

2154. Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for an invention of "The separation of iron and steel from their combination with certain foreign bodies."—A communication from a Foreigner residing at Charleroi, in Belgium.—Dated 25th September, 1858.

2519. John Buchanan, of Greenock, in the county of Renfrew, North Britain, Gentleman, for an invention of "Improvements in propelling vessels, ships, and boats."—Dated 10th November, 1858.

2537. John Buchanan, of Greenock, in the county of Renfrew, North Britain, Gentleman, for an invention of "Improvements in propelling vessels, ships, and boats."—Dated 11th November, 1858.

2580. Stanislas Hoga, of No. 14, Nassau Street, Middlesex Hospital, William Peter Piggott, of No. 16, Argyll Street, Regent St., and Septimus Beardmore, of No. 37, Upper Berkeley Street West, for an invention of "Improvements in electric telegraphs."—Dated 17th November, 1858.

2848. William Edward Wiley, Pen and Pencil Manufacturer, of 34, Great Hampton Street, Birmingham, for an invention of "Improvements in ever pointed pencils."—Dated 11th December, 1858.

2896. James Kerr, of 17, Bedford Terrace, Trinity Square, Southwark, in the county of Surrey, Engineer, for an invention of "Improvements in the construction of revolving fire arms."—Dated 17th December, 1858.

2936. John Whitelaw, of Dunfermline, in the county of Fife, North Britain, Ironfounder, for an invention of "Improvements in sewerage and drainage apparatus."—Dated 23rd December, 1858.

2950. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in the permanent way of railways."—A communication from Christian E. Detmold, resident at the city of New York, United States of America."—Dated 24th December, 1858.

2969. James Leck, of Glasgow, in the county of Lanark, North Britain, Bleacher, for an invention of "Improvements in drying textile fabrics and materials."—Dated 28th December, 1858.

2998. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of

166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in the permanent way of railways."—A communication from a Foreigner residing abroad.—Dated 31st December, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 23rd February*, 1859, *inclusive.*)

21st February.

466. Thomas Goode Messenger, of Loughborough, in the county of Leicester, Plumber, for an invention of "Improvements in boilers."—Dated 23rd February, 1856.

469. James Warburton, of Addingham, near Otley, in the county of York, for an invention of "Improvements in machinery for combing wool, cotton, and other fibres."—Dated 23rd February, 1856.

529. Henry Andrew Dewar, of the city and county of Aberdeen, North Britain, Surgeon Dentist, for an invention of "Improvements in conveying or transmitting motion for effecting mechanical operations."—Dated 1st March, 1856.

22nd February.

467. Robert Baker Jones, of Limerick, Gentleman, for an invention of "Improvements in cooking-apparatus."—Dated 23rd February, 1856.

470. Henry Loveridge, of Wolverhampton, for an invention of "An improvement in feet, hip, and slipper baths, also in bases for shower baths, and basins for washing and other purposes."—Dated 23rd February, 1856.

23rd February.

460. Edward Schischkar, of Halifax, in the county of York, Manufacturer, for an invention of "Improvements in cleansing silk, hair, wool, yarn and textile fabrics."—Dated 23rd February, 1856.

497. George Tomlinson Bousfield, of Sussex Place, Loughborough Road, Brixton, in the county of Surrey, for an invention of "Improvements in power-looms."—A communication.—Dated 26th February, 1856.

505. Thomas Taylorson Jopling, of Bishop's Wearmouth, in the county of Durham, Iron Founder, for an invention of "An improved construction of water meter."—Dated 27th February, 1856.

509. Isaac Westhorp, of the city of London, for an invention of "Improvements in concentrating milk, and in obtaining concentrated extracts from tea, coffee, and chocolate."—A communication from Gail Borden, a citizen of the United States of America.—Dated 28th February, 1856.

730. Alexandre Tolhausen, of No. 7, Duke Street, Adelphi, London, county of Middlesex, Sworn Interpreter at the Imperial Court of Paris, for an invention of "Certain improvements in watches and other time-keepers."—A communication from Jacob Muma, of Hanover, United States.—Dated 27th March, 1856.

893. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improved machinery, for felting hat bodies."—A communication from James Seely Taylor, of Danbury, in the state of Connecticut, United States of America.—Dated 14th April, 1856.

FOREIGN PATENTS.

BELGIUM.*

List of Patents of Inventions and of Importation Delivered on the 30th December, 1858.†

(*Communicated by the Belgian Government.*)

(For previous List, see No. 528 of this Journal.)

1. C. Arnoux, represented by H. Goupy de Quabeck, of Schaerbeek, for an imported invention of "A break that may be applied to one or several railway carriages."—Dated 22nd October, 1858.—(French Patent, 30th June, 1858.)

2. J. Gombeau and J. Royer, represented by H. Biebuyck, of Brussels, a Patent of Improvement for his "Barley mill for breweries."—Dated 6th December, 1858.—(Original Patent, 20th July, 1858.)

3. G. Olivier Drion, of Herstal, for "Improvements in Lefaucheux' guns."—Dated 6th December, 1858.

4. Ed. Hunt and D. Pochin, represented by A. Kirkpatrick, of Ixelles, for an imported invention of "Improvements in treating and applying resin and resinous substances."—Dated 7th December, 1858.—(English Patent, 27th April, 1858.)

5. L. de Naeyer, of Brussels, for "Manufacture of waterproof white oil and black varnish."—Dated 7th December, 1858.

6. P. J. Spanoghe, of Brussels, for "An instrument for taking measures for all kinds of dresses."—Dated 8th December, 1858.

7. Neuvy Brethon, represented by X. Raclot, of Brussels, for an imported invention of "A machine for compressing bricks, quarries, and other products."—Dated 8th December, 1858.—(French Patent, 11th September, 1858.)

8. F. Knickenberg, of Brussels, for "A system of towing boats on canals and rivers by means of fixed steam engines."—Dated 8th December, 1858.

9. J. H. Lacroix and C. B. Coulon, of Brussels, for "A moveable diaphragm apparatus for closing cocks."—Dated 8th December, 1858.

10. A. Marsh, represented by O. Daillencourt, of Brussels, for an imported invention of "Improve-

† All Specifications of Patents which have been in force not less than six months, may be inspected or translations of them be had at the Library of the Great Seal Patent Office, where also translated Indexes may be consulted.

ments in gas retorts for extracting gas, oil, and other substances."—Dated 8th December, 1858.—(American Patent, 10th August, 1858.)

11. H. A. Hart, represented by O. Daillencourt, of Brussels, for an imported invention of "Improvements in apparatus for regulating the pressure of gas."—Dated 8th December, 1858.—(English Patent, 29th January, 1858.)

12. H. Monier, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in gas burners."—Dated 8th December, 1858.—(French Patent, 21st December, 1857.)

13. J. S. Bailey and W. H. Bailey, represented by O. Daillencourt, of Brussels, for an imported invention of "Improvements in machines for combing wool and other fibrous substances."—Dated 8th December, 1858.—(English Patent, 12th May, 1858.)

14. A. Callès, of Ixelles, a Patent of Improvement for "Modifications in his heating and ventilating apparatus."—Dated 9th November, 1858.—(Original Patent, 10th March, 1857.)

15. J. Bethell, represented by J. Sainthill, of Brussels, for an imported invention of "Improvements in apparatus for preserving timber."—Dated 9th December, 1858.—(French Patent, 4th December, 1858.)

16. J. B. Wanty, of Dour, for "A safety break applicable to extraction engines."—Dated 6th December, 1858.

17. N. F. Corbin-Desboissières, represented by H. Biebuyck, of Brussels, for an imported invention of "A system of fireplaces with a mixed and atmospheric combustion."—Dated 9th December, 1858.—(French Patent, 27th November, 1858.)

18. A. Koechlin and Co., represented by H. Biebuyck, of Brussels, for an imported invention of "A locomotive with combined joints and couplings for ascending great gradients."—Dated 9th December, 1858.—(French Patent, 27th January, 1858.)

19. A. A. Drayson and C. R. Binney, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in subterraneous and submarine telegraphic cables."—Dated 9th December, 1858.—(English Patent, 18th October, 1858.)

20. C. J. Thévenot, represented by H. Biebuyck, of Brussels, for an imported invention of "A toy, called 'magical carnival.'"—Dated 9th December, 1858.—(French Patent, 25th September, 1858.)

21. W. Warne, A. Jaques, and J. A. Fanshawe, represented by H. Biebuyck, of Brussels, for an imported invention of "Manufacture of an improved tissue for covering floors, walls, and other objects."—Dated 9th December, 1858.—(English Patent, 28th November, 1858.)

22. J. L. Gaudebert, of Brussels, for an imported invention of "A mode of manufacturing foot coverings with invisible seams."—Dated 10th December, 1858.—(French Patent, 11th November, 1858.)

23. A. and G. Mineur, of Prayon, for "A composition of iron and steel for damaskeened fire-arms."—Dated 9th December, 1858.

24. C. J. Carr, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in forge hammers and other hammers."—Dated 11th December, 1858.—(English Patent, 7th May, 1858.)

25. E. A. Lester, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in the construction of wheels of railway carriages."—Dated 11th December, 1858.—(French Patent, 19th November, 1858.)

26. R. Wappenstein, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "Manufacture of artificial whalebone."—Dated 11th December, 1858.—(English Patent, 8th June, 1858.)

27. A. P. Price, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "Modifications in his treatment of zinc."—Dated 13th December, 1858.—(Original Patent, 27th October, 1858.)

28. S. Lees and J. Jaques, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the means of obtaining steam and saving fuel."—Dated 13th December, 1858.—(English Patent, 3rd July, 1858.)

29. H. Meidinger, represented by H. Biebuyck, of Brussels, for an imported invention of "An absolutely steady electric battery."—Dated 13th December, 1858.—(French Patent, 22nd November, 1858.)

30. Eug. Desroques, represented by A. Depuichault, of Schaerbeek, for an imported invention of "A system of protecting windows from draughts and infiltration of water."—Dated 13th December, 1858.—(French Patent, 7th June, 1858.)

31. W. Olivier and P. B. A. F. Kretschmer-Nostheer, of Schaerbeek, for "Improvements in the construction of kilns for baking porcelain and other ceramic products."—Dated 13th December, 1858.

32. J. Casse, of Tournai, for "Improvements in applying English rectilinear looms to weaving ribbed hosiery articles."—Dated 14th December, 1858.

33. F. Bertinchamps, of Monceau-sur-Sambre, for "A system of iron stop-planks, applicable to constructions and frame-work."—Dated 14th December, 1858.

34. J. Kersten, of Antwerp, for "A system of mounting and unmounting shafts of carriages."—Dated 13th December, 1858.

35. J. E. Spanoghe and H. L. Pauw, of Antwerp, for "An expeditious and inodorous mode of emptying cesspools."—Dated 10th December, 1858.

36. J. Mallieux and H. Schmidt, of Liége, for "A process for fire-gilding."—Dated 13th December, 1858.

37. P. J. Lejeune Chaumont, of Liége, a Patent of Improvement for "Modifications in his projectiles for all kinds of fire-arms."—Dated 13th December, 1858.—(Original Patent, 10th June, 1858.)

38. F. L. P. Monier, represented by O. Dardenne, of Liége, for "An hydraulic apparatus, called 'universal motor.'"—Dated 13th December, 1858.

39. F. L. P. Monier, represented by O. Dardenne, of Liége, for "Pumps without pistons."—Dated 13th December, 1858.

40. H. Henroz, of Floreffe, for "Improvements in glass furnaces."—Dated 13th December, 1858.

41. L. Mairesse, of Hornu, for "Moveable scaffoldings for shafts of mines."—Dated 15th December, 1858.

42. Ed. Empis and Co., represented by H. Biebuyck, of Brussels, for an imported invention of "A machine for wringing all kinds of thread."—Dated 13th December, 1858. — (French Patent, 23rd August, 1858.)

43. L. Schwartzkopff and F. Philippson, represented by D. Herode, of Schaerbeek, for an imported invention of "A machine for boring rocks, stone, &c."—Dated 16th December, 1858. —(French Patent, 15th November, 1858.)

44. H. J. Rogers, represented by A. Matton, of Brussels, for an imported invention of "Improvements in the manufacture of electric telegraph cables."—Dated 16th December, 1858.—(French Patent, 6th December, 1858.)

45. P. A. Viette, of St. Josse-ten-Noode, for "Manufacture of inks for engraving and lithographing."—Dated 16th December, 1858.

46. P. Gaillard, represented by Planche and Dubois, of Brussels, for an imported invention of "A simplified pantograph."—Dated 16th December, 1858. — (French Patent, 23rd August, 1858.)

47. T. A. M. Sortais, represented by H. Biebuyck, of Brussels, for an imported invention of "A self-acting mode of conveying telegraphic messages." —Dated 16th December, 1858.—(French Patent, 11th December, 1858.)

48. A. and L. Fontaine, represented by H. Biebuyck, of Brussels, for an imported invention of "A mode of cutting gloves."—Dated 16th December, 1858. — (French Patent, 1st December, 1858.

49. M. A. Méresse, of Brussels, for "A process for reproducing sketches of paintings and ornamental objects."—Dated 18th December, 1858.

50. G. E. Chenoweth, represented by O. Daillencourt, of Brussels, for an imported invention of "Improvements in harvesting machines."—Dated 16th December, 1858.—(American Patent, 30th March, 1858.)

51. P. Griffiths, represented by O. Daillencourt, of Brussels, for an imported invention of "Improvements in the manufacture of bushes for fixing drums, pulleys, and fly-wheels on shafts."—Dated 16th December, 1858. — (English Patent, 25th May, 1858.)

52. E. W. Stephens, junr., and R. Jenkins, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in rails of railways."—Dated 17th December, 1858.—(French Patent, 8th December, 1858.)

Operations and Condition of the United States Patent Office.

United States Patent Office,
January 31, 1859.

Sir,—I have the honor to submit the following Tables, as illustrating the operations and condition of this office for the year closing the 31st December, 1858:—

No. 1.

Number of applications for Patents during the year 1858	5,364
Number of Patents granted (including designs, re-issues, and additional improvements)	3,710
Number of caveats filed	943
Number of applications for extensions of Patents	24
Number of Patents extended	20
Number of Patents expired 31st December, 1858	563

Of the Patents granted there were—

To citizens of the United States	3,668
To subjects of Great Britain	20
To subjects of the French empire	14
To subjects of other foreign governments	8
Total	3,710

The Patents issued to citizens of the United States were distributed among the several States, Territories, &c., as follows:—

New York	1,075	Mississippi	31
Pennsylvania	447	Kentucky	30
Massachusetts	438	Alabama	24
Ohio	302	California	23
Connecticut	211	North Carolina	22
Illinois	155	Georgia	21
New Jersey	126	Tennessee	19
Maryland	82	South Carolina	12
Indiana	82	Texas	10
Virginia	61	Delaware	8
Maine	58	Florida	4
Michigan	54	Washington Territory	4
Wisconsin	54	Arkansas	3
District of Columbia	52	Minnesota	2
New Hampshire	51	Kansas Territory	1
Rhode Island	48	U. S. Navy	2
Missoura	46	U. S. Army	1
Vermont	42		
Louisiana	34	Total	3,668
Iowa	33		

Of the 3,710 Patents thus issued, 561 were for inventions relating to agricultural implements and processes, of which 152 were for improvements in reaping and mowing machines; 42 were for improvements in cotton gins and presses and in packing cotton; 164 for improvements in the steam engine; 198 for improvements in railroads, railroad cars, &c.;

and 116 for improvements in the sewing machine. Since the issue of the first Patent for the latter to J. J. Greenough, in 1842, two hundred and eighty-five Patents have been granted for improvements upon it. This machine, so wonderful alike for the delicacy and accuracy, as for the simplicity of its operations, may now be regarded as rapidly approaching perfection, and is destined to bless all lands with its truly beneficent ministrations. In form so cheap as to be within the reach of the humblest household, it now enables a single female to perform within the accustomed hours of labour, with slight fatigue, an amount of sewing which would be a painful task for twenty-five operatives stitching with the hand and needle. The belief is confidently entertained that, at no distant day, it will become almost as universal as were the distaff and spinning-wheel of the olden time; but, unlike these memorials of ceaseless toil, it will enter the homes of impoverished and suffering humanity to lighten the burdens and brighten the lives of those whose elevation and happiness have been the unceasing care, as they are now the crowning glory, of the Christian civilization of the world.

No. 2.

Statement of Moneys received at the Patent Office during the year 1858.

Received on applications for patents, re-issues, additional improvements, extensions, caveats, disclaimers, and appeals	188,087 00
Received for copies and for recording assignments	15,629 16
Total	$203,716 16

No. 3.

Statement of Expenditures from the Patent Fund during the year 1858.

For salaries	$82,073 41
„ temporary clerks	42,355 03
„ contingent expenses	37,803 90
„ payment to judges in appeal cases	200 00
„ refunding money paid into the treasury by mistake	374 75
„ refunding money on withdrawals	30,386 65
Total	$193,193 74

No. 4.

Statement of the Condition of the Patent Fund.

Amount to the credit of the Patent Fund, 1st January, 1858	$39,719 46
Amount paid in during the year	203,716 16
Total	$243,435 62
Deduct amount of expenditures during the year	193,193 74
Leaving in the treasury 1st Jan., 1859	50,241 88

No. 5.

Table exhibiting the Business of the Office for seventeen years, ending 31st December, 1858.

Years.	Applications filed.	Caveats filed.	Patents issued.	Cash received.	Cash expended.
1842	761	291	517	$ 36,565 68	$ 31,241 48
1843	819	315	531	35,315 81	30,776 96
1844	1,045	380	502	42,509 26	36,344 73
1845	1,246	452	502	51,076 14	39,395 65
1846	1,272	448	619	50,264 16	46,158 71
1847	1,531	533	572	63,111 19	41,878 35
1848	1,628	607	660	67,576 69	58,905 84
1849	1,955	595	1,070	80,752 78	77,716 44
1850	2,193	602	995	86,927 05	80,100 95
1851	2,258	760	869	95,738 61	86,916 93
1852	2,639	996	1,020	112,056 34	95,916 91
1853	2,673	901	958	121,527 45	132,869 83
1854	3,324	868	1,902	163,789 84	167,146 32
1855	4,435	906	2,024	216,459 35	179,540 33
1856	4,960	1,024	2,502	192,588 02	199,931 02
1857	4,771	1,010	2,910	196,132 01	211,582 09
1858	5,364	943	3,710	203,716 16	193,193 74

It will be observed that the depression under which the business of the office was labouring at the date of the last annual report has passed away, and that the rebound from the disastrous effects of the revulsion of 1857, then so confidently predicted, has already been fully realized. The applications of 1858 amount to 5,364, against 4,771 in 1857, and 4,960 in 1856, while the receipts show an excess over the expenditures of $10,522 42, against a deficit of $15,450 08 in 1857.

From the most reliable sources of information to which access could be had, the subjoined Table has been compiled, with a view of exhibiting the comparative progress of inventions for a single year in the several countries therein enumerated:—

Country.	Patents Granted in 12 months.	Population.
France	5,820	35,781,628
United States	3,710	23,191,918
Great Britain (sealed)	1,890	27,511,447
Belgium	1,406	4,426,202
Austria	703	36,514,466
Sardinia	171	4,368,972
Saxony	107	1,828,732
Sweden	64	3,482,541
Victoria (Australia)	53	410,766
Prussia	49	16,923,721
Bavaria	41	4,519,546
Netherlands	39	3,203,232
Russia	26	69,660,146
Hanover	20	349,958

It is a fact as significant as it is deplorable, that of the 10,359 inventions shown to have been made abroad during the last twelve months, but forty-two have been patented in the United States. The exorbitant fees exacted of the foreigner, and the severity of the offensive discrimination established to his prejudice, afford a sufficient explanation of this result. Were we to judge alone from the 9th section of the Act of 1836, it might well be concluded that the government of this country regarded an invention made beyond the seas as something intrinsically dangerous, if not noxious, the introduction of which it is morally just and politically wise to burden with taxation, just as you would thus burden the importation of some foreign poisonous drug. There is a loftier view of this question, and one deemed more in harmony with the progressive spirit of the age—a

view which hails the fruits of the inventive genius, in whatever clime matured, as the common property of the world, and gives them cordial welcome as the common blessings of the race to whose amelioration they are devoted.

Since the month of November, 1857, a board, temporarily organized, and consisting of three examiners, specially detailed for this duty, have been occupied in the examination of appeals from the decisions of the primary examiners to the Commissioner. During the past year they investigated and disposed of 535 cases, in most of which they have submitted elaborately prepared reports. The results of their action have been eminently satisfactory, and have commanded, it is believed, the entire confidence of the country. The withdrawal of these officers from their respective classes has practically reduced the examining corps to nine instead of twelve, the number at which it was fixed in 1856. The applications of that year amounted to 4,960, those of 1858 amounted to 5,364; so that, with a reduced force, there is a heavy increase of the labor to be performed. This is unfortunate, and to be deplored, in reference alike to the public and the inventor. The former has a deep interest in that thorough and faithful examination of applications contemplated by the Patent Laws, in order that rights which belong to all may not be unjustly monopolized by one; the latter has the same interest, lest a Patent, hastily and incautiously granted, should prove in his hands but a lure to draw him into harassing and impoverishing litigation. The legalization of this board, and the restoration of examiners to the three classes now virtually deprived of them, would furnish at once the relief required.

Since the establishment of this temporary board of appeals, the classes from which its members were respectively withdrawn have been in charge of those who have the rank and pay of assistant examiners only. In the new position, however, assigned them, they have had imposed upon them the responsibilities of examiners in chief; and it is due to them to say that they have discharged their duties with zeal and fidelity. In my judgment, it is but just that they should be compensated according to the character of the services they have rendered. Assistant examiners similarly circumstanced were provided for by Congress in 1856, and I commend the claims of those now referred to to your favourable consideration.

There are now on file in this office upwards of twenty thousand models belonging to rejected cases. For a series of years they have, for want of sufficient room, been kept in a condition little favourable to their preservation or usefulness. They present a chaotic and partially dilapidated mass of mechanical devices, of no value as compared with the space they will occupy, and the expense their repair, arrangement, and preservation will involve. The fact that they are illustrations of inventions which have been determined to be not patentable, generally for want of novelty, is proof conclusive that they are, in effect, but duplicates of illustrations previously existing, and a large portion of which are already preserved by the office in patented cases. There would seem, therefore, to be no adequate motive for permitting them longer to encumber the building. The west wing of the Patent Office, to which, if retained, they must be transferred, is approaching completion; and the present moment—before the heavy expense incident to their restoration and custody is incurred—is deemed appropriate for deciding the final disposition which shall be made of them.

The defects in the existing Patent Laws have again and again been pointed out in the Annual Reports of this office, and are believed to be thoroughly understood and appreciated by the country. The subject has been so often and so earnestly pressed upon the consideration of Congress, that I cannot regard it as my duty, if indeed it would be my privilege, to renew the discussion at this moment. I cannot, however, forbear expressing again with emphasis my conviction as to the necessity of a change in that feature of the existing law which withholds from parties to controversies pending in this office the process of subpœna for compelling the attendance of witnesses, and the production of papers. Every judicial tribunal in the land, from the highest to the lowest, no matter how paltry the amount in contest, is armed with this authority; without which, indeed, the administration of public justice would prove but little better than a mockery. With the issues of fact to be tried here are often bound up the entire fortunes of inventors, and the interests they involve are to be estimated by thousands and hundreds of thousands of dollars. Under the pressure of legislation, the parties to these issues are driven into this office, and compelled to have them investigated and decided here, while at the same time they are denied the only instrumentality by which their rights can be vindicated and maintained. They are thus forced to beg their testimony as an alms, or buy it as they would their provisions upon the shambles of the market. They are completely at the mercy of those witnesses who sell the truth, and are, of course, often subjected to the most onerous and not unfrequently to the most infamous exactions. It is a gross and monstrous injustice, which admits of no defence, of no palliation, and which cannot fail to shock the moral sense of all who, in the heady current of political life, can be induced to pause long enough to contemplate its revolting features. It may well be doubted whether an evil of such deformity, and unredeemed at it is by any pretence of right or reason, would, if exposed as this has been, under any other form of government upon the earth, have been permitted to endure for a single day.

In view of the frequency with which the proposed changes in the Patent Laws have been urged upon the notice of Congress, it has been with extreme diffidence that I have ventured even a passing allusion to the subject. A just estimate of the magnitude of the issues of which this office has charge, and a conviction of the vastly increased efficiency which these changes would secure to its administration, must be my apology. A class of men who have given to their native land and to the world the cotton gin, the steam engine, the electric telegraph, the reaper, the planing and the sewing machines—inventions whose beneficent influences tell with measureless power upon every pulsation of our domestic, social, and commercial life—may well be pardoned for believing that their wants should not be treated with entire indifference by that body, which represents alike the intellect and heart, as it does the material interests of the great country of which they are citizens.

J. Holt.

Erratum in Journal of 22nd February.

After 2327, for "2359" read "2329."

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Time-keepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*

The following are in the press:—

Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c.
Electricity and Magnetism: their Generation and Applications.
Typographic, Lithographic, and Plate Printing.
Bleaching, Dyeing, and Printing Yarns and Fabrics.
Preparation of Fuel, and Apparatus for its Combustion.
Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing.
Production and Applications of Gas.
Steam Engines.

B. Woodcroft.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 538. TUESDAY, MARCH 1, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given that

2328. EDMUND WALKER, of London Street, in the city of London, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "An improved filter."—A communication.

2335. And WILLIAM EDWARD NEWTON, of the Office of Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the hanging and arranging of cylindrical, conical, or spiral steel railroad springs for railway carriages."—A communication.

2339. And WILLIAM RIDDLE, of No. 1, Westbourne Terrace, Barnsbury Park, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in packing or forming merchandize or goods into bales."

As set forth in their respective petitions, all recorded in the said office on the 19*th day of October,* 1858.

2341. And ROBERT DAWSON CLEGG, of Manchester, in the county of Lancaster, Gentleman, has given the like notice in respect of the invention of "Improvements in screws."

As set forth in his petition, recorded in the said office on the 20*th day of October,* 1858.

2348. And JONAS MARLAND, of Sun Vale Iron Works, Walsden, in the county of Lancaster, and SAMUEL MARLAND, also of Sun Vale Iron Works, Walsden, in the county of Lancaster, Machinists, have given the like notice in respect of the invention of "Certain improvements in power looms."

As set forth in their petition, recorded in the said office on the 21*st day of October,* 1858.

2366. And EDWIN PALMER, of Thetford, in the county of Suffolk, Engineer, and EDWARD PALMER, of Thetford aforesaid, Ironfounder, have given the like notice in respect of the invention of "Improvements in machinery or apparatus for cutting hay, straw, or other similar substances."

2369. And RUDOLPH BODMER, of No. 2, Thavies Inn, Holborn, in the city of London, has given the like notice in respect of the invention of "An improved toy or plaything for children."—A communication from Charles Thévenot, of Paris, in the empire of France.

As set forth in their respective petitions, both recorded in the said office on the 23*rd day of October,* 1858.

2374. And EDWARD COTTAM, of Lower Belgrave Place, Pimlico, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improvements in the internal fittings of carriages."

2377. And FRANCIS FOWKE, of Park House, South Kensington, in the county of Middlesex, Captain in the Royal Engineers, has given the like notice in respect of the invention of "Improvements in umbrellas and parasols."

2380. And WILLIAM CRADDOCK and JOHN WHITE, both of Archer Street, St. James', in the county of Middlesex, Harness Platers, have given the like notice in respect of the invention of "Improvements in the connecting links of harness hames."

As set forth in their respective petitions, all recorded in the said office on the 25*th day of October,* 1858.

2385. And ALFRED VINCENT NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improved machinery for pulverizing, kneading, press-

ing, and moulding clay and other plastic materials." —A communication.
As set forth in his petition, recorded in the said office on the 26th day of October, 1858.

2391. And ADOLPHE PAUL AUGUSTE BEAU, of No. 152, Regent Street, London, has given the like notice in respect of the invention of "A pocket stereoscope."

2395. And GEORGE SPEIGHT, of No. 19, Woodbridge Street, Clerkenwell, in the county of Middlesex, Artist in Hair, has given the like notice in respect of the invention of "Improved plaits, and curls or ringlets for head-dresses, or ornaments, or additions to the natural hair, and an improved apparatus for the manufacture of curls or ringlets."
As set forth in their respective petitions, both recorded in the said office on the 27th day of October, 1858.

2403. And JOHN WESTERBY, of Upper Aspley, Huddersfield, in the county of York, Engineer, has given the like notice in respect of the invention of "An improved application of steam to vessels filled with oil, tallow, or other materials for lubricating the cylinders of steam engines of high or low pressure."

2404. And CHARLES POOLEY, of the city of Manchester, Cotton Spinner, has given the like notice in respect of the invention of "Certain improvements in, and applicable to, carding engines, and other machines for preparing cotton and other fibrous materials."
As set forth in their respective petitions, both recorded in the said office on the 28th day of October, 1858.

2413. And WILLIAM KIRRAGE, of No. 10, Goulston's Buildings, Bermondsey New Road, in the county of Surrey, Surveyor, has given the like notice in respect of the invention of "An improved elastic combination of materials impervious to atmospheric influences as a substitute for hard woods, metal, leather, or felting, and for other purposes."

2420. And ROBERT WILSON CHANDLER, of Bow, in the county of Middlesex, Engineer, and THOMAS OLIVER, of Hatfield, in the county of Hertford, Farmer, have given the like notice in respect of the invention of "Improvements in agricultural apparatuses for ploughing, and otherwise operating upon land."
As set forth in their respective petitions, both recorded in the said office on the 29th day of October, 1858.

2429. And GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in machinery for weaving velvets and other piled fabrics."—A communication.

2432. And JOHN DOBSON, and DANIEL PEARCE, of Saint James' Street, in the county of Middlesex, Glass Manufacturers, have given the like notice in respect of the invention of "Improvements in the manufacture of bird cages."
As set forth in their respective petitions, both recorded in the said office on the 1st day of November, 1858.

2533. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improved apparatus for securing doors of safes, closets, and apartments."—A communication.
As set forth in his petition, recorded in the said office on the 11th day of November, 1858.

2566. And WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in colouring, preserving, and desiccating wood and marble, and in apparatus for the same."—A communication from François Casult, residing at Marseille, in the empire of France."

2567. And WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "A new mode of advertising." —A communication from Messieurs Berson and Beaujanot.
As set forth in his respective petitions, both recorded in the said office on the 15th day of November, 1858.

2717. And JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in locomotive engines."—A communication.
As set forth in his petition, recorded in the said office on the 29th day of November, 1858.

2750. And FREDERIC FINCHAM, of Ravenhead, in the county of Lancaster, Esquire, has given the like notice in respect of the invention of "Improvements in the construction of annealing kilns or ovens."
As set forth in his petition, recorded in the said office on the 1st day of December, 1858.

2907. And THOMAS SWANN WOODCOCK, of Salford, in the county of Lancaster has given the like notice in respect of the invention of "An improved index or book and paper marker."—A communication from Josee Johnson.
As set forth in his petition, recorded in the said office on the 20th day of December, 1858.

2978. And HIRAM HUTCHINSON, of the city of Paris, France, has given the like notice in respect of the invention of "Improvements in the manufacture of india rubber goods."

2980. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Im-

provements in machinery for reaping and mowing."—A communication.
As set forth in their respective petitions, both recorded in the said office on the 29th day of December, 1858.

95. And JOSEPH GIBBONS, of No. 345, Oxford Street, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in fixing door and other knobs."
As set forth in his petition, recorded in the said office on the 12th day of January, 1859.

166. And WILLIAM POUPARD, of Blackfriars Road, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "An improved wheel-skid or shoe."
As set forth in his petition, recorded in the said office on the 19th day of January, 1859.

195. And ANDRÉ JACQUES AMAND GAUTIER, JEAN GILBERT DUMAY, JEAN THEODORE PERSIN, of Paris, France, Gentlemen, have given the like notice in respect of the invention of "An improved manure."
As set forth in their petition, recorded in the said office on the 21st day of January, 1859.

235. And WILLIAM RICHMOND ALEXANDER, of Glasgow, in the county of Lanark, North Britain, Merchant, has given the like notice in respect of the invention of "Improvements in furnaces and apparatus for the manufacture of sugar, and for the consumption or prevention of smoke."
As set forth in his petition, recorded in the said office on the 26th day of January, 1859.

277. And HENRY JUSTINIAN NEWCOME, of Shenley, in the county of Herts, has given the like notice in respect of the invention of "An improved apparatus for heating or warming buildings."
As set forth in his petition, recorded in the said office on the 31st day of January, 1859.

280. And JOSEPH GRIMOND, of the city of Manchester, in the county of Lancaster, Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture of hearth rugs."
As set forth in his petition, recorded in the said office on the 1st day of February, 1859.

322. And GEORGE HENRY BAYLIS, of 13, Vauxhall Walk, Lambeth, in the county of Surrey, and FRANCIS ROBINSON, of 88, Salisbury Street, Lisson Grove, in the county of Middlesex, have given the like notice in respect of the invention of "An improved indicator for registering the withdrawal of liquids from vessels."
As set forth in their petition, recorded in the said office on the 4th day of February, 1859.

355. And JOHN ASPINALL, of Great Tower Street, in the city of London, Civil Engineer, has given the like notice in respect of the invention of "An improvement in the refining of sugar."
As set forth in his petition, recorded in the said office on the 8th day of February, 1859.

369. And JAMES EDWARD MCCONNELL, of Wolverton, in the county of Bucks, Civil Engineer, has given the like notice in respect of the invention of "Improvements in steam boilers and in the generation and treatment of steam."
As set forth in his petition, recorded in the said office on the 9th day of February, 1859.

383. And JAMES EVANS, of Tarlton Street, Liverpool, in the county of Lancaster, Coach Builder, has given the like notice in respect of the invention of "An improvement in 'hansom' cabs."
As set forth in his petition, recorded in the said office on the 11th day of February, 1859.

406. And WILLIAM EDWARD NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in breech-loading fire-arms."—A communication from abroad by James H. Merrill, of the United States of America.
As set forth in his petition, recorded in the said office on the 12th day of February, 1859.

409. And THOMAS HUNT, of Crewe, in the county of Chester, Engineer, has given the like notice in respect of the invention of "Improvements in steam boilers or generators, and in the prevention or combustion of smoke."
As set forth in his petition, recorded in the said office on the 14th day of February, 1859.

422. And JOHN THOMAS JONES, of Glasgow, in the county of Lanark, North Britain, Machinist, has given the like notice in respect of the invention of "Improvements in sewing machines."
As set forth in his petition, recorded in the said office on the 15th day of February, 1859.

And notice is hereby further given, that all persons, having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

1st March, 1859.

1984. WILLIAM HOBBS, of No. 196, Piccadilly, in the county of Middlesex, Shop Fitter, for an invention of "Improvements in ordnance, and warlike projectiles to be used therewith."—Dated 1st September, 1858.

1994. JAMES BLEAKLEY, of Accrington, in the county of Lancaster, Machinist, for an invention of "Improvements in apparatus for communicating between the guard and engine driver of railway trains."—Dated 2nd September, 1858.

1997. Jean Marie Bellanger, of Number 41, Rue de Trévise, in the city of Paris, France, Shoemaker, for an invention of "Caoutchouc socks or clogs, with springs, and without bridles."—Dated 3rd September, 1858.

1999. William Harkes, of Lostock Gralam, in the county of Chester, Agricultural Implement Maker, for an invention of "An improved plough and pulverizer."—Dated 3rd September, 1858.

2002. To Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "An improved apparatus for supporting the skirts of ladies' dresses."—A communication from a Foreigner residing abroad.—Dated 3rd September, 1858.

2005. To Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improved apparatuses for receiving, containing, and delivering liquids."—A communication from J. C. J. L'hôte, of Paris, a foreigner residing abroad.—Dated 4th September, 1858.

2010. Hiram Hyde, of Truro, Nova Scotia, Gentleman, for an invention of "Improvements in the construction of carriage springs." — Dated 4th September, 1858.

2014. John Fielden, of Woodshade, near Todmorden, in the county of Lancaster, Medicine Manufacturer, for an invention of "An improvement or improvements in the construction or building of cops whether of cotton, flax, silk, wool, or other fibrous materials, and also for certain utensils thereunto conducing or belonging."—Dated 6th September, 1858.

2016. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Editor of the Mechanics' Magazine, and Patent Agent, for an invention of "Improvements in printing or marking words or figures on papers, parcels, books, pages, tickets, and other articles requiring to be marked printed, stamped, or addressed."—Dated 6th September, 1858.

2020. James Fyfe, of Greenock, in the county of Renfrew, North Britain, Brassfounder, for an invention of "Improvements in stop cocks or valves." —Dated 7th September, 1858.

2024. Frederick William Brind, of 14, Devonshire Street, Bishopgate, in the city of London, Wine Merchant, for an invention of "Improvements in sewing machines."—Dated 7th September, 1858.

2082. 'Jozé Luis, Patent Agent, of No. 1 B, Welbeck Street, Cavendish Square, in the county of Middlesex, for an invention of "Coke and gas kilns."—A communication from a Foreigner residing abroad.—Dated 14th September, 1858.

2123. John Dewrance, of Barge Yard, in the city of London, Engineer, for an invention of "An improvement in the construction of pianoforte frames."—Dated 21st September, 1858.

2441. Nehemiah Brough, Machinist, of Birmingham, in the county of Warwick, for an invention of "Certain improvements in buttons, and in the means of attaching them to garments, which said means is also applicable for other purposes."—Dated 2nd November, 1858.

2460. Enoch Fielding, of Todmorden, in the county of Lancaster, Factory Operative, for an invention of "An improved method of preserving the form of cops of yarns by the application of adhesive substances." — Dated, 4th November, 1858.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 26th February, 1859, inclusive.*)

25th February.

492. Philipp Schäfer and Frederick Schäfer both of Brewer Street, in the county of Middlesex, Manufacturers, for an invention of "An improved apparatus for damping gummed stamps, tickets, labels, and envelopes." — Dated 26th February, 1856.

506. Francis Prime Walker, of the city of Manchester, in the county of Lancaster, Ironmonger, for an invention of "Improvements in machinery for cutting hay, straw, and other vegetable substances."—Dated 28th February, 1856.

26th February.

512. John Fowler, junior, of Havering, near Romford, in the county of Essex, Engineer, and David Greig, of Barkingside, also in the county of Essex, Farmer, for an invention of "Improvements in ploughing and tilling land."— Dated 28th February, 1856.

513. Elisha Thomas Archer, of Cedar Cottage, Wandsworth, in the county of Surrey, for an invention of "Improvements in envelopes for the transmission of letters or parcels." — Dated 28th February, 1856.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

FOREIGN PATENTS.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 8th February, 1859, and each bearing that date.

No. 22,843. Charles B. Allen, of Philadelphia, Pa., for an "Improved machine for making rivets, bullets, &c., &c."

"What I claim as my invention, and desire to secure by Letters Patent, is, the revolving shafts C, C, C, with their inclined planes e, e^1, e, e^1, e, e^1, and formed as above described, and the mould-wheels or formers D, D, D, attached thereto, in combination with the yoke F and wheel G, whereby the extremities of the shafts to which the mould-wheels or formers are attached, are made to approximate and separate. I also claim the bar N, and the inclined plane n, in combination with the rod f and cutter wheel g, constructed and operated substantially as above described, whereby the portion of metal which has been moulded or formed may, when so desired be severed or detached."

No. 22,844. Giles S. Appleton, of Burlington, Vt., for an "Improved R. R. safety switch."

"Having described my improved switch, what I claim as new, and of my invention, and desire to secure by Letters Patent, is,—First, the combination of the broad and even switch rails E, E^1, with the broad and even traverse rails F, F^1, long guide rails H, H^1, and short lift and guide rails a, b, c, and a^1, b^1, c^1, when the same are arranged in relation to each other, substantially as shown and described. Second, allowing the wheels to play upon the wide traverse and switch rails, after leaving the short lift ways and guide rails, and before they reach the main track, substantially in the manner and for the purposes as above described."

No. 22,845. J. A. Ayers, of Hartford, Conn., for an "Improved method of opening and closing gates by weight of the carriage."

"What I claim as new, and desire to secure by Letters Patent, is, the counterpoised or loaded platform E, formed of two parts d, d, connected by joints or hinges g, and placed in the carriage way A beneath the gate, and extending a requisite distance at either side of it, when said platform is connected by suitable mechanism, with the gate substantially as described to operate said gate, as and for the purpose set forth. I further claim in connection with the platform E, the locking device formed of the drop bars L, L, the jointed levers M, M, connected with the bars N, N, which are provided with the upright arms r, r, extending upward through the platform, the whole being arranged to operate conjointly as and for the purpose set forth."

No. 22,846. Benjn. Barker, of Ellsworth, Me., for an "Improved sewing machine."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is,—1st, the sawdust spout H, arranged relatively with the edging saw D and feed table C, substantially as and for the purpose set forth. 2nd, the trimming saw K, when used in connection and arranged relatively with the edging saw D, to operate conjointly therewith as described."

No. 22,847. Joseph P. Barker, of Wayne, Ohio, for an "Improvement in earth excavators."

"What I claim as my improvement, and desire to secure by Letters Patent, is, the manner of arranging and adjusting the apron, and operating the same by means of the bent levers J, for the purpose of conveniently discharging the earth taken up at any desired point as set forth, and used in connection with the adjustable wheels as herein described."

No. 22,848. Saml. K. Bassett, of Galesburgh, Ill., for an "Improvement in steam ploughs."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is,—1st, having the wheels B, of the truck A, attached to separate axles C, with pivoted or swiveled inner bearings b, the outer bearings of the axles being fitted in guides D, and the outer ends of the axles being connected by rods E, with racks F, into which pinions c, of shafts G gear, the shafts being connected by the endless chains J, passing around cone pulleys I, placed in reverse positions on the shafts, the whole being arranged to operate substantially as shown and described, to facilitate the guiding and turning of the machine as set forth."

No. 22,849. Henry I. Behrens, of New York, N. Y., for an "Improved billiard register."

"But what I do claim, is the use of numbers instead of balls, or technically called points, so arranged and worked by mechanism, that any number of points made by the player, may be readily marked on the number itself, and the amount of the thus successively marked points is made to be shown by a register, the whole arranged and operated by mechanism, substantially the same as herein described."

No. 22,850. Jacob Bergstresser, of Berrysburgh, Pa., for an "Improvement in monumental daguerreotype cases."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the central frame encased by a central raised bead b, on the rear side of a glass plate, with the outer frame encased by an outer raised bead a, the central frame and outer frame being cast together on the same glass plate, and the outer one being deeper than the inner or central frame, substantially as and for the purposes set forth."

No. 22,851. Wm. G. A. Bonwill, of Dover, Del., for an "Improvement in application of electricity in dental operations."

"I do not the application of electricity to dental purposes, as this is shown in the Patent of J. B. Francis, but what I do claim as my invention, and desire to secure by Letters Patent, is, in the application of electricity to dental purposes, the mode herein described, of extracting or extirpating the dental pulp or internal nerve of teeth, to wit, by the application of a current of electricity through the instruments made use of in the performance of said operation, directly and constantly to the dental pulp, or internal nerve, during the operation of cutting out or extracting the same, as set forth, and for the purposes described."

No. 22,852. Chas. B. Boyle, of Albany, N. Y., for an "Improvement in photography on wood." —Patented in England, 7th January, 1859.

"I claim as new and of my invention, and desire to secure by Letters Patent, is, 1st, the described or substantially equivalent method of applying albuminous matter, and afterward coagulating it by heat, so as to form an insoluble base within the pores of the wood, for the purpose set forth. 2nd, taking photographic pictures upon wood, the pores of which have been filled with gelatine or its equivalent, and subsequently removing the gelatine from the block, without injury to the picture, by the application of a warm solvent."

No. 22,853. John L. Brown, of Indianapolis, Ind., for an "Improved machine for riving laths from the block."

"What I claim, and desire to secure by Letters Patent, is, the combination and arrangement of the yoke D, knife plate C, guides F and G, with the pitmans N and M, elbow levers K, L, rests I and I, when constructed and operated substantially as and for the purposes set forth."

No. 22,854. John H. Cheever, of Boston, Mass., for an "Improvement in manufacture of rubber hose pipes."

"Having thus described my improvement, I shall state my claim as follows: I do not claim the vulcanizing process, or any compounds of rubber herein above referred to, because, with the exception of the cross fibre compound, they are old; nor heating the hose or pipes on rods or tubes of iron; nor any peculiarity in the construction of the machine; neither do I intend, in this application, to claim forming a

cross fibred fabric, as these will constitute the subject of other patents; but what I do claim as my invention, and desire to have secured to me by Letters Patent, is, the new article of manufacture consisting of hose or pipe made of fibrous rubber, by powerful pressure, and without seams or joints, substantially as above described."

No. 22,855. Geo. E. Chenoweth, of Baltimore, Md., for an "Improvement in harvesters."

"I do not claim making the shells of the cam cylinder adjustable, to compensate for wear, as that has been secured to me in a former patent; but what I do claim, is the combination of cam cylinder with the cross arm, slide bar, and slotted or jaw lever, constructed, arranged, and operating substantially in the manner and applied to the purpose specified. I also claim a slide bar having two cross arms provided with friction rollers, and working in the slotted box L, as described."

No. 22,856. E. Hall Covell, of New York, N. Y., for an "Improvement in coffee pots."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, the combination of the chamber C, with the condensing chamber D, and condensing pipes E, E^1, as and for the purpose set forth. 2d, the combination of the condensing pipes E, E^1, with the steam-pipe F, and trap G, as described for the purposes set forth."

No. 22,857. Florian Dahis, of Williamsburgh, N. Y., for an "Improved valve bung."

"I do not claim, broadly, a bung provided with a valve, irrespective of the construction and arrangement of the same, for such device has been previously used; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, a bung A provided with an air passage *a*, terminating in a recess or chamber *b* in which a disk or valve *c*, of rubber or other suitable material, is placed, and secured therein by a plate *e* provided with a hole *f*, specifically as and for the purpose set forth."

No. 22,858. Beriah Douglas, of Appleton, Wis., for an "Improved washing machine."

"My claim is not for the tub, nor rocker, described, which are novel only in part; but I claim as my invention, and desire to secure by Letters Patent, the washing seat and the foot box, as combined with the washing rocker and the hand supporters, and the clothes holder or wringing, as combined with the washing tub, all for the purposes herein assigned to them."

No. 22,859. James Dundas, of Little Rock, Ill., for an "Improvement in cultivators."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the half shovels *w*, *w*, in connection with the bar *h*, *h*, and *i*, to be moved to the right or left, at pleasure of the operator."

No. 22,860. Geo. Essington, of Plainfield, Ill., for an "Improvement in cultivators."

"Having described my improvements, so as to enable any person skilled in the art to make and use them, I claim the arrangement of the mould boards T, T, center piece P, in combination with the coulter or standard H, point I, and shares J, J, the whole being constructed substantially as described, for the purposes set forth."

No. 22,861. Squire M. Fales, of Baltimore, Md., for an "Improved furnace for smelting iron."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination with the ordinary furnace, of the arched chambers or recesses at the sides of the furnace, as herein described, the opening in the crown of the arched recess or chamber, as set forth, and the movable tymp at the external openings of the arched chambers or recesses, as specified."

No. 22,862. Daniel P. Farnham, of Johnstown Centre, Wis., for an "Improvement in cattle pumps."

"I do not claim raising water by the weight of an animal upon a platform. The particular improvements that constitute my said invention, and which I claim to be the original and first inventor of, are,—First, the combination of the lever and rod, or their equivalents, with the gate and inclined platform, arranged and operating substantially as described for the purpose set forth. Second, the strips of metal *e*, secured on the inside of the barrel of the pump, to prevent the valves from coming in contact with the plunger as it works up and down, in combination with the barrel, as set forth. Third, the packing ring I, constructed as described, and kept up to the plunger by weights on the back side, as set forth."

No. 22,863. J. B. Fisher, of Beaver Dam, Wis., for an "Improved mortising chisel."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, constructing the tool with two cutting edges or portions (a^1), (*b*), of different lengths, substantially as herein shown and described, and for the purpose set forth."

No. 22,864. Perry G. Gardiner, of New York, N. Y., for an "Improvement in manufacture of cast steel."

"What I claim as my discovery and invention in the foregoing described process is, not simply the gradual and prolonged cooling of the metal after melting as aforesaid, but it is the process as a whole of pouring the melted metal into intensely heated moulds, and then placing them, thus filled, immediately into the heated oven or furnace, there to congeal away from the external atmosphere down to a cherry-red heat, and then immediately plunging the ingots or bars into the highly heated oil, and retaining them immersed in it for a considerable time, as described."

No. 22,865. Perry G. Gardiner, of New York, N. Y., for an "Improvement in manufacturing tools from cast steel."

"What I claim as my invention and discovery in the foregoing is, the process of treatment of the cast steel by pouring it in a molten state into moulds of the shape and size required for tools, instruments, axes, &c., previously heated to a high degree of heat, the steel being melted in a closed oven or furnace, and then replacing the moulds, so filled, in an oven or furnace away from the external air, and keeping them there until they have been cooled down to a cherry-red heat, and then immersing the tools, axes, &c., into the fluid mixture of a temperature of from 100 to 150 degrees Fahrenheit, as described."

No. 22,866. John C. Garland, of Chicago, Ill., for an "Improvement in mail bag fastening."

"What I claim as my invention, and desire to secure by Letters Patent, is, the employment of a slotted sliding strap F, when made of a single steel spring and used in combination with a series of narrow stationary iron guides E attached to the perforated flap of the bag, and with a steel spring B having headed stop pins C fitted between the front portion of the binding and the upper edge of the mail bag, substantially as and for the purposes set forth."

No. 22,867. Geo. W. B. Gedney, of New York, N. Y., for an "Improvement in rotary spading machines."

"What I claim as my invention, and desire to secure by Letters Patent, is, a series of spades which are operated, substantially as herein set forth, so as to descend edgewise into the soil successively in each others track, and then to move laterally to detach the slice of soil upon which they operate from the undisturbed land. I also claim combining an endless series of spades, operating substantially as herein set forth, with a cam, or its equivalent, that controls their positions by means of spade handles, or their equivalents, that are connected with the blades of the spades. I also claim adapting the machine to be moved either end forward by constructing the device that imparts lateral movement to the spades in such manner that its position may be changed, and that it may be made fast in either position."

No. 22,868. James C. Gilbert, of Winthrop, Me., for an "Improvement in skirt hoops."

"What I claim in connection with the movable spools and springs placed or strung on the cord is, a series of stationary abutment blocks *a*, *a*, *a*, fastened at intervals to the cord, and operating in manner and for the purpose as specified."

No. 22,869. John A. Goewey, of Albany, N. Y., for an "Improvement in padlocks."

"I am aware that spring padlocks have been constructed to throw out their shackles, therefore I do not claim them broadly; but what I do claim as my invention, and desire to secure by Letters Patent, is, the combination of the tumbler E, having attached to it the spring F, with the tumbler D, having attached to it the stump G, when arranged and operated in the manner set forth."

No. 22,870. Henry J. Hale, of Indianapolis, Ind., for an "Improvement in the arms of broadcast seeding machines."

"What I claim, and desire to secure by Letters Patent, is, the combination and arrangement of the segments E, E, and hinge D, when constructed and arranged as and for the purposes set forth."

No. 22,871. Saml. Hickok, of Buffalo, N. Y., for an "Improved refrigerator."

"I claim the combination of the tube B, arranged as shown, with the tank A, when combined with the case (G, G, G), for the purposes and substantially as herein described."

No. 22,872. Joseph S. Hoard and Valorus O. Spencer, of Mansfield, Pa., for an "Improved door lock."

"Having thus fully described our said invention, we do not claim to be the first to introduce a sliding plate, to close the outer key hole, as this has already been done in several instances; neither do we claim placing the outer and inner key holes in different transverse planes through the lock; neither do we claim simply and broadly preventing the bolt or the plate H, by some sort of detent, from being slid back, as detents have been before used for this purpose. The particular improvements which constitute our said invention, and which we claim as having been originally and first invented by us, are,—First, the combination of the key with the flange *h* and plate H, by which the key is made to operate as a detent to prevent the return of the plate H, which covers the outer key hole, as set forth. Second, the combination of the stop *j* upon the bolt with the key, in such a manner that, when the key is in the position represented in Figures 3 and 5, the stop *j* will strike against the key, and prevent the return of the bolt. Third, the stop *i* on the flange *h*, when combined with the key in the manner described, to prevent said key from being turned too far, as above stated."

No. 22,873. Albion P. Howard and Allen Rowe, jr., of Stoneham, Mass., for an "Improvement in sole cutting machines."

"We are aware that two knives applied to a horizontal shaft, so as to project from opposite sides of it, and that to such shaft vertical reciprocating motions, as well as intermittent rotary motions, have been given, so as to carry each knife, in succession, against a bed or piece of leather thereon; we do not claim such, as it differs materially from our invention; but what we do claim is, arranging the sole cutter on the lower end of and at right angles to a vertical shaft, and combining with such mechanism, not only for elevating and depressing such shaft in line of its axis, but mechanism for producing successive semi-rotations of such shaft and cutter, the same operating so as to carry the sole cutter toward and away from the bed, and to give to such cutter an intermittent rotary motion, in manner and for the purpose as specified. And in combination with the mechanism for elevating and depressing the cutter, and that for rotating it under an arrangement of the said cutter, with respect to the shaft, as specified, we claim the guide tooth *y*, and the clutch recesses *x*, *x*, arranged to operate in manner and for the purpose as set forth. We do not claim the combination of a sole bender with a sole cutter, unprovided with a sole discharger, as such is found in the United States Patent, No. 11,147; but what we do claim is, the combination and arrangement of the concave sole discharger and the convex sole former or bender with the cutter, and so as to operate together in manner and for the purpose as herein-before specified."

No. 22,874. Gilbert L. Hudson, of Conneaut, Ohio, for an "Improvement in door springs."

"I do not claim any of the described parts separately or in detail; but do claim as my invention or device, and original with me the use of the standard A, coil spring B, stirrup C, crotch lever D, connected with rod F, link F, as operating vice versa to gate or door G, the whole as arranged or connected and operating substantially in the manner and for the purpose set forth."

No. 22,875. Frederick Hull, of Derby, Conn., for an "Improvement in ladies' hoop skirts."

"Having thus described my improvements in forming the bustles in skeleton skirts, what I claim therein as new, and desire to secure by Letters Patent, is, the combination of the sloping bustle springs with the waist band, adjustable at the back and front, the whole arranged substantially as described, whereby the adjustment of the bustle is effected by the waistband alone."

No. 22,876. Marshall Ingersoll, of Grafton, Ohio, for an "Improved surveying instrument for determining inaccessible heights and distances."

"What I claim as my invention, and desire to secure by Letters Patent, is, the construction of a surveying instrument for taking distances and altitudes upon the general principle set forth in the foregoing description and specification. I claim, especially, the arrangement of the three sights E, F, G, or their telescopic equivalents, one of which is adjustable upon a scale by which means and the adjustment of a target having the same horizontal scale, the distance of any object within the range of vision can be determined. In this claim I do not intend to confine myself to the precise arrangement herein set forth, but to use a telescope in which a similar adjustment of hair sights (or filaments of silk) are provided for upon a definite scale, as herein set forth; neither do I intend to confine myself to any particular scale, but to adopt a decimal scale, or any other that I may see fit. I also claim, especially, a horizontal target, having marked upon it a scale corresponding to that of the accompanying instrument, which target is to be used in connection therewith, as herein described, the same forming a part of my invention. I further claim the scale of altitude, in combination with the scale of distance to be used, in the manner and for the purpose specified."

No. 22,877. Augustus Jouan, of San Francisco, Cal., for an "Improved deep sea sounding apparatus."

"I do not claim the external form of the instrument; neither the mode of calculating the depth, by the time of submersion; neither that, as set forth, for testing the highest pressure. I claim as my invention, and desire to secure by Letters Patent:—I claim the combination and arrangement of the several essential devices described, operating in the manner and for the purposes set forth."

No. 22,878. Frederic Kuhlmann, of Paris, France, for "Improvements in methods of varnishing and protecting surfaces."

"Having thus described the various methods invented by me, for preserving the surfaces of paintings, the basis of which consists in whole or in part, of artificial sulphate of baryta, made as described. I claim, 1st, the process herein described, of fixing the surfaces of fabrics (fibrous or textile) or solid surfaces, as walls or masonry, by the application of a weak solution of an alkaline silicate, as the silicate of potash and soda, to said paint basis. 2nd, I also claim for a similar purpose, the method herein described, of laying a coating of artificial leather, produced as set forth, over the surface of the basis pigment. 3rd, I also claim the within described method of fixing and rendering printed papers and fabrics waterproof, and fixing the same by hot calendering. 4th, I also claim the within described method of rendering the surface of plaster of Paris waterproof, and of preserving the same, by forming a coating of artificial sulphate of baryta upon said surface."

No. 22,879. Rufus Lapham and Riley P. Wilson, of New York, N. Y., for an "Improved churn."

"What we claim as our invention, and desire to secure by Letters Patent, is, the use of an exhausting or condensing pump, in connection with the cream reservoir, as set forth, for the purpose of forcing air upon the upper surface of the cream, or withdrawing it from it in the manner described and for the purpose set forth."

No. 22,880. C. V. Littlepage, of Austin, Texas, for an "Improved water wheel."

"I do not claim separately, the curved buckets *f*; but, having thus described my invention, what I do claim as new, and desire to secure by Letters Patent, is, the wheel G, provided with curved buckets *f* and attached to the shaft E, stepped in the block D, and otherwise arranged as shown, in connection with the spiral water passage C in the block or bed D, the whole being arranged to operate as and for the purpose set forth."

No. 22,881. James A. Lowe, of New York, N. Y., for an "Improvement in gun lock."

"What I claim as my invention, and desire to secure, is, the rule joint, or its equivalent, in the link, substantially as described, and for the purpose herein set forth."

No. 22,882. Lucius Lyman, James P. Hodgkins, and Edmund Rawson, of Carthage, N. Y., for an "Improved machine for rising staves from the block."

"We do not claim, broadly, the employment or use of movable or vibrating gauges, for such device has been pre-

viously used; but having thus described our invention, what we do claim as new, and desire to secure by Letters Patent, is, 1st, having the tubes *j, j*, of the rods or gauges *o, o*, fitted in blocks, *k, k*, which are adjusted by the screws *l, m*, or their equivalent, for the purpose specified; and 2nd, placing the rods or gauges, *o, o*, in tubes *j*, in the lower end of which springs *p* are placed, and on which springs the rods *o, o*, rest, for the purpose set forth."

No. 22,883. JOHN F. MASCHER, of Philadelphia, Pa., for an "Improvement in alarm clocks."

"I do not claim either the rack, pinion, or snail, separately, but I claim the application of the rack, pinion, and snail, in the manner set forth, to the going part of a clock or watch, for the use and purpose described."

No. 22,884. JOHN MAY, of Columbus, Geo., for an "Improved paddle wheel."

"What I claim as my invention, and desire to secure by Letters Patent, is, so applying and arranging a frame I, outside of the wheel, and in combination with the axle, or center, H, on which the floats, rotate, or its equivalent, that the said frame may be turned about the wheel, and by being so turned, will change the position of the said axle, or center H, or its equivalent, relatively to the center of the drum, and thereby cause the floats to be projected from the drum, in such positions, relatively to the axis thereof, as may be desired, substantially as and for the purpose herein set forth."

No. 22,885. WM. K. MILLER, of Canton, Ohio, for an "Improvement in harvesters."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, first, the combination of the braces and rocking bar, substantially as and for the purpose set forth. I also claim the adjustable hinge plate K, for the purpose herein described. And, finally, I claim the combination of the shoe hinge plate, braces, and rocking bar, substantially in the manner and for the purposes herein described."

No. 22,886. NELSON W. NORTHRUP, of Greene, N.Y., for an "Improvement in stoves."

"I claim as my invention, in a stove constructed as hereinbefore described, the combination and arrangement of the partition K, Fig. 5, with the flues H, H, and dampers I, I, in manner and for the purpose specified."

No. 22,887. WASHINGTON ABRAM PEASLEE, of Indianapolis, Ind., for an "Improved soot and spark arrester."

"What I claim, and desire to secure by Letters Patent, is the combination and arrangement of the cap L, rod H, walls G, F, and Q, with the case or outer walls C, flues B and E., and wall D, when constructed, arranged, and operated, substantially in the manner and for the purposes set forth."

No. 22,888. HENRY PEMBERTON, of East Tarentum, Pa., for an "Improvement in the process of manufacturing caustic alkalies."

"Having thus described my improvement in the manufacture of caustic soda, and other caustic alkalies, what I claim, as my invention, and desire to secure by Letters Patent, is, the mode herein-before described of separating the solution of caustic soda, or other caustic alkaline liquid, from an insoluble precipitate, by the use of a filter, constructed substantially in the manner herein-before described."

No. 22,889. JOSEPH A. PERLEY, of Lynn, Mass., for an "Improvement in heel and spoke shaves."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the combination and arrangement of the adjustable gauge C and beveled shanks A, A, substantially as described, so that the gauge may be moved in a plane, but slightly inclined to the convex side of the knife toward the edge or from it, for the objects specified."

No. 22,890. N. B. PRATT, of Deep River, Conn., for an "Improved carpet sweeper."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the bearings of the friction driving rollers *e, e*, in oblong slots *g, g*, of the box A, and the rollers d^1, d^1, in the specified relation to the ends of the revolving broom or brush, substantially as and for the purposes set forth."

No. 22,891. T. A. REDINGTON and GEO. MCCLUER, of Fredonia, N. Y., for an "Improvement in the manufacture of cheese."

"We claim as new, and desire to secure by Letters Patent, the combination of the water box A, milk vat B, the reserve water box G, boiler E, pipes *g, h, j, k*, and the six-way cock F, arranged to operate substantially as and for the purpose set forth."

No. 22,892. DAVID REYNOLDS, of Ogden, Ind., for an "Improved device for preventing tremulous vibration of saw gates."

"What I claim as my invention, and desire to secure by Letters Patent, is, combining the guide bar D and boxing E with the sash saw and fender posts, for the purposes set forth, and substantially as above described."

No. 22,893. ALBERT W. ROBERTS, of Hartford, Conn., for an "Improvement in machines for stretching leather."

"Claim.—What I claim as my invention, is, the constructing of the jaws of leather stretchers, with ways for the wedges to slide on, that the wedges may be so relieved from the leather, when drawn back, that the leather can be put in without removing the wedge from the jaw. I also claim making the frames of hollow tubes on which the jaws slide, and also the application of steam to said frame for drying purposes. Also the shafts and gears for throwing back the wedge, all of which is herein set forth and described."

No. 22,894. WM. N. ROWE, of Sharpsburgh, Md., for an "Improvement in corn huskers."

"Having thus fully described my invention, what I claim as new therein, and desire to secure by Letters Patent, is, the combination of the adjustable plate K, armed with spikes (*i*), with the endless apron I, and knives D and C, when these several parts are constructed, arranged, and operated in the manner described, for the purposes specified."

No. 22,895. N. C. SANFORD, of Meriden, Conn., for an "Improvement in skates."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, attaching the runner B of the skate to its stock A, by means of the springs C, C, substantially as and for the purpose set forth."

No. 22,896. SILAS T. SAVAGE, of Albany, N. Y., for an "Improvement in cast iron pavement."

"I do not claim, broadly, the connection of the blocks, by means of dovetails, nor by the detached locking pieces; but what I claim as my invention, and desire to secure by Letters Patent, is, combining the blocks by the peculiarly arranged dovetails cast on the blocks, and the locking pieces composed of heads and feet fitting between the blocks and into their dovetails, substantially as herein described."

No. 22,897. WM. SIMS, of Dayton, Ohio, for an "Improved refrigerator."

"I claim as new and of my invention, the described arrangement of the ventilating passages E and F, communicating with the upper part of a receptacle C, in the lower part of which are placed ice and articles to be cooled or preserved, and in whose lower part, circulation of air is avoided, in the manner and for the purpose set forth."

No. 22,898. JEREMIAH P. SMITH, of Hummelstown, Pa., for an "Improvement in corn shellers."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the groups of short teeth *f, f*, alternating with the smooth spaces *d, d*, which are provided with the raised ribs *g, g*, in combination with the sharp-edged teeth *h, h, h*, (with curved or straight edges) when arranged circularly, in lines parallel with the axis of the wheel, and operating in connection with the ear holder D, so as to act on the ears of corn nearly lengthwise thereof, substantially in the manner and for the purposes herein specified."

No. 22,899. JOEL SMITH, of Northbridge, Mass., for an "Improvement in regulating the twist in throstle frames."

"I believe I have described and represented my improvements for regulating and equalizing the twist of yarn on ring traveller spinning frames, so as to enable any person skilled in the art to make and use them. I will now state what I claim, and desire to secure by Letters Patent:—I claim the expanding pulley D, arranged to operate as described, for the purposes set forth in the foregoing specification."

No. 22,900. JOHN B. STONER, of Bennington, Ill., for an "Improvement in grain weighers."

"Having thus fully set out the construction and operation of my invention, what I claim as new in grain weighers, and desire to secure by Letters Patent, is, 1st, the rotary hopper, constructed and operating substantially as described. 2d, I claim suspending the rotary hopper upon the lever or scale arms, as herein set forth. 3rd, I claim the arrangement of means herein described for operating and controlling the valve or door to the shute of the stationary hopper. 4th, I claim operating the indicators, by means deriving their motions from the weighted end of the scale arms, in combination with the springs or their equivalents, as described. 5th, in combination with the suspending of the rotating hopper, as described, I claim the suspending of the weight, as described."

No. 22,901. JOHN TEMPLE, of Middletown, Ohio, assignor to Temple, Mills, and Stout, of said Middletown, for an "Improved sluice for water wheels."

"I claim as new and of my invention herein, the winged gates B, C, constructed, arranged, and operating in combination with a series of scroll shutes A, substantially in the manner and for the purpose set forth."

No. 22,902. JOHN TEMPLE, of Middletown, Ohio, assignor to Temple, Mills, and Stout, of said Middletown, for an "Improvement in water wheels."

"I claim as new and of my invention herein, the construction and arrangement in central discharge water wheels, of buckets E, which have the described compound cyma-reversa and downward and outward curve, whereby the water acts on the wheel by percussion, reaction, and gravitation, and escapes freely without back action, as set forth."

No. 22,903. WEBSTER THOMAS, of Oxford, Ohio, for an "Improved machine for tenoning spokes."

"Having described my invention and the operation thereof, I claim the combination of the beds I and B, constructed as described, with support piece T, wedge V, and the double series of cutters *d*, *e*, in the same cutter bearer, the construction and operation being as described."

No. 22,904. DANIEL M. TRUE, of Rockland, Me., for an "Improvement in lasts."

"I do not claim the use of the bolt and spring to be used for a fastening as new; but I claim as a fastening for last blocks the bolt *a* when formed with the notches *f* and *g*, and combined and arranged with the spring *b*, the pin *c*, and last hook hole *e*."

No. 22,905. JOHN WALCH, of New York, N. Y., for an "Improvement in revolving fire-arm."

"What I claim as my invention, and desire to secure by Letters Patent, is, the revolving chambers or breeches fitted with two ranges of nipples in combination with the double hammers acted on by one trigger and firing the respective charges in succession, substantially as specified."

No. 22,906. AUGUSTUS WATSON, of Walnut Run, Ohio, for an "Improvement in underground grain ploughs."

"Having thus fully described the nature and object of my invention, what I claim therein as new, is, so hanging a coulter to which a 'mole' is attached, as that by removing a key, or its equivalent, that restrains said coulter, and by advancing the plow, said coulter and 'mole' will run out of the ground, substantially as herein described and represented."

No. 22,907. A. H. WEBSTER, of Hudson, N. Y., for an "Improvement in apparatus for supplying hydro-carbons with oxygen."

"I do not claim, broadly and irrespective of the means employed, supplying hydro-carbons with oxygen by mechanical means; but having thus described my invention, what I claim, and desire to secure by Letters Patent, is, the bellows B, B, actuated by the tappit wheels D, D, and and attached to the chest C provided with a cover or weight *d* and an eduction opening *e*, combined and arranged to operate as and for the purpose herein set forth."

No. 22,908. WM. L. WEST, of Elmira, N. Y., for an "Improvement in bee-hives."

"What I claim as my invention, and desire to secure by Letters Patent, is, the use of the opposing springs *d*, *d*, for the purpose of insuring a contact of the parts contiguous to the passage way *c*, substantially as described."

No. 22,909. SYLVANUS A. WHEAT, of Franklin, N. Y., for an "Improved apparatus for drawing water."

"What I claim, and desire to secure by Letters Patent, is giving the barrel a longitudinal motion on the shaft, also connecting the valve to the rope by the rod, substantially for the purpose described."

No. 22,910. THOS. WILLIAMS and WM. C. JOHNSON, of Fishersville, Conn., for an "Improved ellipsograph."

"Having thus described our invention, what we claim as new, and desire to secure by Letters Patent, is, the slotted bar A provided with the slide B, the arbor *c* passing through the slide B with the disk C and slotted bar D attached, and the elastic bar G pivoted to the bar A and connected eccentrically with the disk C, the bar D having the pencil stock E attached, and the whole arranged substantially as and for the purpose set forth."

No. 22,911. JOHN P. WILSON, of Frankfort, and JOHN F. THOMAS, of Ilion, N. Y., for an "Improvement in burglars' alarms."

"We do not claim securing the alarm by means of a screw to the casing of the door or the use of fire arms as a means of alarm and defense in cases of attempted robbery; but we do claim, 1st, the employment, in connection with the within-described gun or alarm, an adjustable gimblet screw (D) which is secured in a dovetailed groove in the body while in use, and which is secured in the barrel or bore by a screw when not in use, substantially as is set forth. 2d, the employment of the two sides A^1, A^1, between which the hammer falls, which serve to prevent particles of the cap from flying off, and at the same time forming a snug protection for the hammer, and causing a louder report of the cap, as is herein fully set forth."

No. 22,912. THOS. K. WORK, of Hartford, Conn., for an "Improved odometer."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the curved or segment weight *m* pivoted to the arm *l*, which is attached to the pinion e^1 and fitted between the annular ledges *n*, *o*, substantially as and for the purpose set forth."

No. 22,913. FREDERICK YEISER, of Lexington, Ky., for an "Improved instrument for taking altitudes of the sun."

"Having thus described my invention, what I claim as new and desire to secure by Letters Patent, is, the arrangement of the spirally slotted cylinder L, on a rotary frame E, in such relation to a pin G, and to a strongly defined line 3, 4, that it operates substantially as and for the purposes specified. And in combination with the rotary frame E, I also claim operating the cylinder L, by means of a toothed sector I, which gears into cogs J, which are attached to the stationary disk C, in the manner and for the purpose substantially as described."

No. 22,914. JOHN K. BIGELOW, of Waltham, Mass., assignor to Appleton, Tracy, and Co., of said Waltham, for an "Improved mechanism for stopping watches."

"I claim the peculiar mode of making the ratchet, viz., with trapezoidal teeth, and with a notch in each of them, as described and represented. I also claim the arrangement or application of the stop lever E, with respect to the stopping stud and the ratchet, or so as to serve, not only as a carrier and actuator of the former, but as a stop to the latter, under circumstances as above specified."

No. 22,915. MICHAEL BOYER, of Germantown, Ohio, assignor to Chas. S. Rohner, and Wm. Gunckel, of said Germantown, for an "Improvement in seed drills."

"Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is, arranging the spring C, ratchet wheel *b*, ratchet *a*, link D, drag bar A, arm E, and discharge spout B, substantially in the manner and for the purpose herein specified."

No. 22,916. JOHN N. DENNISON, of Newark, N. J., assignor to himself, Joseph Dennison and David Baker, of said Newark, for an "Improvement in steam condensers."

"What I claim and desire to secure, is, a feed pump with its attachments and connections substantially as described, in combination with a condenser, constructed and arranged as herein above set forth."

No. 22,917. E. B. HALL, of Woodbury, N. J., assignor to himself and Joseph C. Farley, of Pine Grove, N. J., for an "Improvement in stump extractors."

"I am aware that in the stump extractor, for which Letters Patent were granted to Jason S. Wood, on the 3rd February, 1857, cams in conjunction with other appliances are used. I therefore do not claim broadly, such a device, but I claim, as an improvement on the Patent of J. S. Wood, the cam J, when constructed in the peculiar manner herein described in combination with the rods G and G^1, their respective rollers and hooks K and K^1, the whole of the above parts being arranged in respect to each other for joint action, substantially as herein set forth."

No. 22,918. PETER HOFFMAN, of Rising Sun, Ind., assignor to himself and Saml. F. Covington, of Indianapolis, Ind., for an "Improved die for cutting screws."

"What I claim, and desire to secure by Letters Patent, is, the construction of a solid die, as above, in which the bottom of the groove is so thrown up in the rear of the cutting point or edge of the same, as to avoid the friction occasioned by the rubbing upon the top of the thread of the bolt cut or threaded."

No. 22,919. GEO. HINMAN, of New Haven, Con., assignor to himself and Chas. Monson, of said New Haven, for an "Improved knife sharpener."

"I am aware, that two cutting edges set at different angles, have been used for knife sharpeners, for many years (but in all such cases, the angle varied, as the cutting edges were more or less separated at the upper ends). I therefore do not claim a knife sharpener made of two pieces of steel with the edges fitted to abrade the sides of the edge of the knife, as such, as my invention; but what I claim as my invention, and desire to secure by Letters Patent, is, the use of the two cutters (B & C), when made susceptable of being adjusted to any desired angle by means of a slot (as at *a*) while using any portion of the length of the cutting edges, and the whole is constructed and made to operate, substantially as herein described. 2d, I also claim the rest (D) in combination with the adjustable cutters (B & C), when the whole is constructed and fitted for use, substantially as herein described."

No. 22,920. WM. LEACH, of Clarkson, N. Y., assignor to himself and Geo. P. Tisdale, of Chili, N.Y., for an "Improvement in self-acting cheese press."

"I do not claim simply a self-acting press, but what I claim as my invention, and desire to secure by Letters Patent, is, the pitmen D, D, arranged substantially as described, in combination with the pairs of cross levers B, B, so as to keep said cross levers at equal heights, at opposite ends of the press, and consequently, at the same relative angle to the table A, in all positions, for the purpose of securing uniformity of pressure upon all parts of the articles pressed. I also claim the combination of the rod *l*, handle *r*, and pawls *m*, *m*, mounted in one pair of cross levers B, B, with the notches *o*, *o*, *o*, or their equivalents, in the other pair of cross levers, arranged and operating substantially in the manner and for the purpose herein set forth."

No. 22,921. HORATIO LEONARD, of New Bedford, Mass., assignor to himself and H. Ryder, of said New Bedford, for an "Improvement in moulding paraffine candles."

"I do not claim manufacturing candles by means of moulds; but what I claim as my improvement in moulding paraffine candles, is, the improved process, substantially as described, the same involving the employment of a heated mould and water, and air baths, at temperatures, and in the manner, substantially as herein-before mentioned."

No. 22,922. EDWD. MAYNARD, of Brooklyn, N. Y., assignor to himself, R. K. Slaughter, and Thos. E. Purdy, of said Brooklyn, for an "Improved method of covering with fibrous material, submerged spiral electrodes, for short distances."

"What I claim as my invention, and desire to secure by Letters Patent, is, constructing submarine telegraph cables of metallic conductors, twisted in a helical form, in combination with layers of cords or strings, parallel, or nearly so with the axis of the cable, that are confined together by a serving or winding, and are saturated with waterproof non-conducting material, as set forth."

No. 22,923. LOREN J. WICKS, of Racine, Wis., assignor to himself and Thomas Burbeck, of said Racine, for an "Improved boot-jack."

"Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is, the within described boot jack, as an article of manufacture with the tools formed on the rear or front of its arms, said arms being made to open or shut together, substantially in the manner specified."

RE-ISSUES.

GEORGE RIESECK, of Pittsburgh, Pa., for an "Improved steam valve." — Patented 10th August, 1858.—Re-issued 8th February, 1859.

"Having thus described the nature, construction and operation of my improvement, what I claim as my invention, and desire to secure by Letters Patent of the United States, is,—First, the valve (D) with a projecting hollow stem (E), which is reduced, so that its end presents an area only equal or nearly so to the receiving ports in the face of the valve, in combination with the main steam chest or chamber (J), and an auxiliary steam chest or casing (I), furnished with a stuffing box (*d*), and constructed so as to cover the whole of the back of the valve, excepting the end of the stem, or a portion of the back equal or nearly equal to the receiving ports in its face. substantially as, and for the purposes set forth. Second, in combination with the above, the peculiar manner herein specified of making the face of the valve (D), with six ports (F, F^1, F^2,) (G, G^1, G^2,) three for receiving and three for exhausting said ports, being arranged in such relation to each other that that when the valve is applied to an oscillating engine, one receiving port always stands in line with an exhaust port, and to only four of the ports shall be in use when the engine is working, the other two being kept in reserve, so that by shifting the valve the engine will be instantaneously reversed under a full pressure of steam without shutting off the steam between the engine and the boiler, as the herein described and set forth."

WILLIAM SELLENS, of Philadelphia, Pa., for an "Improved machine for threading bolts." — Patented 1st December, 1857.—Re-issued 8th February, 1859.

"Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is the use of rotating dies, in combination with cams, or their equivalent, when both are so arranged as to be capable of revolving about a common centre at different velocities, for the purpose of opening and closing the dies, substantially as described. I claim the arrangement of cams with open spaces between them, in combination with the die box and dies, substantially as described, to facilitate the changing of the dies. I also claim the mode of attaching the top holder to the revolving die box, substantially as described."

GEORGE THOMPSON, of East Tarentum, Pa., for an "Improvement in boxes for preserving alkalies.——Patented 15th September, 1857.—Re-issued 8th February, 1859.

"What I claim as my invention, and desire to secure by Letters Patent, is, the use of metallic boxes, constructed as described, and united with cement infusible at the degree of heat at which the caustic alkalies of soda and potassa remain fluid, for the purpose of putting up those caustic alkalies in small quantities, as described."

JOHN WÜST, of Philadelphia, Pa., for an "Improvement in self dumping coal bucket."— Patented 13th July, 1858.—Re-issued 8th February, 1859.

"Having thus described my improvement, what I claim as my invention, and desire to secure by Letters Patent, is, the combination of a bucket suspended by the handle at points below its centre of gravity, in combination with a self-acting detachable latch, operated by the bucket touching the ground."

WILLIAM W. BATCHELDER, of New York, N. Y., for an "Improvement in lamps."—Patented 28th December, 1858.—Re-issued 8th February, 1859.

"Having thus fully described my invention, what I claim and desire to secure by Letters Patent of the United States

is, the arrangement of small tapers or wick tubes below and on both sides of the main or illuminating burner, in combination with a suitable cap, for the purpose of producing a more complete combustion, substantially as set forth."

STENBEN T. BACON, of Boston, Mass., assignee of Edward N. Smith, of Springfield, Mass., for an "Improvement in machines for folding paper."—Patented 19th May, 1857.—Re-issued 8th February, 1859.

"After having described my improvements, what I claim therein as new and of my invention, and desire to secure by Letters Patent, is,—First, the employment of adjustable points or register pins, or their equivalents, for the purpose of correctly presenting printed sheets to a paper folding machine, substantially in the manner and for the purpose set forth. Second, the combination of a registering apparatus with a paper folding machine, substantially in the manner described. Third, the combination of the register pins with the fingers, reciprocating carriage, and slotted bar, for the purpose specified. Fourth, the combination of the slotted reciprocating carriage with the knife *d*, as described. Fifth, the combination of the slotted reciprocating carriage with the first pair of folding rolls and knife *d*, as specified. Sixth, the combination of a folding knife, the edge of which is smooth, with one or more needle points projecting beyond, and in a line with the edge thereof, as shown. Seventh, securing the needle points to the folding knife, in the manner and for the purpose specified. Eighth, securing the needle point or points to the folding knife in such a manner as that they shall have their main support back of the edge of said knife, as specified. Ninth, so constructing paper folding machines as that the sheet while being folded shall occupy the same time, or nearly so, while passing from the position for receiving its first fold to that of the next and succeeding folds, as specified."

STENBEN T. BACON, of Boston, Mass., assignee through mesne assignment of John North, of Middleton, Conn., for a "Machine for folding paper."—Patented 15th April, 1856.—Re-issued 27th July, 1858.—Re-re-issued 8th February, 1859.

"Having described the construction and operation of the said machine, what I claim as the invention of the said North, and desire to secure by Letters Patent, is, the use of a stationary folding knife in a machine for folding printed sheets of paper, substantially as herein described, and as the invention of the said North. I also claim the combination of the folding knives *k*, *k*, with the reciprocating carriage, as set forth. And as the invention of the said North, I also claim giving to the reciprocating carriage its proper motion, by means of the crank *k*, and slotted connecting rod M, in combination with lever N and link P, substantially as described, and as the invention of the said North. I also claim the device for raising and depressing the fingers, as fully shown in Fig. 6, and as the invention of the said North. I also claim the combination of the folding and carrying nippers with the stationary folding knife, substantially as described, and as the invention of the said North. I also claim releasing the sheet from the nippers by means substantially as described, and as the invention of the said North. I also claim the circular knives c^1, c, for separating the sheets, when operated substantially in the manner described, and as the invention of the said North. I also claim the combination of the levers T and T^1, with double concentric rock shafts D and F, substantially in the manner and for the purposes set forth, and as the invention of the said North. I also claim the adjustable check, and the mode of releasing its hold by the advance of the nippers, as set forth."

STENBEN T. BACON, of Boston Mass., assignee through mesne assignment of Edward N. Smith, formerly of West Brookfield, Mass., for an "Improvement in machines for folding paper."—Patented 27th November, 1849.—Re-issued 7th January, 1851.—Re-re-issued 8th February, 1859.

"Having described my machine for folding and pressing paper, what I claim, and desire to secure by Letters Patent, is, first, forcing the paper required to be folded between the first set of folding rolls by the knife while the sheet is on the run. Second, forcing the paper to form the first fold between two converging and continuously-moving flexible yielding surfaces. Third, forcing the sheet of paper required to be folded upwards, for the purpose specified. Fourth, the use of a cord or curved edged knife, for the purpose of forcing the sheet between the folding rolls. Fifth, the stops for determining the proper position of the sheet for receiving its second and succeeding folds. Sixth, the combination of the carrying bands with a stop for regulating the sheet in proper position to receive its second and succeeding folds, as specified. Seventh, the combination of the rolls and endless aprons or bands with the guides, substantially as described. Eighth, so arranging the knives, aprons, and rolls in a paper-folding machine, as that the sheet may receive two or more parallel folds in succession. Ninth, so arranging the carrying and folding rolls in a paper-folding machine as that only a single series of endless aprons or bands shall remain in contact with the sheet to conduct it while it is receiving more than one fold. Tenth, the tightening pulleys and cords or bands hung upon the movable bar, for the purpose of giving proper direction to the sheet for receiving its next fold, after having received a parallel fold, as described. Eleventh, so conducting a machine for folding paper as that one or more folds may be omitted at pleasure, and the folded sheet delivered outside of the frame and working parts of the machine, by simply detaching the knives and removing the stops, as described. Twelfth, supporting the folding rolls in adjustable boxes, bearings, or frames, for the purpose of squaring them with the print or register of the sheet to be folded, and providing for the construction and expansion of the endless aprons or bands. Thirteenth, the movable guides for the purpose of squaring the knives to correspond with the print or register of the sheet. Fourteenth, conveying motion to any pair of folding rolls running at right angles to the preceding pair, by means of bevel gears placed at or near a center of a roll and between the aprons or bands, substantially as shown, whereby the machine is rendered more simple and perfect in its operation. Fifteenth, pressing the folded sheet previous to its delivery, by passing it between two converging and continuously moving yielding surfaces."

DAVID ALTER and SAMUEL A. HILL, of Freeport, Pa., assignors to themselves, John F. Johnson, of said Freeport, William T. Johnson, George S. Selden, and John L. Russell, of Pittsburgh, Pa., for an "Improvement in distillations of oils from coal."—Patented 27th April, 1858.—Re-issued 8th February, 1859.

"But what we do claim as our invention, and desire to secure by Letters Patent, is, the destructive distillation of coal or other bituminous substances, for the obtaining the liquid products thereof, in the form of what is known as coal oils, by the process herein-before described, viz., combining the use of a low temperature, not exceeding a low red heat, say about eight hundred and fifty degrees Fahrenheit, with the use of retorts so constructed as to have a rotary or other equivalent motion, for the purpose of agitating their contents, substantially in the manner and for the purposes herein-before set forth."

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, as translated or transcribed from Official Communications, may be found in the following Numbers of this Journal, published at 2*d*. each, or 3*d*. free by post:—

List of Specifications, &c. published during the week ending 25th February, 1859.

No.	Price.	Subject-Matter.
1613	3*d.*	Manufacture of tin plates, &c.
1618	7*d.*	Aquaria tanks, &c.
1620	3*d.*	Manure.
1621	3*d.*	Ice safes.
1622	6*d.*	Manufacture of harrows.
1623	6*d.*	Repeating fire-arms.
1624	1*s.* 1*d.*	Machinery for the preparation of silk.
1625	3*d.*	Preparation of roofing, &c.
1626	7*d.*	Thrashing machines.
1627	3*d.*	Bankers' cheques.
1628	3*d.*	Manufacture and treatment of paper for the prevention of forgery.
1629	6*d.*	Collars for horses, &c.
1630	5*d.*	Feeder for administering food.
1631	3*d.*	Tempering rails and axles.
1632	3*d.*	Application of woven fabrics for printing.
1633	9*d.*	Fire engines and pumps.
1634	11*d.*	Repeating fire-arms.
1635	7*d.*	Joints for connecting pipes, &c.
1636	6*d.*	Windows, window blinds, and shutters.
1637	3*d.*	Ornamenting metallic and non-metallic surfaces.
1638	3*d.*	Ornamenting sticks.
1639	3*d.*	Moveable receiving apparatus for sewage.
1640	6*d.*	Crushing mills.
1641	6*d.*	Manufacture of bread, &c.
1642	3*d.*	Ornamenting the surfaces of raised pile fabrics, &c.
1643	3*d.*	Manufacture of fabrics for covering umbrellas and parasols.
1645	7*d.*	Steam boilers, &c.
1646	7*d.*	Propeller.
1647	3*d.*	Calculating machines.
1648	3*d.*	Vehicle for lamplighters.
1649	1*s.* 3*d.*	Locomotive or traction engines.
1650	3*d.*	Gas meters.
1651	7*d.*	Manufacture of beams, girders, ships' ribs, or frames, &c.
1652	8*d.*	Kiln for burning earthenware, &c.
1653	5*d.*	Hinge for hanging and closing doors, &c.
1654	8*d.*	Fastening envelopes and letters.
1655	6*d.*	Ordnance, fire arms, &c.
1656	10*d.*	Furnaces.
1657	3*d.*	Obtaining products from asphaltum.
1658	1*s.* 10*d.*	Machinery for spinning and doubling cotton, &c.
1659	5*d.*	Compasses.
1660	3*d.*	Rotary engine.
1662	10*d.*	Machinery for producing knitted fabrics.
1663	3*d.*	Laying submarine telegraphic cables.
1664	3*d.*	Separating the solid matter from sewage waters.
1666	3*d.*	Venetian blinds.
1670	3*d*	Cranes.
1678	7*d.*	Apparatus for regulating the flow of fluids.
1685	1*s.*	Apparatus for supporting and adjusting graving tools.
1686	3*d.*	Military cloaks, &c.
1929	7*d.*	Treatment of fibrous vegetable substances.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

Free Patent Museum and Library, South Kensington.

Numbers of Visitors for the Week ending 26th February, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Feb. 21	Monday -	285	737	1022—Fine.
„ 22	Tuesday -	153	663	816— „
„ 23	Wednesday	112	75	187— „
„ 24	Thursday*	110	—	110— „
„ 25	Friday -	137	—	137— „
„ 26	Saturday -	213	—	213— „
	Total -	1010	1475	2485

* Museum closes at 5 o'clock.

Total number of visitors since the period of free daily admission (12th May, 1858) to 26th February, 1859, —71,649.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. Woodcroft.

Great Seal Patent Office,
Southampton Buildings.

Gallery of Portraits of Inventors, Discoverers, and Introducers of Useful Arts. —This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 539. FRIDAY, MARCH 4, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2898. To ISAAC KETCHUM, of 59, Canning Street, Liverpool, in the county of Lancaster, Merchant, for the invention of "Improvements in the method of roasting meat, poultry, game, by basting the same, and in the method of manufacturing the necessary apparatus for so doing."

On his petition, recorded in the Office of the Commissioners on the 18th day of December, 1858.

200. To LOUIS AUGUSTE DROUIN, of No. 95, Rue Popincourt, in the city of Paris, Joiner, for the invention of "Improvements in covering joinery work with metals or metallic alloys, and apparatus for the purpose."

On his petition, recorded in the Office of the Commissioners on the 22nd day of January, 1859.

270. To JEAN JUSTIN ALBERT DE BRONAC and AUGUSTIN JOSEPH MARTIAL DEHERRYPON, Civil Engineers, of Paris, in the empire of France, for the invention of "A new or improved process for treating metallic sulphurets, phosphurets, arseniurets, antimoniurets, and particularly sulphuretted ores of lead, antimony, copper, silver, zinc."

On their petition, recorded in the Office of the Commissioners, on the 29th day of January, 1859.

284. To RICHARD NEEDHAM, of Dukinfield, in the county of Chester, Engineer, for the invention of "An improved water-gauge for steam boilers."

On his petition, recorded in the Office of the Commissioners on the 1st day of February, 1859.

336. To THOMAS RUSSELL AYERST, of Newenden, in the county of Kent, Bookkeeper, for the invention of "Improvements in breech loading guns and other fire arms."—A communication from abroad, by James Hunter Sears, of Brantford, in the county of Brant, Upper Canada.

On his petition, recorded in the Office of the Commissioners on the 5th day of February, 1859.

353. To WILLIAM WALLER, of Chesterfield, in the county of Derby, Mechanical Engineer, for the invention of "Improvements in agricultural or farm implements or apparatus."—Partly a communication from William Rogers, residing at Toronto, Canada West.

On his petition, recorded in the Office of the Commissioners on the 8th day of February, 1859.

368. To GEORGE BOWER, of Saint Neot's, in the county of Huntingdon, Gas Engineer, for the invention of "Improvements in apparatus for the manufacture of illuminating gas."

On his petition, recorded in the Office of the Commissioners on the 9th day of February, 1859.

376. To WILLIAM ADOLPHE COVERT, of Long Island, New York, in the United States of America, for the invention of "An improved self-acting railway switch."—A communication from Charles L. Spencer, residing at Rhode Island, U.S.A.

On his petition, recorded in the Office of the Commissioners on the 10th day of February, 1859.

386. To HENRY BRUCE, of Kinleith Mill, Currie, in the county of Midlothian, North Britain, Paper Manufacturer, for the invention of "Improvements in apparatus for the manufacture of paper."

On his petition, recorded in the Office of the Commissioners on the 11th day of February, 1859.

396. To CHARLES ROBERT MOATE, of 65, Old Broad Street, in the city of London, Metal Broker, for the invention of "Improvements in the manufacture of nuts, screws, bolts, spikes, and other headed fastenings." — A communication from

abroad, by Joseph Gibbs, of Alexandria, in Egypt, Gentleman.

On his petition, recorded in the Office of the Commissioners on the 12th day of February, 1859.

417. To Charles Lewis Roberts, of Clerkenwell, in the county of Middlesex, for the invention of "The manufacture of an improved cigar."

419. To Frederick Walters, of Sheffield, in the county of Yorkshire, for the invention of "The application of the waste heat from puddling furnaces."

421. To John Paterson, of Wood Street, in the city of London, Manufacturer, for the invention of "Improvements in brace buckles and loops, and in braces."

423. And to George Bedson, of Manchester, in the county of Lancaster, Manager for Messrs. Richard Johnson and Brother, Wire Manufacturers, for the invention of "Improvements in joining wire for telegraphic and other purposes."

On their several petitions, recorded in the Office of the Commissioners on the 15th day of February, 1859.

424. To Jean Furey Tourrier, of 41, Manchester Street, Manchester Square, Middlesex, for the invention of "Preventing oscillation of the last carriage of a railway train, and giving rigidity and steadiness throughout the train."

425. To Matthew Crawford, of Liverpool, in the county of Lancaster, Ship Chandler, Ship Painter, Ironmonger, &c., for the invention of "An improved anti-fouling metallic varnish, applicable to ships' bottoms and other similar purposes."

426. To Samuel Bailey, Mining Engineer, of Wednesbury, in the county of Stafford, for the invention of "Certain apparatus for preventing the skip in mine operations being pulled over the pulley on which the rope or chain works, to which such skip or cage may be attached, as well as preventing the skip or cage re-descending until put in motion for that purpose."

427. To Richard Cookson, of Layton Hawes, near Blackpool, in the county of Lancaster, Gentleman, and Charles William Homer, at Castle Hill, near Northwich, in the county of Chester, Civil Engineer, for the invention of "Improvements in machinery for making bricks, tiles, tubes, and other articles of plastic materials, and in the mode of jointing drain pipes."

428. To Charles Edward Wright, of Nottingham, Commercial Traveller, for the invention of "Improvements in means or apparatus employed in the nursing or treatment of infants."

429. To Richard Jennings Stevenson Pearce, of Fleet Street, in the city of London, Machinist, for the invention of "Improvements in weighing and dynamic machines."

430. To Pierre Marius Philip Bourjeaurd, of Davies Street, in the county of Middlesex, late Surgeon in the French Navy, for the invention of "An improved apparatus for supporting the womb."

431. To William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "An improved mowing machine or grass harvester."—A communication from abroad by John Peter Adriance, of the United States of America.

432. To Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "An improvement in the construction of brushes."—A communication from abroad by Ira W. Shaler, of the United States of America.

433. To William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improved machinery for making bricks."—A communication from abroad by Mr. A. Milch, of Berlin.

434. To William H. Horstmann, of the city of New York, in the county of New York, and the state of New York, U.S.A., for the invention of "Telegraphic cables, and the mode of constructing the same and laying them down."

435. To John James Russell, of Wednesbury, in the county of Stafford, for the invention of "Improvements in machinery used for heating and welding the edges of the plates used in the manufacture of cylinders and other articles."

436. To William Archdall O'Doherty, of 5, Eastcheap, in the city of London, for the invention of "An improvement in black lead pencils and pencil cases."—A communication from abroad, by Daniel Dunham Sweet, of Providence, Rhode Island, United States of America.

437. To Jules Seguin, Doctor of Medicine, of 4, Grande Rue de Gravelle à St. Maurice (Seine), France, for the invention of "Improvements relating to the employment of moving power arising from the tides and its application to manufacturing, agricultural, and other purposes."

439. To Joseph Breeden, of Birmingham, in the county of Warwick, Manufacturer, for the invention of "New or improved machinery for the manufacture of taps or stopcocks, and fittings for gas, steam, and water pipes."

440. And to John Eason, of Oxford Street, in the county of Middlesex, for the invention of "Improvements in apparatus applicable to tanning, dyeing, and obtaining extracts from vegetable, animal, and mineral substances."

On their several petitions, recorded in the Office of the Commissioners on the 16th day of February, 1859.

441. To Samuel Thomas Cooper, of Upper Clapton, Gentleman, for the invention of "Improvements in the use and application of artificial light."

443. To Henry Young Darracott Scott, of Brompton Barracks, Chatham, in the county of Kent, Captain in the Royal Engineers, for the invention of "An improvement in the manufacture of cement."

444. To Benoit Saillard, of Lamb's Conduit Street, in the county of Middlesex, Electrotyper, for the invention of "An improved mode of obtaining printing plates from collodion pictures."

445. To Pierre Edouard Fraissinet, of Paris, in the empire of France, Civil Engineer, for the invention of "A new or improved structure of iron, applicable for paving, flooring, bridges, gratings, girders, and other like purposes."

446. To Thomas Cattell, of 30, Euston Square, in the county of Middlesex, M.D., for the invention of "Improvements in treating and purifying gutta percha."

447. To Frederick William Emerson, of New Charlton, in the county of Kent, Mining Engineer and Metallurgical Chemist, for the invention of "Improvements in the treatment of certain ores of lead, and obtaining from them valuable primary and secondary products."

449. And to John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in apparatus for propelling and steering vessels and other floating craft."—A communication from John Eton, residing at Belleville, in the province of Upper Canada, Engineer.

On their several petitions, recorded in the Office of the Commissioners on the 17th day of February, 1859.

---

450. To John Jenkins Cole, of No. 24, Essex Street, Strand, in the county of Middlesex, for the invention of "Improvements in venetian and other suspended blinds, and in the method of hanging and working them."

451. To Charles Garton, of the city and county of Bristol, Brewer, for the invention of "An improved method of treating cane sugar, in order to render it fitter to be employed in brewing, distilling, and wine and vinegar making."

452. To Henry Swaisland, of 54, Great Sutton Street, Clerkenwell, in the county of Middlesex, Mathematical Instrument Maker, for the invention of "Improvements in box sextants."

453. To George Wallis, of Stretton, near Penkridge, in the county of Stafford, Artist, for the invention of "A new or improved method of engraving, applicable to the production of printing surfaces and the ornamentation of metallic and other surfaces."

454. To George Kammerer, of Lombard Street, in the city of London, Merchant, for the invention of "Improved gearing for gins or horse mills, applicable for grinding, winnowing, and other purposes requiring motive power."—A communication from abroad by Messrs. Lotz, of Pouancé (Main et Loire), France.

455. To William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improvements in emptying cesspools, and in raising other fluid and semi-fluid matters." — A communication from abroad by Pierre Théophile Joly, junr., of Paris.

456. To William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improvements in pressure gauges."—A communication from abroad by Louis Droissait, Mechanician, of Paris.

457. And to John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in the manufacture of textile fabrics, and in the machinery or apparatus employed therein."—A communication from Monsieur Amans de Chavagneur, residing at Paris, in the empire of France.

On their several petitions, recorded in the Office of the Commissioners on the 18th day of February, 1859.

458. To Pierre Antoine Joseph Dujardin, of the town of Lille, France, Physician, for the invention of "Improvements in the printing apparatus of railway telegraphs."

459. To Alphonse René Le Mire de Normandy, 67, of Judd Street, Brunswick Square, in the county of Middlesex, Analytical Chemist, for the invention of "Improvements in an apparatus for obtaining fresh water from salt water."

461. To William Clay, of Liverpool, in the county of Lancaster, Iron and Steel Manufacturer, for the invention of "Improvements in the manufacture of deck and other beams, and of angular and other bars of various forms."

463. To Samuel Wheatcroft, of Brudenell Place, New North Road, county of Middlesex, Engineer, for the invention of "Improvements in the method of, and the means for, uniting lace to blond and other fabrics, and also in the apparatus used for manufacturing or converting the same into bonnet and cap fronts, rouches, and such like similar articles of millinery."

464. To Charles Fréderic Vasserot, of 45, Essex Street, Strand, London, Patent Agent, for the invention of "An improved apparatus for manufacturing the strands of wire-ropes." — A communication from Jean Baptiste Pieux-Aubert, residing at Clermont-Ferrand (Puy des-Dôme), in the empire of France.

465. To Charles Frederic Vasserot, of 45, Essex Street, Strand, London, Patent Agent, for the invention of "An improved carding machine." —A communication from Victor Madeline Morin, residing at Athis, Orne.

467. And to Ferdinand Pierre Jean Van den Ouwelant, of Paris, France, Gentleman, for the invention of "Improvements in apparatuses to be applied to fire places for obtaining a more complete combustion of the fuel employed therein."

On their several petitions, recorded in the Office of the Commissioners on the 19th day of February, 1859.

---

468. To George Paul, of Glasgow, in the county of Lanark, North Britain, Mechanic, for the invention of "Improvements in spindles and flyers."

469. To Obed Blake, of Blackwall, in the county of Middlesex, for the invention of "Improved machinery or apparatus used in the manufacture of glass."

470. To Gilbert McCulloch, of the city of Manchester, in the county of Lancaster, for the invention of "Improvements in machinery or apparatus for spinning, doubling, and throwing silk, and doubling other fibrous materials."

471. To Thomas Wilson, of Birmingham, in the county of Warwick, Engineer, for the invention of "Improvements in the manufacture and construction of ordnance."

472. To Alfred Belpaire, Engineer, of the city of Brussels, in the kingdom of Belgium, for the invention of "Improvements in the reversing gear of locomotive and other steam engines."

473. To George Humphrey, of Deptford, in the county of Kent, Engineer, for the invention of "Improvements in meters for measuring fluids and gases."

475. To Robert Jobson, of Wordsley, in the county of Stafford, Ironfounder, for the invention of "Improvements in supplying water or other fluid to axletree boxes and other journal bearings to lubricate the same."

477. And to Richard William Johnson, of Oldbury, in the county of Worcester, Railway Carriage Builder, and William Stableford, of the same place, Manager, for the invention of "Improvements in axle boxes."

On their several petitions, recorded in the Office of the Commissioners on the 21st day of February, 1859.

479. To Thomas Smith, of Chatteris, in the county of Cambridge, Watchmaker, for the invention of "Floating wheels for driving machinery."

480. To William Soelman, of 3, Bennett Street, (W.), in the county of Middlesex, for the invention of "Improvements in the construction of propellers."

481. To Joseph Grimond, of the city of Manchester, in the county of Lancaster, Manufacturer, for the invention of "Improvements in the treatment and preparation of jute and other fibrous materials, and in machinery or apparatus employed therein."

482. To James Curtis, of Drury Lane, in the county of Middlesex, for the invention of "The manufacture of military sash net, and machinery to be employed therein."

484. To Joseph Hine, of Clerkenwell, in the county of Middlesex, Fancy Cabinet Manufacturer, for the invention of "An improved book slide."

485. To Edward Lund, of Manchester, in the county of Lancaster, Gentleman, for the invention of "Certain improvements in the manufacture of fabrics or textures to be used in the construction of umbrellas and parasols."

486. To Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Method of fixing tannin upon textile fibres, and the employment thereof in dyeing black and dark colors."—A communication from M. Verguin, residing at Lyons, France.

487. And to Thomas Richard Harding, of Leeds, in the county of York, Hackle Pin Manufacturer, for the invention of "Improvements in the manufacture of card surfaces to be used in preparing fibrous materials."

On their several petitions, recorded in the Office of the Commissioners on the 22nd day of February, 1859.

489. To Augustus William Smethurst, of Chorley, in the county of Lancaster, Cotton Spinner and Manufacturer, for the invention of "Improvements in machinery for driving looms for weaving."

491. To William Ashton, of Heaton Norris, in the county of Lancaster, Manager, for the invention of "Improvements in gas regulators."

493. To Uriah Scott, of Camden Town, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in carriages and various parts of the same, which parts may be applied to vehicles of any description."

495. To Samuel Rodgers Samuels, of Nottingham, for the invention of "Improvements in twist lace machines."

497. And to George Turnbull, of Calcutta, in the province of Bengal, in the East Indies, Civil Engineer, for the invention of "Improvements in the permanent way of railways."

On their several petitions, recorded in the Office of the Commissioners on the 23rd day of February, 1859.

Invention protected for Six Months by the Deposit of a Complete Specification.

Notice is hereby given that the petition of

524. François Brignoles, residing at No. 3, Duke Street, Adelphi, London, county of Middlesex, praying for Letters Patent for the invention of "The disinfection and rectification of alcohols, by the separation of the essential and other oils from the alcohol,"—a communication from Mr. St. Cyr Prieur, now residing in Avignon, Town, France,—was deposited and recorded in the Office of the Commissioners on the 28th day of February, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

4th March, 1859.

2006. William Henry Child, of Providence Row, in the county of Middlesex, Brush Manufacturer, for an invention of "Improvements in hair and skin brushes."—Dated 4th September, 1858.

2027. Bartholomew Hockin, of Gateshead Iron Works, Gateshead-on-Tyne, for an invention of "Apparatus for repairing and fitting dock gates and their machinery." — Dated 8th September, 1858.

2031. Andrew Lamb, of Southampton, and John White, of Cowes, for an invention of "Improvements in life boats."—Dated 8th September, 1858.

2041. John Rowley, of Grosvenor Terrace, Camberwell, in the county of Surrey, for an invention of "A new compound-material, applicable as a substitute for leather and leather-cloth, in the manufacture of various useful and ornamental articles."—Dated 9th September, 1858.

2059. William Toshach, of the Railway Works Bristol Road, Gloucester, in the county of Gloucester, Engineer, for an invention of "Improvements in pile driving machines." — Dated 10th September, 1858.

2066. Joseph Lester Hinks, of Birmingham, in the county of Warwick, Manufacturer, for an invention of "A new or improved tap or cock for drawing off and filtering liquids."—Dated 11th September, 1858.

2077. Joshua Turner, of Gresham Street, in the city of London, Hatter, for an invention of "Improvements in the manufacture of hats."—Dated 13th September, 1858.

2401. Giovanni Mariano Casentini and James Orme Barnard, both of Hercules Buildings, Lambeth, in the county of Surrey, Architectural

Modellers and Copartners in Trade, for an invention of "A certain composition to be used in the manufacture of articles composed of or made with plaster of Paris and other similar substances."—Dated 28th October, 1858.

2804. John Vickers Scarborough, of Belfast, in the county of Antrim, Ireland, Gutta Percha Boot Manufacturer, for an invention of "Improvements in apparatus for the manufacture of boots and shoes."—Dated 7th December, 1858.

2984. Hippolyte Charles Vion, of Paris, in the empire of France, Civil Engineer, for an invention of "A new mode of obtaining atmospheric electricity and terrestrial electricity, and its industrial applications, and in apparatus for the same."—Dated 30th December, 1858.

50. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in machinery or apparatus for boring or piercing rocks, applicable also to the dressing or working of stone, and as a power hammer generally." — A communication from Monsieur Germain Sommeiller, residing at Turin, in the kingdom of Sardinia, Engineer.—Dated 6th January, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 2nd March, 1859, inclusive.*)

28th February.

528. John Reading, of Birmingham, in the county of Warwick, Manufacturer, for an invention of "New or improved fastenings for attaching watch-keys, seals, watches, lockets, articles of jewellery, and ornamental articles of dress in general, to chains, and for securing the catches of brooches." —Dated 1st March, 1856.

534. Ferdinand Kaselowsky, of Bielefeld, in the kingdom of Prussia, for an invention of "Improvements in winding yarns and thread of flax and hemp in spinning and twisting machines."—Dated 1st March, 1856.

1st March.

567. Auguste Newburger, of 39, Rue de l'Echiquier, Paris, in the empire of France, and of 4, South Street, Finsbury, London, for an invention of "Extraction of oil from a vegetable substance not hitherto so used."—Dated 6th March, 1856.

2nd March.

543. John Edward Hodges, of Leicester, in the county of Leicester, Manufacturer, for an invention of "Improvements in machinery for the manufacture of looped and textile fabrics."—Dated 3rd March, 1856.

545. John Edward Hodges, of Leicester, in the county of Leicester, Manufacturer, for an invention of "Improvements in machinery for the manufacture of looped fabrics."—Dated 3rd of March, 1856.

FOREIGN PATENTS.

FRANCE.

Current List of Patents of Invention and Certificates of Addition.

1859.

(*Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.*)

Note.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

175. François Frédéric Thomas, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 17th October, 1855, for "A system of brushes."—Dated 13th January, 1859.

176. Henri Meyer, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 26th August, 1858, for "Improvements in power-looms."—Dated 13th January, 1859.

177. Janvier, senr. and junr., of 43, Rue du Temple, Paris, a Certificate of Addition to his Patent of 11th November, 1858, for "A sowing and planting machine."—Dated 13th January, 1859.

178. Hippolyte Bellident, domiciled Place et Hôtel Louvois, Paris, for "A kind of caloriferestove."—Dated 13th January, 1859.

179. Amand Pillichody, of 5, Rue de Marivaux, Paris, a Certificate of Addition to his Patent of 18th January, 1858, for "A machine for mortising wood, &c."—Dated 13th January, 1859.

180. François Joseph Cuvillier, of Arras, département du Pas de Calais, a Certificate of Addition to his Patent of 2nd October, 1858, for "A press with gearings."—Dated 10th January, 1859.

181. Louis Lefebvre, of 65, Rue des Bons-Enfants, Rouen, département de la Seine Inférieure, for "A kind of Venetian blinds and shutters of shops."—Dated 12th January, 1859.

182. Jules Renault, of Bolbec, département de la Seine Inférieure, for "An apparatus for feeding steam boilers, and for indicating their water-level." —Dated 14th January, 1859.

* For the French Patent Law see No. 228 of this Journal.

183. Eugène Decoprez, of 17, Rue St. Laurent, Rouen, département de la Seine Inférieure, for "Goffering ornamental designs on leather cloth."—Dated 14th January, 1859.

184. Pichot and Malapert, of Poitiers, département de la Vienne, a Certificate of Addition to their Patent of 9th September, 1856, for "Manufacture of tissue-paper for filters, &c."—Dated 14th January, 1859.

185. François Charles Bierlein, of Lingdsheim, département du Bas Rhin, for "A system of blast-pipes for forges."—Dated 14th January, 1859.

186. Emmanuel Verguin, of 36, Rue de l'Arbre-Sec, Lyon, département du Rhône, for "A mode of fixing tannine on textile fibres."—Dated 15th January, 1859.

187. Pierre Duchamp, of 17, Rue du Commerce, Lyon, département du Rhône, a Certificate of Addition to his Patent of 13th October, 1858, for "A system of continuous matches and a mechanical box for lighting the same, &c."—Dated 15th January, 1859.

188. Fabius Mainardi, of 21, Place Tholozan, Lyon, département du Rhône, for "A spinning wheel by means of which the thread is thrown and measured by the same operation,"—Dated 17th January, 1859.

189. Jean Gérard Jules Tenbrinck, of Rue des Tanneurs, Epernay, département de la Marne, a Certificate of Addition to his Patent of 23rd October, 1857, for "A self-acting smoke-consuming fire-place, &c."—Dated 17th January, 1859.

190. Pierre Aurèle Paquerée, of Castillon-sur-Dordogne, département de la Dordogne, a Certificate of Addition to his Patent of 18th January, 1858, for "An automatic apparatus called 'statmograph, &c."—Dated 18th January, 1859.

191. Turon and Miss Jeanne Casson, of Tarbes, département des Hautes Pyrénées, for "An hydraulic motor."—Dated 17th January, 1859.

192. Frédéric Comte, of Maizières-les-Toul, département de la Meurthe, for "A machine for sawing hard stone, &c."—Dated 18th January, 1859.

193. Constant Provins, of Valenciennes, département du Nord, for "An apparatus for heating by means of surfaces."—Dated 20th January, 1859.

194. Constant Provins, of Valenciennes, département du Nord, for "An apparatus for heating by direct action."—Dated 20th January, 1859.

195. Paul Bigorry, of 13, Rue du Loup, Bordeaux, département de la Gironde, for "Suspending lamps."—Dated 18th January, 1859.

196. Charles Louis Sircoulon, of Valentigny, département du Doubs, for "An apparatus called 'equipoised press,' applicable to spinning machines."—Dated 19th January, 1859.

197. Jean Renaud, of 14, Rue des Remparts, Bordeaux, département de la Gironde, for "A system of pumps worked by the speed of vessels."—Dated 19th January, 1859.

198. Calvin Fletcher, represented by Yapp, of 6, Rue Montpensier, Paris, for "A method of condensing steam, and of driving the heat and water of condensation or steam back into the boilers."—Dated 13th January, 1859.

199. Ernest Théodore Assegond, represented by Pagès, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of buttons."—Dated 13th January, 1859.

200. Louis Henry Pasquier, represented by Pagès, of 2, Rue Ste. Appoline, Paris, for "Improvements in the construction of iron chains for the purpose of preventing accidents."—Dated 13th January, 1859,

201. Adélaide Alexandrine Pouget, represented by Pagès, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of stoppers for perfumery articles."—Dated 13th January, 1859.

202. Vaillant, Marsillon, and Lemaire, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in apparatus for and means of preserving ice, fish, &c."—Dated 13th January, 1859.

203. Charles Ferdinand Achille Doucet, of 22, Rue Chapon, Paris, a Certificate of Addition to his Patent of 6th October, 1857, for "Pins, sets of gems, and jewellery, &c."—Dated 14th January, 1859.

204. Louis Henry Gloton, represented by Bresson, of 57, Rue de Bretagne, Paris, for "A shooting mechanism combined with a speaking doll."—Dated 14th January, 1859.

205. Evan Leigh, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "Improvements in machines for carding cotton and other filamentous substances."—Dated 14th January, 1859.—(English Patent, 9th February, 1872.)

206. Boitel and Boulanger, domiciled with Beluze, of 3, Rue Baillet, Paris, for "A system of mechanical lever."—Dated 14th January, 1859.

207. Fiaux and Gaudel, of 75, Rue Ménilmontant, Paris, for "A system of suspending lighting apparatus."—Dated 14th January, 1859.

208. Pierre Fosse, of 106, Route d'Orléans, Montrouge, a Certificate of Addition to his Patent of 8th December, 1858, for "Printed brick flagstones of baked clay."—Dated 14th January, 1859.

209. Jules François Victor Mouilleron, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An improved telegraphic apparatus."—Dated 14th January, 1859.

210. Jean Philippe, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 25th October, 1856, for "A dyeing process."—Dated 14th January, 1859.

211. Lauret and Palicaraki, the former of 136, Faubourg Poissonnière, the latter of 19, Rue d'Enghien, Paris, for "A filamentous substance."—Dated 14th January, 1859,

212. Désiré Valentin Monchicourt, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Penholders, pencil cases, &c. combined with a letter weigher,"—Dated 14th January, 1859.

213. Joseph Hippolyte Poyllain, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "So-called 'buckles with overlappings.'"—Dated 14th January, 1859.

214. Henry Schottlander, of 14, Rue Michel le Comte, Paris, a Certificate of Addition to his Patent of 26th June, 1858, for "Puzzle boxes and cases."—Dated 15th January, 1859.

215. Augustin Marie Herland, of 138, Rue Ménilmontant, Paris, a Certificate of Addition to his Patent of 31st July, 1858, for "A system of mounting straps on drums and pulleys."—Dated 15th January, 1859.

216. Jules Joseph Imbs, represented by Barrault, of 33, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 8th September, 1858, for "Manufacture of a tissue with waddings."—Dated 15th January, 1859.

217. Thomas Tertius Chellingworth, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A high-pressure steam-engine."——Dated 15th January, 1859.—(English Patent, expiring 8th July, 1872.)

218. Pierre Simon Bouet, of 40, Rue des Acacias, Montmartre, for "Using pumice-stone in the manufacture of smoking pipes."—Dated 15th January, 1859.

219. Léon Leméant, of 129, Rue de Sèvres, Paris, a Certificate of Addition to his Patent of 25th June, 1856, for "Converting weight into motive and centrifugal power."—Dated 15th January, 1859.

220. Aristide Cavaillé-Coll, of 94 et 96, Rue de Vaugirard, Paris, for "Improvements in the construction of organs,"—Dated 15th January, 1859.

221. Augustin Lejeune, of 57, Rue de la Marc, Belleville, for "An Archimedean motor."—Dated 15th January, 1859.

222. Chaudron and Co., represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Manufacture of artificial whalebone."— Dated 15th January, 1859.

223. Frédéric Sargent, represented by Bresson, of 57, Rue de Bretagne, Paris, for "A machine for making pins."—Dated 15th January, 1859.

224. Jean Baptiste Vital Boujut, of 9, Rue Ste. Appoline, Paris, for "A degrading apparatus for photographic printing."—Dated 15th January, 1859.

225. François Philippe Ferro, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in the manufacture of paper pulp."—Dated 15th January, 1859.

226. Abel Joseph Antoine Allié, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A machine for dividing rules and any instruments."—Dated 15th January, 1859.

227. Louis Julién Gastinne, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 5th March, 1853, for "Breech-loading guns."—Dated 15th January, 1859.

228. Louis Alexandre Trézel, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 31st May, 1856, for "A process for obtaining white, soft, and dry yeast."—Dated 15th January, 1859.

229. Alexandre Felix Ouarnier, of 45, Rue des Vinaigriers, Paris, a Certificate of Addition to his Patent of 27th November, 1858, for "Improvements in the manufacture of cartridges for breech-loading guns."—Dated 17th January, 1859.

230. Etienne Joseph Mathurin Galabrun, of 8, Rue Chartillon, Paris, for "Hollow plates for hydraulic presses."—Dated 17th January, 1859.

231. Victor Florian Duport, of 28, Place Royale, Paris, for "A luminous registering lamp-shade for billiard tables, exchanges, auction rooms, &c."—Dated 17th January, 1859.

232. Jean Aubine, of 30, Rue Grégoire de Tours, Paris, a Certificate of Addition to his Patent of 31st March, 1858, for "An electric clock-work with a double direction."—Dated 17th January, 1859.

233. Salomon Sturm, of 4, Rue Claude-Villefaux, Paris, for "A physical apparatus, called 'coffin.'" Dated 17th January, 1859.

234. Charles West, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in insulating and coating metallic wire."—Dated 17th January, 1859.—(English Patent, expiring 18th October, 1872.)

235. Charles Wye Williams, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in the means of increasing the generation of steam in boilers of locomotive and other engines."—Dated 17th January, 1859.

236. Joseph Croisy, of 76, Rue du Pré, Belleville, a Certificate of Addition to his Patent of 11th August, 1857, for "A machine for manufacturing bolts."—Dated 17th January, 1859.

237. Messrs. Cœuille, of 70, Rue Amelot, Paris, for "A divided registering circle, with a double sight, to be used as a counter in games."—Dated 17th January, 1859.

238. François Herfonse Léon Brisse, of 33, Quai Voltaire, Paris, a Certificate of Addition to his Patent of 20th January, 1858, for "A page (of dresses)."—Dated 17th January, 1859.

239. Armand Charles Messager, represented by Richard, of 45, Rue St. Sébastien, Paris, for "Manufacture of brush carpets in plain or cocoa colours, with frames of variegated colours."—Dated 17th January, 1859.

240. Louis Berthault, represented by Richard, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of parchment."—Dated 17th January, 1859.

241. Augustin Dieudonné Levasseur, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Moulding and ornamenting cameos and similar objects."—Dated 17th January, 1859.

242. Jean Bianchi, of 78, Rue du Temple, Paris, for "A water level."—Dated 18th January, 1859.

243. Frantz and Mary, of 27, Rue St. Louis en l'Isle, Paris, for "A system of wicks for composite and tallow candles."—Dated 18th January, 1859.

244. Benjamin Nicoll, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in circular saws and cutters."—Dated 18th January, 1859.

245. Hippolyte Gugnon, of 158, Grande Rue à la Chapelle, for "A system of balances."—Dated 18th January, 1859.

246. Jacques Marie Edouard Masson, of 3, Rue Monthabor, Paris, for "Submarine boats."—Dated 18th January, 1859.

247. Pierre Georges, domiciled with Lebreton, of 34, Rue Montagne, Paris, for "A polishing machine."—Dated 18th January, 1859.

248. Alexandre Vallet, of Jouy-sur-Mourin, département de Seine et Marne, for "An apparatus for manufacturing continuous paper."—Dated 17th January, 1859.

249. Jules Joseph Brebant, of Mouy, département de l'Oise, for "Covering roofs with scantling tiles."—Dated 18th January, 1859.

250. Landre, Gras, and Co., of 25, Cours Bonaparté, Marseille, département des Bouches du Rhône, a Certificate of Addition to their Patent of 27th May, 1858, for "A system of lighting by means of mineral substances."—Dated 19th January, 1859.

251. William Langshaw, represented by Zacharie, of 40, Rue de Bourbon, Lyon, département du Rhône, for "A system of looms or apparatus used in the manufacture of open-worked, knitted, or looped tissues."—Dated 19th January, 1859.

252. Jean Baptiste Martin-Gubrian, of Tarare, département du Rhône, for "A machine for sorting silk and other textile substances in skeins."—Dated 19th January, 1859.

253. The Anzin Mining Company, represented by Jean Lebret, of Denain, département du Nord, for "A system of coke-kilns for the manufacture of coke from smith's coal, and from a mixture of all kinds of coal."—Dated 20th January, 1859.

254. Louis Brunier, of 74, Rue de la Charité, Lyon, département du Rhône, for "A compressed air motor, with an ascending and successive pressure, whereby the primitive speed of the compressed air is doubled."—Dated 20th January, 1859.

255. Jean Antoine Bouchet, of St. Ambroix, département du Gard, for "Gutta percha hats for miners."—Dated 20th January, 1859.

256. Claude Porte, represented by Carpinetti, Place du Marché, Draguignan, département du Var, a Certificate of Addition to his Patent of 18th May, 1857, for "A distilling kitchen for vessels."—Dated 21st January, 1859.

257. Louis Charles Marie Lac de Bosredon, of 212, Cours Napoléon, Bordeaux, département de la Gironde, for "A calculating instrument."—Dated 21st January, 1859.

258. Jules Mary, of Sedan, département des Ardennes, for "A weaving machine."—Dated 22nd January, 1859.

259. Edmond Vincent Billiotte, of 17, Rue Notre-Dame, Troyes, département de l'Aube, for "A tinder-box with capsules."—Dated 22nd January, 1858.

260. Evrard, of Douai, département du Nord, for "Using reactive agents for purifying natural or artificial sugar-solutions."—Dated 22nd January, 1859.

261. Pierre Fillon, of Ste. Foy-les-Lyon, département du Rhône, for "A system of harness for looms."—Dated 22nd January, 1859.

262. Abraham Lindo, of 1, Rue St. Louis, Batignolles, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvemeuts in the manufacture of soap."—Dated 18th January, 1859.

263. Nicolas Ernest Théophile Petin, of 26, Rue des Bourguignons, Paris, for "A smoke-consuming grate."—Dated 18th January, 1859.

264. Louis Henry Poully, with Pasqualle, of 5, Rue de l'Echelle, Paris, for "A page of ladies' dresses."—Dated 18th January, 1859.

265. Jules François Victor Mouilleron, of 24, Place Dauphine, Paris, a Certificate of Addition to his Patent of 26th March, 1858, for "Improvements in electric telegraphs, &c."—Dated 19th January, 1859.

266. John Ahsbahs, domiciled with Faber, of 12, Boulevart de Strasbourg, Paris, for "A machine for grooving penholders."—Dated 19th January, 1859.

267. Louis Victor Leprince, represented by Vignes, of 31, Rue Mauconseil, Paris, for "Transparent foot coverings, called 'cameleon.'"—Dated 19th January, 1859.

268. Raveneau and Barbier, represented by Escoffier, of 8, Rue des Prouvaires, Paris, for "A composition called 'alabaster biscuit.'"—Dated 19th January, 1859.

269. Pierre Désiré Prudhomme, of 2, Rue St Martin, Paris, for "An indicating apparatus for exchanges and markets."—Dated 19th January, 1859.

270. Lion, Levy, and Compagnie (Société), represented by Léon, of 9, Rue du Reynaud St. Sauveur, Paris, for "Hygienic overshoes with concave heels."—Dated 19th January, 1859.

271. Constant Julien Prunier, of 2, Rue du Grand Hurleur, Paris, for "A musical liqueur-case."—Dated 12th January, 1859.

272. Jacques Juste Sandragné, of 8, Rue Grenier St. Lazare, Paris, for "A motor."—Dated 19th January, 1859.

273. Napoléon Jean Tronchon, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Construction of cast and wrought iron houses."—Dated 19th January, 1859.

274. Jacques Michel Beauge, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the constructiou of watering pots."—Dated 19th January, 1859.

275. Goubaud, Guyot-Delisle, and Thourel, of 8, Rue du Nord, Paris, for "A liquid for preserving the hair."—Dated 19th January, 1859.

276. Hippolyte Monier, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 5th November, 1855, for "Improvements in lighting apparatus."—Dated 19th January, 1859.

277. Jacob Levy and H. Simon, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Buckles without tongues, called 'imperial buckles.'"—Dated 19th January, 1859.

278. Hermann Schultz, represented by Tolhausen, of 35, Boulevart Bonne-Nouvelle, Paris, for "Improvements in work-bags, travelling bags, and similar articles."—Dated 19th January, 1859.

279. Augustin Placide Joseph Monnier, of 26, Rue Fontaine-au-Roi, Paris, for "A draining pump."—Dated 20th January, 1859.

280. Viellard-Migeon and Co., represented by Daubréville, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 6th February, 1858, for "An apparatus for feeding machines used in the manufacture of wood screws."—Dated 20th January, 1859.

281. Gerard Uhlhorn, represented by Daubréville, of 60, Boulevart de Strasbourg, Paris, for "A machine for grinding fillet-cards."—Dated 20th January, 1859.

282. Blanzot and Vanderbergh, the former of 8, Rue Thévenot, Paris, the latter of Passy, for "A system of heating."—Dated 20th January, 1859.

283. Jean Baptiste Antoine Monnier, domiciled with Foucault, of 1, Rue Réaumur, Paris, a Certificate of Addition to his Patent of 31st March, 1857, for "A machine for stopping railway trains, &c."—Dated 20th January, 1859.

284. Jean Claude Marie, of 61, Faubourg St. Denis, Paris, for "A system of registering."—Dated 20th January, 1859.

285. Paul Briolay, of 19, Rue Rambuteau, Paris, a Certificate of Addition to his Patent of 16th September, 1858, for "A break for carriages."—Dated 20th January, 1859.

286. Etienne Louis Gabaudan, of 17, Place Royale, Paris, a Certificate of Addition to his Patent of 11th November, 1851, for "A tangent comotor."—Dated 20th January, 1859.

287. Jean Jules Paillard, of 5, Rue des Vielles-Etuves, Paris, for "Rooms for mixing, bagging, and preparing flour for baking bread and pastry."—Dated 20th January, 1859.

UNITED STATES OF AMERICA.

(*Communicated by the Commissioner of Patents.*)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 15th February, 1859, and each bearing that date.

No. 22,924. Geo. C. Aiken, of Nashua, N. H., for an "Improvement in bee-hives."

"I do not claim the invention of a hive having a main chamber placed between a feeding chamber and one or more honey boxes; but what I do claim, is, the arrangement of the boxes G, G¹, H, H¹, in the hive so as to form, with the case thereof, the auxiliary or bell glass chambers K, K, K, K, in manner as described."

No. 22,925. Joseph Armstrong, of Woburn, Mass., for an "Improvement in treatment of hides and skins."

"What I claim is, the above described improvement on my herein-before mentioned patented process of treating hides, or, in other words, I claim, in combination with the application and use of a press, in connection with the impregnation of the hide with grease, by a peglined cylinder, or any equivalent means, the employment of scraps of hide, or other suitable absorbents, in the press and against the edges and other necessary parts of the hides, and so as, during the operation of the press, to absorb the liquor from such edge or parts on or in which it would be likely to remain, as specified."

No. 22,926. H. H. Baker, of New Market, N. J., for an "Improved arrangement of the feed roller in wood planing machines."

"I do not claim the cutter wheel or disk F in itself considered, nor do I claim the adjustable gauge J, for they have been previously used; but having thus described my invention, what I do claim as new, and desire to secure by Letters Patent, is, arranging the feed roller N, substantially as shown, to wit, connecting it with a vibrating shaft K, box L, slide O, spring P, and with necessary gearing, so that said roller may be kept to the work, or moved out free from it without stopping the working or running parts of the machine."

No. 22,927. Frederick H. Bartholomew, of New York, N. Y., for an "Improvement in hydrauts."

"Having described my improvements, what I claim as my invention, and desire to secure by Letters Patent, is, first, I claim the combination of the valve E, with the main valve and its fixed valve seat C, the whole constructed, arranged, and operating substantially as and for the purposes described. Second, I claim the arrangement of chamber "D," "D," within the trunk of the hydrant surrounding the seat of the main valve, having a waste passage at the bottom, substantially as and for the purposes described. Third, I claim the arrangement of the waste passage, the waste plug and rod in combination substantially as and for the purposes described."

No. 22,928. Moses Bales, of Big Plain, Ohio, for an "Improvement in mole plough."

"What I claim as my invention, and desire to secure by Letters Patent, is, the adjustable mole ploughs (D, d, d^1, d^{11}, g, g^1, e,) upon a cutting shaft (A), arranged and operating substantially as and for the purposes set forth."

No. 22,929. Chas. E. Bishop, of Brooklyn, N. Y., for an "Improvement in reefing and furling sails."

"I claim, firstly, the employment of supplementary sheets to the top-sails and other upper square sails of a vessel, in order that said sails may be kept more "flat," and that the strain upon the ends of the yard may be lessened, as set forth. Secondly, I claim constructing "top sails" in the manner herein described, that is to say, with supplementary sheets, clew-lines and leech ropes, and with a central tackle, by the employment of which, in due order, as set forth, the "top sail" may be reduced and secured in successive portions, substantially as described."

No. 22,930. Isaac W. Bragg, of Cincinnati, Ohio, for an "Improved carpet stretcher."

"I claim as new, and of my invention herein,—1st, the dog E, e, operating substantially as described, to attach the stretcher to that part of the floor next the wall, toward which the carpet is to be stretched. 2nd, the combination and arrangement of the trip lever F, for disengaging the dog, as set "forth." 3rd, the combination and arrangement of the apron C, feet B, and slides G, operating substantially as described, in combination with the rake H, to prevent the teeth h from grazing the floor. 4th, the combination and arrangement substantially as set forth, of the stock A, dog E, e, driver H, I, K, and actuating worm M, operating in the manner and for the purpose explained."

No. 22,931. Joseph H. Brinton, of West Chester, Pa., for an "Improved method of operating yielding feed rollers."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to

secure by Letters Patent, is, a pair of feed rolls, one of which is yielding, and both driven by the same screw shaft, and in gear with it at all times, substantially in the manner herein described."

No. 22,932. Thos. W. Brown, of Boston, Mass., for an "Improvement in skates."

"I claim the rocker and angular heel or straight edge runner, made substantially in manner as described, and applied to the bearing plates or their equivalent, so as to be capable of being reversed with respect to the same, and used with either edge downward as may be desirable. I also claim the application of the heel plate to the heel screw, so as to be adjustable on or with reference thereto, substantially in manner and for the purpose as described."

No. 22,933. James D. Bruner, of Alton, Ill., for an "Improvement in stoves."

"What I claim as new, and desire to secure by Letters Patent, is,—1, connecting and arranging with an oven which has no bottom, and between which and the passages of the products of combustion, there is no communication, and the fire box of the stove, air chambers or cells, as and for the purposes herein set forth; and 2d, combining with a detachable grate surface, the detachable air cells, or chambers as herein described."

No. 22,934. S. S. Burlingame, of Warwick, R. I., for an "Improvement in instruments for threading needles."

"What I claim as new, and desire to secure by Letters Patent, is, the needle threader, consisting of an internally barbed elastic pronged fork, substantially as herein described."

No. 22,935. Adam Scott Cameron, of New York, N. Y., for an "Improved cut-off valves for steam engines."

"What I claim as my invention, and desire to secure by Letters Patent, is, the employment of the trip hinged valves, with their hook rods and appendages for operating them, or the equivalents thereof, substantially as described, in combination with the slide valve, substantially as described, for cutting off the steam in steam engines, as described. I also claim, in combination with the slide and the trip hinged valve, operated substantially as described, the so-forming the seat of the slide valve, relatively to the steam passages in the slide valve, substantially as described, as to admit the steam to the under face of the hinged valve, and balance the pressure before they are opened. I also claim, in combination with the slide and tip hinge valves, combined and operating substantially as herein described, the employment of the adjustable cone, or its equivalent, substantially as described, to regulate the period of cutting off the steam, as described. And I also claim the cone, or its equivalent, in combination with the eccentric tube, or its equivalent, substantially as described, as a means of adjusting the relative periods of closing the two valves, as set forth."

No. 22,936. Daniel Clow, of Janesville, Wis., for an "Improvement in harvesters."

"Having thus fully described my improved harvesting machine, what I claim therein as new, and desire to secure by Letters Patent, is, constructing the main supporting wheel thereof in such a manner as to form therein an outer and an inner zig-zag groove; but this I only claim, when the said grooves have differently proportioned reaches, and bear such a relation to the T-headed sliding bar *n*, and the other parts of the machine which are connected with said bar, and with the cutting apparatus, that the number of the movements imparted to the cutter bar can be varied at pleasure, by shifting the bearings of the said sliding bar *n*, from one position to another, substantially as herein set forth."

No. 22,937. Henry Cogswell, of Greenwich, N. Y., for an "Improvement in hames."

"What I claim as my invention, and desire to secure by Letters Patent, is, the application of the shifting slide t hames as they are now used, by means of which slide the point and position of the draft of the hames can be altered as desired."

No. 22,938. Benjn. Cole, of Brooklyn, N. Y., for a "Pen-holder."

"What I claim as my invention, and desire to secure by Letters Patent, is, the construction of a pen-holder, with three or more elastic shanks or fingers (*b*), so arranged that the spring of said fingers will hold the pen, by pressing it against and under the shoulders (*c*) of two lateral fingers, and thus admit the introduction of and be adapted to pens of any ordinary size or thickness."

No. 22,939. John B. Cornell, of New York, N.Y., for an "Improvement in fire-proof floors."

"What I claim as my invention, and desire to secure by Letters Patent, is, constructing a fire-proof foundation upon a series of wooden girders, for the reception of a flooring surface formed of boards or other suitable materials, substantially as herein set forth."

No. 22,940. Frederick Curtis, of Saugus Centre, Mass., for an "Improvement in breech-loading fire-arm."

"When a breech slide is used in connection with the barrel of a fire-arm, I claim a movable breech, separate from the breech slide, and arranged and applied therein so as to be adjustable to the rear end of the barrel, substantially in manner and for the purpose as described. I also claim the arrangement of the priming nipple and the touchhold thereof, with respect to the movable adjustable breech applied to the breech slide, as specified, or with respect to the same, and a primer arranged in the stock, substantially as explained, such arrangement being productive of advantages as herein-before enumerated."

No. 22,941. Augustus B. Davis, of Philadelphia, Pa., for an "Improvement in rail road car springs."

"I wish it to be understood that I lay no claim to any specific part or any particular device, when viewed as disconnected from the entire spring; but I claim, as a new and useful article of manufacture and merchandize, the entire railroad car spring herein described, that is to say, a spring composed of a box or casing, with a lid attached to the same, by means of a bolt or bolts, the said box containing a number of spiral springs, confined longitudinally between the bottom of the box and the lid, and retained in their proper position, laterally, by means of lugs, or other suitable devices, the said lid having a limited movement in the direction of the springs, but having no lateral movement independent of the box, so that each spiral spring may be independent of the other, although the whole act in combination, the entire spring thereby retaining its elasticity, even should one or more of its spiral springs be broken or damaged."

No. 22,942. John C. F. Deecken, of New York, N. Y., for an "Improvement in shoe lasts."

"I do not limit myself to the particular shape of the endless chain, the wheel, or the knives; but what I claim as my invention, and desire to secure by Letters Patent, is, the endless chain or band, in combination with a knife or knives, operated in the manner and for the purpose substantially as described."

No. 22,943. Chas. de Saxe, of New York, N. Y., for an "Improvement in umbrella fastenings."

"I am aware that catch bolts operated by means of springs and having knobs or projections to depress them, have been used to support and fasten hinged or jointed rod, such rods being also connected by tubular hinged joints, and therefore I do not claim generally the use of bolts to fasten such rods, or the use of a tubular hinged joint to connect them; but what I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the bolt *a*, substantially as described, operating without springs, and by a double or sliding and rotating motion, in combination with the tubes or sockets B, B, for the purposes set forth."

No. 22,944. Martin D. Elsom, of Howardsville, Va., for an "Improvement in the mode of squeezing and straightening tobacco."

"Having thus fully described the nature and object of my invention, and shown how the same is effected, what I claim therein as new, and desire to secure by Letters Patent, is, squeezing and straightening bundles of tobacco, with a view to their being afterwards 'struck,' by passing them through a straightening and compressing mechanism, substantially such as herein represented."

No. 22,945. John U. Fiester, of Winchester, Ohio, for an "Improved churn."

"Having thus fully described the construction of my invention, what I claim as new, and desire to secure by Letters Patent, is, the adjustable dasher, constructed with two blades D, yoke spring E, cross tie F, with slots *a*, and pins *b*, together with holes *f* and air cavities *d*, operating substantially as herein set forth and described."

No. 22,946. Wm. P. Ford and Theodore Ford, of Concord, N. H., for an "Improvement in cultivator teeth."

"Claim.—What we claim as our invention, and desire to secure by Letters Patent, is, the above described cultivator tooth formed substantially as specified."

No. 22,947. Daniel P. Foster, of Shelburne Falls, Mass., for an "Improved wrench."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, making the hinge joint between the stationary and movable jaw of the wrench at *a*, viz., by the projections *c* on the stationary jaw and the depression *c* in the washer, that is, on the shank of the movable jaw, for the purpose of allowing the movable jaw to change its position in relation to the stationary one, as herein set forth and for the purpose explained."

No. 22,948. Geo. Gilmour, of Chelsea, Mass., for an "Improvement in shackle of telegraph cables, &c,"

"I do not claim a chain shackle, such as I have heretofore patented, as made with a spring forked pawl or catch, to operate with a friction roller; but what I claim is, the telegraph cable or rope shackle, as constructed, with one or more jaws and mechanism to operate the same, substantially as described. I also claim combining either the wing *l* or the knife *m*, or both, with the shackle, so as to operate therewith, in manner and for the purpose or purposes as specified."

No. 22,949. Geo. Hammer, of Philadelphia, Pa., for an "Improved cork cutting machine."

"Having now described the nature of my invention, I wish to be understood, that I do not desire to confine myself to the described construction and combination of the parts in every minutia; but what I claim, and desire to secure by Letters Patent, is, the herein described arrangement of guiding rollers O and P, and sliding wedg S, or their equivalents, in combination with the stop *s*, the whole being constructed and operating substantially in the manner and for the purpose set forth."

No. 22,950. Gorges Hely, of Laporte, Ind., for an "Improvement in horse power equalizer."

"Having thus fully described my invention, what I claim therein as new, is,—First, connecting the eveners G, I, by a rope or chain that passes over a pulley at the centre of the shaft A, substantially as described. I also claim, in combination with the eveners, the method of connecting the points or parts to which the horses are hitched, and by which they draw by means of a system of ropes or chains, and pulleys, connected with the draft bars, substantially as herein described."

No. 22,952. W. W. Hopkins, of Amelia, Ohio, for an "Improved method of lighting gas by galvanic electricity."

"I do not claim broadly the letting on of gas to burners by electricity, or the lighting of gas by heat generated in a platinum wire by a current of electricity passing through it; but what I claim as my invention, and desire to secure by Letters Patent, is, the arrangement and combination of the hollow permanent magnet A, valve chamber C, coil F, electro-magnetic valve E and tube D, as and for the purpose herein shewn and described."

No. 22,953. Moses G. Hubbard, of Penn Yan, N. Y., for an "Improvement in harvesters."

"Having thus described my improvements in mowing machines, what I claim therein as new, and desire to secure by Letters Patent, is, connecting the cutting apparatus with the machine by an adjustable attachment, which can be changed from a free hinge to a joint, rigid in one direction, or in both directions, for the purposes and in the manner substantially as set forth. I also claim the employment of a raising lever of the second order with a gradually increasing purchase, by which it is made self-sustaining; and I claim keeping the lever in a convenient position for operation by the hand of the driver by means of a spring, substantially as and for the purpose specified."

No. 22,954. Wm. Huey, of Christiana, Pa., for an "Improvement in elevator for window sashes."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is the arrangement and combination of the rods E, E, pawls (*f*), ratchets (d^{11}), loose drums (*c*, *c*^{1}), sliding shaft D, pins (*d*, *e*,) and cords (*b*, *b*,) as and for the purpose herein shown and described."

No. 22,955. Saml. Huse, of Chicago, Ill., for an "Improved rotary engine."

"What I claim as my invention, and desire to secure by Letters Patent, is, the cams E, E^2, with their steam and exhaust ports, in combination with the heads *m*, m^2, pistons *n*, n^2, and cylinder C, operating in the manner, substantially as herein set forth."

No. 22,956. John Jameson, of 10, Catharine Terrace, Gateshead, county of Durham, England, for an "Improved apparatus for compressing elastic fluids."—Patented in England 13th March, 1858.

"Having now described the nature of my invention, and the manner of performing the same, I would have it understood that I claim as my invention, is, the compression and expansion of acriform fluids by an apparatus of the nature herein described, the same consisting of a combination and arrangement of a series of cylinders, or vessels perforated or tubular pistons, induction and connecting pipes, valves, a reservoir, a rotary shaft and means of heating, or heating and cooling the cylinders or vessels, the whole being constructed and made to operate in manner and for the purpose substantially as herein described."

No. 22,957. Theodore T. S. Laidley, of U. S., Army, for an "Improvement in tape primer for fire-arms."

"Having thus explained the essential features of my invention, the manner of making it, and the advantages that it possesses over all others now known, what I claim as my invention, and as distinguished from all other primers before known, is, the combination of two different materials in the manufacture of tape primers, one a metal or like substance to receive and protect the percussion powder, into which it can be firmly pressed, and the other to connect the former into a series, something that can be easily severed by the edge of the hammer."

No. 22,958. Richd. S. Lawrence, of Hartford, Conn., for an "Improvement in adjustable sight for fire-arms."

"I am aware of the construction of a sight by connecting an elevator with the barrel, or with a fixed and inflexible base, firmly secured to the barrel by a hinge, socket, or other joint; all of which I disclaim; what I claim as my invention and desire to secure by Letters Patent, is, the application of said hinge joint to the spring base and elevator, constructed and arranged substantially as described."

No. 22,959. G. A. Lilliendahl, of New York, N.Y., for "Burglar alarm."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement of the slide C and plate A with the lips *c* and *b*, so that a cartridge placed on the slide, and between the two lips, is exploded by pushing the slide in substantially as and for the purpose specified."

No. 22,960. S. N. Lennon, of Deposit, N.Y., for an "Improvement in R. R. signal lanterns."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, suspending within the lantern A, at two opposite sides, and over or behind the colorless glass plates *a*, *a*, the frames C, C, provided with the colored glass plates *c*, *d*, and arranged as shown, or in an equivalent way, to operate as and for the purpose set forth."

No. 22,961. Clark Marsh, of New Milford, Conn., for an "Improvement in sewing machines."

"What I claim as my invention, and desire to secure by Letters Patent, is, the ring gauge D, E, with its pins *c*, *c*, *c*, spring *d*, and cam *e*, or their equivalents, constructed and applied in combination with the slide ring B, C, substantially as and for the purpose herein set forth."

No. 22,962. James F. Martin and Henry C. Nicholson, of Mount Washington, Ohio, for an "Improvement in preserve cans."

"We do not claim, broadly, the construction of a hermetically-sealed fruit or provision can, nor do we claim coating vessels with vitrious enamel, both being well known and in common use; but we claim as a new and useful article of manufacture, a fruit or provision can, to be hermetically sealed, constructed of metal, lined on the inside with a vitrious enamel, capable of withstanding the action of the acids contained in the fruits, &c. to be preserved, substantially in the manner set forth. We also claim the combination of a metallic cover, vitriously enameled on the inside, with a fruit or provision can, substantially as set forth."

No. 22,963. DAVID N. MARTIN, of Lawrence, Mass., for an "Improvement in stoves."

"I claim the arrangement of the air register G at the upper part of the ascending discharge flue E, and with respect to the direct damper F, substantially as described and represented, the ascending discharge flue being arranged between the two descending flues of the stove case, substantially as set forth."

No. 22,964. JOHN M. MAY, of Janesville, Wis., for an "Improvement in windmills."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, a standard D, arranged in the head *a* of the framework, and so construct that it serves as a guide for the central vertical shaft B, receptacle for gear E, or gear E^1, or gear E^2, support and axis, for the horizontal axle or shaft of the wind wheel, and as a guide for the sliding thimble O, substantially as and for the purposes set forth. 2nd, furnishing each of the stems of the sails with a cogged segment, for the purpose of revolving the sails on their radial axes, the segments being operated by cogged rack bars attached to the sliding thimble K, substantially as and for the purposes set forth. 3rd, the arrangement consisting of the main governor and the forked adjusting rod N, connected with each other, for the purpose of operating the thimble O in regulating or controlling the wind wheel, as set forth. 4th, providing each of the stems of the sails with a weighted arm projecting forward of the front surface of the sails for the purpose of governing the velocity of the wind wheel by regulating the obliquity of the sails to the wind current, substantially as set forth. 5th, the covering made in two sections, which are constructed and arranged as shown, the tubular section T revolving with the wind wheel independently of section S, when the windmill moves in the path of a vertical circle, and with it when the wind wheel moves in the path of a horizontal circle, as and for the purposes set forth."

No. 22,965. JOHN M. MAY, of Janesville, Wis., for an "Improvement in windmills."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the peculiarly constructed stationary central vertical shaft A, in combination with the peculiarly constructed revolving tubular shaft or hollow column B, the shaft A providing axes for the wind wheel and the tubular column B to revolve upon in the paths of horizontal circles, and serving as a support and guide of the structure of the wind wheel, and the tubular column B serving for receiving the power of the wind wheel and transmitting it to machinery, substantially as set forth. 2nd, enlarging the axle C at its shoulder in the form of a hub or pipe box *c*, that the axis *d* of the shaft A may pass up directly through it, so that the center of the axis of the shaft A and axle C intersect and in themselves form vertical and horizontal center bearings within the angle formed by the gear wheels D and E, and the shaft A and axle C also serve as bearings for the gear wheels, substantially as and for the purposes set forth. 3rd, the combination of the horizontal lever S, the vertical governing rod or bar Q, guide bar R, and thimble G, on the tubular column, substantially as and for the purposes set forth. 4th, the employment of a revolving conical cover for the purposes of protecting the mechanism of the wind wheel and dividing the wind current at the front and center of the wind wheel head and guiding it upon the sails, and relieving the weighted elbow levers used for revolving the sails on their radial axes of the countervailing influence of the wind current, so as to enable them to act by centrifugal force with certainty in governing the velocity of the wind wheel, substantially as set forth."

No. 22,966. JOHN MCCOLLUM, of New York, N. Y., for an "Improved cracker machine."

"1st, I claim, in combination with the carrying apron B, the roller A, with its doffer F, or the equivalent thereof, and the supporting or feed roller D, and supporting table C, or their substantial equivalents, in the combination, the rollers and apron moving with simultaneous intermittent progressive motion, the whole being so arranged and operated, substantially as herein-before set forth, described, and shown, so as to progressively flat pellets of dough suitable for crackers, ship biscuit, and similar articles placed in proper order upon the apron and at suitable distances from each other, to permit of the extension of diameter resulting from the operation as they pass under the roller A, without materially disturbing the order of their arrangement on the apron. 2nd, I claim the reciprocating docker, in combination with the carrying apron, bed, and stationary perforated clearer plate, substantially as herein-before described, and substantially for the purposes herein-before set forth, and with or without adjustable springs in combination therewith, to make yielding pressure at the docking point, substantially as herein-before described. 3rd, I claim the flatting apparatus, as herein-before set forth and described in the specification and in the first claim, when combined with or used in combination with a docking apparatus, such as is herein-before set forth and described in the specification and in the second claim, or the substantial equivalent thereof, when used, combined, and operated for the purpose of docking flatted pellets of dough for crackers as they are progressively brought to and under the docker from the flatting apparatus without materially disturbing the order of their arrangement on the apron, substantially as herein-before set forth and described."

No. 22,967. W. A. MCDONALD, of Mott Haven, N. Y., for an "Improved dovetailing machine."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the cutter head D formed of a screw thread *g* on a cylinder *f*, the screw thread being provided with cutters *h*, and arranged substantially as described and for the purpose set forth."

No. 22,968. GORDON MCKAY, of Boston, Mass., for an "Improvement in printing presses."

"Claim.—The combination of an impression cylinder and nippers operating in conjunction with a blast pipe or mechanical means for producing an inequality of atmospheric pressure on the sheet, when released by the nippers, and as said sheet is forced onwards by or with the impression cylinder in its rotary movement, substantially in the manner and for the purpose set forth."

No. 22,969. HENRY H. MCKINNEY and FREDERIC GOTH, of Biddeford, Me., for an "Improvement in repeating fire-arms."

"We do not claim a fire-arm constructed, not only with its nipples or primers arranged one in advance of the other on the barrel, but with a lock having a hammer or striker to operate with each nipple or primer; but we claim the combination of two strikers, one trigger, and a mechanism which will not only enable each striker to be set to and maintained at full cock, but, by retraction of the trigger, will cause both strikers, when at full cock, to be discharged or set free consecutively, so as to be forced against their respective nipples or the percussion caps, or priming thereon, or the equivalents of such, and cause explosion of the priming of the charges, in the order as specified. We also claim the above specified application of the lock case, with respect to the barrel, in combination with the construction and arrangement of the trigger rod or slider in separate parts, and in such manner as to be capable of being locked together, and of being unlocked or disconnected, under circumstances as specified. We also claim the application and arrangement of the two main springs of each striker in the lock case, as explained. We also claim the combination of the trigger slide F and the lever sears arranged and operating with respect to the two strikers, as specified."

No. 22,970. JOHN O. MEAD, of Philadelphia, Pa., for "Improved cruets or bottles for castors."

"I do not desire to confine myself to the use of four bottles or cruets, only, inasmuch as more or less than that number, may be adapted to each other, and comprised within a small compass, in the same manner as the four; but I claim, and desire to secure by Letters Patent, constructing the cruets or bottles of cruet stands so that they may be adapted to each other and to the stand, substantially as herein set forth, and for the purpose specified."

No. 22,971. THEODORE S. MINNISS and THOS. S. MINNISS, of Meadville, Pa., for an "Improvement in preventing friction on axles."

"What we claim as our invention, and desire to secure by Letters Patent, is, the employment of sectors to avoid friction on rolling or sliding surfaces, substantially as set forth. We also claim the combination of the shaft, sectors, and their adjusters, the whole being arranged, constructed, and operating substantially as described."

No. 22,972. A. R. MORRILL, of Northfield, Vt., for an "Improvement in wheels for railroad carriages."

"I do not claim the interposition of wood between the hub and rim of railroad wheels, when the wood is arranged in tapering blocks, the grain of which runs radially of the wheel; neither do I claim any wheel having a wrought-iron rim or tire, as such wheel would by no means attain the ends which I have in view; but what I caim as my invention, and desire to secure by Letters Patent, is, a wheel for railroad purposes having a cast-iron hub and rim, and a body of wood formed of double plates, as described, and secured to the hub and rim by bolts, as set forth."

No. 22,973. JOHN NICHOLSON, of Alleghany, Pa., for an "Improvement in retorts for distilling oils from coal."

"I do not confine myself to any particular number or to any peculiar form of the agitators, or to any number of shafts

armed with agitators, as three or more shafts may be arranged as represented in Figure 5, marked (*m*); nor do I confine myself to any particular manner of arranging the agitators, or the shaft or shafts; neither do I claim a revolving or oscillating retort; but what I do claim as of my invention, and desire to secure by Letters Patent of the United States, is,—First, furnishing retorts used for extracting the oleaginous matter from coal and other substances with agitators, or a shaft or shafts armed with agitators, as herein described and for the purpose set forth. Second, in so arranging the supply and discharge openings and the exit pipes in connection with the trunnions, that when one portion of the retort is weakened by the action of the fire another part may be exposed to it, as herein described and represented."

No. 22,974. Edwd. Nugent, of Brooklyn, N.Y., for an "Improvement in machine for making bullets, &c."

"Having now fully described my invention and its operation, what I claim as new in the manufacture of buck shot and balls, and desire to secure by Letters Patent, is,—1st, the revolving self-cutting mould E, E, working in contact with the mouth D of the lead kettle, through which the cavities *e*, *e*, are supplied with metal, substantially in the manner and for the purposes above set forth. 2d, I claim the end motion of the two series of mould rings E, E¹, and the opening and closing of the several rings in one series while the cavities in the other series are being filled, substantially as above set forth. 3d, I claim the tumbling bars, or their equivalents, operating substantially as described, by which a concussion is produced when the mould rings are opened, and allowance is made for any obstruction between the rings when closed, as within set forth."

No. 22,975. N. B. Pratt, of Deep River, Conn., for an "Improved carpet sweeper."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the rotating brush on adjustable swinging lever bearings G, in combination with an elastic driving belt H, substantially as and for the purposes set forth."

No. 22,976. Clark S. Putnam, of New York, N.Y., for an "Apparatus for vulcanizing caoutchouc."

"What I claim, and desire to secure by Letters Patent, is, the combination of the boiler A, the vulcanizing chest B, and the condensing chamber G, constructed, arranged, and operating substantially in the manner described; the same constituting a portable automatic apparatus for the purposes specified."

No. 22,977. B. F. Ray, of Baltimore, Md., for an "Improvement in harvesters."

"Having thus fully set out the construction and operation of my invention, what I claim as new, and desire to secure by Letters Patent, is, the conical roller, in combination with the cam-groove, for actuating the means that operate the cutter-bar."

No. 22,978. Jesse Reed, of Marshfield, Mass., for an "Improved windlass."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the windlass drums D, E, pawls *f*, *g*, with the wheel F and knee or Sampson post H, whereby the central wheel F is supported on both sides, and the windlass rendered more simple and sure in its action, substantially as described."

No. 22,979. Adolphe Roesler and Chas. Frey, of Warsaw, Ill., for a "Pocket match-box."

"Having now described our invention, what we claim as new, and desire to secure by Letters Patent, is,—1, the cylinders A and B, provided with stripes *a* and *e*, and spring *d*; 2, tube E provided with spring O, the whole being arranged substantially as described, and for the purpose specified."

No. 22,980. Amos A. Richards, of Urbana, Ohio, for an "Improvement in locks."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the wheels *a* and *a*¹, with their rings *x* and *x*¹, and the spring *c*, and slides *c*, for producing friction between them, and the arrangement of the bolts B and its stems *o* and *o*¹, and the use of the hands *h* and *h*¹, and dial *d*, by which the principle of the above friction wheels and rings is applied to this lock, as above described. And I also claim the arrangement of the eccentric E, brake K, brake lever L, check bolt C, and catch *e*, by which the pressure of the stems *o*, *o*¹, on the rings *x*, *x*¹, simultaneously with the revolution of the hands *h*, *h*¹, and rings *x*, *x*¹, is prevented, as above described. And I further claim the manner or arrangement above described, of revolving the dial *d*, by removing the screws L, L, as above detailed."

No. 22,981. Gelston Sanford, of Poughkeepsie, N.Y., for an "Improved steam-engine."

"Having thus fully described my improved engine, what I claim as new, and desire to secure by Letters Patent, is,—I claim the inside head H, in combination with the cross head E, and elongated cylinder A, B, when constructed and operated in the manner and for the purposes above specified, as an article of manufacture."

No. 22,982. Joseph Saxton, of Washington, D. C., for a "Mode of sealing letters, &c."

"I am aware that impressions have been made upon fusible metal, for the purpose of copying devices; this I do not claim. What I claim as my invention, and desire to secure by Letters Patent, is, the process of sealing, by means of fused metal or alloy, whereby the impression is made and the seal secured simultaneously, substantially as above described."

No. 22,983. Geo. Shone, of St. Louis, Mo., for an "Improved machine for punching railway bars."

"I do not claim, broadly, the employment or use of cams for operating punches, for cams are a well-known mechanical device, and have been previously used for the same and analogous purposes; but, having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement and combination of the recessed gate H, triple cam shaft C, clamping screws J, K¹, and adjustable buttons M, substantially as and for the purpose herein shown and described."

No. 22,984. E. A. Smead, of Tioga, Pa., for an "Improvement in converting reciprocating into rotary motion."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the fly wheel A, with the adjustable wrist-pin *h* attached, in connection with the slotted bar or rod B and rod C, the whole being arranged to operate substantially as and for the purpose herein set forth."

No. 22,985. T. Briggs Smith, of New York, N.Y., for an "Improved method of burning the threads on wooden screws."—Patented in England 1st January, 1859.

"What I claim as my invention, and desire to secure by Letters Patent, is, the application of a screw made on a bung, and another screw made in the stave corresponding with that upon the bung, both being formed by burning. This bung is to be used for all casks or vessels made of woods for liquids. I also claim the forming a screw by burning on a bung or stopple, to be used in any vessel made of any material, whether wood, metal, glass, or other material."

No. 22,986. Stephen Wm. Smith, of Brooklyn, and Hubbard Bigelow, of New York, N.Y., for a "Fly-trap."

"What we claim as our invention, and desire to secure by Letters Patent, is,—1st, the combination of the endless web or apron B with the plate or scraper H, and the rollers C, C¹, and F, operated as described for the purposes set forth. 2d, the combination of the endless web B with the roller F and the pan G, in the manner and for the purpose described."

No. 22,987. Watson Snyder, of Newark, N.J., for an "Improvement in sewing machines."

"I do not claim the employment of a surface arranged obliquely to the face of the cloth table or plate, to turn the edges of fabrics in sewing machines; neither do I claim the attaching of the whole binding guide to the foot or pressure pad, so that it may be caused to rise and fall therewith, as that has been already patented by O. G. Boynton, June 1, 1854; but what I claim as my invention, and desire to secure by Letters Patent, is, the combination of the fixed lipped, guide C for the under edge of the binding, the fixed bar adjustable guide D for the edge of the fold of the binding and the elastic plate E operated upon by the pressure pad of foot, the whole applied and operating substantially as and for the purpose herein set forth."

No. 22,988. John Spangenberg, of New York, N.Y., for an "Improvement in defecating and clarifying saccharine juices."

"What I claim as my invention, and desire to secure by Letters Patent, is, the application of hydrated oxide of tin, prepared with sulphurous acid, substantially as herein set forth, for the purpose of decolorizing or bleaching and defecating syrups, saccharine solutions and liquids from sugar cane and other saccharine and vegetable juices, whether the same be used alone or in combination with alumina, as set forth."

No. 22,989. OREN STODDARD, of Busti, N.Y., for an "Improved churn."

"I do not claim broadly the employment or use of a weight in connection with the gearing, 'scape wheel, and pallets applied to a churn for operating the same, irrespective of the particular manner of adapting the power to the churn, as herein shown and described, for such parts form a portion of a simple clock movement, and is a well-known device; but, having thus described my invention, what I do claim as new and desire to secure by Letters Patent, is,—1st, the combination of the crutch M with the interior of the churn box N, so that the lower end of the said crutch shall act as and constitute the dasher, substantially as described."

No. 22,990. LUKE TAYLOR, of North Springfield, Vt., for an "Improved mop-head."

"I do not claim separately any of the parts described; but I do claim as new, and desire to secure by Letters Patent as an improved article of manufacture, a mop-head, having a loose collar C, provided with a screw thread, and otherwise made as described."

No. 22,991. JOHN TYLER, of Providence, R. I., for "Improved ice-tongs."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of a pick and cutter, or either of them, with a pair of ice-tongs, by forming or attaching the same upon or to the back of either leg of the tongs, substantially as herein described, thus making an instrument of novel character."

No. 22,992. JOHN L. WAGER, of Deposit, N. Y., for an "Improvement in R. R. signal lanterns."

"I am aware that switch lanterns have been previously devised in which colored glass plates have been operated or certain parts so adjusted by the movement of the switch bar or lever, that different colored lights are shown to indicate the position of the switch; I therefore do not claim broadly an automatic switch lamp; but, having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the lantern case B, provided with the colorless glass plates *f*, *f*[1], and loosely attached or suspended to the rod or shaft *o*, which is connected with the switch bar or lever A the case being provided with the oscillating or partially rotating frame C, containing colored glass plates, and connected with the rod or shaft *o*, by means of the arm *n*, the whole being arranged substantially as and for the purpose set forth."

No. 22,993. LAWRENCE B. WATERMAN, of Chicago, Ill., for an "Improved clothes frame."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, the combination of the stationary top support B with the movable parts D, G, when operated through the segmental racks *c*, *f*, and arranged for the purpose of forming a tipping clothes dryer frame, substantially as herein set forth."

No. 22,994. ELISHA WEST, of Ogden, N. Y., for an "Improved method of locking and supporting the panels of field fences."

"I do not claim panels constructed as above described, either with battens alternately on opposite sides, or entirely on one side of the rails; nor do I claim a triangular or brace support for the panels of a fence; but what I claim as my invention, and desire to secure by Letters Patent, is, the combination of the panels and the triangular brace or jack G, constructed as described, when so arranged in connection with the recesses *e*, *e*, of the panels, that by drawing the adjacent panels in opposite directions till the jack G shall enter said recesses *e*, *e*, the sections of the fence shall be securely locked together in the manner specified."

No. 22,995. CARL WINZEN, of Albany, N. Y., for an "Improvement in coating metals with tin."

"What I claim as my invention, and desire to secure by Letters Patent, subject to the foregoing explanations and disclaimers, is, the solution composed of the ingredients, in substantially the same proportions, applied to accomplish the process of tinning, and used substantially in the manner above described."

No. 22,996. GILMAN, WOODWARD, and FRANKLIN S. HATHAWAY, of Keene, N. H., for an "Improvement in securing garments to hooks."

"What we claim is,—1st, securing the hook B to the vertical sliding plate C, C, in the manner and for the purposes described and set forth. 2nd, the manner of operating the arm F, in combination with the movement of the hook B, and sliding plate C, C. 3rd, arming the hook B and the arm F, at their points of contact, with movable spurs, in a manner and for the purposes described and set forth. 4th, the tumbler S, when operated as described, or otherwise to produce the same effect, as specified and set forth."

No. 22,997. JOHN DÉ FRAIN, of Philadelphia, Pa., assignor to Wm. Callahan and Wm. Grant, of said Philada., for an "Improvement in corn and cob mill."

"Having thus fully described my invention, and its mode of operation, what I claim as new, and desire to secure by Letters Patent, is,—1, making the hopper (N) of the crusher (M) adjustable on the shell of the same, so as to present to the ear of corn either the corner edge (7) of the hopper (N), or the inner edge (8) of the shell (M), as occasion may require, substantially in the manner and for the purposes set forth and described. 2, I claim the carrier (K), the inverted cup (K[1]), and its adjusting bolt and nut (*v*), and arch piece (*w*), in combination with the hopper (C) and spindle (F), the same being constructed and arranged together, substantially as shown, and operating together in the manner and for the purpose described. 3, I claim the combined arrangement of the scrapers (S, S,) on the bottom of the rotating disk (E), the annular groove (*p*) in the diaphragm (A[1]), and the outlets and tubes (L, L), the same operating together, substantially in the manner and for the purpose set forth and described. 4, I also claim the combined arrangement consisting of the outlets (L, L) and the opening (*u*) through the diaphragm (A[1]), the same operating together with the rotary disk (E), in the manner and for the purpose specified."

No. 22,998. THOS. A. DUGDALE, of Richmond, Ind., assignor to Wm. M. Reed, of Newcastle, Ind., for an "Improved washing machine."

"What I claim as my invention, and desire to secure by Letters Patent, is, combining and arranging the inclined planes F, F, the plate H, and pins I and J, J, with the double inverted inclined planes D, D, rollers E, E, E, E, E, E, E, E, and wash-boards A, A, the whole being constructed, arranged, and operated substantially as above described, and for the purposes set forth."

No. 22,999. JOSIAH J. DUTCHER, of Brooklyn, N.Y., assignor to Noah Mosher, of Norwalk, Conn., for an "Improved pail."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the pail constructed of the body A, and jacket B, of the materials herein specified, to form a new and useful article of manufacture."

No. 23,000. EZRA POLLARD, of Albany, N.Y., assignor to himself and Joshua Gray, of Westfield, Mass., for an "Improvement in securing sheet metal roof."

"I do not claim, broadly, the attachment of the sheet-metal coverings of roofs and other portions of buildings by interlocking connections which leave the metal free to move in all directions, as I am aware that slotted plates set up edgewise have been attached to the roofs in pairs to receive small bars attached by loops or eyes to the metal covering, making a much less simple contrivance than any interlocking strips; but what I claim as my invention, and desire to secure by Letters Patent, is,—1st, securing the edges of sheet-metal coverings of roofs and other portions of buildings by means of strips of india rubber *b* united to the said edges by lap joints and nailed to the building, substantially as herein described. 2nd, the interlocking metal strips *f*, *g*, formed, applied, and operating substantially as herein set forth."

No. 23,001. LUCIUS P. PORTER, of New York, N.Y., assignor to the New York Rubber Company, of said New York, for an "Improvement in elastic toys."

"What I claim as my invention is, the combination of a reed or other speaking device with a hollow elastic toy made of caoutchouc or gutta percha, or their compounds, for acting together, the former by the latter, substantially as specified. And I further claim the manner herein described of securing the reed frame to the toy by grooving the frame on its edges or periphery and inserting it in a hole in the toy, so as to be clasped in the groove by the edges of the elastic material, in which in which the receiving aperture is made."

No. 23,002. GEO. W. RICHARDSON and ROBT. GLOVER, of Grayville, Ill., assignors to themselves and John I. Tanquerry, of White Co., Ind., for an "Improvement in converting rectilinear into rotary motion."

"We are aware that segment wheels have been used to operate a working frame, and 'vice versa,' hence we do not

claim this device; but what we claim as our invention, and desire to secure by Letters Patent, is, the arrangement of the rocking racks (K, K,) in combination with the segment wheel (I), substantially as herein described, for the purposes set forth."

No. 23,003. Arad Woodworth, 3d., of Boston, and Daniel Woodworth, of Warren, and M. T. Hitchcock, of Springfield, Mass., assignors to Arad Woodworth, 3d. and Danl. Woodworth aforesaid, for an "Improved rocking horse."

"Having thus described our improvements, we shall state our claim as follows:—What we claim as our invention, and desire to have secured to us by Letters Patent as a new article of manufacture, is, a rocking horse, consisting of the head and neck of a horse made as in the ordinary rocking horse, combined with a hollow box or cradle, so that the child can be placed therein, and which rocks longitudinally, thereby uniting the advantages of a rocking horse and cradle, and preventing the liability of accidents to the child by falling, as set forth."

Re-issues.

Thomas Brown, of London, England, for an "Improved arrangement of means for working and stopping chain cables."—Patented 25th July, 1854.—Ante-dated 20th April, 1847.— Re-issued 15th February, 1859.

"I claim the flaring and radial flanched annular recess in the capstan of working a cable of any given size, or cables of several different sizes, the same being constructed and operating in the manner and for the purposes, substantially as set forth herein. I also claim, in combination with a capstan, a windlass which is capable of working a chain cable, when only a partial turn is taken, a set of removable rollers, so arranged in relation to the capstan, the deck-pipes, and haws-holes, that either a port or starboard chain cable can be continuously hove in by means of said capstan and rollers, or can be directly run out of its locker without any previous overhauling, substantially as herein set forth. I also claim the within described arrangement of bow-stopper and after-stoppers, whereby more cable can gradually and controllably be given to a vessel whilst riding heavily at anchor, substantially as set forth. I also claim the clearing guide, in combination with the annular recess of a capstan or windlass which is capable of working a chain cable when only a partial turn is taken, for the purpose and in the manner substantially as set forth."

N. Jensen, of Washington, D.C., for an "Improvement in bandages."—Patented 14th December, 1858.—Re-issued 15th February, 1859.

"Having thus described my improvements in catamemal bandages, what I claim therein as new, and desire to secure by Letters Patent, is, the extension spring frame (*a*), constructed and arranged substantially as described, so that when the sides are closed by the pressure of the limbs the rear of the frame will remain open for the purpose as set forth. I also claim the combination with the exterior frame, or when constructed and arranged substantially as described, for the purpose herein set forth."

James Wood, of Philadelphia, Pa., assignee thro' mesne assignments of William Kenyon, of Stenbenville, Ohio, for an "Improvement in machines for making nuts, washers, &c."—Patented 14th October, 1851.—Re-issued 15th February, 1859.

"Having thus described William Kenyon's improvement in the manufacture of nuts, what I claim therein as his invention, and desire to secure by Letters Patent, is,—1st, making nuts for bolts by subjecting the blank of which the nut is to be found at a welding heat, to compression between swages or dies in a close die box or matrix, and punching the eye of the nut during the continuance of such pressure, for the purpose of welding up any imperfections in the iron and giving a symmetrical shape and smooth finish to the nut, and of preventing any injury to the nut which it might suffer by the passage of the punch through it, if it were not thus sustained by the sides of the die box, and forcibly compressed between the dies. 2d, the use of a die box, closed at the sides, for surrounding the nut, and sustaining its sides, while it is subjected to pressure, substantially in the manner herein-before described. 3d, the combination of the compressing dies P and T with the die box M, for the compressing the nut while it is sustained at the sides, and thus welding up any imperfections in the iron and compacting its fibre, so as to give strength as well as exterior finish and symmetry to the nut. 4th, the combination of the punch L with the die box M and compressing dies P and T, for the purpose of compressing, confining, and restraining the opposite faces of the nut, during the passage of the punch through it, and thus preventing any injury to the nut during the process of punching; and also for the purpose of ensuring the making of the bore of the nut in the proper relative position to its upper and lower surfaces. 5th, the combination of the die box M, the compressing dies T and P, and punch L, constructed and arranged substantially as herein-before described, for the purpose of making hot-pressed nuts at a single operation, by severing a blank from a bar of heated metal, compressing it into shape, and punching a hole or eye through it while under compression, and delivering the finished nut from the machine. 6th, arranging the compressing dies in relation to the punch, and regulating their relative motion in such manner, substantially as herein-before described, that any excess of iron in the blank shall be forced into the path of the punch in the compressing dies, thus securing the compression of the nut without risk of damage to the machine."

The Railroad Car Spring Company, of Philadelphia, Pa., assignees thro' mesne assignments of Henry M. Paine, of Worcester, Mass., for an "Improvement in R. R. car springs."—Patented 27th October, 1857.— Re-issued 15th February, 1859.

"We are aware that layers of felt have been heretofore applied as bumper springs to railway cars, such a device being shown in the English Patent of W. W. Taylor, Feb. 1841; in that instance, however, the felt was simply confined to a plate by a yielding leather cover secured by cords, without any regard to a given condensation of the felt, so as to obtain a proper recoil; we therefore do not claim broadly the application of fibrous material in the manufacture of car springs; but we claim, and desire to secure by Letters Patent, as the invention of the aforesaid Henry M. Paine, and as a new manufacture, a railroad car spring consisting of a body of felt, or other fibrous material, condensed to a given density between two rigid plates, and prevented from expanding beyond that density by a bolt or bolts, substantially as herein set forth."

Hiram Bissell, of Hartford, Conn., for a "Design for hot-air furnaces."

"What I claim, therefore, and desire to secure by Letters Patent, is, the shape and configuration of the said furnace, as herein described, as shown in the drawings."

Hiram B. Musgrave, of Cincinnati, Ohio, for a "Design for gas-burners."

"I claim as new, and of my invention, a design for portable gauze gas-burners, represented in the accompanying drawings.'

Elimir J. Ney, of Lowell, Mass., assignor to the Lowell Manufacturing Company, for a "Design for carpets."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the design or pattern for carpets, herein set forth."

Elemir J. Ney, of Lowell, Mass., assignor to the Lowell Manufacturing Company, for a "Design for carpets."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the within described design or pattern for carpet and other fabrics."

Additional Improvement.

John Waugh, of Elmira, N.Y., for an "Improvement in machines for trimming the edges of paper-hangings."—Patented 5th October, 1858.—Additional improvement dated 15th February, 1859.

"What I claim as my invented improvement, and desire to have added to my original invention, and secured by Letters Patent, is, the framed ways W, X, moving in a curvilineal path on a centre at one angle of frame,—the hand lever *x* that operates on frame way, and the springs *b*, *b*, which keep the frame in position, in combination, for the purposes as substantially as set forth."

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Timekeepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*

The following are in the press:—

Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c.
Electricity and Magnetism: their Generation and Applications.
Typographic, Lithographic, and Plate Printing.
Bleaching, Dyeing, and Printing Yarns and Fabrics.
Preparation of Fuel, and Apparatus for its Combustion.
Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing.
Production and Applications of Gas.
Steam Engines.

B. Woodcroft.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 540. TUESDAY, MARCH 8, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

2375. MARK MASON, of Manchester, in the county of Lancaster, Machinist, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in elevating stands or stages for the use of hosemen in extinguishing fires, also for decorating wnidows, public buildings, and other purposes."

As set forth in his petition, recorded in the said office on the 25th day of October, 1858.

2384. And MARK MASON, of Manchester, in the county of Lancaster, Machinist, has given the like notice in respect of the invention of "Improvements in self-acting feeding machines, or apparatus for all descriptions of steam or other letter-press printing machines or presses."

2386. And CHARLES WIELAND, of Warkworth Terrace, Commercial Road, Limehouse, in the county of Middlesex, has given the like notice in respect of the invention of "Certain improvements in chronometers, watches, and such like time keepers."

As set forth in their respective petitions, both recorded in the said office on the 26th day of October, 1858.

2389. And JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "A new machine for boring."—A communication.

2392. And JOHN KINSEY, of Brighton, Engineer, has given the like notice in respect of the invention of "Improvements in steam engines and pumps."

2393. And CHARLES CHEYNE, of Great George Street, in the city of Westminster, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the construction of floors and ceilings."

As set forth in their respective petitions, all recorded in the said office on the 27th day of October, 1858.

2405. And TIMOTHY RAILTON, of the city of Manchester, Manufacturer, has given the like notice in respect of the invention of "Improvements in the apparatus employed in the manufacture of cap or bonnet fronts."

2408. And BENJAMIN FOSTER, of Denholme, near Bradford, in the county of York, Spinner, and PRINCE SMITH, of Keighley, in the county of York, Machinist, have given the like notice in respect of the invention of "Improvements in machinery or apparatus for spinning and doubling wool, alpaca, mohair, cotton, silk, flax, and other fibrous substances."

As set forth in their respective petitions, both recorded in the said office on the 28th day of October, 1858.

2418. And JAMES WRIGHT, of 21, Bridge Street, Blackfriars, London, county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "An improved application of machinery to be used as a new motive propelling power."—A communication.

2419. And GEMINIANO ZANNI, of Union Street, Barnet, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in arranging magneto-electric machines for medical and other purposes."

2422. And LESTER JOHN LEWIS, Jeweller, of New Bridge Street, Birmingham, in the county of Warwick, has given the like notice in respect of the invention of "Certain improvements in fastenings for ladies' dresses and other such like purposes, as also in the machinery for manufacturing the same."

2423. And JOHN MORRIS, of Broughton, Salford, in the county of Lancaster, has given the like notice in respect of the invention of "Improvements in the manufacture of rollers or cylinders for printing fabrics."

As set forth in their respective petitions, all recorded in the said office on the 29th day of October, 1858.

2433. And JOHN CARISS, of York, Yorkshire, has given the like notice in respect of the invention of "An improved safety switch box and gear."

2434. And EDWARD MAYNARD, of Brooklyn, in the county of Kings, and state of New York, United States of America, has given the like notice in respect of the invention of "Improvements in sub-marine telegraph cables."

2435. And CHARLES PERLEY, of the city and state of New York, United States of America, has given the like notice in respect of the invention of "Certain improved means for disconnecting boats from the davit blocks, and effecting other like objects."

As set forth in their respective petitions, all recorded in the said office on the 1st day of November, 1858.

2438. And MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, has given the like notice in respect of the invention of "An improved system of railway brakes."—A communication from Claude Arnoux, residing at Paris.

2442. And ROBERT CREED SMITH, of Birmingham, in the county of Warwick, Glass Mould Maker, has given the like notice in respect of the invention of "A new or improved buoy or wreck intelligencer."

2444. And MANUEL LEOPOLD JONAS LAVATER, of the Strand, in the county of Middlesex, India-rubber Manufacturer, has given the like notice in respect of the invention of "Improvements in cartridges for military and other purposes."

As set forth in their respective petitions, all recorded in the said office on the 2nd day of November, 1858.

2458. And JOHN FOWLER, junior, ROBERT BURTON, and DAVID GREIG, all of Cornhill, in the city of London, have given the like notice in respect of the invention of "Improvements in applying motive power to actuate ploughs and other agricultural implements."

As set forth in their petition, recorded in the said office on the 3rd day of November, 1858.

2465. And COLIN MATHER, of Salford, in the county of Lancaster, Machinist, has given the like notice in respect of the invention of "Improvements in drying yarns while in the hank."

As set forth in his petition, recorded in the said office on the 4th day of November, 1858.

2471. And THOMAS TILL, of Hooper Street, in the borough of Birmingham, in the county of Warwick, Mechanic, has given the like notice in respect of the invention of "Improvements in machinery for making nails, and for other analogous purposes where metal is compressed by dies or stamps."

2472. And THOMAS BRIGGS, Smith, of Marietta, in the state of Ohio, and United States of America, has given the like notice in respect of the invention of "Preparing wood so as to be used as a substitute for curled hair in the manufacture of mattresses and in the other purposes to which curled hair and its substitutes are applied."

2478. And SIMON DAVEY, Merchant, residing at Rouen, France, has given the like notice in respect of the invention of "Improvements in blasting powder."

As set forth in their respective petitions, all recorded in the said office on the 5th day of November, 1858.

2489. And JAMES JACKSON, AARON FISHER, and JOHN JONES HARNEY, of Sheffield, in the county of York, Crinoline Manufacturers, have given the like notice in respect of the invention of "Improvements in the manufacture of strips or bands of steel, and in the machinery or apparatus to be employed therein."

2490. And JOHN PLATT, of Oldham, in the county of Lancaster, Mechanical Engineer, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for preparing, spinning, and doubling cotton and other fibrous materials."

As set forth in their respective petitions, both recorded in the said office on the 6th day of November, 1858.

2501. And JOSEPH FRANÇOIS AMBLET and AUGUSTE POLART, both of Amiens, in the empire of France, Manufacturers, have given the like notice in respect of the invention of "Improvements in the manufacture of elastic fabrics."

As set forth in their petition, recorded in the said office on the 8th day of November, 1858.

2505. And JOHN LOUIS JULLION, Paper Maker, of Stoneywood Works, Aberdeen, N.B., has given the like notice in respect of the invention of "Improvements in the manufacture of paper."

2508. And JOSEPH FELIX, of No. 54, Rue Croix Nivert, at Grenelle, near Paris, Mechanician, has given the like notice in respect of the invention of "Improvements in castors for furniture and other similar purposes.'

2510. And WILLIAM CLARK, of No. 53, Chancery Lane, in the county of Middlesex, Patent Agent and Engineer, has given the like notice in respect of the invention of "Improvements in signals for railways, and in apparatus for actuating the same."—A communication from Auguste Lucien Verité and Julien Stephane Bazin.

2513. And ALFRED VINCENT NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improved apparatus for obtaining extracts or decoctions."—A communication.

As set forth in their respective petitions, all recorded in the said office on the 9th day of November, 1858.

2532. And MARTIN BENSON, late of Cincinnati, in the United States of America, but now residing at Newcastle, Mechanical Engineer, has given the like notice in respect of the invention of "An improved manufacture of rails for railways."—A communication.

As set forth in his petition, recorded in the said office on the 11th day of November, 1858.

2538. And THOMAS FILDES COCKER, of Sheffield, in the county of York, Steel File and Wire Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture of steel and iron wire, also of sheets and strips of steel."

2540. And JOSEPH GILBERT MARTIEN, of Ampthill Square, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in the manufacture of iron and in the apparatus employed in such manufacture."

As set forth in their respective petitions, both recorded in the said office on the 12th day of November, 1858.

2547. And JOHN COURAGE, of Horsleydown, in the county of Surrey, Brewer, and FREDERICK BENNETT, of Holywell, in the county of Flintshire, Smelter, has given the like notice in respect of the invention of "Improvements in furnaces for reducing and smelting ores, scoria, slag, and waste."

As set forth in their petition, recorded in the said office on the 13th day of November, 1858.

2561. And ALLAN DICK, of Holywell, in the county of Flint, Metallurgist, has given the like notice in respect of the invention of "A new or improved manufacture of a yellow pigment."

As set forth in his petition, recorded in the said office on the 15th day of November, 1858.

2594. And JOHN PLATT, of Oldham, in the county of Lancaster, Mechanical Engineer, and HARRY CHUBB, of Brecknock Crescent, Camden Town, in the county of Middlesex, Gentleman, have given the like notice in respect of the invention of "Improvements in machinery or apparatus for making bricks or tiles."—Partly a communication from abroad.

2595. And WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "A process of thickening, strengthening, and improving tanned hides."—A communication from Antoine Louis Adolphe Favier, residing at Nancy, in the empire of France.

As set forth in their respective petitions, both recorded in the said office on the 17th day of November, 1858.

2622. And WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in purifying natural phosphates of lime."—A communication from Emile Constant Martin, residing at Paris, in the empire of France, formerly Banker.

2629. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improved apparatus for transmitting motive power."—A communication.

As set forth in their respective petitions, both recorded in the said office on the 19th day of November, 1858.

2650. And SAMUEL WAITE JOHNSON and JAMES VARLEY, both of Peterborough, in the county of Northampton, Engineers, have given the like notice in respect of the invention of "Improvements in pressure and vacuum gauges."

As set forth in their petition, recorded in the said office on the 22nd day of November, 1858.

2666. And ALFRED VINCENT NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improved machinery for making bolts and rivets."—A communication.

As set forth in his petition, recorded in the said office on the 24th day of November, 1858.

2685. And EDWARD DIXON, of Wolverhampton, in the county of Stafford, Manufacturer, and JOHN FISHER, of Wolverhampton aforesaid, Tube Drawer, have given the like notice in respect of the invention of "An improvement in the manufacture of welded iron tubes."

As set forth in their petition, recorded in the said office on the 26th day of November, 1858.

2695. And JAMES TANGYE, of Birmingham, in the county of Warwick, Machinist, has given the like notice in respect of the invention of "An improvement in hydraulic presses."

As set forth in his petition, recorded in the said office on the 27th day of November, 1858.

2787. And JOHN JOBSON, of the Derwent Foundry, Derby, has given the like notice in respect of the invention of "Improvements in the manufacture of stoves and fire places."

2792. And JOHN DAWSON, of Holbeck, in the parish of Leeds, in the county of York, Machine Maker, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for raising the nap on woollen cloths."

As set forth in their respective petitions, both recorded in the said office on the 6th day of December, 1858.

2859. And JAMES WEBSTER, of Birmingham, in the county of Warwick, Engineer, has given the like notice in respect of the invention of "A new or improved method of recovering copper and zinc from liquids which have been employed to dip or pickle articles made of brass or other alloys containing copper and zinc."

As set forth in his petition, recorded in the said office on the 14th day of December, 1858.

2898. And ISAAC KETCHUM, of No. 59, Canning Street, Liverpool, in the county of Lancaster, Merchant, has given the like notice in respect of the invention of "Improvements in the method of roasting meat, poultry, game, by basting the same, and in the method of manufacturing the necessary apparatus for so doing."

As set forth in his petition, recorded in the said office on the 18th day of December, 1858.

---

27. And CHARLES BELL BLYTH, of Dundee, Mill Manager, has given the like notice in respect of the invention of "Improvements in machinery for preparing and treating jute, hemp, flax, and other fibrous materials."

As set forth in his petition, recorded in the said office on the 3rd day of January, 1859.

83. And WILLIAM TILLIE, of the city of Londonderry, in the county of Londonderry, Ireland, Shirt Manufacturer, has given the like notice in respect of the invention of "An improvement in the manufacture of shirts and shirt fronts."

As set forth in his petition, recorded in the said office on the 11th day of January, 1859.

216. And JOHN FOWLER, junior, of Cornhill, ROBERT BURTON, of Kingsland, in the county of Middlesex, DAVID GREIG, of New Cross, in the county of Kent, and JEREMIAH HEAD, of Newcastle-on-Tyne, have given the like notice in respect of the invention of "Improvements in agricultural implements, and in apparatus used for hauling agricultural implements by steam power."

As set forth in their petition, recorded in the said office on the 24th day of January, 1859.

227. And JOHN WHITE, of Finchley, in the county of Middlesex, Surgeon, has given the like notice in respect of the invention of "Improvements in means or apparatus to facilitate respiration under water, or under the influence of fire, or in other situations where an artificial supply of air may be required, part of which improvements is also adapted to facilitate movement in or upon the surface of water."

As set forth in his petition, recorded in the said office on the 25th day of January, 1859.

275. And THOMAS WILSON, of Birmingham, in the county of Warwick, Engineer, has given the like notice in respect of the invention of "Improvements in breech loading and other fire-arms."

As set forth in his petition, recorded in the said office on the 31st day of January, 1859.

309. And WILLIAM CLAYTON and JACOB GOODFELLOW, both of Blackburn, in the county of Lancaster, Engineers, have given the like notice in respect of the invention of "Certain improvements in metallic pistons."

As set forth in their petition, recorded in the said office on the 3rd day of February, 1859.

348. And THOMAS MOSS, of 69, Fleet Street, in the city of London, in the employment of Messrs. Perkins, Bacon, and Co., has given the like notice in respect of the invention of "Improvements in the manufacture of paper and printing ink, suitable for bank notes, bills of exchange, and other documents requiring like security against being copied."

353. And WILLIAM WALLER, of Chesterfield, in the county of Derby, Mechanical Engineer, has given the like notice in respect of the invention of "Improvements in agricultural or farm implements or apparatus."—Partly a communication from William Rogers, residing at Toronto, Canada West.

As set forth in their respective petitions, both recorded in the said office on the 8th day of February, 1859.

365. And JOSEPH CROSSLEY, of Halifax, has given the like notice in respect of the invention of "Improvements in the means employed when steaming printed yarns."

As set forth in his petition, recorded in the said office on the 9th day of February, 1859.

374. And JOHN YOUNG, of Wolverhampton, in the county of Stafford, Manufacturer, has given the like notice in respect of the invention of "An improvement or improvements in the construction of knobs and the roses used for connecting knobs with doors, and with the cases of locks and latches and other like fastenings."

As set forth in his petition, recorded in the said office on the 10th day of February, 1859.

386. And HENRY BRUCE, of Kinleith Mill, Currie, in the county of Midlothian, North Britain, Paper Manufacturer, has given the like notice in respect of the invention of "Improvements in apparatus for the manufacture of paper."

As set forth in his petition, recorded in the said office on the 11th day of February, 1859.

404. And HENRY GARDNER, of 1, Old Quebec Street, Portman Square, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in machinery for breaking and preparing flax and other fibres."

As set forth in his petition, recorded in the said office on the 12th day of February, 1859.

413. And JAMES COPCUTT, of 26, Kirby Street, Hatton Garden, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in obtaining light from gases."

As set forth in his petition, recorded in the said office on the 14th day of February, 1859.

426. And SAMUEL BAILEY, Mining Engineer, of Wednesbury, in the county of Stafford, has given the like notice in respect of the invention of "Certain apparatus for preventing the skip in mine operations being pulled over the pulley on which the rope or chain works, to which such skip or cage may be attached, as well as preventing the skip or cage re-descending until put in motion for that purpose."

439. And JOSEPH BREEDEN, of Birmingham, in the county of Warwick, Manufacturer, has given the like notice in respect of the invention of "New or improved machinery for the manufacture of taps or stopcocks, and fittings for gas, steam, and water pipes."

440. And JOHN EASON, of Oxford Street, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in apparatus applicable to tanning, dyeing, and obtaining extracts from vegetable, animal, and mineral substances."

As set forth in their respective petitions, all recorded in the said office on the 16th day of February, 1859.

452. And HENRY SWAISLAND, of 54, Great Sutton Street, Clerkenwell, in the county of Middlesex, Mathematical Instrument Maker, has given the like notice in respect of the invention of "Improvements in box sextants."

As set forth in his petition, recorded in the said office on the 18th day of February, 1859.

459. And ALPHONSE RENÉ LE MIRE DE NORMANDY, of 67, Judd Street, Brunswick Square, in the county of Middlesex, Analytical Chemist, has

given the like notice in respect of the invention of "Improvements in an apparatus for obtaining fresh water from salt water."

As set forth in his petition, recorded in the said office on the 19th day of February, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

8th March, 1859.

1811. Willoughby Smith, of 3, Montrose Villas, Pownall Road, Dalston, in the county of Middlesex, for an invention of "An improved compound for coating or insulating electric telegraph wires, and for coating other surfaces."—Dated 9th August, 1858.

2043. Constantine Nicolaus Kottula, of Liverpool, in the county of Lancaster, Soap Manufacturer, for an invention of "Improvements in the manufacture of grease for lubricating purposes."——Dated 9th September, 1858.

2044. James Tatlow, of Wirksworth, in the county of Derby, Manufacturer, and Henry Hodgkinson, of the same place, Engineer, for an invention of "Improvements in railway breaks."—Dated 9th September, 1858.

2056. François Antoine Edmond Guironnet de Massas, of Gerrard Street, in the county of Middlesex, Civil Engineer, for an invention of "An improved machine for decorticating and cleaning grain and seeds."—Dated 10th September, 1858.

2058. David Cheetham, of Rochdale, in the county of Lancaster, Mechanist, for an invention of "Imprrovements in machinery or apparatus for preparing for spinning, and spinning cotton, wool, and other fibrous materials."—Dated 10th September, 1858.

2071. William Thomson, of the city of Manchester, in the county of Lancaster, Commission Agent, for an invention of "Improvements in bleaching yarn, warps, or similar materials."—Dated 13th September, 1858.

2113. Henry Barrow, of Birmingham, in the county of Warwick, Saddler, for an invention of "An improvement or improvements in cartridge boxes."—Dated 20th September, 1858.

2175. John Morrison, of Birmingham, in the county of Warwick, Machinist, for an invention of "An improvement in or addition to sewing machines."—Dated 30th September, 1858.

25. Robert Tempest and James Tomlinson, both of the Roach Iron Works, Rochdale, in the county of Lancaster, Machine Makers, for an invention of "Improvements in certain machines for preparing cotton and other fibrous materials."—Dated 3rd January, 1859.

75. Ferdinand Lehr, of Hoboken, in the state of New Jersey, United States of America, for an invention of "Improvements in machinery for manufacturing metallic ribs for umbrellas, parasols, and other articles."—Dated 10th January, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 5th March*, 1859, *inclusive.*)

3rd March.

549. Thomas Lambert, of the New Cut, Lambeth, for an invention of "Improvements in apparatus for regulating the drawing off of water and other fluids."—Dated 4th March, 1856.

631. Charles Randolph and John Elder, both of the city of Glasgow, in the county of Lanark, Engineers, for an invention of "Improvements in marine engines."—Dated 15th March, 1856.

4th March.

570. John Downie, of Glasgow, in the county of Lanark, North Britain, Engineer, for an invention of "Improvements in moulding or shaping metals and other materials."—Dated 7th March, 1856.

609. George Rees, of Clerkenwell, in the county of Middlesex, Painter and Stained Glass Manufacturer, for an invention of "An improved method of producing figured or ornamental surfaces on glass."—Dated 13th March, 1856.

761. John McLean, of Glasgow, in the county of Lanark, North Britain, Merchant, for an invention of "Improvements in treating or preparing textile fabrics and materials for increasing the density thereof."—Dated 29th March, 1856.

5th March.

576. Henry Cooke, of Manchester, in the county of Lancaster, Cotton Spinner, for an invention of "Improved machinery or apparatus for dyeing and dressing yarns or threads."—Dated 8th March, 1856.

626. Robert Walter Winfield, of Birmingham, in the county of Warwick, Merchant and Manufacturer, and John Simms, of Fleet Street, in the city of London, Commercial Agent, and Thomas Lloyd, of King's Norton, in the county of Worcester, Brass Founder, for an invention of "Improvements in the construction and ornamentation of metallic bedsteads and other articles of metallic furniture."—Dated 15th March, 1856.

Patent on which the Stamp Duty of £100 has been Paid.

4th March.

761. John McLean, of Glasgow, in the county of Lanark, North Britain, Merchant, for an invention of "Improvements in treating or preparing textile fabrics and materials for increasing the density thereof."—Dated 29th March, 1856.

Errata in Journal of 4th March.

396. For "screws, bolts," read "screw bolts."
456. For "Droissait" read "Droissart."
465. After "Orne" read "in the empire of France."

FOREIGN PATENTS.

BELGIUM.*

List of Patents of Inventions and of Importation Delivered on the 6th January, 1859.†

(*Communicated by the Belgian Government.*)

(For previous List, see No. 537 of this Journal.)

1. N. Defries, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in gas-meters." — Dated 17th December, 1858.—(English Patent, 12th July, 1858.)
2. Ch. Moissant and Co., represented by J. Saint-hill, of Brussels, for an imported invention of "Improvements in using, treating, and applying natural bitumen of the West Indies."—Dated 18th December, 1858. — (French Patent, 10th April, 1858.)
3. M. Pâquerée, represented by A. Hennelle, of Brussels, for an imported invention of "An apparatus called 'statmograph,' being applicable to steel-yards."—Dated 18th December, 1858.—(English Patent, 1st December, 1858.)
4. L. Gauchez, of Brussels, for "A process for dry teasling and napping fabrics of wool or mixed wool."—Dated 18th December, 1858.
5. S. Ongenaeden, of Ixelles, for "A mechanical break for carriages." — Dated 18th December, 1858.
6. V. Madeline, represented by De Vos-Verraert, Brussels, for an imported invention of "A kind of cards with three cylinders." — Dated 18th December, 1858.—(French Patent, 27th July, 1858.)
7. P. A. Defontaine-Moreau, represented by De Vos-Verraert, of Brussels, for "Improvements in the treatment of fat substances."— Dated 18th December, 1858.
8. A. Rosenthal, of Liége, for "A system of artificial sets of teeth mounted on aluminium."—Dated 16th December, 1858.
9. N. J. J. Honnicheren, of Saint Hubert, for "Ventilating chimneys."—Dated 18th December, 1858.
10. Ch. Steppe, of Brussels, for "The manufacture of lace with needle-stitches and coloured thread." —Dated 20th December, 1858.
11. H. Hutchinson, represented by X. Raclot, of Brussels, for "A mode of obtaining designs on leather, felt, canvass, and other tissues by means of caoutchouc."—Dated 20th December, 1858.
12. C. F. Bailley, represented by X. Raclot, of Brussels, for an imported invention of "Improvements in machines for washing, bleaching, and drying linen."—Dated 20th December, 1858.—French Patent, 3rd November, 1858.)
13. A. Lekieffre, of Namur, for "The manufacture of black from coal."—Dated 21st December, 1858.
14. A. Férandelle, of Brussels, for "A submerged hydraulic wheel."—Dated 21st December, 1858.
15. C. Martin, of Pepinster, for "An apparatus for making bobbins of sliver machines, applied to cards for filamentous substances."—Dated 21st December, 1858.
16. G. J. Martin, of Verviers, for "Spring shuttles for weaving cloth and other tissues."—Dated 22nd December, 1858.
17. F. Buttgenbach-Eglinger, represented by H. Buttgenbach, of Ensival, for "A system of washing coals."—Dated 23rd December, 1858.
18. C. F. Sebille, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A process of manufacturing tinned pipes."—Dated 22nd December, 1858.—(Original Patent, 22nd January, 1858.)
19. W. Munro and A. S. Campbell, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the manufacture of capsules and other metallic objects."—Dated 22nd December, 1858. —(English Patent, 28th October, 1858.)
20. Messrs. Brondel and Co., represented by H. Biebuyck, of Brussels, for an imported invention of "An apparatus for utilizing the waste steam of steam engines."—Dated 22nd December, 1858.—(French Patent, 22nd May, 1858.)
21. W. Davis, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in awls and similar articles."—Dated 22nd December, 1858.—English Patent, 10th June, 1858.)
22. S. Grandis, represented by H. Biebuyck, of Brussels, for an imported invention of "A system of railway wedges."—Dated 22nd December, 1858. —(French Patent, 8th December, 1858.)
23. C. J. E. Pavy, represented by H. Biebuyck, of Brussels, for an imported invention of "An apparatus for preserving corn."—Dated 22nd December, 1858.—(French Patent, 6th December, 1858.)
24. G. F. Aroux, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in machines for tilling the soil."—Dated 22nd December, 1858.—(French Patent, 6th December, 1858.)
25. J. Piault, represented by C. Joterat and Cotman, of Brussels, for an imported invention of "Applying advertisements to cards marking the points at games."—Dated 22nd December, 1858. —(French Patent, 30th January, 1857.)
26. J. B. Loiseau, represented by O. Daillencourt, of Brussels, for an imported invention of "A mode of trimming cloaks and other garments of ladies."—Dated 22nd December, 1858.—(French Patent, 8th November, 1858.)
27. H. Kurth, represented by O. Daillencourt, of Brussels, for an imported invention of "Improvements in mounting umbrellas and parasols." —Dated 22nd December, 1858.—(American Patent, 20th May, 1858.)
28. C. Christinet, represented by A. Daillencourt, of Brussels, for an imported invention of "Manufacture of an alcoholic liqueur."—Dated 22nd December, 1858. — (French Patent, 17th December, 1858.

* For the Belgian Patent Law, see Nos. 292 and 348 of this Journal.

† All Specifications of Patents which have been in force not less than six months, may be inspected or translations of them be had at the Library of the Great Seal Patent Office, where also translated Indexes may be consulted.

29. F. Lombaer, of Molenbeek, Saint Jean, a Patent of Improvement for "Additions to his moveable book-binding."—Dated 22nd Decemcember, 1858.—(Original Patent, 2nd December, 1858.)

30. E. Bona and Dicktus-Lejune, represented by H. Biebuyck, of Brussels, for "A simplified weaving loom."—Dated 23rd December, 1858.

31. D. Frodsham, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in tubular steam-boilers."—Dated 23rd December, 1858.—(English Patent, 13th November 1858.)

32. H. Spiller, represented by L. N. de Mecken, heim, of Ixelles, a Patent of Improvement for "A stereoscopic apparatus."—Dated 23rd December, 1858.—(Original Patent, 24th July, 1858.)

33. G. Collier and J. W. Crossley, represented by R. S. Kirkpatrick, of Ixelles, for an imported invention of "Improvements in jointing tubes or pipes."—Dated 23rd December, 1858.—(French Patent, 22nd December, 1858.)

34. Ch. Wheatstone, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in electric telegraphs."—Dated 24th December, 1858.—(English Patent, 2nd June, 1858.)

35. A. L. Poulain, represented by O. Daillencourt, of Brussels, for an imported invention of "A machine for making pins for foot coverings." Dated 24th December, 1858.—(English Patent, 14th December, 1858.)

36. P. J. Lejeune, of Liege, a Patent of Improvement for "Additions to his breech-loading gun."—Dated 22nd December, 1858.—(Original Patent, 23rd November, 1858.)

37. Ch. Layen, of Frameries, for an imported invention of "A system of gins for boring wells and sounding purposes."—Dated 27th December, 1858.—(French Patent, 6th October, 1858.)

38. L. G. de Koninck, of Liege, for "A process for defecating and clarifying sugar."—Dated 28th December, 1858.

39. B. J. Gosteau, represented by L. C. Duru, of Brussels, for an imported invention of "A system of grates, whereby a complete culinary apparatus may be obtained."—Dated 27th December, 1858. (French Patent, 21st June, 1858.)

40. J. C. Martin, represented by L. C. Duru, of Brussels, for an imported invention of "A gas carburator."—Dated 27th December, 1858.—(French Patent, 28th October, 1858.)

41. J. C. Durand, represented by L. C. Duru, of Brussels, for an imported invention of "Improvements in the manufacture of chain cables."—Dated 27th December, 1858.—(English Patent, 29th March, 1858.)

42. J. C. Durand, represented by L. C. Duru, of Brussels, for an imported invention of "Improvements in the manufacture of iron."—Dated 27th December, 1858.—(English Patent, 30th March, 1858.)

43. J. Hall, represented by H. Biebuyck, of Brussels, for an imported invention of "An alternate slide and expansion clack valve of steam engines."—Dated 27th December, 1858.—(English Patent, 12th June, 1858.)

44. L. C. Becasse, represented by X. Raclot, of Brussels, for "A piston can which cannot be upset."—Dated 27th December, 1858.

45. D. A. Morris, represented by X. Raclot, of Brussels, for an imported invention of "Improvements in the manufacture of sheet-iron."—Dated 27th December, 1858.—(French Patent, 26th November, 1858.)

List of Specifications, &c. published during the week ending 4th March, 1859.

No.	Price.	Subject-Matter.
1667	9*d.*	Mercurial level.
1668	5*d.*	Preventing the escape of foul air from drains.
1669	6*d.*	Metallic trimming for pistons, &c.
1671	6*d.*	Furnaces.
1672	3*d.*	Ladies' skirts.
1673	3*d.*	Medicine.
1674	10*d.*	Hydraulic lifting jacks, &c.
1675	6*d.*	Glass roofs, skylights, &c.
1676	1*s.*	Wind musical instruments.
1677	1*s.* 3*d.*	Finishing textile fabrics.
1679	10*d.*	Healds, &c.
1680	3*d.*	Time registers.
1681	10*d.*	Combing fibrous substances.
1682	3*d.*	Indicating the rise of temperature in confined spaces.
1683	1*s.* 11*d.*	Draining and cooling sewage, &c.
1684	3*d.*	Preparation of lubricating matters.
1687	10*d.*	Cleansing gutta percha, &c.
1688	9*d.*	Instruments for measuring angles and taking altitudes.
1689	3*d.*	Furnaces of steam boilers.
1690	6*d.*	Pumps, &c.
1691	5*d.*	Portable folding bedstead.
1692	9*d.*	Engines for raising beer, &c.
1693	9*d.*	Pianofortes.
1694	3*d.*	Soap.
1695	3*d.*	Cooling worts.
1696	3*d*	Finishing the cut edges of matting, &c.
1697	3*d.*	Dye colours.
1698	9*d*	Preventing the priming in steam engines.
1699	3*d.*	Rotary steam engine.
1700	3*d.*	Furnaces for steam boilers.
1701	3*d.*	Candlestick.
1702	3*d.*	Preparation of hydrated oxide of chromium.
1703	9*d.*	Gas meters.
1704	3*d.*	Self-acting mules.
1705	6*d.*	Steam boilers.
1706	6*d.*	Annealing pots for the manufacture of iron, steel, &c.
1707	3*d.*	Generating power from steam, &c.
1708	3*d.*	Telegraphic cables.
1709	3*d.*	Soap.
1710	3*d.*	Obtaining and applying motive power.
1711	1*s.* 9*d.*	Stalls and enclosures for horses, cows, and pigs.
1712	3*d.*	Trusses.
1713	1*s.* 4*d.*	Apparatus for working railway breaks.
1714	9*d.*	Machinery for spinning wool and other fibres.
1715	7*d.*	Machinery for cleaning knives, forks, spoons, &c.
1716	10*d.*	Self-acting apparatus for admitting water to steam boilers, &c.

List of Specifications—*continued.*

No.	Price.	Subject-Matter.
1717	5*d.*	Machine for cutting almonds.
1718	3*d.*	Apparatus for cooling beer, &c.
1719	3*d.*	Apparatus for the infusion of tea, coffee, &c.
1720	3*d.*	Cradle.
1721	3*d.*	Manufacture of iron.
1722	1*s.* 1*d.*	Manufacture of candles.
1723	1*s.* 4*d.*	Centrifugal drying machines, &c.
1724	5*d.*	Treatment of pit coal, &c.
1725	6*d.*	Spinning, doubling, winding, and warping yarns or threads.
1726	10*d.*	Valve.
1727	3*d.*	Candlesticks.
1728	3*d.*	Treating waste vulcanized india rubber.
1729	1*s.* 4*d.*	Combing wool.
1730	3*d.*	Freeing screw propellers from entanglement.
1731	1*s.* 4*d.*	Steam engines.
1732	3*d.*	Manufacture of bricks, tiles, &c.
1733	3*d.*	Hydraulic machinery.
1734	7*d.*	Apparatus for planing electrotype and stereotype plates.
1735	6*d.*	Consuming smoke in furnaces.
1736	10*d.*	Machinery for laying down submarine telegraph cables.
1737	10*d.*	Generating and superheating steam, &c.
1738	6*d.*	Knitting machines.
1739	6*d.*	Barometers, gauges, &c.
1740	7*d.*	Submarine telegraphic cables, &c.
1741	3*d.*	Increasing the effect of decorative pictures.
1742	3*d.*	Electric telegraph cables.
1743	10*d.*	Hydro pneumatic machinery.
1744	10*d.*	Roasting and basting machine.
1745	3*d.*	Machinery for sizing yarn.
1746	3*d.*	Manufacture of bituminous mastics.
1747	10*d.*	Machinery for twisting, doubling, and winding silk, &c.
1748	3*d.*	Apparatus for raising and lowering ships' boats
1749	7*d.*	Fly or screw presses.
1750	6*d.*	Apparatus for drying wool and other substances.
1751	3*d.*	Metallic pistons.
1752	10*d.*	Construction of streets, roads, and ways, &c.
1753	3*d.*	Metallic bedsteads and cots.
1754	6*d.*	Manufacture of iron.
1755	3*d.*	Extraction of bituminous oils, &c.
1756	10*d.*	Apparatus applicable to steam boilers.
1757	3*d.*	Machine for the manufacture of pasteboard and cardboard.
1758	2*s.* 3*d.*	Production of letter press printing surfaces, &c.
1759	10*d.*	Brewing and distilling.
1760	6*d.*	Embossing and printing dies, &c.
1761	3*d.*	Steam boilers.
1762	6*d.*	Inkstands.
1763	9*d.*	Steam boilers, &c.
1764	11*d.*	Machinery for forcing nails and other articles.
1765	1*s.* 10*d.*	Machinery for assorting and preparing silk, &c.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

Free Patent Museum and Library, South Kensington.

Numbers of Visitors for the Week ending 5th March, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Feb. 28	Monday -	320	656	976—Fine.
Mar. 1	Tuesday -	232	532	764— „
„ 2	Wednesday	123	98	221— „
„ 3	Thursday*	104	—	104— „
„ 4	Friday -	81	—	81— „
„ 5	Saturday -	235	—	235— „
	Total -	1095	1286	2381

* The Museum closes at 5 o'clock.

Total number of visitors since the period of free daily admission (12th May, 1858) to 5th March, 1859, —75,006.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. Woodcroft.

Great Seal Patent Office,
Southampton Buildings.

Gallery of Portraits of Inventors, Discoverers, and Introducers of Useful Arts. —This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

LONDON:
Printed by George E. Eyre and William Spottiswoode, Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 541. FRIDAY, MARCH 11, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

290. To GEORGE ARTHUR WALLER, of the city of Dublin, Brewer to Arthur Guiness, Son, and Co., for the invention of "Improvements in the means of and apparatus for expressing liquid from semi-fluid substances and other substances containing liquid."

On his petition, recorded in the Office of the Commissioners on the 1*st day of February*, 1859.

380. To BENJAMIN BURROWS, of Leicester, for the invention of "Improvements in looms for weaving narrow fabrics."

On his petition, recorded in the Office of the Commissioners on the 10*th day of February*, 1859.

438. To JOHN SOLMONS BENSON, of Birmingham, in the county of Warwick, Merchant, for the invention of "A new or improved method of silvering glass."—A communication from abroad by Mr. Morisson of Hamburg.

On his petition, recorded in the Office of the Commissioners on the 16*th day of February*, 1859.

1466. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E. C., Patent Agent, for the invention of "Improvements in machinery for doubling threads."—A communication from Adolphe Bouez, residing at Paris.

On his petition, recorded in the Office of the Commissioners on the 19*th day of February*, 1859.

476. To ALFRED TAPERELL, of No. 37, Moorgate Street, in the city of London, for the invention of "Improvements in compositions or compounds used when cleaning glass."

478. And to JOSEPH SCHLOSS, of Cannon Street, in the city of London, Manufacturer, for the invention of "An improvement in locks or clasps for porte-monnaies, pocket books, bags, and other like purposes."—A communication from Vve. Henry Schloss and Frère, residing in Paris.

On both their petitions, recorded in the Office of the Commissioners on the 21*st day of February*, 1859.

488. To WILLIAM GOSSAGE, of Widnes, in the county of Lancaster, for the invention of "Improvements in the utilization of alkali-waste."

On his petition, recorded in the Office of the Commissioners on the 22*nd day of February*, 1859.

490. To SAMUEL RIDGE, of Hyde, in the county of Chester, Millwright, for the invention of "Improvements in coupling or making the joints of pipes and other articles."

492. To GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, for the invention of "Improved apparatus applicable to the evaporation of saccharine liquids, and for the concentration of heat for other purposes."—A communication from Augustus Jouan, residing at San Francisco, California.

494. To WILLIAM SHARP, of Bingley, in the county of York, Worsted Spinner and Manufacturer, for the invention of "Certain improvements in machinery for spinning and twisting worsted, cotton, silk, and other fibrous materials."

496. And to SAMUEL RUSSELL, of No. 12, Sheaf Gardens, Sheffield, in the county of York, Britannia Metal Manufacturer, for the invention of "An improvement in the manufacture of handles for tea and coffee pots, jugs, pestles, knives, daggers, and forks, or any other description of article to which handles are applied."

On their several petitions, recorded in the Office of the Commissioners on the 23*rd day of February*, 1859.

499. To JOHN ROBINSON, of Lower House, near Burnley, in the county of Lancaster, Manager, for the invention of "Improvements in machinery and apparatus applicable to machinery for spinning and doubling."

500. To ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, for the invention of "A new metallic compound or alloy."

501. To ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, for the invention of "An improvement in the manufacture of cast steel."

503. To JOSEPH CROSLAND, of Crosland Moor, Huddersfield, in the county of York, Manufacturer, for the invention of "Improvements in looms for weaving textile fabrics."

504. To ADOLPHE LANÇON, jun., Watch Manufacturer, at Besançon, département du Doubs, empire of France, for the invention of "A new system of watches."

505. To JEAN HENRI GUILLAUME DANIEL WAGNER, of Paris, in the Empire of France, Manufacturer, for the invention of "Apparatus for cleaning water, and removing all matters in suspension and dissolution contained in it, water intended to feed generators of all sorts (applicable also to other purposes), which besides previous to its getting into the generators, is heated to the highest degree without almost any expense."

506. To JOHN DALE, of Cornbrook, in Manchester, and county of Lancaster, Manufacturing Chemist, for the invention of "Improvements in concentrating caustic alkalis, and in applying a product therefrom to the purpose of obtaining motive power, and to other purposes."

507. To ENOCK PRICE, of Doncaster, in the county of York, Railway Contractor, and EDMUND HAWKINS, of the same place, Builder and Contractor, for the invention of "Improvements in the mode of forming fish plates, and in the method of fixing or attaching them to the joints of rails on railways."

508. And to ALFRED CORNELIUS KEILY, of Silchester Road, Notting Hill, in the county of Middlesex, Gentleman, for the invention of "Improvements in apparatus for drawing-off fluids."

On their several petitions, recorded in the Office of the Commissioners on the 24th day of February, 1859.

---

509. To ALEXANDER REID, of the city of Manchester, Merchant, and RICHARD TONGE, of the same place, Manufacturer, for the invention of "Certain improvements in weaving, and in the machinery employed therein."

510. To ALEXANDER REID, of the city of Manchester, Merchant, and RICHARD TONGE, of the same place, Manufacturer, for the invention of "Certain improvements in or applicable to looms for weaving."

511. To THOMAS CALLENDER HINDE, of Dudley, in the county of Worcester, Iron Merchant, and GEORGE JAMES HINDE, of Wolverhampton, in the county of Stafford, Merchant, for the invention of "Improvements in coating iron with copper or alloys of copper."

513. To WILLIAM MCNAUGHT, of Manchester, in the county of Lancaster, Engineer, for the invention of "Certain improvements in steam engines, particularly applicable to compound steam engines."

514. To ROBERT FIELDEN, junior, of Walsden, in the county of Lancaster, Picker Manufacturer, and THOMAS FIELDEN, of the same place, also Picker Manufacturer, for the invention of "An improvement or improvements in the manufacture of pickers to be used in looms for weaving, and also in the machinery or apparatus to be employed in the manufacture of the same."

515. To JAMES REDDIE, of Colehill Lodge, Fulham, in the county of Middlesex, Gentleman, for the invention of "An improved mode of propelling and steering vessels."

517. And to WILLIAM CLARK, of No. 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improved apparatus for spinning, twisting, doubling, and drawing fibrous materials."—A communication from abroad by Messrs. Leroux Brothers, of Tracy-le-Mont, Oise, France.

On their several petitions, recorded in the Office of the Commissioners on the 25th day of February, 1859.

---

518. To FREDERICK WEEKES, of Bolney, in the county of Sussex, for the invention of "The treatment of certain alcoholic products."

519. To GEORGE EARNSHAW, of Horbury, near Wakefield, in the county of York, Millwright, for the invention of "The treatment of woollen and other rags and waste of fibrous substances, so as to obtain useful products therefrom."

520. To JAMES LEE, of Saint Helen's, in the county of Lancaster, Grocer, for the invention of "Certain improvements in ploughs."

521. To JOSEPH HINE, of Clerkenwell, in the county of Middlesex, Fancy Cabinet Manufacturer, for the invention of "An improved joint for cabinet making, carpentry, and other constructive purposes."

522. And to WILLIAM BURGESS, of the firm of Burgess and Key, of Newgate Street, in the city of London, Agricultural Improvement Makers, for the invention of "An improvement in reaping and mowing machines."

On their several petitions, recorded in the Office of the Commissioners on the 26th day of February 1859.

---

523. To EDWARD GATWOOD, of Great George Street, Westminster, in the county of Middlesex, Carriage Builder, for the invention of "Improvements in buffing traction and bearing springs, applicable to railway carriages and locomotive engines."

525. To ALEXANDER MARTIN, Merchant, and ALEXANDER CRICHTON, Mechanic, both residing in Pollokshaws, in the country of Renfrew, for the invention of "Improvements in weaving and woven goods."

526. To JAMES HOWDEN, of Glasgow, in the county of Lanark, North Britain, Engineer, for the invention of "Improvements in machinery or apparatus for cutting, shaping, punching, and compressing metals."

527. To JOHN LEIGH, of the city of Manchester, in the county of Lancaster, Surgeon, for the invention of "Improvements in the purification of coal gas."

528. To GEORGE HORNER, of Falls Road, Belfast, in the county of Antrim, Ireland, Machinist, for the invention of "Improvements in hackling flax, and other fibrous materials, and in machinery for the same."

529. To JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in apparatus for stopping horses." —A communication from Madame Achet, residing at Paris, in the empire of France.

530. To JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in apparatus for taking soundings, applicable also to the throwing of life lines." —A communication from William P. Trowbridge, residing at Washington, Columbia, in the United States of America.

531. To COLLINSON HALL, and COLLINSON HALL the younger, of Navestock, in the county of Essex, Agriculturalists, for the invention of "Improvements in steam agricultural machinery."

532. To ARCHIBALD TURNER, of Leicester, Elastic Web Manufacturer, for the invention of "Improvements in the manufacture of elastic fabrics."

533. To ALFRED VINCENT NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "Improvements in constructing and working condensing engines."—A communication from abroad by John Sutton, of the United States of America.

534. To WILLIAM HODSON, of Kingston Square, Hull, for the invention of "Improvements in rotatory engines."

535. And to RICHARD BROWN, of Earith, near Saint Ives, Huntingdonshire, and WILLIAM MILNE, of Bushey, Herts, for the invention of "Improvements in firearms."

On their several petitions, recorded in the Office of the Commissioners on the 28th day of February, 1859.

---

537. To THOMAS CLOAKE, of No. 6, Saville Row, Walworth, in the county of Surrey, Watchmaker, for the invention of "Stopping of the bodies and wheels of railway and other carriages."

538. To JAMES HOLROYD, of Leeds, in the county of York, Cloth Finisher, for the invention of "An improvement in finishing woollen cloths and cloths made from a combination of wool and other materials."

539. To the Reverend HENRY MOULE, Clerk, Master of Arts, of Fordington, in the county of Dorset, for the invention of "Improvements in apparatus applicable to the evaporation of sewage or other waters, and for affording heat for other uses."

540. To JAMES WETHERILT, of Chapel Street West, Mayfair, in the county of Middlesex, for the invention of "Certain improvements in locks."

541. To JOHN EDWARDS, of Fenton, in the county of Stafford, Manufacturer, for the invention of "Improvements in stacking or holding biscuit, earthen, china, and glossed ware for firing."

542. To GEORGE PITT RIVERS Baron RIVERS, of Rushmore Lodge, in the county of Wilts, for the invention of "An improved implement for breaking up and preparing land."

543. To JAMES TEMPLEMAN, of Glasgow, in the county of Lanark, North Britain, Artificial Fuel Manufacturer, for the invention of "Improvements in the manufacture or production of artificial fuel."

544. To JOHN PILE, of West Hartlepool, in the county of Durham, Ship Builder, for the invention of "Improvements in the construction of floating docks."

545. And to DAVID LICHTENSTADT, of No. 1 Henry Cottages, Park Road, Peckham, in the county of Surrey, Chemist, for the invention of "Converting certain vegetable substances into fibrous material for the manufacture of paper, textile, and other fabrics."

On their several petitions, recorded in the Office of the Commissioners on the 1st day of March, 1859.

---

547. To PETER CURRIE, General Brass-founder, of Birmingham, in the county of Warwick, for the invention of "Certain improvements in spindles for locks, latches, and other door-fastenings."

549. To JAMES MAXWELL ADAMS, Gentleman, and DAVID LAW and JOHN INGLIS, Ironfounders, all of Glasgow, in the county of Lanark, North Britain, for the invention of "Improvements in fire places, grates, ranges, and stoves."

551. To WILLIAM FRANCIS DEARLOVE, of No. 10, Dartmouth Street, in the city of Westminster for the invention of "An improved chopping machine."

553. To JOHN WILLIAM HARKER, of No. 24, Upper Barnsbury Street, Islington, and JOHN KINGSFORD FIELD, of Upper Marsh, Lambeth, for the invention of "Improvements in coating the bottoms of iron and other ships and vessels." —A communication from abroad by John Cooke Harker and Frederick Field, both of Chili.

555. To CALEB HILL, of Cheddar, in the county of Somerset, Stay Manufacturer, for the invention of "An improved construction of stay fastening."

557. To JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in the construction of grease boxes and bearings generally."—A communication from Joseph Vallot, residing at Paris, in the empire of France, Engineer.

559. To JAMES NEWCOMB, of the city of Bristol, Engineer, and JOSEPH GWYRE LOVELL, of the city of Bristol, Merchant, for the invention of "Improvements in obtaining and applying motive power, especially adapted, amongst other purposes, to the propelling of ships and vessels."

561. And to WILLIAM BROWN, of No. 4 and No. 5, Edgar Place, Mile End, in the county of Middlesex, Pipe Maker, for the invention of "Improve-

ments in the manufacture of pipe mounts or stems, cigar tubes, and similar articles."

On their several petitions, recorded in the Office of the Commissioners on the 2nd day of March, 1859.

Inventions protected for Six Months by the Deposit of a Complete Specification.

NOTICE is hereby given, that the petition of

569. HORATIO LEONARD, of the state of Massachusetts, of the United States of America, praying for Letters Patent for the invention of "An improvement in the manufacture of paraffine candles," was deposited and recorded in the Office of the Commissioners on the 3rd day of March, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

And notice is also given, that the petition of

570. WILLIAM TUCKER, of the state of Massachusetts, of the United States of America, praying for Letters Patents for the invention of "An improvement in bit stocks or auger handles," was deposited and recorded in the Office of the Commissioners on the 3rd day of March, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

11*th March*, 1859.

2064. JOHN MINTON COURTAULD, of the firm of Samuel Courtauld and Company, of Braintree, in the county of Essex, Crape Manufacturers, for an invention of "An improvement in clearing and preparing silk-crapes, aerophanes, and other like fabrics, lisses, and other gauzes and lace, and in machinery employed therein."—Dated 11th September, 1858.

2065. HENRY PAGE, of Whitechapel, in the county of Middlesex, Glass Merchant, for an invention of "An improved crown or round glass, and apparatus for manufacturing the same." — Dated 11th September, 1858.

2069. LEONARD KABERRY, of Rochdale, in the county of Lancaster, Manager, and THOMAS MITCHELL, of the same place, Manager, for an invention of "Improvements in machinery or apparatus for preparing for spinning and spinning cotton, wool, and other fibrous materials."—Dated 11th September, 1858.

2074. CHARLES WILLIAM SIEMENS, of John Street, Adelphi, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in refrigerators, and in the treatment of the freezing or cooling material, or materials used therewith." —Dated 13th September, 1858.

2075. SAMPSON HANBURY, of the Birmingham Patent Iron and Brass Tube Company, of Smethwick, in the county of Stafford, Manufacturer, for an invention of "An improvement in the manufacture of tubes of copper, brass, and other metals." —Dated 13th September, 1858.

2081. LUCIEN VIDIE, of Paris, in the empire of France, and 4, South Street, Finsbury, London, Gentleman, for an invention of "Improvements in apparatus for measuring the pressure of fluids by the flexion of diaphragms." — Dated 14th September, 1858.

2090. FRANCIS FOWKE, of Park House, South Kensington, in the county of Middlesex, Captain in the Royal Engineers, for an invention of "Improvements in fire-engines." — Dated 15th September, 1858.

2382. ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "An improvement in the manufacture of candles."—Dated 25th October, 1858.

2424. JAMES DRUMMOND, of Cameron Bank, in the county of Mid-Lothian, North Britain, Farmer, for an invention of "Improvements in reaping and mowing machines." — Dated 29th October, 1858.

2456. PETER ALFRED MAWDSLEY, of Seacombe, in the county of Chester, Smalt Manufacturer, for an invention of "Improved machinery or apparatus for drying yarns after being sized or stiffened, and the use or application of a certain substance or substances, in the sizing, stiffening, or otherwise preparing yarns and woven fabrics, or either of them."—Dated 3rd November, 1858.

2457. PETER ALFRED MAWDSLEY, of Seacombe, in the county of Chester, Smalt Manufacturer, for an invention of "The use or application of a certain substance or substances in the manufacture, stiffening, or sizing of paper."—Dated 3rd November, 1858.

2667. RICHARD HENRY HESS, of Islington, in the county of Middlesex, Engineer, for an invention of "A new manufacture of articles, parts of articles, parts of machinery surfaces and ornamental works from talc and other silicates of magnesia." —Dated 24th November, 1858.

2862. JOSEPH WADE, of Bradford, in the county of York, Manufacturer, for an invention of "Improvements in means or apparatus employed in weaving."—Dated 14th December, 1858.

2878. THOMAS MOSS, of Gainsford Street, Islington, in the county of Middlesex, for an invention of "Improvements in printing bank notes, bills of exchange, and other documents requiring like security against being copied."—Dated 15th December, 1858.

21. GEORGE TOMLINSON BOUSFIELD, of Loughborough Park, Brixton, in the county of Surrey, for an invention of "Improvements in machinery for forming dough into cakes or bread crackers." —Dated 1st January, 1859.

94. JOSEPH HANDS, of Elgin Crescent, Notting Hill, in the county of Middlesex, Surgeon, for an invention of "Improvements in preserving or preparing skins intended to be converted into leather or otherwise manufactured."—Dated 12th January, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 9th March*, 1859, *inclusive.*)

7th March.

635. Charles Benjamin Normand, of Havre, in the empire of France, Ship Builder, for an invention of "Improvements in the treatment and employment of steam in steam-engines, and in apparatus for effecting the condensation of steam."—Dated 17th March, 1856.

762. Charles Benjamin Normand, of Havre, in the empire of France, Ship Builder, for an invention of "Improvements in steam-boilers, in apparatus for applying heat to steam-boilers, and economizing heat of furnaces."—Dated 29th March, 1856.

8th March.

586. Joseph Davy, of Manningham, near Bradford, Machine Maker, and John Milnes, of Clayton West, near Huddersfield, both in the county of York, for an invention of "Improvements in looms for weaving plaids, plain weaving and flounces, or other ground work."—Dated 10th March, 1856.

9th March.

846. William Henry Gauntlett, of the South Bank Iron Works, Eston Junction, near Middlesbro'-on-Tees, for an invention of "Improvements in thermometric apparatus."—Dated 7th April, 1856.

897. William Smith, of Aston, near Birmingham, in the county of Warwick, Manufacturer, for an invention of "Improvements in the manufacture of steel wire for musical and other purposes."—Dated 15th April, 1856.

FOREIGN PATENTS.

UNITED STATES OF AMERICA.

(*Communicated by the Commissioner of Patents.*)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 22nd February, 1859, and each bearing that date.

No. 23,004. Thomas J. Alexander, of Westerville, Ohio, for an "Improved method of operating reciprocating saws."

"What is here claimed as new and useful is reciprocating the saw by means of right and left hand rocking levers or drivers, jointed to or otherwise connected with the saw, when said levers are separately hung or pivoted and geared together for reverse action, and so arranged as to admit of being worked by the hands of the operator, substantially in the manner specified."

No. 23,005. Henry Adolphe Archereau, of Paris, France, for an "Improvement in preparation of artificial fuel."—Patented in France, 11th August, 1856.

"Having now described my invention of an improved mode of treating and combing various combustible matters or substances for the production of artificial fuel, and having explained the manner of carrying the same into effect, I would observe that I claim as my invention, producing artificial fuel by stirring, mixing, or incorporating coal dust or small coal, peat turf, liguite, or other combustible substances, with rosin, pitch, tar, or other resinous, bituminous, or carbonaceous matters or substances, in any suitable proportions, according to the nature of the materials employed, and by causing steam, hot air, or gases to pass through the mass during the stirring or mixing operation, or while the carbonaceous and bitumenous particles are in motion. I also claim mixing pulverized carbonaceous matters with melted pitch, tar, or other bitumenous substances when the latter are worked up into a frothy state, as above described."

No. 23,006. Luther Atwood, of Brooklyn, N. Y., for an "Improvement in apparatus for destructive distillation."

"What I claim as my invention, and desire to secure by Letters Patent of the United States, is, viz., the arrangement and combination of the combustion tower, distilling tower, and steam blast, or their substantial equivalents, in combustion, when arranged, combined, and operated substantially as herein-before described."

No. 23,007. Henry Benter, of Wheeling, Va., for an "Improved machine for jointing staves."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, 1st, the carriage C, provided with rollers *i*, and used in connection with the adjustable guides *a*, *b*, and rotating cutter-head *e*, substantially as and for the purpose set forth. 2nd, the adjustable plate *s*, in connection with the stationary jaw *j*, and sliding jaw *k*, attached to the carriage *c*, substantially as and for the purpose specified."

No. 23,008. Edmund Bigelow, of Springfield, Mass., for a "Measuring faucet."

"What I claim as my invention, and desire to secure by Letters Patent, is, an improved self-measuring faucet, whose supply valve is closed and discharge valve opened by a single movement, and when discharge valve is closed and supply valve opened by a single movement produced by a spring, and which is supplied with a vent pipe for letting out the air, and another vent pipe for letting in the air, when the faucet is to be discharged, which last vent pipe is shut off, when the faucet is to be filled or is standing full, substantially as above described."

No. 23,009. Wm. Blanchard, of Washington, D. C., for an "Improvement in casting stereotype plates."

"I do not claim anything new in the method herein described, of fastening the flexible mould plates. I do not claim the casting of stereotype plates for printing by immersion, as a novelty; but what I claim as my invention, and desire to secure by Letters Patent, is, casting stereotype plates for printing, by immersing a metallic mould plate with a mould or matrix, formed upon and adhering to it, substantially as herein described. I claim the manner of casting any number of stereotype plates by immersion or otherwise, in which each mould plate holds on one of its sides a matrix, whereon the face of the stereotype plate is cast in one compartment, while its reverse side in another compartment is used as a matrix, whereon to cast the back of another stereotype plate, substantially as herein described."

No. 23,010. Benjn. Burling, of Buffalo, N. Y., for an "Improved propeller for canals."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, propelling canal boats or other craft by means of a steam tug B, placed within a well hole *a*, at the stern and connected therewith by the shackle *b*, and stancheons *c*, *d*, or their equivalents, substantially as and for the purpose set forth."

No. 23,011. N. F. Burnham, of Laurel Factory, Md., for an "Improved water whee ."

"I am aware that the French turbine (jouval) receives power from the lower part of the bucket the same as mine. I do not claim, therefore, the lower end of the bucket R; but what I do claim as new, and desire to secure by Letters Patent, is,—1st, I claim the concave hub, as represented in Fig. 3, in combination with the bucket, as represented in Fig. 4, which forms the wheel. 2nd, I claim the chutes or guides in combination with the wheel, by which one-fourth, one-half, three-fourths, or all the water can be admitted to the wheel, and in each case get the same presentage from the amount of water used."

No. 23,012. Alonzo Chubb, of Painesville, Ohio, for an "Improved machine for bending wood."

"Having described the nature, construction, and operation of my improvements, what I claim therein as new, and desire to secure by Letters Patent, is, the following,—1st, I claim the combination and arrangement of the strap U with the guides M, in the manner and for the purposes set forth. 2nd, I claim making the guides adjustable by the use of the slots therein, and of corresponding ones in the bed timbers, as shown, and for the purposes set forth."

No. 23,013. Thos. W. Currier, of Lawrence, Mass., for an "Improved triangular stand for furniture."

"I claim the arrangement of the triangular plates B and C, with legs A, on the axle E, as and for the purpose specified."

No. 23,014. Wm. C. Davol, of Fall River, Mass., for an "Improved vegetable cutter."

"I do not claim, separately, any of the parts herein shown and described; but having thus described my invention, what I do claim as new, and desire to secure by Letters Patent, is, the bed plate A, having the hopper D attached, provided with the follower E, the vibrating plate lever B, provided with the double-edged knife C, and hook *f*, and attached to the bed plate A, the whole being arranged and combined to operate as and for the purpose set forth."

No. 23,015. Henry N. Degraw, of Green Island, N. Y., for an "Improved bootjack."

I am aware that bootjacks with movable jaws have heretofore been constructed; I do not lay claim, therefore, on this part of my invention; but, having thus described my invention, what I do claim as new, and desire to secure by Letters Patent, is, the arrangement of a guide piece G for the purpose of operating the jaws C, as herein described, in combination with a swinging platform D, which rests on pivots *c* at points between its front and back ends, so that it can be operated by throwing more or less weight on the heel or on the toes of the foot placed on the same, substantially in the manner and for the purpose specified."

No. 23,016. Benneville Dewalt and Chas. E. Schrader, of Reading, Pa., for an "Improved meat cutter."

"What we claim, and desire to secure by Letters Patent, is, the arrangement of the knives D in a screw form in different directions from the ends of the cylinder B to the centre thereof, to discharge the meat at the adjustable opening F in the bottom, in the manner and for the purposes described."

No. 23,017. M. Doherty, of Boston, Mass., for an "Improvement in cricket bats."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, constructing the blade of the bat of a wooden shell with a filling of cork or other elastic material, substantially as described. 2nd, constructing the handle of the bat of a wooden tube with a central strip of whalebone or other elastic material of similar character running down into the blade, substantially as herein described."

No. 23,018. John Evans, of New Haven, Conn., for an "Improved machine for bending and setting springs."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is,—1st, the adjustable or sectional bed formed of the bars *i* connected to the weights *k*, and arranged, substantially as shown, for the purpose specified. 2nd, the adjustable clamps or straighteners formed of the strips *b*, *e*, placed on rails or bars F, G, and arranged as and for the purpose set forth. 3rd, the adjustable or sectional bed formed of the bars *i*, as described, and the adjustable clamps or straighteners formed of the strips *b*, *e*, placed on the rails F, G, in combination with the adjustable dies M, M, arranged to operate as and for the purpose set forth."

No. 23,019. James L. Fagan, of Anagua, Texas, for an "Improved pump."

"I do not claim, separately, any of the parts herein shown and described, irrespective of their particular arrangement and adaptation for a submerged pump, for rotary pumps, or those having a partial rotating reciprocating movement, have been arranged similarly to the within-described invention; but, having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the cylinder A and hollow shaft B, connecting with each other, as shown, and having a reciprocating, partially rotating movement, when said cylinder is perforated, as at *h*, and provided with valves *i*, and also provided with the piston G, with the stationary plate I fitted within it, the whole being arranged as and for the purpose set forth."

No. 23,020. Winfield S. Foster, of Marilla, N. Y., for an "Improved clothes rack."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the rods B and heads A, C, with the side pieces of the expanding clothes rack, in the manner and for the purpose specified."

No. 23,021. James H. Freeto, of Wheaton, Ill., for an "Improvement in coffee-pots."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement of valves *i* and *l*, in the condensing chamber H, in connection with the pipes L and K, whereby the steam which escapes through the valve *i* is carried off and deposited in a liquid state, into the spout, while at the same time, by the action of the steam, a jet of cold water is admitted into the chamber H, substantially as and for the purposes specified. And I also claim closing the opening *c*, through which the spout D communicates with the coffee-pot A, by means of a flat valve E, which is operated by a rod *d*, when the same is applied to a coffee-pot, which is hermetically closed by a gasket *g*, in connection with the air tube *o*, substantially as and for the purpose specified."

No. 23,022. Geo. W. Gardner, of Troy, N. Y., for an "Improvement in moulding covers of cook stoves."

"Having thus set out my invention, what I claim as new, and desire to secure by Letters Patent, is, combining with that part of the pattern which gives form to the recess of the cover the pivoted projections, as and for the purposes herein set forth."

No. 23,023. John M. Hall, of Warrenton, Geo., for an "Improvement in ploughs."

"Having thus described my invention, what I claim is, the arrangement of the adjustable coulter bar C, point *f*', holes *f*, shoe F, mole board E, adjustable screw bolt D, attachment Z, pins *g*, key *h*, bolts *j*, and slot in beam A, operating as described, and for the purposes set forth."

No. 23,024. John S. Hall, of Manchester, Pa., for an "Improvement in plough beams."

"Having thus fully described the nature and object of my invention, I would state, that I do not claim a tubular plough beam; but what I do claim as new, and desire to secure by Letters Patent, is, an iron or steel plough beam of an inverted 'U' form throughout its main length, and welded or compressed at its ends, and so made as to be capable of receiving the top of the standard into its hollow portion, and be otherwise conveniently connected to or with the other portions of the plough, and so as to make a cheap and efficient junction of the several parts thereof, and produce a cheap, strong, and durable plough beam, as herein set forth."

No. 23,025. W. O. Hickok, of Harrisburgh, Pa., for an "Improved machine for cutting straw and hay."

"I do not claim, broadly, connecting the pinion on the cutter shaft, with the feed rollers vibrating in guides; neither do I claim the arrangement of a shaker between the feed rollers and the cutters; but what I claim as new, and desire to secure by Letters Patent, is, the arrangement in combination with the upper or yielding feed roller (E) and the cutter shaft (*f*) of the coupling lever (G), when the said lever (G) connects the said feed roller (E) with the cutter shaft (*f*), by having its fulcrum around the said shaft (*f*), and also carries the pinion (6) which connects the pinion (7) of the shaft (*f*) with the spur wheel (8) of the near journals of the feed roller (E), as set forth, the journals of the said feed roller (E) working in grooves (*x*), which are curved, so as to

be concentric with the said cutter shaft (*f*), as described, the same operating together in the manner and for the purposes set forth and described."

No. 23,026. Chas. Hilton, of Albany, N. Y., for an "Improvement in railroad splice for R. R. track bars."

"I do not claim the use of the plates nor the wedge, broadly; but I do claim deep wrought iron fish-plates secured to the sides of the rails by bolts or keys, and extending downward below the base of the rail, in combination with the gib and wedge, substantially in manner and for the purposes set forth in the within specification."

No. 23,027. N. E. Hinds, of Cooperstown, N. Y., for an "Improvement in horse and ox shoes."

"What I claim as my invention, and wish to secure by Letters Patent of the United States, is, I claim the curved or semi-circular form of the heel calks, with the corners thereof turned inwards, or towards the central part of the shoe."

No. 23,028. L. B. Hoit, of New York, N. Y., for an "Improvement in fountain brushes."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent as a new article of manufacture, is, a marking brush, consisting of a cistern A, which is provided with a stationary valve *c*, and having the brush attached to a conical tube G, which fits into a shell E, and otherwise constructed, substantially as herein described."

No. 23,029. Moses G. Hubbard, of Penn Yan, N. Y., for an "Improvement in harvesters."

"Having thus fully described my apparatus, and its purposes, what I claim as my invention, and desire to secure by Letters Patent, is, the combination of the curved portion of the finger bar, hinged at "*a*," with the spring "*d*," forming a yielding and elastic corner or point of attachment, of sufficient strength to securely connect the cutting apparatus thereto, substantially as and for the purposes set forth. I also claim the auxiliary adjustable spring "H," or its equivalent, substantially as and for the purposes described."

No. 23,030. Edwd. Kendall, of Cambridgeport, Mass., for an "Improvement in steam-boilers."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the arrangement of the water walls A, A, B, B, the suspended water spaces F, F, flues H, H, fire-box G, lower and upper smoke boxes J, M, and tubes L, L, within the shell of the boiler, substantially as herein set forth. 2nd, in combination with the above-described arrangement of water spaces and heating surfaces, I claim the arrangement of the hollow fire bridge O, the pipes *a*, *a*, and *b*, the cylinder N, and pipes *c*, *c*, the whole operating substantially as herein set forth. 3rd, the arrangement of the passages for the gaseous products of combustion, the exhaust steam, and the air in the air heater, substantially as and for the purpose herein set forth."

No. 23,031. Zebulon Kinsey, of Dubuque, Iowa, for an "Improvement in packing bar lead."

"What I claim, and desire to secure by Letters Patent, is, the use of the bar or bolt B, made substantially as described, when inserted in perforations made in bars or ingots, and clenched or fastened in the manner substantially and for the purpose aforesaid."

No. 23,032. Thos. W. Lane, of Meredith, N. H., for an "Improved steam-pressure gauge."

"What I claim as my invention, and desire to secure by Letters Patent, is, so combining the indicating tube with the pipe through which the pressure within the boiler is transmitted to the gauge that the length of tube, in either direction from its junction with the pipe, shall not exceed a semi-circle, and placing the tube in such a position that it shall descend at every point towards its junction with and drain back into the pipe. 2nd, I claim joining the pipe from the boiler with the indicating tube at a point between its two ends, and bending the latter, as set forth, so that the ends of the tube shall be nearly over the points where its two branches are rigidly supported, whereby the tube is rendered less sensitive to the vertical shocks to which it is subjected. 3rd, I claim bending the two portions of the indicating tube symmetrically, or nearly so, upon opposite sides of a vertical line, as described, and connecting the two extremities of the tube with the lever *i*, as set forth, for the purpose of preventing the horizontal vibrations of the tube from being transmitted to the index hand. 4th, I claim pivoting the lever *i* to the indicating tube without attachment to the case, for the purpose specified."

No. 23,033. Robt. B. Lawton and Wm. H. Bliss of Newport, R. I., for an "Improvement in hose coupling."

"We do not claim connecting the two parts or thimbles C, D, together, by means of a screw or pin passing through one thimble and fitting in a groove in the other, for such coupling or connection is well known, and has been used, if not for the same, for analogous purposes; but, having thus described our invention, what we do claim as new, and desire to secure by Letters Patent, is, the two thimbles C, D, attached to the ends of the hose A, B, the thimble C being provided with the shoulder *b* and ground seat or packing *c*, and the thimble D provided with the groove *e*, with inclined sides, and fitted within thimble C, the above parts being used in connection with the conical roller or rollers *g*, fitted in the screw caps *i*, and the whole arranged to operate as and for the purpose set forth."

No. 23,034. Joseph L. Lowry, of Pittsburgh, Pa., for an "Improvement in fire-plugs."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is,—First, making a single chamber serve the purpose of a cross pipe, when each main leading into said chamber is furnished with its own stop cock, and access is had to each stop cock through said chamber for repairs, &c., thus making one chamber and one cover common to two, three, four or more mains, substantially as herein set forth. I also claim arranging the fire plug immediately over the chamber for the purpose of effecting a circulation of the water in the pipe between the main and the fire plug, to prevent its freezing, as herein stated. I also claim, in combination with the valve *v* and its wings *w*, as described, the hollow set screws *s* for, wasting the water from the fire plug when said valve is closed, substantially as described. I also claim the removable gasket *c* in the ends of the branches or bowls *y*, so as to renew the seats for the valves *b*, when necessary, without disturbing the main or stop cock, access to these gaskets being through the common chamber *j*, as herein stated."

No. 23,035. Louis Mabille, of New York, N. Y., for an "Improvement in watch cases."

"I do not claim the movable plate D, when applied and fitted to and combined with the case, otherwise than as herein described; but what I claim as my invention, and desire to secure by Letters Patent, is, the construction of the case, substantially as herein described, with the front plate D fitted to the ring or frame C, with a projecting rim *e*, and bezel *i*, all the way round, when combined with an internal cavity, *d*, *d*, in the back, to receive and contain the said plate when removed from the front."

No. 23,036. Saml. Marshall, of Wilmington, Del., for a "Curtain lock for carriages."

"What I claim as my invention, and desire to secure by Letters Patent, is, the employment of the two metal plates, constructed as described, in combination with the button and button hole of the carriage and curtain, and with the spring fastening; the whole being arranged and used in the manner and for the purposes herein set forth."

No. 23,037. Alexr. Miller, of Cleveland, Ohio, for an "Improved water-gauge for steam-boilers."

"I do not claim, broadly, attaching an index to the stem of the alarm valve of an alarm water-gauge; but what I claim as my invention, and desire to secure by Letters Patent, is, operating the valve *d* of an alarm gauge to produce the alarm when necessary, by means of a cam or wiper, *h*, on the valve stem D, and a stationary inclined projection *g*, on the socket or tube A, or its equivalent, the several parts being arranged and applied in combination with a float attached to the stem, substantially as herein set forth."

No. 23,038. James Montgomery, of New York, N. Y., for an "Improvement in corrugated iron pavement."

"I claim as new, and of my invention, and desire to secure by Letters Patent, 1st, the arrangement and combination substantially as described, of the unequal ribs or corrugations A and B, for the purpose set forth. 2nd, the described form and application of the laterally projecting spurs C, for the purposes explained. 3rd, the dovetailed groove shown in fig. 4, applied to metallic paving, and employed as set forth, to retain within it concrete and other matter."

No. 23,039. Henry Montgomery and Simeon Howes, of Silver Creek, N. Y., for an "Improvement in grain separators."

"Having thus fully described our improvements, what we claim as our invention, and desire to secure by Letters

Patent, is, the aperture U, when situated immediately below the inclined board S, and in combination therewith, for the purpose specified."

No. 23,040. L. F. Munger, of Rochester, N. Y., for an "Improvement in locks."

"I am aware that sliding tumblers have been previously used, and also saw plate or thin flat keys provided with notches of varying depths, corresponding with the varying positions of the slots in the tumblers; I therefore do not claim, separately, the above parts; but, having thus described my invention, what I claim as my invention, and desire to secure by Letters Patent, is, the arrangement and combination of the knob E, with the tumblers C, and bolt B, the said knob having studs (*g*) and (*h*) out of line with each other; one stud (*h*) being in line with the bolt, and the other stud (*g*) being in line with the tumblers; so that when the key G is inserted, one of the studs (*g*) shall pass by the tumblers while the bolt B is shot out by the other stud (*h*), and when the key G is withdrawn, and the direction of knob E reversed, the stud (*g*) shall lift the tumblers, and thus prevent the picking of the lock by the insertion of a key, all as herein shown and described, for the purpose set forth."

No. 23,041. Putnam D. Nichols, of Hartford, Conn., for an "Improved screw-plate."

"I do not claim as new the circular dies. What I claim as my invention, and desire to secure by Letters Patent, is, the adjusting steady pins and set screws, with the sliding plate K attached to the regulating rod and screw G, H, in the manner as described, in combination with the method of adjusting and regulating the dies for operation, in the manner substantially as set forth."

No. 23,042. Henry Oliver, of Philadelphia, Pa., for an "Improvement in brooches, ear-rings, &c."

"I am aware that sun pictures have been produced upon the inner surfaces of planes of transparent material, and that temporary concave fields have been suggested to overcome the spherical aberation of the lenses in the production of pictures having a plane surface; but what I claim as my invention is, photographic or sun pictures upon concave surfaces of glass, and backing it up with cement, in the manner and for the purpose substantially as above specified."

No. 23,043. Rufus Porter, of Washington, D. C., for an "Improved blind fastening."

"What I claim as my invention is, the combination of the lateral catches with the elevated finger socket, the whole consisting of a single plate, which is so formed that while the catch end thereof is horizontal and constitutes right and left catches, and is connected to the bottom of the shutter, the opposite end is vertical, and is connected to the face of the shutter at some distance above the bottom thereof, and constitutes a finger socket or hook near the hinged edge of the shutter, to be drawn back by a finger for the purpose of unfastening the shutter (when open), and closing the same, as herein described."

No. 23,044. Chas. W. Richter, sr., of Madison, Geo., for an "Improvement in lamps."

"I claim the combination of chamber D and tubes I, I, and T, with the non-conducting medium C, *c*, above plate P, the arrangement being substantially as described. I also claim the manner of moving the wick within the tube T, in combination with the construction above described."

No. 23,045. Saml. Samuels, of Brooklyn, N. Y., for "Improved stalls for horses on shipboard."

"What I claim as my invention, and desire to secure by Letters Patent, is, suspending a horse box on board of a ship or other vessel on pivots or centres, having their axes arranged transversely to the box, and parallel or thereabouts with the length of the vessel, substantially as and for the purpose herein set forth. And I also claim combining a series of two or more so suspended boxes, substantially as and for the purpose herein described."

No. 23,046. Joseph Saxton, of Washington, D.C., for an "Improvement in seal presses."

"What I claim as my invention, and desire to secure by Letters Patent, is,—First, a sealing press operated by a lever, to which the stamp is attached by an adjustable joint, the whole being adapted to the purpose of sealing with fusible metal or alloy, substantially as above described. Secondly, the guard for retaining the excess of metal driven off from the seal in the act of making the impression."

No. 23,047. Henry C. Spalding, of Brooklyn, N. Y., for "Improved curtain fixtures."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, the narrow rim *f*, in combination with a roller having end play, as described. 2nd, the combination of the roller, flange, and cord, as set forth. 3rd, the combination of the two hangers with the roller, the cord, and the rack, constructed substantially as described, and operating in the manner set forth."

No. 23,048. Henry C. Spalding, of Brooklyn, N. Y., for an "Improved treadle stand."

"What I claim as my invention, and desire to secure by Letters Patent, as a new and improved article of manufacture, is, a self-sustaining skeleton treadle frame, composed of sections secured together at right angles, substantially as described, so that the frame is self-braced crosswise, and lengthwise with the table which it supports."

No. 23,049. Robt. R. Taylor, of Reading, Pa., for an "Improvement in apparatus for ventilating R. R. cars."

"I do not desire to claim, broadly, the forcing of air into railway cars by a blowing apparatus operating by the axles, as such a device is described in the Patents of R. Cook, Aug. 19th, 1851, and J. H. Taylor, Oct. 30th, 1855; nor do I claim an air pump or air pumps operated by the axles, as they have been heretofore used in connection with pneumatic car springs; I also disclaim the rotating ventilating valves M, the same, or their equivalents, having been heretofore used; but I claim, and desire to secure by Letters Patent, the blowing cylinder G hung to one of the trucks of the car, and operated from one of the axles by means of an eccentric D or other equivalent device, in combination with the flexible or self-accommodating inlet and discharge pipes I and H, and the distributing pipes K, the whole being arranged substantially as and for the purpose herein set forth."

No. 23,050. G. H. Waldin, of Burlington, Iowa, for an "Improved chuck for watchmakers' lathes."

"What I claim by my invention, and desire to secure by Letters Patent, is, the use of the cylindrical core or spindle C in connection with the thimble *d* for containing sealing wax, or its equivalent, the whole constructed and operated as specified."

No. 23,051. J. L. G. Ward, of Adrian, Mich., for an "Improvement in cementing roofs."

"I do not claim, broadly, the use of alkaline silicates applied as a protection to the walls or other parts of buildings; but what I claim as my invention, and desire to secure by Letters Patent, is, the covering of roofs of buildings by laying bricks or tiles or slabs of other material in a bed of cement, consisting of an alkaline silicate, and subsequently treating the surface of said cement with an acid which combines with the alkali thereof and leaves a surface of pure silica, substantially as herein described."

No. 23,052. Francis F. Wells, of Texana, Texas, for an "Improvement in pessaries."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination with the ring A of the hinge jointed and slotted standing supports *c*, *c*, and their stem *d*, the hinged sliding support *g*, the hinged arm *i*, the collar *m*, or its equivalent, and the plate B, the whole applied and operating in relation to each other, substantially as herein set forth."

No. 23,053. Chas. Weston, of Salem, Mass., for an "Improvement in apparatus for handling hides."

"Having thus fully described my improvements, I shall state my claim as follows:—What I claim as my invention, and desire to have secured to me by Letters Patent, is, the apparatus herein described for keeping hides in motion while exposed to the action of the tanning liquid, the same consisting of parts constructed and arranged in relation to each other, as described, so as to operate substantially in the manner and for the purposes set forth."

No. 23,054. Philip P. Weis and F. Schutte, of Philadelphia, Pa., for an "Improved feeding mechanism for sawing machines."

"We claim, and desire to secure by Letters Patent, the adjustable frame N with its rollers *h*, the pressure frame P with its rollers *i*, and the feeding screws M, in combination, the whole being arranged substantially as and for the purpose specified."

No. 23,055. C. P. Wilhelm, of Bridgeport, Pa., for an "Improvement in key-bolt for attaching carriage thills."

"I do not claim as new of themselves either the key-bolt or the spiral spring; but what I do claim as new, and desire to

secure by Letters Patent, is, the manner described of fastening shafts and poles to carriages by the arrangement of the bolt B, *b*, spiral spring *c*, and clips c^1, arranged and operating as set forth."

No. 23,056. Walter A. Wood, of Hoosick Falls, N. Y., for an "Improvement in harvesters."

"Having thus fully described the nature and object of my invention, what I claim therein as new is,—First, connecting the bent bar J to the axle, and allowing its other end free vertical motion between guides, substantially in the manner described. I also claim in combination with the bent bar J, for sustaining the finger and cutter bars, the continuation of the finger bar, and its attachment to the main frame, substantially in the manner and for the purpose set forth."

No. 23,057. Walter A. Wood, of Hoosick Falls, N. Y., for an "Improvement in mowing machines."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, connecting the bent bar that carries the finger and cutter bar to the main frame by the spring plate M, and to the axle by the loop *d*, so that the finger bar may rise and fall independent of the wheel or main frame, or the main frame independent of the finger bar, substantially as herein described."

No. 23,058. Lewis S. Chichester, of New York, N. Y., assignor to David L. Wintringham, of Jersey City, N. J., for an "Improvement in machine for corking bottles."

"I do not claim broadly the employment or use of toggles for operating the bar F, for they are a well-known mechanical device, and have been used for analogous purposes; but having thus described my invention, what I do claim as new, and desire to secure by Letters Patent, is, the toggles E, E, frame G, and bar F, provided with the plungers *d*, in connection with an adjustable bottle stand K, and bar C, provided with the tubes *a*, a^1, a^{11}, for the purpose specified. I further claim the particular manner of adjusting the bottle stand K, to wit:—attaching the same to the frame G by means of the lever I, bar J, arms *k*, *k*, cross bars *m*, and plates *l*, substantially as shown and described."

No. 23,059. Chas. E. Clark, of Boston, Mass., assignor to himself and Geo. W. Clark, of Boston aforesaid, for an "Improvement in catamenial bandages."

"What I claim is, my improved manufacture of menstrual receiver, as made of two inflatable waterproof crescentic-shaped vessels, united by a waterproof septum, and arranged together and with the septum, and provided with means of supplying them with air and discharging it therefrom, substantially as specified."

No. 23,060. Moses G. Farmer, of Salem, Mass., assignor to Wm. F. Channing, of Boston, Mass., for an "Improved electro-magnetic fire alarm apparatus."

"Claim.—What I claim as my invention, and desire to secure by Letters Patent, is, the combination of two or more key-boards or fire alarm strikers, constructed and operating substantially as described, with one or more electro-telegraphic alarm machines, in the same closed electric circuit, or independent closed electric circuits, by means of a mechanism that will make and break a circuit, as herein shown and described."

No. 23,061. Jonathan Good, of Philadelphia, Pa., assignor to himself and B. L. H. Dabbs, of said Philadelphia, for an "Improvement in R. R. car seats and couches."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement and combination of the pivoted horizontally and vertically moving plate C, curved ratchet plates J, rack extension D, and pinion (C), as and for the purpose herein shown and described."

No. 23,062. Wm. Hinds, of Little Falls, N. Y., assignor to Jerome Hinds, of same place, for an "Improvement in straw cutters."

"What I claim as my invention, and wish to secure by Letters Patent, is, the arrangement of the cutters *c*, *c*, in combination with the cutter *n*, fig. 1, constructed substantially as and for the purpose set forth."

No. 23,063. Lyman Hyde, of Ellenville, N. Y., assignor to the Ellenville Glass Company, for an "Improvement in machines for finishing carboys."

"I do not claim the 'shears' or formers C, for they have been previously used; but having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the 'shears' C, treadle F, or its equivalent mandrel *b*, and furnace B, placed within a suitable frame A, and arranged for joint operation, substantially as and for the purpose set forth."

No. 23,064. A. W. Morse, of Eaton, N. Y., assignor to himself and R. B. Robie, of said Eaton, for an "Improved bed bottom."

"Having set forth the construction and operation of my improved bed bottom, what I claim as my invention, and desire to secure by Letters Patent, is, the combination and arrangement of the rods B, gear wheels A, staples G, pins H, wires C, or their equivalents, lever F, ratchet roller D, pawl E, for the purpose of giving the proper tension lengthways and sideways simultaneously, substantially as set forth."

No. 23,065. L. R. Rockwood, of Worcester, Mass., assignor to J. L. Clough, of said Worcester, for an "Improvement in blacking."

"What I claim as new, and desire to secure by Letters Patent, is, edge blacking, when composed of the above mentioned materials, in the proportions and manner substantially as set forth and described."

Re-issue.

Saml. Friend and Geo. Seiler, of New York, N. Y., for "Extension finger ring."—Patented 21st December, 1858.—Re-issued 22nd February, 1859.

"What we claim as our invention, and desire to secure by Letters Patent, is, a divided springing ring, constructed substantially in the manner and for the purposes specified, whereby the springing of the ring permits the same to pass the joints, as set forth."

Design.

Wm. Loyd, of Philadelphia, Pa., for a "Design for stereoscope cases."

"What I claim as a new and ornamental design is, making a stereoscope case in the form of a book, as described and shown."

Additional Improvement.

Henry T. Smith, of Washington, D. C., for an "Improvement in spring bed bottoms."—Patented 6th October, 1857.—Additional Improvement, dated 22nd February, 1859.

"Having thus described my improvement in spring slatted bottoms for bedsteads, what I claim therein as new, and desire to secure by Letters Patent, is, supporting the fixed end of the longitudinal slats in spring bottoms bedsteads by means of longitudinal spring bars, substantially as described, so that the elasticity or yielding of both ends of the slats may be equalized, for the purpose set forth."

Errata in Journal of 8th March.

2472. For "Thomas Briggs, Smith," read "Thomas Briggs Smith."

2685. For "Edward" read "Edwin."

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities :—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).
Macclesfield (*Useful Knowledge Society*).
Manchester (*Chetham Hospital*).

Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States :—

Public Offices.

Admiralty, Steam Department.
———— Surveyor of Navy.
———— Deptford Dockyard.
———— Woolwich ditto.
———— Sheerness ditto.
———— Devonport ditto.
———— Portsmouth ditto.
———— Chatham ditto.
———— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec; Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Hanover—Ministerium des Innern, Hanover.

Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi posseno ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by BENNET WOODCROFT, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions, &c. By SIMON STURTEVANT. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By JOHN ROVINSON (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether NICHOLAS PAGE or Sir NICHOLAS HALSE was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent Nos.* 33 *and* 85, *respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. DUD DUDLEY'S Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638. Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by WILLIAM WHELER, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) EDWARD SOMERSET, Lord Marquis of WORCESTER, &c. &c. (*Stat.* 15 *Car. II c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By THOMAS SAVERY. (*Letters Patent, No.* 347, *dated 10th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By THOMAS SAVERY. (*Letters Patent, No.* 356, *dated 25th July*, 1698, *and Stat.* 10 *&* 11 *Will, III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By JOHN ALLEN, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By JONATHAN HULLS. (*Letters Patent, No.* 556, *dated 21st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By SAMUEL SUTTON, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent, No.* 602, *dated 16th March* 1744.) Price 1*s.*

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*

The following are in the press:—

PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c.

ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.

TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.

BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS.

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.

MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.

PRODUCTION AND APPLICATIONS OF GAS.

STEAM ENGINES.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE, Printers to the Queen's most Excellent Majesty.

(*Registered for transmission abroad.*)

No. 542. TUESDAY, MARCH 15, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

2453. VICTOR BLUMBERG, of Bloomfield Lodge, Notting Hill, in the county of Middlesex, Gentleman, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in the construction of slate billiard tables, which improvements are also applicable for other useful purposes."

As set forth in his petition, recorded in the said office on the 3rd day of November, 1858.

2461. And JOHN OXLEY, of Camden Town, has given the like notice in respect of the invention of "Improvements in carriages and wheel vehicles."

2467. And RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improvements in treating air and gases, and the employment of the same for obtaining motive power."—A communication.

2468. And ISHAM BAGGS, of Kennington, in the county of Surrey, Electrical Engineer, has given the like notice in respect of the invention of "Improvements in telegraphing by electricity."

As set forth in their respective petitions, all recorded in the said office on the 4th day of November, 1858.

2474. And ELLIS ROWLAND, of Manchester, in the county of Lancaster, Engineer, and JOHN DEWHURST, of the same place, Engineer, have given the like notice in respect of the invention of "Certain improvements in steam engines, and in the valves connected therewith, which said improvements in valves are also applicable to safety valves."

As set forth in their petition, recorded in the said office on the 5th day of November, 1858.

2481. And HERBERT NEWTON PENRICE, of Wilton House, near Norwich, has given the like notice in respect of the invention of "Improvements in machinery for tunnelling and driving galleries through rock and other strata."

2485. And JOHN CLIFF, of the Imperial Potteries, Lambeth, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in the construction of kilns for burning stoneware, redclay ware, porcelain, and all other kinds of earthenware."

As set forth in their respective petitions, both recorded in the said office on the 6th day of November, 1858.

2495. And JONATHAN WARDILL, of Commercial Road, East, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improvements in purchases for the raising and lowering of weights by means of chains especially applicable to ships, capstans, and windlasses."

2496. And THOMAS MACSWENEY, of 25, Rood Lane, in the city of London, has given the like notice in respect of the invention of "Improvements in steering apparatus."

2497. And WILLIAM HALE, of No. 6, John Street, Adelphi, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in rockets."

As set forth in their respective petitions, all recorded in the said office on the 8th day of November, 1858.

2503. And JOHN SAMUEL DAWES, of Smethwick House, near Birmingham, Gentleman, has given the like notice in respect of the invention of "A new or improved machine to be used for cultivating land, and which may be made applicable as a hoe, a skim, a turf or peat cutter, and a new or improved method of actuating the said machine and other machines used for like operations."

2504. And JOHN FARMERLY DICKSON, of No. 6, Russel Street, Litchurch, near Derby, in the county of Derby, Engineer, has given the like notice in respect of the invention of "Improvements in the construction of railway chairs and other details connected with the permanent way of railways."

2507. And ANDREW HENDERSON, of Gloucester Place, Portman Square, in the county of Middlesex, Master Mariner, has given the like notice in respect of the invention of "Improvements in vessels, and in applying rudders thereto."

2515. And RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improvements in electric telegraphing."—A communication.

2516. And ROWLAND MASON ORDISH, of Great George Street, Westminster, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in constructing the permanent ways of railways."

As set forth in their respective petitions, all recorded in the said office on the 9th day of November, 1858.

2520. And WILLIAM GARNETT TAYLOR, of Ashby de la Zouch, in the county of Leicester, has given the like notice in respect of the invention of "Improvements in removing the fur from skins, and preparing said skins for tanning."

2522. And EDWARD HUMPHREYS, of Deptford, Engineer, has given the like notice in respect of the invention of "Improvements in steam engines and boilers."

2527. And CHARLES TIOT JUDKINS, of No. 32, York Road, Lambeth, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "Improvements in gas regulators."

As set forth in their respective petitions, all recorded in the said office on the 10th day of November, 1858.

2529. And JAMES LEES, of Oldham, in the county of Lancaster, Tin Plate Worker, and WILLIAM LEES, of the same place, Engineer, have given the like notice in respect of the invention of "An improvement in the construction of oil cans."

2531. And FREDERICK HERBERT MABERLY, of Stowmarket, in the county of Suffolk, Master of Arts, has given the like notice in respect of the invention of "Improvements in the construction of ships of war and other vessels, their machinery and appurtenances."

2535. And JAMES RAE, of Alpha Road, New Cross, in the county of Kent, has given the like notice in respect of the invention of "Improvements in cisterns suitable for containing water for household uses."

As set forth in their respective petitions, all recorded in the said office on the 11th day of November, 1858.

2541. And DAN TURNER, of No. 90, High Street, Whitechapel, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in the manufacture of wood soles for clogs, boots, and shoes."

As set forth in his petition, recorded in the said office on the 12th day of November, 1858.

2543. And MARK NIELD MILLS and NATHAN SIDEBOTHAM, both of Ashton-under-Lyne, in the county of Lancaster, Machinists, have given the like notice in respect of the invention of "Certain improvements in looms for weaving."

2544. And JOHN BENYON, of Swinton, near the city of Manchester, Manager, and JOHN WARBURTON BRIDGE BOWDEN, of the same place, Manufacturer, have given the like notice in respect of the invention of "Certain improvements in looms for weaving."

As set forth in their respective petitions, both recorded in the said office on the 13th day of November, 1858.

2560. And THOMAS ROBERT BUTCHER, FREDERICK STEVENS, WILLIAM THOMAS JOHNSON, and THEOPHILUS JARVIS, of Frome, in the county of Somerset, Pianoforte Action Manufacturers, have given the like notice in respect of the invention of "Improvements in the hammer-rails of pianofortes."

2562. And GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, Saint Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in the process of finishing piled fabrics, and in apparatus employed in such process."—A communication.

As set forth in their respective petitions, both recorded in the said office on the 15th day of November, 1858.

2597. And WILLIAM CLARK, of No. 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "An improved bit or bridle for horses."—A communication from Léonard Varéille and Louis Henry Drevet.

As set forth in his petition, recorded in the said office on the 17th day of November, 1858.

2600. And ETIENNE BRICLLET, of No. 58, Torrington Square, county of Middlesex, has given the like notice in respect of the invention of "The obtaining of caloric by a new chemical and mechanical process."—A communication from Mr. Mundo, resident at Naples, in the kingdom of Sicily.

As set forth in his petition, recorded in the said office on the 18th day of November, 1858.

2738. And EDWARD JONES, of Dudley, in the county of Worcester, Manager of Ironworks, has given the like notice in respect of the invention of "An improvement or improvements in the manufacture of coke in ovens."

As set forth in his petition, recorded in the said office on the 1st day of December, 1858.

2964. And RICHARD HORNSBY, junior, of Spittlegate Iron Works, Grantham, in the county of Lincoln, has given the like notice in respect of the invention of "Improvements in ploughing and tilling land by steam power, and in apparatus employed therein."

As set forth in his petition, recorded in the said office on the 27th day of December, 1858.

59. And WILLIAM AUGUSTUS FREDERICK POWELL, of Bristol, in the county of Somersetshire, Potter, has given the like notice in respect of the inven-

tion of "Improvements in stopping or closing jars or bottles."
As set forth in his petition, recorded in the said office on the 19th day of January, 1859.

175. And THOMAS GREENWOOD and JOHN BATLEY, of Leeds, in the county of York, Machine Makers, have given the like notice in respect of the invention of "An improvement in the process of gassing textile fabrics."—A communication from H. Van den Berghe, residing at Rue de St. Georges, Courtrai, Belgium.
As set forth in their petition, recorded in the said office on the 20th day of January, 1859.

290. And GEORGE ARTHUR WALLER, of the city of Dublin, Brewer to Arthur Guinness, Son and Co., has given the like notice in respect of the invention of "Improvements in the means of, and apparatus for, expressing liquid from semi-fluid substances, and other substances containing liquid."

291. And MICHAEL LOAM, of Treskerby House, Truro, Cornwall, has given the like notice in respect of the invention of "Improvements in machinery for raising sewage and other waters and matters."
As set forth in their respective petitions, both recorded in the said office on the 1st day of February, 1859.

328. And JOHN HONEYMAN, of Glasgow, in the county of Lanark, North Britain, Miller, has given the like notice in respect of the invention of "Improvements in the construction of ships, vessels, and boats, and in propellers for propelling the same."

329. And ANDREW BARCLAY, of Kilmarnock, in the county of Ayr, North Britain, Engineer, has given the like notice in respect of the invention of "Improvements in electric, magnetic, or electro-magnetic telegraph ropes or conductors, and in machinery or apparatus to be used on board ship, for laying or paying out the same."
As set forth in their respective petitions, both recorded in the said office on the 4th day of February, 1859.

368. And GEORGE BOWER, of St. Neots, in the county of Huntingdon, Gas Engineer, has given the like notice in respect of the invention of "Improvements in apparatus for the manufacture of illuminating gas."
As set forth in his petition, recorded in the said office on the 9th day of February, 1859.

380. And BENJAMIN BURROWS, of Leicester, has given the like notice in respect of the invention of "Improvements in looms for weaving narrow fabrics."
As set forth in his petition, recorded in the said office on the 10th day of February, 1859.

391. And JAMES GRIMES, of No. 6, Osborne Street, Whitechapel, Pewterer and Beer Engine Manufacturer, has given the like notice in respect of the invention of "Improvements in beer engines."
As set forth in his petition, recorded in the said office on the 11th day of February, 1859.

405. And ROBERT BELL, of Paris, in the empire of France, and of the Office for Patents, No. 4, Trafalgar Square, Charing Cross, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in separating and recovering wool from fabrics composed of wool, or wool in connection with cotton and other vegetable substances."
As set forth in his petition, recorded in the said office on the 12th day of February, 1859.

468. And GEORGE PAUL, of Glasgow, in the county of Lanark, North Britain, Mechanic, has given the like notice in respect of the invention of "Improvements in spindles and flyers."

469. And OBED BLAKE, of Blackwall, in the county of Middlesex, has given the like notice in respect of the invention of "Improved machinery or apparatus used in the manufacture of glass."

477. And RICHARD WILLIAM JOHNSON, of Oldbury, in the county of Worcester, Railway Carriage Builder, and WILLIAM STABLEFORD, of the same place, Manager, have given the like notice in respect of the invention of "Improvements in axle boxes."

478. And JOSEPH SCHLOSS, of Cannon Street, in the city of London, Manufacturer, has given the like notice in respect of the invention of "An improvement in locks or clasps for porte-monnaies, pocket books, bags, and other like purposes."—A communication from Vve. Henry Schloss and Frère, residing in Paris.
As set forth in their respective petitions, all recorded in the said office on the 21st day of February, 1859.

481. And JOSEPH GRIMOND, of the city of Manchester, in the county of Lancaster, Manufacturer, has given the like notice in respect of the invention of "Improvements in the treatment and preparation of jute and other fibrous materials, and in machinery or apparatus employed therein."

485. And EDWARD LUND, of Manchester, in the county of Lancaster, Gentleman, has given the like notice in respect of the invention of "Certain improvements in the manufacture of fabrics or textures to be used in the construction of umbrellas and parasols."
As set forth in their respective petitions, both recorded in the said office on the 22nd day of February, 1859.

503. And JOSEPH CROSLAND, of Crosland Moor, Huddersfield, in the county of York, Manufacturer, has given the like notice in respect of the invention of "Improvements in looms for weaving textile fabrics."
As set forth in his petition, recorded in the said office on the 24th day of February, 1859.

522. And WILLIAM BURGESS, of the firm of Burgess and Key, of Newgate Street, in the city of London, Agricultural Implement Makers, has given the like notice in respect of the invention of "An improvement in reaping and mowing machines."
As set forth in his petition, recorded in the said office on the 26th day of February, 1859.

527. And JOHN LEIGH, of the city of Manchester, in the county of Lancaster, Surgeon, has given the like notice in respect of the invention of "Improvements in the purification of coal gas."

530. And JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like

notice in respect of the invention of "Improvements in apparatus for taking soundings, applicable also to the throwing of life lines."—A communication from William P. Trowbridge, residing at Washington, Columbia, in the United States of America.

As set forth in their respective petitions, both recorded in the said office on the 28th day of February, 1859.

538. And JAMES HOLROYD, of Leeds, in the county of York, Cloth Finisher, has given the like notice in respect of the invention of "An improvement in finishing woollen cloths and cloths made from a combination of wool and other materials."

As set forth in his petition, recorded in the said office on the 1st day of March, 1859.

569. And HORATIO LEONARD, of the state of Massachusetts, of the United States of America, has given the like notice in respect of the invention of "An improvement in the manufacture of paraffine candles."

570. And WILLIAM TUCKER, of the state of Massachusetts, of the United States of America, has given the like notice in respect of the invention of "An improvement in bit stocks or auger handles."

As set forth in their respective petitions, both recorded in the said office on the 3rd day of March, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

15*th March*, 1859.

2091. EDWARD SMYTH, of Brixton, in the county of Surrey, for an invention of "Improvements in swimming belts and life preservers."—Dated 15th September, 1858.

2093. WILLIAM GARNETT TAYLOR, of Ashby-de-la-Zouch, in the county of Leicester, Gentleman, for an invention of "Improvements in the manufacture of gloves."—Dated 15th September, 1858.

2099. CHARLES FRÉDERIC VASSEROT, of 45, Essex Street, Strand, London, Patent Agent, for an invention of "Machinery or apparatus for dressing and finishing fabrics."—A communication from Pierre Labérie, residing at Mazamet (Tarn), in the empire of France.—Dated 17th September, 1858.

2102. CHARLES HADLEY, of Lower Hurst Street, Birmingham, for an invention of "Improvements in omnibusses, cabs, railway carriages, waggons, and other similar vehicles."—Dated 17th September, 1858.

2105. JOZÉ LUIS, Patent Agent, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, for an invention of "Improvements in the application of gutta percha for clogs, galoches, shoes, and boots, and for the apparatus connected therewith."—A communication from a Foreigner residing abroad. — Dated 18th September, 1858.

2115. EWALD RIEPE, of Sheffield, in the county of York, Engineer, for an invention of "An improvement in the casting of steel."—Dated 20th September, 1858.

2121. JOHN BETHELL, of No. 8, Parliament Street, Westminster, Gentleman, for an invention of "Improvements in treating pyrites." — Dated 21st September, 1858.

2127. JOHN HOPE, of the state of Rhode Island, of the United States of America, for an invention of "An improved calico printing roller."—Dated 22nd September, 1858.

2139. THOMAS CALLENDER HINDE, of Dudley, in the county of Worcester, Iron Merchant, for an invention of "An improvement or improvements in the manufacture of iron and steel."—Dated 23rd September, 1858.

2147. RUDOLPH BODMER, of 2, Thavies Inn, Holborn, in the city of London, for an invention of "An improved apparatus for preventing explosion in steam boilers."—A communication from a Foreigner residing abroad.—Dated 24th September, 1858.

2151. GEORGE LEONARD TURNEY, of Aldermanbury, in the city of London, Needle Manufacturer, for an invention of "An improved mode of packing pins for sale."—Dated 24th September, 1858.

2157. WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for an invention of "Improvements in purifying natural phosphates of lime."—A communication from Emile Constant Martin, residing at Paris, in the empire of France, formerly Banker. —Dated 25th September, 1858.

2241. WILLIAM AUGUSTUS MUNN, of Throwley House, near Feversham, in the county of Kent, (late a Major in the East Kent Regiment of Militia,) a Deputy Lieutenant and Justice of the Peace for the said county of Kent, for an invention of "Improvements in horse-hoes."—Dated 8th October, 1858.

2479. ROBERT EARDLEY PINHEY, of Woolstan, in the county of Hampshire, and JOHN WOOD, of 58, High Street, Southampton, in the town and county of Southampton, Hampshire, for an invention of "Improvements in apparatus for ascertaining the variation of ships compasses for local errors."—Dated 5th November, 1858.

2613. GEORGE HOWE, Engineer, and JOHN NORTON, Plumber, both of Sheffield, in the county of York, for an invention of "An improved method of boiling water or worts for brewerys, distillerys, &c. by steam, or for heating rooms, public buildings, churches, chapels, factories, &c."—Dated 19th November, 1858.

2791. GEORGE SNELL, of Leeds, in the county of York, Cloth Finisher, for an invention of "Improvements in machinery or apparatus for cutting woollen fabrics."—Dated 6th December, 1858.

53. EDWIN HEYWOOD, of Halifax, in the county of York, for an invention of "Improvements in weaving."—Dated 7th January, 1859.

93. JOHN THOMSON, of Dundee, in the county of Forfar, Manufacturer, for an invention of "Improvements in the manufacture of rugs."—Dated 12th January, 1859.

207. CHRISTIAN SHARPS, of Philadelphia, in the state of Pennsylvania, United States of America, Manufacturer of Fire-arms, for an invention of "Improvements in breech loading repeating fire-arms."—Dated 22nd January, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 12th March, 1859, inclusive.*)

10th March.

592. John Fowler, junior, of Havering, near Romford, in the county of Essex, for an invention of "An improvement in the manufacture of bricks and tiles."—Dated 11th March, 1856.

598. Edmund Alfred Pontifex, of the firm of Pontifex and Wood, of Shoe Lane, in the city of London, Chemical Manufacturers, for an invention of "Improvements in the manufacture of tartaric and citric acids, and tartrate of potash and soda."—Dated 12th March, 1856.

612. Thomas Porter, of Manchester, in the county of Lancaster, Merchant, for an invention of "Improvements in looms for weaving carpets, coach lace, velvets, and other piled fabrics."—A communication.—Dated 13th March, 1856.

619. William Yates, of Bromley, in the county of Middlesex, Engineer, for an invention of "An improvement in furnaces."—Dated 14th March, 1856.

632. Joseph Pegg, of Monk Wearmouth, in the county of Durham, Ship Owner, for an invention of "Improved steering apparatus."—Dated 15th March, 1856.

11th March.

625. Edwin Thomas Wright, of Wolverhampton, in the county of Stafford, Engineer, for an invention of "An improvement or improvements in the manufacture of steam-engine boilers, iron ships and boats, and such other vessels and things as are or may be made by rivetting together metal plates."—Dated 15th March, 1856.

12th March.

618. Phillip Marcus, of Well Street, in the county of Middlesex, Outfitter, for an invention of "An apparatus for working the damper in steam-engine furnaces."—A communication from John Taylor, of New Jersey.—Dated 14th March, 1856.

622. Charles Coates, of Sunnyside, near Rawtenstall, in the county of Lancaster, Manager, for an invention of "Improvements in apparatus for communicating motion to machinery used in bleaching, printing, dyeing, and finishing fabrics."—Dated 15th March, 1856.

List of Specifications, &c. published during the week ending 11th March, 1859.

No.	Price.	Subject-Matter.
1766	10*d.*	Sewing machines.
1767	3*d.*	Rolling iron.
1768	1*s.* 5*d.*	Pneumatic and hydraulic machines.
1769	1*s.* 8*d.*	Machinery for cutting and screwing the ends of tubes.
1770	3*d.*	Propelling vessels.
1771	3*d.*	Apparatus for looping up dresses, &c.
1772	3*d*	Manufacture of metallic hoops, bands, &c.
1773	3*d.*	Electric telegraph cables and wires.
1774	9*d*	Feeding steam boilers with water.
1775	10*d.*	Looms for weaving.
1776	6*d.*	Truss.
1777	3*d.*	Machine for pulverizing shell, horn, and whalebone.
1778	4*d.*	Waterproof tube, &c.
1779	6*d.*	Machine for the manufacture of wheels.
1780	5*d.*	Penholder.
1781	9*d.*	Machinery for preparing and spinning flax, wool, &c.
1782	9*d.*	Machinery for weaving plain or figured fabrics.
1783	3*d.*	Manufacture of paper, &c.
1784	3*d.*	Shearing machines.
1785	8*d.*	Knitting frames.
1786	3*d.*	Manufacture of cast-steel and wrought-iron ingots, &c.
1787	3*d.*	Bridges and girders.
1788	6*d.*	Manufacture of lace.
1789	3*d.*	Ornamenting textile fabrics.
1790	3*d.*	Hats.
1791	1*s.* 2*d.*	Manufacture of gas, coke, &c.
1792	3*d.*	Railway signal.
1793	3*d.*	Treating sewage, &c.
1794	10*d.*	Permanent way, watercourse, &c.
1795	3*d.*	Washing machine.
1796	3*d.*	Paints for coating iron ships, &c.
1797	6*d.*	Manufacture of electric telegraph cables.
1798	3*d.*	Metallic alloy.
1799	6*d.*	Agricultural steam engines, &c.
1800	5*d.*	Twisting bobbin.
1801	1*s.* 3*d.*	Covering, doubling, and twisting machine.
1801	7*d.*	Printing presses.
1803	8*d.*	Manufacture of blocks for the construction of sewers and drains.
1804	7*d.*	Machinery for moulding or shaping metals.
1805	10*d.*	Apparatus for working railway breaks.
1806	3*d.*	Pianofortes.
1807	3*d.*	Pressure gauge.
1808	3*d.*	Floating batteries, lighthouses, &c.
1809	1*s.* 4*d.*	Operating railway breaks.
1810	10*d.*	Machinery for the manufacture of bricks and tiles.
1812	5*d.*	Manufacture of garden engines, &c.
1813	3*d.*	Fastenings for porte-monnaies, &c.
1814	7*d.*	Mariners' compass.
1815	7*d.*	Machinery for drawing and twisting wool, &c.
1816	3*d.*	Precipitation of purple colouring matter.
1817	3*d.*	Manure.
1818	3*d.*	Boots and shoes.
1819	3*d.*	Manufacture of saltpetre, &c.
1820	3*d.*	Composition for coating ships or vessels.
1822	10*d.*	Umbrella and parasol sticks.
1823	3*d.*	Manufacture of woollen bags.
1834	6*d.*	Saddles.
1862	3*d.*	Book slides.
1865	3*d.*	Folding bedsteads.
1885	7*d.*	Bradawl screw.
1895	3*d.*	Bearings and packings for shafts, &c.
1919	7*d.*	Fastenings for bags, portemonnaies, &c.
1928	1*s.* 4*d.*	Condensers for steam engines, &c.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

Errata in Journal of 11th March.

290. For "Guiness" read "Guinness."
After 438, for "1466" read "466."
496. For "pestles" read "kettles."
499. For "machinery for spinning" read "machines for spinning."

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il più gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c

Free Patent Museum and Library, South Kensington.

NUMBERS of VISITORS for the Week ending 12th March, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Mar. 7	Monday -	360	394	754—Fi. & Sho.
„ 8	Tuesday -	198	477	675—Fine.
„ 9	Wednesday	117	68	185— „
„ 10	Thursday*	127	—	127— „
„ 11	Friday -	80	—	80—Showery.
„ 12	Saturday -	262	—	262— „
	Total -	1144	939	2083

* The Museum closes at 5 o'clock.

Total number of visitors since the period of free daily admission (12th May, 1858) to 12th March, 1859, —76,095.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*

The following are in the press:—

PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE, Printers to the Queen's most Excellent Majesty.

(*Registered for transmission abroad.*)

No. 543. FRIDAY, MARCH 18, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2576. To WILLIAM BECKETT JOHNSON, Manager, and JOSEPH SHEPHERD, Foreman to Messrs. Richard Ormerod and Son, Engineers, of Manchester, in the county of Lancaster, for the invention of "Improvements in machinery or apparatus for adjusting the permanent way of railways."
On their petition, recorded in the Office of the Commissioners on the 16th day of November, 1858.

168. To JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in apparatus for making cigarettes."—A communication from Jacques Louis Lemaire Daimé, residing at Paris, in the empire of France, Merchant.
On his petition, recorded in the Office of the Commissioners, on the 19th day of January, 1859.

222. To HENRY OWEN, of Portswood, Southampton, in the county of Hampshire, for the invention of "Improvements in stockings."
On his petition, recorded in the Office of the Commissioners on the 24th day of January, 1859.

378. To GEORGE LOUIS STOCKS, of Bridge Road, Poplar, in the county of Middlesex, Ship Chandler, for the invention of "Improvements in steering apparatuses."
On his petition, recorded in the Office of the Commissioners on the 10th day of February, 1859.

448. To CHARLES FAY, of Manchester, in the county of Lancaster, Railway Carriage Builder, for the invention of "Improvements in apparatus for working railway breaks."
On his petition, recorded in the Office of the Commissioners on the 17th day of February, 1859.

502. To JAMES HOLMS, of Glasgow, in the county of Lanark, North Britain, Gentleman, for the invention of "Improvements in machinery or apparatus for propelling vessels, ships, and boats."
On his petition, recorded in the Office of the Commissioners on the 24th day of February, 1859.

512. To CHARLES WILLIAM SIEMENS, of John Street, Adelphi, in the county of Middlesex, for the invention of "Improvements in electric telegraphs and apparatus, and in supports for electric telegraphic line wires."—Partly a communication from Werner Siemens, residing at Berlin, in Prussia.
On his petition, recorded in the Office of the Commissioners on the 25th day of February, 1859.

548. To JOHAN VALDA, of London, in the county of Middlesex, for the invention of "Improvements in studs and other like fastenings for dresses, belts, or other purposes."

550. To ROBERT HANHAM COLLYER, of Alpha Road, in the county of Middlesex, Doctor of Medicine and Civil Engineer, for the invention of "A process of preparing materials for the manufacture of paper, and a machine employed therein, which machine is applicable for crushing, grinding, bruising, and reducing various substances."

552. To FREDERICK JOHN JONES, of Aldermanbury, in the city of London, Manufacturer, for the invention of "An improvement in buckles and clasps."

554. To ETIENNE ROCHE, of Marseille, town in the French empire, Manufacturer, for the invention of "Improvements in the manufacture of paper suitable for forming cigarettes and for

other purposes, and also improvements in the manufacture of cigars."

556. To WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in the construction of barometers or instruments to indicate pressure." A communication from Mr. Alfred Nobel, of Paris, a Foreigner residing abroad.

558. To JOSEPH KERSHAW, of Allerton, near Bradford, in the county of York, Overlooker, for the invention of "Improvements in means or apparatus employed in weaving."

560. And to HENRY BROWN, of the firm of Henry Brown and Company, Woollen Manufacturers, of Galashiels, in the county of Selkirk, Scotland, for the invention of "Improvements in machinery for cutting and finishing the surfaces of woollen and other fabrics."

On their several petitions, recorded in the Office of the Commissioners on the 2nd day of March, 1859.

---

562. To HERRMANN KOHN, of Berlin, in the Kingdom of Prussia, now residing at No. 5, North Place, Gray's-Inn-Road, in the county of Middlesex, Merchant Tailor, for the invention of "Improvements in articles of wearing apparel called coats."

563. To JOHN HARRISON, of Bermondsey, Southwark, in the county of Surrey, Builder, for the invention of "An improvement or improvements in the construction of rotating window sashes."

564. To THOMAS WILSON, of Birmingham, in the county of Warwick, Engineer, for the invention of "An improvement or improvemeuts in breech-loading fire arms."

565. To ALBERT W. HALE, of New Britain, state of Connecticut, United States of America, for the invention of "A new and improved machine for cutting or mincing meat, vegetables, &c."

566. To JAMES DALZIEL DOUGALL, of Glasgow, in the county of Lanark, North Britain, Gun Maker, for the invention of "Improvements in fire arms."

567. To WILLIAM JACKSON, of Colne, in the county of Lancaster, Shuttle-tongue Maker, for the invention of "Improvements in shuttles for looms."

568. To WILLIAM SCORE, of No. 9, Osborne Terrace, Clapham Road, in the county of Surrey, Chemist, for the invention of "Improvements in the manufacture of soap."

571. And to THOMAS COOK, of Stowmarket, in the county of Suffolk, Carpenter and Joiner, for the invention of "An apparatus for raising and lowering coffins and bodies, either for burial or disinterment."

On their several petitions, recorded in the Office of the Commissioners on the 3rd day of March, 1859.

---

573. To CHARLES FREDERICK DENNET, of Pall Mall, Gentleman, for the invention of "Improvements in bayonets."

574. To MARK RIDER, of Todmorden, in the county of York, Mechanic, for the invention of "Improvements in, or applicable to, machines for preparing, spinning, and doubling cotton and other fibrous materials."

575. To JAMES COWBAN and ELIAS ANDREWS, of Burnley, in the county of Lancaster, for the invention of "Improvements in machinery or apparatus for spinning fibrous materials."

576. To RICHARD ARCHIBALD BROOMAN, of No. 166, Fleet Street, in the city of London, E.C., Editor of the Mechanics' Magazine and Patent Agent, for the invention of "An improvement in boiler stays."—A communication from Jean Perrier, residing at Nimes, France.

577. And to CHARLES ROPER MEAD, of No. 176, Great Dover Street, in the borough of Southwark, Gas Engineer, for the invention of "Improvements in water gas-meters."

On their several petitions, recorded in the Office of the Commissioners on the 4th day of March, 1859.

---

578. To WILLIAM BAILES and JAMES BAILES, of No. 434, Oxford Street, in the parish of Westminster, in the county of Middlesex, for the invention of "An improved ship's berth for prevention of sea sickness, composed of wood and metal."

579. To JOHN MACMILLAN DUNLOP, of the city of Manchester, in the county of Lancaster, Engineer, for the invention of "Improvements in machinery or apparatus for cleaning fibrous materials."

580. To JOHN LEIGH, of the city of Manchester, in the county of Lancaster, Surgeon, for the invention of "Improvements in the purification of coal gas."

581. To JOHN FRASER, of the town and county of Banff, North Britain, Manager of the Banff Iron Foundry, for the invention of "Improvements in ploughs."

582. To FREDERICK WILLIAM PARKER, of Sheffield, in the county of York, Saw Maker, for the invention of "Improvements in sewing machines."

583. To EDWARD VIGERS, of Paddington, Gentleman, for the invention of "Improvements in the construction of ships and other vessels."

584. To WILLIAM PEACOCK SAVAGE, of Roxham, Downham Market, in the county of Norfolk, for the invention of "An improved machine for excavating, raising, and depositing soil."

585. To FRANÇOIS VERDEIL, Medical Doctor, of No. 30, Rue St. Sulpice, in the city of Paris, and EDMOND MICHEL, Chemist, of No. 4, Quai Imperial, Puteaux, Seine, for the invention of "Improvements in treating madder."

586. To GEORGE LEACH, of Leeds, in the county of York, Yarn Spinner and Cloth Manufacturer, for the invention of "Improved machinery for reeling and leashing yarn or thread."

587. And to FRANCIS MORTON, of James Street, Liverpool, in the county of Lancaster, Engineer, for the invention of "An improvement in the construction of strained fences."

On their several petitions, recorded in the Office of the Commissioners on the 5th day of March, 1859.

---

589. To HUGH WILLIAM PATRICK, of No. 4, Mill Hill Terrace, Acton, in the county of Middlesex, for the invention of "An improvement or improvements in an apparatus for chemical and dental laboratories, or other manufacturing or experi-

mental uses, which he proposes calling a 'paragon laboratory forge.'"

590. To DUNCAN PROUDFOOT, of Glasgow, in the county of Lanark, North Britain, Merchant, for the invention of "Improvements in Turkey-red dyeing."

591. To ARMAND CABANY, of Anzin, department of the Nord, in the empire of France, Engineer, for the invention of "A new system of quoins (wedges) for railways."

592. To WILLIAM PALMER, of Long Eaton, in the county of Derby, Station Master, for the invention of "An improved railway carriage break, and coupling apparatus connected therewith."

593. To FREDERICK AYCKBOURN, of 27, Henry Street, Vauxhall Gardens, Gentleman, for the invention of "Laminating india-rubber cloths with paper sheets."

594. To WILLIAM GOSSAGE, of Widnes, in the county of Lancaster, Chemist, for the invention of "Improvements in the treatment of certain ores of copper for the extraction of metals therefrom."

595. To JOHN ASPINALL, of Great Tower Street, in the city of London, Civil Engineer, for the invention of "Improvements in evaporating in vacuo."

596. To PIERRE ERNEST AIMONT, of Paris, in the French empire, Civil Engineer, for the invention of "Improvements in the construction of waggons and other carriages for railways and ordinary roads, and of apparatuses connected therewith."

597. To JOHN ORR, of No. 31, South Albion Street, Glasgow, in the employ of Messrs. Laird and Thomson, of Glasgow aforesaid, for the invention of "Improvements in weaving ornamental fabrics."

598. To JOHN PRETTY CLARKE, of King's Street Mills, Leicester, for the invention of "Improvements in the manufacture of reels for the winding on cotton, linen, thread, silk, or other fibrous materials."

599. And to JOHN LOUIS JULLION and GORDON PIRIE, both of Stoneywood Works, Aberdeen, North Britain, Paper Makers, for the invention of "The manufacture of gelatine."

On their several petitions, recorded in the Office of the Commissioners on the 7th day of March, 1859.

---

601. To ADAM BOOTH the elder, and ADAM BOOTH the younger, of the city of Manchester, in the county of Lancaster, Machine Makers, for the invention of "Improvements in machinery or apparatus for making or manufacturing tags for laces."

603. To GEORGE TWIGG, of Birmingham, in the county of Warwick, Manufacturer, for the invention of "An improved fusee-igniter for the use of smokers."

605. To JOHN NORTHCOTE RYDER, of Bexley Heath, in the county of Kent, for the invention of "Improvements in preserving fruits, and in apparatus used for such purposes."

607. And to WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improvements in submarine telegraph cables."—A communication from abroad by Auguste Hubert Stanislas Treve, of Paris, Officer of the Imperial Navy.

On their several petitions, recorded in the Office of the Commissioners on the 8th day of March, 1859.

Invention protected for Six Months by the Deposit of a Complete Specification.

NOTICE is hereby given, that the petition of

628. NATHAN WASHBURN, of the state of Massachusetts, of the United States of America, praying for Letters Patent for the invention of "A new and useful or improved machine for rolling tires for wheels," was deposited and recorded in the Office of the Commissioners on the 11th day of March, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

18*th March*, 1859.

2106. JOZÉ LUIS, Patent Agent, of No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, for an invention of "A new manner for applying centrifugal force in the manufacture of the fecula of potatoes of starch, of yeast, of porcelain paste, of paper pulp, and ultramarine, and the apparatus for carrying out the same."—A communication from a Foreigner residing abroad.—Dated 18th September, 1858.

2108. JOSEPH BLACKWOOD BEASLEY, of Cashel, county Tipperary, Ireland, for an invention of "Improvements in the construction of sporting and all other guns."—Dated 18th September, 1858.

2110. HENRY WILLIAM GRYLLS, of 47, Mark Lane, in the city of London, Licensed Custom House Agent, for an invention of "Improvements in apparatus employed in submerging or laying down electric telegraph cables."—Dated 18th September, 1858.

2114. HENRY FIRMIN, of Wapping, in the county of Middlesex, Carman, for an invention of "A machine for cleansing chaff and other food for horses and cattle."—Dated 20th September, 1858.

2119. LEON DE PARIENTE, of Paris (France), Gentleman, for an invention of "Improvements in apparatus to be applied to gas burners, with the object of increasing the lighting power of the gas flame."—A communication from a Foreigner now residing abroad.—Dated 21st September, 1858.

2124. ANGIER MARCH PERKINS, of Francis Street, Gray's Inn Road, for an invention of "Improvements in surface condensers."—Dated 21st September, 1858.

2130. RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improvements in

apparatus for printing shawls and other articles." —A communication from J. M. Firnstahl, of Vienna, a Foreigner residing abroad.—Dated 22nd September, 1858.

2146. Henry Henson Henson and William Frederick Henson, both of 38, Parliament Street, in the city of Westminster, for an invention of "Improvements in waterproofing leather, woven fabrics, fibrous and other materials, and also of rendering them fire-proof or partially fire-proof."— —Dated 24th September, 1858.

2150. George Leedham Fuller, of Lombard Street, in the city of London, Civil Engineer, for an invention of "Improvements in steam engines." —Dated 24th September, 1858.

2165. Edwin Thompson, of the city of York, Iron-founder, and William Lazenby, of the city of York, Grocer, Executors of Benjamin Jones, Iron-founder, of the city of York, for an invention of "Improvements in press wheel rollers or clod crushers, which improvements are also applicable to rollers for crushing, bruising, and pulverizing roots and other substances."—Dated 28th September, 1858.

2172. George Tomlinson Bousfield, of Loughborough Park, Brixton, in the county of Surrey, for an invention of "Improvements in apparatus for and in the manufacture of paper bags and other similar articles."—Dated 29th September, 1858.

2210. Michael Henry, of 84, Fleet Street, in the city of London, Patent Agent, for an invention of "Improvements in the means of or arrangements for working steam expansively."—A communication from Camille Polonceau, a foreigner residing abroad.—Dated 5th October, 1858.

2246. Evan Birchley, of Upper Severn Terrace, in the city of Worcester, Attorney's Clerk, for an invention of "An improved construction of cartridge."—Dated 8th October, 1858.

2277. Maurice Sautter, of Paris, Boulevart Montmartre, 14, for an invention of "Improvements in air engines."—A communication from Mr. Joseph Gill, resident at Marsala, Sicily.— Dated 12th October, 1858.

2298. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "An improved construction of cabin or state room for steam boats and other vessels."—Dated 14th October, 1858.

2553. Manuel Leopold Jonas Lavater, of the Strand, in the county of Middlesex, India-rubber Manufacturer, for an invention of "Improvements in the manufacture of mats, coverings for floors and other surfaces, and other cellular articles when india-rubber compounds are used."—Dated 13th November, 1858.

2590. Matthew Caton, of Preston, in the county of Lancaster, Overlooker of Looms, for an invention of "Improvements in the treading motion of looms for weaving, and also in shuttle boxes and swells connected therewith."—Dated 17th November, 1858.

2674. Rudolph Bodmer, of 2, Thavies Inn, Holborn, London, for an invention of "Improvements in valves for regulating the supply of steam."— A communication from a Foreigner residing abroad. —Dated 25th November, 1858.

3746. George William Bales, of Ipswich, in the county of Suffolk, Gun Maker, for an invention of "Improvements in apparatus for retaining doors, sashes, or frames when shut or closed."— Dated 1st December, 1858.

2762. Thomas Bailey, of New Orleans, United States, and of 17, Russell Street, Birmingham, in the county of Warwick, Gun Manufacturer, for an invention of "A mechanical movement applicable to loading fire arms and other purposes."—Dated 3rd December, 1858.

26. Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for an invention of "Certain improvements in steam generators."—A communication from Frédéric Simian, residing at Marseilles.—Dated 3rd January, 1859.

28. Edmund Balchin, of Myton Gate, Hull, in the county of York, Gun Maker, for an invention of "An improved construction of projectile applicable to the whale fishery."—Dated 3rd January, 1859.

74. Thomas James Claxton, of the city of Montreal, Canada, Merchant, for an invention of "Improvements in the manufacture of boots and shoes." —A communication from abroad by Mellen Bray, of Montreal aforesaid, Boot and Shoe Maker.—Dated 10th January, 1859.

117. William Wilson, of Newcastle-on-Tyne, Hat Manufacturer, for an invention of "Improvements in machinery for felting bodies of hats and bonnets."—A communication from J. S. Taylor, of Danbury, Connecticut, United States of America. —Dated 13th January, 1859.

124. William Craft, of 12, Cambridge Road, Hammersmith, and Thomas Wilson, of Bradmore House, Chiswick, both in the county of Middlesex, for an invention of "Improvements in drawers and napkins, so as to render the same waterproof."—Dated 14th January, 1859.

170. James Croft Reid, of Liverpool, in the county of Lancaster, Master Mariner, and William Milner, of the same place, Manufacturer, for an invention of "Certain improvements in the construction of ships and vessels."—Dated 20th January, 1859.

188. John Hick and William Hargreaves, of Bolton-le-Moors, in the county of Lancaster, Engineers, trading under the firm of Benjn. Hick and Son, for an invention of "Improvements in the construction of steam boilers."—Dated 21st January, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 16th March, 1859, inclusive.*)

14th March.

630. Henry Bessemer, of Queen Street Place, New Cannon Street, in the city of London, for an invention of "Improvements in the manufacture of iron and steel."—Dated 15th March, 1856.

657. Ely Smith Stott, of Halifax, Woollen Manufacturer, for an invention of "Improvements in the manufacture of mohair, alpaca, and worsted pile fabrics."—Dated 19th March, 1856.

15th March.

790. Frederic Grice, of West Bromwich, in the county of Stafford, Manufacturer, for an invention of "New or improved machinery for the manufacture of bolts, rivets, spikes, screw-blanks, and nuts."—Dated 2nd April, 1856.

16th March.

659. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improved means for separating substances of different specific gravities."—A communication.—Dated 19th March, 1856.

711. William Ball, of Chicopee, in the county of Hampden, state of Massachusetts, United States of America, for an invention of "Improvements in machinery for stamping ores."—Dated 25th March, 1856.

736. William Ball, of Chicopee, in the county of Hampden, state of Massachusetts, United States of America, for an invention of "Improvements in machines for separating copper and other metals from their ores."—Dated 27th March, 1856.

Rules in respect of Communications from Abroad and Provisional Specifications.

By Sir FitzRoy Kelly, Her Majesty's Attorney General, and Sir Hugh McCalmont Cairns, Her Majesty's Solicitor General.

I. In any application for a Patent which is stated to be a Communication, the declaration must state the name and address of the party from whom it has been received, in the following manner:

No. 1. When declaration is made in the United Kingdom,—

"That it has been communicated to me from abroad by [here insert name and address in full]."

No. 2. In other cases,—

"That it is a communication from A.B., a person resident at [here insert address in full]."

II. All Provisional Specifications must be written on one side only of each sheet.

(Signed) FitzRoy Kelly, A.G.
H. M. Cairns, S.G.

Erratum in Journal of 15th March.

2522. For "Humphreys" read "Humphrys."

FOREIGN PATENTS.

BELGIUM.*

List of Patents of Inventions and of Importation Delivered on the 20th and 27th January, 10th, 17th, and 24th February, and 3rd March, 1859.†

(*Communicated by the Belgian Government.*)

(For previous List, see No. 540 of this Journal.)

1. Patents Delivered on the 20th January.

1. P. Koenig, represented by Alf. Chenot, of Brussels, for an imported invention of "A pneumatic catheter."—Dated 3rd August, 1858.—(French Patent, 9th June, 1858.)
2. H. Vanden Berghe, of Courtrai, for an imported invention of "A process for singeing fabrics."—Dated 16th October, 1858.—(G. Descat's French Patent, 5th October, 1858.)
3. A. Laurent and H. de Back, of Jemmapes, for "A system of wagons."—Dated 5th November, 1858.
4. A. P. Roger, represented by H. Biebuyck, of Brussels, for an imported invention of "Manufacturing and treating a tissue, called 'Parisian corium.'"—Dated 16th November, 1858.—(P. A. Brunard's French Patent, 13th December, 1858.)
5. A. R. André, of Charleroi, for "A machine for manufacturing bolts and rivets by the hot or cold process."—Dated 13th December, 1858.
6. L. Nagant, of Liège, for "Modifications in Lefaucheux' breech-loading gun."—Dated 23rd December, 1858.
7. H. Detallancourt and B. Blanjot, of Brussels, for an imported invention of "A system of crinoline petticoats, called 'duvetine.'"—Dated 28th December, 1858.—(French Patent, 19th September, 1857.)
8. J. Peters, represented by L. Deroy, of Saint Josse-ten-Noode, for an imported invention of "Manufacture of pipes of welded iron."—Dated 28th December, 1858.—(French Patent, 6th October, 1858.)
9. Maudslay, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the construction of furnaces for smelting iron, steel, and other metals."—Dated 28th December, 1858.—(English Patent, 25th June, 1858.)

* For the Belgian Patent Law, see Nos. 292 and 348 of this Journal.

† All Specifications of Patents which have been in force not less than six months, may be inspected or translations of them be had at the Library of the Great Seal Patent Office, where also translated Indexes may be consulted.

10. L. F. Devisme, represented by H. Biebuyck, of Brussels, for an imported invention of "A system of revolvers."—Dated 28th December, 1858.—(French Patent, 22nd December, 1858.)

11. F. Martin, represented by H. Biebuyck, of Brussels, for an imported invention of "A machine for splitting hides and leather."—Dated 28th December, 1858.—(French Patent, 8th April, 1858.)

12. P. Moir Crane, represented by A. Depuichault, of Schaerbeek, for an imported invention of "Improvements in the manufacture of fuel from peat."—Dated 28th December, 1858.—(English Patent, 26th June, 1858.)

13. C. Lesage and H. V. Bironneau, represented by Aug. Dathis, of Courtrai, for an imported invention of "A mode of applying Jacquart machines to the manufacture of certain embroideries."—Dated 29th December, 1858.—(French Patent, 16th October, 1858.)

14. J. Robb, represented by A. Crooy, of Brussels, for an imported invention of "Improvements in propellers of vessels and ships."—Dated 29th December, 1858.—(French Patent, 20th December, 1858.)

15. F. Lombaer, of Molenbeek-Saint-Jean, a Patent of Improvement for "A kind of moveable book-binding."—Dated 29th December, 1858.—(Original Patent, 2nd December, 1858.)

16. Ed. Leach and L. Gauchez, of Brussels, for "Improvements in power looms."—Dated 29th December, 1858.

17. B. F. Brunel, of Brussels, for an imported invention of "A process for manufacturing Prussian blue."—Dated 30th December, 1858.—(English Patent, 26th September, 1856.)

18. J. J. Marçais, represented by H. Biebuyck, of Brussels, for an imported invention of "Arrangements in Bunsen's battery."—Dated 30th December, 1858.—(French Patent, 10th December, 1858.)

19. F. E. Schneider, represented by J. B. Lemaire, of Liège, for an imported invention of "A system of breech-loading guns and priming cartridges."—Dated 29th December, 1858.—(French Patent, 5th February, 1858.)

20. W. J. Ruelle and Co., of Liège, for "An apparatus for extracting coal, being also applicable to raising and lowering workmen."—Dated 30th December, 1858.

21. C. Fletcher, represented by Eug. Guillery, of Molenbeek-Saint-Jean, for "A means of condensing steam, and of driving back the heat and condensing water to boilers."—Dated 31st December, 1858.

22. C. E. Detmold, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in assembling and fixing the ends of rails of railways."—Dated 31st December, 1858.

23. P. F. Varenne, represented by H. Biebuyck, of Brussels, for an imported invention of "A tube for filtering the smoke of tobacco, applicable to all kinds of pipes."—Dated 31st December, 1858.

24. A. F. E. Robert, represented by H. Biebuyck, of Brussels, for an imported invention of "Manufacture of hollow india-rubber sounding toys."—Dated 31st December, 1858.—(French Patent, 24th December, 1858.)

25. J. M. Dunlop, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "Additions to his mode of making rollers or cylinders for finishing tissues and textile substances."—Dated 4th October, 1858.

26. Ducimetière-Monod, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A direct mode of manufacturing chlorine."—Dated 31st December, 1858.—(Original Patent, 15th September, 1856.)

27. J. H. Young, represented by G. Jollié, of Antwerp, for an imported invention of "A machine for composing type."—Dated 3rd January, 1859.—(English Patent, 14th January, 1858.)

28. H. J. Masse, of Leuze, for "A process for filtering the juice and scum of beetroot."—Dated 3rd January, 1859.

29. F. R. Wappers-Melis, of Ixelles, for "A composition for rendering soles of foot-coverings durable and impervious."—Dated 3rd January, 1859.

30. T. R. L. A. Sudre, represented by J. Piddington, of Brussels, for an imported invention of "A system of manufacturing steel by means of reaction, and smelting natural or refined steel."—Dated 3rd January, 1859.—(French Patent, 25th October, 1858.)

31. C. Tillière, of Brussels, for "A rotary steam-engine."—Dated 3rd January, 1859.

32. L. B. Duboc, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in machines for winding up, twisting, and doubling filamentous substances."—Dated 3rd January, 1859.—(French Patent, 30th December, 1858.)

33. H. W. Wimshurst and F. Trueman, represented by Biebuyck, of Brussels, for an imported invention of "Improvements in the manufacture of metal sheets."—Dated 3rd January, 1859.—(French Patent, 30th December, 1858.)

34. W. Humiston, represented by Biebuyck, of Brussels, for an imported invention of "Improvements in the manufacture of moulded candles."—Dated 3rd January, 1859.—(American Patent, 24th July, 1855.)

35. Th. Dhérnel, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in purlin tiles."—Dated 3rd January, 1859.—(French Patent, 5th November, 1856.)

36. J. Buchanan, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in propelling ships and vessels."—Dated 3rd January, 1859.—(French Patent, 22nd December, 1858.)

37. Ch. Rishworth, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the manufacture of springs for carrying weights and moderating concussions."—Dated 3rd January, 1859.—(French Patent, 29th December, 1858.)

38. P. Vasseur, of Wetteren, for "A system of winding up and off warps and fabrics in looms."—Dated 4th January, 1859.

39. Ch. Wheatstone, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in electro-magnetic telegraphs and apparatus

for the transmission of signals."—Dated 3rd January, 1859.—(English Patent, 2nd June, 1858.)

40. Lemille, of Liège, for "A rocking system and safety-fastening of breech-loading fire-arms."—Dated 31st December, 1858.

41. L. Nagant, of Liège, for "Metallic cartridges for Lefaucheux' guns and revolvers."—Dated 4th January, 1859.

42. J. D. Weston, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in rolling iron for manufacturing bolts and pins." — Dated 5th January, 1859. — (English Patent, 7th July, 1858.)

43. A. F. Ouarnier, represented by X. Raclot, of Brussels, for an imported invention of "Improvements in the manufacture of cartridges for breech-loading fire-arms."—Dated 5th January, 1859.—(French Patent, 27th November, 1858.)

44. A. L. Lévêque, represented by X. Raclot, of Brussels, for an imported invention of "A system of goggles for subduing fiery horses."—Dated 5th January, 1859.—(French Patent, 29th December, 1858.)

45. J. G. J. Fetu, of Brussels, for "A kind of pipe for fire-engines."—Dated 6th January, 1859.

46. J. H. Brown, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in the manufacture of cartridges."—Dated 6th January, 1859.—(English Patent, 5th October, 1858.)

47. J. F. Martin, of Trembleur, for "Improvements in revolvers."—Dated 4th January, 1859.

48. Th. Guibal, of Mons, for "An apparatus for breaking rocks in mines."—Dated 7th January, 1859.

49. P. P. Ercolin, represented by A. Hennelli, of Brussels, for "An apparatus called 'horometer.'" —Dated 7th January, 1859.

50. B. Richard, represented by A. Depuichault, of Schaerbeek, for an imported invention of "A system of massive floors with circular joints."— Dated 7th January, 1859.—(French Patent, 23rd April, 1856.

51. R. Dawson, represented by F. T. Boutillier, of Schaerbeek, for "A mercury-clock."—Dated 7th January, 1859.

52. H. F. Toussaint and L. N. Langlois, represented by O. Daillencourt, of Brussels, for an imported invention of "Apparatus for separating gold and silver ores and other metals."—Dated 7th January, 1859.—(French Patent, 24th June, 1858.)

53. Ch. Perrée, represented by X. Raclot, of Brussels, for an imported invention of "A motor worked by consumed air."—Dated 7th January, 1859.—(French Patent, 6th March, 1858.)

54. J. Laubereau, represented by J. Duvivier, of Brussels, for "A motor with a single or double action."—Dated 7th January, 1859.

55. L. J. Vandecasteele, of Ghent, a Patent of Improvement for "Modifications in his collars for horses."—Dated 8th January, 1859.—(Original Patent, 19th January, 1857.)

56. F. J. Manceaux, represented by A. Anoul, of Ixelles, for "A system of bayonets and sabre-swords."—Dated 8th January, 1859.

57. J. Wilson, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in floating docks."—Dated 8th January, 1859.

58. J. Mouveau, of Molenbeek-St.-Jean, for "Manufacture of fat acids."—Dated 10th January, 1859.

59. P. A. Viette, of St. Josse-ten-Noode, for "Processes for engraving stones, glass, and metals in relievo or hollow style."—Dated 10th January, 1859.

60. Ch. M. de Clippèle d'Ilem, of St. Josse-ten-Noode, for "Manufacture of seamless straps and pipes."—Dated 11th January, 1859.

61. H. and A. Gosselin Brothers, of Brussels, for "Manufactured of tarred paper for packing objects which must be protected from dampness."—Dated 11th January, 1859.

62. J. Jagger, represented by A. Crooy, of Brussels, for an imported invention of "A machine for making bread and for giving the required shape to fermented and other paste."—Dated 11th January, 1859.—(French Patent, 4th January, 1859.)

63. R. G. C. Fane, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the treatment of sewage and in apparatus employed thereat."—Dated 11th January, 1859.—(French Patent, 4th January, 1858.)

64. P. G. Barry, represented by H. Biebuyck, of Brussels, for an imported invention of "Preparing thick mineral oils for lighting purposes."—Dated 11th January, 1859.—(French Patent, 7th January, 1859.)

65. F. G. Dauphin, represented by H. Biebuyck, of Brussels, for an imported invention of "A mechanical table for the manufacture of composite and tallow candles."—Dated 11th January, 1859.—(French Patent, 8th January, 1859.)

66. Mrs. Jolibois, represented by H. Biebuyck, of Brussels, for an imported invention of "A cooling apparatus for breweries."—Dated 11th January, 1859.—(French Patent, 21st August, 1858.)

67. J. B. Gendebien, of Brussels, for "A system of contact pulleys with elastic flanges applicable to wheels of locomotives."—Dated 11th January, 1859.

68. M. A. Decerfz, represented by A. Fleury, of Brussels, for "A ship's lantern for the navy and merchantmen."—Dated 12th January, 1859.

69. G. Cassart, of Seraing, for "An apparatus for boring mines."—Dated 10th January, 1859.

70. J. Briscot, of Dampremy, for "A vertical mode of tubbing shafts of mines or wells."—Dated 13th January, 1859.

71. Ed. Myers, represented by H. Biebuyck, of Brussels, for "A counting apparatus for measuring water, beer, and all kinds of liquids and gases."——Dated 13th January, 1859.

72. N. F. Landtsheer, of St. Gilles-lez-Bruxelles, a Patent of Improvement for "Additions to the mode of applying Woolf's system to horizontal and vertical steam engines."—Dated 13th January, 1859.—(Original Patent, 27th November, 1857.)

73. C. Guffroy, represented by X. Raclot, of Brussels, a Patent of Improvement for "Additions to his system of smoke-consuming fire-places."—Dated 13th January, 1859.—(Original Patent, 27th May, 1858.)

74. E. Libotte and G. Planche, of Gilly, for "A system of parachutes with a single and double action."—Dated 15th January, 1859.

75. J. B. de Moreau, of Chimay, for "Manufacture of artificial whetstones."—Dated 13th January, 1859.

76. P. Ricard-Pareukers, of Brussels, for "Manufacture of caps of shells for fire-works."—Dated 14th January, 1859.

77. Ch. Shaw, represented by D. Devos-Verraert, of Brussels, for an imported invention of "A kind of mantlets or shields which are proof against balls and bullets."—Dated 14th January, 1859.—(English Patent, 9th December, 1858.)

78. G. Bouche, represented by A. Crooy, of Brussels, for "A system for stopping carriage horses."—14th January, 1859.

---

2. Patents Delivered on the 27th January.

1. L. M. M. Portalier, of Brussels, a Patent of Improvement for "Additions to his slide guns."—Dated 14th January, 1859.—(Original Patent, 23rd January, 1858.)

2. L. Asser, of Lacken, for "A process for condensing the vapours of chlorhydric acid in the manufacture of sulphate of soda."—Dated 17th January, 1859.

3. Tremonroux Brothers, and De Burlet, of St. Gilles-lez-Bruxelles, for "A machine for splitting the prongs of forks."—Dated 17th January, 1859.

4. A. E. Servier, represented by A. J. Godtschalck-Duval, of Brussels, a Patent of Improvement for "An electro-magnetic indicator."— Dated 17th January, 1859.—(Original Patent, 6th December, 1858.)

5. Th. Spiller, represented by L. N. de Meckenheim, of Ixelles, a Patent of Improvement for "Modifications in his stereoscopic apparatus."—Dated 17th January, 1859.—(Original Patent, 24th July, 1858.)

6. B. Nicoll, represented by J. Piddington, of Brussels, for an imported invention of "Improvements in circular cutters and saws."—Dated 17th January, 1859. — (English Patent, 30th June, 1858.)

7. Ch. W. Williams, represented by J. Piddington, of Brussels, for an imported invention of "Improvements in the arrangement of flues of furnaces and fire-places of steam boilers."—Dated 17th January, 1859. — (English Patent, 15th July, 1858.)

8. Eng. Dollfus, of Schaerbeek, for "A rotary press with a continuous action for separating liquids from pulp."—Dated 17th January, 1859.

9. L. Chabert, represented by A. Depuichault, of Schaerbeek, for an imported invention of "A coating for protecting objects from snails and slugs, and for destroying the same."—Dated 17th January, 1859.—(French Patent, 13th April, 1858.)

10. L. J. Château, represented by O. Daillencourt, of Brussels, for an imported invention of "A cart for breaking the subsoil."—Dated 17th January, 1859.—(French Patent, 13th November, 1858.)

11. V. Brichet, represented by Mrs. Dumoulin-Colombier, of Liege, a Patent of Improvement for "Additions to his mode of fastening and unmounting breech-loading guns."—Dated 17th January, 1859.—(Original Patent, 25th February, 1857.)

12. Eng. Landois, of Liege, for "A mode of metallurgical treatment of oxides and sulphurets."—Dated 15th January, 1859.

13. F. J. Dontrewe and P. Goeseels, of Liege, for "A breech-loading gun with needle balls and cartridges, applicable to all arms."—Dated 14th January, 1859.

14. The Anzin Mining Co., represented by A. Cabany, of Mons, for "Coke kilns."—Dated 18th January, 1859.

15. V. Weerts-Sacré, of Verviers, for "A system of syphons."—Dated 21st January, 1859.

16. Ch. Callebaut, represented by L. C. Duru, of Brussels, for an imported invention of "Apparatus for bending, dressing, or regulating various articles before or after sewing."—Dated 18th January, 1859.—(French Patent, 22nd December, 1858.)

17. E. Tonnelier, represented by X. Raclot, of Brussels, for "A system of pianos."—Dated 17th January, 1859.

18. F. J. de Lannoy, of Schaerbeek, a Patent of Improvement for "Modifications in his apparatus for mincing meat."—Dated 19th January, 1859.—(Parod's Original Patent, 23rd June, 1858.)

19. F. J. de Lannoy, and L. J. C. Ladrange, of Schaerbeek, for "An apparatus for cutting meat."—Dated 12th January, 1859.

20. W. A. Shrooter, represented by R. Anoul, of Ixelles, for "A steam apparatus for distilling purpurposes."—Dated 19th January, 1859.

21. M. Schaffner, represented by A. Anoul, of Ixelles, for an imported invention of "A system of furnaces for the manufacture of zinc."—Dated 19th January, 1859.—(English Patent, 11th December, 1858.)

22. J. Rynsbergen, of Saint Léonard (Antwerp), for "A steam engine for beating milk."—Dated 21st January, 1859.

23. P. Fromont, of Châtelineau, for "A machine for obtaining pipes without soldering,"—Dated 21st January, 1859.

24. A. Mauroy, represented by D. Herode, of Schaerbeek, a Patent of Improvement for "Additions to his mode of manufacturing tiles, flagstones, and drain-pipes."—Dated 20th January, 1859.—(Original Patent, 8th January, 1858.)

25. P. C. A. Vaillant, A. Marsillon, and E. A. Lemaire, represented by A. Crooy, of Brussels, for an imported invention of "Improvements in means and apparatus for preserving ice, fish, and other substances."—Dated 20th January, 1859.—(French Patent, 13th January, 1859.)

---

3. Patents Delivered on the 10th February.

1. Ph. Fromont, of Châtelineau, for "A machine for lowering and raising workmen in mines."—Dated 6th January, 1859.

2. B. Laut, represented by X. Raclot, of Brussels, for "Improvements in the manufacture of iron and steel."—Dated 19th January, 1859.

3. J. L. Lemaire, represented by H. Biebuyck, of Brussels, for an imported invention of "A mould for making cigarets."—Dated 20th January, 1859. (Original Patent, 9th July, 1857.)

4. J. L. Lemaire, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in atmospheric fulminating toys."—Dated 20th January, 1859.—(French Patent, 27th January, 1858.)

5. A. F. Patry, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the manufacture of lace."—Dated 20th January, 1859.—(French Patent, 10th January, 1859.)

6. L. Arnier, represented by H. Biebuyck, of Brussels for an imported invention of "A system of applying the best known means combined together to obtaining steam." — Dated 20th January, 1859. — (French Patent, 4th April, 1857.)

7. J. M. Legris, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in apparatus for lighting by gas."—Dated 20th January, 1859.—(French Patent, 18th December, 1858.)

8. G. Sommeilles, represented by H. Biebuyck, of Brussels, for an imported invention of "An apparatus for boring holes in rocks."—Dated 20th January, 1859.

9. F. Quintart, of Wasmes-Audemez-Briffoent, for "A churn."—Dated 24th January, 1859.

10. V. Soyer, of Tournai, for "An economical system of furnaces and heating applicable to steam boilers."—Dated 24th January, 1859.

11. H. Leroy, of Liege, for "An apparatus for ascertaining the place of bridges and sights of fire-arms."—Dated 20th January, 1859.

12. J. Herman, of Souverain-Wandre, a Patent of Improvement for "A modification in his breech-loading fire-arms."—Dated 21st January, 1859.—(Original Patent, 10th November, 1858.

13. F. and Ch. Vanneste, of Ingelmunster, for "An apparatus for cutting the root of chicory."—Dated 18th January, 1859.

14. P. Van Missiel, of Liege, for "A breech-loading gun."—Dated 24th January, 1859.

15. F. L. Hardy, of Herstal, for "Modifications in Lefaucheux' fire-arms." — Dated 22nd January, 1859.

16. Aug. Avermaete, of Ghent, for "A system of hot-air stoves."—Dated 22nd January, 1859.

17. E. J. Asser, represented by Ed. Mussche, of Brussels, for "A system of obtaining positive photographs by means of autographic or printing ink."—Dated 21st January, 1859.

18. P. A. de Saint Simon-Sicard, represented by H. Biebuyck, of Brussels, for an imported invention of "A chemical mechanical process for converting pig iron into steel."—Dated 21st January, 1859.—(French Patent, 2nd January, 1859.)

19. L. F. Devisme, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A kind of revolver."—Dated 21st January, 1859.—(Original Patent, 28th December, 1858.)

20. A. Lindo, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the manufacture of soap."—Dated 21st January, 1859.—(French Patent, 18th January, 1859.)

21. G. A. Besson, represented by X. Raclot, of Brussels, a Patent of Improvement for "Modifications in musical instruments of brass, wood, and with percussion."—Dated 27th June, 1855.

22. X. Frison, represented by F. Faure-Bernard, of Brussels, for an imported invention of "A truss." —Dated 22nd January, 1859.—(French Patent, 12th October, 1858.)

23. Knauth, Nachod, and Kühne, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in fire-arms."— Dated 22nd January, 1859.—(Th. Knauth's English Patent, 3rd November, 1858.)

24. Knauth, Nachod, and Kühne, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in fire-arms."— Dated 22nd January, 1859.— (Th. Knauth's English Patent, 3rd November, 1858.)

25. B. Valerius, of Brussels, for "Manufacture of manure."—Dated 24th January, 1859.

26. J. Risdale, represented by A. Crooy, of Brussels, for an imported invention of "Improvements in fountain penholders."—Dated 24th January, 1859.—(English Patent, 6th October, 1858.)

27. L. Pascal and G. Sirben, represented by H. Biebuyck, of Brussels, for an imported invention of "Manufacture of sea biscuit."—Dated 24th January, 1859.—(French Patent, 10th December, 1857.)

28. C. Beure and Ed. Barret, represented by H. Biebuyck, of Brussels, for an "Imported invention of a sowing machine."— Dated 24th January, 1859.—(French Patent, 11th May, 1858.)

29. M. Colson, represented by H. Biebuyck, of Brussels, for "Arrangements in steam-engines, applicable chiefly to working coal pits."—Dated 24th January, 1859.

30. B. Nadault de Buffon, represented by A. Van Langenhove, of Brussels, a Patent of Improvement for "Modifications in his system of tubular filters."—Dated 24th January, 1859.—(Original Patent, 2nd June, 1856.)

31. W. Langshaw, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in machines or apparatus for weaving looped or knitted articles."—Dated 25th January, 1859.—(English Patent, 10th June, 1858.)

32. Ch. Petit, of Molenbeek-St.-Jean, for "A screw cramp-iron for fixing porcelain plates for indicating the names of streets."— Dated 25th January, 1859.

33. A. Blaise, represented by O. Daillencourt, of Brussels, for an imported invention of "A new furnace for reviving animal charcoal."—Dated 26th January, 1859.—(French Patent, 12th June, 1858.)

34. E. Hanin, represented by A. Anoul, of Ixelles, for "Improvements in the manufacture of frying pans."—Dated 26th January, 1859.

35. A. Lavallée, represented by L. N. Meckenheim, of Ixelles, for "Improvements in electrical batteries."—Dated 27th January, 1859.

36. A. Gouweloos, of Brussels, for "A new system of bookbinding."—Dated 28th January, 1859.

37. A. Ostrog, represented by L. C. Duru, of Brussels, for an imported invention of "Improvements in the construction of portable organs."—Dated 28th January, 1859.—(French Patent, 24th January, 1859.)

38. J. M. Rowan, represented by X. Raclot, of Brussels, for "Improvements in steam engines and boilers."—Dated 28th January, 1859.

39. G. Vanderhecht, of St. Gilles les Bruxelles, for "A process for obtaining relief or sunk designs."—Dated 28th January, 1859.

40. L. de Mulver, of Baeveghem, for "A thrashing machine."—Dated 29th January, 1859.

41. G. F. A. H. Urbach-Sarolea, of Liege, for "An apparatus and method for purifying amylaceous substances in the manufacture of starch."—Dated 27th January, 1859.

42. J. Martin, of Silleus, for "A machine for making balls of coal dust for household purposes.'—Dated 28th January, 1859.

43. V. Delhausse, of Liége, for "A process for cleaning and whitening engravings."—Dated 27th January, 1859.

44. E. Boet, of Jemmapes, for "A system of ventilating steam-engines of steam-boats."—Dated 27th January, 1859.

45. Aug. Gonthyn, of Ghent, for "An apparatus called 'Nema-dynamometer, for measuring the strength of thread."—Dated 27th January, 1859.

46. F. P. J. Vanden-Ouwelant, represented by H. C. E. Vanden-Ouwelant, of Lacken, for an imported invention of "A system of smoke-consuming apparatus."—Dated 29th January, 1859.—(French Patent, 15th November, 1858.)

47. A. F. Châtel, represented by H. C. E. Ouwelant, of Lacken, for an imported invention of "Stoppers closing hermetically and obturators."—Dated 29th January, 1859.—(French Patent, 3rd January, 1856.)

48. L. Dalemagne, represented by X. Raclot, of Brussels, for an imported invention of "Improvements in the mode of applying silicate of potash."—Dated 29th January, 1859.—(French Patent, 18th September, 1856.)

49. J. F. Léon, represented by X. Raclot, of Brussels, for "A machine for teaching children reading and arithmetic."—Dated 29th January, 1859.

50. J. F. Moreaux, represented by J. Piddington, of Brussels, for an imported invention of "Improvements in cocks for water, steam, and other fluids."—Dated 29th January, 1859.—(French Patent, 26th December, 1856.)

51. J. J. A. de Bronac and A. J. M. Deherrypont, represented by O. Daillencourt, of Brussels, for an imported invention of "A process for treating metallic sulphurets, phosphurets, antimoniurets, and especially lead ores."—Dated 29th January, 1859.—(French Patent, 26th January, 1859.)

52. Count J. M. Regis, for the Turin Joint-Stock Electro-Weaving Company, represented by O. Daillencourt, of Brussels, for an imported invention of "A system of electrical apparatus applicable to Jacquard machines for weaving figured fabrics (Bonelli's system)."—Dated 29th January, 1859.—(French Patent, 26th January, 1859.)

53. E. A. Bendon, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in moulding gas retorts of refractory clay from the outside."—Dated 29th January, 1859.—(French Patent, 22nd August, 1857.)

54. A. L. H. Fiéfut de Sanville, represented by H. Biebuyck, of Brussels, for an imported invention of "A system of continuous blast."—Dated 29th January, 1859.—(French Patent, 24th November, 1858.)

55. Th. Bailey, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in fire-arms."—Dated 29th January, 1859.—(French Patent, 22nd January, 1859.)

56. L. F. Devismes, represented by H. Biebuyck, of Brussels, a Patent of Improvement for his "Revolver."—Dated 29th January, 1859.—(Original Patent, 28th December, 1858.)

57. J. Gombeaux and T. Royer, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A barley mill with a cleaning apparatus and steel cylinders."—Dated 29th January, 1859.—(Original Patent, 20th July, 1858.)

58. F. Dehaynen, represented by H. Biebuyck, of Brussels, for "Improvements in machines for pressing and conglomerating coal dust."—Dated 29th January, 1859.

59. F. Ruff, represented by H. Biebuyck, of Brussels, for an imported invention of "A pump with a continuous jet."—Dated 29th January, 1859.—(French Patent, 20th October, 1857.)

4. Patents Delivered on the 17th February.

1. A. Senecal, represented by J. A. F. Jonghmans, of Antwerp, for an imported invention of "A system of shirts, called 'justaucorps.'"—Dated 1st February, 1859.—(French Patent, 8th February, 1856.)

2. Ch. Dupret, of Marcinelle, for "Utilizing the waste heat of scoria running from blast furnaces."—Dated 1st February, 1859.

3. H. Puissant, of Couillet, for "A furnace for heating forge iron of a great bulk."—Dated 1st February, 1859.

4. J. Bernardi and E. Grandoni, represented by J. Moscardini, of Brussels, for "A system of throwing silk and other filamentous substances."—Dated 31st January, 1859.

5. J. Epron, of St. Josse-ten-Noode, for an imported invention of "A system of making bread."—Dated 31st January, 1859.—(French Patent, 25th March, 1856.)

6. J. Caumont, represented by A. Picard, of Brussels, for an imported invention of "An electrical repelling apparatus applicable to locks and doors." —Dated 31st January, 1859.—(French Patent, 11th January, 1859.)

7. G. A. Tremeschini, represented by A. Picard of Brussels, a Patent of Improvement for "Substituting thin bands of pasteboard for cards in jacquard looms."—Dated 31st January, 1859.—(Original Patent, 11th January, 1858.)

8. A. Werotte, of Ixelles, for "A machine with a continuous motion for moulding and shaping bricks, flagstones and similar products."—Dated 1st February, 1859.

9. A. F. Vanhulst, of Brussels, for "A mechanical malt kiln."—Dated 1st February, 1859.

10. Montefior Levi, of Val Benoit, for "An apparatus for preparing ores."—Dated 31st January, 1859.

11. A. Carton-Eekman, represented by X. Raclot, of Brussels, for "A preparation for preventing incrustations of steam boilers."—Dated 1st February, 1859.

12. J. Norton, represented by J. Piddington, of Brussels, for an imported invention of "Improvements in projectiles."—Dated 1st February, 1859.—(English Patent, 11th September, 1858.)

13. P. and N. Nicaise, of Marcinelle, for "Manufacture of bolts, screw nuts, cramp irons, rivets and pins."—Dated 2nd February, 1859.

14. H. Rousseaux, of Cureghem-sous-Anderlecht, for "Improvements in the manufacture of brown and other beer, by using steam."—Dated 2nd February, 1859.

15. G. S. Parkinson, represented by R. S. Kirkpatrick, of Ixelles, for an imported invention of "An apparatus for working railway breaks and for establishing a communication between engine drivers and guards of railways."—Dated 2nd February, 1859.—(English Patent, 29th July, 1858.)

16. G. Hooricke, of Brussels, for "Improvements in puzzle-locks."—Dated 3rd February, 1859.

17. J. Stamm, represented by A. Picard, of Brussels, for an imported invention of "An apparatus for dividing the flame in gas-burners."—Dated 3rd February, 1859.—(French Patent, 21st January, 1857.)

18. E. Ameye, of Schaerbeek, for "An electrical battery, called 'Ameye's battery.'"—Dated 4th February, 1859.

19. J. Hubens, of Liege, for "A kitchen lamp with a constant level."—Dated 4th February, 1859.

20. F. Colantier, of Charleroi, for "A substance for repairing splits, holes, &c. of retorts or furnaces of iron or clay."—Dated 5th February, 1859.

21. L. A. Rossard, J. Joumard, and P. V. T. Doneux, represented by A. Hennelle, of Brussels, for an imported invention of "Utilizing the metallic particles contained in the waste of whet-stones in grinding tools."—Dated 5th February, 1859.—(French Patent, 28th June, 1858.)

22. C. J. T. Venant and H. Petit, represented by A. Hennelle, of Brussels, for an imported invention of "An apparatus called anti-smoke ventilator."—Dated 3rd February, 1859.—(French Patent, 15th November, 1858.)

23. N. E. Hans, represented by E. de Molinari, of Brussels, for "An apparatus for carding and cleaning wool and cotton."—Dated 5th February, 1859.

24. J. M. Renard, of Hodimont, for "A machine for washing linen cloth."—Dated 7th February, 1859.

25. J. Morel, of Tubise, for "A steam engine with a continuous circular movement."—Dated 7th February, 1859.

26. C. Sharps, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in fire-arms."—Dated 7th February, 1859.—(French Patent, 29th January, 1859.)

27. L. Levey-Heyman, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the manufacture of shirts."—Dated 7th February, 1859.—(French Patent, 8th October, 1858.)

28. A. Légé and F. B. Pironnet, represented by H. Biebuyck, of Brussels, for an imported invention of "A process for preparing timber."—Dated 7th February, 1859.—(French Patent, 10th September, 1857.)

29. Penzolds, Mrs. L. Lemonnier, and Mrs. Rèvière, represented by X. Raclot, of Brussels, for "A machine without pistons or clack valves for raising water."—Dated 7th February, 1859.

30. F. J. Foucon, represented by O. Daillencourt, of Brussels, for an imported invention of "A smoke-consuming fire-place."—Dated 7th February, 1859.—(French Patent, 20th March, 1858.)

31. H. Verstraeten, of Brussels, for "A machine for the manufacture of economical coal-cakes."—Dated 8th February, 1859.

32. J. Montigny, for "A system of breech-loading guns."—Dated 9th February, 1859.

---

5. Patents Delivered on the 24th February.

1. C. P. Destobbelaere, of Brussels, for "A mechanism for locomotives and fixed steam-engines."—Dated 17th January, 1859.

2. J. Dalpiaz and Eug. Devers, represented by J. Olléac, of Brussels, for an imported invention of "Various modes of applying glycerine."—Dated 25th January, 1859.—(French Patent, 31st July, 1858.)

3. Montague Moses, represented by J. Piddington, of Brussels, for an imported invention of "Improvements in rods and handles of umbrellas."—Dated 1st February, 1859.—(English Patent, 10th August, 1858.)

4. L. Dubois, of Brussels, for "A combined bed and arm chair."—Dated 7th February, 1859.

5. A. Henry, Plagnard, Lemonon, and Rozerat, represeneed by X. Raclot, of Brussels, for "A motor with a continuous movement."—Dated 10th February, 1859.

6. F. J. Cavenaile, of Brussels, for "A cock with a clack valve and high pressure."—Dated 10th February, 1859.

7. G. F. A. H. URBACH-SAROLEA, of Liége, for "A method of whitening amylaceous substances in the manufacture of starch."—Dated 12th February, 1859.

8. N. J. COLLEYE, of Liége, a Patent of Improvement for "Additions to his system of guns."—Dated 12th February, 1859.—(Original Patent, 10th August, 1858.)

9. C. L. DESBORDES, of Charleroi, for "A manometer with free air."—Dated 12th February, 1859.

10. V. MULLENDORF and Co., of Ixelles, for "A household utensil, called 'Belgian washing machine."—Dated 14th February, 1859.

11. O. GUERIKE, of St. Josse-ten-Noode, for "A kiln for burning animal charcoal with columns of continuous fire, and an air reservoir."—Dated 15th February, 1859.

12. W. S. CLARK, represented by F. Anthoine, of Brussels, for "Improvements in harvesters."—Dated 5th February, 1859.

13. F. N. SIMON, of Brussels, for "A page for ladies' dresses."—Dated 15th February, 1859.

14. J. DOLNE, of Limbourg, for "A new system of drawing wool and cotton for spinning."—Dated 14th February, 1859.

15. N. BIENVENN, of Brussels, for an imported invention of "A new system of petticoats."—Dated 16th February, 1859.—(French Patent, 14th February, 1859.)

16. J. J. DECHÊNE, of Herstel, for "A system of stirrups with helical springs."—Dated 17th February, 1859.

17. P. B. E. MARTIN, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "An electro-motive apparatus."—Dated 17th February, 1859.—(Original Patent, 18th June, 1858.)

18. T. A. M. SORTAIS, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A self-acting system of conveying telegraphic messages."—Dated 17th February, 1859.—(Original Patent, 16th December, 1858.)

19. J. B. FALNGINÈRE, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A system of mills with vertical millstones working at a high speed."—Dated 17th February, 1859.—(Original Patent, 14th September, 1857.)

20. A. L. A. FAVIER, represented by O. Daillencourt, of Brussels, a Patent of Improvement for "Modifications in his mode of manufacturing leather."—Dated 17th February, 1859.—(Original Patent, 17th November, 1858.)

---

6. PATENTS DELIVERED ON THE 3RD MARCH.

1. J. F. COLFS HEYNE, of Antwerp, for "A system of railway chairs."—Dated 4th November, 1858.

2. J. F. COLFS HEYNE, of Antwerp, a Patent of Improvement for "A system of railway chairs and a mode of fixing rails thereon."—Dated 1st February, 1859.—(Original Patent, 4th November, 1858.)

3. A. L. A. FAVIER, represented by O. Daillencourt, of Brussels, a Patent of Improvement for "Additions to his process of tanning hides."—Dated 9th February, 1859.—(Original Patent, 20th October, 1858.)

4. S. A. BEERS, represented by F. Anthoine, of Brussels, for "Improvements in caps, iron rails of American railways, and in the mode of assembling the same."—Dated 15th February, 1859.

5. A. R. DALIFOL, represented by A. Crooy, of Brussels, for an imported invention of "A system of furnaces for smelting and refining malleable cast-iron, iron, and steel."—Dated 16th February, 1859.—(French Patent, 7th January, 1859.)

6. A. LARTIGUE, of Boussu, for "A spout twyer, applicable to all forges."—Dated 15th February, 1859.

7. A. E. PÉRIGNON, represented by X. Raclot, of Brussels, a Patent of Improvement for "Additions to his system of steam-boilers."—Dated 17th February, 1859.—(Original Patent, 15th October, 1857.)

8. J. J. LEFEBVRE, of Brussels, a Patent of Improvement for "Additions to his process for retting textile substances."—Dated 18th February, 1859.—(Original Patent, 6th January, 1857.)

9. E. ROUSSEAU, represented by H. Biebuyck, of Brussels, for an imported invention of "A mode of discolouring and purifying sugar or products obtained directly from plants."—Dated 18th February, 1859.—(French Patent, 30th December, 1858.)

10. L. PERRIN, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in revolvers."—Dated 18th February, 1859.—(French Patent, 19th February, 1859.)

11. F. PRINCE, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in breech-loading fire-arms."—Dated 18th February, 1859.—(English Patent, 28th January, 1859.)

12. P. T. JOLY, represented by O. Daillencourt, of Brussels, for an imported invention of "Applying a known means to raising liquid or muddy substances by means of a vacuum obtained in any vessel."—Dated 19th February, 1859.—(French Patent, 24th January, 1859.)

13. C. A. TERREIL and J. M. T. CHÂTEAU, represented by O. Daillencourt, of Brussels, for an imported invention of "A process for purifying acetic acid obtained from distilled organic substances."—Dated 19th February, 1859.—(French Patent, 1st December, 1858.)

14. V. P. DANDOY, of Verviers, for "A machine for washing cloth and fabrics."—Dated 21st February, 1859.

15. L. J. DELCOIGNE, of Blaton, for "Manufacture of a linen cloth, being a substitute for woollen bags in the manufacture of sugar."—Dated 22nd February, 1859.

16. F. LEMAIRE, of Cuesmes, for "A system of putting up engines for extracting coals from pits."—Dated 19th February, 1859.

17. W. PEARCE, represented by A. Depuichault, of Schaerbeek, for an imported invention of "Improvements in bottles, jugs, and other similar articles closed hermetically, or being impervious to water."—Dated 21st February, 1859.—(English Patent, 20th August, 1858.)

18. J. J. Hartmeyer and C. Thal, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in pumps."—Dated 21st February, 1859.—(French Patent, 8th September, 1858.)

19. A. F. Vandone, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in apparatus for carburetting gas."—Dated 21st February, 1859.—(French Patent, 27th May, 1858.)

20. J. A. Ballande, represented by X. Raclot, of Brussels, for "Preparing writing paper and ink."—Dated 21st February, 1859.

21. A. Chavagneux, represented by A. Crooy, of Brussels, for an imported invention of "Fabrics with new wefts."—Dated 21st February, 1859.—(French Patent, 2nd December, 1858.)

22. F. Durant, represented by A. Crooy, of Brussels, a Patent of Improvement, for "A self-acting weaving loom."—Dated 21st February, 1859.—(Durant and Pradel's, French Patent, 6th December, 1858.)

23. J. H. G. Wagner, represented by O. Daillencourt, of Brussels, for an imported invention of "Apparatus for removing substances suspended and dissolved in the water used for feeding steam-boilers, being also applicable to other purposes."—Dated 21st February, 1859.—(French Patent, 19th February, 1859.)

24. G. de Pierpont, represented by H. Biebuyck, of Brussels, for "Improvements in Simoneau's lime kiln."—Dated 22nd February, 1859.

25. J. J. Cregeen and J H. Dickson, represented by J. Piddington, of Brussels, for an imported invention of "Improvements in treating vegetable fibres in general, and in machines, apparatus, and processes employed thereat."—Dated 22nd February, 1859.—(English Patent, 16th June, 1858.)

26. M. F. Philippien, of Liege, for "Composing elixirs."—Dated 21st February, 1859.

27. J. M. Tinlot, of Herstal, for "Two systems of simple pistols for target shooting and defence."—Dated 21st February, 1859.

28. J. Petrie, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in apparatus for drying the warps of tissues, thread and tissues."—Dated 23rd February, 1859.—(English Patent, 30th June, 1858.

29. G. Adshead, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in steam-boilers."—Dated 23rd February, 1859.—(English Patent, 15th June, 1858.)

30. C. Martin, of Pepinster, for "A machine for oiling wool, applicable to carding machines."—Dated 24th February, 1859.

31. C. J. Gilsoe, of Liege, for "A system of breech-loading fire-arms."—Dated 19th February, 1859.

FRANCE.

Current List of Patents of Invention and Certificates of Addition.

1859.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

Note.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

288. Armand Michel Goyot, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 18th August, 1854, for "Lamps, candles, and night-lights."—Dated 20th January, 1859.

289. Ferdinand Loefler, of 17, Rue Notre Dame de Nazareth, Paris, for "A new metal for casting bells of all sizes."—Dated 20th January, 1859.

290. Prudent Marie Coustans, of 20, Rue de Navarin, Paris, for "A mode of advertising, called 'industrial indicator.'"—Dated 20th January, 1859.

291. William Bray, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in locomotives and traction engines."—Dated 20th January, 1859.

292. Charles Gutkind, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A composition for lubricating axles, pivots, &c."—Dated 20th January, 1859.

293. Messrs. Fontaine, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of fastenings of gloves."—Dated 20th January, 1859.

294. Balze and Le Grip, the former of 8, Rue du Jardines, the latter of 116, Rue de Rivoli, Paris, for "A dragging apparatus for apartments."—Dated 20th January, 1859.

295. Jean Louis Buffet, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of clarinets."—Dated 20th January, 1853.

296. Joshua Cetlon, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in cotton gins."—Dated 20th January, 1859.—(American Patent, expiring 13th July, 1872.)

297. Adolphe Jean Motlet, represented by Moller, of 5, Rue du Sentier, Paris, for "A system of folding lace work, &c."—Dated 21st January, 1859.

298. Neustadt and Bonnefond, the former of 71, Rue de Chabrol, the latter of 10, Rue de Parme, Paris, a Certificate of Addition to their Patent of

* For the French Patent Law see No. 228 of this Journal.

23rd September, 1858, for "Apparatus for distributing water."—Dated 21st January, 1859.

299. Joseph Caumont, represented by Bradie, of 22, Rue Ste. Anne, Paris, a Certificate of Addition to his Patent of 11th January, 1859, for "An electric repelling apparatus."—Dated 21st January, 1859.

300. César Felix Joseph and Aublé and Lobrichon, of 1, Rue Pernelle, Paris, for "Smoking pipes of new meerschaum, called 'ali.'"—Dated 21st January, 1859.

301. Pierre Joseph Carré, of 7, Rue Vielle Notre Dame, Paris, a Certificate of Addition to his Patent of 28th October, 1854, for "Relief printing on all tissues or stuffs by using all kinds of metals such as gold, silver, &c."—Dated 21st January, 1859.

302. Cox and Millar, represented by Wood, of 8, Place de la Bourse, Paris, for "Improvements in the mechanical manufacture of cork stoppers."—Dated 21st January, 1859.

303. De Pron de la Maisonfort, of 28, Rue Culture Ste. Catherine, Paris, a Certificate of Addition to his Patent of 20th September, 1853, for "Foliating mirrors."—Dated 21st January, 1859.

304. Louis Pierre Alexandre Martin, of 79, Rue des Marais, St. Martin, Paris, a Certificate of Addition to his Patent of 20th November, 1857, for "Improvements in keyboard instruments, and chiefly in expressive organs." — Dated 21st January, 1859.

305. Besançon, Pellerin, and Tam, of 52, Rue du Château d'Eau, Paris, for "Apparatus for drying fecula."—Dated 21st January, 1859.

306. Jean Joseph Lalande, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A diluting apparatus."—Dated 21st January, 1859.

307. Lacarrière, senr. and junr., and Co., represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of joints for pipes for conveying gas, water, steam, and other fluids."—Dated 21st January, 1859.

308. Pierre Domerex, of 53, Rue de Bretagne, Paris, for "A system of pumps."—Dated 22nd January, 1859.

309. Jean Louis Cyrille Honoré Galy, of 12, Rue du Perche, Paris, for "Illuminating by means of hydro-carburets, and chiefly by means of the vapour of benzine combined with hydrogen insufficiently carburetted." — Dated 22nd January, 1859.

310. Giovanni Caselli, domiciled at the Legation of Tuscany, Paris, for "A pantelegraph, or improvements in telegraphs."—Dated 22nd January, 1859.

311. Jean Louis Aléxandre Philippe Choquet, of 2, Rue des Nonains d'Hyères, Paris, for "A pocket cushion, called 'anti-pain cushion.'"—Dated 22nd January, 1859.

312. Théodore Gombert, of Malizai, département des Basses Alpes, for "Improvements in digging ploughs."—Dated 22nd January, 1859.

313. Zani Brothers, of Chaumont, département de la Haute Marne, for "A means of preventing locomotives from running off the rails and from sliding."—Dated 24th January, 1859.

314. Ponel-Lacour, Dufour, and Colomb, of 9, Place Marengo, St. Etienne, département de la Loire, for "A loom for improving so-called 'caoutchouc perlerette lace-work."—Dated 25th January, 1859.

315. François Theinotré Charlot, of Route d'Alençon, département de la Sarthe, a Certificate of Addition to his Patent of 4th February, 1858, for "An economical hot-air stove."—Dated 25th January, 1859.

316. Henri Hazebroucq, of Werwix, Sud, département du Nord, for "A reel."—Dated 26th January, 1859.

317. Gustave Bornègue, of Bavilliers, département du Haut Rhin, a Certificate of Addition to his Patent of 16th January, 1855, for "Applying a mechanism of two shuttles to mechanical weaving."—Dated 21st January, 1859.

318. Louis Jules Lavergne, of Rue des Trois Piliers, Poitier, département de la Vienne, a Certificate of Addition to his Patent of 3rd April, 1858, for "A combination for giving greater strength to railways." — Dated 25th January, 1859.

319. Louis Félix Lefebvre, of St. Quentin, département de l'Aisne, for "A cock with clack valves and gearings." — Dated 26th January, 1859.

320. Joseph Marie Perrigault, of 1, Rue de la Monnaie, Renne, département de l'Ile et Vilaine, for "Means of destroying or moderating the pressure of steam against the slides of engines."—Dated 26th January, 1859.

321. Jean Lutard, of Libourne, département de la Gironde, for "A twyer for iron-works."—Dated 26th January, 1859.

322. Jacques Edme Pichet, of Neufmanil, département des Ardennes, for "Manufacture of sheet-iron nails."—Dated 27th January, 1859.

323. Tournier, Barzon, and Co., of Ste. Colombe, département du Rhône, for "Strengthening pieces of wood, iron, &c. requiring a resisting power superior to their scantling."—Dated 24th January, 1859.

324. François Louis Lesaulnier, of Château-Gonthier, département de la Mayenne, for "A machine for preparing roads." — Dated 26th January, 1859.

325. Jean Nacher, of 51, Rue Royet, St. Etienne, département de la Loire, a Certificate of Addition to his Patent of 12th February, 1855, for "A system of jointed beat-up with double faces, for embossing Jacquart machines." — Dated 27th January, 1859.

326. Emmanuel Le Barazer, of 44, Cours Napoléon, Bordeaux, département de la Gironde, for "A life apparatus for the navy."—Dated 27th January, 1859.

327. Nicolas Georges Berton, of Mutzig, département du Bas Rhin, for "An apparatus for filling and clearing smoking pipes."—Dated 25th January, 1859.

328. Louis Auguste Machistre, of Vigan, département du Gard, for "A kind of basin for twisting silk whilst spinning the same."—Dated 25th January, 1859.

329. Jean Baessler, of Guebwiller, département du Haut Rhin, for "Means of restoring old shuttles of weavers." — Dated 27th January, 1859.

330. Alexandre Pallordet, of 5, Rue Basse Combalot, Lyon, département du Rhône, for "A process for binding lasts of shoemakers with iron."—Dated 27th January, 1859.

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Liverpool (*Free Public Library, Duke Street*).
Macclesfield (*Useful Knowledge Society*).

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30s. per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Time-keepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*

The following are in the press:—

Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c.
Electricity and Magnetism: their Generation and Applications.
Typographic, Lithographic, and Plate Printing.
Bleaching, Dyeing, and Printing Yarns and Fabrics.
Preparation of Fuel, and Apparatus for its Combustion.
Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing.
Production and Applications of Gas.
Steam Engines.

B. Woodcroft.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by George E. Eyre and William Spottiswoode, Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 544. TUESDAY, MARCH 22, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

2491. JOHN RICHMOND, Engineer and Machinist, of 21, Carlisle Terrace, Fairfield Road, Bow, in the county of Middlesex, JOSEPH QUICK, junr., and ALEXANDER FRASER, Civil Engineers, both of Sumner Street, Southwark, in the county of Surrey, have given notice at the Office of the Commissioners of their intention to proceed with their application for Letters Patent for the invention of "Construction of a meter for measuring water, spirits, or any other fluids."

As set forth in their petition, recorded in the said office on the 8th day of November, 1858.

2502. And EDWARD ELLIS ALLEN, of Brompton Row, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improved machinery or apparatuses for working the propellers of vessels."

2506. And MICHAEL HENRY, of 84, Fleet Street, in the city of London, Patent Agent, has given the like notice in respect of the invention of "Improvements in and in the manufacture of locks and fastenings, and keys for the same."—A communication from Mr. Rebour.

As set forth in their respective petitions, both recorded in the said office on the 9th day of November, 1858.

2518. And JOHN CORNER, of 15, Artillery Place, and 16, City Road, Finsbury Square, London, Boot and Shoe Manufacturer, has given the like notice in respect of the invention of "Improvements in machinery for making metallic screw rivets, and for uniting with themparts of boots, shoes, portmanteaus, leather hose, buckets, harness, and other leathern articles."

As set forth in his petition, recorded in the said office on the 10th day of November, 1858.

2528. And JOHN BLETHYN, of Swansea, in the county of Glamorgan, Engineer, has given the like notice in respect of the invention of "Improvements in the manufacture of fuel."

2536. And ARTHUR MICKELTHWATE, of Sheffield, in the county of York, has given the like notice in respect of the invention of "Improvements in treating and manufacturing buffalo and other horn, so as to be used as a substitute for whalebone, and for other useful purposes."

As set forth in their respective petitions, both recorded in the said office on the 11th day of November, 1858.

2542. And GEORGE TOMLINSON BOUSFIELD, of Loughborough Park, Brixton, in the county of Surrey, has given the like notice in respect of the invention of "An improved apparatus for illustrating conic sections, and the lines of the globe."—A communication.

As set forth in his petition, recorded in the said office on the 12th day of November, 1858.

2548. And JAMES TAYLOR, of Birkenhead, Engineer, has given the like notice in respect of the invention of "Improvements in portable steam engines."

2551. And LOUIS PETRE, of Hatton Garden, in the county of Middlesex, Glass Silverer, has given the like notice in respect of the invention of "Improvements in the application of glass to ornamental and useful purposes."

2555. And ALONZO BUONAPARTE WOODCOCK and JOHN MACMILLAN DUNLOP, both of Manchester, have given the like notice in respect of the invention of "Improvements in covering rollers, shafts, and tubes, of any figure or material, with elastic shells or covers of vulcanized india rubber, or other elastic substance, and in turning or grinding the surfaces of such elastic covers or shells."

2556. And DANIEL FRODSHAM, of Rose Cottage, Gurney Road, Stratford, in the county of Essex, has given the like notice in respect of the invention of "Improvements in apparatus used in

combination with fire boxes of tubular steam boilers, in order to supply air and steam thereto."

2557. And MATTHEW PULLAN, of Horsforth, near Leeds, in the county of York, Bleacher, has given the like notice in respect of the invention of "Improvements in machinery for drying yarns and other materials."

2558. And JOHN ADDY HOPKINSON, of Huddersfield, in the county of York, Engineer, has given the like notice in respect of the invention of "Improvements in steam boilers."

As set forth in their respective petitions, all recorded in the said office on the 13th day of November, 1858.

2564. And WILLIAM GEORGE ARMSTRONG, of the borough and county of Newcastle-on-Tyne, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the manufacture of ordnance."

2568. And JOHN GOLDING BUNTING, of the city of Saint John, in the province of New Brunswick, in British North America, but at present at the Office for Patents, 4, Trafalgar Square, Charing Cross, in the county of Middlesex, has given the like notice in respect of the invention of "A mechanical horse-tamer or brake."

As set forth in their respective petitions, both recorded in the said office on the 15th day of November, 1858.

2571. And JOSEPH CONSTANT BOISNEAU, of Chatellerault, in the French empire, Engineer, has given the like notice in respect of the invention of "An improved horse-mill or gear."

2572. And ALFRED ISIDORE HONORÉ PARENT, of Paris, in the French empire, Manufacturer, has given the like notice in respect of the invention of "An improved manufacture of buttons, and the apparatus employed therein."

2575. And CHARLES JAMES CLOWES PERRY, of Williamstown, in the colony of Victoria, Member of the Legislative Assembly, has given the like notice in respect of the invention of "An instrument to be used chiefly on board ship for approximating in certain cases the course of an approaching vessel, either in the day or night, and the relative angle of both ships' courses, in order to avoid a collision, to be called 'Perry's Anti-collision Dial.'"

2578. And ALEXANDRE MARTIN BRUÈRE, of Paris, in the empire of France, Gentleman, has given the like notice in respect of the invention of "The novel application of hydrogen gas to various purposes in the arts."

As set forth in their respective petitions, all recorded in the said office on the 16th day of November, 1858.

2584. And JOSEPH HENRY TUCK, of Great George Street, Westminster, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the mode of laying and securing telegraphic cables, and in apparatus for the same, and for carrying on other operations under water."

2586. And EDWARD WELCH, of No. 63, Saint John's Square, Clerkenwell, Tobacco Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture of tobacco, and in apparatus therefor."

2587. And JOHN ROBERTSON, of Saint Ninians, in the county of Stirling, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in musical instruments."

2588. And MICHAEL SCOTT, of No. 3, Stanhope Terrace, Hyde Park Gardens, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in the construction of breakwaters, parts of which are applicable in making other structures."

2591. And JOHN BRENNAND, of Manchester, in the county of Lancaster, Calico Printer, has given the like notice in respect of the invention of "An improvement in ploughs, and in other agricultural implements, and in the method of driving the same."

As set forth in their respective petitions, all recorded in the said office on the 17th day of November, 1858.

2601. And Sir CHARLES TILSTON BRIGHT, of Harrow Weald, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in insulators, and an improved mode of connecting insulators to posts and other supports."

2604. And JOHN LESLIE, of Conduit Street, Saint George's Hanover Square, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in the manufacture of gas."

As set forth in their respective petitions, both recorded in the said office on the 18th day of November, 1858.

2615. And JOHN EDWARDS, of No. 77, Aldermanbury, in the city of London, has given the like notice in respect of the invention of "Improvements in the manufacture of trowser-buttons."

2626. And JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in the construction of electric telegraph cables or conductors."—A communication from Henry J. Rogers, resident at Baltimore, Maryland, in the United States of America.

2630. And THOMAS STOKES CRESSEY, of High Street, Homerton, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in machinery used in the manufacture of casks."

As set forth in their respective petitions, all recorded in the said office on the 19th day of November, 1858.

2635. And HENRY ELLIS, of Holbeach, in the county of Lincoln, Engineer and Agricultural Implement Maker, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for cultivating, cleaning, and pulverising land."

As set forth in his petition, recorded in the said office on the 20th day of November, 1858.

2654. And WALTER RALSTON, of the city of Manchester, in the county of Lancaster, Engraver to Calico Printers, has given the like notice in respect of the invention of "Improvements in embossing and finishing woven fabrics, and in the machinery or apparatus employed therein."

2656. And WILLIAM GORMAN, of Glasgow, in the county of Lanark, North Britain, Engraver, has given the like notice in respect of the invention of "Improvements in furnaces, and in the combustion of fuel, and in apparatus connected therewith."
As set forth in their respective petitions, both recorded in the said office on the 23rd day of November, 1858.

2662. And RICHARD HUGH HUGHES, of Hatton Garden, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improvements in means or apparatus employed when lighting by gas."
As set forth in his petition, recorded in the said office on the 24th day of November, 1858.

2679. And CHARLES PARKER, of Dundee, in the county of Forfar, North Britain, Engineer, has given the like notice in respect of the invention of "Improvements in looms for weaving."
As set forth in his petition, recorded in the said office on the 25th day of November, 1858.

2700. And HUGH LEE PATTINSON, of Stotes Hall, Jesmond, Newcastle-upon-Tyne, has given the like notice in respect of the invention of "Improvements in utilizing the heat of slags of iron and other works."
As set forth in his petition, recorded in the said office on the 27th day of November, 1858.

2711. And WILLIAM EDWARD NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improved expansion or cut off gear for steam engines."—A communication.
As set forth in his petition, recorded in the said office on the 29th day of November, 1858.

2730. And AUGUST EMIL CLEMENS SCHEIDEL, of the firm of Gouda, Scheidel, and Co., of Frankfort-on-the-Main, in Germany, and Watling Street, in the city of London, Manufacturers, has given the like notice in respect of the invention of "Improvements in fastenings for belts, braces, garters, books, porte-monnaies, portfolios, pocket-books, invoice, writing and cigar cases, reticules, bags, and other similar articles, or purposes."—A communication from P. F. Gouda.
As set forth in his petition, recorded in the said office on the 30th day of November, 1858.

2751. And LEVI BISSELL, of the city and state of New York, United States of America, has given the like notice in respect of the invention of "Improvements in trucks for locomotive engines."
As set forth in his petition, recorded in the said office on the 1st day of December, 1858.

2761. And MICHAEL HENRY, of No. 84, Fleet Street, in the city of London, Patent Agent, has given the like notice in respect of the invention of "Improvements in manufacturing and revivifying bone black, or animal charcoal, and in kilns and apparatus employed therein."—A communication from J. A. Lagard.
As set forth in his petition, recorded in the said office on the 14th day of December, 1858.

2871. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improved machinery for manufacturing bullets."—A communication.
As set forth in his petition, recorded in the said office on the 15th day of December, 1858.

2959. And JAMES MACPHERSON, of Aberdeen, in the county of Aberdeen, North Britain, Comb Manufacturer, has given the like notice in respect of the invention of "Improvements in solidifying the raspings and other waste of horns and hoofs, and in applying the process to the cementing of prepared horns, hoofs, and tortoiseshell."
As set forth in his petition, recorded in the said office on the 27th day of December, 1858.

91. And WILLIAM BRAY and WILLIAM THOMAS GEORGE BRAY, both of Folkestone, in the county of Kent, Engineers, have given the like notice in respect of the invention of "Improvements in locomotive and traction engines."
As set forth in their petition, recorded in the said office on the 12th day of January, 1859.

448. And CHARLES FAY, of Manchester, in the county of Lancaster, Railway Carriage Builder, has given the like notice in respect of the invention of "Improvements in apparatus for working railway breaks."
As set forth in his petition, recorded in the said office on the 17th day of February, 1859.

463. And SAMUEL WHEATCROFT, of Brudenell Place, New North Road, county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improvements in the method of, and the means for, uniting lace to blond and other fabrics, and also in the apparatus used for manufacturing or converting the same into bonnet and cap fronts, rouches, and such like similar articles of millinery."
As set forth in his petition, recorded in the said office on the 19th day of February, 1859.

502. And JAMES HOLMS, of Glasgow, in the county of Lanark, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for propelling vessels, ships, and boats."

507. And ENOCK PRICE, of Doncaster, in the county of York, Railway Contractor, and EDMUND HAWKINS, of the same place, Builder and Contractor, have given the like notice in respect of the invention of "Improvements in the mode of forming fish plates, and in the method of fixing or attaching them to the joints of rails on railways."
As set forth in their respective petitions, both recorded in the said office on the 24th day of February, 1859.

528. And GEORGE HORNER, of Falls Road, Belfast in the county of Antrim, Ireland, Machinist, has given the like notice in respect of the invention of "Improvements in hackling flax and other fibrous materials, and in machinery for the same."
As set forth in his petition, recorded in the said office on the 28th day of February, 1859.

549. And James Maxwell Adams, Gentleman, and David Law, and John Inglis, Iron Founders, all of Glasgow, in the county of Lanark, North Britain, have given the like notice in respect of the invention of "Improvements in fire places, grates, ranges, and stoves."
As set forth in their petition, recorded in the said office on the 2nd day of March, 1859.

566. And James Dalziel Dougall, of Glasgow, in the county of Lanark, North Britain, Gun Maker, has given the like notice in respect of the invention of "Improvements in fire arms."
As set forth in his petition, recorded in the said office on the 3rd day of March, 1859.

580. And John Leigh, of the city of Manchester, in the county of Lancaster, Surgeon, has given the like notice in respect of the invention of "Improvements in the purification of coal gas."

581. And John Fraser, of the town and county of Banff, North Britain, Manager of the Banff Iron Foundry, has given the like notice in respect of the invention of "Improvements in ploughs."
As set forth in their respective petitions, both recorded in the said office on the 5th day of March, 1859.

589. And Hugh William Patrick, of No. 4, Mill Hill Terrace, Acton, in the county of Middlesex, has given the like notice in respect of the invention of "An improvement or improvements in apparatus for chemical and dental laboratories, or other manufacturing or experimental uses, which he proposes calling a 'paragon laboratory forge.'"

590. And Duncan Proudfoot, of Glasgow, in the county of Lanark, North Britain, Merchant, has given the like notice in respect of the invention of "Improvements in Turkey-red dyeing."

596. And Pierre Ernest Aimont, of Paris, in the French empire, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the construction of waggons and other carriages for railways and ordinary roads, and of apparatuses connected therewith."
As set forth in their respective petitions, all recorded in the said office on the 7th day of March, 1859.

628. And Nathan Washburn, of the state of Massachusetts, of the United States of America, has given the like notice in respect of the invention of "A new and useful or improved machine for rolling tires for wheels."
As set forth in his petition, recorded in the said office on the 11th day of March, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Applications for Leave to enter a Disclaimer and Memorandum of Alteration.

In the matter of a Patent, bearing date 3rd July, 1858, granted to John Chisholm, of Bermondsey, in the county of Surrey, Manufacturing Chemist, for "A method of disinfecting and deodorizing or treating sewage, and other matters, and structures and places," No. 1,499.

Notice is hereby given, that the said John Chisholm has applied by petition to Her Majesty's Commissioners of Patents for Inventions, according to the Statutes in that case made and provided, for leave to enter a Disclaimer and Memorandum of Alteration of certain parts of the Specification of the said Patent.

M. Henry,
84, Fleet Street, London, E.C.,
Agent for the Patentee.

In the matter of Letters Patent granted to Alexander Theophilus Blakely, of Little Ryder Street, Saint James's, in the county of Middlesex, Captain of the Royal Artillery, for his invention of "Improvements in ordnance," bearing date the 27th day of February, 1855.

Notice is hereby given, that the said Alexander Theophilus Blakely, formerly of Little Ryder Street, Saint James's, but now of Wilton Place, Knightsbridge, in the county of Middlesex, Captain of the Royal Artillery, has applied by petition to the Commissioners of Patents, according to the Statutes in that case made and provided, for leave to enter a Disclaimer and Memorandum of Alteration of parts of the Specification of the said Letters Patent.

William Brookes,
No. 73, Chancery Lane, London,
Agent to the said Alexander Theophilus Blakely.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

22nd March, 1859.

2129. Thomas Howe, of Millwall, Poplar, for an invention of "Improvements in smiths' forges."—Dated 22nd September, 1858.

2140. Daniel Grant, of Ludgate Hill, in the city of London, Printer, for an invention of "Improvements in colour-printing presses."—Dated 23rd September, 1858.

2145. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Editor of the Mechanics' Magazine and Patent Agent, for an invention of "Improvements in the manufacture of pile and cut pile fabrics, and in machinery employed therein."—A communication from A. I. Hargez, residing abroad.—Dated 24th September, 1858.

2181. Augustin Normand, of Havre, in the empire of France, Shipbuilder, for an invention of "Improvements in constructing ships and vessels propelled by screw or such like propellers."—Dated 30th September, 1858.

2197. Henry George Collins, of Paternoster Row, in the city of London, for an invention of "Improvements in the production of blocks or surfaces to be used in printing."—Dated 2nd October, 1858.

2205. Francis Trevithick, of Penzance, in the county of Cornwall, for an invention of "Improvements in applying sails and keels to boats and vessels."—Dated 4th October, 1858.

2221. Christopher Hill, of the Great Western Railway, Chippenham Station, for an invention of "Improvements in omnibuses, and in apparatus for upholding the windows of omnibuses and other carriages."—Dated 6th October, 1858.

2279. Henry Parker, of Sledmere Castle, in the East Riding of the county of York, Farmer and Land Agent, for an invention of "An improved apparatus for the cultivation of land and other agricultural operations."—Dated 13th October, 1858.

2387. Benjamin Goodfellow, of Hyde, in the county of Chester, Engineer, for an invention of "Certain improvements in steam engines."—Dated 27th October, 1858.

2455. Daniel Fryer, Thomas Leach, Cross Watt, and William Holmes, all of No. 48, Paternoster Row, in the city of London, for an nvention of "Improvements in tanning hides and skins."—Dated 3rd November, 1858.

2995. Samuel Stephen Bateson, of 17, Bolton Street, Mayfair, in the county of Middlesex, Barrister at Law, for an invention of "Improvements in generating steam."—Dated 30th December, 1858.

127. Robert Romaine, of Chapel Street, Bedford Row, in the county of Middlesex, Gentleman, for an invention of "An improved arrangement of portable railway."—Dated 14th January, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 19th March, 1859, inclusive.*)

17th March.

633. John Mitchell, of Dunning's Alley, Bishopsgate Street Without, for an invention of "Improvements in apparatus for washing and amalgamating ores and other matters."—Dated 17th March, 1856.

642. Thomas Bird, of Manchester, in the county of Lancaster, Engineer, and Thomas Rose, of the same place, Engineer, for an invention of "Certain improvements in castors."—Dated 18th March, 1856.

18th March.

640. Peter Armand le Comte de Fontainemoreau, of 39, Rue de l'Echiquier, Paris, in the empire of France, and of 4, South Street, Finsbury, London, for an invention of "Improvements in churns."—Dated 18th March, 1856.

670. William Drummond, of Smith Street, King's Road, Chelsea, in the county of Middlesex, Surveyor, for an invention of "Improvements in spring hinges for swing doors."—Dated 20th March, 1856.

19th March.

666. John Watson Burton, of Eye, in the county of Suffolk, and George Pye, of Ipswich, in the same county, Flax Manufacturers, for an invention of "Improvements in treating flax, hemp, and other fibrous matters requiring like treatment."—Dated 20th March, 1856.

682. Gustav Georg Anton Ludwig Michael Schelhorn, of Birmingham, in the county of Warwick, Merchant and Manufacturer, for an invention of "A new or improved penholder."—Dated 22nd March, 1856.

707. John Dearman Dunnicliff, of Nottingham, Lace Manufacturer, and Stephen Bates, of Radford, in the county of Nottingham, Machinist, for an invention of "Improvements in the manufacture of twist lace and weavings."—Dated 25th March, 1856.

Erratum in Journal of 18th March.

After 2674, for "3746" read "2746."

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

FOREIGN PATENTS.

FRANCE.

CURRENT LIST of PATENTS of Invention and Certificates of Addition.

1859.

(*Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.*)

NOTE.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

331. HENRI BRETON, of Grenoble, département de l'Isère, a Certificate of Addition to his Patent of 21st March, 1847, for "Disinfecting alcohol, &c." —Dated 27th January, 1859.

332. FONTAINE and LEFEVRE, the former of Gorrou, the latter of Brécé, département de la Mayenne, for "A machine for cleaning flax."—Dated 28th January, 1859.

333. LOUIS AUGUSTE MANGIN, of 74, Rue Richelieu, Paris, for "A hold for pages of ladies' dresses." —Dated 22nd January, 1859.

334. JOSEPH PAYEZ, of 95, Rue Neuve des Mathurins, Paris, for "A household mill for preparing, roasting, crushing, and pressing chocolate." — Dated 22nd January, 1859.

335. ANTOINE LOUIS ALFRED MONGÉ, of 66, Rue Lompoise, St. Denis, département de la Seine, for "A system of iron constructions."—Dated 22nd January, 1859.

336. JEAN JOACHIM, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of bricks."— Dated 22nd January, 1859.

337. BRIÈRE and ROWLAND, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A break."— Dated 22nd January, 1859.—(Belgian Patent, expiring 18th June, 1878.)

338. THOMAS BAILEY, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in repeating fire-arms."—Dated 22nd January, 1859.

339. LOUIS MAURICE KASRIEL, of 21, Rue des Trois Bornes, Paris, for "A system of harmonium flute or organine played by two hands."—Dated 22nd January, 1859.

340. GABRIEL MARIE POCHARD, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 25th January, 1858, for "A rotary and unfolding support of lamps."—Dated 22nd January, 1859.

341. CHARLES FRANÇOIS CATTAERT, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 6th September, 1858, for "A diver's lamp."— Dated 22nd January, 1859.

342. HENRY CRIVIER and Co., of 77, Rue de Rambuteau, Paris, a Certificate of Addition to their Patent of 23rd January, 1858, for "Manufacture of pins with fixed heads and others."— Dated 22nd January, 1859.

343. ADOLPHE BENDHEIM, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of portemonnaies, cigar holders, &c."—Dated 22nd January, 1859.

344. Mrs. HENRY SCHLOSS and Brother, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A lever-clasp, called 'Parisian clasp.'" —Dated 22nd January, 1859.

345. Mrs. HENRY SCHLOSS and Brother, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A galvano-plastic process and product." —Dated 22nd January, 1859.

346. ETIENNE MANSOY, of 150, Rue St. Jacques, Paris, for "Manufacture of horse-shoes by the steam hammer."—Dated 24th January, 1859.

347. AUGUSTE GERVAIS CATON, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "A crucible, with three compartments for making glass."—Dated 24th January, 1859.

348. POLYNICE AUGUSTE VIETTE, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "A process for engraving." — Dated 24th January, 1859.

349. LOUIS ALEXANDRE BROUST, of 14, Rue du Chevaleret, commune d'Ivry, a Certificate of Addition to his Patent of 6th February, 1858, for "A counter for liquids."—Dated 24th January, 1859.

350. JEAN AUGUSTE PROSPER VILLARD, of 12, Rue Pagerin, Paris, for "A portable distilling apparatus."—Dated 24th January, 1859.

351. EDOUARD ISAAC ASSER, represented by Bos-Darnis, of 36, Rue de l'Echiquier, Paris, for "A process for obtaining positive photographic proofs by means of printing or autographic ink, the proofs obtained by the latter ink being used as stereotypes."—Dated 24th January, 1859.

352. EMILE TONNELIER, represented by Bos-Darnis, for "A new system of pianos."—Dated 24th January, 1859.—(Belgian Patent, expiring 18th January, 1879.)

353. ARMAND JEAN ANTOINE LOUIS DE DAX, of Nogent sur Marne, département de la Seine, a Certificate of Addition to his Patent of 8th January, 1859, for "Improvements in the manufacture of fire-arms."—Dated 24th January, 1859.

354. MIGNOT and GENEBRIAS, of 30, Petite Rue St. Pierre-Amelot, a Certificate of Addition to

* For the French Patent Law see No. 228 of this Journal.

their Patent of 19th June, 1857, for "Pipes for draining and conveying water, &c."—Dated 24th January, 1859.

355. Léonor Marie Duquesnel, of 14, Rue de Beaune, Paris, for "A cupping apparatus with a direct action."—Dated 24th January, 1859.

356. Stanislas Julien Ostorog, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the construction of organs, whereby they are made portable, or so-called 'travelling melodinas and organ-pianos.'"—Dated 24th January, 1859.

357. Pierre Theophile Joly, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Applying a known means to raising liquid or muddy substances by means of a vacuum obtained in any vessel."—Dated 24th January, 1859.

358. Joseph Rogé, represented by Gardissall, of 29, Boulevart St. Martin, Paris, for "Improvements in cartridge-boxes, &c."—Dated 24th January, 1859.

359. Eugène de Martres, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Obtaining a self-acting apparatus for levelling or pointing fire-arms."—Dated 24th January, 1859.

360. Hippolyte Thébaud, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Compressing dryed flour."—Dated 24th January, 1859.

361. Caré and Claparède, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Apparatus for excavating canals and rivers by conveying the soil by machines."—Dated 24th January, 1859.

362. Mrs. Adélaide Aglaé Mutel, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the composition of pads (tampons)."—Dated 24th January, 1859.

363. Augustin Renchon, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in apparatus for assembling springs applicable to ladies' dresses, crinolines, and others."—Dated 24th January, 1859.

364. Ernest Rondelet, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 14th July, 1858, for "Improvements in the manufacture of umbrellinos used in religious ceremonies."—Dated 24th January, 1859.

365. Jules Guillaume Chéret, of 21, Rue St. Paul, Paris, for "A mark for smoking pipes."—Dated 25th January, 1859.

366. Eugène Grenet, of 53, Avenue Montaigne, Paris, a Certificate of Addition to his Patent of 8th January, 1857, for "An electric battery."—Dated 25th January, 1859.

367. Hippolyte Grellier, of 36, Rue du Dragon, Paris, for "A railway break."—Dated 25th January, 1859.

368. François Oscar Barroy, of 18, Rue de Ménilmontant, Paris, for "Moveable hat-stands."—Dated 25th January, 1859.

369. Jules André Vorrin, domiciled 3, Rue de la Saunerie, Paris, for "A screw bevil for pictures, movements, clocks, &c."—Dated 25th January, 1859.

370. Verdeil and Michel, represented by Basset, of 14, Boulevart Montmartre, Paris, for "Treatment of madder."—Dated 25th January, 1859.

371. Louis Emile Gaveau, of 188, Rue du Faubourg, St. Martin, Paris, for "Machines for making bolts and rivets."—Dated 25th January, 1859.

372. Eloi Jean Baptiste Bournet, of 158, Grande Rue à la Chapelle, St. Denis, for "A system of railway switches."—Dated 25th January, 1859.

373. Edouard Souché, of 1, Rue Charlot aux Ternes, for "A system of bridles."—Dated 25th January, 1859.

374. Mrs. Marie Louise Fickter, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "A hand-made net voilette."—Dated 25th January, 1859.

375. Joseph Antoine Jean Redier, of 16, Cour des Petites Ecuries, Paris, for "A small alarum clock."—Dated 25th January, 1859.

376. Théophile Julien Laballe, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A process for vulcanizing and colouring caoutchouc."—Dated 25th January, 1859.

377. Jean Nanzieres, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 2nd February, 1858, for "Manufacture of a kind of fulled cloth."—Dated 25th January, 1859.

378. Gombeau and Royer, jun., represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 10th July, 1858, for "A barley mill with a cleaning apparatus and steel cylinders for breweries."—Dated 25th January, 1859.

379. Edouard Hardy, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A thermoscope with a differential controlling apparatus for lighthouses, signal disks, artificial hatching apparatus, &c."—Dated 25th January, 1859.

380. Galli and Paganetti, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, a Certificate of Addition to his Patent of 11th September, 1858, for "Improvements in smoke-consuming apparatus."—Dated 25th January, 1859.

381. Frédéric Jacobi, of 3, Rue Fournier, Batignolles, for "A case for smoking pipes."—Dated 26th January, 1859.

382. François Eléonore Gomot, of 50, Rue St. Sauveur, Paris, for "Silvering the inside of kitchen vessels and utensils."—Dated 26th January, 1859.

383. Joseph Antoine Dalmas, of 44, Rue Haute Rotonde, Marseille, département des Bouches du Rhône, a Certificate of Addition to his Patent of 21st April, 1858, for "A system of inodorous pans for closets."—Dated 24th January, 1859.

384. Léon Cusse, of Nîmes, département du Gard, for "Burners applicable to lighting apparatus fed by liquids composed of rectified alcohol and essence of turpentine."—Dated 24th January, 1859.

385. John Martin Rowan, represented by Burel, of 3, Rue d'Harcourt, Rouen, département de la Seine Inférieure, for "Improvements in steam-engines and boilers."—Dated 25th January, 1859.

386. Léopold Aron Hirtz, of Saverne, département du Bas Rhin, a Certificate of Addition to his Patent of 10th February, 1858, for "An hygienic chair."—Dated 26th January, 1859.

387. Alfred Bernard, of 9, Place Royale, Marseille, département des Bouches du Rhône, for "A kind of hats."—Dated 27th January, 1859.

388. Louis Charton, of Dampierre, département de l'Aube, for "Joining walls with tusks."—Dated 28th January, 1859.

389. André Cointry, of Ile Gloriette, Nantes, département de la Loire Inférieure, for "A machine worked by steam, compressed air, or any electric fluid."—Dated 29th January, 1859.

390. Jean Alexandre Mimard, of Villeneuve sur Yonne, département de l'Yonne, for "A mechanical steam horse."—Dated 29th January, 1859.

391. Alexandre Joseph Guilloteau, of St. Quentin, département de l'Aisne, for "A system of furnaces for fixed and moveable steam-engines and other industrial purposes." — Dated 31st January, 1859.

392. Joseph Tenaud, of Montoir, département de la Loire Inférieure, a Certificate of Addition to his Patent of 29th May, 1858, for "Manufacture of bricks."—Dated 1st February, 1859.

393. Louis Dupir, of St. Leu d'Esserent, département de l'Oise, for "Improvements in rasps for the manufacture of fecula."—Dated 1st February, 1859.

394. Eugène Goddier, represented by Petit, of 10, Rue Mogador, Paris, a Certificate of Addition to his Patent of 25th November, 1858, for "Applying talc or mica to various purposes."—Dated 26th January, 1859.

395. Richard Luther, of 5, Rue St. Claude au Marais, Paris, for "A case for smoking pipes." —Dated 26th January, 1859.

396. Paillard and Fosset, represented by Amouroux, of 333, Rue St. Martin, Paris, for "A sewing machine."—Dated 26th January, 1859.

397. Etienne Brun, of 20, Rue des Grands Augustins, Paris, for "A system of railway signals."—Dated 26th January, 1859.

398. The Electro Weaving Joint Stock Company, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Electrical apparatus applicable to Jacquart machines for weaving figured stuffs according to Bonelli's system and improvements."—Dated 26th January, 1859.

399. De Bronac and Deherrypon, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Treatment of metallic sulphurets, phosphurets, arseniurets, antimoniurets, &c., and especially of sulphur-ores of lead, antimony, copper, silver, zinc, &c."—Dated 26th January, 1859.

400. Jean Baptiste Chirol, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 30th July, 1858, for "A brush-card, being a substitute for common cards."—Dated 26th January, 1859.

401. Louis François Devisme, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to his Patent of 22nd December, 1858, for "A kind of revolver."—Dated 26th January, 1859.

402. Messrs. Fontaine, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, a Certificate of Addition to their Patent of 10th December, 1858, for "Cutting gloves."—Dated 26th January, 1859.

403. Pierre François Herbeaumon, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of ventilating and opening and closing hothouses."— Dated 26th January, 1859.

404. Nicolas Claise, represented by Binaud de Montuzet, of 16, Rue La Croix, Batignolles, for "Mineral teeth with shanks."—Dated 26th January, 1859.

405. Joseph Israël, of 29, Rue Volta, Paris, for "Applying porcelain to jewellery."—Dated 27th 1859.

406. Douglas Bly, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "Improvements in the construction of artificial legs."—Dated 27th January, 1859.— (American Patent, expiring 28th July, 1871.)

407. Etienne Dumaige, of 305, Rue St. Jacques, Paris, for "A manometer with a proportional dynamic resistance."—Dated 27th January, 1859.

408. Jules Rival, of 55, Rue Montmartre, Paris, a Certificate of Addition to his Patent of 22nd May, 1858, for "A manometer with an apparatus for ascertaining specific weight, and combined with a regulator."—Dated 27th January, 1859.

409. Napoléon Jacobs, of 25, Boulevart Bonne-Nouvelle, Paris, for "Galvanized heels for foot coverings."—Dated 27th January, 1859.

410. Félix Aroux, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the method of sowing."—Dated 27th January, 1859.

411. Félix Aroux, represented by Mathieu, of 45, Rue St. Sébastien, Paris, a Certificate of Addition to his Patent of 14th July, 1857, for "A system of sowing machines with manifold wheels."—Dated 27th January, 1859.

412. Nicolas Thirion, of 76, Rue Popincourt, Paris, a Certificate of Addition to his Patent of 17th April, 1851, for "An hydraulic machine for raising water to any height, &c."—Dated 27th January, 1859.

413. Charles Girard Jacquot, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A barometric condensor for steam engines."—Dated 27th January, 1859.

414. Charles Girard Jacquot, represented by Gardissal, of 29, Boulevart St. Martin, Paris, a Certificate of Addition to his Patent of 16th De-

cember, 1858, for "A barometric evaporating apparatus for evaporating or drying any substance."—Dated 27th January, 1859.

415. Jean Remy Lafone, of 18, Rue Rodier, Paris, a Certificate of Addition to his Patent of 30th July, 1856, for "A heating apparatus for laundries."—Dated 27th January, 1859.

416. François Ferdinand Sether, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A fountain penholder."—Dated 27th January, 1859.

417. Charles Collard, represented by Féquant, of 8 et 10, Rue Bertin Poiré, Paris, for "Manufacture of selvage lace for the manufacture of foot coverings."—Dated 28th January, 1859.

418. Claude Laurent Guillard, of 27, Rue du Pressoir, Belleville, for "Travelling boxes for dresses and bonnets."—Dated 28th January, 1859.

419. François Félix Rateau, represented by Daubréville, of 60, Boulevart de Strasbourg, Paris, for "A machine worked by regenerated steam."—Dated 28th January, 1859.

420. Samuel Riley, domiciled with Perret, Hôtel Britannique, of 2, Rue des Halles, Paris, for "Improvements in the manufacture of hats, caps, &c."—Dated 28th January, 1859.—(English Patent, expiring 18th November, 1872.)

421. Auguste Désiré Montagnat, of 17, Rue Campagne Première, Paris, for "Manufacture of horse-shoes."—Dated 28th January, 1859.

422. Emile Adolphe Auguste Amouroux, represented by Amouroux, of 333, Rue St. Martin, Paris, for "So-called 'poly-square bits for watch-keys.'"—Dated 28th January, 1859.

423. Mrs. Emma Isabelle Bouffar, of 47, Rue des Martyrs, Paris, for "A mode of conveyance."—Dated 28th January, 1859.

List of Specifications, &c. published during the week ending 18th March, 1859.

No.	Price.	Subject-Matter.
1821	5*d.*	Cocks, taps, or valves.
1824	7*d.*	Apparatus for lifting or pressing.
1825	6*d.*	Machinery for doubling cotton and other yarns or threads.
1826	10*d.*	Knitting machines.
1827	6*d.*	Machinery for combing wool.
1828	3*d.*	Manufacture of wire ropes or cables.
1829	3*d.*	Time keepers.
1830	3*d.*	Apparatus for exhibiting advertisements.
1831	3*d.*	Textile fabrics.
1832	9*d.*	Machinery for preparing and spinning cotton, &c.
1833	3*d.*	Steam engine.
1835	6*d.*	Wheels.
1836	1*s.* 10*d.*	Valve musical instruments.
1837	10*d.*	Pressure gauges.
1838	3*d.*	Brushes, mops, &c.
1839	6*d.*	Propelling ships and vessels.
1840	1*s.* 4*d.*	Apparatus used when making moulds for casting shells, &c.
1841	3*d.*	Puddling iron.
1842	6*d.*	Apparatus for supplying water to axle-tree boxes and other journal bearings.
1843	1*s.* 3*d*	Haymaking machines, &c.
1844	6*d.*	Apparatus for crushing and sifting.
1845	3*d.*	Dyeing textile fabrics, &c.
1846	3*d.*	Apparatus for exhibiting advertisements.
1847	1*s.* 4*d.*	Stocks for fire arms.
1848	5*d.*	Electric telegraph ropes or cables.
1849	1*s.* 1*d.*	Locomotive engines and other carriages, &c.
1850	9*d.*	Machinery for stretching and drying woven fabrics.
1851	10*d.*	Machinery for preparing and spinning cotton, &c.
1852	3*d.*	Machinery for the manufacture of printing types, &c.
1853	7*d.*	Treatment of crude india rubber, gutta percha, &c.
1854	3*d.*	Apparatus for straightening gun barrels.
1855	3*d.*	Manufacture of hats, caps, &c.
1856	9*d.*	Jacquard looms.
1857	1*s.* 4*d.*	Looms for weaving.
1859	11*d.*	Blast furnaces, &c.
1860	5*d.*	Dyeing wool, hair, cotton, &c.
1861	10*d.*	Manufacture of artificial gums from starch, farina, &c.
1863	3*d.*	Fabric for belting, hose, &c.
1864	3*d.*	Ornamenting fabrics, &c.
1866	7*d.*	Stereoscopes, &c.
1867	3*d.*	Railway danger signal.
1868	1*s.* 11*d.*	Connecting pipes, tubes, or ways for the conveyance of water, &c.
1869	9*d.*	Machinery for forging horseshoes.
1870	6*d.*	Apparatus for obtaining motive power.
1871	3*d.*	Projectile.
1872	6*d.*	Harmoniums, concertinas, &c.
1873	3*d.*	Manufacture of hats.
1874	3*d.*	Mangles.
1875	5*d.*	Projectiles.
1876	6*d.*	Spindles for spinning silk, &c.
1877	3*d.*	Machinery for cutting staves.
1878	3*d.*	Treating tan, &c.
1879	8*d.*	Preventing the accidental discharge of fire-arms.
1880	7*d.*	Blank forms of bankers' cheques or drafts.
1881	5*d.*	Propellers.
1882	3*l.*	Apparatus for churning or washing.
1883	7*d.*	Stuffing boxes and packings.
1884	3*d.*	Preparing cheques for preventing forgery.
1886	3*d.*	Looms for weaving.
1887	10*d.*	Implement for protecting turnip and other crops from the fly.
1888	3*d.*	Joists and laths for supporting floors used in drying grain.
1889	3*d.*	Electro-magnetic machines.
1890	9*d.*	Steam engines
1899	3*d.*	Looms for weaving.
1915	6*d.*	Mills for grinding.
1921	11*d.*	Self-acting lubricators.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).

Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices.

Admiralty, Steam Department.
——— Surveyor of Navy.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Sheerness ditto.
——— Devonport ditto.
——— Portsmouth ditto.
——— Chatham ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Small Arms Factory, Enfield.
Ordnance, Pall Mall.
War Office, Pall Mall.
School of Mines, Jermyn Street, Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Leadenhall Street.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India:—
Bengal; Agra; Madras; Bombay.
Ceylon.
Victoria.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec; Toronto
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin.
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Free Patent Museum and Library, South Kensington.

NUMBERS of VISITORS for the Week ending 19th March, 1859.

Day of Month.	Day of Week.	Morning.	Evening.	Total.
Mar. 14	Monday -	69	415	484—Very wet.
„ 15	Tuesday -	145	473	618—Fine.
„ 16	Wednesday	133	50	183— „
„ 17	Thursday*	84	—	84— „
„ 18	Friday -	131	—	131— „
„ 19	Saturday -	251	—	251— „
	Total -	813	938	1751

* The Museum closes at 5 o'clock.

Total number of visitors since the period of free daily admission (12th May, 1858) to 19th March, 1859, —77,864.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

In course of Publication, by Order of the Commissioners.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*

The following are in the press:—

PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c.
ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING.
BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE, Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(Registered for transmission abroad.)

No. 545. **FRIDAY, MARCH 25, 1859.** **Price 2d.**

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

350. To JAMES HOSKING, Oil Merchant, of Walworth Common, in the county of Surrey, for the invention of "Improvements in the manufacture of lamps."

On his petition, recorded in the Office of the Commissioners on the 8th day of February, 1859.

---

498. To HENRY BERNOULLI BARLOW, of the city of Manchester, Patent Agent, for the invention of "Improvements in apparatus for condensing steam." — A communication from abroad, by François Daina, of Bergamo, in the empire of Austria.

On his petition, recorded in the Office of the Commissioners on the 24th day of February, 1859.

---

546. To JOHN THOMSON CARTER, of Belfast, in the county of Antrim, Flax Spinner, for the invention of "Improvements in machinery for crushing, bruising, and preparing flax, hemp, and other fibrous materials requiring such treatment."

On his petition, recorded in the Office of the Commissioners on the 2nd day of March, 1859.

---

609. To JAMES PILBROW, of Tottenham, in the county of Middlesex, Civil Engineer, for the invention of "Certain improvements in, or a new method or methods of obtaining and applying motive power, a modification of which is also applicable for pumping or forcing liquids, gases, and fluids, as also for measuring liquids, gases, and fluids."

611. To Sir WILLIAM GEORGE ARMSTRONG, of Newcastle-upon-Tyne, in the county of Northumberland, Civil Engineer, for the invention of "Improvements in rifled ordnance and its projectiles."

613. To JOHN ERWOOD, of No. 132, Goswell Street, Clerkenwell, in the county of Middlesex, Paper Stainer, and JOSEPH SKERTCHLY, of Ashby-de-la-Zouch, in the county of Leicester, Engineer, for the invention of "Improvements in the manufacture of glass, sand, and emery papers and cloths, and other similar articles used for like purposes."

615. To JOHN SCOTT RUSSELL, of Great George Street, Westminster, for the invention of "Improvements in building ships and other vessels."

617. To ALFRED VINCENT NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "Improved machinery for rolling horse shoe iron." — A communication from William Watkin Lewis, residing in the United States of America.

619. And to HENRY FISHER, of Birkenhead, in the county of Chester, Gentleman, for the invention of "Improvements in machinery or apparatus for cutting thin sheets of metal into strips, and for tempering sheets or strips of metal."

On their several petitions, recorded in the Office of the Commissioners on the 9th day of March, 1859.

---

621. To JAMES YUILL, of Glasgow, in the county of Lanark, North Britain, Saddlers' Ironmonger, for the invention of "Improvements in saddle trees."

623. And to HENRY LODGE, of Liverpool, in the county of Lancaster, Merchant, for the invention of "Improved means of protecting ships, batteries, and other constructions or buildings from the effects of projectiles of various kinds."

On both their petitions, recorded in the Office of the Commissioners on the 10th day of March, 1859.

---

625. To JOHN COOPE HADDAN, of No. 4, Cannon Row, Westminster, Civil Engineer, for the invention of "Improvements in casting mortars and cannon."

627. To SAMUEL WHEATCROFT, of Brudenell Place, New North Road, county of Middlesex, Engineer, for the invention of "Improvements in the construction of goffering and rouching machines in order to render them self registering and self indicating."

629. And to FREDERICK CLARKE, of Norland Square, in the county of Middlesex, Gentleman, for the invention of "An improved mode of and apparatus for cutting, drying, and preparing peat to be used as fuel, or for other purposes for which it may be usefully employed."

On their several petitions, recorded in the Office of the Commissioners on the 11th day of March, 1859.

---

631. To JOHN CUNLIFFE and FREDERICK PIGGOTT, both of the city of Manchester, Manufacturers, and GEORGE MALLINSON, of Salford, in the county of Lancaster, Pattern Designer, for the invention of "Improvements in the manufacture of ornamental woven fabrics."

633. To WILLIAM EDWARD NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in the manufacture of shoes and other coverings for the feet."—A communication from abroad by Christopher Meyer, of New Brunswick.

635. To JOHN THOMAS CALOW, of Staveley, in the county of Derby, Joiner, Cabinet Maker, and Carriage Builder, for the invention of "A compound action in cage machinery, with the apparatus connected therewith, having a perforated shield for saving life and property in the event of a rope, band, or chain breaking, or the engine-man drawing the cage too high at coal or other shafts, where slides are applicable, which said invention is also applicable to hoisting or other lifting machines."

637. To JOHN COURT, of Brompton Row, in the county of Middlesex, Gas Fitter, for the invention of "An improvement in nibs for gas burners."

639. And to JAMES MACNAB, of the town and county of Linlithgow, North Britain, Designer, for the invention of "Improvements in telegraphing or signalling apparatus."

On their several petitions, recorded in the Office of the Commissioners on the 12th day of March, 1859.

---

641. To RICHARD ARCHIBALD BROOMAN, of No. 166, Fleet Street, in the city of London, E.C., Editor of the Mechanics' Magazine and Patent Agent, for the invention of "An improved method of treating wool and other fibres in order to form threads."—A communication from Messrs. Tavernier and Vouillon, residing in Paris.

643. To THOMAS LIGHTFOOT, of Accrington, in the county of Lancaster, Calico Printer, for the invention of "Improvements in fixing colours on woven fabrics or fibrous materials."

645. To CHARLES HENRY HURST, of Victoria Terrace, Royal Road, Kennington Park, in the county of Surrey, for the invention of "An improved wrench or spanner."

647. And to THOMAS PATSTONE, of Birmingham, in the county of Warwick, Warehouse Clerk, for the invention of "Improvements in shades or glasses, for gas and other lamps, and in the supports of the said shades or glasses."

On their several petitions, recorded in the Office of the Commissioners on the 14th day of March, 1859.

---

649. To WALTER LANGTON, of No. 14, Wharf, Belvedere Road, Lambeth, in the county of Surrey, for the invention of "Improvements in the manufacture of keys and wood fastenings used in constructing railways."

651. To GEORGE BELL GALLOWAY, of Newcastle-on-Tyne, in the county of Northumberland, for the invention of "Improvements upon, and in connection with, his former patents, and in the manufacture of fuel, and working steam engines more economically."

653. And to WILLIAM CLARK, of No. 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improvements in the apparatus of electric lamps or lights."—A communication from abroad by Victor Louis Marie Serrin, Civil Engineer, of Paris.

On their several petitions, recorded in the Office of the Commissioners on the 15th day of March, 1859.

Inventions protected for Six Months by the Deposit of a Complete Specification.

NOTICE is hereby given, that the petition of

656. GEORGE SEYMOUR, of No. 6, Golden Square, Regent Street, in the county of Middlesex, Gentleman, praying for Letters Patent for the invention of "Improvements in making refined sugar, and making potash and soda from the residues,"—a communication from Hypolite Leplay, of Pont de Madron, near Toulouse, France, Sugar Manufacturer and Chymist,—was deposited and recorded in the Office of the Commissioners on the 16th day of March, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

NOTICE is also hereby given, that the petition of

667. JOSEPH HARRIS, jr., of the state of Massachusetts, of the United States of America, praying for Letters Patent for the invention of "A new and useful or improved carpet sweeper," was deposited and recorded in the Office of the Commissioners on the 16th day of March, 1859, and a complete specification accompanying such petition, was at the same time filed in the said office.

Notice of Application for Leave to enter a Disclaimer and Memorandum of Alteration.

In the Matter of Letters Patent, dated the 11th day of March, 1851, granted to William Galloway and John Galloway, of Manchester, in the county of Lancaster, Engineers, for the invention of "Improvements in steam engines and boilers."

Notice is hereby given, that the said WILLIAM GALLOWAY and JOHN GALLOWAY, have applied by

petition to Her Majesty's Attorney General, according to the statute in that case made and provided, for leave to enter a Disclaimer and Memorandum of Alteration of parts of the Specification of the said Letters Patent.—Dated this 19th March, 1859.

CHARLES COWPER,
20, Southampton Buildings, London,
Agent for the Petitioners.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

25th March, 1859.

2161. WILLIAM LANDER, of the city of Bristol, Engraver, for an invention of "Improvements in engraving and printing for the purpose of ornamenting china and earthenware."—Dated 27th September, 1858.

2169. JOHN MANNING, of Cambridge, Engineer, and THOMAS PAUL, of Houghton, in the county of Huntingdon, Miller, for an invention of "An improved stone staff to be used in dressing millstones."—Dated 29th September, 1858.

2173. THOMAS BRITT, of No. 9, St. Thomas Terrace, Church Street, Old Kent Road, Camberwell, in the county of Surrey, Engineer, for an invention of "An improvement in the propelling of steam boats."—Dated 30th September, 1858.

2216. MORITZ JACOBY and FREDERIC RAINFORD ENSOR, of Nottingham, for an invention of "Improvements in the manufacture of bobbin net or twist lace, and other fabrics made in twist-lace machines."—Dated 5th October, 1858.

2224. DANIEL SCATTERGOOD, of Nottingham, Machine Builder, and ROBERT WALKER SMITH, of Nottingham, Hosier, for an invention of "Improvements in machinery for the manufacture of looped fabrics."—Dated 6th October, 1858.

2242. THOMAS ROBERTS and JOHN DALE, of Manchester, in the county of Lancaster, Manufacturing Chemists, for an invention of "An improved process for obtaining salts of soda and other alkalies."—Dated 8th October, 1858.

2272. WILLIAM JOHNSTON, Merchant, and WILLIAM ROSS, Brassfounder, both of Glasgow, in the county of Lanark, North Britain, for an invention of "Improvements in water-closets and taps or valves."—Dated 12th October, 1858.

2280. ROBERT RIDLEY, of Low Wortley, in the county of York, Engineer, for an invention of "Improvements in safety cages for mine shafts."—Dated 13th October, 1858.

2306. GEORGE TOMLINSON BOUSFIELD, of Loughborough Park, Brixton, in the county of Surrey, for an invention of "Improvements in machinery for cutting the threads of wood screws."—A communication from New Nork, United States of America.—Dated 15th October, 1858.

2326. ALFRED WILKS DRAYSON, of Plumstead, in the county of Kent, Captain in the Royal Artillery, and CHARLES RICHARD BINNEY, of Woolwich, in the same county, Captain in the Royal Engineers, for an invention of "Improvements in submarine telegraphic cables."—Dated 18th October, 1858.

2338. JOHN GRANT, of Hyde Park Street, in the county of Middlesex, Captain late Royal Artillery, for an invention of "Improvements in constructing and arranging ovens suitable for baking bread."—Dated 19th October, 1858.

2343. ROBERT GRIFFITHS, of 69, Mornington Road, Regent's Park, London, Engineer, for an invention of "Improvements in baths."—Dated 20th October, 1858.

2365. CHARLES CLAY, of Walton Grange, Wakefield, in the county of York, for an invention of "Improvements in apparatus for harrowing, scarifying, and cultivating land."—Dated 22nd October, 1858.

2487. WILHELM ZIERVOGEL, of Hettstädt, near Eisleben, in the kingdom of Prussia, for an invention of "Improvements in apparatus for distilling products from bituminous coal schist, peat, and other like substances."—Dated 6th November, 1858.

224. RUDOLPH BODMER, of 2, Thavies Inn, Holborn, in the city of London, for an invention of "Improved resin and resinous substances."—A communication from Mr. Jean Creuseton, residing at Paris, in the empire of France.—Dated 25th January, 1859.

325. JACQUES MARIE EDOUARD MASSON, of Rue des Fossés St. Thomas, Evreux, France, Gentleman, for an invention of "Improvements in apparatus to facilitate working under water."—Dated 4th Febrbary, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 23rd March*, 1859, *inclusive.*)

21st March.

677. JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of Glasgow, North Britain, Gentleman, for an invention of "Improvements in weaving by electric power, and in the machinery or apparatus employed therein."—A communication from Monsieur Louis Bolmida, Banker, President of the Electro Weaving Company, at Turin, in the kingdom of Sardinia.—Dated 22nd March, 1856.

680. HENRY BRIERLY, of Chorley, in the county of Lancaster, Machinist, for an invention of "Improvements in self-acting mules for spinning and doubling."—Dated 22nd March, 1856.

22nd March.

678. JOHN JONES and ALEXANDER CUNNINGHAM SHIRREFF, both of the city of Glasgow, in the county of Lanark, North Britain, Engineers, for an invention of "Improvements in the construction and application of rotatory motive-power engines and pumps."—Dated 22nd March, 1856.

708. George Hallen Cottam and Henry Richard Cottam, of Old St. Pancras Road, for an invention of "Improvements in the manufacture of chairs, bedsteads, and other articles to sit and recline on."—Dated 25th March, 1856.

720. Thomas Barnabas Daft, of the Irish Engineering Company, Seville Iron Works, Dublin, for an invention of "Improvements in the manufacture of metallic and other bedsteads and articles of metallic and other furniture."—Dated 26th March, 1856.

740. William Frederick Thomas, of St. Martin's-le-Grand, for an invention of "Improvements in sewing-machines."—Dated 27th March, 1856.

788. William Roberts, of Millwall, Poplar, in the county of Middlesex, for an invention of "Improvements in the construction of pumps."—Dated 1st April, 1856.

964. David Lloyd, of the Ebbw Vale Iron Works, South Wales, Engineer, for an invention of "Improvements in washing minerals, coal, and ores."—Dated 22nd April, 1856.

23rd March.

692. James Robertson, of Ardrossan, in the county of Ayr, North Britain, Engineer, for an invention of "Improvements in transmitting motive-power."—Dated 24th March, 1856.

705. William Foster, of Black Dike Mills, Bradford, in the county of York, Spinner and Manufacturer, for an invention of "Improvements in looms for weaving."—Dated 25th March, 1856.

FOREIGN PATENTS.

AUSTRIA.*

List of Patents for Inventions which were Delivered, Prolonged, and became Void during the Month of November, 1858.†

(*Communicated by the Austrian Government.*)

1. Patents Delivered.

1. Leopold Herling, of Vienna, for "A truss for inguinal ruptures, scrotal hernias, and combined inguinal and crural ruptures."—1 year.—(Secret.)—Dated 1st November, 1858.

2. Dr. Sigmund Reis, for "A surgical safety apparatus for the wounded."—2 years.—(Public.)—Dated 1st November, 1858.

3. Paul Jacovenco, of Odessa, represented by Baron von Sonnethal, Vienna, for "Coating wire gauze with gutta-percha, or any other gum or varnish, so as to obtain a solid and impervious material, being applicable as a substitute for leather."—1 year.—(Secret.)—Dated 1st November, 1858.

4. Carl Paul Haumann, of Heidelberg, represented by Friederich Aschermann, Vienna, for "Improvements in the construction of wooden window frames, whereby they are made perfectly water-tight"—1 year.—(Public.)—Dated 1st November, 1858.

5. Friedrich, Frank, and Joh. Scholz, of Ottakring, near Vienna, for "A vice opening to any width and whose lower end is by two thirds shorter than the common vices."—1 year.—(Secret.)—Dated 1st November, 1858.

6. Joseph Kucera, of Plan, Bohemia, for "Manufacture of hydraulic lime and cement from indigenous raw substances."—2 years.—(Secret.)—Dated 1st November 1858.

7. Hermann Steinmann, of Vienna, for "Improvements in the construction of manometers of steam-engines."—1 year.—(Secret.)—Dated 7th November, 1858.

8. Eduard Kutzer, of Dürnkrut, Lower Austria, for "A machine for sowing beetroot seed at equal distances, and heaping the soil on the same."—1 year.—(Public.)—Dated 7th November, 1858.

9. Karl Kauffmann, of Vienna, for "A peculiar construction of cylinders of lamps for burning solar oil-gas, whereby a great saving of oil and a better light are obtained."—1 year.—(Secret.)—Dated 7th November, 1858.

10. François Chanoit and Frederic Catelineau, of Bittschwiller, France, (Upper Rhine,) represented by Eduard Schmidt, Vienna, for "A self-acting boring pump."—2 years.—(Secret.)—Dated 8th November, 1858.—(French Patent, 10th May 1858.)

11. Alois Görlich, of Vienna, for "Closed apparatus for cooling beer."—1 year.—(Secret.)—Dated 8th November, 1858.

12. Eduard Schmidt, of Vienna, for "Improvements in valve-gears of steam-engines."—3 years.—(Secret.)—Dated 8th November, 1858.

13. Alois Reitzi, of Wiener-Neustadt, for "An apparatus for chimney pots whereby the action of wind or the sun is rendered harmless."—1 year.—(Public.)—Dated 8th November, 1858.

14. Alfred Fauvin Jaloureau, of Paris, represented by Georg Märkl, Vienna, for "A peculiar process for making impervious pipes for conveying gas, water, and for laying wires of submarine telegraph."—1 year.—(Public.)—Dated 8th November, 1858.

15. Ludwig Joh. Anselm Ernst Trotry-Latouche, of Paris, represented by Georg Märkl, Vienna, for "A gig-mill."—1 year.—(Public.)—Dated 8th November, 1858.

16. Bernhard Jacob and Dr. Leopold Friedrich Cohn, of Pest, for "Improvements in the

* For the Austrian Patent Law, see No. 291 of this Journal.

† In the case of inventions patented in other states as well as in Austria, the Specifications (whether described as "public" or not) may in most cases be consulted, or translations of them be had, at the Library of the Commissioners' Office.

manufacture of sets of teeth without springs."—2 years.—(Secret.)—Dated 8th November, 1858.

17. Eduard Clarence Shepard, of London, represented by Anton Schneider, Vienna, for "Improvements in electro-magnetic machines for combining circulation and for obtaining and concentrating electrical currents or powers, whereby the same are made to act in their various applications more advantageously than before."—5 years. (Public.)—Dated 9th November, 1858.

18. Bland Wilhelm Croker, of Vienna, for "Improvements in manufacturing domestic utensils, vessels, and other utensils used for electrical processes and manufacturing purposes, from carburetted or other convenient substances, whereby they are rendered more durable and may be applied to a greater variety of purposes."—2 years.—(Public.)—Dated 9th November, 1858.

19. Angelus Valerio, of Triest, for "An improved machine for obtaining cocoa and chocolate, and by means of which two persons may produce nearly 600 pounds of chocolate within 10 or 12 hours."—10 years.—(Secret.)—Dated 9th November, 1858.

20. R. Kormos and Stephan Czeller, of Hatvan. Hungary, for "A peculiar lighting substance called 'economical gas,' which is inodorous, smokeless, and inexplosive."—5 years.—(Secret.)—Dated 9th November, 1858.

21. Rosalia Gross, of Brünn, for "A cosmetic substance, called 'Indian vegetable oil for the hair.'"—1 year.—(Secret.)—Dated 9th November, 1858.

22. Robert Mankowsky, of Vienna, for "Improvements in coke-kilns."—1 year.—(Public.)—Dated 9th November, 1858.

23. Leopold Stern, of Ofen, for "Improvements in all kinds of dresses of men and women, by applying thereat a peculiar elastic drawing hem."—1 year.—(Secret.)—Dated 10th November, 1858.

24. Carl Felix Sebille, of Nantes, represented by Georg Märkl, Vienna, for "A peculiar process for the manufacture of pipes which are tinned inside."—1 year.—(Public.)—Dated 10th November, 1858.

25. Ignaz Freund, of Alt-Ofen, for "Improvements in the treatment of resist paste used in indigo-dyeing and printing."—1 year.—(Secret.)—Dated 10th November, 1858.

26. Angelo Montagnoli, of Cittadella, for "A lighthouse lighted by means of camphine."—2 years.—(Public.)—Dated 10th November, 1858.

27. August Klein, of Vienna, for "A combined portemonnaie and pocket-book."—1 year.—(Public.)—Dated 10th November, 1858.

28. Theresia Höltzler, of Gran, Hungary, for "Improvements in protecting foot-coverings for men and ladies from the action of perspiration and water."—1 year.—(Secret.)—Dated 10th November, 1858.

29. August Lovrek, of Vienna, for "Improvements in the construction of furnaces heated by coke and coal, as patented formerly by Friederich Ghode."—2 years.—(Secret.)—Dated 10th November, 1858.

30. Louis Böhm, of Vienna, for "Improvements in the galvanoplastic process, whereby electricity may be distributed so as to obtain any objects of art, such as figures, busts, &c., of any size and bulk from one piece without soldering."—1 year.—(Secret.)—Dated 10th November, 1858.

31. Friedrich Kinn, of Vienna, for "Improvements in his malt-kiln, whereby the staves or rods of the same are made in a conical shape, so as to make the grate narrow above and wide below, for the purpose of facilitating ventilation, economizing time and fuel and the falling through of the germ, and of preventing the obstruction of said grate."—1 year.—(Public.)—Dated 12th November, 1858.

32. Johann Gustav Larsonnier, of Paris, and Hyacinth Aug. Blanche, of Puteaux, France, represented by Georg Märkl, Vienna, for "Improvements in hand-printing by means of blocks."—1 year.—(Public.)—Dated 12th November, 1858.

33. Franz Weber, of Dresden, represented by Dr. Höchstmann, Vienna, for "A peculiar construction of ice-safes for preserving eatables, beverages and other objects."—4 years.—(Secret.)—Dated 12th November, 1858.—(Saxon Patent, 24th July, 1858.)

34. Friedrich Rödiger, of Vienna, for "Billiard-tables which can be taken to pieces."—1 year.—(Public.)—Dated 13th November, 1858.

35. Ignaz Laub, of Ofen, for "A peculiar apparatus for removing the fusel oil from spirits on a small scale."—2 years.—(Secret.)—Dated 13th November, 1858.

36. Bernhard Fischer, of Neusatz, Servia, for "Improvements in men's dresses, whereby the parts near the buttons and collars are made more durable."—1 year.—(Secret.)—Dated 13th November, 1858.

37. Dr. Heinrich Ziegler, of Winterthur, Switzerland, represented by Aug. Schmidt, Vienna, for "Improvements in self-acting lubricators of journals."—4 years.—(Secret.)—Dated 13th November, 1858.—(Baden Patent, 28th July, 1858.)

38. Zacharias Pasta, of Milan, for "A peculiar construction of inodorous night stools."—1 year.—(Secret.)—Dated 13th November, 1858.

39. Franz Plischke, of Brünn, for "Improvements in the manufacture of bags from raw silk, cotton, wool, and thread, for pressing beetroot and obtaining the juice thereof."—2 years.—(Secret.)—Dated 13th November, 1858.

40. Theodore Schultz, of Vienna, for "A peculiar construction of pistons of steam engines, locomotives, air and water pumps, by applying a spiral thread on their periphery."—1 year.—(Public)—Dated 13th November, 1858.

41. Bontin, Poinsont, and Co., and Edmund Victor Fresson, of Grenelle, near Paris, represented by Georg Märkl, of Vienna, for "A portable furnace for charring wood and other fuel."—1 year.—(Public.)—Dated 13th November, 1858.

42. Ferdinand Hallmann, of Vienna, for "An improved construction of iron safes and chests."—1 year.—(Public.)—Dated 14th November, 1858.

43. Georg Scott, of Manchester, represented by Georg Märkl, Vienna, for "Improvements in steam generators."—1 year.—(Public.)—Dated 14th November, 1858.

44. Franz Kas, of Prague, for "Obtaining millstones of foreign crystal quartz."—1 year.—(Public.)—Dated 14th November, 1858.

45. Marie Hardon, of Vienna, for "An easy and safe method of obtaining patterns for cutting ladies' dresses."—1 year.—(Secret.)—Dated 14th November, 1858.

46. Heinrich Johann Distin, of London, represented by Georg Märkl, Vienna, for "A peculiar construction of cornets-à-piston and other wind instruments."—5 years.—(Public).—Dated 16th November, 1855.

47. August Lenz, of Vienna, for "A peculiar, simple, and economical process for obtaining aluminium, and at the same time chloride of mercury."—2 years.—(Public.)—Dated 16th November, 1858.

48. Johann Christoph Endris, of Vienna, for "Improvements in breech-loading fire-arms."—2 years.—(Secret.)—Dated 16th November, 1858.

49. Nikolaus Mayes, of Raab, for "A peculiar construction of conical chimney flues, with cowls for preventing the issue of sparks from locomotives, whereby the working power of engines is increased, and a great saving of fuel is obtained."—1 year.—(Public.)—Dated 16th November, 1858.

50. Carl Herxel, of Laibach, for "A peculiar animal substance called 'cogrü,' for clarifying liquids, and especially appl cable to coffee, wine, and vinegar."—1 year.—(Public.)—Datcd 16th November, 1858.

51. Paul Morin and Co., of Nanterre, France, represented by Cornelius Kasper, Vienna, for "A process for reducing aluminium."—1 year.—(Secret.)—Dated 16th November, 1858.

52. Joseph Langer, of Hussth, for "Improvements in his construction of iron suspension bridges by means of beams of an equal power of resistance, whereby they may be applied to great spans."—1 year.—(Public.)—Dated 16th November, 1858.

53. Alfons Dietz, of Vienna, for "Lessening concussions in machines which are worked suddenly either by arms or excentrical or reverting catches by inserting elastic substances between any parts of the motor."—1 year.—(Secret.)—Dated 19th November, 1858.

54. Georg Hartl, of Vienna, for "Improvements in converting vegetable and animal oils and fats into sebacic acids and glycerine by means of water-steam."—1 year.—(Secret.)—Dated 19th November, 1858.

55. Emanuel Strelisker, of Debreczin, Hungary, for "Manufacturing so-called 'American household soap' from all kinds of fats, and by applying a new substance thereto."—1 year.—(Secret.)—Dated 19th November, 1858.

56. David A. Hopkins, of South Bergen, United States, represented by Christoph. Endris, Vienna, for "Improvements in journal-boxes."—2 years.—(Secret.)—Dated 19th November, 1858.—(American Patent, 23rd February, 1858.)

57. Abraham Tischler, of Vienna, for "An expeditious mode of painting houses, &c."—1 year.—(Secret.)—Dated 21st November, 1858.

58. G. Pfannkuche and Scheider, of Vienna, for "Improvements in his iron safes and chests, as patented 7th January, 1858."—1 year.—(Public.)—Dated 21st November, 1858.

59. Wilhelm Kraft, of Vienna, for "A slide apparatus of wood, metal, or ivory with or without a paper scale, for reducing the old into the new monetary system."—1 year.—(Secret.)—Dated 22nd November, 1858.

60. August Lenz, of Vienna, for "Improvements in processes for obtaining aluminium."—2 years.—(Public.)—Dated 22nd November, 1858.

61. Aug. Lenz, of Vienna, for "Improvements in pressing out fluids from organic substances."—2 years.—(Public.)—Dated 22nd November, 1858.

62. Dr. Gustav Bischof, of Bonn, represented by Dr. Kern, Vienna, for "A peculiar process for extracting copper from sulphurous and acid copper-ores without using acids."—5 years.—(Secret.)—Dated 22nd November, 1858.

63. Friedrich Rödiger, of Vienna, for "An apparatus for lubricating axles, pivots, &c. of fixed machines, locomotives, tenders, railway and other carriages."—1 year.—(Public.)—Dated 22nd November, 1858.

64. S. Spiller, of Vienna, for "An apparatus for preserving leeches."—1 year.—(Secret.)—Dated 22nd November, 1858.

65. Nikolaus Thieriet, of Verona, for "A brick machine."—5 years.—(Secret.)—Dated 22nd November, 1858.

66. Heinrich Ozouf, of Paris, represented by Georg Märkl, Vienna, for "An apparatus for converting the lime used in clarifying beetroot and cane sugar into carbonate, and re-applying the same to the manufacture of sugar."—1 year.—(Public.)—Dated 22nd November, 1858.

67. Arnold Felix Delacroix, of Chartres, France, represented by Georg Märkl, Vienna, for "Improvements in locomotives."—1 year.—(Public.)—Dated 22nd November, 1858.

68. Joseph and Vincenz Lancia, of Turin, represented by Evarist Medea, Milan, for "A machine for filling sausages."—1 year.—(Public.)—Dated 22nd November, 1858.—(Sardinian Patent, 30th June, 1858.)

69. Ernest Neumann, of Vienna, for "A kind of match-boxes, which may be used as firing apparatus."—1 year.—(Secret.)—Dated 22nd November, 1858.

70. Wilhelm Felix Aroux, of Montaure, France, represented by Baron von Sonnenthal, Vienna, for "Improvements in his patent sowing machine, whereby it may be enlarged to any size, and used in a forward and backward direction, said improved parts being also applicable to other sowing machines."—1 year.—(Secret.)—Dated 22nd November, 1858.

71. Carl Brunn von Neegoard, of Jarsdorf, Holstein, represented by Wilhelm Skallitzky, Vienna, for "An improved sowing machine for distributing the seed at an equal distance and

depth."—1 year.—(Secret.)—Dated 22nd November, 1858.

72. Ignay Michael Firnstahl, of Vienna, for "Improvements in his Patent Decimal double printing machine."—1 year.—(Secret.)—Dated 22nd November, 1858.

73. August Ferdinand Sieker, of Grossenhain, Saxony, represented by Dr. Ed. Wiedenfeld, Vienna, for "A peculiar construction of power-looms for weaving all kinds of fabrics."—1 year.—(Secret.)—Dated 22nd November, 1858.—(Saxon Patent, 9th April, 1858.)

74. Johanna Miller, of London, represented by Georg Märkl, Vienna, for "A peculiar machine for baking bread."—3 years.—(Public.)—Dated 22nd November, 1858.

75. Eduard Bolland, of Vienna, for "Improvements in machines for sewing leather, cloth, and similar substances."—1 year.—(Secret.)—Dated 23rd November, 1858.

76. Mathias Lenzbauer, of Vienna, for "A peculiar construction of inodorous water-closets."—1 year.—(Secret.)—Dated 23rd November, 1858.

77. J. C. Endris, of Vienna, for "Improvements in apparatus for compressing and expanding gaseous fluids."—2 years.—(Secret.)—Dated 27th November, 1858.

---

2. Patents Prolonged.

1. L. J. Fontaine-Moreau, for "A system of preserving seeds and grain in closed places or pits."—2nd year.—(Public.)—Dated 8th November, 1857.

2. Juda Wiltschek, for "A liquid for cleaning garments and linen."—2nd year.—(Secret.)—Dated 15th November, 1857.

3. Josef Hörmer, for "An apparatus for washing and mangling linen."—3rd year.—(Secret.)—Dated 25th October, 1856.

4. Amadeus Theodor Leder and Hermann Alexander Leder, for "An improved process for obtaining articles of perfumery by the warm process."—3rd–5th years.—(Secret.)—Dated 25th October, 1856.

5. Leopold Nagl and Carl König, for "Converting walking sticks into torches by means of a certain liquid."—2nd year.—(Secret.)—Dated 21st October, 1857.

6. Johann Fent, for "So-called 'Keratin-pomatum.'"—2nd year.—(Secret.)—Dated 21st October, 1857.

7. Alois Edelmann, for "Manufacture of carpets from selvages."—6th year.—(Secret.)—Dated 6th November, 1853.

8. Wilhelm Pollak, for "Disacidifying seed-oil."—6th year.—(Secret.)—Dated 18th November, 1853.

9. Johann Zeh, for "Manufacturing grease called 'Stone-grease' for lubricating carriages and machines."—3rd year.—(Secret.)—Dated 9th November, 1856.

10. Paul Trangott Meissner, for "Improvements in heating apparatus for railway carriages, vessels, &c."—3rd and 4th years.—(Secret.)—Dated 16th November, 1856.

11. Eduard Adolph Joseph Estivant, for "Improvements in moulds for casting metal pipes."—2nd year.—(Secret.)—Dated 1st November, 1857.

12. Count Peter Hermann Fontaine Moreau (Frederic Pothenot and Co., assignees), for "Spheroidical bodies for accelerating rotation in machines."—2nd year.—(Secret.)—Dated 7th November, 1857.

13. Joh. Hartinger and Franz Fiala, for "A machine for printing stuffs for garments and furniture."—2nd year.—(Secret.)—Dated 8th November, 1857.

14. John Chrisholm, for "A process for disinfecting cesspools, drains, &c."—2nd year.—(Secret.)—Dated 22nd September, 1858.

15. Leopold Köppel (Georg Donner, assignee), for "An improved stenographic apparatus for directories."—7th year.—(Secret.)—Dated 21st October, 1852.

16. Johann Haas, for "An apparatus for rendering windows and ovens air and water tight."—7th year.—(Secret.)—Dated 24th October, 1852.

17. Johann Nejedly, for "Improvements in the manufacture of arsenical colours of verdigris."—8th year.—(Secret.)—Dated 17th December, 1851.

18. Joseph Siegl, for "So-called 'impervious playing cards which may be washed.'"—14th year.—(Public.)—Dated 27th October, 1845.

19. Friedrich Paget and Joh. Baptist Hammerschmidt, for "Improvements in the construction of water-pipes, and the gas-tight closing of closets."—6th year.—(Secret.)—Dated 29th October, 1853.

20. Franz Jonasch, for "An apparatus, called 'Iris case,' for painting."—4th year.—(Public.)—Dated 3rd November, 1855.

21. Hersch Klager, for "Manufacture of mineral oil for illuminating purposes."—2nd year.—(Secret.)—Dated 8th November, 1857.

22. Heinrich Gustav Alexander Guillaume, Achilles Nepomuk Grenier, and Carl Goschler, for "A system of railway chairs of rolled iron."—2nd year.—(Public.)—Dated 24th December, 1857.

23. Emanuel Fleischmann (Joseph Roth, assignee), for "Improvements in men's dresses, whereby buttons are protected from tearing."—2nd and 3rd years.—(Secret.)—Dated 10th July, 1858.

24. Wilhelm Köhler and Adolph Reach, for "Improvements in presses for obtaining blanc-stamps."—2nd year.—(Secret.)—Dated 16th November, 1857.

25. Elias Horowitz, for "Improvements in stoves and kitchen ranges of sheet-iron, and other kitchen vessels of sheet-iron, copper, brass, zink, &c."—2nd year.—(Secret.—Dated 21st November, 1857.

26. Alois Winkler, for "Obtaining inscriptions in gold oil colours on sheet-iron by means of printing-presses."—2nd year.—(Secret.)—Dated 27th November, 1857.

27. Victor Thumb, for "A mechanical templet for weaving cloth and other fabrics."—3rd year.—(Secret.)—Dated 16th November, 1856.

28. Jacob Franz Heinrich Hemberger, for "Improvements in applying caoutchouc and gutta-percha to the construction of buffers, and springs for suspension, traction, and buffers."—7th year.—(Secret.)—Dated 5th November, 1852.

29. Johann Grimm, for "Making shingles by machinery."—4th year.—(Secret.)—Dated 3rd November, 1855.

30. Johann Baptist Scheder and Julius Galecki, for "Iron spring bed-bottoms."—5th year.—(Secret.)—Dated 15th January, 1855.

31. Carl and Anton Köhler, for "A vegetable essence for the hair."—3rd year.—(Secret.)— Dated 11th November, 1856.

32. Moriz Unterwalder, for "An impervious elastic composition for coating woven fabrics."—3rd and 4th years.—(Secret.)—Dated 29th November, 1856.

33. David Mandel and Jonas Mayer, for "Improvements in the construction of furniture."—2nd year.—(Secret.)—Dated 17th November, 1857.

34. William O. Grover and William E. Baker, for "Improvements in sewing machines."—6th year.—(Secret.)—Dated 18th November, 1853.

35. Jean Paul Fischer, for "A peculiar construction of dwelling houses, with peculiar principals and lintels."—4th year.—(Secret.)—Dated 13th November, 1855.

36. Wenzel Worechowsky, for "Improvements in centimal weighing-bridges."—4th year.—(Secret.)—Dated 12th February, 1856.

37. Aeneas Quinterio and David Nava, for "A process for obtaining volatile oils from resin and coal-tar."—3rd year.—(Secret.)—Dated 7th November, 1856.

38. Carl and Anton Köhler, for "Pomatum-oil."—3rd year.—(Secret.)—Dated 11th November 1856.

39. Joseph Roy, for "Improvements in double-action cylinder lever pumps."—3rd year.—(Secret.)—Dated 27th November, 1856.

40. Alfred Louis Stanislaus Chenot, for "Improvements in processes and apparatus for reducing oxides of metals."—2nd year.—(Public.)—Dated 26th December, 1857.

3. Patents which have become Void.*

1. Andreas Adolph Kirchheim, for "A compressed-air apparatus for raising liquids, and especially beer."—Dated 1st August, 1857; expired 1st August, 1858.

2. Anton Ludwig Warnery, for "A process and apparatus, called 'Slubbing-lapping apparatus,' for preparing the waste of silk, cotton, wool, flax, hemp, and other textile substances for spinning."—Dated 15th August, 1857; expired 15th August, 1858.

3. Innocenz von Almasy, for "Improvements in gas-reservoirs."—Dated 7th August, 1857; expired 7th August, 1858.

4. Franz. Raschanek, for "Using a new substance for building carriages."—Dated 3rd June, 1854; expired 3rd June, 1858.

5. Ignaz Michael Firnstahl, for "A so-called 'Decimal double printing machine.'"—Dated 6th August, 1856; expired 6th August, 1858.

* The Specifications of these Patents may be consulted in the original language, or translations be had at the Public Free Library.

PRUSSIA.*

List of Patents for Invention Delivered on the 31st January and during the month of February, 1859.

(*Communicated by the Minister of Commerce and Public Works.*)

1. V. Daelen, of Hörde, near Dortmund, for "An hydraulic centrifugal blast."—5 years.—Dated 31st January, 1859.

2. J. H. F. Prillwitz, of Berlin, for an imported invention of "A machine for making horse-shoes."—6 years.—Dated 1st February, 1859.

3. J. H. F. Prillwitz, of Berlin, for an imported invention of "Mechanical apparatus applicable to looms for inserting various colours."—5 years.—Dated 21st February, 1859.

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 546. TUESDAY, MARCH 29, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

2563. BARTOLOMMEO PREDAVALLE, of Hart Street, in the county of Middlesex, Civil Engineer, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in producing or obtaining motive power."

As set forth in his petition, recorded in the said office on the 15th day of November, 1858.

2599. And CHARLES COWPER, of No. 20, Southampton Buildings, Chancery Lane, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "Improvements in assorting and separating combed fibres, and in machinery for that purpose."—A communication from M. Ziegler, residing at Guebwiller, in France.

2603. And HENRY STOTT, of Greetland, near Halifax, in the county of York, Cotton Warp Manufacturer, has given the like notice in respect of the invention of "Improvements in warping mills, or apparatus connected therewith."

2608. And ELISHA THOMAS ARCHER, of Bridgefield House, Wandsworth, in the county of Surrey, Paper Manufacturer, has given the like notice in respect of the invention of "Improvements in hat ventilators, and for appliances connected therewith."

As set forth in their respective petitions, all recorded in the said office on the 18th day of November, 1858.

2617. And CHARLES FRÉDERIC VASSEROT, of 45, Essex Street, Strand, London, Patent Agent, has given the like notice in respect of the invention of "An improved apparatus for condensing and cooling vapours and liquids."—A communication from Louis Fialon, residing at Lyons, in the empire of France.

2619. And WILLIAM RAMSCAR and JOHN GRAY SCOTT, of the city of Manchester, in the county of Lancaster, have given the like notice in respect of the invention of "Improvements in fire arms."

2621. And HENRY BAILEY, of 35, Golden Square, in the county of Middlesex, Warehouseman, has given the like notice in respect of the invention of "Improvements in heating razors."

As set forth in their respective petitions, all recorded in the said office on the 19th day of November, 1858.

2636. And CHARLES TOMLISON, of Worcester Street, Wolverhampton, in the county of Stafford, Accountant, has given the like notice in respect of the invention of "Improvements in stop taps or valves."

2637. And CHARLES CUIT, of Paris, in the empire of France, Manufacturer, has given the like notice in respect of the invention of "Improvements in railway breaks."

2638. And WILLIAM LEA, of the firm of William and John Lea, of Wolverhampton, in the county of Stafford, Brass Founders and Cock Makers, has given the like notice in respect of the invention of "A method of lubricating cocks and taps."

2639. And RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E. C., Patent Agent, has given the like notice in respect of the invention of "Improvements in the manufacture of dolls, statuettes, figures of animals, and others, and toys."—A communication from A. F. E. Robert, residing in Paris.

2640. And HENRY JORDAN, of Liverpool, in the county of Lancaster, Ship-builder, has given the like notice in respect of the invention of "Improvements applicable to navigable vessels."

2641. And DANIEL EVANS, of Chobham Cottages, New Town Stratford, in the county of Essex, has given the like notice in respect of the invention of "Improvements in tubular steam boilers and fireplaces, or furnaces used therewith."

2645. And Henry Boden, of Crescent Cottage, Cambridge Heath, Hackney, in the county of Middlesex, Silk Manufacturer, and Thomas Cooper, of Ann's Place, Hackney Road, in the same county, Machinist, have given the like notice in respect of the invention of "Improvements in plaiting or braiding machinery."

2646. And Heman Gardiner, of the city of New York, in the United States of America, Mechanical Engineer, has given the like notice in respect of the invention of "Improvements in the compound axle hub and wheel for railroad cars."

As set forth in their respective petitions, all recorded in the said office on the 20th day of November, 1858.

2649. And Francois Alphonse Theroulde, of No. 67, Rue Caumartin, Paris, has given the like notice in respect of the invention of "Improvements in obtaining salts and products from the ashes of marine plants."

As set forth in his petition, recorded in the said office on the 22nd day of November, 1858.

2655. And William Henry Dawes, of Bromford Ironworks, West Bromwich, in the county of Stafford, Iron Master, has given the like notice in respect of the invention of "An improvement in forge hammers and in the anvils used with forge hammers and squeezers."

As set forth in his petition, recorded in the said office on the 23rd day of November, 1858.

2663. And Richard Archibald Brooman, of No. 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "An improvement in cigar cases."—A communication from G. Scriba, residing in Paris.

2668. And Charles Peterson, of Lowcliffe Lodge, Isle of Wight, in the county of Hants, Gentleman, has given the like notice in respect of the invention of "Improvements in the manufacture of paper cartridges, and in paper applicable for waterproof purposes."

2669. And James Syson Nibbs, of the Manor of Aston, in the county of Warwick, Lamp and Chandelier Manufacturer, has given the like notice in respect of the invention of "Improvements in lighting, heating, and ventilating."

As set forth in their respective petitions, all recorded in the said office on the 24th day of November, 1858.

2683. And Jozé Luis, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "A new sort of drawers or trowsers for ladies or children."—A communication from Celina Gobert.

2691. And John Billington Booth, of Preston, in the county of Lancaster, Spindle Manufacturer, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for preparing spinning, doubling, and winding cotton and other fibrous materials."

2692. And William Richards, of the Gas Works, Barcelona, in the kingdom of Spain, Engineer, but now of Harpur Street, Red Lion Square, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in the construction of gas meters."

2693. And Price Griffiths and John Brennand, both of Burnley, in the county of Lancaster, Engineers, &c., have given the like notice in respect of the invention of "Improvements in lubricators for introducing lubricating matter into steam cylinders, and other chambers or parts under pressure."

As set forth in their respective petitions, all recorded in the said office on the 26th day of November, 1858.

2710. And George Collier and William Noble, both of Halifax, in the county of York, have given the like notice in respect of the invention of "Improvements in means or apparatus for the manufacture of spokes for carriage wheels, which improvements are also applicable to the cutting of wood for other purposes."

2713. And William Parsons, of Bitterme, near Southampton, in the county of Hants, Bricklayer, has given the like notice in respect of the invention of "Doing away with the smell arising from the melting fat, tallow, &c., and also for an improvement in stirring and straining the same."

As set forth in their respective petitions, both recorded in the said office on the 29th day of November, 1858.

2736. And Robert Henry Bow, of Edinburgh, in the county of Mid-Lothian, North Britain, Civil Engineer, has given the like notice in respect of the invention of "Improvements in railway chairs and fastenings."

As set forth in his petition, recorded in the said office on the 1st day of December, 1858.

2760. And George Spiller, of No. 15, Upper Southwick Street, Hyde Park, in the county of Middlesex, a Lieutenant-Colonel in Her Majesty's Royal Artillery, has given the like notice in respect of the invention of "Improvements in knapsacks for military and other purposes."

As set forth in his petition, recorded in the said office on the 2nd day of December, 1858.

2764. And George Edward Noone, of No. 28, Hodson Street, Frances Street, Newington Butts, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "Certain improvements in machinery for generating gas from coal."

As set forth in his petition, recorded in the said office on the 3rd day of December, 1858.

2781. And Henry Thomas Yates, of Hounds Gate, Nottingham, has given the like notice in respect of the invention of "Improvements in the manufacture of boards or sheets when wood sawdust is used."

2784. And William Edward Newton, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Certain improvements in grain and grass harvesting machines."—A communication.

As set forth in their respective petitions, both recorded in the said office on the 4th day of December, 1858.

2825. And John Elder, of Glasgow, Engineer, has given the like notice in respect of the invention of "Improvements in paddle-wheels."

As set forth in his petition, recorded in the said office on the 9th day of December, 1858.

2875. And William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "Improved agricultural implements."—A communication from Louis Jacques Château, Public Notary, of Paris, in the empire of France.

As set forth in his petition, recorded in the said office on the 15th day of December, 1858.

2891. And William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer, Patent Agent, has given the like notice in respect of the invention of "Improvements in submarine electric telegraph cables or conductors."—A communication from Felix Marie Baudouin, of Rue des Recollets, Paris.

As set forth in his petition, recorded in the said office on the 16th day of December, 1858.

2914. And William Elbert Dando, of the state of Pennsylvania, in the United States of America, at present residing in Manchester, in the county of Lancaster, Clerk, has given the like notice in respect of the invention of "Improvements in apparatus for lowering boats from ships or vessels, and also for raising the same as required."

As set forth in his petition, recorded in the said office on the 21st day of December, 1858.

209. And William Collett Homersham, of Adelphi Terrace, Strand, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in floating 'gridirons' or stages for repairing ships or other vessels."

As set forth in his petition, recorded in the said office on the 24th day of January, 1859.

303. And Isaac Clements, of Birmingham, in the county of Warwick, Warehouse Clerk, has given the like notice in respect of the invention of "A new or improved method of manufacturing curtain rings."

As set forth in his petition, recorded in the said office on the 2nd day of February, 1859.

435. And John James Russell, of Wednesbury, in the county of Stafford, has given the like notice in respect of the invention of "Improvements in machinery used for heating and welding the edges of the plates used in the manufacture of cylinders and other articles."

437. And Jules Seguin, Doctor of Medicine, of 4, Grande Rue de Gravelle, à St. Maurice (Seine), France, has given the like notice in respect of the invention of "Improvements relating to the employment of moving power arising from the tides, and its application to manufacturing, agricultural, and other purposes."

As set forth in their respective petitions, both recorded in the said office on the 16th day of February, 1859.

526. And James Howden, of Glasgow, in the county of Lanark, North Britain, Engineer, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for cutting, shaping, punching, and compressing metals."

As set forth in his petition, recorded in the said office on the 28th day of February, 1859.

544. And John Pile, of West Hartlepool, in the county of Durham, Shipbuilder, has given the like notice in respect of the invention of "Improvements in the construction of floating docks."

As set forth in his petition, recorded in the said office on the 1st day of March, 1859.

559. And James Newcomb, of the city of Bristol, Engineer, and Joseph Gwyre Lovell, of the city of Bristol, Merchant, have given the like notice in respect of the invention of "Improvements in obtaining and applying motive power especially adapted amongst other purposes to the propelling of ships and vessels."

As set forth in their petition, recorded in the said office on the 2nd day of March, 1859.

568. And William Score, of No. 9, Osborne Terrace, Clapham Road, in the county of Surrey, Chemist, has given the like notice in respect of the invention of "Improvements in the manufacture of soap."

As set forth in his petition, recorded in the said office on the 3rd day of March, 1859.

635. And John Thomas Calow, of Staveley, in the county of Derby, Joiner, Cabinet-maker, and Carriage Builder, has given the like notice in respect of the invention of "A compound action in cage machinery, with the apparatus connected therewith, having a perforated shield for saving life and property in the event of a rope, band, or chain breaking, or the engine-man drawing the cage too high at coal or other shafts where slides are applicable, which said invention is also applicable to hoisting or other lifting machines."

As set forth in his petition, recorded in the said office on the 12th day of March, 1859.

656. And George Seymour, of No. 6, Golden Square, Regent Street, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in making refined sugar, and making potash and soda from the residues."—A communication from Hypolite Leplay, of Pont de Madron, near Toulouse, France, Sugar Manufacturer and Chymist.

667. And Joseph Harris, junr., of the state of Massachusetts, of the United States of America, has given the like notice in respect of the invention of "A new and useful or improved carpet sweeper."

As set forth in their respective petitions, both recorded in the said office on the 16th day of March, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

29th March, 1859.

2174. Joseph Wright, Engineer, of Birmingham, in the county of Warwick, for an invention of "Certain improvements in the mode of arranging and moving fire-bars for locomotive, puddling, and other furnaces."—Dated 30th September, 1858.

2192. Joseph Rogers, of No. 9, Queen Square, Bartholomew Close, in the city of London, Rope Maker, for an invention of "Improvements in submarine electric telegraph cables."—Dated 2nd October, 1858.

2203. Louis A. Normandy, junr., of 67, Judd Street, London, in the county of Middlesex, for an invention of "Improvements in the manufacture of sulphate of copper."—A communication from a Foreigner now residing abroad.—Dated 4th October, 1858.

2269. John Field Swinburn, of Birmingham, in the county of Warwick, Gun Manufacturer, for an invention of "Improvements in fire-arms."—Dated 12th October, 1858.

2271. Thomas Cotterill Shaw, of Hanley, in the county of Stafford, Architect and Surveyor, and Frederic Henshaw Cooper, of Hanley aforesaid, Ironmonger, for an invention of "A new or improved construction and mode of working engines by the agency of air or gases, in conjunction with electricity for obtaining or producing motive power."—Dated 12th October, 1858.

2291. Thomas Ingram, of Bradford, in the county of York, Foreman, for an invention of "Improvements in means or apparatus for signalling between the parts of a train of carriages."—Dated 14th October, 1858.

2308. Laurent Marcus, of the Province of Algiers, in Africa, now in Paris, Gentleman, for an invention of "An improved reaping machine."—Dated 16th October, 1858.

493. Emile Alcan, of 4, Coleman Street Buildings, in the city of London, Merchant, for an invention of "An improved method of treating or preparing materials to be manufactured into paper, applicable to lie-washings in general."—A communication from a Person residing abroad.—Dated 8th November, 1858.

2809. Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for an invention of "An improved apparatus for ascertaining and registering the work of certain kinds of lever balances."—A communication from a Foreigner residing abroad.—Dated 7th December, 1858.

221. William Tasker the younger, of the firm of William Tasker and Sons, of Waterloo Iron Works, near Andover, in the county of Hants, Engineer, for an invention of "Improvements in ploughs." Dated 24th January, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 26th March*, 1859, *inclusive.*)

24th March.

739. Constant Jouffroy Duméry, of Paris, in the empire of France, for an invention of "Improvements in smoke preventing apparatus."—Dated 27th March, 1856.

765. Adolphe Guido, of Versailles, in the empire of France, Chemist, for an invention of "Improvements in cleansing, washing, scouring wool and woollen fabrics and yarns."—Dated 29th March, 1856.

809. Frederick William Kitson, of Leeds, in the county of York, Engineer, for an invention of "Improvements in the manufacture of railway wheels."—Dated 3rd April, 1856.

850. Alexander Charles Louis Devaux, of King William Street, in the city of London, Merchant, for an invention of "Improvements in the construction and fitting up of granaries."—Dated 8th April, 1856.

26th March.

747. James Harrison, of Geelong, in the colony of Victoria, Gentleman, Member of the Legislative Council of Victoria, for an invention of "Producing cold by the evaporation of volatile liquids in vacuo, the condensation of their vapours by pressure, and the continued re-evaporation and re-condensation of the same materials."—Dated 28th March, 1856.

749. James Harrison, of Geelong, in the colony of Victoria, Gentleman, Member of the Legislative Council of Victoria, for an invention of "Distilling or evaporating in vacuo, condensing the vapour by pressure, and economizing heat."—Dated 28th March, 1856.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

FOREIGN PATENTS.

AUSTRIA.*

List of Patents for Inventions which were Delivered, Prolonged, and became Void during the Month of December, 1858.†

(Communicated by the Austrian Government.)

1. Patents Delivered.

1. Samuel Singer, of Vienna, for "Wire nets with double springs, being a substitute for girths in polsters of chairs and beds."—1 year.—(Public.)—Dated 2nd December, 1858.

2. Koppelmann Gutkind, of Prague, for "Obtaining gum-lake for all kinds of shoes of leather and gum, from a mixture of oxides and the juice of plants."—1 year.—(Secret.)—Dated 2nd December, 1858.

3. Koppelmann Gutkind, of Prague, for "Obtaining chemically pure garancine-ink from a mixture of oxides and the juice of plants."—1 year.—(Secret.)—Dated 2nd December, 1858.

4. Carl Rosenfeld, of Pest, for "Improvements in fitting window-glass by means of a peculiar cement."—1 year.—(Secret.)—Dated 4th December, 1858.

5. Rudolph Stengl, of Vienna, for "Obtaining plastic ornaments and entire objects, such as frames, vases, &c., by means of wire coated with string."—1 year.—(Secret.)—Dated 5th December, 1858.

6. Salomon Huber, of Carolinenthal, near Prague, for "Squirts with two peculiar double-action pumps and apparatus belonging thereto."—1 year.—(Public.)—Dated 6th December, 1858.

7. Bartholom. Dworak, of Vienna, for "Improvements in the construction of expansive tables."—1 year.—(Public.)—Dated 6th December, 1858.

8. Siegfried Marcus, of Vienna, for "A magneto-electrical indicator, combined with a key-board and peculiar commutators, whereby telegraphic messages may be conveyed interruptedly to great distances without regard to the source of electricity, and without applying voltaic elements."—1 year.—(Secret.)—Dated 7th December, 1858.

9. Friedrich Ludwig Mylins, of Berlin, represented by Dr. Guthery, Vienna, for "An expeditious distilling apparatus with means of concentrating and isolating, combined with a chemical apparatus for obtaining chemically pure spirits at 92 per cent. according to Tulles directly from the wort, and without applying charcoal or any other chemical substances for removing the fusel therefrom."—2 years.—(Secret.)—Dated 7th December, 1858.

10. Matthäus Fracass, of Venice, for "A motive power obtained without steam, horses, or fuel, and being applicable to the propelling of locomotives, carriages, or vessels, and to other industrial purposes."—5 years.—(Secret.)—Dated 7th December, 1858.

11. Joseph Anton Tremeschini, of Vicenza, for "A cheap mode of obtaining designs for weaving figured stuffs."—1 year.—(Secret.)—Dated 7th December, 1858.

12. August Lenz, of Vienna, for "Improvements in railway breaks obtained by means of peculiar apparatus."—2nd year.—(Public.)—Dated 10th December, 1858.

13. Ernst Werner Siemens and Johann Georg Halske, of Berlin, represented by Dr. Max von Schickh, Vienna, for "Improvements in their Patent regenerating fire-places, whereby not only the air but also the lighting gas produced in gas-furnaces is heated up to the temperature of the furnace, previous to being mixed together and consumed."—15 years.—(Secret.)—Dated 10th December, 1858.

14. Friedrich Arthur Paget, of Vienna, for "Carbonizing brown coal and lignite, and for obtaining a substance therefrom which is equal to charcoal."—1 year.—(Secret.)—Dated 10th December, 1858.

15. Joseph Klemm and Simon Marth, of Vienna, for "A cylinder apparatus for the conversion of moneys, weights, and measures, and for calculating interests."—1 year.—(Public.)—Dated 10th December, 1858.

16. Wilhelm Osimilslh, of Vienna, for "Improvements in the construction of railway carriages and breaks."—1 year.—(Secret.)—Dated 10th December, 1858.

17. Daniel Hooibrenk, of Hietzing, near Vienna, for "Improvements in the culture of vines, whereby they are made to produce a fourfold quantity of grapes, without weakening the stem."—1 year.—(Secret.)—Dated 10th December, 1858.

18. Daniel Hooiboenk, of Hietzing, near Vienna, for "Improvements in the culture of mulberry trees, whereby better and more wholesome leaves in double and fourfold the quantity than usual is produced without injuring the trees."—1 year.—(Secret.)—Dated 10th December, 1858.

19. Johann Parizek, of Vienna, for "A chemical process for obtaining pure, cool, durable, and cheap pitch for coating beer casks."—1 year.—(Secret.)—Dated 11th December, 1858.

20. Franz Natal Crevatin, of Triest, for "A mode of protecting animal and vegetable substances, such as meat, game, poultry, fish, vegetables, &c., from alteration, and especially from corruption."—1 year.—(Secret.)—Dated 11th December, 1858.

* For the Austrian Patent Law, see No. 291 of this Journal.

† In the case of inventions patented in other states as well as in Austria, the Specifications (whether described as "public" or not) may in most cases be consulted, or translations of them be had, at the Library of the Commissioners' Office.

21. Georg Benedetti, of Triest, for "Coating doors with paper imitating varnished wood instead of colouring or varnishing the same."—1 year.—(Secret.)—Dated 11th December, 1858.

22. Arnauld Banco, of Marchiennes, France, represented by Georg Märkl, Vienna, for "Improvements in rasping machines for beetroot manufactories, and for other industrial and economical purposes."—1 year.—(Public.)—Dated 11th December, 1858.

23. Anton Louis Adolph Favier, of Paris, represented by Georg Märkl, Vienna, for "Improvements in expeditious tanning."—1 year.—(Secret.)—Dated 11th December, 1858.

24. Louis Blum, of Paris, represented by A. Martin, Vienna, for "A machine for blackening smoking pipes and mouthpieces of cigars."—5 year.—(Public.)—Dated 11th December, 1858.

25. Theophil Weiss and Ant. Weisse, of Prague, for "Hand-saws of wood, hollow and solid iron, which may be taken to pieces, and for substituting wire for hemp in bracing them up."—1 year.—(Secret.)—Dated 11th December, 1858.

26. Stephan Vidats, of Pest, for "Improvements in the manufacture of hoes and spades, by means of which their blades are cut from rolled iron or steel with sharp and bent edges, whilst their sockets and eyes are forged separately in the swage, and provided with four rivets."—2 years.—(Public.)—Dated 11th December, 1858.

27. Wenzel Skrivan, of Pest, for "Improvements in the manufacture of felt and silk hats for making them impervious to grease, perspiration, and rain, and for maintaining the shape of felt rims."—1 year.—(Secret.)—Dated 11th December, 1858.

28. Christian Metz and Joseph Hronek, of Pest, for "Improvements in ladies' garments by applying an elastic string near the neck and arms of the wearer."—1 year.—(Secret.)—Dated 16th December, 1858.

29. Alois Auer, of Vienna, for "Connecting typographic, lithographic, and copper-plate presses with machines producing endless paper, so as to feed said presses continuously, also for connecting reels on which endless paper is wound up, with such presses, whereby the usual manual labour or machines for fixing the sheets may be dispensed with."—1 year.—(Secret.)—Dated 17th December, 1858.

30. Thomas Restell, of London, represented by Friedrich Paget, Vienna, for "Improvements in chambered fire-arms, with projectiles and cartridges belonging thereto."—1 year.—(Secret.)—Dated 17th December, 1858.

31. Carl Ehrhardt, of Frankfort-on-the-Maine, represented by Laurenz Angebauer, Vienna, for "Manufacture of extracts of hops and oil of hops for brewing beer."—5 years.—(Secret.)—Dated 17th December, 1858.

32. Markus Anton Franz Mennons, of Paris, represented by A. Martin, Vienna, for "A peculiar construction of military and other tents."—1 year.—(Secret.)—Dated 17th December, 1858.

33. Ludwig Montanari, of Lyons, represented by Georg Märkl, Vienna, for "Night-lights combined with an apparatus for indicating the time."—1 year.—(Public.)—Dated 17th December, 1858.

34. Adam Barwitz, of Ottakring, near Vienna, for "Improvements in the construction of lasts for shoes and boots according to the requirements of the wearer."—1 year.—(Secret.)—Dated 17th December, 1858.

35. Albert Eckstein, of Fünfhaus, near Vienna, for "A simple method of manufacturing oil for lighting and lubricating purposes from all kinds of tar and from resin, without using water steam."—1 year.—(Secret.)—Dated 17th December, 1858.

36. Emanuel Uhlig, of Stragowitz, Moravia, for "Working blast furnaces by means of gas obtained from fuel or its waste or from the mouth of the furnace, and which has been purified and compressed by a peculiar apparatus."—1 year.—(Secret.)—Dated 17th December, 1858.

37. Adolph Anton Leibinger, of Vienna, for "Coupling the movable frames of locomotives or locomotives with tenders and railway-carriages in such a manner as to allow them to travel on all curves."—1 year.—(Public.)—Dated 17th December, 1858.

38. Ignaz Hauser, of Pest, for "Improvements in suspending men's dresses."—1 year.—(Secret.)—Dated 17th December, 1858.

39. Gustav Schetz, of Oberhollabrunn, Lower Austria, for "A so-called 'saloon carriage' with a peculiar construction of the interior for the conveyance of passengers by means of horses."—3 years.—(Public.)—Dated 17th December, 1858.

40. Moriz Preyss and Dr. Daniel Wagner, of Pest, for "A process for doubling and quadrupling the lighting power of common gas according to its quality."—1 year.—(Secret.)—Dated 17th December, 1858.

41. Henning Boëtins and Hermann Wedekind, of Kreuznach, Prussia, represented by Joseph Böhm, Vienna, for "An improved caloric engine."—1 year.—(Secret.)—Dated 17th December, 1858.

42. Henning Boëtins and Hermann Wedekind, of Kreuznach, Prussia, represented by Joseph Böhm, Vienna, for "An apparatus for obtaining artificial ice and for cooling the atmosphere in separate places."—1 year.—(Secret.)—Dated 17th December, 1858.

43. Johann Bartholomäus Camillo Polonceau, of Orléans, represented by Georg Märkl, Vienna, for "Improvements in expansion engines."—1 year.—(Public.)—Dated 18th December, 1858.

44. Joseph Weittenhiller, of Eichstätt, Bavaria, represented by Franz Patznick, Vienna, for "A mode of blackening slabs made of white calcareous schist, and all common burnt flagstones used for covering roofs, and likewise all kinds of tiles and bricks whereby they are made to resist the action of fire and dampness, and even of vitriol and aqua-fortis, and to combine with mortar and lime."—1 year.—(Secret.)—Dated 18th December, 1858.

45. Eduard Steiner, of Vienna, for "A kind of gold, silver, bronze or steel jewels, which may be exchanged."—2 years."—(Secret.)—Dated 18th December, 1858.

46. Caspar Eisenbach, of Troppau, for "Improvements in the manufacture of hollow axles for railway carriages, being massive near the journal

boxes."—3 years.—(Secret.)—Dated 18th December, 1858.

47. Lewy Bissell, of New York, represented by August Lenz, of Vienna, for "A peculiar apparatus in wheel frames of locomotives, whereby a greater safety is obtained."—2 years.—(Public.)—Dated 18th December, 1858.—(American Patent, 4th August, 1857.)

48. Heinrich Kessels, of Vienna, for "A puzzle lock which cannot be picked."—1 year.—(Secret.) —Dated 18th December, 1858.

49. F. G. Rietsch, of Böhmisch Rudoletz, Moravia, for "A peculiar apparatus for evaporating all kinds of fluids."—1 year.—(Secret.)—Dated 18th December, 1858.

50. Eduard Steiner, of Vienna, for "Gold, silver, bronze, or steel jewellery which may be changed by a mechanical contrivance."—2 years.—(Secret.)— Dated 20th Decemoer, 1858.

51. Ignaz Michael Firnstahl, of Vienna, for "Improvements in his patent excentric double printing machine for fabrics."—1 year.—(Secret.) —Dated 23rd December, 1858.

52. Adolph Winter, of Mühlburg, Baden, represented by August Schmidt, Vienna, for "Obtaining a dyeing substance called 'Baden red,' from the stems of millet, and for using its solutions as a colour."—5 years.—(Secret.)—Dated 23rd December, 1858.—(Baden Patent, 12th January, 1858, and French Patent, 8th April, 1858.)

53. Georg Carter, of Nottingham, represented by Georg Märkl, Vienna, for "An improved method of propelling and governing ships."—3 years.— (Public.)—Dated 23rd December, 1858.

54. Theophil Weisse and Anton Patzelt, of Czaslau, for "A regulating centrifugal macerating apparatus, applicable especially to sugar works."— 1 year.—(Secret.)—Dated 24th December, 1858.

55. Johann Zeh, of Vienna, for "Improvements in chimneys of locomotives, whereby the smoke is prevented from being blown down by contrary winds."—1 year.—(Public.)—Dated 27th December, 1858.

56. Franz Pampichler, of Gravenberg, Lower Austria, for "Improvements in the construction of turbines."—1 year.—(Public.)—Dated 27th December, 1858.

57. Samson Anspitzer, of Vienna, for "A so-called 'disk' for reducing moneys."—1 year.—(Secret.)— Dated 27th December, 1858.

58. Carl Emanuel Brosch, of Prague, for "Mills in which the upper millstone is immoveable."— 1 year.—(Secret.)—Dated 27th December, 1858.

59. Carl Fuss, of Vienna, for "A portable continuous baking apparatus for the field."—1 year. —(Secret.)—Dated 27th December, 1858.

60. Carl Fuss, of Vienna, for "A portable mill with two grinding surfaces, and two revolving millstones."—1 year.—(Secret.)—Dated 27th December, 1858.

61. The Council for the Austrian Society for the Manufacture of Chemical and Metallurgical Articles, for "Working sulphurous (pyritic) and oxidated (ochrous) copper ores, as well as fallow copper ores, by the wet process, also for obtaining the chemical agents required thereto at a cheap price from the waste matter produced in the manufacture of soda, and for recovering all valuable substances contained in such waste matter."—5 years.—(Secret.)— Dated 29th December, 1858.

62. Franz Rüdinger, of Vienna, for "Improvements in sewing machines, whereby the oil is prevented from running into the mail catch."—1 year. —(Secret.)—Dated 29th December, 1858.

63. Israel Guttmann, of Pest, for "Improvements in the construction of kitchen-stoves and ranges, whereby the degree of heat may be properly regulated."—1 year.—(Secret.)— Dated 29th December, 1858.

64. Johann Oetl, of Pest, for "Improvements in the safety locks of iron chests."—1 year.—(Secret.) —Dated 29th December, 1858.

65. Gerhard Uhlhorn, of Grevenbroich, near Cologne, represented by J. H. Stametz and Co., Vienna, for "A mechanical apparatus for grinding and repairing the points of worn-out cards."— 4 years.—(Public.)—Dated 30th December, 1858. —(Prussian Patent, 25th August, 1858.)

66. Ignaz Michael Firnstahl, for "A double printing machine for printing neckerchiefs of all sizes downwards."—1 year.—(Secret.)—Dated 31st December, 1858.

67. Joseph Saxeneder, of Ischl, Upper Austria, for "Manufacture of water and fire proof bricks." —1 year. — (Secret.) — Dated 31st December, 1858.

---

2. Prolonged Patents.

1. Ludwig Szalcky, for "Improvements in the manufacture of cylindrical bellows."—5th year.— (Secret.)—Dated 17th November, 1854.

2. Eduard Schmidt and Friedrich Paget, for "Improvements in wheels of locomotives and railway carriages."—3rd year.—(Secret.)—Dated 16th November, 1856.

3. Peter Bart, for "So-called 'Iris pomatum."— 3rd year.—(Secret.)—Dated 17th November, 1856.

4. Joseph Martinek, for "Improvements in a steam machine for making tiles, as patented by him and Joseph Karliczek."—2nd year.—(Secret.) —Dated 12th November, 1857.

5. Wilhelm Bandelin (Cäcilie Feusser, assignee,) for "A substance called 'plastic stone paste.'"— 3rd year.—(Secret.)—Dated 5th January, 1857.

6. Peter Ramoni (Michael Bronzini, assignee,) for "Veneers for inlaying furniture, and especially floors."—6th and 7th years.— (Secret.)— Dated 30th November, 1853.

7. Sigmund Schlesinger, for "Improvements in the manufacture of safflower-carmine."—3rd and 4th years.—(Secret.)—Dated 14th December, 1856

8. Sigmund Schlesinger, for "Manufacture of yellow dye from berries of buckthorns."—3rd and 4th years. — (Secret.) — Dated 24th December 1856.

9. Johann Baptist Vitali, for "A process for destroying the chrysalides of silk-cocoons."—2nd year.—(Secret.)—Dated 6th November, 1857.

10. Adolph Patera, for "A simple method of obtaining cobalt and nickel from the regulus of cobalt and nickel."—2nd year.—(Secret.)—Dated 29th November, 1857.

11. Moriz Blau and Moriz Friedmann, for "A mode of rendering ladies' dresses more durable."—2nd year.—(Secret.)—Dated 15th December, 1857.

12. Franz Fischer von Rösslerstamm, for "Improvements in the shape of axles for railway carriages."—2nd year.—(Public.)—Dated 27th November, 1857.

13. Peter Bruno Joseph Elias Cabannes, for "Improvements in grinding mills."—2nd year.—(Secret.)—Dated 11th December, 1857.

14. Moriz Kniely, for "Cleaning oiled hemp, oakum, and other stuffs used in cleaning machinery."—6th year.—(Secret.)—Dated 18th November, 1853,

15. Barbara Schmidt, for "Manufacture of linen or woollen socks of one piece, and with a single seam."—5th year.—(Public.)—Dated 20th Novem-1854.

16. Sigmund Schwarz, for "Improvements in elastic covers and packing paper."—4th year.—(Secret.)—Dated 15th December, 1855.

17. Heinrich Völter, for "A wood-cutting machine, with a peculiar sorting apparatus and self-actor."—3rd year.—(Secret.)—Dated 27th November, 1856.

18. Alois Platzer and L. Ruziczka, junr., for "Blue for washing."—2nd year.—(Secret.)—Dated 17th November, 1857.

19. Julius Eckel, for "A nibbling mill."—2nd year.—(Secret.)—Dated 21st November, 1857.

20. Robert and Eduard Boldini, for "Oil-colour designs for all kinds of paper."—2nd year.—(Secret.)—Dated 24th November, 1857.

21. Baron Ludwig Lo Presti, for "A machine for removing the roots of trees."—8th year.—(Public.) Dated 23rd November, 1851.

22. Moriz Neufeld, for "A peculiar process for inking the stones in lithographic printing."—2nd year.—(Secret.)—Dated 24th November, 1857.

23. Hermann Gotthilf Möhring, for "Improvements in steam water-pumps."—2nd year.—(Public.)—Dated 24th November, 1857.

24. Hermann Gotthilf Möhring, for "A nibling and grinding mill."—2nd year.—(Public.)—Dated 11th December, 1857.

25. Johann Keusch and Dr. Franz Drinkwelder, for "An improved method of manufacturing Krems vine-scissors and other scissors."—8th year.—(Secret.)—Dated 23rd November, 1851.

26. Abraham Ganz, for "Using a substance for the purpose of acierating the surface of cast-iron articles entirely or partly."—3rd and 5th year.—(Secret.)—Dated 27th November, 1856.

27. Moriz Danglowitz, for "Improvemennts in machines for manufacturing all kinds of lace-work."—6th year.—(Secret.)—Dated 26th September, 1853.

28. Joseph Bernhardt, for "A machine for printing coloured stuffs for garments."—3rd year.—(Secret.)—Dated 6th December, 1856.

29. Peter Ludwig Grosrenand, for "A refining and smelting furnace."—3rd year.—(Public.)—Dated 20th February, 1857.

30. Joseph Bernhardt, for "Improvements in his machine for printing coloured stuffs for garments."—2nd year.—(Secret.)—Dated 7th January, 1858.

31. Johann Winkler (Gustav Adolph Krause, assignee), for "Improvements in the manufacture of oil-cloth and varnished leather."—5th year.—(Secret.)—Dated 29th November, 1854.

32. Friedrich Anton Prost, for "Improvements in weaving."—3rd year.—(Public.)—Dated 9th December, 1856.

33. Franz von Furtenbach, for "An apparatus for dry distilling."—2nd year.—(Secret.)—Dated 1st December, 1857.

34. Johann Baptist Maniquet, for "A mechanical apparatus for spinning and twisting fibrous substances, and especially silk."—2nd year.—(Public.)—Dated 14th December, 1857.

35. Carl Pauvert, for "A process for converting iron into natural steel."—2nd year.—(Secret.)—Dated 21st December, 1857.

36. Franz Basil Boccard, for "An apparatus for preventing accidents in working circular saws."—2nd year.—(Public.)—Dated 29th November, 1857.

37. Wenzel Mikisch, for "Improvements in circular looms."—2nd year.—(Public.)—Dated 6th January, 1858.

38. Lucian Arbel, for "Manufacture of wheels of railway carriages from wrought iron."—2nd year.—(Public.)—Dated 21st January, 1858.

39. Andreas Zoubschaninoff, for "A peculiar mode of cementing casks and other wooden vessels."—2nd year.—(Secret.)—Dated 28th January, 1858.

40. Georg M. Rolans and Alexis Qurin, for "Improvements in their Patent machine for making wire tacks."—6th and 7th years.—(Secret.)—Dated 4th December, 1853.

41. Louise and Pauline Paltauf, for "Improvements in the manufacture of shirts."—2nd year.—(Secret.)—Dated 4th December, 1857.

42. Rudolph Dittmar, for "Manufacture of rape-oil by using an acid not used hitherto."—2nd year.—(Secret.)—Dated 6th January, 1858.

43. Wilhelm Knaust, for "Clock-valves."—8th year.—(Secret.)—Dated 17th December, 1851.

44. Anton Henke, for "Improvements in sewing machines."—3rd, 4th, and 5th years.—(Public.)—Dated 4th December, 1856.

45. Gustav Starke, for "Improvements in planimeters."—3rd year.—(Public.)—Dated 17th December, 1856.

46. Georg Heidenwag, for "A machine for splitting wood."—2nd year.—(Public.)—Dated 2nd December, 1857.

47. Wilhelm Niebauer, for "Oil for the hair."—3rd year.—(Secret.)—Dated 9th December, 1856.

48. Severin Zavisics, for "Portable steam and shower apparatus."—3rd year.—(Secret.)—Dated 10th December, 1856.

49. Carl König, for "Obtaining a fluid gaseous substance called 'pinoline,' from vegetable substances."—2nd year.—(Secret.)—Dated 14th December, 1857.

50. Friedrich Feiler, for "So-called 'universal cane umbrellas.'"—2nd year.—(Public.)—Dated 27th December, 1857.

51. Albert Hirsch, for "Rendering furniture more durable by means of so-called 'indissoluble glue.'"—2nd year.—(Secret.)—Dated 11th December, 1857.

52. Carl König, for "Improvements in gas-burners for lamps, lustres, and candlesticks."—2nd year.—(Secret.)—Dated 11th December, 1857.

53. Leopold Gorentschiz, for "Improvements in sewing machines."—4th year.—(Secret.)—Dated 19th December, 1855.

54. Theresia Kamauf, for "An apparatus for evaporating water and other volatile substances."—3rd year.—(Secret.)—Dated 10th December, 1856.

55. Julius von Mannstein, for "Improvements in furniture that may be taken to pieces, as patented by Max von Mannstein on the 20th May, 1857."—2nd year.—(Secret.)—Dated 19th December, 1857.

56. Leopold Gorentschiz, for "Improvements in sewing machines."—2nd year.—(Public.)—Dated 24th December, 1857.

57. James Brown, for "Improvements in the manufacture of paper."—2nd year.—(Secret.)—Dated 26th December, 1857.

58. Johann Jacob Guillet, for "A process for purifying and drying combustible and carbonaceous minerals."—6th year.—(Secret.)—Dated 12th October, 1853.

3. Patents which have become Void.

1. Emil Pfeifer, for "An improved process for the manufacture of sugar without using animal coal."—Dated 1st February, 1854; annulled 1st December, 1858, in consequence of not having been worked.

2. Louis von Haber, for "A direct process for reducing ores of silver, copper, and lead, zinc, nickel, cobalt, and antimonium."—Dated 7th March, 1854; annulled 1st December, 1858, in consequence of not having been worked.

3. Heinrich von Claudius, for "Controlling marks which cannot be counterfeited."—Dated 31st March, 1854; disclaimed 1st December, 1858.

4. John Bishop-Hall, for "Obtaining a high degree of artistic effect in all kinds of pictures."—Dated 14th October, 1856; expired 14th October, 1858.

5. Gustav Brünner, for "Improvements in Grasmann's solar gas-lamps."—Dated 11th July, 1857; expired 11th July, 1858.

6. Cölestin Müller, for "Means of facilitating the study of playing at piano."—Dated 7th November, 1857; expired 7th November, 1858.

7. Wenzel Matanelli, for "Manufacture of clay flagstones for covering houses and towers."—Dated 14th June, 1852; expired 14th June, 1858.

8. Johann Nadler and Adolph Eder, for "A process for ungreasing glue made of animal bone."—Dated 23rd September, 1856; expired 23rd September, 1858.

9. Rudolph Girtler, for "Obtaining great quantities of paraffine and mineral oils from bituminous substances by means of super-heated water, steam, and certain physical apparatus."—Dated 10th October, 1857; expired 10th October, 1858.

10. Alois Miesbach, for "Improvements in tile-kilns."—Dated 9th May, 1853; expired 9th May, 1858.

11. Jacob Franz Heinrich Hemberger, for "Improvements in rotary steam-engines."—Dated 23rd May, 1853; expired 23rd May, 1858.

12. Jacob Franz Heinrich Hemberger, for "A transversal gig-mill."—Dated 12th May, 1856; expired 12th May, 1858.

13. Jacob and Honoratius Luraghi, for "Improvements in the construction of furnaces and recipients for the manufacture of glass."—Dated 20th May, 1853; expired 20th May, 1858.

14. Franz Xaver Wurm, for "A chocolate mill with a rasping vessel for obtaining chocolate free from sand."—Dated 28th May, 1853; expired 28th May, 1858.

15. Johann Georg Jerger, for "Improvements in the manufacture of horn-plates."—Dated 29th May, 1853; expired 29th May, 1858.

16. Carl Fabricius, for "An atmospheric machine for heating houses, railway carriages, &c."—Dated 3rd May, 1854; expired 3rd May, 1858.

17. James Newall, for "Improvements in breaks for railway and other carriages."—Dated 4th May, 1855; expired 4th May, 1858.

18. Georg von Winiwarter and Heinrich Schmid, for "Construction of railway-carriages of sheet-iron with iron pipes and buffers throughout."—Dated 22nd May, 1855; expired 22nd May, 1858.

19. Georg von Winiwarter, for "A peculiar system of constructing and fixing stationary engines."—Dated 30th June, 1857; expired 30th June, 1858.

20. Cajetan von Bonelli, for "Improvements in his electrical looms, as patented 24th December, 1853, and 7th May, 1854."—Dated 23rd May, 1855; expired 23rd May, 1858.

21. Julius Roth, for "A process for manufacturing pressure cylinders or rollers of spinning mills."—Dated 24th May, 1855; expired 24th May, 1858.

22. Sigmund Floch, for "Improvements in the manufacture of artificial marble."—Dated 4th May, 1856; expired 4th May, 1858.

23. Charles Low, for "Separating gold from its ores."—Dated 4th May, 1856; expired 4th May, 1858.

* The Specifications of these Patents may be consulted in the original language, or translations be had at the Public Free Library.

24. Lorenz Radi, for "Obtaining a glass substance, imitating the oriental chalcedony."—Dated 7th May, 1856; expired 7th May, 1858.

25. Moriz Lebrecht Friedrich, for "Improvements in stocking frames."—Dated 11th May, 1856; expired 11th May, 1858.

26. Anton Speltz, for "Obtaining motive power by means of weights."—Dated 14th May, 1856; expired 14th May, 1858.

27. Peter Maybon and Carl Baptiste, for "A mechanical process for obtaining tenons and loops for joinery and carpenters' work."—Dated 28th May, 1856; expired 28th May, 1858.

28. Ferdinand Laas, for "Manufacturing pig-iron from prepared iron ores in a peculiar gas smelting furnace."—Dated 28th May, 1856; expired 28th May, 1858.

29. Ludwig Seyss, for "Improvements in spring manometers packed with caoutchouc."—Dated 3rd May, 1857; expired 3rd May, 1858.

30. Caspar Schüll, for "A peculiar composition for soldering tin articles."—Dated 3rd May, 1857; expired 3rd May, 1858.

31. Julius Vollgold, for "An apparatus in gas lamps for obtaining a better light."—Dated 7th May, 1857; expired 7th May, 1858.

32. Salomon Schlesinger, for "A machine for forging, holing, file-cutting, pressing, slotting and cutting."—Dated 10th May, 1857; expired 10th May, 1858.

33. Felice Rignon, for "A heating apparatus for silk-spinning mills."—Dated 10th May, 1857; expired 10th May, 1858.

34. Nikolaus Ivanovits, for "A tooth-powder for children."—Dated 10th May, 1857; expired 10th May, 1858.

35. Moriz Hummel, for "Improvements in fancy leather work."—Dated 10th May, 1857; expired 10th May, 1858.

36. Franz Guichené, for "A mechanism called symphonista, for obtaining full accords on pianos or organs, without touching more than one key."—Dated 10th May, 1857; expired 10th May, 1858.

37. Moriz Neufeld, for "A peculiar press for transferring copper engravings and lithographies on copper plates."—Dated 13th May, 1857; expired 13th May, 1858.

38. Joseph Fisoher, for "Manufacture of tobacco pipes and cigar mouth-pieces from meerschaum waste combined with a new substance."—Dated 21st May, 1857; expired 21st May, 1858.

39. Ferdinand Kölgen, for "An inoffensive means of removing ink from stuffs."—Dated 22nd May, 1857; expired 22nd May, 1858.

40. Adrian Stockar, for "Improvements in breaks."—Dated 27th May, 1857; expiring 27th May, 1858.

41. Peter Joseph Kessels, for "Improvements in fire-proof chests."—Dated 27th May, 1857; expired 27th May, 1858.

42. Michael Hirsch Frankl, for "Improvements in seals."—Dated 29th May, 1857; expired 29th May, 1858.

43. Mathias Weingartshofer, for "Improvements in photographic and acromatic double objective glasses."—Dated 30th May, 1857; expiring 30th May, 1858.

44. Joseph Perger, for "Improvements in capsule and other fire-arms."—Dated 30th May, 1858; expiring 30th May, 1858.

45. Nikolaus Mulkay, for "An apparatus applicable to the smoke-box of steam-engines, whereby the feeding water is heated and part of the heat of the smoke-box is utilized."—Dated 22nd October, 1853; expired 22nd October, 1858.

46. Claude Moret, for "Improvements in rotary steam-engines."—Dated 9th October, 1856; expired 9th October, 1858.

47. Eduard Georg Hammer, for "Plastic frames and glass ornaments."—Dated 29th August, 1857; expired 29th August, 1858.

48. Johann Christoph Endris, for "Improvements in the manufacture of iron and steel."—Dated 15th September, 1856; expired 15th September, 1858.

49. W. A. Ryba, for "A new calorifere stove."—Dated 6th November, 1857; expired 6th November, 1858.

50. Ludwig Franz Ruziczka, for "Fly-powder."—Dated 9th August, 1858; disclaimed 9th November, 1858.

51. Maier and David Mandl, for "A composition for finishing silk and silk ribbons."—Dated 3rd June, 1853; expired 3rd June, 1858.

52. A. M. Pollak, for "Improvements in the manufacture of soap for industrial purposes, washing, and shaving."—Dated 3rd June, 1853; expiried 3rd June, 1858.

53. Robert Doms, for "A mode of manufacturing empyreumatic oils from bituminous earths and wood tar, which will burn without causing any soot or smell."—Dated 7th June, 1853; expired 7th June, 1858.

54. Johann Franz Regnier, for "An improved new principle for draining and working mines."—Dated 14th June, 1853; expired 14th June, 1858.

55. Carl Wilhelm Bernhuber, for "An improved process for obtaining the grease of bones."—Dated 12th June, 1853; expired 12th June, 1858.

56. Johann Anton Mathis and Johann Joseph Suderell, for "A new motive power."—Dated 19th June, 1853; expired 19th June, 1858.

57. Carl Weszely, for "Improvements in churns."—Dated 12th June, 1853; expired 12th June, 1858.

58. Franz de Paula Schürer and Georg Gleischner, for "Improvements in vine scissors."—Dated 2nd June, 1855; expired 2nd June, 1858.

59. Friedrich Paget and Joseph Choczensky, for "Improvements in the manufacture of beds and mattresses."—Dated 13th June, 1855; expired 13th June, 1858.

60. Gustav von Csapo, Arian Jedlick, and Leo Haman, for "Improvements in the construction of galvanic elements, and batteries for illumi-

nating and other purposes."—Dated 25th June, 1855; expired 25th June, 1858.

61. Anton v. Sibrik, for "Improvements in sewing machines."—Dated 10th June, 1856; expired 10th June, 1858.

62. Heinrich Magrini, for "A machine for husking rice, barley, and other grain."—Dated 21st June, 1856; expired 21st June, 1858.

63. Joseph de Cente, for "Turned and pressed crucibles."—Dated 17th June, 1856; expired 17th June, 1858.

64. Franz Weichselberger, for "Improvements in hoes for vineyards."—Dated 27th June, 1856; expired 27th June, 1858.

65. Eduard di San Secondo, for "A mechanism for the manufacture of tissues on common looms without using cards or electricity."—Dated 3rd June, 1857; expired 3rd June, 1858.

66. Anton Zettl and Gottlifb Kann, for "A blue colour, called 'Pilsen blue.'"—Dated 5th June, 1857; expired 5th June, 1858.

67. Leopold Neumann, for "A machine for making so-called 'field arm-chairs.'"—Dated 7th June, 1857: expired 7th June, 1858.

68. Joseph Pichler, for "Improvements in ploughs."—Dated 8th June, 1857; expired 8th June, 1858.

69. Joseph Riedl, for "Improvements in economical ranges."—Dated 8th June, 1857; expired 8th June, 1858.

70. Carl Wenzel Dobry, for "Improvements in his pomatum as patented 12th April, 1856."——Dated 10th June, 1857; expired 10th June, 1858.

71. Johann Söhnge and Heinrich Köck, for "Improvements in iron safety chests."—Dated 13th June, 1857; expired 13th June, 1858.

72. Eduard Starche, for "Using electricity as a motive power."—Dated 13th June, 1857; expired 13th June, 1858.

73. Lorenz Ghisi, for "Wicks of tallow candles which require no snuffing."—Dated 13th June, 1857; expired 13th June, 1858.

74. Franz Willick, for "A chemical process and a peculiar apparatus for separating oil and fat from animal and vegetable substances."—Duted 13th June, 1857; expired 13th June, 1858.

75. Friedrich Ludwig Mylius, for "A rectifying and isolating apparatus for obtaining alcohol free from fusel oil."—Dated 19th June, 1857; expired 19th June, 1858.

76. Salomon Schlesinger, for "Improvements in the manufacture of fire-proof chests."—Dated 30th June, 1857; expired 30th June, 1858.

77. Joseph Hundriser and Mathias Koch, for "Fountain pens."—Dated 27th June, 1857; expired 27th June, 1858.

78. Joseph Hundriser and Mathias Koch, for "A powder or grease for destroying insects and infusoria."—Dated 12th July, 1857; expired 12th July, 1858.

79. Franz Horsky, for "A machine for distributing artificial manure."—Dated 30th June, 1857; expired 30th June, 1858.

80. W. Knaust, for "A system of fire-engines."—Dated 30th June, 1857; expired 30th June, 1858.

81. Johann Bürgl, for "A new improved process for smelting and separating cast steel."—Dated 27th June, 1857; expired 27th June, 1858.

82. Ludwig Seyss, for "Preventing friction in escapements of clocks by means of antifriction catches on the escapement wheel, and for regulating the motion of the same."—Dated 7th January, 1858; disclaimed 29th November, 1858.

83. Charles Felix Sebille, Eugène Bartholomey, and Charles Mariotte, for "A peculiar system of fire-places."—Dated 2nd July, 1857; expired 2nd July, 1858.

84. François Schepers, for "Improvements in fire-arms."—Dated 12th July, 1857; expired 12th July, 1858.

85. Johann Pecka, for "Improvements in obtaining round hollow-grooved pipes of iron for making furniture, bedsteads, railings, &c."—Dated 21st November, 1857; expired 21st November, 1858.

86. Vincenz dall' Aglio, for "A steam apparatus for washing and bleaching."—Dated 30th December, 1856; disclaimed 4th December, 1858.

87. Johann Nepomuk Kugl, for "Conglomerating coal-dust and wood chips."—Dated 11th April, 1855; disclaimed 6th October, 1858.

88. Joseph Zuleger, for "Boxes for drying cigars."—Dated 14th August, 1858; disclaimed 26th November, 1858.

89. Joseph Mayr, for "A machine for beating time."—Dated 17th July, 1855; expired 17th July, 1858.

90. Fanni Reihl, for "Mounting pearls and beads wit ut separating the same."—Dated 15th August, 1857; expiring 15th August, 1858.

91. Carl Friedrich Kuhn, for "Improvements in the manufacture of steel pens and penholders."—Dated 3rd July, 1843; expired 3rd July, 1858.

92. Baron Mars François Gaspard Desiré de Graindorge, for "An apparatus, called 'recto-motor,' being a substitute for paddle-wheels in vessels which are propelled by steam or any other power."—Dated 10th July, 1843; expired 10th July, 1858.

93. Baron Mars François Gaspard Desiré de Graindorge, for "A so-called 'safety steam-boiler with horizontal and cylindrical compartments.'"—Dated 10th July, 1843; expiring 10th July, 1858.

94. Ludwig Bentz, for "A chemical product, called 'Bentz-asphalt or Bentzit,' applicable as a coating for protecting wood, iron, &c. from rot, rust, or the action of the atmosphere, and likewise as a pavement."—Dated 30th September, 1857; expired 30th September, 1858.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

LIST of PATENTS, with Claims annexed, issued from the United States Patent Office, for the week ending 1st March, 1859, and each bearing that date.

No. 23,066. ABRAHAM ANDREWS, of Bernville, Pa., for an "Improvement in rotary engines."

"I am aware that plungers and evolving steam pistons have been made and used, but I do not claim either of them; but what I claim as my invention, and desire to secure by Letters Patent, is, 1st, I claim the mortised valve I, and its connection with the rod K, as operated by the cam wheel L, in combination with the said axle or shaft. 2nd, I claim thy arrangement of the plungers P, with their side rollers S, and cam wheels U, in combination with the axle or shaft B, substantially as herein described and for the purpose set forth."

No. 23,067. JOEL W. ANDREWS, of Norristown, Pa., for an "Improvement in brick moulds."

"Having thus fully described the nature and use of my improvement, I will now say, I do not claim the combination of two or more moulds for bricks in one frame; but what I claim, and desire to secure by Letters Patent, is, the arrangement of the pivoted handles D, D, links H, H, and bars F, F, connected to movable bottoms C, C, all substantially in the manner and for the purpose set forth."

No. 23,068. JONATHAN M. ALLEN, of Worcester, Mass., for an "Improved invalid's table."

"I claim the combination in the construction of a table for invalids, as set forth, of the revolving table bed or leaf, with the column made adjustable and capable of being fastened in position, substantially as described, the whole constituting a new and useful article of manufacture."

No. 23,069. JOHN C. BAKER, of Mechanicsburgh, Ohio, for an "Improvement in seed planters."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of the wheels (E and C) cams *k*, *l*, lever L, friction roller (*n*), and disk (*a*), the whole being constructed as and for the purposes set forth."

No. 23,070. JOSEPH BATTIN, of Newark, N. J., for an "Improved machine for cross-cut sawing."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the driving pulley *e* of the saw mandrel in connection with the pulleys *f*, *f*^{1}, one or both, placed in the carriage B, and the driving belt H, the parts being combined and arranged to operate substantially as and for the purpose set forth."

No. 23,071. J. C. BENTHALL, of Oakland, Texas, for an "Improvement in seed planters."

"What I claim as new, and desire to secure by Letters Patent, is, the arrangement of the rock shaft K, connecting rod J, arm *h*, spring *i*, and pendent M, substantially as shown and described, for the purpose of enabling the seed-distributing device to be actuated by the leg of the operator."

No. 23,072. J. S. BRIGGS, of Michigan Bluffs, Cal., for an "Improvement in amalgamating riffles."

"What I claim as my invention is the cup punch, as constructed for saturating wood with quicksilver."

No. 23,073. T. D. BROWN, of Montville, Ohio, for "Improved harness attachment for supporting driving lines."

"What I claim, and desire to be secured by Letters Patent as a new article of manufacture, is an attachment or line supporter to be placed on a horse's rump, by securing it to the harness in the manner shown, or in any equivalent way, said attachment consisting of the adjustable strap A, pin and clasp B and C, cross piece D, adjustable standard F, and arms G, G, the whole arranged and combined as herein described, and for the purpose set forth."

No. 23,074. THOMAS BROWN, of Kenwood, N.Y., for an "Improvement in tram-staffs for facing mill-stones."

"I claim the arrangement and combination of the supporting ring A, arranged to rest or lie on the face of the stone, with the triangular frame G, and adjustable staff M, by which mill stones may be faced more accurately, and with greater facility, either plain or with suitable concavity or bosom."

No. 23,075. CHARLES BROWNLICH, of Buffalo, N.Y., for an "Improvement in harvesters."

"I claim the pivoted shoe E, constructed as herein described, and connected to the rear end of the frame of the machine by means of the bolt *f*, upon which it oscillates, in combination with the levers *g*, *h*, *i*, as arranged for the purpose herein set forth."

No. 23,076. I. L. CHAPMAN, of Kinmundy, Ill., for an "Improvement in corn harvesters."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, the combination with a corn harvester frame having V-shaped conductors B, of sickle-shaped revolving cutters E, partially serrated, and partially plain-edged stationary cutters E, upper and lower horizontal-spring guide C, C, and D, D, and endless apron J, all arranged and operating substantially as and for purpose set forth. 2nd, the partially serrated and partially plain-edged stationary cutters E, of the form described and shown in combination with the rotary cutters F, substantially as and for the purposes set forth."

No. 23,077. GEORGE E. CHENOWETH, of Baltimore, Md., for an "Improvement in harvesters."

"Having thus fully described by my invention, I wish it to be understood that I do not claim a rectangular four-sided step or standard, whether oblong or square, for such have been used before though without any view to the object sought by my invention; but what I claim is a polygonal step, having more than four sides, in combination with a standard or post, the lower of which corresponds in figure with the interior of said step, as and for the purpose described."

No. 23,078. GEO. H. CLARKE, of East Washington, N. H., for an "Improvement in bee-hives."

"Having thus described my invention, I do not now claim the hollow bars D, for the same was secured to me, Letters Patent the 8th of January, 1856; but what I claim as herein particularly described, and desire to secure by Letters Patent, is, the construction and arrangement of the bars B, B, the same consisting in making each of them, with a salient, angular, or sharp, or nearly sharp lower edge or surface extending lengthwise of it, and downward from it substantially as described and represented, the several bars being arranged at convenient distances for the bees to pass between them or upward into the chambers A, A, as described."

No. 23,079. WILLIAM CLEMMONS, of Nicholasville, Ky., for an "Improvement in hemming guides for sewing machines."

"Having thus fully described my invention, I wish it distinctly understood that I make no claim to the general construction of the hemmer, or any portion of the devices for forming and turning over the hem; neither do I claim forming a recess in its under side to relieve the teeth of the feeder, as this has already been done. The particular improvement which constitutes my said invention, and which I claim as having been originally and first invented by me, is the combination with the hemming attachment of the spring E, placed in the groove under the pressure pad, substantially as described for the purpose set forth."

No. 23,080. Henry L. De Zeng, of Geneva, N. Y., for an "Improved sausage stuffer."

"What I claim and desire to secure by Letters Patent, is, the construction and arrangement of the parts A, D, F, substantially in the manner and for the purpose set forth."

No. 23,081. L. A. Dole, of Salem, Ohio, for an "Improved washing machine."

"What I claim as my invention, and desire to secure by Letters Patent, is,—1st, the arrangement of two winged rollers, with a flexible adjustable apron clothes bed, in the particular manner herein specified for the purpose set forth. 2nd, the use of a flexible apron clothes bed, when made adjustable, substantially as and for the purposes set forth. 3rd, the use of an adjustable swinging self-opening and self-closing rubber or leather packed valve or partition, in combination with the adjustable flexible apron bed, substantially as and for the purposes set forth."

No. 23,082. Charles R. Edwards, of Suspension Bridge, N.Y., for an "Improvement in spice and coffee mills."

"What I claim is, the burr *h*, *h*, provided with the flange *a*, *a*, and handle cast in one piece, in connection with the concave grinder, having the axle D cast upon the same, arranged and constructed substantially as and for the purposes set forth."

No. 23,083. Carloss Eggelston and Darwin E. Eggelston, of Beloit, Wis., for an "Improvement in seeding machine."

"Having described the construction and operation of my several improvements, what we claim as new, and desire to secure by Letters Patent, is,—1stly, the arrangement in the manner and for the purposes herein described of the rotating shaft B, in two or more parts, driving pulleys *d*, pulley encasement E, seed pockets D, stationary perforated bottom piece *a*, adjustable slide F, and cut-offs *h*. 2ndly, in combination with the above, I also claim the shipper G, and adjustable slide bar or guage *g*. When the shipper is pivoted to the gauge to operate as specified for the purpose described."

No 23,084. Jonathan Griffin, of Harpersfield, N. Y., for a "Machine for blowing uniform currents of air."

"What I claim as my invention, and desire to secure by Letters Patent of the United States, is, 1st, operating the feeders F, F, alternately by means of the cross arms E, E, with the rollers t aversing the curvilinear elevating ways G, G, substantially as herein set forth. 2nd, regulating the quantity of air admitted in the air chamber H, according to the quantity required, by means of the check wire *f*, and sliding arm or brake *h* operating on the balance wheel K, arranged substantially as herein described. 3rd, connecting the top and bottom of the air chamber H by means of india-rubber straps or other springs when used in combination with the mechanism for driving the feeders, as described, to overcome and stop the operation of the motive power when the chamber is full, and thereby steady the current of air and prevent too great strain on the chamber."

No. 23,085. Elias J. Hale and Charles H. Chandler, of Foxcroft, Me., for an "Improvement in lamps."

"We do not claim a wick holder operated by a rack and pinion, and serving to hold or carry a wick, as shown in the United Patent, No. 14,248; but what we do claim is, our improved rack wick holder, as constructed and applied to the wick and the spur wheel, so that the teeth of the latter may pass through the rack and act on both the rack and the wick at one and the same time. 2nd, the flange or collar J, for the purpose of equalizing the aeriel current as it strikes the flame of the wick."

No. 23,086. Beverly Harris, of New Orleans, La., for an "Improvement in applications for restoring the hair."

"I do not claim the use of castor oil, bay rum, alcohol, or quinine for hair tonics, as I am aware these ingredients have heretofore been used for this purpose; but I claim the use of bitter apple and gumpowder, in combination with the before-stated ingredients, when used in substantially the same proportion as set forth, and for the purpose of hair tonics as herein described."

No. 23,087. William C. Haynes, of Melrose, Texas, for an "Improvement in revolving fire-arms."

"The particular improvement which constitutes my said invention, and which I claim as having been originally and first invented by me, is, combining with a stationary barrel having several tubes or chambers for shot a rotating cylinder having groups of chambers, each group of chambers being so arranged as to correspond with the chambers or tubes in the barrel, and also so arranged in connection with a single cone, or its equivalent, to each group, that the explosion of the cap, or its equivalent, shall fire the whole group to which the cone upon which it was exploded belongs, the whole being constructed and operating substantially as set forth."

No. 23,088. William W. Huse, of Brooklyn, N. Y., for an "Improvement in manufacture of tin foil."

"I do not claim to have invented the manufacture of tin foil with a filling of lead; but what I claim as my invention, and desire to secure by Letters Patent, is, the production of tin foil, having but an outer casing of tin or its alloy covering a filling of lead, or its alloy, by the reduction by pressure of a cylindrical bolt of the latter metal or alloy, which has been previously coated by dipping with the former metal or alloy, and the repetition of the dipping at suitable stages of the reducing process, substantially as herein described."

No. 23,089. Peter Kessler, of Belleville, Ill., for an "Improvement in apparatus for distilling."

"What I claim as my invention, and desire to secure by Letters Patent, is, the employment of the stills A, B, and cooler Q, in combination with the vessels E, I, K, as described and shown, when said vessels are arranged so as to have a tapering space L, and an intermediate circulating passage G, *a*, *b*, J, *c*, between them, substantially as and for the purposes herein set forth."

No. 23,090. David P. Kinyon, of Raritan, N. J., for an "Improvement in harvesters."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement of the frame H, which supports the driving wheel F, so that the adjustment of the relative position of the driving wheel and cutter is effected by the leverage of the inner frame in the manner described for the purpose as set forth."

No. 23,091. F. C. Kneeland, of Hartford, Wis., for an "Improvement in horse-rakes."

"Having described my invention, I claim as new, and desire to secure by Letters Patent, the arrangement and combination of the shaft (c^1), pivoted within the frame F, and provided with the treadle G, arms (*h*), and bar (*i*), with the frame F, when the latter is pivoted to the axle A, all as and for the purpose herein shown and described."

No. 23,092. Hazard Knowles, of New York, N. Y., for an "Improvement in fastening bands on bales and packages."

"What I claim as my invention, and desire to secure by Letters Patent, is, the method substantially as above described of fastening the ends of a metallic strap or hoop by passing each end of the strap or hoop through a slot in a metal plate, one edge of which slot is formed with a bent lip on the outer face, bending the end of the strap or hoop over and outside of such lip, and hammering or clinching down both the end of the strap and the lip that the strap or hoop may be clasped or held irrespective of the body, which is to be strapped or hooped substantially as described."

No. 23,093. Joseph G. E. Larned, of Brooklyn, N. Y., for an "Improved boiler for generating steam."

"What I claim as my invention, and desire to secure by Letters Patent, is, first, I claim the substitution for the parallel or concentric sheets of boiler plate ordinarily used to form the fire box of steam-boilers of a continuous row or rows of upright water-tubes, set side by side, to connect the steam drum or water space above the fire, with a water bottom below it, in such way as to form by themselves a water jacket, said tubes being inserted in the sheet above and below by means of necks or smaller continuations, the diameter of which is so much less than that of the tubes as to leave a sufficient thickness of metal between adjacent perforations of the sheet, when the tubes are placed near enough together to answer the purpose of enclosure, expressly disclaiming however the use of such necks or smaller continuations in themselves considered, or for any other purpose or in any other arrangement than that herein set forth. Second,

the combination of rows of water tubes set side by side by side, to enclose the furnace, with tubes arranged annularly, to give increased surface, without reference to the particular method of inserting the enclosing or arranging the annular tubes. Third, the method of inserting the innermost of the tubes when arranged in pairs, one within the other, as described, so that they may be taken out and put back at pleasure, and without injury, by means of a screw or locknut joint at one end, and a combined screw and expansion joint at the other."

No. 23,094. Edwin Laurence and Robert Safley, 2d., of Waterford, N. Y., for an "Improvement in pumps."

"What we claim as our invention, and desire to secure by Letters Patent, is, a circular reciprocating double-acting pump, that will both raise and propel water on both sides of the cylinder at one and the same time, and by the same motion of the arms or piston, substantially as herein-before set forth."

No. 23,095. A. F. Ledbetter, of Westminster, N. C., for an "Improved apple-cutting and coring machine."

"I do not claim the cutter E separately, for such device or its equivalent has been previously used; but having thus described my invention, what I do claim as new, and desire to secure by Letters Patent, is, the cutter E attached to the reciprocating frame C, in connection with the annular opening *i* in the bench A, and with or without the spout *g*, the parts being arranged to operate as and for the purpose set forth."

No. 23,096. Lewis W. Leeds, of New York, N.Y., for an "Improvement in apparatus for heating buildings."

"I do not claim broadly the use of steam as an agent for heating water; but what I claim as my invention, and desire to secure by Letters Patent, is, combining the uses of steam and water for heating buildings by means of one or more water vessels, combined with a separate steam boiler, and applied in such manner that the steam from the said boiler is employed only to heat the water in the said water vessel or vessels, and that the said water vessel or vessels constitute the heater or heaters of the air, as herein described."

No. 23,097. Hiram Littlejohn, of Troy, N. Y., for an "Improved machine for crozing and chamfering barrels."

"What I claim as my invention, and desire to secure by Letters Patent, is, crozing and chamfering barrels, kegs, or casks, by turning the bulging cylinders of staves in, upon, or against suitable rests or supports and around rotating cutters, which turn in opposite direction to and describe circles of less diameter than the inside of the ends of the cylinders of staves; the cutters and the rests being so arranged together, and one or both of them made movable, that the cylinders of staves can be conveniently applied to and removed from the rests and cutters, substantially as herein set forth."

No. 23,098. William H. Long, of Lancaster, Pa., for an "Improvement in horse rakes."

"What I claim as my invention, and desire to secure by Letters Patent, is, the arrangement of lever O, shifting lever plate N, and tooth beam B, with axle A, and regulating screw L, the whole being constructed and operated as and for the purpose herein set forth."

No. 23,099. Henry Lowe, of Belleville, N. J., for an "Improvement in paper made from reeds."

"I am aware that reed fibre has been reduced to a sort of pulp, but previous to my invention it has been found impossible practically to manufacture paper therefrom. I do not claim the above-described process for preparing reed fibre, a Patent for the same having been granted me by the United States in 1858; nor do I here claim the art of making reed pulp. I do not limit myself to the above-described process of making reed paper, or to any other process equivalent thereto; but what I claim, and desire to secure by Letter Patent, is, the use of reed fibre in making paper, said fibre being prepared from the reeds, called Arundinaria Macrosperma of Michaux, and employed in the manufacture of paper, substantially as set forth."

No. 23,100. John M. Lunquest, of Griffin, Geo., for an "Improvement in pumps."

"Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is, the arrangement of cylinders B, B, B, B, piston heads C, C, C, C, ball valves *a*, *a*, *a*, *a*, air chamber F, and valves a^1, a^1, a^1, a^1, said valves being kept in position by proximity to each other, and the sides of the chamber F, substantially in the manner and for the purpose herein specified."

No. 23,101. Saml. Macferran and Stricland Kneass, of Philda., Pa., for an "Improvement in crossing for railways."

"We wish it to be understood that we do not claim, broadly, the application of inclined surfaces on railroads for receiving the flanches of the car wheels; but we claim, and desire to secure by Letters Patent, the employment of inclined surfaces at the point where two rails intersect each other, when the said surfaces are arranged in respect to the intersecting rails, substantially as and for the purpose herein set forth."

No. 23,102. Edward Maynard, of Brooklyn, N.Y., for an "Improvement in carriage spring."

"What I claim as new, and desire to secure by Letters Patent, is, attaching the returned ends of the spring directly to each other, by means of the shackle *b*, substantially as and for the purpose specified."

No. 23,103. Morris Mattson, of Boston, Mass., for an "Improvement in treatment of caoutchouc."

"I do not claim any invention described in the patent of N. Hayward, dated February 24th 1839, and especially I do claim the combination of caoutchouc and sulphur broadly; but what, therefore, I claim as my new or improved india rubber composition or manufacture as made in manner substantially as specified, without any of the oxide of lead, but of caoutchouc, sulphur, and one or more ochres, or an earth or earths containing one or more finely divided oxides of iron, and employed in a quantity much greater than necessary for simply affording color to the compound, the quantity being essentially in the proportions as herein-before stated, or such as will afford the economical and useful results as explained."

No. 23,104. John G. Mitchell, of Collington, Md., for an "Improvement in motive power."

"Having thus fully described the nature and operation of my invention, what I claim as new, and desire to secure by Letters Patent, is, the application of weights A, A^1, and B, B^1, in connection with the shaft C, and treadle K, so that when disconnected from the treadle K, the weights A and A^1, and B and B^1, are in equilibrio, and subject to be moved by any agency applied to either weight at the end of the lever or arms, so as to produce motion in the machinery at the termination of the machine proper at I, arranged and operating in the manner and for the purpose above described."

No. 23,105. James Montgomery, of New York, N.Y., for an "Improvement in the construction of steam vessels."

"I claim as new, and of my invention, and desire to secure by Letters Patent, 1st, constructing the hulls of vessels with one or more cavities in the bottom, commencing at or near the stern, increasing in capacity sternwards substantially as and for the purposes set forth. 2nd, constructing the bottoms of vessels with corrugations extending from stem to stern, as set forth, which give strength to the hull, and a portion of which form the cavity or cavities above referred to. 3rd, the described combination of an inclined screw propeller with a hull, constructed as set forth. 4th, two or more rudders operating as set forth, in combination with the described longitudinal cavities in a ship's bottom."

No. 23,106. Robert Niven, of Gates, N.Y., for an "Improvement in potato diggers."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination and arrangement of the shoe or share G, endless screen H, and pendant or supplementary riddle N, with the frame A, and side plates D, sinuous slots C, and slotted levers R, operating conjointly, substantially as and for the purposes herein set forth."

No. 23,107. A. H. Nordyke, of Richmond, Ind., for a "Machine for printing the address on newspaper, &c."

"What I claim as my invention, and desire to secure by Letters Patent, is, first, the arrangement of an endless convey or A, for feeding the envelopes under the forms to receive the impressions and delivering the same after printing, in combination with a driving set wheel D, as herein above set forth. Second, I claim the two inclined tracks K and L, arranged one above the other, in such manner that the forms may be carried up the inclined track K, and delivered upon the inclined track L, and brought by their own gravity down said track, and under the pressure rollers

N, and from thence to the point of discharge, as herein described. Third, I claim the arrangement and combination of endless band *g*, catch *i*, and jointed track K, for taking the forms from the end of said track K, and delivering them upon the lower track L, all arranged and operating as described."

No. 23,108. Oscar S. Oaks, of South Rutland, N. Y., for an "Improvement in roofing cement."

"What I claim as my invention, and desire to secure by Letters Patent, is, the employment, in combination with the other substances herein specified, of the alkaline solution of shellac, and the sulphate of baryta, the whole being compounded substantially as and in about the proportions herein set forth."

No. 23,109, Anson Olcott, Lakeport, N. Y., for an "Improved rotary shingle machine."

"I make no claim to any of the parts of the machine, separately considered; but what I claim, and desire to secure by Letters Patent, is, the combination of guides *c*, c^1, springs *d*, d^1, connected therewith, slide *o*, reciprocated from the movement of the cutter wheel, and the single cutter K, the whole constructed, arranged, and operating substantially as described."

No. 23,110. Geo. T. Parry and Hampton W. Evans, of Philadelphia, Pa., for an "Improvement in governor for steam engines."

"We claim, and desire to secure by Letters Patent, one or more revolving weighted spring levers K, in combination with the sleeve I and the connections herein described, or their equivalents, between the said sleeve and levers, when the latter are hung to pins placed at such a distance from the centre round which they revolve, that the weights at the end of the levers shall move in the arc of a circle contained within or partially within the circle described by the said pins, as herein set forth, and for the purpose specified."

No. 23,111. Andrew Patterson, of Birmingham, Pa., for an "Improved churn."

"Disclaiming therefore all arrangements and devices which are not identical in principle, purpose, and mode of operation with those herein substantially described, I therefore claim and desire to secure by Letters Patent, the combination of the chamber *a* with the chamber *b*, when said chamber *b* serves the double purpose of a lid or covering for the cream in chamber *a*, and a frame for the dash wheel, driving wheel, and crank, substantially as described and set forth."

No. 23,112. John K. Peters, of New York, N. Y., for an "Improved ship's propeller."

"Having thus described my invention, I claim as new, and desire to secure by Letters Patent, the arrangement and combination of stops (*c*, *d*,) arm A, and blade C (more than one blade with the stops being combined with the arm A, when desired), all substantially as and for the purpose herein shown and described."

No. 23,113. Daniel Powers, of Philadelphia, Pa., for an "Improved lock."

"Having thus fully described my improved lock, what I claim and desire to secure by Letters Patent, is, the independent movable expanding and contracting fence, or its equivalent, substantially as above set forth. I also claim the union of the upper and lower halves thereof, as herein specified."

No. 23,114. Noah Pratt, of Nicholson, Pa., for an "Improved center board for vessels."

"What I claim as my invention, and desire to secure by Letters Patent, is, applying the center board and the appliances for operating the same in a movable box or curb, which is so fitted into a well-hole or a stationary curb built into the vessel as to be capable of being lifted out of said well-hole or curb with the center board and all its appliances, substantially as herein described."

No. 23,115. Daniel Ranck, of Intercourse, Pa., for an "Improvement in harvesters."

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the inclined planes H, and springs I, crank K, and connecting rod L, spindle or pivot E, sliding rake head R, and curved supports B, T, and C, when these several parts are arranged in the manner described for the purpose specified."

No. 23,116. Isaac Rulofson, of Penn-Yan, N. Y., for an "Improvement in ploughs."

"What I claim, and desire to secure by Letters Patent, is, the arrangement of beam A, standard B, landside strip D, share E, mould board C, and piece H, the whole being constructed and united as and for the purpose herein set forth."

No. 23,117. George E. Safford, of New York, N. Y., for an "Improved screw propeller."

"The particular improvement which constitutes my said invention, and which I claim as having been originally and first invented by me, is, the hub B, B, made in two discs with spiral or inclined slots to receive the floats when the floats are removably secured to the hub in the manner described, and the whole being constructed substantially as and for the purpose set forth."

No. 23,118. Emilius N. Scherr, of Philadelphia, Pa., for an "Automatic bell-ringer."

"What I claim, and desire to secure by Letters Patent, is, the herein described manner of automatically producing music from bells by the employment of adjustable pins *b* in the barrel A, actuated by clockwork or other motive power, and giving motion to the hammers D in any manner equivalent to that herein shown and described."

No. 23,119. D. P. Shaw and F. C. Brown, of Rochester, Ind., for an "Improvement in smut machine."

"We do not claim a curved blast spout K, nor do we claim separately any of the parts; but we do claim as new, and desire to secure by Letters Patent, the arrangement of the blast spouts K, L, with the scouring device enclosed within the cylinder I, and with the fan box C, in connection with the tubes J, J, substantially as shown, whereby the grain is subjected to a continual blast during the whole of its passage through the machine, to wit, prior to its advent into the cylinder I while being acted upon by the scourer, and after it leaves the scourer, substantially as described."

No. 23,120. William N. Slason, of South Reading, Mass., for an "Improved washing machine."

"I claim the arrangement and combination of the squeeze gratings or boards with the reciprocating dasher or wash or rinsing chamber. I also the application of the separate soap chamber to the wash or rinsing chamber, in manner and for the purpose set forth. I also claim the arrangement of the windlass with reference to the box A and brake C, and for the purpose as specified."

No. 23,121. Jacob Stear, of Smicksburgh, Pa., for an "Improvement in water wheels."

"What I claim as new, and desire to secure by Letters Patent, is, the combination of the cylinder *i*, inclined ribs *k*, and disc L, with its buckets L^1, the whole constructed and operating essentially as herein-before described."

No. 23,122. Alexander Stephens, of Baltimore, Md., for an "Improvement in constructing wharves."

"I do not claim brace piles, nor the springing of piles into position, as new or novel; but I do claim as my invention, and desire to secure by Letters Patent, brace piles driven at a suitable angle, and having their heads so drawn back as to secure a purchase from the footing of the pile when combined with vertical piles and capping logs, substantially as before described."

No. 23,123. Robert L. Stewart and John Christopher, of Ligonier, Pa., and Ross Forward, of Somerset, Pa., for an "Improved hearth for working and refining iron."

"We do not wish to be understood as claiming the steam chamber and perforated hearth herein described, of any particular shape or dimensions as applied in the various ways set forth, but claim its application in any shape or size required for the purpose mentioned; and what we specifically claim, and desire to secure by Letters Patent, is, the steam chamber C, and perforated hearth B, as in the specifications and drawings described, for the uses and purposes therein set forth."

No. 23,124. G. W. B. Stoy, of Carlisle, Pa., for an "Improvement in apparatus for slaughtering hogs."

"I claim the arrangement of the virtical shafts E, Q lever G, and bar R, with the virtical rotating shaft N and the rectangular frame B, C, D, and O, P, the whole being constructed as and for the purpose herein set forth."

No. 23,125. N. G. Thorn, of Dayton, Ohio, for an "Improvement in mashing."

"I claim, first, the perforations in the pipes *e*, *e*, *e*, and *c*, attach'd to the hollow arms *d*, *d*, d^1, or any analogous device, by which water, steam, or air, is admitted into the mash tub in such manner as to distribute it equally, or nearly so, to all parts of the mash. 2nd, the spiral agitators, when attached to any revolving machinery, for the purposes set forth. And, 3rd, the surface agitators of whatever form when attached to revolving tubes, for the purpose set forth. And, 4th, the use of a self-packing joint applied to mash tubs, when used for the purpose set forth, in whatever form it may be constructed. And, 5th, the combination of the surface agitators with a stationary or revolving blast."

No. 23,126. Amos G. Thompson and Andrew J. Thompson, of Belleville, Ohio, for an "Improvement in corn planters."

"We claim the arrangement of spiral springs *a*, *a*, in combination with cross bar E, and straps *o*, *o*, for regulating the movement of the plungers B, B, substantially as specified."

No. 23,127. Jos. N. Treadwell, of Readin, Conn., for an "Improvement in machine for scouring and hulling grain."

"Having thus fully described the nature and object of my invention, what I claim therein as new, and desire to secure by Letters Patent, is, in combination with a bed stone and runner for scouring and hulling grain, the grooves *c*, *c*, and rasping plates H, I, skirting said grooves, said parts being arranged and operating together substantially, as and for the purpose herein set forth."

No. 23,128. A. Van Trump, of Lancaster, Ohio, for an "Improvement in sugar cane mills."

"What I claim as my invention, and desire to secure by Letters Patent, is, 1st, the combination in a sugar cane mill of two or more intermediate small feed rollers C, C, with four or more large crushing rollers B, B, B^1, B^1, substantially as and for the purposes set forth."

No. 23,129. Matthias Vandenburg, of Newark, N.J., assignor to Franklin Berry, of Owego, N.Y., for an "Improvement in skates."

"What I claim and desire to secure by Letters Patent, is, first, an elastic front to confine the foot to the skate. Second, rendering the foot-board adjustable to feet of various widths by constructing it in sections."

No. 23,130. George Vogt, of Philadelphia, Pa., for an "Improvement in piano-fortes."

"What I claim, and desire to secure by Letters Patent, is, the employment of the herein-described rest and bridge, either separately or combined, when the same are constructed and operating substantially in manner and for the purpose set forth."

No. 23,131. Allexey W. Von Schmidt, of San Francisco, Cal., for an "Improved water-meter."

"I claim combining with the propeller B, the radial partitions or feathers *k*, *k*, and the reacting shutes *m*, *m*, said feathers and shutes being arranged and operating as herein set forth."

No. 23,132. Russell Warner, of Brattleboro', Vt., for an "Improvement in harvesters."

"What I claim as new, and desire to secure by Letters Patent, is, 1st, the circular cutters *q*, attached to bars *r*, at the lower ends of rotating shafts *k*, and having an independent rotating motion given them by means of the gearing *s*, *a* ×. 2nd, the combination of the cutters *q*, plates *n*, *p*, and snafts *k*, with or without the sharpeners *a* × or *c* ×, arranged as shown to operate as and for the purpose set forth."

No. 23,133. William H. White, of Garrettsvill, N.Y., for an "Improvement in horse rakes."

"What I claim as my invention, and desire to secure by Letters Patent, is, the employment of the two levers A, C, when crossed diagonally and pivoted together at *d*, in combination with the turning rake head D, frame C, and seat B, B^1, substantially as and for the purposes set forth."

No. 23,134. John M. Whitney, of Bolton, Mass., for an "Improvement in ploughs."

"The arrangement of the hinged arms C, D, adjustable brace E, and standard A, with the wheel H, and plough beam G, the whole being constructed for operating substantially as and for the purpose herein described."

No. 23,135. John M. Whitney, of Bolton, Mass., for an "Improvement in cultivators."

"Having thus described the construction and operation of my improved horse hoe or cultivator, what I claim therein as new, and desire to secure by Letters Patent, is, the arrangement of the teeth *a*, adjustable mould boards D, frames A, A^1, and cross beam B, with the branched swivel bars L, and frame H, the whole being constructed as and for the purpose herein described."

No. 23,136. John E. Wootten, of Philadelphia, Pa., for an "Improved gauge cock."

"Having thus fully described the construction and operation of my improved gauge cock, what I claim, and desire to secure by Letters Patent, is, the arrangement of the tube A, *a*, in combination with the cam C, rod F, and valve E, for the purpose and in the manner herein set forth."

No. 23,137. Albert A. Wood, of New York, N.Y., for an "Improvement in valve gear."

"The particular improvement which constitutes my invention, and which I claim as having been originally and first invented by me, is, the combination of the links D and E, E^1, attached to the eccentric rod, and arranged with adjusting gear, as described, or in manner equivalent."

No. 23,138. Joel R. Bassett, of Cincinnati, O., assignor to himself and A. E. Bateman, of said Cincinnati, for an "Improvement in making bolts and rivets."

"What I claim as my invention, and desire to secure by Letters Patent, is, the die (A, A^1,) (*a*, *a*,) (*i*, *i*,) (g^1, g^1,) (*f*, f_1) and (*k*, *k*,) substantially as described for the purposes set forth."

No. 23,139. Franz Anton Lohage, of Unna, Prussia, assignor to Edmd. Leopold Benzon, of Boston, Mass., for an "Improvement in the manufacture of steel."

"What I claim as my invention, and desire to secure by Letters Patent, is, the new or improved art of manufacturing steel of any desired temper or hardness, according to the various purposes or uses for which the steel may be required, by arresting the decarbonization of the mass of metal in the furnace at certain points or stages thereof, ascertained and recognized by means of certain phenomena, or external indications, manifested by the material, substantially as described."

No. 23,140. Philemon Stewart, of New Lebanon, N. Y., assignor to the Auchampaugh Brothers, of said New Lebanon, for an "Improved cast iron fence post."

"Having thus fully described the nature of my invention, what I claim therein as new, and desire to secure by Letters Patent as a new article of manufacture, is, a cast iron fence post, constructed with flanges to protect the ends of the fence rails against being split, as well as against moisture, and substantially in the manner herein described."

No. 23,141. David E. Paynter, of Philadelphia, Pa., assignor to himself and Israel M. Bissell, of said Philada., for an "Improvement in manufacture of precipitated sulphur."

"I do not claim broadly precipitating a boiled solution of sulphuret of calcium; but I claim and desire to secure by Letters Patent, manufacturing precipitated sulphur from the ashes resulting from the combustion of gypsum and coal dust, in the manner herein described, and for the purpose specified."

No. 23,142. James Jenkinson, of Williamsburgh, N. Y., assignor to himself and Emanuel Mandel, of said Williamsburgh, for an "Improvement in tempering steel springs."

"Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is, arranging the wires *c*, *c*, in such a manner, that by tying one end of each of the same to one of the arms of the wheel on which the coil is formed, and by extending the ends so tied down to the hub of the wheel, the loose ends of the wire serve to fasten the several rings of the coil, substantially as described."

No. 23,143. W. W. Hollman, of Eddyville, Ky., for an "Improved measuring faucet."

"Having fully described the construction and operation of my improved measure faucet, what I claim therein as new, and desire to secure by Letters Patent, is,—1st, In combination with a faucet piece, having an induction and eduction pipe, a receiving and variable measuring chamber, so constructed and arranged, that by partially rotating it within the said faucet pin the liquid will be alternately received and discharged through a port or ports, substantially as herein-before described. 2nd, Making the rod B polygonal, when used in combination with the variable measuring chamber and its piston, substantially as described, for the purposes set forth."

Re-issues.

Charles R. Edwards, of Niagara City, N. Y., for, &c.—Patented 8th July, 1856.—Re-issued 1st March, 1859.

"Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is, the employment of a single shaft, operated internally, and operating externally upon a window blind, when said shaft is made to effect the double purpose of operating both the blind and its slats; and this whether I construct and arrange the hinge and levers in the manner herein specified or not."

Gelston Sanford, of Poughkeepsie, N. Y., for, &c.—Patented 9th March, 1858.—Re-issued 1st March, 1859.

"Having thus fully described my improvement and the operation thereof, what I claim is, constructing a grinding mill with flat plates dressed on both sides, having a longitudinal reciprocating vertical and oscillating motion, in combination with flat stationary plates likewise dressed on both sides, the whole constructed and operated substantially as described. 2nd. I claim the notched form of the upper edges of the plates for the purpose preventing the mill from choking, and to facilitate the feeding of the article to be ground between the grinding surfaces."

Design.

Alen Beckers, of New York, N. Y., for a "Design for stereoscopic case."

"What I claim as new, and desire to secure by Letters Patent, is, forming a case A, with the columns B, the entablature C, and the lid D, arranged so as to form a new and ornamental design, in the manner herein described."

Additional Improvements.

John J. Croy, of Caledonia, Mo., for, &c.—Patented 3rd February, 1857.—Additional Improvement dated 1st March, 1859.

"What I claim as new, and desire to secure by Letters Patent, is, 1st, the adjustable gauge D, attached to the tube A, substantially as and for the purpose set forth. 2nd, the employment or use of the temper or set screws B, C, applied to the tube A, as and for the purpose set forth. 3rd, the gauges H, fitted in the bars F, F[1], of the clamp cutter head, all the above parts being arranged and operating as herein specified."

Henry W. Covert, of Rochester, N. Y., assignor to M. Briggs, of same place, for, &c.

"What I claim as my invention, and desire to secure by Letters Patent, is, the combination of the disc D and center V, toothed or corrugated, substantially as represented, for the purpose of fastening them securely together; but I do not confine myself to any particular size or shape, or number of teeth, nor to any particular position on the disc or center."

William Riley, of Maddison, Miss., for, &c.—Patented 27th April, 1858.—Additional Improvement dated 1st March, 1859.

"What I claim as my improvement, and desire to secure by Letters Patent, is, the cover or shade *a*, the rim or front marked *e*, and the pan marked *h*, as described above."

List of Specifications, &c. published during the week ending 25th March, 1859.

No.	Price.	Subject-Matter.
		1858 (*Memorandum of Alteration.*)
545*	6*d.*	Lighting and ventilating.
1811	3*d.*	Compound for insulating electric telegraph wires, &c.
1858	1*s.* 11*d.*	Obtaining and applying motive power.
1891	9*d.*	Manufacture of air-tight bottles, jars, &c.
1892	3*d.*	Railway carriages.
1893	10*d.*	Machinery for cutting files.
1894	3*d.*	Manufacture of railway tyre bars, boiler plates, &c.
1896	6*d.*	Manufacture of alum.
1897	9*d.*	Syringe.
1898	4*d.*	Manufacture of iron and steel.
1900	4*d.*	Apparatus for submerging electric cables.
1901	8*d.*	Metallic stay busks.
1902	3*d.*	Funeral carriages.
1903	1*s.* 4*d.*	Apparatus for generating steam.
1904	6*d.*	Sewing machines.
1905	10*d.*	Circular looms or knitting frames.
1906	1*s.* 1*d.*	Machinery for combing and heckling fibrous materials.
1907	3*d.*	Purifying gases and liquids.
1908	3*d.*	Cruet and liqueur stands.
1909	3*d.*	Distillation of coal.
1910	3*d.*	Distillation of bituminous matters.
1911	3*d.*	Fire-arms, &c.
1912	3*d.*	Composition for rendering substances uninflammable.
1913	7*d.*	Reefing sails.
1914	10*d.*	Manufacture of umbrellas and parasols, &c.
1916	3*d.*	Electric telegraphs.
1917	3*d.*	Shirt.
1918	6*d.*	Windlasses.
1920	3*d.*	Boring instrument for mining, &c.
1922	3*d.*	Book slides or holders.
1923	9*d.*	Mounting band saws.
1924	4*d.*	Insulating telegraphic wires or conductors, &c.
1926	3*d.*	Machinery for preparing flax, wool, &c.
1930	3*d.*	Machinery for manufacturing saw backs.
1933	10*d.*	Obtaining, applying, and transmitting motive power.
1936	3*d.*	Telegraphs.
1939	5*d.*	Reading chairs, &c.
1940	5*d.*	Apparatus for regulating the flow of gas, &c.
1942	7*d.*	Wet gas meters.
1944	3*d.*	Purification of gas.
1946	3*d.*	Manufacture of glass, &c.
1950	9*d.*	Cupola furnaces.
1952	3*d.*	Manufacture of fancy moreens.
1962	3*d.*	Apparatus for sizing and drying woollen yarns.
1973	7*d.*	Mounting the driving bands of machinery in motion.
1975	3*d.*	Cleaning and treating cotton and woollen waste, &c.
2007	6*d.*	Vinous and fermented liquors.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.
